THE INSTRUMENT OF QUALITY

CANNED MUSIC MAKES ROUND

Plays the Whole Day Through for Our Men and the Wounded French.

By JUNius B. WOOD.

(Cable to the New York Globe and Chicago Daily News. Copyright, 1877.)

THE AMERICAN ARMY IN FRANCE. Dec. 11.—In a certain unmarked spot a few miles back of the French front are the long one-story frame barracks of a regiment of American railroad engineers. These buildings, with those of a French hospital, near which is a cemetery that is daily growing larger, form a marshalled military city top and night. The American think trains up under fire and return to sleep and rest in the barracks.

Every morning, and sometimes afternoon, according to how the fighting goes, they bring in a long train which stops at an equally long platform while its load of helpless, suffering, and hungry humanity is put into the wards of the adjoining hospital. Each one who is more severely wounded is taken farther to more comfortable and permanent hospitals in southern France. The wounded have been in great demand in the temporary field dressings and are often far from hospital. There has been an opportunity to speak off the dirt of the trenches, but the patients are hurried to the field dressing station to prevent them from being on back the flickering flame of life.

In that war-born city is one phonograph. Grand opera singers, amusing airmen, and entertaining speakers do not come to that hospital in the way that a single box of "canned music" is all they have to relieve the monotony of the jarring locomotives, the sick groans of their fellow wounded, and their own groaning pain. Occasionally German bomb dropping machines seem to be sent out to permit those fragiles of humanity escape.

It Is Never Silent.

One thoughtful New York mother sent this ray of brightness to her son, a captain in a railroad regiment. He turned it over, records and all, to the hospital so that all might use it. Now it is never silent day or night until the sounds. Early in the morning it starts on its rounds through the hospital wards and by evening it reaches the Y. M. C. A. hut and strums the night on a rough pine board table in the officers' quarters grinding out the old, familiar home tunes.

Occasionally when work has slackened the owner goes himself to run the machine. Here is his description of a Sunday afternoon in that strange city:

"I spent an hour and a half playing the machine in a ward where two men carried the records. They were from sixty-five to seventy-five men in the ward. Some were suffering from pneumonia and still others were terribly burned by mustard gas. Nearly half of the remainder had not been daylight for a long time. All eyes seemed to be bandaged and there was an everlasting coughing.

"I started off with the 'Merrie Melodies' and every last man who had an ounce of strength left in his system sat up on his cot at salutes and tried to raise a bandaged hand if one was left. After that we had some American marching songs, comic opera, grand opera, and everything left on the phonograph.

Records Nearly Worn Out.

"We have used those records until they sound like the proverbial tin can. I wrote to America a couple of months ago for more, but they never materialized. The machine works all day in the hospital and sometimes only when the patients have gone to sleep. It would be a calamity if they were deprived of its solace."

For military reasons I am not permitted to give the name or location of this American regiment which, in addition to its war work of carrying forward ammunition and supplies and bringing back the wounded and dying and also spreading the good illuminations of music. However, anybody who wishes to send the records can send them to me and the American phonograph. Afternoon here will see that they are delivered. Anything in the line of music is a balm in the ears of the wounded, even of the French Polka, who does not understand English.

LIMIT FREE DELIVERY OF RECORDS

Dealers Inclined to Fix a Limit on Number of Records That Will Be Delivered Without Extra Charge to the Customer—Cuts Into Profits

Retail stores throughout the country, particularly the big department stores, have at the suggestion of the Federal authorities, and as a result of the labor shortage, been making every effort to cut down the volume of free delivery of goods, and at the same time much of the expense of the system by educating the public to carry away with them all small parcels. A number of talking machine men have fallen in line with the campaign, with a view to cutting down the volume of record deliveries. In St. Louis, for instance, the talking machine retailers have entered into an agreement to refuse to deliver free less than six records. In other words, a customer buying five records must carry them home himself or pay additional delivery charges. It would seem to be a move in the right direction, of course, particularly if factors of price and convenience are taken into consideration, the net profit on an individual record, particularly of the popular type, is comparatively small, and to pay out as much as 50 per cent, or more of the profit, to carry delivery does not seem to be good business. The practice has been carried on in the past under the broad term of service, but in the future no retailer would expect his customer to pay for enough records personally to balance it, but a definite rule on deliveries, and the minimum set on the number of records that will be delivered without charge, eliminates the element of chance. It gives the dealer what is due him as profit. It is just one of the trade improvements that can be said directly to wartime conditions.

WOULD MAGNETIZE NEEDLES

One Writer Believes That It Would Prove Convenience to Talking Machine Owner

A writer in "System" makes the following suggestion regarding the handling of needles that might prove of interest to some members of the trade. He says: "I would magnetize my steel reproducing needles so that instead of lying flat in a tray and scattering all over its surface they would bunch together. This would make them much easier to pick up and would prevent them from rolling out of the tray at every jar.

"When any of them fell into the top of the phonograph, instead of being compelled to pick them out one by one, my customers could easily brush them into a corner and remove them all at once. The same would be true should the tray containing them be upset."

ON "GOING AFTER BUSINESS"

"Only about one sale in ten is a floor sale—the other nine are accomplished almost entirely by outside effort, by carrying the instruments out for home demonstration," remarks W. H. Stokes, Edison dealer at Grinnell, Iowa.

"There is more than a grain of truth in what Mr. Stokes writes," says the Editor of Edison Diamond Point, who are many of them. We have long preached home demonstrations and outside canvassing. The man who stands behind a counter all day and waits for customers to come to him will wait a long time. You should leave your counter and go after business.

"Time was when the dealer did not find it necessary to go after business. Times have changed.

"I hauled out eleven instruments into the country and sold nine of them inside of two weeks," writes Chris Verwors, of Keota, Iowa.

"If you pull off a customer one time, he will be a customer the rest of his life. As a result I charge Silver puts it 'Crank her up and hit her hard for those sales that won't come to you.'"

This suggestion is well worth considering.

BERLINER'S LATEST INVENTION

Canadian Talking Machine Man Produces Flying Dirigible Torpedo Usable on Land or Sea Which Has Attracted Considerable Attention

Emile Berliner, widely known through his inventions in the talking machine trade, and whose improvements in the telephone made long-distance talking over a wire practicable, is now the inventor of a flying "dirigible torpedo," utilizable on land as well as on sea.

Dr. Berliner's contrivance is in effect a small aeroplane—a monoplane in miniature—run by a little gasoline engine and motor and carrying a propeller and a rudder that is set before launching. It has other means of automatic control, with a gyroscope to keep it level.

The machine is nothing more nor less than an artificial bird that holds a torpedo in its beak. More definitely speaking, the torpedo, carrying a heavy charge of high explosive, is held by spring arms in front of the little aeroplane, so as to be set off on striking the target.

For use on the sea, the flying torpedo may be modified by attaching beneath it a small plane set at such an angle that the machine on striking the water will slip along over the waves toward an enemy ship, the difficulty of hitting it with gunfire being thereby greatly increased.

Dr. Berliner's latest invention has been the subject of considerable notice in leading papers.

SOLDIERS WHO ARE REAL ARTISTS AS WELL AS ARTISANS

Members of Company B, 306th Infantry, Make Special Case for Popular Priced Talking Machine Which They Find the Keenest Source of Pleasure and Entertainment in the Camp

The talking machine is undoubtedly the greatest comfort to the men in the camps, as it is to the men in the trenches at the front. No other musical instrument affords them such pleasure, because it brings into their lives the

With the price of printed matter still soaring skyward and with mailing costs materially advanced by the war tax, the telephone may come into more general use as a means of selling records. Merchants in a great many lines of trade outside of the talking machine field have been steadily placing greater dependence on the telephone as a means of keeping in intimate touch with their patrons. In fact, it seems logical to presume these merchants in other fields have broken the ice, so that the increased use of the telephone by talking machine merchants will be cordially received.

A certain talking machine dealer has adopted the plan of mailing out the new record lists each month and then instead of following up his customer by mail, he calls each one by phone, runs over the list somewhat after the manner of a grocer enumerating household necessities, and, where the customer evinces interest, he places that record on the group to be sent up on approval. When the records are delivered, a personal letter accompanies them, outlining the individual beauty of each record. Thus the dealer introduces a maximum of the personal element at a minimum cost.

MAKING THE TELEPHONE AID SELLING

Proper Use of Telephone Frequently Means Time and Money Saved for the Talking Machine Dealer Who Uses Some Originality in Work
Why 1918 Holds Great Possibilities For Every One In The Talking Machine Trade

FROM almost every angle 1917 has proven a most unusual year in the talking machine industry. It has been a year to test the stability and permanence of the trade and be it said that the trade has not been found wanting under the test. War has brought with it many problems for both talking machine manufacturers and dealers. Its effect has been first of all to curtail supplies and labor, and to hinder the transportation of peace products to an alarming degree. But, on the other hand, it has brought with it a wide recognition of talking machines and records as genuine essentials in the equipment of military units. The coming of the New Year sees the talking machine more firmly entrenched than ever in the hearts of the people, and as a result the future looks bright indeed.

Review of Holiday Business in Machines and Records

Despite the war and despite the high cost of living and other factors connected therewith, the holiday business in talking machines and records reached proportions that swamped the facilities of both producers and retailers. Conditions made it impossible for many of the manufacturers to keep their output up to a point reached the previous year. Transportation problems likewise have had their effect, and there really seemed to be something the matter with the dealer who could say he went through the month of December without suffering serious loss of sales in some manner and through no fault of his own.

It was a noteworthy fact that the big demand was for machines selling in the neighborhood of $100, and therefore, the most serious shortage was in that type of machines. Machines retailing at from $20 to $40 were not such good sellers, and both jobbers and dealers had the experience of seeing these machines lie on their shelves without moving while at the same time they were turning down orders for the more expensive models, or at least endeavoring to install temporary substitutes.

Factories Couldn’t Turn Out Records Fast Enough

The record situation was similarly embarrassing. Aside from the call for standard vocal and instrumental numbers, it seemed that everyone who owned a talking machine or expected to own one, wanted records of “Over There,” “Goodbye Broadway, Hello France” and the other hits of the day, and the result was that the record supply in no sense met the demand. Of course there were plenty of records, but while they were frequently accepted as substitutes, they were not just what the public were crying for. The factories could not simply turn out the required records fast enough. It was impossible, and the result was embarrassing.

In order to relieve the record situation and help clear up the jobbers’ and dealers’ shelves and to enable the factories to catch up with orders, several of the companies have shown an inclination to cut down on their monthly lists of new records. The Victor Co. has taken the first step in this direction, by including only fourteen new selections in its January record supplement, and it is stated that the same plan will be followed out for several months to come at least. Several other companies have arranged to adopt the same method, or are contemplating some such action, in an effort to clear the decks for the coming year.

The Industry on a More Permanent Basis

During the past year or so the industry may be said to have settled into more or less permanent channels, and this fact also augurs well for the future. In 1915, it will be remembered, there was a great influx of new concerns into the trade. Hardly a day passed without its group of new corporations setting forth their intention of making machines or records. They apparently felt that there was great wealth simply waiting to be grasped. There were also many new concerns in 1916, but the number had dropped off materially from the previous year.

It is quite evident that many of these corporations were of the fly-by-night variety. Their object was to sell stock and plenty of it and to offer machines at retail far under established prices and for that matter far below established quality. Many of these concerns dropped by the wayside without delay; 1917 has seen the clearing out of others, while the companies properly organized, and with the correct appreciation of the status of the trade, have survived and established what may be looked upon as permanent positions in the industry.

That the trade condition in this particular is more or less settled is a matter of congratulation for both the trade itself and the public, for it acts as a protection to both sides.

Must in Hardware to Plan Ahead

From present prospects it is safe to assume that 1918 holds great possibilities for everyone in the talking machine trade, but to take advantage of the opportunity, the trade members must have faith in the future and the courage to plan ahead. If early ordering was ever necessary, it should be doubly necessary during the months to come. It is going to be harder than ever for the factories to keep up production to a high pitch, and with the war demands on the railroads, harder than ever for the wholesale and retailers to get the goods within a reasonable time after they are shipped. It is only by working far ahead that even a fair measure of protection can be assured. In other words, the retailer who does not place his orders for holiday stocks in the spring at least, is simply taking big chances on the future of his business. It will mean tying up some capital, and perhaps a little financial strain, but the sacrifice will be worth while, if the trade members plan to stay in business.

Why the Talking Machine Is a Necessity

The big banking interests and some Government officials are preaching the doctrine of rigid economy by the general public, advising them to discontinue the purchase of anything not ranking as a necessity of life. This doctrine in itself should revert to the benefit of the talking machine trade. The fact that the Army and Navy have already absorbed thousands of talking machines of various types and thousands, if not millions, of records, and are at the same time appealing for more with the full endorsement of the officials, is the best indication that the talking machine is a recognized wartime essential. From the viewpoint of economy, it can also be viewed in a favorable light for it requires a minimum of outlay in proportion to what it has to offer. The machines themselves are comparatively low priced, and record libraries can be built up by the expenditure of only a few cents weekly. In fact, it can safely be asserted that the talking machine is one of the real “essentials” to the nation in war times.

New Year Going to Mark Important Era

From every viewpoint, it would seem that 1918 is going to mark a new era in the progress of the talking machine, as well as genuine prosperity for those members of the industry who have the courage to take full advantage of the opportunity that is there. Certain it is that the manufacturers are not letting the grass grow under their feet. While frankly able to meet only a percentage of the demand for their products, they have kept up their advertising to the full limit, and in some instances a little stronger than ordinary, and plan to do so in the months to come in order that the public may be kept in close touch with talking machines and records until such time as the industry can take full advantage of all the0 the growing opportunities that exist or will exist. It is this spirit of building for the future that is responsible for the present strong position of the talking machine.
Victor Supremacy

Victor supremacy is a real asset for every music retailer.

Just how much of an asset depends upon the retailer himself—
with no limit to the measure of his success.

AN IMPORTANT ACCESSORY—ALBUMS FOR FILING DISC RECORDS

The enormous demand for "National" Record Albums keeps pace with the ever increasing demand for machines and records, and our output capacity has been enlarged to meet the greater needed supply. Record Albums have proven themselves to be the best and most convenient, as well as economic, method of filing and keeping disc records.

THE PULLING TEST—THE STRENGTH IS THERE

STRENGTH AT THE STRESS AND STRAIN POINT PRACTICALLY UNBREAKABLE FOR REGULAR USAGE

Albums are an Indispensable Requisite in the talking machine business and wherever records are sold. An accessory that is necessary and worth while. Practical and handy. Save time and records. A profitable adjunct to the business. All owners of machines and records want Albums to file and preserve their records.

We manufacture disc Record Albums containing 12 pockets to fit cabinets of all sizes and styles. We also make Albums containing 17 pockets. With the index they are a complete system for filing all disc records.

For durability, finish and artistic design, our Albums are unsurpassed. We have unexcelled manufacturing facilities, and considering quality our prices are the lowest. Write us giving quantity you may desire, and we will quote prices.

OUR ALBUMS ARE MADE TO CONTAIN VICTOR, COLUMBIA, EDDISON, PATHÉ, AND ALL OTHER DISC RECORDS

NATIONAL PUBLISHING CO., 239 S. American Street, PHILADELPHIA, PA.

WIDDICOMB PHONOGRAPH CATALOG

Handsome Publication Illustrating and Describing New Products of This Company

The Widdicomb Furniture Co., of Grand Rapids, Mich., have just published their first phonograph catalog entitled "The Widdicomb, a Finished Product." It has been prepared in a very attractive manner and thoroughly describes and illustrates the eight Period models constituting this attractive line. They embrace examples of the Chippendale, Colonial, Adam, Queen Anne and Early American Schools. Fine coated paper is used throughout and perfectly prepared half-tone work reproduces in detail the fine architectural points of each model, which are most distinctive. On each page the slogan of the company appears, "Play it Yourself."

The various constructive and individual features of the Widdicomb phonograph are described in detail. Among the many improvements mentioned is the tone control, operated from a distance, whereby the operator by means of a decorative cord is able to give added expression to his records—the action of this modulator is similar in effect to the devices used by the manufacturers of player-pianos. The tone control is found on all models of the Widdicomb. The tone chamber, accessible record files, balance cover support are also described.

"Victrola" is the Registered Trade-mark of the Victor Talking Machine Company designating the products of this Company only.

Warning: The use of the word 'Victrola' upon or in the promotion or sale of any other Talking Machine or Phonograph products is misleading and illegal.

Important Notice: Victor Records and Victor Machines are scientifically co-ordinated and synchronized by our special processes of manufacture, and their use, one with the other, is absolutely essential to a perfect Victor reproduction.
BUSINESS during the holiday season so recently closed more than exceeded the prognostications indulged in the early part of December. Christmas trade opened up slowly, but the closing days showed tremendous activity in the demand for machines and records. Reports from correspondents in different parts of the country vary considerably as to the volume of trade, for it was most uneven in many respects. Some States showed an activity that equaled the same period of last year, while others had quite an increased trade in records but a falling off in the sales of talking machines due to local conditions and the lack of stock. But taking the holiday business of the Nation as a whole, it was, in the face of war conditions, in the main satisfactory.

Record business has assumed formidable dimensions, and this was demonstrated not only during the holidays, but during the first weeks of the New Year. While the demand for popular numbers, and particularly patriotic numbers of all kinds was large, yet there is no question but that the demands for records of standard vocal and instrumental numbers, especially the standard operas, is becoming an increasingly important feature of the record business.

Leading jobbers and dealers inform The World that this aspect of the business is as marked as it is pleasing. The growth in popularity of records of high class instrumental and vocal numbers can be greatly aided if the dealers or salesman concentrate upon bringing these records to the attention of their customers. In this way they can help to move what is usually a slow moving section of their record stock and help to elevate the musical taste of the owners of talking machines. They can do this more effectively if they know something about these high-class songs or instrumental numbers themselves—if they know the composers and the character of their compositions and impart this knowledge to the buyers of these records. In this way they give records an interest that would be lacking were the customer induced to buy one of the records without giving it the consideration which it would receive if the buyer was properly interested in the selection and its composer.

There is a big field to be developed here—one that unquestionably means much for the musical advancement of America, and one that will help in a trade way as well. The popular and patriotic records will always sell, because they are seasonable, but the standard compositions, the classics so to speak, do not sell in as large numbers as they should, largely because of the lack of attention given them by a large army of salesmen. This neglect is entirely due to their lack of real knowledge of these numbers. While the leading manufacturers of records tell something about the high-class records in their bulletins every month, yet the salesman should have a wider knowledge of the composers and of their compositions if he desires to appeal to high-class trade.

This is well worth while, for there is no question but that the artistic and musical merits of the talking machine are being more widely recognized to-day than ever before. Evidence of this fact is to be found in the records now on the market of the great symphony orchestras and of leading artists both instrumental and vocal, who are known and esteemed throughout the world.

The dealer and salesman should make a resolution this first month of the year to give more attention to their record departaments—to learn more about the goods they are handling, not merely in a commercial way, but also to know the composers and their works. In this way they will be able to meet the requirements of their particular customers, and help educate a large number of people who are ambitious to expand their record library by including records of distinct and enduring musical merit.

At no time in trade history was it so necessary to cultivate an optimistic viewpoint as far as business is concerned as to-day. The abnormal conditions brought about through the war have a tendency to bring about a hysterical state of mind that is as harmful to the individual as it is to an industry and to the nation. Now is the time to cultivate that desirable quality in the world of business which we call confidence, and which is also as great an essential in the winning of the war.

We must not give credence to every rumor that is put out portraying to calamity or trouble, for there is nothing that weakens the morale of our business forces quicker than the insidious annoying little rumors that incline one to pessimism and indifference to necessities whether of war or business.

One thing that we must keep in mind is that the Government of the United States is not willfully or willingly desirous of bringing disaster to the business men of this country despite the constant flow of "non-essential industry" news which is reaching the daily newspapers throughout the country from correspondents in Washington.

We may be in the position of an industry that is not entirely essential to the military conduct of war, but our industry is one that is wholly essential to civilization. We need not become panic stricken because one man in the U. S. A. might do without musical instruments. They said in England, when war came, that no one must dream of buying anything new, whether motor cars, pianos, talking machines, or clothes. But the folks went on buying just the same; and yet the war loans have been floated over there with complete regularity and success. Why? Because the people have found they need music almost as much as they need food; and a good deal more than they need rich, expensive food and drink.

We have enormous sums which the Liberty Loan Campaigns, past and future, will bring into the national treasury, the Government will still depend principally upon taxation to raise money for the purpose of financing the extraordinary expenditures of war. Unless the industries of the country are kept going on a profit-making basis, the Government will not be able to levy taxes. The more profit an industry makes, the greater will be its tax returns to the Government, and the larger will the war-cheat become. Therefore no sensible man will believe for an instant that the Federal authorities are going to hinder any line of business arbitrarily, or will place stifling restrictions around a business that otherwise would be able to contribute a quota towards keeping the war-funds at high-water mark.

COME what may, we are in war, and in it to win. To obtain our purpose, we shall keep business going all the time; but that does not mean that everything must go on just as it did be-
fore the war. That is impossible; and so much the better. Whatever comes in the future, every bit of brains, nerve and skill in our industry will be needed.

We must continue to make talking machines and records, and continue to sell them and sell more of them than ever before to a people who will be working, planning, organized and organizing; to a cheerful, to a purposeful, to a victory-making people. We must inaugurate and maintain a campaign of publicity that will awaken the people of America to the value of music as a necessity—as a companion that will bring comfort and cheer in days of sorrow as well as victory.

Music by means of the talking machine is a necessity. It supplies the fighting forces as well as those who are working at home for the success of the Nation with that force that replenishes and refreshes. For it is hard to define the mysterious power of music in a great crisis such as we are now going through. It is the food that nurtures the Nation's soul, that stimulates brave deeds, and that increases the determination to surmount all difficulties.

The development of export trade not only during the war, but after peace is declared, is considered by every student of the nation's needs to be absolutely essential to the progress of our country. A forward step in this direction was the passage recently by the Senate of the Webb Export Combination Bill, which it is expected will be enacted into law at an early date. This measure is a highly desirable recognition of the principle of co-operation in foreign trade which has had the support not only of the National Foreign Trade Council but of the leaders in all branches of industry. American exporters have long been greatly hampered in their efforts to compete with foreign exporters in the markets of the world by their apprehension that the Sherman Act forbade combined effort, including even the organization of joint selling agencies. The Webb Bill removes such disadvantages as may now be imposed by our anti-trust laws to the end that American exporters may be free to utilize all the advantages of co-operative action in coping with combinations of foreign rivals united to resist American competition and a combination of foreign buyers equipped to depress the prices of American goods.

The passage of the Webb Bill will mean the definite recognition by Congress of the principle of co-operation, and it should prove a very substantial benefit to the nation's export trade.

During the past year talking machine dealers in various sections of the country through local organizations have taken steps to eliminate entirely or at least control within reasonable bounds the practice of sending out records on approval, and it is to be hoped that the elimination of this practice or at least its curtailment to a negligible point will become general throughout the country during the present year. As a matter of fact present conditions offer to the dealer an excellent opportunity for taking the bull by the horns and eliminating bad business practices that have grown up with competition. Stock is going to be short both in records and machines, and with such a situation the retailer can come pretty near to picking his trade. If he has the record the customer wants make the customer buy it outright. If the records don't suit, the approval plan is not going to sell them. At the same time under that plan the records may be out of the store when somebody else is ready to buy them. Taken from every angle this is the time to clean house without facing the danger of serious loss of business to competitors.

Just at this time the presentation by the Musical League of Philadelphia of detailed figures showing that nearly $102,000,-000 are spent annually in that city and vicinity in various forms of musical activity, should serve to interest every member of the trade, no matter in what part of the country he is located.

The additional fact that there is a permanent investment of approximately $20,500,000 in musical establishments and musical instruments in that one city alone must also not be overlooked. Figures of this sort go far to emphasize the necessity of music and the part it plays in civic life. The citizens of a city the size of Philadelphia, whose population is approximately 1,700,000, do not spend an average of $60 apiece annually on a mere fad or hobby, but demand value for their money.

Talking machine men could do good work for the industry by compiling, or assisting to compile, similar figures for their respective cities or towns. The aggregate amount spent for music annually, as compiled by such means, would undoubtedly impress the country to a staggering degree. A few authentic figures are better than hours of wild conversation in securing public recognition for music and the things that make music.

At least 50 per cent. of the war rumors that are abroad these days should be summarily dissolved into thin air. Among those rumors which should receive scant attention are those purporting that this or that plant has been anywhere from 60 to 100 per cent. commandeered by the United States Government. The Washington policy as expressed by such men as Willard, Gifford and Garfield does not include drastic action against any industry. Where individual plants are utilized for war work, moreover, the manufacturer will have no reason for concealing the facts. When his plant has been taken over a manufacturer will immediately inform his clients with respect to his inability to supply them with goods, because there would be nothing to gain in a business way by holding back the truth and there is good will to lose. Therefore, unless direct word is given out by the manufacturer in person, rumors bearing on commandeering should be discounterenanced.

HAPPY NEW YEAR!

This big calendar pad has over 300 sheets of record profits. As you start to tear them off, day by day, keep Pearsall Service for Victor Records in mind. Every day in 1918 means more business; improved methods and greater profits because the efficient dealer is specializing on record sales as THE business foundation.

Full of hope, ambition and prosperity—1918. Full of pep—Pearsall Service.

SILAS E. PEARSSALL CO.

18 West 46th Street
New York
WHERE MUSIC STANDS

The merchants in your street who sell food, clothing and fuel are selling essentials to the body. You who sell music sell an essential to the mind and body.

From Confucius down through the ages practically every philosopher of note has declared that music is a human essential.

When you meet a man or woman who thinks a phonograph is an extravagance ask that man or woman if good books are an extravagance. There is scarcely anyone who would dare say that books are an extravagance, yet books have limitations that music does not have. Music, next to religion, is the world's greatest solace.

Don't be afraid to stick up for music.
War Problems in the Field of Salesmanship and How Best to Meet Them

"The worst thing about having to employ so many new clerks," said a tired talking machine dealer, as he looked about at a number of "new beginners," attempting to wait on the trade in his store during the holiday rush, "is training them. It's a job that I haven't much time for, and one that takes a lot of steam."

Yet, most of our new clerks who are not given the advantage of sympathetic coaching are sure to make a lot of mistakes, and will fail to render the sort of service customers of the store are demanding.

The soldiers who go to France are given several months of intensive training before they set on the firing line. They receive instruction in the methods of warfare which are being used in the world conflict, so that when they take their places in the trenches they are prepared for all developments.

The new salesman, especially the one just starting out in selling work, is green timber. He needs coaching and instruction. He needs to have confidence instilled into him so that he will not lose his nerve when a tough proposition is presented.

The best way to improve work in the store is to have a weekly conference or "round table." This can be made so interesting and enjoyable that the clerks, instead of dodging the meeting, will welcome it. It should be accompanied by "eats" of some sort, so that the social spirit will be developed, and bashful clerks encouraged to speak their minds.

The boss can be the chairman of the meeting, and can outline subjects for discussion, but it is a good idea for him not to attempt to monopolize the conversation.

Let salesmen, especially those who are experienced enough to be able to give good advice, discuss the problems of their everyday work, because such discussions will give the newcomers an idea of what they may expect.

The merchant can devote some of the time to the description of new models of machines and the new records, comment on changing prices, et cetera, and he can explain the policy which is back of the store, so that customers will get from sales people an expression in line with the actual policy of the establishment.

Just now, when most prices have been increased, explanations of high prices should be made intelligently, and advances not simply explained as "in the air." There is a good reason for the advance in price of every commodity which is carrying an increase, particularly talking machines, and it is a good idea to inform the sales people on this subject. Customers frequently inquire about these things, and they should be given an intelligent answer.

In the smaller store, where there are only a few clerks, the proprietor can put in odd moments to good advantage in explaining to the new employees the methods which it is intended they shall obey and something about the features of the line handled.

In this connection it is well to note that with new sales people having to be trained, now is a good time to study the arrangement and marking of record stock. Obsolete methods in this respect, which were tolerable when experienced salesmen, familiar with all of the retail outlets of the business, were in charge, make the work of new employees doubly difficult.

The arrangement of record stock in some logical way (there are several good systems in use) will enable the rawest recruit in the sales army to take care of his own work without constantly to ask questions of the dealer or one of his assistants.

The dealer who is training his help should be possessed of lots of patience. He must expect mistakes to be made, and be ready to correct them without animosity. In the case of employees who are just being broken into business harness, reproofs are often taken keenly to heart, and the dealer can afford to be generous in his attitude on this subject.

If he shows that he does not demand infallibility, but only earnest intelligent effort, he will win confidence and loyalty which will go far to keep the mistakes from being repeated.

The new clerk who is made to feel that committing an error is not fatal, but that making the same mistake twice is a capital offense, will develop a spirit of determination to do things right, and will soon display ability that will mean less need for supervision.

One night a week set aside to improve the work of new clerks is by enlisting the aid of traveling salesmen representing both the jobbers and the manufacturers.

The travelers are often just as good retail merchants as those who have stores, because they are constantly calling on the dealers, and they know good methods when they see them. Furthermore, they are nearly always more than willing to co-operate with their customers and help them in any possible way, and if they are asked to help in coaching a new hand, they will be glad to do so.

Many of these old-timers have seen service behind a counter through the years, and their suggestions are based on practical experience, and consequently are worth more than a lot of fine-sounding theories.

Sometimes a traveling man will jump in and do a little sales work himself, if there happens to be a lot doing on a busy day. An ounce of direct instruction is worth a pound of argument, and this is especially true of sales work.

After the new clerk has seen how his friend Bill, the traveling man, handles a difficult customer, and how quickly he gets under the hide of the grumpy individual whose bark is usually worse than his bite, he peraks up considerably.

Use the traveling man in the clerk's training school, but don't forget that, no matter how informal, there should be a training school.

COLUMBIA AUDITORS MEET

Second Convention of Auditing Department of Columbia Co., at Hotel McAlpin's Great Success—Important Matters Were Considered

The second annual convention of the auditing department of the Columbia Graphophone Co. was held at the Hotel McAlpin, New York, on December 28 and 29. The two-day session was devoted exclusively to a discussion of problems, methods and systems of branch auditing, accounting, stock keeping and inventorving.

Henry C. Cox, comptroller of the company, brought to the attention of the conference a new manual of instructions for the guidance of the company's bookkeepers, which will shortly be ready for distribution to the branches, and explained such of its provisions as are new. The interesting discussion of these questions of branch accounting generally was highly interesting and beneficial to everyone in attendance.

At the conclusion of the dinner at the hotel on December 28 the entire party were the guests of the company at the Century Theatre.

The conference adjourned late in the afternoon of the 29th, every one expressing appreciation of the benefit derived from the three days' discussion of so many topics of special interest.

Those present and assisting were: M. Dorian, chief auditor, and E. O. Rockwood, T. Allan Laurie, Homer Reid, H. L. Moorey, F. S. Binger, W. G. Wustenfeld, W. E. C. Heym, F. M. Snell, S. G. Gilroy, R. A. Grant, C. Kiehart and H. P. Victor. Hayward Cleveland, one of the veterans, was not able to present himself, owing to his detention on the Pacific Coast, but he sent a helpful telegram which was read to his associates, and his place on the conference table as well as at the banquet was marked by a vacant chair.

A most gratifying and highly appreciated incident of the conference was the reading of a letter from H. L. Willson, general manager of the company, congratulating the auditing department in its fine work during the year and wishing each member of the staff continued success and a Happy New Year.

TAKES CHARGE OF DEPARTMENT

H. V. Boswell, formerly with the Rudolph Wurzler Co., of Louisville, Ky., has taken charge of the Kaufman-Straus Co.'s talking machine department in that city. He succeeds Robert Duffy, who is now with the Columbia Graphophone Co., of Indianapolis.
ANNOUNCEMENT

To Talking-Machine Trade

We take great pleasure in announcing the opening of our offices. To our New York friends we extend a cordial invitation to call upon us, and to our out of town friends an invitation to make our offices their headquarters when in the city. We are now booking orders for the highest quality uniform pointed steel talking machine needles manufactured.

MADE IN AMERICA
By AMERICAN LABOR

Deliveries Begin Feb. 1st, 1918
Soft, Half-Tone, Loud & Extra Loud

INDIANAPOLIS REPORTS A PROSPEROUS HOLIDAY SEASON
Large Percentage Did Cash Business—Dealers and Jobbers Report Trade Increases as Compared With Last Year—Optimistic Regarding New Year—Interesting News Budget of the Month

INDIANAPOLIS, Ind., January 5.—The holiday business came up to the expectations of most of the local manufacturers and dealers and apparently is keeping up. The retailers are still busy selling records and machines and the wholesale men report that orders from dealers have come in almost as steadily as Christmas trade.

A noticeable feature of the business was the large percentage of cash business and the size of floor payments. Nearly all the dealers comment on this.

Ben Brown, manager of the Columbia store, said that the total increase in business over December last year ranged from nearly 30 per cent. Increases in the business of dealers in the smaller towns in his territory were especially noticed by Mr. Brown. Mr. Brown is making arrangements to go to New York to attend the conference of the Columbia managers.

At the Stewart Talking Machine Co., distributors of the Victor line, business was reported as far ahead of last year. Emerson Knight, advertising manager, said that he believed the Victor Co.'s advertising on the ground that music was more essential during war than in peace had proved effective in stimulating the business.

Jewell Cartmell, secretary of the Kipp Phonograph Co., said that business was not only bigger than last year before Christmas, but that it was keeping up and that dealers throughout their territory continued to send in orders after Christmas. The demand for a few styles caused a shortage, but the company was able to handle its Christmas orders nicely.

R. S. Goldsby, of the Pathé department of the Mooney-Mueller-Ward Co., said the demand for records had almost depleted the stock.

The new art models of the Pathé have proved popular and many orders are coming in for these, Mr. Goldsby said. The entire supply of electric Pathés was sold out.

O. C. Maurer, in charge of the talking machine department of the Kiefer-Stewart Co., said there appeared to be a strong demand for the oak machines in the Sevener machinery line of the Stewart phonograph, which the company also distributes, was remarkably good, Mr. Maurer said. Dealers also made heavy demands for the Emerson records. Mr. Maurer said the outlook for business in the coming year was exceptionally good.

H. V. Snyder, manager of the Edison Shop, said that there was an increase in total business over last year, and that from December 15 the daily sales record showed a marked increase over any previous one for the same period with larger down payments and a trend toward the higher-priced machines.

Mr. Snyder used an especially attractive window display just before Christmas. He had the window fitted out like a living room and had a woman and a five-year-old girl knitting while two small children played on the floor near an Edison machine. The Christmas spirit and the showing of the place of the talking machine in the home were well brought out. Newspaper advertising featured a similar idea.

George Standke, manager of the Brunswick Shop, is highly pleased with the first holiday business of this year, which ran above his expectations. Mr. Standke said he was pleasantly surprised at the size of the cash payments and added that he believed in selling goods and not terms. Prospects for a good year look bright to Mr. Standke.

"I did not run short of machines because I have been in the talking machine business long enough to know how to get around that," said Mr. Standke. "I did my buying early. I have never been able to understand why experienced talking machine men should ever complain of any shortage. They know what the demand for machines is during the holiday season and they ought to get their orders in early. Let them start ordering in the spring for their Christmas business. They should not expect a factory to be able to turn out their orders at the last minute."

Mr. Standke has a number of the new DeLuxe models of the Brunswick on the way and already he has sold the first sample model he got.

H. V. W. Smith, manager of the Pathé Shop, said that nearly one-third of the large Christmas business was cash, and that the record business was unusually good. The new Pathé art models which Mr. Smith has on display are attracting much favorable comment, and indications are that they will prove popular sellers. The Pathé Shop has been using animated picture advertising in local theatres, showing people dancing to a Pathé machine and this advertising is proving worthwhile, Mr. Smith said.

H. E. Whitman, manager of the talking machine department of the Pearson Piano Co., said that the holiday business showed a demand for the larger Edisons and Victrolas. The record business was so large the clerks were worked overtime in caring for the customers.

A. E. Pieffer, manager of the Starr Piano Co., said that the Starr machine enjoyed a good sale during the holidays. The fact that it plays all records made it popular with the public, Mr. Pieffer added.

Serge Hallman, manager of the Aerolian store, said that the Vocalion department enjoyed a good holiday trade, and that business was holding up nicely.

C. P. Herodman, manager of the Columbia department of the Baldwin Piano Co. store, said that his stock of machines had been so selected in advance that he was able to get through the holiday season without the usual trouble of running short of particular styles. A large part of the business was from out-of-town buyers, and this was nearly all cash.

Give Them What They Want!

The tremendous demand for PATHE PATHEPHONES during the past year is UNQUESTIONABLE PROOF that the people are no longer satisfied with a ONE-RECORD machine.

The people have been educated regarding Records—They know that there are good Pathe Records—They know that there are good Victor Records—that there are good Columbia Records and good Edison Records—

The people want to hear ALL makes of records and they must have a talking machine THAT WILL PLAY all makes of records—

The Pathe Pathephone

Is the Only Standard Talking Machine That Gives You This Great Selling Advantage

This and other grand features—the Pathe Sapphire Ball and Pathe Everlasting Records—make Pathe the greatest of all phonograph propositions.

Hook Up With the Pittsburgh Pathephone Co. for Real Pathe Service!

DOEHLER DIE-CASTINGS

SHEER MERIT has attained for Doeher Die-Castings their prominence as LEADERS in their class in the talking machine and kindred trades as it has throughout the various branches of the metal working industries. The consistent use of Doeher Die-Cast tone-arms and sound boxes by the leading manufacturers and supply houses in the trade is the direct result of the undisputed quality of our products and the efficient service our extensive resources make possible.

MUSIC FOR U. S. SOLDIERS IN CUBA

How Uncle Sam's Boys Have Been Cared for in This Important Essential, Thanks toCourtesy of R. C. Ackerman and Otto Heineman

R. C. Ackerman, export manager of the Otto Heineman Phonograph Supply Co., New York, who returned recently from a trip through Central America and Cuba, brought with him the accompanying photograph which depicts a body of American soldiers in camp near Camaguey listening to a Vanophone machine playing Emerson records. The Otto Heineman Phonograph Supply Co. handles both of these products in the foreign field, and the company owes this picture to the courtesy of Major Halford, commanding officer of the First Battalion, Seventh Regiment, U. S. Marines.

Mr. Ackerman made Major Halford's acquaintance in Camaguey on the occasion of one of the concerts which Mr. Ackerman gave the guests of the hotel. Major Halford has had long experience in Latin countries, having been in the Philippines as well as Cuba. As members of Mr. Ackerman's family have fought in every U. S. war from 1776 down to the service of Lieut. Ackerman on Admiral Dewey's flagship in the Philippines, Major Halford was pleased to accept Mr. Ackerman's offer of a gift for the United States soldiers at Vanophone and a collection of Emerson records.

Otto Heineman, president of the Otto Heineman Phonograph Supply Co., has amplified this by making an equivalent present to each of the posts of United States soldiers in Cuba. "Our boys" are down in that country at the present time co-operating with the Cuban forces to prevent any tampering with the sugar crops, and the importance of this vigilance will be readily realized by all who feel the scarcity of this all important commodity.

SOUTH AMERICA LIKES THE 'TALKER'

There is said to be an increasingly good market in South America for talking machines made

POSTCARDS FROM AMERICA

In this country, particularly for those made to sell at wholesale for from $4.50 to $25 each, says the New York Times. Several large commission houses in this city with connections in the Southern markets report having done an extremely good business this fall in these lines. It is pointed out by the head of one of these houses that South Americans are a music-loving people, and that the popular-priced talking machine of good reproduction and tone qualities is a great favorite with them. Also it is said that this country is getting a large part of the business in these lines which formerly went to Europe, which it will hold after the war is over.

UTILIZING VACANT WINDOW SPACE

Placing Record Posters in Vacant Store Windows Opens a New Avenue of Publicity for the Progressive Talking Machine Retailer

The United States Government in the exploitation of the various Liberty Bond issues has seen fit to put posters in the windows of every available vacant store. This is an idea which if not immediately opportune for the talking machine dealer may be of value at a later date. Record posters could undoubtedly be placed in the windows of many vacant stores at a very slight expense, and if it is advisable to spend thousands of dollars in order to have one window front on a prominent street, it is probably good business to have as many window fronts speak for your business as is possible, especially when the cost of the additional ground street windows is very small.

DISPLAY SERVICE CO. MOVES

The Display Service Co., formerly located at 16 West Nineteenth street, New York. This company specializes on original and artistic window displays and has lately been catering to the wants of the talking trade. It is now sending out catalogues describing its products.

HANALEI BANJUKES

(Ukuleles in Banjo Form)

A bigger hit than the Ukulele because much louder and more pleasing in tone, and of more substantial construction. Perfect for serious study. A thoroughly practical instrument for both solo playing and band work. Send for illustrated catalogue and price list today.

The Banjuke is One of the Biggest Sellers in the Musical Instrument Line.

INCREASING DELIVERY WAGON VALUE

Posters Advertising Special Records Can Readily Be Attached to Sides of Vehicles

The idea has recently been advanced of advertising records by the use of poster cards prominently displayed on the sides of the dealer's delivery wagons or delivery cars. A good many of the posters which feature individual records or general types of records such as the Hawaiian are of a standard size. This makes it easy to attach a frame molding on the side of the car with a slit in the top to permit removing old posters and inserting new ones. A car or wagon moving down the street invariably attracts the attention of pedestrians, and it seems quite likely that the brilliant record posters will implant the idea in the minds of a good many to drop in to buy this or that particular record. The children, or the people in the street, are also likely to be attracted and their comment is also apt to produce sales.

PATENTS CLEVER WINDING DEVICE

Emile Kaliski Invents System for Winding Machine by Raising and Lowering Cover

Emile Kaliski, president of the Kaliski Music Co., Ltd., Monroe, La., has just secured a patent on a clever winding device for talking machines. In Mr. Kaliski's invention the raising and lowering of the lid of the machine serve to operate the ratchet wheel connected with the motor and thereby winds up the spring without further attention. The advantage claimed for the new winding device is that it obviates the necessity of marring the side of the talking machine case to provide an opening for the usual winding key.

The big things of life are the unexpected ones. The little things, the courtesies, the right hand of fellowship, the smile, all paved the way to the Big Opportunity. Be courteous to every man, give him your best service, no matter what his clothes, no matter where his home.

MAKING THE WINDOW PAY THE RENT

How the Sonora Phonograph Agency in Atlantic City Has Built Up a Successful Trade

Atlantic City, N. J., January 5.—When the Sonora Phonograph Agency was established at 711 Boardwalk, this city, about three years ago, it was predicted that it would never succeed, because people on that thoroughfare were there for pleasure rather than business, moreover, others had tried but had failed. Good-natured pessimists deemed it might be possible to make both ends meet were several different makes handled constantly. This has proven a splendid trade, and emphasizes also the value of the window-dressing department, published in The Talking Machine World each month, to talking machine dealers throughout the country. The picture herewith is rather a poor representation of one of the many methods used in window display by Mr. Jordan. He has made it a point to arrange a proper window for the special seasons of the year as well as for special days. By this means he has increased Sonora sales beyond expectations, and this despite financial conditions and the high cost of living, due to war times.

TALKER HELPS THE ORDER CLERK

A talking machine of the dictating type has been put to new and excellent use by a prominent Eastern concern. It had been the practice for the telephone order clerk to write out the order in longhand as it was received over the wire and then repeat it to the customer for verification. Now a talking machine has been installed and the order clerk repeats the order over the telephone and into the transmitter of the dictating machine at the same time. When a cylinder is full it is taken to a typist to be transcribed. The saving of time is considerable, and it is declared that mistakes have also been cut to a minimum.

FEATURE RECORD SELLING CABINET

Emerson dealers throughout the country are utilizing to excellent advantage a record selling cabinet which is well calculated to produce and stimulate sales. This cabinet, which is designated as "Emerson Record Selling Cabinet No. 4," is of all steel construction and holds 100 records. It has ten separate compartments or pockets, each holding about ten records in envelopes, ten titles visible. All parts and joints of the cabinet are electrically welded into one solid fixture, and it presents a very attractive appearance.

Emile Kaliski, president of the Kaliski Music Co., Ltd., Monroe, La., has just secured a patent on a clever winding device for talking machines. In Mr. Kaliski's invention the raising and lowering of the lid of the machine serve to operate the ratchet wheel connected with the motor and thereby winds up the spring without further attention. The advantage claimed for the new winding device is that it obviates the necessity of marring the side of the talking machine case to provide an opening for the usual winding key.

The big things of life are the unexpected ones. The little things, the courtesies, the right hand of fellowship, the smile, all paved the way to the Big Opportunity. Be courteous to every man, give him your best service, no matter what his clothes, no matter where his home.

MAKING THE WINDOW PAY THE RENT

How the Sonora Phonograph Agency in Atlantic City Has Built Up a Successful Trade

Atlantic City, N. J., January 5.—When the Sonora Phonograph Agency was established at 711 Boardwalk, this city, about three years ago, it was predicted that it would never succeed, because people on that thoroughfare were there for pleasure rather than business, moreover, others had tried but had failed. Good-natured pessimists deemed it might be possible to make both ends meet were several different makes handled constantly. This has proven a splendid trade, and emphasizes also the value of the window-dressing department, published in The Talking Machine World each month, to talking machine dealers throughout the country. The picture herewith is rather a poor representation of one of the many methods used in window display by Mr. Jordan. He has made it a point to arrange a proper window for the special seasons of the year as well as for special days. By this means he has increased Sonora sales beyond expectations, and this despite financial conditions and the high cost of living, due to war times.

TALKER HELPS THE ORDER CLERK

A talking machine of the dictating type has been put to new and excellent use by a prominent Eastern concern. It had been the practice for the telephone order clerk to write out the order in longhand as it was received over the wire and then repeat it to the customer for verification. Now a talking machine has been installed and the order clerk repeats the order over the telephone and into the transmitter of the dictating machine at the same time. When a cylinder is full it is taken to a typist to be transcribed. The saving of time is considerable, and it is declared that mistakes have also been cut to a minimum.

FEATURE RECORD SELLING CABINET

Emerson dealers throughout the country are utilizing to excellent advantage a record selling cabinet which is well calculated to produce and stimulate sales. This cabinet, which is designated as "Emerson Record Selling Cabinet No. 4," is of all steel construction and holds 100 records. It has ten separate compartments or pockets, each holding about ten records in envelopes, ten titles visible. All parts and joints of the cabinet are electrically welded into one solid fixture, and it presents a very attractive appearance.

Window of Sonora Phonograph Agency
Building Up Record Sales By Bringing the Hidden Records to the Attention of Buyers

To say that there is a serious shortage of records most in demand is to reiterate a fact that has been most painfully impressed upon the average jobber and retailer during the past few months. The general public has been seen, by hundreds of persons, in potential sales lost because certain types of records could not be delivered rapidly enough. And this is not the only reason why the jobber or retailer, on his shelves hundreds of records that under ordinary circumstances might be considered fair sellers, but in no sense "hits," and insouciant as the public are concerned simply represented tied-up capital.

With holiday business past, it would seem that this phase of the situation should receive more than casual consideration. Any man who knows anything at all about records will realize that the really worth-while selections in the record catalog are not in any sense confined to the half-dozen or so numbers that are put out strongly each month with special placards or by other means. He knows as a matter of fact that there are real gems on his shelves that require only proper exploitation to insure their sale. Knowing these facts it is up to him to get busy.

Educational work in the talking machine store is too often accepted as meaning the work of interesting school authoritieis and school children in records included in special educational lists. In short, educational work is taken to mean school work, when as a matter of fact the term should be applied with equal strength to the educational of the grown-up in what the record lists as a whole have to offer.

The average owner of a talking machine, unless he is unusually enthusiastic, does not take the trouble to delve deeply into the mysteries of the record catalog in an effort to discover hidden numbers that may appeal to him. For the most part the talking machine owner follows the current supplements with more or less regularity and finds therein a sufficient number of records to meet his requirements without considering the records that have gone before. In this particular he requires educating just as much as the child in order that he may realize the good things that are hidden away among the thousands of records listed in the ordinary catalog, and thereby keep the retailer's stock moving by purchasing such records occasionally.

He is not going to do the delving himself. He is not going to select his chosen records out of their thousands only and spend an hour having them tested only to find that some meets with his particular requirements. The dealer will have to do this work for him.

It is a known fact in good salesmanship that the customer can be handled much more satisfactorily and quickly if he is limited in his purchases concerned simply represented tied-up capital. He may be said to have done the preliminary work, and the customer makes a selection with that much greater readiness.

The featuring of catalog records in special ways is not in any sense a theory. Dealers in various sections have been doing just that thing for years and, be it said, doing it most successfully, with the result that their entire stock of records has been turned over in a way that has made it an asset instead of a liability.

It is a very fine thing to announce and advertise that a dealer has on hand every record in a certain catalog, but it does not pay to have every record simply as a talking point. Every record in the catalog is intended to sell, and with very few exceptions will sell if given the proper attention.

This fact is proven by the special holiday lists on which appear records that have been issued years before. Ordinarily they could lie on the shelf and disintegrate into dust before being asked for by a customer, but by properly exploiting certain selections as being most appropriate for the Yuletide, they attract attention that means sales.

Giving talking machine owners the records they come in and demand is not salesmanship. It is simply order taking. To take a record out of stock and convince them that it is the record they want, means selling goods, and that is what the average talking machine dealer will have to do during 1918 if he wants to keep on doing business and make a profit while waiting for the delayed delivery of the self-selling hits.

"Help the Customer Find the Hidden Gems in the Record Catalog"

OPEN NEW RECORDING LABORATORY

Emerson Phonograph Co., 111 Special Quarters in the Columbia Trust Co., Building, 365 Fifth Avenue, New York, for Recording Purposes

The Emerson Phonograph Co., New York, manufacturer of Emerson records, has announced the opening of a new recording laboratory, which is up-to-date in every detail and acoustically perfect. This laboratory is located on the fourth floor of the Columbia Trust Co.'s Building at 365 Fifth avenue, on the corner of Thirty-fourth street, and easily accessible.

The studio has been equipped throughout with the most modern and approved types of recording mechanism, and Arthur Bergh, musical director of the Emerson Phonograph Co., personally supervised the installation of the machinery and the lay-out of the different rooms and offices. There are two large-sized recording rooms, with two orchestras, and nothing has been spared to facilitate the work of the artists and the recording experts.

For some time past the Emerson Phonograph Co. has been looking for a new recording laboratory, for it had outgrown its first laboratory a few months after placing on the market its seven-inch universal cut record, and with the advent of its new nine-inch record new recording quarters were absolutely imperative. The present laboratory will give the company an opportunity to adequately handle both its seven-inch and nine-inch recordings.

Phon d'Amour

The Tone Masterpiece

To truly appreciate the Phon d'Amour it must be seen, heard and compared. One must see and have explained the Fritzsche inventions—the marvelous wooden diaphragm, the ingenious reproducer and sound amplifier.

One must hear a favorite record played, first on another instrument, and then on the Phon d'Amour.

Then come the realization that here indeed is a wonder phonograph—a marvelous, artistic instrument that plays any record of whatever style or make, that glorifies the best made records and filters the imperfections from less worthy ones, a phonograph that establishes a new and higher standard of artistry and craftsmanship. See it, hear it play, compare it.

The Fritzsche Phonograph Company

228-230 West 7th Street, Cincinnati, O.
THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

BOSTON, MASS., January 3.—The aftermath of Christmas is not exactly pleasant to consider. It is not due to trade exactly that there is a depressing feeling abroad, but to the weather, which has been so excessively cold as to hamper trade of pretty nearly every description. Boston, along with other parts of New England and the East has been in the grip of a frigid wave, which has continued for a number of days. At this writing a snowstorm is setting in which may add to the difficulties and during such weather as is now being experienced here people will not go out unless for the most urgent reasons. At the cantonments—one here may speak specifically—for Camp Devens at Ayer—the weather has been colder than here, but the soldiers have been able to keep comfortable, and it has been a godsend that they have had so many Victors, Columbias, Edison's and the like to keep them entertained. During the past several weeks a number of machines have been sent to the camp largely through the thoughtfulness of friends. Added to the general cold situation there is the fuel problem, which is getting more acute every day, and a few of the talking machine warehousers have barely escaped closing because of empty bins. But in such cases a load of coal arrived at the eleventh hour and saved the situation.

Christmas Business Late But Strong

Now to go back to the Christmas business. It did not begin as early in December as it should, but almost in every case the really busy period started on the 15th. From then on all the warehousers were filled, and on the Saturday and Monday before the holiday there were crowds of people besieging the retail establishments. Take it all in all, the business done in Boston was surprisingly good considering the general conditions. Several places were heard from where a bigger business could have been done if the requisite amount of goods could have been secured from the factory. One interesting feature of the Victor business was the heavy demand for the records of the Boston Symphony Orchestra, which were first announced in the December catalog. Toward the end of the month there was scarcely a dealer who had a single one in stock.

Busy Times at Steinert's

The business of M. Steinert & Sons Co. for December was a surprisingly good one. Both the company's warehousers in Boylston street and in Arch street, which latter place is so convenient to the downtown business section, had a busy time of it from the first part of the month. Russell Steinert, manager of the Victor business of the company, told your correspondent that there were times when the eleven booths on the second floor and all of those on the ground floor were occupied by patrons, and so great was the crowd that records had to be tried out even in the foyer and the corridors.

Planning New Columbia Stores

At the warehousers of the Grafenola Co., of New England, Manager Arthur C. Erisman reports a good business also. The total sales in machines and records were of an exceedingly gratifying character. Since the return of Norton Mason as sales manager for this house there has been a betterment of conditions, for he, through his previous association with Manager Erisman, knows exactly what is demanded by the store's customers. For a week or so before the holidays Manager Erisman established a store in Federal street close to the South Station and quite a number of machines were sold. Plans are under way to locate several stores throughout the city.

Many New Sonora Dealers

Manager Richard Nelson of the Sonora, has in the past four weeks placed this equipment with thirteen good dealers in Boston and the suburbs, and he plans in the very near future to increase this number to twenty-four. Six agencies have been placed in Providence, all of them high-grade places. Among the latest dealers to take on the Sonora are the United Talking Machine Co., of Brockton, and the C. E. Wing Co., of New Bedford. Manager Nelson says the holiday business was way ahead of what had been looked for, and this was especially true of the Jordan Marsh Co., the largest department store dealers in Boston, which had taken on the Sonora only a few weeks before.

Ditson Business Only Limited by Supplies

The Ditson business for December was excellent for the holidays. According to Manager Henry A. Winkelman it would have been better if the factory could have sent the goods as fast as they were wanted. While speaking enthusiastically of the holiday business Mr. Winkelman qualifies the statement by saying that had the general conditions been as in former years the demand for goods would have been phenomenal. Two of Manager Winkel-}

Eastern Victor Service

is based on the principle that a Victor dealer wants what he wants when he wants it.
THE TALKING MACHINE WORLD
THE TRADE IN BOSTON AND NEW ENGLAND—(Continued from page 20)

Old Department Store Closes Doors
The W. & A. Bacon Co., one of the oldest established department stores in the city, has finally closed its doors. It met with financial difficulties back in August, and the business was placed in the hands of receivers, but the general business conditions have been such that the company has not been able to weather the storm, much to the regret of its many friends. The Victor, Columbia, as well as the Emerson Co., were represented in the talking machine department, which, under the management of George J. Krumschied, has done a very good business, this being one of the best paying departments in the whole store.

Greetings From W. S. Parks
W. S. Parks, the new manager of the Baltimore warehouse, did not forget his Boston friends during the holidays, as many of them received holiday greetings, showing that he had not forgotten the happy days spent in Boston as assistant to Manager Fred E. Mann. Mr. Parks sends word that he is now quite his old self again.

Interesting Personal Items
Manager Richard Nelson, of the Sonora Co., and his family spent Christmas with his father's family in Albany. The senior Mr. Nelson is the Episcopal Bishop of the Albany diocese. Interesting letters continue to be received from John Alsen, who is with the 301st Regiment somewhere in France. Several of these letters come from Alsen's old associates in George Lincoln Parker's Victor and Edison department, of which he was manager before leaving to join the army.

One of the latest of the salesmen to join Manager Arthur Erisman's staff at the ware-rooms of the Grafonola Co., of New England, is Louis Besserer, who comes into the business with a wide knowledge of music, as he is an accomplished violinist. For some time he was leading violinist in the orchestra of the Boston Opera House. He is proving an able salesman and a genial, affable manner serves him well in dealing with customers.

Brunswick Expansion in Boston Territory
The Brunswick phonograph is steadily growing in popularity throughout the New England territory, thanks to the indefatigable labors of R. H. Booth, manager of the local office. The instrument is not only well represented in this city just now, but agencies are being closed in every city of importance throughout the East. The tone quality of the Brunswick, thanks to individual constructive features, has made a strong appeal to purchasers, and the general character of the case design is always artistic, and the

finish excellent. Mr. Booth has a capable road staff who are doing good work. Mr. Walter is now visiting a number of points in the New England territory and is making some very excellent connections for the Brunswick. The general trade outlook as far as this house is concerned is most gratifying, and 1918 promises to be a record-breaker.

H. L. Royer Adds the Sonora
Herbert L. Royer found very little time to himself during the holidays, and with his Victor outfits he showed his patrons the Sonora, which he now carries in stock. Royer's place around the corner from Summer street was found by many persons to be a very convenient place.

Manager Longellow, of the Edison and Victor department of Chickering & Sons, lost the services of L. C. Christensen, his repair man, a fortnight ago, he having gone into the naval reserve, and is stationed at Hingham.

Ricardo Constantino, son of the famous singer, who is attached to the staff at the Grafonola Co., of New England, is going over Saturday to New York and Bridgeport, where he plans to study the late models of the Columbia machines.

both at the warerooms and the factory. He also
will visit his brother, Antonio Constantino, who
is in charge of the record department of the
Columbia's Fifth Avenue store.

William Ellsler returned a few days ago from
New York, where he went to spend the holi-
day with his aged mother. Ellsler is one of the
valued employees of the Grafonola Co. of
New England.

Taking an Inventory
Manager Silliman, of the Pardee, Ellenberger
Co., has been extremely busy since the holidays
taking an inventory of the stock of the Edison
equipment, and in this he has been assisted by
his staff of traveling men, who have not as yet
started off into their respective territories.
Manager Silliman reports a very good Decem-
ber business throughout New England, and the
indications look good, he says, for a brisk busi-
ness from now on. Mr. Pardee, head of the
house, who was in town a few days ago, is well
pleased at the business done during the past year.

Activity With Talking Machine Co.
The Eastern Talking Machine Co. found its
custom location in Tremont street of the
greatest advantage during the Christmas sea-
son, and throughout most of the month of De-
cember the warerooms, with their comfortable
booths were filled with buyers, who were bent
on purchasing the more expensive outfits. The
Eastern had a very heavy call for the records of
the Boston Symphony Orchestra, and its large
supply, laid in very early, was soon exhausted.

Handsomely Decorated Warerooms
Among the handsomely decorated Victor and
Edison warerooms during the Christmas season
those of the C. C. Harvey Co. in Boylston street
were among the most artistic, largely because an
artist and professional decorator takes care of
the scheme each season. Manager White and
his staff of clerks had a busy time of it attend-
ing to customers for the past several weeks.

Kept Busy on Deliveries
Warren Batchelder, manager of the Victor de-
partment of the A. M. Hume Co., had such a
busy season that for several nights toward
Christmas teams were delivering Victor outfits
way into the early morning.

R. A. Young, who took charge of the Vic-
trola department of the H. Batterman Co., the
large department store in Broadway and Plum-
ing avenue, Brooklyn, N. Y., last October, re-
ports having closed a very satisfactory holiday
business. Mr. Young was formerly with the
Lion store in Toledo, O.

FEBRUARY WINDOW DISPLAY

Attractive Window Prepared by New Dealers' Service Department of Columbia Co. Should Stimulate the Trade of Dealers

The new dealer service department of the Columbia Graphophone Co., New York, which is under the management of H. L. Tuers, has
prepared a February window display that is
even more effective than the one which was in-
troduced to Columbia dealers last month. This
latter display was accorded a welcome recep-
tion from Columbia representatives throughout
the country, who state that it proved a power-
ful stimulant to record and machine sales.
The February display, which is shown here-

Columbia Window Display for February

with, consists of a Handy Orchestra cut-out,
three half-sheet cards featuring new Columbia
records, two quarter-sheet cards announcing
new records by Oscar Seagle and Bert Williams,
six small cut-outs and a series of price tickets.
This display well reflects the determination of
the new department to furnish Columbia deal-
ers with a series of highly artistic window dis-
plays which will act as an impetus to sales.
The February window display is lithographed
in eight colors, and the display is furnished to
the dealers at actual manufacturing cost, which
is exceedingly small, compared with the value of
the material supplied. This low cost is made
possible by the fact that the Columbia dealer
service department is in a position to order very
difficult, large quantities, which lowers the cost per unit.

A. M. STEWART PLAYS SANTA CLAUS

President of Stewart Talking Machine Co., In-
dianapolis, Makes Substantial Christmas Gift
to Every Employee of the Company

INDIANAPOLIS, Ind., January 3—Santa Claus,
through the medium of Alexander M. Stewart,
president of the Stewart Talking Machine Co.,
well-known Vic-
tor distributors of this city, was very
good to the em-
ployees of that
company. Mr.
Stewart person-
ally visited each
t of the
employees of the
company on
Christmas Eve,
and in addition to
extending the
usual greetings of
the season pre-
vented each mem-
ber of the staff
with a substantial

services
rendered during
the year.

The Eclipse Outlook

The 1918 outlook is extremely bright for the Victor
dealer who goes about his business, spurred by
the knowledge that the war chiefs are placing increasingly
heavy emphasis on the war value of music in general
and of the Victrola in particular. During 1918
patriotic inspiration will add increased ginger to
"Eclipse Victor Service." 'Nuf said!

EDISON DEALERS IN WISCONSIN TERRITORY CONVENE

Very Successful Gathering of Edison Dealers Held in Milwaukee—Tone Test Given at the Pabst Theatre a Feature of the Convention—Many Interesting Papers Read—Officials Present

MILWAUKEE, Wis., January 5.—One of the recent successful conventions of Edison dealers was that held at the Hotel Wisconsin, this city, recently and which was attended by approximately 150 dealers in the Wisconsin zone, many of them accompanied by their wives. F. K. Babson and C. E. Goodwin, of the Phonograph Co., of Chicago; T. J. Leonard, general manager of the musical phonograph division of Thomas A. Edison, Inc.; L. A. Zoller,supervisor for Thomas A. Edison, Inc., in the Milwau-ke zone; and A. E. Schiller, mechanical instructor for Thomas A. Edison, Inc., in the Milwaukee zone, also were present.

One of the features of the convention was a tone test at the Pabst Theatre, given by Julia Heinrich, formerly of the Metropolitan Opera Co.; the lecturer representing the Edison laborato ries was Miss Huldah Voelich. This tone test was given to a capacity house and aroused much enthusiasm.

Another feature of the convention was the banquet at the Hotel Wisconsin, which was at tended by most of the dealers and their wives who attended the convention.

As is the rule at all the dealers' conventions the addresses of company officials were supple mented by business papers read by the dealers themselves. One of the most interesting of these was that of W. E. Bosshard, of Tononah, Wis., on the subject of "How I Make Tone Tests." Mr. Bosshard described in detail how he had gone about arousing interest in tone tests and sent out invitations to 600 people and had succeeded in packing the local armory to the doors, although his seating capacity was 600. He told of the work done by the artists and how he had followed up the tone tests by keeping in touch with those who had attended. One of the immediate results of the test was two cash sales of C-250 instruments. Mr. Bosshard concluded by saying that he had been repaid many times for the expense connected with the tone tests by the interest it aroused locally in the New Edison and the actual business booked as a result.

Another particularly interesting paper was that on "Window Displays," read by Geo. Eicholz, of Milwaukee, who said in part:

"When you first look for a location for your store, you take into consideration three things—floor space for selling your goods; your window space; and how many people pass the location of your selection. The value of your location is judged by the last two things and from your window and the passer-by you must get your money back. As the speaker before me said, you must create a desire before you can sell, so your window display must be staged in such a manner as to create a desire to own in the passer-by.

"If you advertise in a newspaper (which is considered the best form of advertising) and you get 15 per cent. of its readers to see your ad, you certainly get returns; but with a good window display you can stop 50 per cent. of the people passing; therefore, I say your window is the best form of advertising, with the newspaper second.

"You may say, 'I have often tried to stage a good window but failed.' I say try until you get one or two good displays and they will suggest other good displays, and after once succeeding you will wonder why you ever failed in displaying your goods to the best possible ad vantage.

"You will ask, What do you consider a good window? or what constitutes a good window? Your record catalog will give you many ideas as to a good display; almost each selection listed therein is a good title for a window display; for instance:

"Your Hawaiian records suggest a Hawaiian window and that interests people who have a machine in Hawaiian records, also it interests people that love Hawaiian music in a machine. 'Old Folks at Home,' 'My Old Kentucky Home,' 'Dixie' and other Southern melodies suggest a display of Southern folk songs. Such a window tells Southern melody records as well as ma chines to people that like the old songs of the South. Patriotic music suggests a patriotic dis play.

"I find that the most attractive displays can always be made by a combination of machines and records. Opera music suggests an operatic window. There are many scenes from operas that can easily be incorporated in your window displays. Instrumental solo records, dance music, music for special occasions such as Easter, the Fourth of July, Christmas, Washington's Birthday, all suggest good ideas for window trimming.

"And now I am going to tell you what we do if we want to make an especially good display. We call all the boys together in the store and tell them to suggest something for a good dis play. Each makes a suggestion and then we work it out together, so that our best windows have never been a one man's idea."

VICTOR CO. SUES FOR INFRINGEMENT

Brings Action Against Broedegaard Bros. Co., for Featuring Machine Named "Victoria"

OMAHA, Neb., January 4.—The Victor Talk ing Machine Co., of Camden, N. J., filed suit in Federal Court last week against Broedegaard Bros. Co., operating a jewelry store at Sixteenth and Douglas streets. The plaintiff alleges that the defendant is infringing the plaintiff's trade mark and trade name and misleading the public.

The complaint states that Broedegaard Bros. Co. is selling the "Victoria," that the name "Victoria" is placed on the machine in the same position as the name "Victor" on the plaintiff's well-known machine and that folders are printed in such a way as to mislead the public into believing that the "Victoria" talking machine is the "Victor."

Samples of the folders advertising the machine are appended to the complaint. It is pointed out that one of these folders shows a picture of a man standing beside the "Victoria" machine and holding in his hands a "Victor" record, all of which, it is alleged, is part of an intention to mislead and deceive the public. A photograph of the window at Sixteenth and Douglas streets containing the display of the machines is also appended, with a sign reading "Victoria talk ing machine, $45." The advertising folders are printed in foreign languages.

The petition is signed by Charles K. Hubbard, vice-president of the Victor Talking Machine Co. It states also that the trade name, good will, etc., of the Victor Co. "are worth far more than $1,000,000."

Damages are asked from the defendant and an injunction preventing the defendant from continuing to offer the "Victoria" machine for sale under that name.

CONCENTRATE ON WINDOW DISPLAYS

How the Haverty Furniture Co. Brings the Colum bia Line to Public Attention

HOUSTON, Tex., January 7.—The Haverty Furniture Co., of this city, has a ways made it a point to pay particular attention to its window displays, recognizing that the proper dressing of a window very often yields handsome dividends in actual sales, in addition to furnishing Artistic Display of Haverty Co.

invaluable publicity for the house and the prod ucts that are featured.

The Haverty Furniture Co. handles the line of Columbia Grafonolas and Columbia records manufactured by the Columbia Graphophone Co., New York, and these products have formed the basis for many effective displays. House furnishings and talking machines lend them selves admirably to co-ordinated display, and the accompanying illustration will give a fair idea of the attractiveness of some of the Haverty Furniture Co.'s windows. This is only one of several recent artistic efforts.

THE SALESMAN WITHOUT THE POLISH

How One Young Man Managed to Handle the High-Class Trade on Sheer Nerve—Was so Rough and Nervy That He Proved Most Entertaining to the Bright Lights of Society

In practically every treatise on salesmanship one reads that the salesman must of necessity cultivate a most refined bearing, that he must learn to place himself apparently in the social position of his prospect. If he is dealing with a plebeian he must act as the plebeian, but when he deals with a society queen he should have that in his manner which conveys that he is of an equal, if not a little superior, social plane.

As is the case with all rules, the foregoing has its exceptions, and one of the exceptions was brought to light recently in an Eastern city. The young salesman in question has plenty of ambition and pep, and, as the manager expressed it, the gall of a brass monkey, but unquestionably lacks polish. He rarely lets a prospect get away. He can enjoy the experience of being thrown out almost bodily following a definite refusal of the prospect to buy the machine he offers and then call up in the morning and explain that he has reserved a special model, and then ask shipping directions. Putting it over in that manner is almost his daily habit.

The real gem of his work, however, cropped out recently when, being the only salesman left on the floor, the manager was reluctantly compelled to send him out in answer to an inquiry from a prominent society woman. The best the manager hoped for was to hold the prospect until a polished salesman could get on the job. The young man in question called on the lady, spent the greater part of the evening entertaining her in his own crude way, and solemnly assured her that she was indeed fortunate in being able to command his time, inasmuch as his special work with the talking machine company was to take care of the higher class trade, leaving the ordinary salesman to handle the usual run of things. He actually convinced the woman that she needed a model costing several hundred dollars and closed the sale on that basis.

The manager reached the store the next morning prepared to inquire where the good salesman should start on the case, when he received a message from the society matron asking, with an ill-concealed laugh in her voice, "for the young man reserved for her a model, but has not been seen since the inquiry was made."

It developed later that several of the most polished salesmen in town had called on that particular prospect, but that the rough boy with an exhibition of nerve that would have abashed anyone more polished had simply galloped away with the prize. The lady explained that he was the funniest and most entertaining salesman she had dealt with for some time. She simply couldn't turn him down without an order.

WHY CASH TRADE IS ADVISABLE

George E. Brighton, President of the Sonora Phonograph Sales Corp., Inc., Speaks With Approval of Credit Men's Resolutions

George E. Brighton, president of Sonora Phonograph Sales Corp., Inc., recently spoke with the utmost approval of the resolutions adopted by the New York Credit Men's Association. The resolutions ran:

"Recognizing that the credit granted by the retail merchant to the consumer, known technically as the individual credit, is one of the most rigid forms of credit, and that it is neither wise nor economic to tie up large amounts of capital in such forms of credit, it is sincerely recommended both to the retail merchant and to the consumer that all forms of supplied merchandise purchased and sold on terms of payment the first of the month following the date of purchase, or in no event beyond thirty days from the date of purchase."

It was a further belief of the conference that foodstuffs and the daily necessities of the home be purchased and sold on a cash basis alone.

"Carrying beyond a short period individual credits should neither be asked nor granted under the unusual conditions of to-day," said a second resolution, "and it is sincerely urged that this recommendation govern the credit granting of retail merchants, and its reasonableness be so presented to the consumer that no dispute may arise regarding its absolute necessity. Observance of this plan will keep at a minimum the total sum of individual credits and release capital that may be required for the national defense."

"This is precisely what I have been advocating for a long time," said Mr. Brighton, "and it is a pleasure to learn that the undesirability of unnecessary long credits is now becoming apparent to many. The easy-payment plan I have long regarded as a growing evil.

"Nothing down and $1 a week is demoralizing to any business, and is not the right way to put an organization on a sound and substantial foundation."

AUSTRALIAN VISITOR IN NEW YORK

Charles Tait, managing director of Allan & Co. Pty., Ltd., Melbourne, Australia, was a recent visitor to the trade in New York. Mr. Tait has been in the United States for over eight weeks and does not contemplate returning home until he has thoroughly visited the American music trade centers. Allan & Co. handle in their chain of stores many well-known American pianos. They are also Victor talking machine jobbers and control a large business.

The K. & E. Phonograph Exchange, of Manhattan, has been incorporated with a capitalization of $1,000, by Irving Keser, Hyman Edelstein and Solomon Manheimer.
EVERY good product desires a good name. We want the Talking Machine trade to supply us with a good name for our product, needles made right to play right.

To the person or persons who suggest what we deem to be the most satisfactory name for our needles we will offer as a reward 100,000 needles. None are barred from participation. We prefer the suggestion of some coined word that can be copyrighted.

To assist in selecting the proper name we wish to state that we will manufacture the best steel needles that can be put on the market.

Needles should be changed for each record played. Our process of manufacture will be such as to insure the reproduction of every delicate shading and tone. Continued use of our needles by your customers will mean contented patrons at all times.

We are desirous of hearing from distributors of needles who wish to establish a source of supply which can be depended upon at all times for quality, price and real service.

We hope to be able to announce the name chosen for our quality needles in the March issue of this periodical. In the event that more than one person suggest the same name, the first suggestion mailed, as indicated by the postmark on the envelope, will be given the credit for the suggestion. Anyone interested in the Talking Machine industry is invited to participate. All we ask is prompt action and to indicate at the same time the name of machine handled and firm with which you are connected.

BUYS VICTOR AGENCY IN SCRANTON
Scranton Talking Machine Co., Columbia Dealers, Now Have Victor Department

SCRANTON, PA., January 3.—The Scranton Talking Machine Co., 215 Lackawanna avenue, this city, has purchased the Victor agency and a substantial stock of Victrolas and records from the E. A. Fenstermacher Co., of 215 Wyoming avenue. The stock was removed to the Scranton Co.’s store, where a large Victor department has been opened in addition to the Columbia department operated successfully by the company for several years.

MAGNIFYING TELEGRAPH CLICKS
A diaphragm and horn similar to that used in connection with talking machines has been utilized to advantage by two Western inventors to amplify and make more audible the weak relay clicks of telegraph instruments. The weak clicks are transmitted to the diaphragm, whose vibrations act upon the air and shoot the corresponding sounds out through the horn in greatly increased volume. The new invention is believed to be especially valuable in connection with long telegraph lines.

NEW QUARTERS IN SAN FRANCISCO
The California Phonograph Co., San Francisco, Cal., has moved from 923 Market street to much larger quarters at 1009 Market street, that city, where two floors are occupied and an equipment of fifteen soundproof booths has been installed.

WESER PHONOGRAPHs
For 39 years the piano trade has recognized in Weser instruments the highest piano and player piano value. It always has been our delight to invite comparison of the Weser products with those of other makers. Many of our best dealers have been acquired by such comparisons.

Weser Phonographs are making rapid headway in the same manner. Compare them with the world’s most expensive makes—in tone quality—in appearance—in reliability, and solidity of construction, and we are content to abide by your decision.

The Weser Phonograph will play any record. Made in satin finish mahogany. Other woods on special order. Electric motor will be furnished if desired. Write for catalog.

TALKING MACHINES FOR THE CAMPS
Soldiers of Motor Supply Co. No. 317 Solicit Records From Indianapolisites—Leading Dealers Experiencing Profitable Soldiers’ Trade

INDIANAPOLIS, Ind., January 5.—The soldiers in the Motor Supply Co., No. 317, who are expecting to leave Fort Benjamin Harrison soon, have made a request of the people of Indianapolis asking for their used talking machine records. They have a small Victrola which they say helps them greatly in passing away the time and in driving away the blues and they are desirous of stocking up on records before they leave.

Women at the Red Cross Shop, in the L. S. Ayres & Co. store, are receiving the records for the soldiers. The soldiers made their plea for records through the local newspapers.

Although most of the soldiers who were stationed at Fort Harrison have left, local talking machine dealers are getting reports from Camp Shelby and Camp Taylor of the great enjoyment the Indiana soldiers are getting from the few talking machines they selected and now have in their camps.

H. A. W. Smith, manager of the Pathe Shop, made a special proposition on a Pathe to the members of the 139th Field Artillery, which is now at Camp Shelby, Miss. The soldiers took the Pathe and a large number of Pathe records to the camp with them. Hardly a day goes by but what some mother or friend of the soldiers of this company comes into the shop and tells Mr. Smith of the pleasures the boys are getting out of the Pathe.

Their barracks have proved popular with soldiers who are not quote so fortunate in owning a Pathe. Mr. Smith said that he had sold several $25 Pathes to be shipped as Christmas presents to local boys in Camp Shelby.

The Starr Piano Co. is now displaying in its window a Starr machine in its special trunk to be used as an army or navy model. Mr. Pfeiffer says that already he has received many inquiries from soldiers and from friends of soldiers regarding this outfit, which sells complete at $73.

Ben Brown, manager of the Columbia store, said that the talking machine in his opinion will play a big factor in the war, not only at the front but back at home.

A CLEVER ADVERTISING STUNT
Home Music Co., Lancaster, Pa., Reproduces Words of Songs in Local Advertising to Call Attention to the New Columbia Records

The Home Music Co., Lancaster, Pa., who handle the Columbia line of Grafonolas and records, have hit upon an original method for advertising the new Columbia records in the local newspapers. The company takes a generous space and then reproduces the words of the choruses of the various songs, with the number of the Columbia record on which the song appears shown plainly at the bottom, together with the name of the company. According to reports the original method of advertising is getting excellent results.

“One pound of learning requires ten pounds of common sense to apply it.” There is a lot in that old Persian proverb.

MILWAUKEE DEALERS REPORT BIG TRADE INCREASES

Business of Unusual Proportions Transacted During Holidays—Co-operative Publicity A Great Help
—Opinion Prevalts Regarding the General Trade Outlook for the New Year—Trade News

Milwaukee, Wis., January 5—Fresh from a successful holiday selling season, the results of which were very far in excess of those of the previous year, the Milwaukee talking machine and phonograph dealers of this city are leaving no stone unturned to make the early months of the New Year exceed previous corresponding periods in the volume of sales. They have become imbued, and justly so, with the idea that conditions which ordinarily would be considered wholly unfavorable are by no means deterrents if the will is there to do. That was proven during the holiday season recently closed. There is not a single dealer in Milwaukee who did not show a very appreciable increase in sales, compared with a year ago, which had been the high-water mark up to that time.

Local dealers probably were more fortunate than those in some other large cities because they had behind them the full power and influence of a co-operative advertising campaign, conducted by the Milwaukee Association of Music Industries, at a cost of about $3,000. The stirring appeal of the series of full-page advertisements could not be denied. The spirit of the work was combined with the spirit of mutual help and the result was that many homes that never before knew the appeal of the talking machine now are equipped with it.

Just as well as retailers have but one report to make relative to Christmas business in 1917, and that may be summed up in the phrase, "Just fine." It is a fact that at the beginning of the holiday buying season the feeling in the trade was that if dealers could reach the record of sales of 1916 they would consider themselves successful, and that increases of from 25 to 50 and in a few instances 75 per cent were shown there ample cause for elation. Only a shortage of machines, records, needles and supplies kept business to the limits it did reach.

Members of the Badger Talking Machine Co., Victor Jobbers, were weak from exhaustion when Christmas came. Never before did the house experience so great and urgent a rush of business. Up to the last minute on Christmas eve retailers were importing the company to help them.

In some instances relief was given by picking up machines of certain styles which did not sell as well as others in certain districts and turning several to dealers in other districts. In this manner quite a few disappointments were overcome and stocks were rather nicely readjusted.

Miss Blanche Brewster, of the Victor department of the J. B. Bradford Piano Co., showed herself to be a true patriot and an exponent of the essentiality of music among soldiers in camp by starting a fund for the purchase of a Victrola for Company H, 304th U. S. Infantry, Camp Custer, Mich. All of the boys of Company H, many from Milwaukee, and letters from the camp indicate that Miss Brewster's gift was one of the most welcome surprises the boys had ever experienced.

The Yahr & Lange Co., wholesalers of the Sonora in Wisconsin and Upper Michigan, entered its thirty-five traveling representatives and department heads at a banquet in the Calumet Club on December 27. The company has been distributing the Sonora for less than a year, but made a most remarkable record, and the banquet was more of a Sonora love feast than anything else. Arthur Roelke, manager of the Sonora department, was one of the principal speakers and congratulated the travelers for their splendid efforts in behalf of the Sonora line, which he said, is destined to make a new and greater record of expansion during 1918 in Wisconsin and upper Michigan, because of its great merits.

The Kroger Bros. Co., which opened Pathophone departments in its three big department stores on December 1, is delighted with the early success of the innovation. The company acquired a fourth store on January 1 and a Pathophone department was installed immediately.

The Wisconsin Chair Co., Port Washington, Wis., a large manufacturer of fine office furniture, has entered the ranks of producers of talking machines. The machine is being marketed under the trade name of "Vista" and has a universal reproducer. The branch plant at Grafton, Wis., is making records and supplies.

A boxed Victor machine destined for the L. M. DeVau Co., Marion, Wis., disappeared mysteriously from the depot platform a few minutes after it had been unloaded and has not been heard of since. The theft took place in broad daylight.

A. G. Kunde, distributor of the Columbia, reports that holiday business exceeded his highest expectations and that the reports he has received from his dealers bear a similar cheery tone. The number of Columbia retailers in Milwaukee county now has grown to twenty-five, but all seem to thrive on competition.

Edward R. Sweney has joined the Badger Talking Machine Co. and is assisting in covering the Wisconsin territory.

The Wisconsin Cabinet & Panel Co., New London, Wis., one of the largest of the wood-working plants of the Thomas A. Edison group, henceforth will furnish all of the box shooks and shipping cases required by the various Edison cabinet factories throughout the country. There is a large and well equipped box factory in connection with the plant and this will be enlarged and become the more important division of the New London works. Several more nailing, sticker and printing machines will be installed at once and the force increased from twenty to at least fifty more.

ONE SMALL TOWN DEALER'S RECORD

PORTLAND, Ore., January 3—Eastern Oregon is strong for the New Edison. In Baker, with a population of about 700, Carl Adler is the only licensed Edison dealer in the town, and he sold 112 machines to the people of Baker and the adjacent country for the Christmas trade. A big advertisement in the Baker Herald gives the names of the 112 "music lovers who have been made happy and contented by the possession of the New Edison phonograph purchased at Adler's." Incidentally, Mr. Adler is an enthusiastic reader of The Talking Machine World, which may be one explanation of his success.

Aug. D. Volkman & Sons, Iron Ridge, Wis., have been appointed Columbia retailers in that city.

Have you set your 1918 profit stakes?

Set them high — then sell READY-FIE.

There is no reason why, if you sell READY-FILE, your accessories business should not double this year. Every owner of a Victrola is a prospect for READY-FILE.

Every Victrola X and XI you sell in 1918 means an extra profit to you — and READY-FILE sells itself.

Why not get this extra profit? We'll help you.

To our accessories line we have added the READY NEEDLE POINTER — the newest and simplest fibre needle pointer on the market. Send for a sample. If you don't say it's the best needle made we'll refund your money. Fill in the coupon — it means more profit to you.

LANSING OFFICE IN SAN FRANCISCO

Walter S. Gray in Charge and Will Handle a Full Line of Lansing Talking Machine Covers

BOSTON, MASS., January 5—E. H. Lansing, of this city, whose khaki covers for talking machines have attained national fame by reason of their reliability and excellent construction, has just closed arrangements with Walter S. Gray, of San Francisco, Cal., whereby he will have on hand a goodly stock of Lansing covers. This will give Mr. Lansing's many friends in the Western part of the country more prompt service than is possible at the present time. The headquarters for Lansing khaki covers in San Francisco will be room 422 Chronicle Building. In view of freight conditions, this particularly timely step will enable the trade in the Far West to get quick deliveries of Lansing covers just when they need them.

PROOF OF SERVICE RENDERED

"I am looking for the store where there is less talk of service waiting and more proof of service rendered," remarked a buyer the other day. "I shall be able to recognize that store without difficulty, for its advertising will be truthful, its windows attractive and its merchandise of obviously superior standards. And when I have found it I shall not hesitate because of the prices I am asked to pay. For the record of service performed is the best proof of its own equal value."

NEW STORE IN GRAND RAPIDS, MICH.

W. F. Graham, Antigo, Wis., has opened a talking machine and music store at Grand Rapids, Wis., in the MacKinnon Building. Mr. Graham is an expert at sewing machines, and the music business is an outgrowth of his sales and repair business in that line. He expects to do particularly well in the exploitation of talking machines.

MANUFACTURERS—JOBBERS—dealers

PERFECTION FLEXI-TONE reproducers attached to PERFECTION half-housing tone arms No. 3 and No. 4 play all lateral cut records, on all types of Edison Disc machines. Made in nickel and 24 carat gold finish, extra fine quality discs.

These reproducers and arms are the very finest made mechanically. The PERFECTION FLEXI-TONE reproducers are the most perfect phonograph reproducers built, reproducing all lateral cut records, from highest pitched soprano to lowest pitched bass, as perfectly as the records were recorded in the recording room. Wonderful clarity of sound, as well as great volume. Extra fine quality of finish guaranteed. Manufacturers, jobbers and dealers will find this line of reproducers just what they have been looking for, as they are assembled by skilled workmen especially adapted to this kind of work, producing a product built with watchlike precision.

All accessories in stock ready for immediate shipment. Phonograph manufacturer can have PERFECTION FLEXI-TONE reproducers fitted to their machines Write for prices, information, etc.

THE HOME FURNISHING CO.

COLUMBUS, O., January 5.—The Home Furnishing Co., of this city, which handles the products of the Columbia Graphophone Co., New York, recently presented one of the most artistic window displays that have been prepared by a local talking machine dealer for some time past. This display is shown in the accompanying illustration, although a photograph hardly does justice to the many distinctive features of this window. In preparing this display the company took cognizance of the fact that the success of any window setting depends to a large measure upon the visualization of the product that is featured. It was decided to present a Columbia Grafonola No. 110 as the keynote of this window, and in order to keep the instrument in the center of the display an ingenious decorating arrangement was used. How well the company's idea was carried out may be seen in the photograph. This window attracted considerable attention in local talking machine circles, and the principle of visualization will probably be used as the basis of other window displays along similar lines.

H. J. Loechly, Random Lake, Wis., is a new Sonora retailer in southeastern Wisconsin, who is building up a good business.

ATTRACTION PATHÉ HANGERS

The Pathé Frères Phonograph Co., Brooklyn, N. Y., has mailed to its dealers three very attractive hangers which can be displayed to excellent advantage by Pathé representatives. One of these hangers features new Pathé records made by Rube Goldberg, famous cartoonist, who sings his popular hit "Father Was Right." There are also presented on this hanger other popular hits from the Pathé catalog.

Another hanger gives a list of new Pathé dance records, which are meeting with a ready sale throughout the country, and the third hanger features the new monthly supplements of Pathé records. This supplement contains a splendid group of operatic records, the latest dance numbers and popular song successes.

NEW HONOR FOR JOHN F. DITZELL

Manager of Talking Machine Department of Famous & Barr Store Takes Charge of Piano Department—Has Made Fine Record

St. Louis, Mo., January 4—John F. Ditzell's amazing success in promoting the Famous & Barr Department Store's Victrola department from a four-demonstration room affair to one of thirty-two rooms since last February has brought him unusual honor and much hard work. He has been made manager of the piano department, which is housed with his department in the wide aisle on the sixth floor of the building.

Mr. Ditzell is not a piano man and says that he never has been. He came here from Kansas City last February as a Victrola manager when the two departments divided the space about equally, with the odds rather in favor of the pianos. It has been the prediction of observers recently that the piano department would have to get out of the way very soon. Perhaps that is what the heads of the store thought, and to save it they made Mr. Ditzell manager.

"I hardly know what to say about the piano department," says Mr. Ditzell. "The management of that department came to me entirely as a surprise. But I regard the talking machine as so much of a musical instrument, and have built my campaigns on it with that opinion uppermost, so I think they will fit the piano department. I, of course, will select only well-tried pianos and players and will apply talking machine sales and advertising methods to them, and I believe that these methods will win."

"The Christmas season has been a splendid one for us. We did more than double the business of any previous year with ease and satisfaction to all concerned. I was complimented by the Victor Co. on the Victor ads with which we prepared the way for our Christmas selling campaign. The keynote to our advertising here has been to put a touch of human nature into all advertising, and we find it pays. Most of our advertising texts are the perplexities of the actual customers."

"The business this year has been remarkable for the proportion of cash sales and the short credit asked."

MANUFACTURERS—JOBBERS—dealers

PERFECTION FLEXI-TONE reproducers attached to PERFECTION half-housing tone arms No. 3 and No. 4 play all lateral cut records, on all types of Edison Disc machines. Made in nickel and 24 carat gold finish, extra fine quality discs.

BUILDERS OF THE DAYTON MOTOR RECAPITULATE
Thomas Mfg. Co. Increase Capital to $300,000 in Order to Handle Avalanche of Motor Business
—Something of the "Live Wires" Interested in This Enterprise

Dayton, Ohio, January 8.—Brief reference was made in The World last month to the increase in capital stock of the Thomas Mfg. Co., makers of Dayton motors, tone arms and sound boxes, of this city, to $300,000. Of this $200,000 is preferred, and it has been underwritten by the United Security Co., of Canton, O., one of the largest bonding concerns in the United States. The $100,000 common stock issue has been taken up by the old stockholders. This $300,000 increase in capital stock of the company has been brought about by the growth in popularity of Dayton motors, tone arms and sound boxes—also other articles of manufacture turned out by the Thomas plant.

This increased demand is due to the general excellence of the Dayton product. In fact, the aim of the Thomas plant from the very start has been quality of material and workmanship, feeling sure that the trade would appreciate a high-grade motor, tone arm and sound box. That belief has been justified by the big volume of business booked and now rapidly being cared for by this concern.

The Thomas Co. has long been one of Day-
ton's leading industrial units. The Dayton motor is the prime motive force behind this won-
derful industrial expansion. It is the result of scientific experiment on the part of Dayton inventors and mechanics. Dayton inventors brought out the Wright Aeroplane, the Omar Fare Register for street cars, the National Cash Register, the Delco Electric Starter, the Dayton Computing Scale and a host of other well-known specialties. Dayton, the home of 1,000 factories, is known as the "City of Precision" because its mechanics are accustomed to the building of exact machinery. And it was Day-

ton inventive genius and Dayton manufacturing skill that made the Dayton motor.

M. H. Mathews, founder of the Thomas Mfg. Co., retains the presidency and general manage-
ment of the company, being the wealthiest owner of the common stock. G. M. Mathews is vice-

president. W. R. Funk, business manager of the U. B. Publishing House, one of the largest in Ohio, is secretary. F. B. Jennings, connected with the Thomas Co. since its inception, is treasurer.

Associated with these men on the board of

directors are Hon. E. E. Burkhart, twice Mayor of Dayton and now one of the firm of Burkhart, Heald & Pickrel, a leading firm of attorneys in Dayton; A. C. Jackson, formerly cashier of the Dayton Savings Bank, now assistant secretary of the United Security Co., Canton, Ohio, and Chas. W. Shaper, president of the Merchants National Bank, Dayton, Ohio.

Mr. Mathews informed our representative that offices of the company have been located in Chicago, Toronto and New York. The New York office is operated under the name "The Thomas Phonograph Parts Co." and is located at 18 West Twentieth street, in charge of C. J. Kronberg, J. J. Freund and H. Ger-

main. The Chicago office is located at 1330 Otis Building, 16 South LaSalle street, and is in charge of F. E. Reid, for many years in the phonograph business in Minneapolis. The Toronto office is in charge of Paul K. Wood, a very well-known figure in the phonograph motor industry; also Frank J. Foley, formerly a leading attorney of Toronto, also at one time connected with a leading phonograph company of Canada.

During the interview President Mathews said that business during the past months had ex-
ceeded his fondest expectations. He told of five orders which alone aggregated nearly $300,000, and of a scope of smaller orders also rapidly being filled. President Mathews smilingly re-
furred to the future of the Dayton motor as far as he is concerned. He believes that now the 
and, judging by the hum of machinery, modern and ably handled, and the general bustle about the plant, it certainly looks like even the most optimistic dreams ought to come true—
so far as Dayton motors, tone arms and sound boxes are concerned.

This article shows a view of the main plant of the Thomas Mfg. Co. It is located in the heart of Dayton, just a half block from the Union Station. It occupies 300,000 feet of floor space. Another factory building stands two blocks east, near the Miami-Erie Canal, and it has floor space aggregating 55,000 feet.

Mr. Mathews stated that for the present there would be no building operations, but that the entire increase of capital would be devoted to the expansion of equipment and the refining still further the products produced.

The local papers have devoted considerable space recently to the growth of the business of the Thomas Mfg. Co., and the Journal par-
ticularly had a full-page story giving illustrations of the various departments of this estab-
lishment, and telling in detail of the success of the motor, sound box and tone arms turned out by this establishment, and emphasizing that the business has been built on the basis of quality. In fact, the Thomas Mfg. Co. is right on the map these days.

NEW VICTOR REPAIR PART CATALOGS

The Victor Talking Machine Co. has just is-
sued for the use of its dealers a new repair-
part catalog for Victrolas VIII-A and IX-A, and also for the latest type Victrola XXV. Owing to change in the mechanical equipment of the new model as compared with the old type, the new repair part catalogs are very neces-
sary to the dealer and should be filed carefully. The Victor Co.'s suggestion that the repair part catalogs be preserved in the new style patent spring binder, supplied at cost by the company, is a good one. It will keep the catalogs all to-
gether and available whenever required.

Extensive improvements have been made in the music store of Harold N. Stillwell, talking machine dealer on East Main street, Freehold, N. J.

How to Make the Instalment Department of a Talking Machine Business Successful

By Marion Dorian

[During the past two months we have had a number of inquiries from small mercantile houses, in regard to making the instalment accounts profitable, and we take the liberty of printing below an article written some time ago for The World by Marion Dorian, chief author of the Columbia Graphophone Co., which is pertinent here.

We hear about the difficulties incident to instalment business. If dealers have had losses with this class of business it is largely because they have not gone about it in the right way. There are five cardinal rules for the successful handling of instalment accounts. These have been thoroughly tested, and a fair try-out will prove them powerful aids in making instalment business what it ought to be.

There are exceptions to all rules, and circumstances will arise when it is wise to suspend the rule temporarily. In such cases the sensible dealer will act accordingly.

The five rules follow:

1. Investigate the customer in advance of delivery of goods.
2. Sell him no more than he can pay for comfortably.
3. Let terms be simple and clear-cut. Make sure the customer understands and accepts them.
4. Enforce those terms.
5. Do not allow arrears to accumulate.

Third—fourths of the trouble dealers have with instalment accounts is due to the failure to secure a good sale. Insufficient or no investigation is made as to the responsibility, reputation, or antecedents of the customer. The sale is hurriedly consummated, the goods delivered, and shortly thereafter the dealer learns to his sorrow that the customer is not what he represented himself to be. In many instances both customer and goods disappear.

It is easy to ascertain all it is necessary to know about the customer. His resources and income; his reputation for prompt payment and his general standing in the community. This should be done before the goods are delivered and will insure you against surprises.

Rule 2 is equally important. The advance in instalment business is largely due to the prominence of the instalment as the greatest single item of income; because permanent it is and what demands are made upon it by the family. With this information in your possession you can determine what it is safe to sell him. Suppose a prospect receives a salary of $30 per week, and has a family of four. If he has been receiving this salary for some time and his reputation is good, you are justified in assuming he can safely pay $2 or $3 per week. More than that is dangerous, because allowance must be made for possible sickness of some of his family, which will make greater than ordinary demands upon his income. Eight to twelve months is the period within which an outfit should be entirely paid for. Allowing for a 6% weekly payment spread over eight months a customer could in that time pay for an outfit costing $64. That would be the limit which the wise dealer would sell him. Many dealers make the mistake of selling a customer double the amount he can pay for comfortably, with the result that the payments become harder as they multiply and each payment day the customer feels he is carrying a burden. Consequently his attitude becomes one of antagonism and he pays grudgingly; whereas, if sold a bill he can pay for comfortably, he does it cheerfully.

Many customers who buy goods on the instalment plan are of limited business experience. A complicated instalment lease is to them an incomprehensible thing. Your instalment lease should be as simple and clear-cut as is consistent with adequate protection. The terms of the contract should be made clear, and customer should accept them in all particulars. Salesmen should be prohibited from making verbal agreements with customer. If special terms are made these should be written into the contract itself. If this is not done d'apartes are apt to arise which are destructive of the mutual confidence which must exist to insure a continuance of patronage. The customer should be furnished a copy of the contract, so that he can refer to it at any time. In this way you gain the customer's confidence and he will not only give you his own future business, but induce his friends to do likewise.

Terms should be made as reasonable as you can afford; but once these have been agreed upon and accepted they should be enforced rigidly. There is no easier way to spoil good customers than by giving the impression that terms are mere formalities. There is no sure way of getting a list of accounts in bad condition than by ignoring the regular date when an instalment is to be paid. If the customer has agreed to pay on Monday train him to make the payment on that day and not on some other day. If his payment is not made on Monday notify him immediately to bring in the payment or make it to your collector without further delay. The moment the first lapse occurs, get in after him and prevent him that the goods were sold on definite and accepted terms and that you expect him to perform his promise. If his payment has not been made by the close of business on Monday have the collector at his place of business or residence on Tuesday morning and you will save money. Even the most obstinate customer will respond to this kind of treatment, especially if he is made promptly.

If you enforce the terms and train the customer to make payments regularly no arrears will accumulate. If you allow two or three payments to lapse it is like drawing eye teeth: to get a customer to make up the arrears. You may secure subsequent payments regularly, but lapsed payments hang fire until the end. Instead of getting your account settled within the contract period, it runs over some months, and persistent dunning, which often results in the dropping of a good customer, is necessary, to say nothing of the added expense to which the dealer is put.

These rules may not be new or presented in a new way, but if followed they will result in better and more profitable instalment accounts. They may be summarized as: Selecting a customer wisely; selling him judiciously; starting him correctly; keeping him in the straight and narrow path, and, finally, making him an asset, because you have sold him an article which has afforded him and his family unlimited pleasure and made it possible for him to pay for it without discomfort. In so doing you have made a lasting friend.

EMERSON MEN "DOING THEIR BIT"

At the executive offices of the Emerson Phonograph Co., 3 West Thirty-fifth street, New York, a service flag with four stars testifies to the fact that four members of the company's forces are now enlisted in Uncle Sam's forces in the fight for democracy. These boys who are "doing their bit" include C. D. MacKinnon, of the sales staff; Frank Heming and Jack Brinkman, of the recording department, and Joseph Greenwald, the competent and popular head of the Emerson shipping department.

STRADIVARA

"KNOWN FOR TONE"

You, as a dealer, know that the chief selling feature of any phonograph is TONE. And comparison of STRADIVARA tone with the tone of all other phonographs will prove to you that TONE is the supreme selling feature of the STRADIVARA.

A tone of exquisite clarity and violin-like resonance—free from needle or motor vibration—a tone as peculiar to the STRADIVARA as the time-mellowed purity of a genuine Stradivarius is peculiar to the genius of Stradivari himself.

A tone that is largely due to the fact that the STRADIVARA is the only phonograph in the world that embodies a spruce sound board, built on the principle of the violin and piano.

Hear STRADIVARA tone and you will be quick to realize that you have at last found the tone that SPEAKS for itself, and for your profit!

The Stradivara Plays EVERY Kind of Record

Each Stradivara is equipped with the Stradivara Automatic Stop Device.

7 Models—from $45 to $225

Progressive Dealers: Stradivara sales are going strong in the trade. And that their strength is rapidly increasing is attested by good reports from our dealers.

Get in line for a share of Stradivara profits today. Write for the most liberal discount proposition ever offered.

Distributors of Lyric Records—Write for Proposition.

SCHILLING PIANO CO., Inc.

Wholesale Distributors

112 WEST 234 STREET, NEW YORK
On January 15th, 1918
The Retail Price of
Emerson Records
will be 3 for $1.00 or 35c each

From the very first, we have made Emerson Records, the biggest, fullest values in the phonograph field. We have been continually improving everything that went into their manufacture—from the raw materials to the kind of artists and selections, but up to now we have never found it necessary to raise the retail price.

The war has affected our costs. Raw materials and labor have gone up by leaps and bounds; taxes have been imposed. It is necessary to raise the selling price to keep profits normal.

For example, shellac, the basis of all phonographic records, has gone up in price 200% since the war began—all other materials have gone up in like proportion.

Your Profits Will Be Increased

We know that the cost of retailing has increased in the same proportion as the cost of manufacturing, and we have arranged our new prices to allow you a more liberal profit also.

January and February are the two biggest record months of the year—this opportunity therefore comes to you at a time when you can do the largest volume of Emerson Record business.

Emerson Records at the new price are a remarkable value—for with the many new improvements you are giving an exceptional record at an unusually low price.

The public has become accustomed to increased prices in every commodity of merit it buys. We know that you will sell more Emerson Records at the new price than you did at the old. You can push them harder. It will pay you well to do so.

We want the Emerson Record to continue its rapid progress—we want you to make even a more liberal profit than formerly. We want to make Emerson Records a line of even more importance to you.

By raising the price we are making your stock on hand worth more!

Emerson Phonograph Company Inc.

CONDITIONS IN THE TALKING MACHINE TRADE IN INDIA

United States Consul Lucien Menninger, of Madras, Makes a Report Which Throws an Interesting Light on the General Situation in That Country—Trade Is Largely Undeveloped

Washington, D. C., January 4.—United States Consul Lucien Menninger, stationed at Madras, India, has sent to the Bureau of Foreign and Domestic Commerce the following report regarding India's trade in talking machines.

"A firm in Bombay which deals in talking machines has branches at Madras, Calcutta, Ran- goon, Delhi, and other cities. A representative of this firm states that it has been dealing more largely in the Swiss machines than in others, because it is able to sell them at a much lower price. The Swiss machines, for example, retail at $84.35, whereas the lowest price he is able to quote on certain American machines is $227.11, and they run as high as $84.35. Before the war the Madras firm had agencies in all towns of any importance in the Madras Presidency, such as Madura, 134,130 inhabitants; Tan- jore, 60,341; Trichinopoly, 125,512; Rajahmunn- dry, 48,417; Bevawada, 32,687; Gunter, 40,529; and Negapatam, 60,168. These agencies have been closed, as the business fell off during the war on account of the difficulty of obtaining supplies regularly, and the higher cost of manufac- turing, insurance rates, etc., which necessitated higher retail prices locally. There has been also a certain tightness of money, causing a reduced demand for such articles as may be considered luxuries.

"The dealer mentioned states that talking ma- chines are very largely in use in Madras among those who have means to buy, beyond the bare necessities, certain comforts or luxuries which cost only a moderate amount. In the wealthier homes of the zamindars, rajahs, etc., a certain number of such instruments is found, but not to the same extent. Of the total population of Madras, 518,660, the merchant said about 6 per cent. might be considered as possible users or purchasers of talking machines.

"A large proportion of the poorer people, he said, is not unfamiliar with these instruments, even though they do not possess any, as it is a common practice for companies or individuals to tour the country, giving concerts with the machines, and taking up collections from the villagers or country people who gather to hear them. In this way the machines have penetr- ated into the most remote districts.

"It is said that the greater number of records sold here, except among the European commun- ity, are in Indian languages—Tamil, Telugu, Marathi, Kanaaree, Hindustani, etc. Of these the first two are the most generally in use in this district, Hindustani not being commonly employed in Southern India. For Europeans, however, of whom there are about 4,000 in Madi- ras and 14,000 in the Presidency, nearly all Eng- lish examples, records are in English. A fair num- ber of talking machines is found in homes of the Europeans, but probably not in as great a proportion as among the moderately well-to-do East Indians.

"The merchant who has been quoted states that his firm now gets records in English from London, these being made either there or in America, while some in Hindustani are obtained by him from Bombay. He is of the opinion that Calcutta is the only place in India where records in native languages are actually being manufactured. Formerly many such records were made in Germany, as firms there sent repre- sentatives to India to record the songs or recitations of the leading Indian artists, and afterwards reproduced these on discs which were then offered for sale in India.

"Several Indian dramatic or musical artists have a reputation throughout parts or in all of India, and records reproducing their best- known pieces are popular. Instrumental music, comic songs, etc., also make popular records.

"A large number of department stores is forwarded. They not only sell at Madras, but also have branches at other points in Southern India, as for example Ootacamund, summer capital of the Presidency; Bangalore, principal city of Mysore; and Secunderabad, in Hyderabad State. Usually it is well to address the branches direct.

"There are few here who deal exclusively in music and musical instruments. One music dealer, however, has an establishment of consider- able extent."

PLAN TO CORRECT TALKER TONES

New York Inventor Designs New Machine for Equalizing Tones of Talking Machine and Giving Each Its Proper Value

A talking machine cabinet designed to sift correct and beautify sound before it is thrown to the atmosphere, has been invented by Henry C. Miller of Saratoga, N. Y. The inventor's idea, as set forth, is to correct defects in some of the tones which are unduly magnified by the horn or other amplifying device.

The principle of the invention is better under- stood when it is made clear just how and where a tone is changed from true to false on some talking machines, before it reaches the ears of the listener. Assuming all sound vibrations recorded in the grooves of the disk to be true it is noted that in passing through the repro- ducer and into the horn a certain tone is unduly magnified. If a horn of a different volume is substituted, this defective tone can be made to assume its proper value. This is due to the fact that the horn which serves to magnify the sound is in itself tuned to a certain key by virtue of its size, shape and weight, and naturally re- sponds to vibrations of a tone to which it is keyed.

The same idea is set forth in the case of the piano, where it frequently happens that when a certain note is struck some object in the room will rattle in sympathy. In the talking machine this sympathetic connection generally results in undue amplification of a particular tone.

In the new cabinet the sound, instead of being

LUCKY 13 PHONOGRAPH CO., 3 East 12th Street, New York
Milwaukee, Wis., January 5.—Although the holiday season is over, the Milwaukee Associa-

tion of Music Industries is going right along with its co-operative advertising campaign, believing that business can be very favorably influenced, especially at a time when it actually, is rather slack, by keeping before the public. The campaign was undertaken at the middle of November and covers a period of ten weeks. It undoubtedly was responsible to a considerable degree for the splendid business which talking machine and phonograph dealers of Milwaukee enjoyed during that period, and by continuing its influence the association is keeping business good. This will be the most appreciable slack season in this city this year if the efforts of the dealers count for anything.

Advertisements were published once a week, on Friday evenings, in the daily newspaper of the largest circulation, The Journal. Usually the advertisements were framed so that both the piano, phonograph grand and the talking machine and phonograph were received the joint benefit. But during the week between Christmas and New Year's the association published an exclusive phonograph advertisement for the benefit of that division of the industry. The word runs: "A man, but use judgment in selling them. Keep his interest going. Do not smother it.

"A bird in the hand" may be worth "two on the bush," but if you have strings on the two on the bush, you can keep all three. Never let a customer leave your store without some string of interest or desire to pull him back. A sale is valuable just in proportion to the surety you have that there will be another.

SERIOUS FIRE IN MILWAUKEE

Flames Break Out in Building Occupied by the Phonograph Co. of Milwaukee on Christmas Morning and Cause Loss Estimated at $20,000 —Orders Filled From Chicago

Milwaukee, Wis., January 5.—The Phonograph Co. of Milwaukee, jobber, and the Edison Shop, retailer of the Edison, encountered a rather exciting experience at the close of the holiday season. Early on the morning of Christmas fire was discovered in the three-story building, the first floor and part basement of which is occupied by the Edison dealers, and the remainder of which is a furniture repair and refinishing shop. The wholesale department and stockrooms were badly damaged, while the retail stockrooms were scorched but not rendered unfit for continuing business. Fortunately the fire came at a time when the stockrooms were fairly depleted by the holiday rush and the loss would have mounted into many thousands of dollars. Four firemen were injured in the effort to save the building and contents. The loss is estimated at $20,000 to $25,000, fairly well covered by insurance. The record stocks were relatively much less damaged than machines. Wholesale orders have been filled from Chicago while repairs are being made and new stocks provided. The retail department was open for business as usual on December 26, and while little evidence of fire could be seen in the retail warehouses, the smell of smoke still filled the air and told a mute story of a narrow escape. The Edison Shop is one of the handsomest of its kind in the country. William A. Schmidt, general manager, was undaunted by the loss and within a few days' time was ready for both wholesale and retail business as usual.

The World is in receipt of Christmas and New Year's greetings from Thomas Edens Osborne, the enterprising talking machine man of Belfast, Ireland. The kindly sentiments expressed are most cordially reciprocated.

E. H. LANSING
611 Washington St., BOSTON
SAN FRANCISCO OFFICE, Room 422, CHRONICLE BLDG.
WALTER S. GRAY, Manager
January 8.—The Philadelphia jobbers and dealers in talking machines have just seen through the greatest year in the history of the industry. It has been a profitable year for all concerned. Both lines of the trade have come through the year with a good balance to their credit. What they might have done is a question that could only be answered through the amount of business that they have been compelled to divert from them on account of not being able to supply the goods. There was a shortage that was considerable, but probably not more than the previous year.

Just what the new year is going to bring forth I have not found one dealer who is willing to make a prophecy. The general trend is for carefulness. As one dealer said to the past week, “I think nothing better could be done for the trade than to have the sign ‘BE CAUTIOUS’ printed and placed on every desk.” This it is not to be inferred that there is going to be a big slump in the business, but that the dealer will be wise who does not take too much of a plunge until he sees the way the wind will blow.

Closed a Great Sonora Business

F. D. W. Connelly, the Philadelphia manager of the Sonora Co., went to New York the day after New Year to transact some business at the company offices. He reports an elegant business on the Sonora all during and previous to the holiday season, and while it was not necessary to do so, this statement was confirmed by other dealers, who made emphatic the big December demand for the Sonora. The Sonora Co. advertised quite liberally, and big business was the result. Manager Connelly is arranging for a concert to be given on the second floor of the Sonora Building on the 11th of January. Frank J. Coupe, the general advertising and retail sales manager of the Sonora Co., was in Philadelphia recently.

Blake & Burkhart Closed Big Year’s Business

Blake & Burkhart report that they have had a wonderful Christmas business in Ediscons, and it went considerably beyond their expectation. The last week before Christmas was phenomenal, and Christmas Eve they had the biggest record demand they have ever experienced in any one day. They report that they are certainly well pleased with their year’s business. Among their recent visitors was Charles Gardner, the supervisor of the Edison zone.

New Sonora Agencies

The Sonora Co. has, at present, nine agencies in this city, and the most recent firm to take the handling of this machine was James Bellak’s Sons, who also handle the Victor.

William Kech, formerly a salesman at the Sonora store, has opened a Sonora warerooms at 2009 North Broad street, and is meeting with very good success.

Louis Buehn Co. Ahead of Last Year

Louis Buehn, of the Louis Buehn Co., says: “Business for December was quite satisfactory, so far as sales were concerned, but very unsatisfactory in other ways.” Their inability to get records held down their total sales considerably for the month. Lack of machines also curtailed the month’s business. “The demand apparently was just as strong as ever,” says Mr. Buehn, “and for the intermediate grades, Nos. 9, 10 and 11, it was excessively large. One year’s business closed slightly ahead of last year. This was brought about through the considerably increased record business, and in spite of the reduction in the machine business.”

Penn Co. Reports Enormous Record Trade

The Penn Phonograph Co. also report that they had a very good December business; it was exceptionally large in records, with which they were very well stocked. Their record stock, says Mr. Barnhill, has practically been “shot to pieces,” and the present supply from the factory is practically “nil.” They are simply living now on their reserve. They have only a few machines left. In the new year they expect to carry a very much larger stock than heretofore and will rearrange the upper floors of their building to handle it, and to make the work easier.

Columbia Co. Rearrangement of Quarters

The Pennsylvania Talking Machine Co., whose name has been changed to the Columbia Graphophone Co., the big jobbing establishment in this city of the Columbia on North Broad street, have been making a considerable rearrangement of their offices and other departments. All the offices of the “big men” have been moved from the fifth to the fourth floor, including those of W. C. Fujiy and A. J. Heath. Both men are in New York this week for several days. The Dictaphone department of the company has been taken from their Broad street establishment, and has been removed to the second floor of 924 Chestnut street, where they have suitable quarters and are more in the heart of the business section of the city.

Establish Fifty Pathé Agencies

This Month
highly elated over the business that the Pathé Shop did during the holiday period. The Pathé Shop did not open until November 30. Mr. Eckhardt says: "Our business was all that I had hoped it would be. Not getting open until November 30 we had not the time to apprise the people of the wonderful proposition we had to present to them. There were, however, a goodly number of them who found out for themselves. We had an extraordinary business for the time that we were open. And much of it was a cash business and especially large first payments. The line commends itself to the higher element of music lovers."

Preparation to Start the Spring Drive

Mr. Eckhardt has already been able to establish upward of fifty dealers to handle the Pathé. Arrangements are being made to start the spring drive, which, with the experience of the last month, will enable the company to present the Pathé more forcibly. A series of concerts will be inaugurated about the middle of January which it is expected will stir the music lovers of this city. The dealers will be invited to attend.

Harry Weymann Is Optimistic Anent New Year

Harry Weymann, of H. A. Weymann & Son, Inc., says: "As usual at this time of the year, a quantity of machines was delivered the day before Christmas, and quite a few of our out-of-town dealers sent their trucks to avoid the express and freight embargoes that goes, and in order to make their delivery to their customers in time for Christmas. Our entire wholesale and shipping departments worked until 6:00 on Christmas Eve, until the last machine was shipped out."

"Our record orders in December have exceeded any December since we have been in the Victor talking machine business."

Mr. Weymann is quite optimistic as to the coming year, and believes that the war is not going to affect the trade, and that the Victor Co. are going to be able to supply a big percentage of the demand for talking machines and records that will assuredly be placed upon them.

CONTINENTAL ROUND OF ACTIVITY IN TORONTO TRADE

TOORONTO, CAN., January 9.—A full house greeted Geo. W. Hopkins, sales manager, Columbia Graphophone Co., who made a special trip from New York to deliver his annual address at the Board of Trade, December 11. Mr. Hopkins is recognized as one of the leading sales managers in the United States, and his talk held the audience in their seats, as it was, with punch and pep, and the result of an intimate knowledge of the selling field.

The J. Conter Co., Ltd., are putting on the market a complete line of phonographs, to be sold through the jewelry trade in three models.

C. W. Lindsay, Ltd., Ottawa branch, during the month of December gave noon hour recitals which were entirely informal and included popular and classical, secular and sacred music. This firm handles Columbia, Pathé and Sonora lines.

In Toronto, while for the present business is running smoothly, the dealers are running some strong advertising in conjunction with their dealers.

"A cardol of phonographs is just being unloaded at this moment and we are feeling more contented," remarked W. D. Stevenson, of the Canadian Phonograph Supply Co., London, Canadian distributor of Starr lines, when The World called. "We had practically cleared our stock prior to receiving this delivery, and this enables us to continue giving our dealers the prompt service that we gave when the demand was not quite so heavy.

R. W. Burgess, of the Pathé Co., has just returned from a successful seven weeks' trip to the West, spent in connection with owing's Chicago store.

While there Mr. Burgess opened up a great many valuable accounts for the Pathé western distributors, Messrs. R. J. Whits & Co., Ltd., amongst which were Cross, Goulding & Stadden; Furnishers, Ltd., and Ashdown's of Winnipeg, as well as Campbell & Campbell, of Brandon, Man. Mr. Burgess personally had charge of the opening of the store, and demonstrated the Pathéphone to a very large and appreciative audience. To demonstrate how easily it could be done he proceeded to sell for cash on the spot, and without one of the usual salesmen. The new Louis XVI Pathéphones, and a large assortment of Pathé records, a total cash sale approaching $1000.

A. F. Meisselbach, of the Meisselbach division of the Otto Heineman Phonograph Supply Co., Newark, N. J., and one of America's pioneer men in the phonograph business, recently paid his first visit to the city. On a former occasion Mr. Meisselbach had seen something of Western Canada while on his way from the Western States to Toronto. He expressed himself quite pleased with Toronto. Mr. Meisselbach is much impressed with the rapid growth of the phonograph industry, and to him the number of phonographs on the market is a very strong indication that the industry is only in its infancy.

Ralph Cabanas, for over two years manager of the Columbia Graphophone Co.'s business, with headquarters in Toronto, resigned from that position on December 31 and in a short time proposes visiting Mexico to look into business conditions in that country. On coming to Canada in 1915, Mr. Cabanas expected to remain until matters became normal and required his return, to again give personal attention to his business interests. During his stay in Canada Mr. Cabanas has thoroughly familiarized himself with methods of doing business here and leaves with the satisfaction of having seen Columbia trade develop to the extent of nearly the year's volume, a little more than treble that of his first year. On a recent visit to New York he was congratulated by officials of the company on his record here. He has made many warm personal friends in and out of the trade who will regret his departure, but at the same time extend very best wishes for a complete revival of his former business success in Mexico.

Thomas C. Watkins, "The Right House," of Hamilton, Ont., have taken on the agency for Brunswick phonographs and records.

R. G. Gavin, a leading furniture dealer of Smith Falls, Ont., has opened a new phonograph department and has secured the agency for Pathéphones and Pathé records.

F. A. Girdwood, proprietor of the Rexall Drug Store, Perth, Ont., has added the Pathé line of phonographs and records. D. J. Ritza, another eastern Ontario druggist, has likewise taken on the Pathé.

R. S. Mason, formerly with the J. M. Greene Music Co., Peterboro, and son of the manager of that firm's Lindsay branch, has leased a store in Orillia, where he will handle Brunswick phonographs and records.

Among recent trade visitors to Toronto were M. H. Matthews, president, and L. A. Baxter, vice-president and superintendent of the Thomas Mfg. Co., Dayton, O. This firm has opened up a Canadian branch in Toronto in the Kent Building, which is in charge of P. K. Wood and F. J. Foley. At the Canadian branch it is the purpose to carry for immediate shipment a large stock of phonographs and reproducers and of the four designs of tone arms and sound boxes together with all necessary parts.

At the Stanley Piano warerooms, Yonge street, the Brunswick phonograph line is now being strongly featured.

S. E. Lundsga, a well-known piano dealer of Ayrport, Ont., has secured the agency for Pathéphones and Pathé records for his district.

M. E. Standiford has started on the road wholesaling Starr phonographs and records for the Canadian distributors, the Canadian Phonograph Sales Co.

D. R. Doctorow, credit and sales manager for Leonard Markels, the New York motor manufacturer, spent a few days in Canada early this month, during which he closed some substantial orders.

Mr. Doctorow informed your correspondent that he was arranging at the factory to have a service man come to Toronto for two or three weeks in the interests of Markels motors and parts.

Mr. L. G. Claxton, Ltd., this city, demonstrated the playing of various makes of records with the Bliss reproducer. The faithful reproduction was enthusiastically commented upon.

Whether or not talking machines should be displayed in the piano booths at the Canadian National Exhibition provoked a spirited discussion at the recent annual meeting held in Toronto, Ont., of the Canadian Piano and Organ Manufacturers' Association, resulting in the decision that they may be shown, but that the exhibition committee shall have power to enforce the rule that talking machines and player pianos shall be demonstrated only in the soundproof rooms behind closed doors. It is proposed to exhibit the Piedmont with respect to a suitable accommodation for the manufacturers of talking machines wishing to exhibit.

The Hudson Bay Co., following the concert of the Hawaiian players and singers in costume with the Bird of Paradise and Co., who were filling an engagement here for a week, had a thirty-minute's recital of Bird of Paradise Hawaiian music through the medium of the Starr phonographs.

Arthur Middleton appeared on December 27-28 with the Winnipeg Oratorio Society. He is capable of an extra, in his connection with the Edison Co., and Edison dealers made capital out of his appearance by featuring his records.

Reed & Robinson, Edmonton, Alta., are handling a large volume of business with the Aeolian-Vocaline line.

Lucy Gates, the Canadian artist, delighted large Winnipeg audiences in that city lately in an Aeolian-Vocaline recital.

The Mason & Rieh Co., Ltd., local Victrola representatives, stated that the buying of Victrola records for Christmas giving was unusually large.

MONTREAL'S PROSPERITY REFLECTED IN HOLIDAY SALES

Big Run on Higher-Priced Models—Some Generous Advertising Campaigns—Many New Agencies Announced for Prominent Lines—Stores Enlarged and Remodeled to Take Care of Future Demands

MONTREAL, Ont., January 4.—The local talking machine trade were all unanimous in stating that the holiday trade of 1917 goes down on record as one of the best in their history and are all agreed that the talking machine has certainly come into its own. Several reasons are advanced for the large increase. First, the large amount of money in circulation, the demand this year being practically for the more expensive machines, and this was forcibly brought to the attention of your correspondent by nearly every dealer called upon. Secondly, the manufacturers have spent large sums of money in printers' ink using (all pages exploiting their products and educating the people to the advantages of music in the home, especially in war time. Thirdly, the dealers themselves in addition to the appropriation allowed them by the manufacturers for advertising supplemented this largely by running good-sized copy. Fourthly, the Christmas Club idea had a stimulating ef-

TRADE CONDITIONS IN THE DOMINION OF CANADA.—(Continued from page 39)

fect in disposing of a large number of machines on the installment principle, although from various sources of supply. Mr. B. D. Brown, of Brown's Phonograph Co., London, Ont., Canadian distributor for the Edison phonograph, has just returned from a highly successful trip in the Maritime Provinces, where he opened a large and very effective branch in Givenshead.

J. G. Bradt, manager of the Calgary Graphophone Co., Toronto, was a recent visitor to the trade.

Local Brunswick shops handling Brunswick talkers include Berlin Phonograph Co., Ltd., 153 St. Catherine east, who are East End representatives; Geo. A. Peate, 564 St. Catherine west, West, representatives for Eastern Ontario and Quebec, and the Cowan Piano & Music Co., 633 St. Catherine west, West End representatives.

H. P. Labelle & Co., Ltd., are now featuring the Starr line in addition to other makes handled.

Some of the local branch stores of the United Cigar Stores are featuring Emerson records.

The members of the Montreal Publicity Association at a special luncheon at the Rose Room of the Royal York recently heard an appeal from Mrs. F. W. Stewart on behalf of the Super-FLY Shop and the toys made by the returned soldiers.

An address was given by G. W. Hopkins, general sales manager of the Columbia Graphophone Co., New York, one of the four men chosen by the United States to handle government publicity, who spoke on the little things that make big business. Mr. Hopkins was full of valuable hints for salesmen and advertising men, and his humorous handling of the subject made it all the more interesting.

Eighty-nine Columbia phonographs constituted a large proportion of the orders of Layton Bros., and was the largest number of talking machines ever displayed in a Montreal store window. The publicity thus gained brought most wonderful results.

Henderson & Richardson, Board of Trade building, handle the Stewart, and the day before yesterday this store had one of the largest displays of phonographs. They report an increasing interest in Operafone records.

The Edwards Furniture Co., Sherbrooke, Que., are now stocking a line of phonographs.

J. A. Harte & Co. have completed alterations to the interior of their store, adding a number of soundproof booths and lighting fixtures. This is an attractive appearance.

Pathe and Sonora business has never been as good before in December, said this firm.

Mr. B. D. Brown has experienced his first Christmas business with the Victor as his leader. He reports being sold out in every model in the store with the exception of one machine which he uses for demonstration purposes, and he feels that regard for his supply of records it was sadly depleted. The majority of Victors were sold for private parties, including the higher-priced styles, very little call being noticeable for the smaller types.

The Berlin Gram-O-Phone Co., Ltd., are devoted to the production of fine first records of the Boston Symphony Orchestra.

The Canadian Graphophone Co. report both wholesale and retail Columbia business away in considerable volume this year as regards the month of December and are well satisfied with the number of Grafonolas and Columbia records disposed of as Christmas gifts, the popularity of which is steadily increasing every year.

Mr. A. F. Fisher, manager for the Berlin Gramophone Co. two Victor records, ten-inch, as follows: "Fun in Flanders" (Parts I and II), 18495; "Honey, Will You Miss Me?" and "Take Me Back to the Land of Promise," 21601.

"Giz" Rice needs no introduction to Canadians. His fame as an entertainer reaches far beyond the borders of his native city. When the call of the Motherland was heard he went overseas with the First Canadian Contingent, and saw action at Neuve Chapelle, Mons, Cambrai, Arras, Soissons and Vimy Ridge. Then he was badly gassed and sent to a hospital in England, and is now in Montreal on sick leave.

His ability as an entertainer led to his being detailed to organize entertainments for the men at the front, and he was awarded a commission in order to make his efforts fully effective. Lieutenant Rice took charge of all musical entertainments within the Canadian lines, and, with the aid of the various concert and musical troops organized from different regiments, was able to entertain 70,000 soldiers every week.

The authenticity of the songs and jokes on these records is vouched for as true to life in the trenches by the late Lieutenant Rice. Records will be issued in the near future.

The Berlin Gram-O-Phone Co., Ltd., have enlarged considerably their two St. Catherine stores, and have arranged a large number of demonstration rooms and even with the additional rooms at their disposal customers had to wait their turn in line during Christ- mas and New Year's week.

The report of Charles Cuthro, Sonora and Aeolian Vocalion representative, is to the effect that the company is working directly to the small and most expensive styles of both makes and which he stated sold with much less effort than the smaller machines.

Mr. A. F. Fisher, 23 Notre Dame street, is handling His Master's Voice products.

The Berlin Gram-O-Phone Co., Ltd., report a holiday business equal to the record volume established in December of previous year. The rush came in the last three days preceding Christmas and kept up continuously until New Year's Eve.

Goodwin's, Ltd., report a good steady flow of trade for Edison Diamond Discs and Am- boralos.

We are not sorry for trade that we take all talking machine sales that are offered us," said Manager Henry Hamlet, of Wm. Lee, Ltd., who do an extensive business in Edison phonographs in Montreal. "We are not ready to turn down sales that are offered, as we only want business that is absolutely of a high class nature.

Geo. A. Fisher, who is handling the Brunswick phonograph in Eastern Ontario and the Provin- cies of Quebec, is very optimistic over the fu- ture possibilities of this make and predicts a very big season in 1919. The recent opening of a large new branch in Sherbrooke, which he has already sold a large number to leading local mu- sicians of national repute, who he states are in a position to judge and compare. Two travelling representatives will start out on the road at the first of the year.

Sales Manager W. W. O'Hara, of Layton Bros., told your correspondent that on Christ- mas Eve they were left practically without an Edison machine on the floor, and were cleared out of everything above $300. Columbia Grafo- nomics and records also shared in the prosperity. "Months ago we were deceived into the belief that our customers were getting tired of our product and that pretty soon we should fail to sell all our wants," he said, "but we never anticipated the outburst which came in an avalanche to-day, and all of our Columbia phonographs were sold. Pathe and Sonora ma- chines were the last to go.

That the music loving public are being edu- cated to the advantages of owning a phonograph was amply demonstrated at the wareerooms of W. W. O'Hara Bros., where larger and larger numbers were sold in large numbers as well as Columbia records.

Pathephones and Pathé records enjoyed a brisk demand at the store of G. A. Holland & Son Co.

Wm. Lee, Ltd., are handling the new Golden- stone needle, which they state is selling freely.

NEWS FROM NORTHERN PROVINCES

Talking Machine Trade Most Active in Prov- inces of Saskatchewan and Alberta

Wm. H. Fisher, manager, Saskatoon Piano Co., who features "His Master's Voice," has been busy furnishing a number of sound-proof rooms on the ground floor. The firm is also planning an addi- tion to the rear of the building occupied by them. The Victoria department, at present locat- ed in the basement, has been outgrown, and to meet the need of more rooms it was decided to locate these on the ground floor.

A Columbia distributing agency has been opened up in Calgary, Alta, by James E. Will- iams.

The famous Victor dog, was a promi- nent and attractive feature in a recent display of Heintzman & Co.'s Moose Jaw store. The Victrolas shown were all of satin finish, and with attractive arrangements of "His Master's Voice" records the window presented a very attractive appeal. A later window by reason of its artistic simplicity was particularly good. A cabinet machine and one of table size were shown against a background of denim.

The Victoria department of Heintzman & Co., Ltd., at Calgary, is now in charge of B. Gil- lespie, who manages a branch of Western Gra- phone Co.'s branch in that city. Mr. Gillespie is a thorough and consistent Victoria enthu- siast, and finds a ready response to his enter- tining and serviceable character. Some time ago Mr. Gillespie commenced his Victoria expe- rience with His Master's Voice, Ltd., To- ronto, later transferred to Western Graphophone Co., Winnipeg, and then to that firm's branch at Calgary.

The Child & Gower Piano Co., Regina, are handling a large number of Vocalion phonograph machines.

Jos. M. Tees, formerly of Winnipeg, where he was one of the pioneers in the music busi- ness, has returned to Calgary. Mr. Tees is manager of the Imperial Phonograph Co., which firm is featuring Columbia lines.

The Hudson Bay Co., at Calgary, have taken over the management of all Columbia sales in this territory. The credit attraction of this event took the form of a series of four recitals in their "Temple of Music" on the fifth floor, but which is being removed to the fourth floor during the winter. The recital attraction of the evening was that crowd every available inch of floor space. The programs were of such artistic value and so well rendered as to win from this department's competitors not the least of considerable advantage not to exchange records, as customers naturally preferred unused stock. He told of a Scotsman and his wife who had transferred their record trade to his branch, explaining their decision in that by doing so they were assured of the rec- ords purchased being all new.

There isn't an angle on local advertising, bill boards, store equipment and fixtures that the Columbia Dealer Service Department won't solve for you gladly.

Columbia Graphophone Co. Woolworth Building, New York

RECENT DEVELOPMENTS IN THE TRADE IN PORTLAND, ORE.
As Is Usually the Case the Holiday Demand Cleans Out Available Stocks—Patriotic and Semi-Patriotic Records Have the Call—Machines in Period Styles Make a Hit

Portland, Ore., January 3.—The volume of talking machine business throughout Oregon, and particularly this city and vicinity, is practically limited by the available supply of machines and records, and the demand is spread over all the lines of instruments. In other words, conditions existing at Portland are as a rule those which, according to reports, exist in practically every other section of the country. From present indications there will be no let-up in business for the coming months at least.

The G. F. Johnson Piano Co., by selling "It's a Long, Long Way to Berlin, but We'll Get There" and "Send Me Away With a Kiss," is not losing any friends. R. F. Callahan, the genial talking machine salesman, delights in patriotic records, which he says sell like hotcakes. But he also has the fine taste to recommend the best classic reproductions to discriminating buyers. He says the Boston Symphony Orchestra records sell immediately after being heard. He considers them the most wonderful reproductions of orchestra music ever made.

The William and Mary model of the New Edison machine is being sold at the Meier & Frank store at the old price, with only a nominal sum added for war tax. January 1st the prices on all Edison were advanced and Portland people took advantage last month of the opportunity to buy these beautiful instruments at the old figures and sales during the Christmas holidays were numerous.

Louis Older, formerly with the Columbia Graphophone Co. there, and now in the Canadian army, stationed at Vancouver, B. C., got a six-day lease of absence last week and celebrated it by coming down to Portland and marrying Miss Suzanne Glen, stenographer of the Columbia Graphophone Co.

The Cowan Classic, one of the most beautiful talking machines ever brought to this city, is having a fine sale. These beautiful instruments have been sold to owners of some of Portland's handsomest homes. This case is not its only recommendation, as the tone is unusually full and sweet.

Miss Emma Reynolds, of the Hyatt Talking Machine Co., reports many good sales. Many machines were sold for Christmas gifts. The sale of records is constantly increasing. Those of Galli-Curci are very popular. The Hyatt Co. handles the Victor, Columbia and Edison machines.

P. Murphy, of the Jackson Furniture Co. of Oakland, Calif., is now salesman at Bush & Lane's Piano Co. here. Mr. Murphy sold a thousand-dollar Sonora machine immediately after joining

TRADE OPTIMISTIC AND CONFIDENT
D. Bartelstone Tells of Conditions and Prospects Experienced on Recent Trip—Closed Many Contracts With Manufacturers of Standing

D. Bartelstone, head of the Lucky 13 Phonograph Co., New York, returned recently from an extended Western and Northeastern trip, which included a visit to a number of the company's clients. In addition to securing good-sized orders for the coming year Mr. Bartelstone closed contracts whereby his company will be in a position to offer manufacturers and dealers maximum service during 1918.

In a chat with The World Mr. Bartelstone commented upon the fact that the great majority of the members of the talking machine industry seem to be imbued with optimism and confidence in the future. The manufacturers report the closing of a satisfactory year, and, judging from their plans for 1918, the question of service to their clients will be a most important factor in the coming year's developments.

The Lucky 13 Phonograph Co. now numbers among its patrons some of the best-known members of the trade, who have been taking advantage of the company's offer to keep them supplied with all phonograph parts immediately upon receipt of their orders. The company carries large stocks on hand, and Mr. Bartelstone has been in a position to take advantage of several important contracts during 1917. For the new year this service will be even more intensive than in the past, and a number of new lines will be announced in the near future.

D. Bartelstone has been associated with the talking machine industry for a number of years, and in addition to being a competent executive and merchandising man also possesses an invaluable technical knowledge of the talking machine business, a knowledge which has contributed materially to his company's success. He is well known in local trade circles, and according to his present plans will visit the trade throughout the country at frequent intervals this year.

A CONVENIENT BLACKMAN SOUVENIR
Combined Desk Rule and Blotting Device Carries Holiday Greetings to Trade

The Blackman Talking Machine Co., New York, the prominent Victor wholesalers, remembered their friends in the trade with a most attractive and useful holiday souvenir in the form of an eight-inch celluloid ruler on one side of which appears monthly calendars for 1918, and to the reverse side of which are attached several strips of blotting paper that should prove a great convenience in blotting signatures on letters. The Blackman souvenir will find a permanent place on many desks.
Featuring the Musical Possibilities of the Talking Machine

By William Braid White

The other day I was listening to some Columbia records at a friend's house, and in looking over his collection, the title "Symphony in B minor (Unfinished)" caught my eye. What memories that name brings back! How I remembered that very young fellow whose pennies we had given to the Salvation Army, and how we used to buy each week enough to buy a gallery seat at the St. Nicholas Garden, in New York, so that he might hear Franz Kaltenborn's orchestra on Tuesday nights. This was way back twenty years ago, or very nearly that long. Kaltenborn made a brave attempt to popularize orchestral music in New York during the summer by giving it in a place where you could sit and drink beer while drinking in metaphorically the music from a very good band. His players were nearly all Philharmonic men and they made a pretty large hit that first season. Every Tuesday night was symphony night, and I shall never forget that it was on one of these Tuesdays that I first heard the Unfinished Symphony of Schubert.

The Talking Machine Route

You talking machine fellows, do you know what you might be giving the great American public in these serious times if you would but help them to get acquainted with some of your really fine records of symphonic music? It is such a pity that the people have been taught by newspaper jokes and by general indifference, to sneer at everything which dares to call itself "artistic." But, thank heavens, those days are passing and we are coming to better understanding. Still, there is much progress yet to be made, and in no direction can it be made more surely and rapidly than via the talking machine route. The talking machine is the best musical educator the people ever will have, and in these days, when we are entered on a great and trying task, we need the encouragement and the strength that come from great music, need it as we never needed it before.

It is up to the salesmen to encourage with all their hearts whatever will tend to bring about a better popular understanding of, and demand for, high-class records. The people's heart is right. They want good music, but they don't know what to ask for. They don't know what to listen to. It is up to you to tell them. And how can you tell them if you know no more than they do?

That is why these articles are written; not to instruct you in a superior way, but to furnish ideas that may lead you to take a more definite interest in these things and to make yourself better acquainted with them.

The home folks will not be wanting fox-trots and jazz when the brothers, husbands and sons are at the front. It is up to the talking machine man to decide what they shall have in place of the appalling drivel that once suited everybody.

Franz Peter Schubert

Will you listen, then, while I tell you something about this record: Columbia 4749. At last, the Unfinished Symphony of Franz Schubert, in two parts, one on each side of the disc? It is worth while hearing.

Franz Peter Schubert was one of the world's neglected geniuses. You often hear of such, but seldom know of a real specimen. Schubert's case was genuine. All his life was passed in poverty and depression. He died at the early age of thirty-one, in something very like the weakness of an improperly nourished body. In his short life he managed to compose ten symphonies, operas, piano compositions galore, quartets and quintets for strings, and no less than 600 songs, many of which, such as the " Erl- King," "Gretchen at the Spinning Wheel," the " Serenade," "Hark, Hark the Lark," "Who Is Sylvia," are well known through records to every talking machine man.

Schubert was born in 1797 near Vienna and died the year after the great Beethoven. His father was a poor school teacher and the boy was educated at the school maintained for the choir boys of the Imperial Chapel, a place amongst whom had been secured for him at the age of eleven, on account of his beautiful voice. The fare was scanty, the discipline severe and the child suffered under it. But he was already, although he had no formal musical education, beginning experiments in composition. When he was sixteen his voice broke, and he was dismissed from the school and choir. Three years followed of miserable attempts to teach in his father's school. This finally had to be abandoned altogether, but Schubert nevertheless found time, during the year 1815, when he was but eighteen years old, to compose two symphonies, five operas and one hundred and thirty-seven songs! Some of these songs have since sung all over the world and are still included in the program of every song recital. An obscure musical appointment was, at this time, refused to him on the grounds that he was "imperfectly qualified." Poor Schubert!

Schubert at the Inn

The rest of his life was passed quietly and obscurely. He lived sometimes at home, sometimes in rooms elsewhere. His songs sold fairly well after a time, but often for miserably insufficient prices. For his larger works, however, he could not obtain a hearing at all. Even his songs he had to give away, almost. Franz Lachner, many years later, once related how he and Schubert had a mind one day to go to the country for an excursion, but neither of them had any money. So Schubert hunked up a bundle of songs he had recently written down and gave them to Lachner, asking him to take them to the publisher, as Schubert himself was too shy to present himself there. After much hesitation, the publisher consented to pay five Austrian florins (about one dollar) for the bundle of manuscript! The two took this money and went off, happy as kings. At lunch time they stopped at a little inn. While waiting for their meal, Schubert found an old cracked spinet, at which he sat down and began to play over ideas for new songs that had occurred to him on the road. Soon the landlady and all the other guests had stolen silently into the room and sat listening entranced! Some of these songs, says Lachner, were among Schubert's greatest. The Unfinished Symphony

As I said before, poor Schubert could get no hearing for his larger works, and that is the very reason why the unfinished symphony is really "unfinished," having only the first and second movements. The circumstances were somewhat as follows:

In the year 1821 the Musical Society of Graz in Austria elected Schubert to honorary membership. The obscure composer was delighted at the recognition and announced that he would compose a symphony for the society as a mark of his thanks. He at once set to work and finished the first two movements. He had just be-

(Continued on page 47)
BUT WE DON'T—

We could cheaper our factory cost in many ways as by using gun and birch and finishing to resemble mahogany—but we don't.

We use mahogany and walnut.
We could use two coatings and rub by machine—but we don't.
We use three and rub by hand.
We could save money by using motors that wind with a grind and run with a rumble, with a wobbling turn table—but we don't.
We use a precision motor—as silent to wind and run as your watch.
We could use a poorly constructed tone arm and reproducer with a rattle and a scratch at every turn—but we don't.

We use an acoustically correct and properly constructed tone arm and a brilli- ant reproducer that conforms to the perfection of the rest of the machine—
Great volume—little surface noise.
We could save by using a 10 or 15-lb. iron casting for the concealed horn—but we don't.
We use a machined and carved round neck conforming perfectly to the shape of the tone arm.
We could save by using albums or racks in our higher priced machines—but we don't.

We have built in containers that conform with our beautifully designed cabinets.
We could save by using the usual cheap slide or damper as a tone control—but we don't.
Our modulating device is exceptionally fine and is controlled to any degree by the operator, from a distance if desired, without muffling in the least.
We could have a cheap man assemble many machines a day—but we don't.
We assemble so carefully and accurately that four machines are a day's work for a well paid mechanic.

The Slogan of

The Widdicomb

A Finished Product

Is "Not How Cheaply But How Well"

We realize the prestige of the older concerns and know that to make a success we must build carefully and pay every attention to the details of construction and equipment. Our facilities allow us to produce a perfect machine at a moderate price and with a better discount for the dealer.
The dealer with the Widdicomb line is not only selling the phonograph but complete satisfaction as well.
Apply at once for particulars and territory. Catalog and discounts now ready and orders piling up fast.
Prospective jobbers will be amply repaid by a visit to our factory.

"Play It Yourself"
THE MUSICAL POSSIBILITIES OF THE TALKING MACHINE

(Continued from page 45)

gun the Scherzo when some misunderstanding arose, apparently, between him and the Gratz music, toiled away work was laid aside, and although, according to Sir George Grove, whose authority is final, it did come into the hands of the Musical Society, it was never performed, but remains a third time taken from the original choral interred and performed for the first time at one of the concerts of the Vienna Gesellschaft der Musikfreunde in the same year. Since then it has been played constantly, and is now given at least once a year by every important symphony orchestra in the world.

Allegro Moderato

Schubert certainly never heard his manuscript performed, and yet it stands as a model of euphony and delicate perfection. It contains many novel ideas in the way of orchestration and general treatment, and it is a beautiful beauty that appeals to the musically unlearned as quickly as to the professional musician. Let us look into it a little more closely.

The first movement (Part I on the record) allegro moderato is agitated and stressful. It opens with a solemn theme intoned by the stringed-harmonies. After nine bars of this, the first and second violins take up a rippling accompaniment, which, a little later, is interrupted by a secondary theme from the oboe. This is joined by other reed instruments, with the dancing violins continuing underneath. Suddenly horns and bassoons break in with a challenging chord. A few notes of preparation follow, and then emerges in the 'cellos what is perhaps the sweetest bit of melody in all the literature of the symphony, the famous second theme of the movement: gracious, charming and tender.

As the strains of the 'cellos die away, the violins take up the tune an octave higher and play with it lovingly. But a change impends. A sudden pause comes. Then, without warning, the entire orchestra crashes into a series of ascending chords which lead higher and higher until there modulates out from them the second theme again, tossed around between violins and 'cellos until the first theme returns and is repeated as in the beginning.

A second section of the movement now opens, with the first movement from the original choral melody of the opening. It mounts onward and upward, until the whole set of subjects is hurled together into another maestoso of orchestral color, to emerge at last in gentle alternations, drawing to a lovely and thrilling close, with unison chords and a roll of the drums.

Andante con moto

As the first part is never heard and stressful, so the second is heavenly in its peace and harmony. Three little melodies are voiced together at the opening, in strings, brass and reed instruments, respectively. The little working out of these in canonic form (that is to say, by one voice following the other in imitation first on strings, then in reeds and so on) there comes out a second melody all by itself, in the shape of a solo for the clarinet, accompanied by a syncopated running figure in the strings and oboes. This works up to a sort of climax, and then dies down again into the melodies of the opening. These are repeated and finally develop to a close, the little canonic imitation rising from one set of instruments to another, with a way, almost, almost dreamily, the movement draws to its gentle end.

Schubert left some twelve dozen bars of a third movement written out. There is no trace of any sketch for a finale.

It will not be doubted by any one who will calmly sit down in a quiet room to listen to this symphony that Schubert has here touched heights of beauty which few have reached. The storm and stress of the first movement are everywhere concealed in the velvet glove of sweet melody and graceful treatment of the instrumental work. The pure appealing loveliness of the second movement comes to one like a breath from heaven. Schubert, poor, obscure and neglected, Schubert, that ugly little man with the thick spectacles, whom the sweet Fanny Vogel could not make up her mind to marry, who was too shy to approach the bedside of dying Beethoven, whose best friends thought him a bit unpractical and stupid; this Schubert touched immortal heights of inspiration, dreamed immortal dreams of beauty, such as few others, either before or since, have been permitted to conceive in the great realm of music.

You who may have thought that the music of the masters is obscure, recondite, hard to understand, listen to the sweet loveliness of Schubert, and know that the immortal language is always simple, always easy, always clear to those who listen to it with open ears and minds ready to be taught. Study, let me urge you ever more earnestly, the great treasures of musical beauty that forever have been stored up through the genius and skill of the men who have made the talking machine what it is. Make up your minds definitely that the immortal inspiration of the great souls who have expressed themselves in great music is going to be wanted by the great American people during the strenuous days of the war. Do your part in making it easier for the people to get the consolation, the strength and the encouragement which lie buried in these splendid records on your shelves. You will never regret any trouble to which you go in this connection.

C. A. WOODS PIANO CO. IN NEW HOME

The C. A. Woods Piano Co., formerly located at 1323 St. Nicholas avenue, New York, has moved to new and larger quarters at 1327 St. Nicholas avenue, where special attention will be given to the talking machine department. The company features the Schubert phonograph with a gratifying degree of success in the Washington Heights section.

A New Motif in Phonographs

And an additional source of phonograph profit

The Art Period Pathé Phonograph

In three designs—William and Mary, Sheraton and Jacobean

It is the right thing at the right time—the timely answer to the demand for an Art Phonograph that will fit into the modern scheme of period interiors.

And it's of double significance to the dealer because of its astonishingly low retailing price of

$190

and because of an attractive discount.

There isn't a vestige of doubt about it. In the Art Period Pathé Phonograph you've got something tremendous to offer, at a low price. You will be handsomely repaid for your selling efforts.

This new “phonograph motif” embodies all of the five star Pathé Phonograph selling features:

**No Needles to Change!**

THE PATHÉ SAPPHIRE BALL takes the place of needles. And it is permanent. It never wears out.

**Pathé Records Won't Wear Out**

We guarantee every Pathé Record to play at least a thousand times with the Pathé Sapphire Ball without impairing the unexcelled beauty of tone.

**The Pathé Phonograph Plays All Makes of Records**

Each Pathé Phonograph, at any price, plays not only Pathé Records, but all other makes of records.

**The Pathé “Controla”**

With the Pathé “Controla” you may increase or decrease the tonal volume of the Pathé Phonograph at will.

Write now for details and tie up early with the ever-growing trend toward Art Period furniture.
Profit based on the largest record repertoire in the world!

Profit based upon the world-wide reputation of the Pathe artist personnel:

Muratore, Muzio, Ober, Cavalieri, Didur, Thibaud, Ganz, Bispham, Grace Hoffman, Slezak, Urlus, Weil, Fitziu, Sammarco, Ruffo, DeCisneros and others—most of them exclusively Pathe artists.

Profit based on the Pathé monthly list of records: the latest patriotic, popular, musical comedy and sentimental song and dance successes, at the moment they become successes.

Profit based on the vast new world of melody unfolded by that repertoire: Europe’s best songs, sung in practically every foreign language, by native artists of renown; quaint folk songs and melodies; romantic gypsy instrumental ensembles, favorite Court artists and famed military bands.

Profit based on the genuine satisfaction embodied in the Pathé record guarantee:

**PATHÉ RECORDS WON’T WEAR OUT**

We guarantee every Pathé record to play at least one thousand times with the Pathé Sapphire Ball without impairing the unexcelled beauty of tone.

Profit based on Pathé TONE—it sells itself!

Profit based upon the international prestige that revolves around the name “Pathé.”

Profit based upon a genuinely liberal dealer-discount.

And Pathé Record prices enable you to meet all other record prices.

PITTSBURGH TRADE CLOSES ONE OF ITS BEST YEARS

General Conditions Throughout This Territory Are Promising—S. H. Nichols Succeeds Kenneth Mills as Columbia Manager—J. C. Roush Visiting South

PITTSBURGH, PA., January 9—The Pittsburgh talking machine trade reports having closed one of the most successful years in the history of the business, despite the shortage of both machines and records. Mr. Charles Roush, former president of the Pittsburgh branch of the company, succeeding Kenneth Mills. Mr. Mills has been transferred to the Columbia branch at $5 Warren street, New York City, as assistant to Manager Lambert Friedl. Last June Mr. Mills succeeded Mr. Friedl as manager here, and it is interesting to note that they are again associated in the same organization. Mr. Mills is followed by the well wishes of a host of friends in the local trade.

The Buehn Phonograph Co., local Edison jobbers, tendered a dinner to their employees on Thursday, December 27, at the Fort Pitt Hotel. Covers were laid for eighteen. After the dinner the party attended the theatre.

Among visitors who called on the Buehn Phonograph Co. recently were the following: Harvey Howard, Cameron, W. Va.; L. R. Cope, Lisbon, O.; S. G. Patterson, New Brighton, Pa.; Howard Ross, of the Ross Furniture Co., Fairmont, W. Va.; H. H. Findt, Steubenville, O.; W. B. Pfeiffer, Charleroi, Pa.

Edward Crede, auditor of a local bank, has been announced winner of the second prize in the Edison contest started "Edison Week" in October.

J. C. Roush, president of the Standard Talking Machine Co., local Victor distributors, is spending a week or ten days in the East on business. He will visit the Victor factory.

J. C. McGinnity, of the road staff of the Standard Talking Machine Co., has joined the company with the field artillery, and is stationed at Camp Sam, Houston, San Antonio, Tex. Corp. Don Morrow, of the Standard inside force, returned from Camp Lee, Va., over the holidays.

The Wheeling Music Co., Wheeling, W. Va., has been incorporated to deal in talking machines and other musical instruments, with a capital stock of $10,000. The incorporators are Joseph N. Johnson, Frank Sweitzer, Frank Porterfield, Jr., S. Porterfield and G. Bowman, all are residents of Wheeling.

50% SALES INCREASE IN ATLANTA

Excellent Report by Grafonola Department of Haverty: Furniture Co.—Other Prominent Lines Also in Strong Demand

ATLANTA, GA., January 4—Manager Thornton, of the Grafonola department, Haverty Furniture Co., this city, reports the holiday trade very active. The business of the Haverty Co. was 50 cent, larger than 1916, which, up to that time, was the largest month in the firm's history.

The Cable Piano Co., Victor dealers, are reported as having done the largest business in their Victrola department since the department was organized. All other Victor dealers enjoyed a very greatly increased business.

Phonographs Inc., the Edison dealers and the Diamond Disc Shop, also Edison retailers, had a most satisfactory business, their best sellers being the $200 and $350 types. The New Edition has been well received in Atlanta.

All dealers in the trade are anticipating the largest year's business that has ever been done. The various army camps near Atlanta have contributed materially to the success of the trade.

PATENTS MULTIPLE PHONOGRAPH

Youkner, N. Y., Inventor Designs Machine for Playing a Half Dozen or More Disc Records in Succession and Automatically

A new phonograph designed to play a number of disc records in succession, and without the attention of the operator after he has started the machine, has been invented by Lucien M. Flagg, of Yonkers, N. Y., who is at present enlisted in the United States, Naval Reserve. Mr. Flagg has just been granted a patent on his invention. This is illustrated herewith.

The invention is cleverly conceived, and is provided with a series of turntables bearing records. The tone arm is placed in position at the top, and each record is played, the sound box and tone arm are lifted therefrom by a mechanical arrangement lowered and placed in playing position on the record below. After the bottom record has been played, the tone arm and sound box are automatically lifted and placed in position above the top record. Means are provided whereby the operator may omit any record in the series or repeat the playing of a record if desired. The mechanism may also be regulated to stop playing automatically after any record. The mechanism is designed particularly for electric operation. Special attention has been given to the means for making the mechanism as fool proof as possible. The use of a semi-permanent needle obviates the necessity of frequent work. The changing and permits of the playing of a series of records several times without any attention to that detail from the operator.

The first model of the new instrument is about five feet high, three feet six inches wide, and two feet eight inches deep, and is designed to accommodate six records.

ARKANSAS CITY DEALER PROGRESS

K. Weller Daniels, of Arkansas City, Kan., has installed new equipment for his rearranged department where Edison will be handled. And he is going at the business aggressively. He has been using papers in the local papers, effective copy prepared by himself, that is getting the trade.

No "guesser" ever won shoulder straps in a contest with a "knower."
How Judgment of Human Nature Helps in Closing Sales of Talking Machines

What is salesmanship? What will bring a salesman closer to his point of selling a talking machine than judgment of human nature? Nothing else absolutely nothing. For when a man enters a talking machine store and the salesman approaches him in the wrong manner, the salesman is pushing him away and will be unable to obtain his confidence. No matter how attractively arranged a store may be, and no matter how inviting its atmosphere, if the salesman does not approach his prospect properly half of the otherwise good impression made by the store is lost.

The talking machine salesman should always make it a point to show his prospect around the entire store, meanwhile listening to what the prospect has to say, noticing his actions, and, by watching his eyes, learning what attracts him the most.

A talking machine salesman never goes wrong if he endeavors to find out what the hobby of his prospect may happen to be. No matter what the hobby is, whether it is hunting, or fishing, or hilliards, or even stamp collecting, the salesman will find that the hobby offers him an easy medium through which he can gain the confidence of the prospect.

The salesman who knocks his competitor is in reality boosting him instead. It never pays to knock a competitor or any other make of talking machine. There are many good talking machines made, and the salesman who is willing to admit that there are other good lines besides the ones he is handling will make an impression on the prospect, and will cause the prospect to have greater confidence in all of the statements made by the salesman concerning his own line.

In demonstrating a talking machine the salesman should always play something which, in his judgment at least, will find a responsive chord in the prospect’s heart. When selling a middle-aged customer a piece like “Silver Threads” or “Annie Laurie” is bound to be pleasing. When dealing with a prospect who believes he knows a great deal about music other tactics are necessary. Say to this kind of a customer, “You, of course, are familiar with this selection from ‘Aida.’” Then proceed to play a selection from that or some other opera which you have named. While this is mere flattery, it leads the prospect to believe that you have a good opinion of his knowledge of music and it helps to place him in a pleasant frame of mind and one in which he will more readily respond to the ideas and suggestions you advance in your selling talk.

When explaining the construction of the talking machine the salesman should spare neither time nor effort to make the customer understand anything that he wants to know about the instrument. The wise salesman will “tear the talking machine to pieces” if necessary to make clear any point the customer wishes to know concerning the way the talking machine is made.

One of the strongest selling arguments any talking machine salesman can offer is the fact that he works for a one-price house, which every talking machine house should be. If a customer knows that the price marked on the tag is the one which he will have to pay and that all customers are treated alike so far as prices are concerned, he will have a great deal more confidence in both the house and the line of instruments being handled than he will if he knows that by haggling the price will be brought down.

It is impossible to judge a sale absolutely until the salesman has spent a little time with the customer, and as each prospect is different from every other each deal must be handled a little bit differently in some points at least. The expert salesman is the one who can think faster than his customer and who can direct his thoughts and his questions along lines which will make the sale easier. This can be done only if the salesman has right ideas concerning human nature, and therefore judgment of human nature and getting the confidence of the customer are the two big things which constitute the foundation of real talking machine salesmanship.

WANAMAKER TO SHARE PROFITS

According to a recent announcement employees of the John Wanamaker stores in New York and Philadelphia are to be classified according to their importance during the coming year and their sales are to be averaged. A fund of $400,000 is virtually to be set aside to be distributed in extra commissions. The plan is ostensibly a method of sharing profits, but under the signature of John Wanamaker the explanation is made that if the profits do not permit the withdrawal of $400,000 the balance will be taken “out of the pockets” of the firm. Nor will $400,000 be the maximum amount, for if conversely profits are large the extra compensation will be increased. This is an important move.

A "SELLING BOOK" FOR NEW EDISON
M. M. Blackman Produces a Volume of Information That Is Invaluable for the Salesman Concerned in New Edison Exploitation

KANSAS CITY, Mo., January 4—A year ago M. M. Blackman, manager of the Phonograph Co., distributors of Edison in Kansas City territory, told members of the Edison Diamond Disc Jobbers' Association at the convention in New York of a new plan he had conceived for assisting salesmen to perfect themselves in their job of selling Edison products. Last September this plan was launched by Mr. Blackman and the Gundlach Advertising Agency of Chicago, was put into effect, with the issuance of a magnificent volume of sixteen pages 12 by 15½ inches, the "last word" in de luxe printing of original drawings, photographs and text—and yet far from being merely ornamental. The value of the book, entitled "The Edison Story," is due to its conception, the painstaking evolution, the production, and the performance of the "music recreating" equipment. The work is a marvel of conciseness—for this whole story is told in less than 3,000 words, including description of construction features, of Mr. Edison's search for best ways of doing things, of the re-creation today of the spirit, that is the soul and essence of the original, and even comments of critics of well-known publications, who attended tests.

Five thousand copies of the book were published in January, and last September they were distributed to jobbers, who passed them along to dealers. Perhaps the most important result from the book is that the dealers, who through it have gained a new conception of marketing Edissons, and think and talk of them with a higher enthusiasm.

It is not necessary for the salesmen to study the book, mind its spirit, and keep it where customers could see it. But in addition to usitng it as the keynote and guide to their store selling, they have supplied themselves with copies. The salesmen have taken these books on their sales visits and there have fulfilled the original function for which the book was intended.

It is in reality a "selling guide." The salesman, opening the book when he begins his sales talk, can if he desires—or if he has not learned the contents thoroughly—merely read the pages to the customer, displaying the pictures at the same time. This sales talk is logical—developed—even to the last paragraph in the book, which is designed to get the name on the dotted line.

The salesmen have usually been importuned to leave the book so that some absent member of the family might see it; but since it is just the only one each has, the request usually had to be denied—the salesman could come again.

But the enthusiasm of the prospect over the book has been impressive, and it is a subject, was anticipated in the plan of Mr. Blackman. There was to be a miniature of the large volume, six by eight inches, an exact duplicate, which the salesman could leave—and which, of course, the members of the family would later use on others, backed by the enthusiasm they had gained from the salesman's talk and the view of the handsome volume edition. These miniatures were distributed just before Christmas, and salesmen have therefore had a four weeks' use of them.

The book—both the large one and the miniature—might be called a catalog; yet it is far more than a catalog, in design—and principles. It never gets into the hands of anybody except a real prospect, who has had the Edison presented to him by a salesman, and who has had his interest in every page aroused by the presentation. It is an advertisement, and anybody examining the owner of one of the miniatures who sees it, must nearly always see it while the owner is talking about the excellencies of the Edison.

The Numm Electric Co., of Amarillo, Tex., have opened a branch house in Wichita Falls, and have been fortunate in securing the Phoenix agency, formerly held by Harrison & Everett, at that place.

ACCESSORIES BUSINESS ACTIVE
President Wilking, of the Ready-File Co., tells of Trade Expansion—Important Jobbers Fall Line—Big Foreign and Domestic Orders

INDIANAPOLIS, Ind., December 29—In spite of the war the talking machine accessories business is booming bright for 1918. Although raw materials are higher and freight shipments more or less delayed, yet the outlook is excellent, according to F. O. Wilking, president of the Ready-File Co., of this city. This company, manufacturing a filing system for Victrolas and a fibre needle pointers, has done a tremendously big business this year.

The Ready-File Co. recently received an order for 3,000 sets of Ready-File from J. W. Jenkins' Sons Music Co., of Kansas City. This concern writes that 90 per cent of the Victrolas and X1 it sells are equipped with this filing system. The company recently filled orders from Cuba, Australia and England, which indicates that the war is not stopping business altogether in these countries.

President Wilking announces that the recent delay experienced by the company in filing orders for Ready Needle Pointers has been obviated and this new accessory is now being manufactured on schedule. The company already has a big lot of orders from the trade throughout the country awaiting shipment.

The Ready-File Co. expects to have an exhibit at the National Music Show in New York and will have a few surprises for the trade the coming year.

STATUS OF JANUARY RECORD LISTS
Victor Co. Calls Attention to Importance of the First Supplement of the New Year to Those Who Have Secured Machines at Christmas

An important fact regarding the January record supplement that is not generally appreciated is the relative run of talking machine dealers is the relation it bears to the new talking machine owners—those who have just received their machines the previous Christmas. In a letter accompanying the January Supplement of Victor Records, the Victor Co. says most pertinently:

"The most important supplement Victor retailers receive during the year is that for January. It is the most important because it is the first supplement which goes to the attention of thousands of new customers. A copy of the supplement for January, 1918, is handed you herewith.

"Can you get a mental picture of all the thousands of people who, for the first time in their lives, are now enjoying all the delights that a Victrola brings into the home? Can you get a mental picture of their unbounded enthusiasm? If so, you will realize very clearly that the January supplement is, and will always be, the most important of the year.

"When you put their first supplement into the hands of these new customers, they will fully expect that you will be able to supply them with any record listed therein, and for your own individual good, for the reputation of your own business, it is of the utmost importance that you should not disappoint these people who will inevitably become regular customers of the store that gives them the best service."

Fame is no snob. She weighs merit from behind a bandage.

Manufacturers—Jobbers—Retailers

If you are ready to take advantage of the enormous demand for good talking machines, we can serve you two ways.

We are in the position to sell you the finest looking and scientifically constructed cabinets at reasonable prices.

We can sell you fully equipped machines under your own trade mark or ours, in carload lots at jobbing discounts.

If you are a dealer, please bear in mind that we manufacture only high grade cases and are installing the best mechanical equipment that money can buy. A postal will bring you our catalogue with full details.

Our prices and discounts are fair to the manufacturer, liberal to the jobber, right to the dealer and just to the public.

RECORD DEMAND TURNS SCALES IN BALTIMORE TRADE
Business for 1917 Exceeded Last Year—Holiday Trade Closed With Fine Record—Larger Prices Demanded and Paid—Liberal Advertising Brings Results—News of the Trade

BALTIMORE, Md., January 8—A prosperous year was closed by the talking machine dealers and distributors when the month of December passed. Shortage of records and shortage of records at various times during the year apparently did not interfere with the gross business when the final tabulation was made, for without exception business showed a substantial increase over the year of 1916.

December closed with a fine rush. Buying was of a class that pleased the dealers without exception. There was a great deal of cash business. The item was gathered in by all of the dealers. Larger payments were demanded and obtained by the dealers. The increased prices of machines did not affect the business in any way.

Unlike previous years the machines that had the big call were those above $50; many dealers found it difficult to get a sufficient number of machines of the higher grade, while all of them still retained their cheap machines after the holiday rush had concluded. Business continued after Christmas with a fine class of buying.

Heavy sales of records are what, in many instances, made possible the increased business over last year. Yet the supply of records was at no time equal to the demand made upon the jobbers and dealers. There is still a shortage of records and machines, but dealers are looking to have this cleared up now that the rush has concluded.

Dealers advertised liberally throughout December both in the newspapers and other mediums and used mail matter, leaving no stone unturned to build up a real month's business. The dealers were aided in their big advertising drive by the ads of the various factories.

Stormy weather during the close of the month held back some buying. W. C. Roberts, of the E. F. Droop & Sons Co., Victor distributor, stated that December was a most remarkable month for business. Cash sales in particular exceeded expectations. The big business was in records as well as machines. The year closed about 25 per cent. in excess of the previous year, and it was due to the extraordinary large sale of records, while the machine business was under that of 1916. Looking toward 1918 the firm feel that this is going to be a good year for business, and they plan to increase their sales force with experienced and trained men.

S. C. Cook, assistant manager of the Baltimore branch of the Columbia Graphophone Co., says: "Business was simply great in December and for the year 1917 was enormous. That's the best thing I can say. We were so far ahead of 1916—and that was a great year—that I would not give out the increased figures. Records and machines are both coming along every day, and we have managed to keep all of our dealers satisfied, which was some job."

W. S. Parks, the Baltimore manager for the Columbia Co., is out of the hospital after being a patient for more than six weeks. He was able to be at his desk in final days of the Christmas branch and was pleased beyond measure. He left on New Year's day to attend the convention of Columbia managers in New York City.

Jesse Rosenstein, for the National Piano Co., Pathé distributor, reports business fine for December with a general increase for 1917 over the months of the previous year that the firm handled the line. The firm was handicapped in some measure by the delay in shipments, due to freight congestion.

I. Son Cohen, of Cohen & Hughes, Victor distributors, reports business satisfactory for December, but not much of an increase over the previous year. The business for the year has not been figured up as yet, but will show an increase. Machine and record shortage from time to time kept business back. Mr. Cohen left on Wednesday for New York to stir up more machines and records for Baltimore and during the month of December he also made a number of trips to both the Victor factory and the Victor offices.

Department stores having talking machine departments, as well as furniture houses with talking machine departments, did exceptionally good business during December and closed the year in good shape. Record business with these firms was what helped business immensely, for there were times when they were without machines other than those they had in their demonstrating booths.

The Brunswick is being handled by the local Brunswick Co. and also by the music department of Brager's Department Store. The Kimball talking machine is being handled here by the H. D. French Piano Co., the W. W. Kimball Co.'s representatives, and the firm has been able to sell all that have been shipped here.

VICTROLA OUTFITS FOR SOLDIERS
Automobile Club of Delaware County Presents Oufit of Victorola and Records to Each of Five Regiments From That District

PHILADELPHIA, Pa., January 5—The Automobile Club of Delaware County recently purchased and presented to each of five regiments from this section now in active service a complete Victrola outfit, including records and needles. Each outfit consisted of a Victrola VIII with six record albums containing in all 102 double-faced Victor records; 10,000 needles were included in each outfit and both machines and records were packed in specially constructed pine boxes for transportation, the boxes being fitted with handles so that the outfits could be carried easily by two men. Deep appreciation from both officers and men was the reward of the club members for their thoughtfulness and generosity.

Anticipate Your 1918 Requirements Now

by investigating at once the merits of our improved Veeco Electric Motor and Vitraloid Turntable for electrically equipping your higher grade machines.

The Veeco motor runs on either A. C. or D. C. of 100-125 volts without any adjustment, and can be supplied to run on any voltage from 6 to 250.

To dealers we supply the motor mounted on either 12" or 12 1/2" square mahogany boards, all ready to install.

"B & H" REPOINTER
For "B & H" Fibre Needles

This little device is as perfect for its purpose as time, study and money can make it.

It does its work properly and just as it should be done. With one motion of the lever it planes the point side of the needle and sharpens it as you would a pencil with a penknife. It does not break or crack the cortex or shell of the bamboo.

It perfects and repoints a needle from seven to nine times.

For efficiency, workmanship and general appearance, the "B & H" Repointer cannot be excelled. It is a high-grade tool, (handsomely nickel-plated), easy to operate, practical and fool-proof; put up in an attractive leatherette box, with tray to receive shavings.

An imperfect needle may be instantly perfected and repointed some eight or nine times with this device.

Every user of fibre needles will want a "B & H" Repointer and Perfecter.

As it is our earnest desire that every user of "B & H" Fibre Needles should have the proper instrument wherewith to repoint his needles correctly, we strongly recommend that jobbers and dealers keep this device in stock for the benefit and accommodation of their customers.

GUARANTEED IN EVERY RESPECT RETAIL PRICE $2.00 EACH

Sample mailed to jobbers on approval

NEW BUYING ELEMENT CROPS UP IN BUFFALO TRADE

Mechanics and Laborers Put Extra Earnings Into Season—Heavy Increase in Population Presages Live Business for 1918—The Month's News

BUFFALO, N. Y., January 5.—According to the reports of holiday business coming from local dealers, the public generally has been talking machine crazy. Practically all of the stocks have been cleaned out or greatly depleted, and many more machines and records could have been sold had supplies been available. Mechanics and laborers made up a large proportion of the buyers, for this class of workmen are making more money than they ever made before, and are ready and willing to spend it for talking machines. It is estimated that the Christmas trade just passed was 25 per cent. greater than that of a year ago.

The prospects are that prosperous conditions will continue throughout 1918. Buffalo's population is increasing by leaps and bounds and it is estimated that there are now 50,000 people, with the people still pouring in. With a big suburban territory to work, the dealers have every confidence in future business.

"There was an unprecedented demand for machines and records and there was not a dealer in our territory whose 1917 business did not surpass that of 1916," said V. W. Moody, manager of the Neal, Clark & Neal Co. "It was necessary, however, to make a few substitutions of special-finish Victrolas. Our method of distribution was such that none of these dealers lost business, and few, if any, carried any unsold stock after December 25." The business done at the attractively arranged new retail store of the Neal, Clark & Neal Co. fully met with the estimated forecast of the firm. While not able to advertise machines as extensively as in other years on account of the shortage, the store made a special drive on records and did approximately fifty per cent. more record business in December than was forecasted for the month.

O. M. Kiess, manager of the Buffalo branch of the Columbia Graphophone Co., attended a meeting of the company's branch managers of the United States and Canada in New York City this week.

"Our Edison stock moved very fast," was the holiday report of Charles J. Hereth, the King Furniture Co. is featuring Columbia Grafonolas. The manager of this section is Harry S. Cohen.

The Adams-Koenig Co. handles the Solo- phone, manufactured by the Hallet & Davis Piano Co.

In their large ads in the newspapers every day during the holidays Victor & Co. played up the Pathophone strongly. The window displays of Christmas goods at this store were changed frequently. A demonstration was made daily by a live Santa Claus and a big business was booked.

"We are satisfied with our holiday trade," said C. H. Heinecke, manager of the Victrola department of Denton, Cottler & Daniels. "We were practically sold out and didn't have enough machines to meet the demand. We found our two new extra demonstrating rooms a big necessity."

W. D. Andrews, of W. D. & C. N. Andrews, spent New Year's in Buffalo. "Our holiday trade was limited by the goods received," was the report of this firm. "We had the biggest record business in our history. We were short of records." This store featured window displays of $30 and $50 Victrolas as suitable gifts for soldiers and others.

"Every machine of every other type, which we received, was shipped immediately to dealers," said Mr. Andrews.

Charles Wright, employed for eleven years by W. D. & C. N. Andrews, was a holiday visitor. He is now at Camp Dix. Fred P. Besser, formerly with this firm, is at Spartanburg. Major H. H. Noyes, who traveled for W. D. & C. N. Andrews in the Buffalo territory for five years, is serving his country in France. He is with Pershing's army.

E. O. Hock, Victrola salesman at Robert L. Loud's store, expects to go to Camp Dix February 15. Lingard Loud, son of Robert L. Loud, has passed an examination for the aviation corps, and is awaiting a call from the War Department.

A new show window has been completed at the Buffalo branch of the Rulph Wurlitzer Co. A service flag bearing forty-three stars supplied a striking background for the window. W. P. Tanney is manager of this branch, and R. E. Harrington is a member of the sales force.

Teck Theatre audiences attending performances by Harry Lander and other stars are accustomed to view the display of Columbia Grafonolas in the show windows of Winegar, Lindsay & Seales, located in the Teck Building.

HOLIDAY GREETINGS ACKNOWLEDGED

The World takes pleasure in acknowledging and reciprocating greetings of the season from many of its friends in the trade. Cards have been received from H. A. Weymann & Son, Inc., Harger & Ethel, J. C. Roush, of the Standard Talking Machine Co.; Lester Burchfield, of Sanger Bros.; E. P. Hamilton, of Frederick Leeser & Co.; Mickle Bros. Co., W. D. & C. N. Andrews, and many others.

E. M. BAKER'S NEW POST

Edward M. Baker, formerly advertising manager of the Columbia Graphophone Co., has been appointed advertising manager of the Borden's Condensed Milk Co., New York.

The F. G. and A. Howald Furniture Co., of Columbus, O., have secured the agency for the Brunswick phonograph.

A Logical Profit

in excess of regular business will accrue to Victor dealers who are wide awake. The secret for success in 1918 consists simply in having adequate stocks of the right records at the right time, and in this respect "The House of Service" is your best insurance.

W. D. & C. N. ANDREWS, Buffalo, N. Y.

The Year With a Lucky Eight

1918
IMPORTANT

HANOVER, PA., November 20, 1917

To Our Customers and the Trade:

You have probably been notified by Clement Beecroft, of Philadelphia, Pa., or his attorneys, Wiedersheim & Fairbanks, of Philadelphia, Pa., of an alleged infringement of letters patent No. 1,244,944, dated October 30, 1917.

We wish to say that we have an irrevocable license to manufacture and sell this cabinet, and the patentee has no claim, either in law or equity, against this Company, or any of its customers.

We therefore notify you that we will stand back of you in any dealings with this Company, and that we will defend any suit for infringement which may be brought against you.

If further intimidation by the patentee is resorted to, we wish you would notify us, and we will take legal action to have the patentee enjoined.

Very truly yours,

HANOVER, PA.
FRIEDA HEMPEL NOW EDISON ARTIST

Famous Metropolitan Prima Donna Latest Ad-

dition to the Edison Family of Musical

Celebrities—Scores New Triumph in Opera

Frieda Hempel, noted Metropolitan Opera

drana, is now an Edison artist. The Mu-
sical Phonograph Division of Thomas A. Edi-

son, Inc., has just announced the acquisition of

Madame Hempel to its present galaxy of Met-

ropolitan artists. Madame Hempel is one of the

shining lights of Mr. Curti-Cusazzi's strong-
hold on Broadway.

Madame Hempel's joining the Edison organ-

ization occurs at a time when the name of Heme-

pel is on the tip of every opera lover's tongue, as

a result of her brilliant debut in "The Daugh-
ter of the Regiment."

The music critics of the New York newspa-

pers have been lavish in their praise of Madame

Hempel's performance in 'The Daughter of the

Regiment," and have not hesitated to assert that

she surpasses even the famous Sembrich, who

was the last artist to appear in the same role at

the Metropolitan, some ten years ago. Mad-

amee Hempel herself considers "The Daughter of

the Regiment" to be one of her best roles.

Madame Hempel's vocal and dramatic ac-

complishments so impressed the critic of the

Musical Leader that he declared her to be

one of the greatest favorites heard in

years at the Metropolitan. The Musical

Courtier pays tribute as follows: "... Her

popularity has rapidly and steadily increased un-
til she has become one of the foremost among

the favorites of the public..." These opin-

ions are confirmed by the Chicago Courier, which

says: "Frieda Hempel, who has been her-

alded throughout this country as one of the

greatest artists ever appearing at the Metropolit-

ian... has won a place at the Metropolitan, from

which no one, not even Sembrich, could fill."

Madame Hempel comes of a music-loving fam-

ily. After three years of thorough and conscien-
tious study she made her debut at one of the

smaller European court theatres. It was a great

triumph. Subsequently she was summoned to Bayreuth—an honor said to have never before

been accorded to so young and so inexperienced

a singer. From that time on her career has been

one of brilliant success. She has sung in most of

the great European opera houses and has the

d distinction of being the only woman in the world

upon whom the Belgian Officer's Cross of the

Order of Leopold has been bestowed. This is

only one of many honors.

Madame Hempel's view on music's place in

war-time takes on an especial interest at this

time. In a recent interview she made the state-

ment that "the musical reaction of the war is

very evident. People instinctively turn to music
to ease the terrible strain for a little while."

INTRODUCE NEW SIZE OF RECORD

Emerson Phonograph Co. to Place a Nine-Inch

Double-Disc Record on the Market

The Emerson Phonograph Co., New York, is

now ready to place on the market a new nine-

inch double-disc record, which will retail at

65 cents. The first list of these new records will

be ready on the 15th of the month, and, judging

from the enthusiastic comments of Emerson

dealers, this record will be accorded a hearty

welcome from the trade in all parts of the coun-

try.

The new Emerson nine-inch record is a uni-

versal cut record, similar to the Emerson seven-
inch records which have been on the market for

some time past. These records can be played

on all makes of machines (with one exception)

without any attachment, this feature being the

paramount factor in their signal success.

Monthly lists of new selections will be issued

for the new nine-inch records, and some of the

most popular artists now before the public will

be represented. The company is planning to

institute a comprehensive advertising campaign in

beauty of its nine-

inch record, as it believes that a universal cut

double-disc record, retailing at 65 cents, will

meet with a ready sale everywhere.

The Columbia Graphophone Mfg. Co. has

been incorporated under the laws of Delaware

with a capital stock of $30,000,000, to engage in

the manufacture and sale of graphophones and

other sound reproducing instrumentality.

OFFER PHOTOGRAVURES OF ARTISTS

Stewart Talking Machine Co. Issues Series of

Artistic Prints of Noted Victor Stars for Sale
to Talking Machine Owners

INDIANAPOLIS, Ind., January 4—"Although thy

voice I have often heard, thy face I have never

seen." Using this well-known and popular quo-
tation from the eminent poet Moore as a selling

text, the Stewart Talking Machine Co., Victor

jobbers at Indianapolis, are offering to the trade

hand-colored photogravures of seven noted Vic-
	or artists, the artists being Galli-Curci, Caruso,

McCormack, Schumann-Heinik, Alma Gluck,

Patti and Kreider. They were made from unusual

photographs. These photogravures measure

four by eleven inches—an appropriate size for

framing—and were hand-colored in delicate

tints by a firm of New York artists. They sell

for 35 cents apiece to the dealer and allow a

clear profit of 15 to 20 cents on each one. These

photogravures are being marketed on the theory

that every one who hears a record of any of the

seven artists is a ready prospect for an artistic

print.

NEW BRUNSWICK AGENTS DOWN EAST

Important Houses Take the Representation of

This Well Known Line in Their Territory

BOSTON, Mass., January 9.—The Boston head-

quarters of the Brunswick-Balke-Collender Co.,

the phonograph department of which is under

the capable management of R. H. Booth, at 94

Washington street, has, as reported in the Bos-

ton letter elsewhere, closed an excellent volume

of business within the past few months, and ex-

cellent reports are being received from the trad-

ing representatives. For instance, H. W. Wat-

ter, who has been covering Maine, New Hamp-

shire, Vermont, Massachusetts and Rhode

Island, for the past ten weeks, has closed some

very important accounts and reports a growing

interest in the Brunswick phonograph in his ter-

ritory. Among dealers who have been recently

booked by Mr. Walter are the Wentworth Music Co.,

prominent music dealers, who have stores in

Waterville, Pittsfield and Madison, Me.; Chas.

F. Wing & Co., prominent talking machine deal-

ers, New Bedford, Mass.; J. L. Chalifoux, the

large department store of Lowell, Mass.; Kneep-

ker-Dimmick Co., piano dealers, Lawrence,

Mass.; R. T. Marble, Attleboro, Mass. All these

establishments have placed substantial orders for

the Brunswick line, and are bringing its merits

to the attention of the public. Naturally Man-

ager Boudin is pleased with the substantial ad-

vance of the Brunswick in his territory.

The Peeria Phonograph Co., 418 South Adam

street, Peoria, Ill., was damaged to the extent of

over $8,000 by fire recently. Four thousand dol-

lars insurance was carried on the stock in the

possession of this company.

HEIFETZ “RECORDED” IN HUMAN INTEREST INTERVIEW

“Heifetz telephoned for some more records,” the boy said to me the other day as I stepped into my office.

“Heifetz?” I queried, my mind on other things.

“Yes—Jascha Heifetz, the violinist. He got one of the new Victrola XVI electrics the other day. What kind of records do you suppose he wants?”

Though we do not sell records to retail purchasers, the opportunity to secure worthwhile experience seemed to present itself, so I responded to the Heifetz inquiry with a personal call. But when it came to picking out records for Jascha Heifetz, I confess I was not entirely sure.

It was the morning after the third concert of the young Russian violinist who had become the rage of America—hundreds had been turned away from Carnegie Hall unable to secure admission. The papers were carrying big headlines about “The Musical Marvel of the Age,” “The Wizard of the Bow,” “The Genius of the Violin,” “The Reincarnated Paganini.” The most conservative critics piled superlatives upon superlatives trying to describe his greatness. And in the end they were all compelled to resort to the frail apology, that “words could not express his genius.”

I gave up trying to figure out the musical wants of such a youth, and decided to ask Heifetz to name them himself, selecting some of the famous records of Elman, Zimbalist and Kreisler, and, adding a couple of the new records of the Boston Symphony for variety, and along with a few of the most unusual records in the catalog. I started for the apartment of the Heifetz’s at St. James Court.

In a separate package I carefully carried a bundle of records which I thought might interest the nineteen-year-old boy. They were nothing more or less than the first four records Jascha Heifetz had recorded for the Victor Co.—the first records, in fact, he had ever made.

In response to my ringing of the bell, the door was opened by a short, dignified man of middle age—quite Russian in type. From a room, but one adjoining, came the wonderful tones of a violin, in a Paganini “Caprice.” I explained that I had called to see Jascha Heifetz. “In a few moments, please,” he answered in rather hesitating but good English. “My son has not yet finished his practicing. He began to late today.

“Perhaps the concert last night is the reason for that,” I ventured.

“Correct. ‘No!’ No!” explained the father, brushing the idea aside with the wave of a Russian cigarette. “It is the Victrola that I would spend all his time on. He got up an hour earlier than usual today, he has played all the records he has over and over again. I could not get him to begin his practicing—and it should always be done in the morning.”

The “practicing” sounded like a concert performance, to one listener at least, and just as he had crashed down the scale in thrilling thirds, his father called his name and spoke a short phrase to him in Russian—the passage was repeated on the violin. The father spoke a brief word—evidently of approval—and the playing went on. Once again he interrupted the player at the end of a difficult passage—at least it sounded difficult—and again the passage was repeated until it won the word of approval. Shortly thereafter there came a finale that would have aroused any audience to a frenzy of enthusiasm.

Mr. Heifetz rose and led the way to the music room.

There stood the tall, slender young wizard—in a gray tweed suit, the coat of which had been replaced by a fresh white linen jacket, his round, boyish face flushed, his light brown hair ruffled, and his thick slipped feet headed straight toward the Victrola. He greeted me enthusiastically—or perhaps it is nearer the truth to say he greeted the records enthusiastically—then suddenly seeming to remember, he turned to his father and said:

“Did it go all right the last time?”

There came the anxiously awaited nod of approval, and the priceless instrument that lay on the piano was forgotten in the wonderful musical hodgepodge instrument that graced the corner of the room.

I always thought I had a good talking knowledge of the Victrola—but by the time Jascha Heifetz had put the Victrola through its paces for me I had a much greater one. No boy with a new drum or a new engine had ever been any happier. It is the first talking machine Jascha Heifetz had ever had, and he fairly took it to pieces to see how the wheels went round.

He discovered how to attach the motor to an electric plug in the wall, but he didn’t take any chances until he made sure the electric lights in the apartment were 110 volts. He found the voltage instructions in the back of the machine. We got to talking about electricity, and I learned some more facts from the young Russian violinist. He played the violin records of Elman, Zimbalist and Kreisler and his eyes grew bright and he nodded his head in acclaim as the records of the brilliant artists of the violin revealed the beauties of their playing. Again and again he exchanged understanding glances of enjoyment.

“Pathé Records”

Their Significance to the Dealer:

They signify not only the largest record collection in the world, but they signify the only records that bear the Pathé Record Guarantee:

Pathé Records Won’t Wear Out

We guarantee every Pathé Record to play at least one thousand times with the Pathé Sapphire Ball without impairing the unexcelled beauty of TONE.

They signify:

No Needles to Change

THE PATHÉ SAPPHIRE BALL takes the place of needles.

And it is permanent. It never wears out.

They signify the world-wide, Pathé Record Repertoire: Music new to America—vocal and instrumental celebrities of European fame.

And the Pathé monthly list of patriotic, popular, musical comedy and sentimental songs and dance hits—

Plus the brilliant Pathé artist personnel:

Muratore, Musio, Ober, Cavaliere, Didur, Thibaud, Ganz, Bispham, Grace Hoffmann, Slezak, Ursbal, Weil, Fitziu, Sonnmarco, Rufls, De-Cisneros and others.

Of further significance is the fact that Pathé Records, despite their unique guarantee, cost no more than other makes of records.

And the fact that they are subject to a dealer’s discount so generous it will well repay you to investigate—so-day.

FISCHER COMPANY

CLEVELAND, OHIO

940 Chestnut Avenue
Bert Williams' record A2438 means side-splitting fun for customers, and the music of dollars to Columbia dealers.

Columbia Graphophone Co.
Woolworth Building, New York

with his father as test passages for the violin were reproduced on the disc.

Then he tried out the different needles, expressing great interest in the Victor tung-tone needle which reproduced brilliantly the violin music. He was also delighted with the fibre needle, which produced such a soft, mellow tone. He wanted to know what the needle of—and where the bamboo grew—and couldn't the material be obtained anywhere but in Japan. The records of the Boston Symphony Orchestra seemed almost uncanny to him—and he left the room for a moment to bring back his mother—a gentle, sweet woman, to hear the Tschaikowsky Fourth Symphony.

The comradeship between the boy and his parents was a pleasure to see. If he enjoyed anything, they must enjoy it too. And always there was the air of respectful obedience of Jascha to his father and his mother for suggestions and advice. Jascha Heifetz is wonderful—but Mr. and Mrs. Heifetz are even more wonderful, for never once, by manner or speech, did they convey the impression that they were the parents of a genius. At last I unlaid the smaller bundle of records and slipping one out of its envelope handed it to the young violinist with the remark that "there was a record he might like to hear."

The music began. Young Heifetz came a little closer to the instrument and suddenly stopped short—it was the "Valse Bluteet, the first record he had ever made.

"Listen, mother," he said as he reached out his hand and drew her nearer, and he looked up into his father's face and smiled. With intent, wondering eyes he watched the black whirling disc, his lips quivered, then parted in a smile. He blushed like a school-girl. When the record was finished, he reached out for the second—the Schubert "Ave Maria"—one of the most beautiful "Ave Marias" ever written. Then came the "Chorus of the Dervishes" from the Beethoven "Ruin of Athens," and last of all the "Scherzo Tarantella" of Wienawski. This number perhaps more than any other shows Heifetz's absolute command over the seemingly impossible in technique.

The wonder of it all—this mere boy standing before me, a youth of nineteen, a genius. Since he was nine years of age he has been thrilling thousands with his violin. He has played in all the cities of Russia and all through Denmark, Norway and Sweden. He has traveled across the barren plains of Siberia and now he has braved the perils of the ocean and brought his art to America.

In spite of the hundreds of skilled violinists, and the present recognition of the great artists, Jascha Heifetz sprang into fame in New York in one night, and his four months' tour throughout the country has only deepened the first marvelous impressions. Now he has recorded his greatest numbers, and the thousands of persons who may not have an opportunity to hear the great violinist in concert, in person, may hear him as many times as they wish in their own homes through the medium of his marvelous Victor records. His art, which is thrilling the musical world, comes to the Victor owners with absolute reproduction.

Heifetz's records show the marvelous purity of technique and tone that can only come from a youth touched by the divine spark. A youth whose art, though perfect, will deepen with the experience that years only can bring.

"How do you like the records?" I asked young Heifetz as the last note of his own record faded away.

Jascha Heifetz grinned—a plain boyish grin. "Say, father," he said, evading my question, "was I all right on that?"

As I was waiting for the elevator I had the feeling that those records would be played again and again—that Jascha Heifetz might get acquainted with himself. And even as I was pondering over genius and the youth upon whom it had been bestowed—the door opened, and the reincarnated Paganini, forgetting all about genius and its solemn responsibilities, called out abruptly:

"Say, do you suppose I could have that record of Harry Lauder's—'Stop Your Ticklin', Jock?'"

PLAN TO ENLARGE DEPARTMENTS

GRAND RAPIDS, Mich., January 7—At the annual meeting of the Friedrich Music House, of this city, to be held this month, plans will be discussed for enlarging several departments in the company's store. Special attention will be given to the talking machine department, which is fast outgrowing its facilities.

A PAIR OF HOLIDAY SOUVENIRS

The American Talking Machine Co., Brooklyn, N. Y., presented to their friends in the trade a clever holiday reminder in the form of a small hand mirror bearing on the back the company's advertisement with the catch line: "We want to do business with the man on the other side." The company also distributed a second souvenir in the form of a magazine pencil.
Sectional Cabinets
For Disc Records

The better the facilities you furnish your customers for housing records the greater the quantity of records you will sell.

Look carefully at the cabinet.

It invites you to fill it, in fact, you cannot resist the temptation to fill it. No matter how many sections are bought there will be empty compartments and these are always in sight, and the records too are always in sight. Any record is so easily found and quickly replaced that this cabinet adds an extra charm and fascination to the playing of records.

Suppose each of your customers had this cabinet and you had a sample on your salesroom floor to remind them to buy additional sections. Not only would the sale of the cabinets increase but what a tremendous increase in the sale of records would result and there is excellent profit in the sale of both.

Each section has 90 compartments numbered consecutively from 1 up. Globe-Wernicke Catalogue No. 317 T W describes and illustrates these goods fully.

Brown Disc Record Cabinet
For every small talking machine given as a Christmas present

Every record right in front of you always.
No searching—No confusion.
Records lie flat when drawer is closed—No warping.
Records are vertical when drawer is open. Every record at your fingers’ ends.

A separate compartment for every record.
No Scratching—Rubbing—Cracking or Breaking.

The Brown Disc Record Cabinet was devised to preserve a record perfectly and thereby insure Perfect Reproduction of Sound.

Ask for Catalogue No. 317 T W

The Globe-Wernicke Co.
CINCINNATI
FINE BOOK FOR THE RETAILER

"Music in the Home," a New Volume by Anne Shaw Faulkner, of Special Value in Training Parent and Child in a Proper Appreciation of the Sort of Music for the Home

One of the latest additions to the literature that will aid the talking machine dealer in developing a more general interest in music, and particularly talking machine music, in the child and in the home with a resultant increased demand for both talking machines and records, is a new volume entitled "Music in the Home." The author is Anne Shaw Faulkner, a writer of recognized standing in musical circles and who possesses a thorough knowledge of educational work in connection with the development of interest in the talking machine.

In the first place, "Music in the Home" is a book that gets away from the stilted text-book style, and, yet avoids the technical. The message which it carries is presented in plain, ordinary language, readily understandable and likewise distinctly interesting. It is planned as an aid to parents and teachers "in the cause of better listening," which brought down to plain terms means an aid to training the child to get the most out of the music which it hears. It is intended more for the home than for the school, more for the mother than for the teacher, and thereby makes an appeal to parents that is of the strongest sort.

Miss Faulkner has succeeded in linking up music with history and geography and in giving it an interest beyond that which is confined to itself; in other words, by getting away from the usual practice of treating music as a thing apart.

The musical selections suggested in the various chapters are of the standard variety, and without exception found in the leading record lists. This is particularly evident in the chapter devoted to "Music Every Home Should Know," wherein several hundred songs and instrumental numbers are carefully classified under a variety of headings.

"Music in the Home" has already been purchased in considerable quantities by prominent talking machine companies who are utilizing it in their work of exploitation in the belief that the sale of the volume to their customers will, in the future, make for greater sales of records of the standard sort, thereby building up record libraries in the home that will become permanent and insure continued interest in the talking machine. The book has also been adopted and endorsed by the National Bureau for the Advancement of Music and by a number of schools. It has also been featured successfully by various talking machine wholesalers and dealers, particularly in the West.

Anne Shaw Faulkner (Mrs. Oberdorfer) is as well known as a lecturer on musical subjects, as she is as a writer, and has appeared before many of the largest clubs, schools and colleges in America. She is the author of "What We Hear in Music," used by many high schools and colleges as a text book.

"Music in the Home" is published by Ralph Fletcher Seymour, 410 South Michigan avenue, Chicago, Ill. The price is $1.25 net.

KEEPING THE STOCK IN ORDER

Why the Nedly Kept, Orderly Talking Machine Wareroom Invites Customers and Holds Trade—Some Points Worth Noting

The old saying has it that the "apparel oft proclaims the man," and this is just as true in the matter of "買う" today after your stock or your store front is as it is of your person. The dusty windows and the ill-kept store are a serious deterrance to business progress and dealers should keep these facts in mind. The newly kept, order-ly establishment is always inviting to pur-chasers, and it will be found that the majority of them gravitate to talking machine establish-ments that are so arranged.

In this connection the following excerpt from "Pepitina" is timely and the application to the Columbia product is just as applicable to every other line of instruments which the dealer handles:

"The wise dealer knows that the public will never hold his product in any higher esteem than he himself holds it. That is why an inviting store front; neat, tidy and ample demonstration space, and artistic surroundings always count. This idea can be pushed a little further. The way that a dealer's salesmen handle Grafonolas and records has a big indirect effect on the customer. If records are left lying about loose, out of their jackets, or if Grafonolas are allowed to become dusty and parts taken off, an impression is given that the machines and rec-ords in that shop are not valuable enough to receive special care.

"Put it up to the dealer. Point out his own impressions, say, buying a necktie. If he goes into a store and finds a pile of neckties on a counter jumbled together in chaotic confusion, if the salesman picks one out here and there, breaking loose the main mass, like a dish of spaghetti—it may be a good tie but impressions are against it. If he goes into a store where the salesman carefully takes out boxes and selects ties from individual packages it may be no better a tie, but impressions are decidedly in its favor.

"Your friend dealer will see the point. A few suggestions regarding the careful handling of records—for effect as well as efficiency—will create an impression well worth while. Taking care of the instruments is equally, if not more, important. The Columbia Grafonola is not a box—it is a musical instrument. You never find a piano minus a pedal or half a dozen keys. You find piano salesmen tending pianos with pipes with respect. The dealer who treats the Columbia with the same respect commands an equal regard for Columbia products from his customers."

SECURE THE SONORA AGENCY

The Hessing-Ellis Drug Co., Memphis, Tenn., have secured the agency for the Sonora phonograph throughout that territory, and have opened a substantial talking machine department.

Tone—the vital thing

If you, as a manufacturer, can talk and prove tone superiority in your product, you have a selling argument to overshadow all the "talking points" of cabinetry and design and accessory features.

And you can talk tone superiority. You can put up a product that will make a revelation in tone-volume, quality, tone-volume. When you realize what vivid, lifelike, colorful tone can be produced and sustained by the talking machine equipped with Parr Magnetic Reproducer

fitted with the Vibratone Patented Diaphragm

These two dominating and proven inventions open up wonderful possibilities for manufacturers eager to put their product at the top-notch of class and character.

You want your product to be RIGHT!

If you want your product worthy of your name, you certainly want that product to be right in its most vital feature. And it will be right if it is equipped with the Parr Magnetic Reproducer—the reproducer for those who seek perfection.

The indestructible, non-crystallizing, always resilient VIBRATONE PATENTED DIAPHRAGM

Possessing all the "talking points" of phonographs, it overcomes all noise's bad features. Guaranteed uniform in quality, free from breakers, glitches, and waves, the Vibratone Patented Diaphragm is non-porous, non-absorbent.

It has a definite function and it performs it. It imparts tone, in fact it creates new tone possibilities for every reproducer of other types.

EARLY ORDERING IS SALVATION OF SAN FRANCISCO TRADE

Planning for Holiday Stocks Early in Year Saves the Day in Christmas Rush—W. S. Gray Opens Jobbers’ Distributing Agency—Columbia Men Visit Headquar—ters.—General News

SAN FRANCISCO, Calif., January 1—While business near hardly up to expectations at some of the large talking machine departments during the early part of December, it picked up about the middle of the month and the rush from then until Christmas more than made up for the comparatively quietness of the preceding two weeks. As a matter of fact, the trade reports the closing of a banner holiday season, both in machines and records, and especially in the higher-priced machines and patriotic records. Notwithstanding the freight congestion and consequent slow deliveries on late orders, most of the local houses, at least, were very well supplied with stock, with the exception of a few certain models, having placed their orders for holiday goods early in the year in anticipation of increasing difficulty in getting goods from the Eastern factories as the year advanced. In some instances holiday stock had been stored here for several months prior to the time it was needed.

Reports from other sections of the Pacific Coast received by local jobbers indicate the closing of a very successful year not only in the San Francisco territory, but for the Western territory as a whole. In a few isolated spots business was hardly so good as might have been desired, depending upon local conditions, but in the large majority of instances, both in the dealers and manufacturers, good business in 1917 was better all through than the preceding one, according to Mr. F. B. Tolling. In checking over holiday business he was gratified to find that first payments ran larger than at any other time in the history of the firm’s business, which, he says, was probably due to the fact that practically all workers are getting increased remuneration for their services nowadays. The Wiley B. Allen Co.’s store in Oakland, Calif., did an exceptional heavy business in December, the end of the holiday season finding very little stock on hand there. The Saturday before Christmas was a banner day at the Oakland store. Very good reports are also coming in from other branches of the firm’s business, especially from the Northwest.

Only Difficulty Was Getting Stock

In regard to holiday business, Andrew G. McCarthy, of Sherman, Clay & Co., says the demand for Victor goods left no possible ground for complaint—the only difficulty was to get sufficient stock to supply the needs of the Western trade. The shortage was particularly noticeable on the large styles of machines. Receipts far exceeded expectations. Taking the year as a whole, Mr. McCarthy says Sherman, Clay & Co.’s Victory business showed a substantial increase over the preceding one. They do a very good business only in southern California, and the reports from that section are very gratifying. In the Northwest both wholesale and retail business has been active, according to the reports coming in from Seattle, Portland and Tacoma. Spokane, however, seems to be a little slower.

Columbia Men Off for New York

Just before leaving for New York, after Christmas, Fred A. Denison, district manager for the Columbia Graphophone Co., reported a banner holiday business on Columbia products in his territory. The object of Mr. Denison’s trip was to attend a convention of the company’s managers from all over the country. Others to go from the Western territory included C. V. H. Jones, P. F. West and T. O. Moore, of San Francisco; W. F. Stidham and Mr. Mathews, of Los Angeles, Cal.; G. H. Williams, of Seattle, Wash., and L. D. Heater, of Portland, Ore. Mr. Denison and the San Francisco delegation are expected back at headquarters about the middle of January.

W. E. Henry, who represents the foreign record department of the Columbia Graphophone Co. on the Pacific Coast, has been successful in interesting a great many Western dealers in the purchase of a branch of the machines, which brought the month’s business up to a much higher figure than was anticipated early in the month.

Edw. Humphrey Goes to Byron Mauzy

Edw. Humphrey has resigned as manager of the Victrola department at Hale Bros., one of the large department stores of this city, to go with Byron Mauzy, manager of his talking machine department. Mr. Mauzy was very well pleased with holiday business in that part of his establishment. In fact, 1917 was a very good year throughout, everything considered, he says.

Clark Wise, of Clark Wise & Co., reports an unprecedented demand for records during December, and machine sales were fairly active also, although not so good in proportion as records. Geo. T. Hively, manager of the talking machine department of the Eastern Outfitting Co., which handles Columbia products exclusively, is very well satisfied with holiday business, and he considers prospects good for 1918, providing stock can be obtained the same as usual.

Jas. D. Moore, who has been manager of the Victor department of the Lion Department Store in Toledo, O., for the past five years, is receiving valuable assistance from Wallace Currier, who recently assumed the position of assistant manager of that department. Holiday business with this house has been excellent.

A good question for a retailer new to the business to ask himself: Is your stock of goods such that your customers want and does it suit the conditions of your locality?
A New Record Repertoire and Greater Record Sales for the New Year!

NOT only do Pathé Records represent the largest and most unique record repertoire in the world; music of which America still knows little—the great voices of all Europe; romantic instrumental ensembles of the Old World's Bohemia; the famed military bands, the songs and melodies of lands that live romance; the brilliance and beauty of a world of art so far a closed book to most Americans—

To say nothing of the regular monthly list of up-to-date patriotic, sentimental, musical comedy and popular song successes and dance novelties—

But they represent continuous sales.
And increased "record dividends" to the dealer—
because there is a fast-growing demand for records that play without needles. And Pathé Records mean:

**No Needles to Change**

The SAPPHIRE BALL takes the place of needles. And it is permanent. It never wears out.

**Pathé Records Won't Wear Out**

We guarantee every Pathé Record to play at least one thousand times with the Pathé Sapphire Ball without impairing the unexcelled beauty of tone.

**The Pathé Phonograph Plays All Makes of Records**

Each Pathéphone, at any price, plays all other Pathé Records, but all other makes of records.

**The Pathé "Controla"**

With the Pathé "Controla," you may increase or decrease the tonal volume of the Pathé Phonograph at will.

Pathe recordings are not merely phonographed recordings of such world-famed artists as Muratore, Muzio, Cavalieri, DeCisneros, Grace Hoffman, Ober, Slezak, Urlus, Bispham, Sammaceo, Ruffo, Well and others. They are the realism of those voices.

Pathé Records cost no more than other records and because they offer the dealer an unusually generous discount.

Write for details TO-DAY.

DETROIT, MICHIGAN
Washington Birthday Window Suggestion for Talking Machine World Readers :: :: By Ellis Hansen

"If you put a little love" into all the work you do, and a little bit of gladness, and a little bit of you, and a little bit of sweetness, and a little bit of using, not a day will seem too tedious; not a day will seem too long. Wholehearted work will be attractive, and the world will stop to look. The world will see a "wino" like the "hallelujah" of a song.

In the limited field; and then the world will turn to look at you. Work, a world's appreciation of the thing you've found to do.

The Winning Way—From Houston Post.

Every live talking machine dealer is continually studying over the important problem of creating the best impression. He likes to have his efforts stand out, way ahead of those of his competitors.

Department stores depend largely upon bargain sales. This, of course, is out of the question with the talking machine dealer. There is, however, one other means used to a great extent by department stores which should also appeal to talking machine dealers, and that is the show window. By using taste, brains and a certain amount of effort the progressive dealer can impress his customer through his show windows and in the creation of impressions most dealers realize that it is the first glance that really counts. If a window is attractive, clean, and interesting it appeals irresistibly to the many pedestrians who pass it daily. People are quick to notice interesting displays and few things help more to get a store that valuable business asset—good will. Encouraged by the editor of this Journal, I shall design a number of inexpensive displays in this and succeeding issues suitable for small show windows and not only describe them with illustrations and diagrams, but I will actually make up a limited quantity of the display parts that cannot easily be obtained by retail dealers. These parts can be obtained from me at a very reasonable price and thereby enable dealers to get the full effect of the illustrations. The woodwork and easily made parts will be described in full so anybody at all handy with tools will be able to make them. Before explaining the making of the display

Washington Birthday Window Designed Especially by Ellis Hansen for The Talking Machine World

This is a step in the plan to select some one handy with tools in their employ to have full charge of the show window. Most of the large stores have realized the need of a window trimmer and have either a special trimmer or a clerk who puts in part time for display work. But even the small dealer with only one window and a few clerks ought to have one person and one person only to take care of the show window, and to be held responsible for the appearance of that window. It does not necessarily have to be a man. I know of several stores where women clerks are doing very well indeed as window trimmers. Dealers, however, should realize that it takes time and money to make attractive displays. The would-be window trimmer can no more invent or construct without mental equipment than he can without material with which to work. I know of dealers that do not consider the trimming of their windows as work, but rather as a pleasant pastime, a mental rest from the daily humdrum of every day toil, a labor of love, which, though added to the regular daily duties, should make the person elected to do it thankful and happy! And then dealers wonder why their show windows don't bring results. Any dealer that wants to get results from his windows must first of all recognize window trimming as work—tedious, exacting work, work that not only re-quires gray matter, but imagination, elbow grease and good judgment besides. If anyone of your force can make your window stand out and appeal, as is the true mission of a show window, he should be rewarded not only financially, but by your confidence and trust. Faith in business is really quite as important as faith in religion. When we give a man that we know can be trusted our confidence and express our faith in him and his work, we make easier all his tasks and remove, or help to remove, the greatest obstacle on his road to success.

Don't think this is mere talk, because it is not; it is my own experience, as I shall presently relate. When L. F. Geisler engaged me about seventeen years ago to take charge of the Sherman-Clay windows in San Francisco I had never trimmed a music window before. Somehow Mr. Geisler had faith in me and never hampered me with restrictions, neither did he allow anyone to tell me how to do my work. He trusted me to do the right thing. Consequently, I planned and worked as never before and as a result made a success of it. The other distinguished houses that I have been with have treated me very much the same way and especially my last employer, E. H. Ubl, manager for the Randolph Wurlitzer Co.'s Chicago branch. In the three years that I worked for Mr. Ubl I cannot recall one instance of being told what to do or called down in regard to my work. During that period I made a most complete fiasco in building a float at considerable expense to be used for the advertising men's street parade. The float almost collapsed before it was one block on its way. Of course, I felt very humiliated and unhappy and expected to get what I thought was coming to me. Mr. Ubl was in Cincinnati during the accident and upon his return I told him frankly that nobody but myself was to blame for the failure. Instead of calling me

improvement of the window trimmers' job worth while. Give due credit to the trimmer and don't let some one higher up swipe the glory if glory is due. Allow a reasonable amount of money for display material and other expenses as you would for any other branch of

Detail of Scrola

Washington Birthday Window Designed Especially by Ellis Hansen for The Talking Machine World

The woodwork and easily made parts will be described in full so anybody at all handy with tools will be able to make them.

First make three simple frames or panels: two uprights (see diagram A) and one top frame (B). Use basswood strips one inch square, which can be obtained at your nearest lumber yard. Make the uprights six feet ten inches long by eleven and one-half inches wide. Put two crosspieces (D) as shown in diagram four inches from top, the other thirty-six inches from bottom. Drill quarter-inch holes in center of crosspieces. Next make top panel (B). Length four feet ten and one-half inches, width, eleven and one-half inches, with a crosspiece in center. Now cut two pieces of one-fourth inch wood
WASHINGTON BIRTHDAY WINDOW
(Continued from page 17)

Make the three frames rigid and secure. Then proceed to tack on the scrolas. "Scro!a!" is the name that I have selected for this new decorative material. It stands out in strong relief, being made of heavy cardboard, machine cut and colored by one of the most expert air brush artists in America. After the scrola has been tacked on turn the frames and tack blue crepe paper on the back. Sixteen five-pointed stars, three inches in diameter, should be cut out of white paper and pasted on the crepe paper back of the scrola as indicated in the picture. By using three incandescent lamps back of the frames a very beautiful effect can be produced. Pictures of Washington can be had from ten cents up. Any frame of suitable size will do, but an oval frame is to be preferred. The two American flags used are four by eight inches in size and can be obtained in most stores at $1.50 each. The folds in the drapes are three inches wide and the arrangement is so simple that anyone who tries can duplicate the effect by studying the photograph. The record stands at the bottom of the display were fully described in last month's World. The placing of the phonograph is, of course, up to the trimmer and depends on the number of instruments to be used. Three-sixteenth inch by one and one-fourth inches round-headed stove bolts are used to bolt the four records on uprights. The ten records used should, of course, be patriotic selections. The smallest size window used should be seven feet square. The scrola all ready to be tacked on frames can be obtained all complete for $5. money with order or C. O. D. by writing to Ellis Hansen, 600 South Harvey avenue, Oak Park, Ill. This simply covers the cost of production, with a very slight additional charge for handling.

P. C. Peuser, who recently entered the retail field at Franklin, Pa., with a store at 139 Adams avenue, has secured the agency for the Sonora.

TALKING MACHINE EXPORTS

The Figures for September Presented—Exports Show Machines Decrease and Records Increase

WASHINGTON, D. C., December 30.—In the summary of the imports and exports of the commerce of the United States for the month of September, 1917 (the latest period for which it has been compiled), which has just been issued by the Bureau of Statistics of the Department of Commerce and Labor, the following figures regarding talking machines and supplies appear:

Talking machines to the number of 6,437, valued at $191,157, were exported in September, 1917, as compared with 7,935 talking machines, valued at $181,847, sent abroad in the same month of 1916. The total exports of records and supplies for September, 1917, were valued at $130,534, as compared with $205,084 in September, 1916. For the nine months 61,659 talking machines were exported, valued at $1,066,555, in September, 1917, and $45,210, valued at $1,128,620, in 1916, while records and supplies valued at $1,330,759 were sent abroad during 1917, as against $23,858 in 1916.

GENEROUS CHRISTMAS BONUS

For Employees of Otto Heineman Phonograph Co.—Get War Saving Certificates In Addition

The Otto Heineman Phonograph Supply Co., New York, presented its force of employees with a handsome Christmas bonus in recognition of the fact that they had contributed materially to the closing of the company's biggest year. In addition to this Christmas bonus, every employee in the Heineman executive and sales offices throughout the country was presented by Mr. Heineman with a $5 war saving certificate, and accompanying this certificate was a suggestion from Mr. Heineman that the employees recognize the Government's splendid gift plan embodied in this war saving stamp plan.

VICTOR FRENCH COURSE IN DEMAND

Represents a Timely Contribution to the War Needs of the Country From the Talking Machine Trade—Being Strongly Featured

Victor wholesalers and retailers generally are realizing more than usual interest in the new Victor course in practical French for the American soldiers, which, as has been announced in the World, is contained complete in three double sided records, accompanied by explanatory text books and selling retail at $2.50 for the course.

The Victor Co. has issued for use and distribution by the retailers a most attractive folder explaining the idea back of the preparation of the course and some facts regarding it. The folder is illustrated by interesting photographs of the American soldiers in France and a sec-

KOCH-O-PHONE

$24.50

The KOCH-O-PHONE is the FORD of the Phonograph world. There is no charge for the name or expensive advertising added to the cost. Most people would rather pay $48 (retail price) than $100 for the same amount of pleasure. Plays all makes of disc records. No disconnecting needed in exchanging from one make of record to another. Simply turn wire sound box another change needle to suit make of record. This machine for tonal quality and volume is not excelled by any $100 machine on the market.

EXTRA VICTOR CO. DIVIDEND

The Victor Talking Machine Co. has declared the regular quarterly dividend of 1¾ percent. on the preferred and 5 percent. on the common stock; and an extra dividend of 1½ percent. on the common. The extra dividend was payable December 15.

The Columbus Siradivara Co., of Columbus, O., has been incorporated with a capitalization of $100,000 for the purpose of manufacturing musical instruments, William J. Shaver being one of the principals.

Victor Poster Design of French Course

Suggestion of the first lesson is also reproduced to give an idea of its character. The new course, as it stands, represents a most notable contribution to the war needs of the country from the talking machine trade, and in announcing the course in the booklet the Victor Co. says:

"The directors of the Victor Talking Machine Co., desirous of contributing to the comfort, the welfare and the safety of our gallant troops, ordered the preparation of a practical course in French, which would take care of the soldier's immediate needs, serve as a working basis for further development, and be put on the market at a small fraction of the usual cost.

"To accomplish any such ambition it was necessary to make sweeping departures from precedent. It meant endless study, endless consultations with recognized authorities, endless elimination of nonessentials. This finally has been achieved and a practical, comprehensive system has been devised through which a working knowledge of French may be obtained quickly. Instead of costing $40 or $50, it costs $2.50.7" The point is made that the course is in no sense intended to be a grammatical treatise on the French language, but is designed to enable the American fighting man to make his needs known directly and in idiom if necessary.

It is expected that many thousand sets of the records will be sold in the near future to follow the thousands of sets that have already been ordered.

EXTRA VICTOR CO. DIVIDEND

The Victor Talking Machine Co. has declared the regular quarterly dividend of 1¾ percent. on the preferred and 5 percent. on the common stock; and an extra dividend of 1½ percent. on the common. The extra dividend was payable December 15.

The Columbus Siradivara Co., of Columbus, O., has been incorporated with a capitalization of $100,000 for the purpose of manufacturing musical instruments, William J. Shaver being one of the principals.

GROWTH IN THE DEMAND FOR TALKING MACHINE PARTS

Illustrated in the Development of the Business of the Doehler Die-Casting Co., of Brooklyn—New Fireproof Building Recently Occupied by This Company Most Completely Equipped

The Doehler Die-Casting Co. are completing a year of great advancement. Not only is the increase shown in volume of business but in the actual size of their Brooklyn plant. During the year a seven-story glass and concrete addition was added to their already large plant, running through and facing on the next street. This new building at Court and Ninth streets, Brooklyn, is already filled and contains the general and executive offices of the company.

This building is entirely fireproof and offers the best of working conditions to the many employees. It is modernly equipped and contains among its features a "First Aid" room and employees' restaurant. During the year the aluminum die castings of phonograph parts, perfected by the Doehler Co., have become very popular in the trade.

The remarkable growth of this firm is shown by the fact that ten years ago they employed twenty men and now they operate four factories.

WHERE ESTIMATES AND COSTS ARE FIGURED

situated at various points throughout the country and employ well over one thousand men. The Doehler Die-Casting Co. are very optimistic over the new year, which so recently made its debut, and are making plans accordingly.

BUYS BETHLEHEM T. M. CO.

Penn House Furnishing Co. Buy Assets and Good Will of Company Formerly Owned by E. J. Delfraisse—Business in Good Shape

Bethlehem, Pa., January 14—The assets, stock, fixtures, leases and good will of the Bethlehem Talking Machine Co. of this city was purchased last week by the Penn House Furnishing Co., of Allentown, Pa., Max Chanoch, president. The Bethlehem Talking Machine Co. has been conducted for the last two years by E. J. Delfraisse, who has become Western representative of Jacob Doll & Sons, of New York. The company had no liabilities, which speaks well for a talking machine business, as seldom, when changes of this kind are made, are there nothing but assets to figure on. A. F. Jones, who has been connected with Mr. Delfraisse, will remain under the new management.

DISCUSS PLANS FOR THE NEW YEAR

Branch Managers of Otto Heineman Phonograph Supply Co. Visit Headquarters in New York to Talk Over Future Campaign

Otto Heineman, president of the Otto Heineman Phonograph Supply Co., was the host during the New Year holidays to several of his branch managers who visited New York to talk over plans for the new year. Among these visitors were B. A. Ribolla, manager of the branch in Chicago, and C. T. Poll, manager of the Canadian branch at Toronto.

Both visitors spoke enthusiastically of the business outlook in their respective territories for 1918 and substantiated this optimism by bringing with them good sized orders to be filled immediately. Their sales totals for 1917 indicated that the Heineman business in their sections had far exceeded expectations, but they expressed the belief that 1918 will far out-distance these figures.

While here, Messrs. Ribolla and Poll conferred with Mr. Heineman regarding the important new plans to be announced in the near future and made arrangements whereby the manufacturers in their territories will be afforded excellent service during the coming year. Both of these visitors, in addition to the other Heineman branch managers, will spend some time in New York the end of this month, when the annual conference of the Heineman staff will be held.

PARAGON MFG. CO., INCORPORATED

Hickory, N. C., January 7—The Paragon Mfg. Co., of this city, has been capitalized at $20,000 for the manufacture of talking machines. The company is planning to produce three styles of cabinet machines and will merchandise through the dealers.

BEARING OF FREIGHT SITUATION ON CINCINNATI TRADE

Western Manufacturers Watching Situation Carefully in Expectation of Increased Demand for Local Products—Deliveries by Motor Trucks—R. J. Whelan Resigns—Review of the Trade

CINCINNATI, O., January 5.—Talking machine manufacturers of the Middle West believe that a continuation of the present freight and express conditions in the United States will create markets for their output right in their own centers, thereby completely changing the situation of this important industry.

As is generally known, the larger manufacturers are located in the Eastern markets and the factories about Cincinnati believe that if these are to be handicapped in the future in the delivery of the finished product it will cause dealers to turn to producers nearer home. That is the way the present condition of traffic is being figured out. In the meantime, talking machine manufacturers as well as the piano industry of the Middle West is looking about for some one to institute a truck system between the larger centers in the Ohio Valley, which method of transportation will be relied upon by "home" manufacturers as an outlet for their energies.

Richard J. Whelan has retired as manager of the Cincinnati branch of the Columbia Graphophone Co., the change taking place this week. His successor has not been appointed. The branch is temporarily in charge of F. F. Dawson, of the New York office. Mr. Whelan's plans for the future have not materialized. He has had charge of the Cincinnati district slightly over seven years.

There was a falling off in the holiday business in the Middle West and Manager Greulich, of the Cable Piano Co., who is an enthusiastic Victor dealer, believes this may have been due to the appearance of the Government's questionaire, which reached the homes of prospective selectives the week before Christmas. That appears to be the only excuse that can be given for the decrease. The trade generally found the buyers wanted medium-priced machines and the average payment was higher than was the custom during the holiday rush of a year ago.

Chas. L. Byars, manager of the Vocalion department of the local Aeolian store, in commenting on the December trade, said that while the volume of Vocalion business was not as big as hoped for, yet the quality of accounts opened could not have been better. He remarked:

"The dealers and merchants of the country can do considerable toward allaying the apprehensions of the people by talking and acting in an optimistic manner concerning business conditions. If a dealer himself will be convinced that there is no shortage of money in the land, a very small percentage of unemployed, a higher average wage than ever before, he will have no trouble in taking an optimistic view of conditions."

Manager Dittrich, of the Victor department of the Rudolph Wurlitzer Co., said:

"The New Year has started off with a rush, especially in record business, and record stocks are disappearing rapidly. Most of the dealers report that it is absolutely impossible to keep their record stock complete, owing to the tremendous demand, which exceeds anything previously known in the talking machine line.

"In reviewing the holiday business, we find that December started off in good shape, but that towards the middle of the month business began to fall behind that of last year. Last week, however, proved to be the busiest week that Cincinnati merchants ever remember having experienced.

"While machine sales came up splendidly during the latter part of December, the record business was the one big surprise of the season, and as most dealers were well prepared, splendid results were secured."

"With conditions rapidly becoming normal, and many problems being solved, there is no reason to expect anything else but a most successful talking machine year during 1918. The big question will be stock, and it will be necessary for the progressive dealer to look far ahead in placing orders for his requirements for the year."

New models are to be produced about February 1 by the Crystal Co. One will sell for less than $100. The style and details of the other have not been formally adopted. Ben Schweng, the Cleveland district representative, was in town this week, arranging for his year's supply of Crystalos.

Mr. Neumeister, of the Otto Heineman Phonograph Supply Co., is getting through a satisfactory amount of his required supplies and generally speaking is well satisfied, considering conditions.

The Fritsches Phonograph Co. will enter the South American field, having arranged to be represented there by the North Brazil Machinery Syndicate, with headquarters at Fortaleza Ceara, Brazil. The South American firm represents some thirty-eight American concerns. The Fritsche house, launched less than a year ago, has twenty dealers to its credit, including a firm in Australia, and is doing a splendid business. Their products are winning much genuine appreciation.

The All-Ohio Singing Contest, as conducted by the Columbia Graphophone Co. in connection with the Scripps newspapers, came to a close last month, at Columbus, O., when Miss Ruth Stein, of Akron, and E. C. Mulholland, of Toledo, O., were selected as winners. H. A. Herrick, the Columbia's special representative, personally escorted the winners to New York, where they will have their voices recorded in the Columbia's laboratory. It is expected now that the records will be ready for the market the latter part of January, and all are anxiously looking forward to hearing the records of the successful contestants.

BRILLIANTONE STEEL NEEDLE CO.

New Company Organized in New York With B. R. Forster as President to Specialize in Steel Needles — Offices in the Marbridge Building.

The new year has ushered in a new needle house into the talking machine industry. It is entitled the Brilliantone Steel Needle Co. of New York. Although the firm is new, the "men behind the guns" are not new to the trade.

B. R. Forster, the president and treasurer of this new concern, has been connected for some years as the general manager with I. Davega, Jr., Inc., and in that position developed an enormous needle business for that house. H. Ettinger, vice-president, has had a large experience and acquaintance throughout the trade through his former connection as the manager of the talking machine department of Kranich & Bach.

H. A. Acton, another experienced man, is appointed as secretary.

The Brilliantone Steel Needle Co. opened offices on January 2 in the Marbridge Building, Broadway and Thirty-fourth street, suites 657 and 658, and Mr. Forster extends a cordial invitation to members of the trade to visit them at the above address and to his out-of-town friends to make their offices their headquarters while in town.

This company will specialize entirely in steel needles, in medium, half-tone, loud and extra loud grades, and have selected for their slogan the following line, "Highest quality uniformly pointed steel talking machine needles made in America by American labor." They plan to begin deliveries of needles on February 1.

SAFETY HINTS FOR EDISON WORKERS

Pertinent Suggestions As to Means for Avoiding Factory Accidents Offered by John D. Otis and M. M. Jones at Recent Committee Dinner.

Safety suggestions of value to workers were given by John D. Otis, of the American Museum of Safety, and by M. M. Jones, personnel department of Thomas A. Edison, Inc., following a dinner of the Workmen's Committee of the Edison Phonograph Works, in the clubhouse of the Thomas A. Edison Association, Orange, N. J., recently. The speakers gave an outline of what safety committees can accomplish and advised the men to specialize their investigations so as to become experts in eliminating dangerous hazards, and to secure the greatest possible benefits from their study of conditions in the plant. The need of teaching workers to anticipate and avoid dangers which naturally follow carelessness and lack of caution was pointed out and the speakers urged the men to at all times think safety, as well as to act safely, when going about their daily work. Co-operation between men on the safety committees with foremen was pointed out as an excellent method of securing good results.

The human element, Mr. Otis pointed out, is the biggest factor in plant accidents. All the guards in the world, in his opinion, will not save a man from injury unless that man keeps his mind fixed on his tasks and at all times pays strict attention to the operation he is engaged in. He paid a compliment to the safety committees and declared that, owing to the interest taken by them in their work, the co-operation of other workers is being secured, and the men are disposed to listen to suggestions made from time to time for their safety.

Motion pictures were also shown, illustrating accidents of various kinds, each film presenting a different lesson.

Costs No More Than a Good Stand!

Purchasers of small Victrolas want a Converto Cabinet the minute they see one — because it takes the place of a stand, covers the machine, converts it into a handsome cabinet type, provides dust-proof record compartment—all at a cost no higher than for simply a good stand that has none of these features.

It appeals likewise to present owners of small Victrolas. At little additional cost it gives them a cabinet machine. It revives interest in their machines and in buying new records.

Front doors of machine open through upper doors of cabinet and combine to make a continuation of the horn. The Converto is broadly protected by patent. Two sizes, retailing for $20 and $25—allowing a good profit to dealers.

This is a substantial proposition attested to by many of the country's leading dealers.

Write for Prices and Particulars.

The C. J. Lundstrom Mfg. Co.

Little Falls, N. Y.

Branch Office: Flatiron Bldg. New York City.
The Corna Academy of Languages is opening. It is advised that the phonograph in the home is too often reserved for purely entertaining purposes. Through various forms of advertising literature and card cards, the owner of a machine is advised of the possibilities in their phonograph for acquiring the knowledge of one or two additional languages. Through the use of phonographs, a large number of people will be able to acquire some knowledge of the gate progresses dealers, amply succeeding as a capital well.

Mr. Forster has been Mr. Forster's assistant for some time and is thoroughly conversant with the work. Mr. Schwartz has a wide acquaintance in the field and his efficient management, together with that of Abram Davega, who has general supervision over all affairs of the company, gives great promise of a fine year ahead for that company.

Records show that I. Davega, Jr., Inc., have just concluded one of the best years in the history of the firm. During the coming year it is announced that they will handle Victor products exclusively. As a further aid to dealers, they have obtained a supply of record cabinets for 4's and 6's, of which they have a large stock on hand.

**SOLDIERS LIKE WESER PHONOGRAPH**

A Weser phonograph has been a source of entertainment for many of the soldiers at Camp Dix, Wighttown, New Jersey. The machine was presented to the Twenty-first Company, Sixth Battalion, 153rd Depot Brigade, who have expressed their appreciation in a letter to Weser Bros., 520-530 West Forty-third street, New York, which was signed by every man in the company, as well as Capt. W. H. England. A number of records were also sent with the machine.

**TO INCREASE OUTPUT OF NEEDLES**

Factory Making the Wall-Kane Steel Needles Enlarged to Meet Growing Demands

"It is a sound business principle that in order to succeed any merchant must give the public the greatest value for its money," said D. F. Tauber, president of the Progressive Phonographic Supply Co., New York, sole distributor of the Wall-Kane steel needles. "This principle certainly applies to the needle business and our dealers tell us that they have been able to give their patrons splendid service and value in the Wall-Kane needle. This needle, through the use of chemical processes, plays ten records perfectly, and these same processes give the point of the Wall-Kane a coating that benefits the record and adds to its longevity."

"At the present time our needle is being handled by progressive jobbers throughout the country and our recent factory enlargements will enable us to increase our output materially during the coming year. I may add further that we have received quite a number of letters from dealers, referring to the excellent tone quality of the Wall-Kane needle and the satisfaction it is giving all users."

The Daniels Music Co. recently opened elabo-rate Edison parlors at 106-108 East Fifth avenue, Arkansas City, Kansas, where they are featuring a full line of Edison Diamond Disc phonographs and records.

**MME. MUZIO VISITS PATHE SHOP**

Prominent Pathé Artist Inspects New Retail Quarters Opened in Philadelphia

Philadelphia, Pa., January 7.—One of the recent visitors at the new Pathé Shop, recently opened by the Philadelphia Pathéphone Co., at 1026 Chestnut street, was Mme. Claudia Muzio, the prominent operatic soprano, who is a member of the Metropolitan Opera Company, and an exclusive Pathé artist.

Mme. Muzio has made several Pathé records which have been very well received by the dealers, and when she visited the Pathé Shop she expressed her keen appreciation of the handsome warerooms which the Philadelphia Pathéphone Co. have established, congratulating Mr. Eckhardt upon the progress he is making and upon the exquisite decorations in his retail shop.

INCORPORATED

The National Phonograph Co., Chicago, has been incorporated with a capital stock of $100,000. The incorporators are Martin Rasmussen, Harry Rasmussen, and Frank Cummings.

---

**THE TRADE IS ADVISED**

That I have been granted United States Letters Patent No. 1,244,944, dated October 30th, 1917, on a cabinet for Talking Machines (the design of which is shown herewith) and for which the following claims are made:

1. A cabinet for a talking machine having a top on which the casing of the machine is adapted to be supported, an inclosure rising from said top, and formed of cleats which are adapted to engage the sides of the base, certain of the cleats being fixed to said top and another cleat forming a gate for entrance into the space of the inclosure, and means for holding the gate in closed position and permitting its opening.

2. A cabinet for a talking machine having a top on which the casing of the machine is adapted to be supported, cleats rising from said top forming an inclosure for the sides of the base of said machine and adapted to interlock therewith, one of said cleats being separate from the other cleats and movable forming a gate for the insertion of said base into the space of said inclosure, the inner sides of the cleats overlapping so as to form interlocking joints with said base.

I am prepared to protect my interests under said patent to the fullest extent and all infringers will be prosecuted vigorously.

(Signed) CLEMENT BEECROFT
HANDSOME NEW DELPHeon MODEls

The Hepplewhite model measures fifty-six inches long, thirty-six and one-half inches high and twenty-five and one-half inches deep. It is made of the very high grade mottled mahogany and the experience and knowledge of the Delphon finishing department is used to excellent advantage in giving this instrument a most beautiful finish. It has a beautifully carved grille and the posts are also carved. A heavy plank top is used. The center front section curves outwards, while the two end sections curve inwards.

On each side of the grille are the standard Delphon individual compartment record files.

An electric motor will be used. The reproducing equipment is the same as on the other models, with the exception of the sounding chamber.

William and Mary Model Delphon

which is of unusual size and gives a remarkable tone quality.

In spite of the fact that the Delphon Co. has not yet sent out photographs or descriptive literature featuring these two art models, the first order on each model given to the factory has been sold out. From all indications these two instruments will be very successful and the factory is planning to devote considerable time to the production of these art designs.

ACTION ON STEPHENS BILL COMING

Predicted That Congress Will Take Up the Discussion of Measure Early This Year

WASHINGTON, D. C., December 30—Congressional action on the Stephens Standard Price bill early in the coming year was confidently predicted to-day by E. A. Whittier, secretary-treasurer of the American Fair Trade League, who is in Washington following the opening sessioon of Congress. Mr. Whittier has kept in close touch with the progress of the measure and his prophecy, therefore, carries some weight. Mr. Whittier also took occasion to reply in no uncertain terms to the statement issued by the National Retail Drygoods Association concerning the recent complaints filed by the Federal Trade Commission against Mishawaka Woolen Mfg. Co. and the Cudahy Packing Co., and charged that the statement was issued without any real knowledge of the facts in the case.

"Mr. Howe is quoted as saying," declared Mr. Whittier, "that 'the fact that advocates of price maintenance are seeking a new law is in itself evidence that the present law (the Clayton Act) prevents their doing what they would like to do without laying themselves open to prosecution'. This certainly indicts Mr. Howe's intelligence, or his sincerity, for everybody else knows, even if he does not, that the Stephens bill was introduced and actively supported in Congress a year before the Clayton Act was drawn. Moreover, it will be difficult for Mr. Howe to find anything in the Clayton Act which even remotely involves the Stephens bill stabilization principle for the prevention of predatory price cutting. Rather, its whole theory supports that principle and eliminates cut-throat competition and unfair discrimination."

It has been said we don't succeed so much on our own acts as we profit by the mistakes of others. And there's a lot of truth in the statement.

AMERICAN PHONOGRAPH COMPANY

HOW NEW YORK TALKING MACHINE CO. STAFF CELEBRATED

Executives Prepare a Very Pleasing Surprise for Entire Force at Christmas Time—Substantial Evidence of Appreciation of the Work of the Men—Entertained Also at Travers Island

On Christmas Eve, as a surprise to the office and sales force of the New York Talking Machine Co., the executives had set up, trimmed and brilliantly lighted, a beautiful Christmas tree, which seemed to symbolize the spirit pervading the whole organization.

As the members of the New York Talking Machine Co. gathered around this tree singing a more tangible form than mere words the company’s sincere appreciation of the loyal services rendered throughout the year.

The week following, on New Year’s Eve, part of this group, composed of the sales and office force with their wives and sweethearts, were the guests of Vice-President R. J. Keith at the Travers Island Club House of the New York

Christmas Party of New York Talking Machine the beautiful old Christmas carols and wishing one another a “Merry Merry Christmas,” a spirit of good-will, fellowship and loyalty to one another was evident on all sides. Christmas to the employees of the New York Talking Machine Co. meant more than long hours and the handling of a tremendous volume of business.

Piled high underneath the tree were gifts and packages for everyone. A. D. Griswold, president, after distributing the many gift boxes, surprised each of the group with a Christmas envelope, which, as he stated, expressed in a

THE TALKING MACHINE WORLD

BRUNSWICK PROGRESS IN THE EAST

Exceptional Holiday Demand for Brunswick Phonographs—Sales Conference in New York—New Representatives Announced—Anxi-ously Awaiting the New $1,500 Art Model

The New York offices of the Brunswick-Balke-Collender Co. have concluded an exceptionally fine holiday season, exceeding in volume of business the same period of the year previous. During the last week of December a sales conference of twenty-five representatives of the company was held at Thum's, on Broadway, after which all "did their bit" at a banquet which was served. At this meeting plans were made for the coming year and new policies were adopted increasing the already high facilities of the organization.

It is announced that the following new salesmen have joined the Brunswick staff: F. H. Walter, E. S. Campbell, J. H. Wengrovius and Chester Abelowitz, men who are well known in the field and experienced.

All members of the sales staff are awaiting eagerly the coming of the new $1,500 model of the Brunswick, which is expected to arrive almost any day. Advance information states that this new model will be finished both in English brown mahogany and American walnut and equipped with the universal electric motor. As no advance photographs of the new machine have as yet been received there is a great amount of interest in its arrival.

The New York office have been very busy opening new accounts during the past month. Among them might be mentioned, Edward Strauss, 94 Court street, Brooklyn; the Flatbush Music Co., 502 Flatbush avenue, Brooklyn; the Riley-Hogan Co., 125th street, and a department in the large department store of H. C. F. Koch & Co., 121st street. In the last case the New York office of the Brunswick-Balke-Collender Co. operates the department themselves. Reports already received from these new dealers indicate the popularity of the Brunswick machine in their locality.

NEW COMPANY FORMED IN TEXAS

Verhalen-Delpheon Sales Co., of Texas, to Distribute Products of Delpheon Co., Bay City

DALLAS, TEX., January 8—A company has been organized in this city for the purpose of distributing the products of the Delpheon Co., Bay City, Mich., in Texas, Oklahoma and the South-west. This company will probably be known as the Verhalen-Delpheon Sales Co. Walter Verhalen, of Dallas, is at the head of this organization, and is now making plans whereby the dealers in this territory will receive efficient service and co-operation. Mr. Verhalen made a trip to Chicago some time ago to look over high-grade lines of talking machines. While there he saw and heard the Delpheon, and was so favorably impressed with this instrument that he visited Bay City and closed the deal for distributing rights in his territory.

NEW REPRODUCERS ANNOUNCED

New England Talking Machine Co. Calls Attention to New Line of Perfection Flexi-tone Reproducers and Points Out Their Advantages

BOSTON, MASS., January 5—The New England Talking Machine Co., of 16 Beach street, this city, announce their new Perfection Flexi-tone reproducers to the trade. These new reproducers allow for great interchangeability of records among the various talking machines. A very attractive circular is being sent to the trade calling the attention of the dealer not only to the many merits of the reproducer, but also the great sales help it affords the dealer. Perfection Flexi-tone reproducers attached to Perfection ball bearing tone arms Nos. 3 and 4 play all lateral cut records on all types of Edison disc machines and Perfection Flexi-tone reproducers Nos. 3, 6 and 7 are designed to fit all types of Victor and Columbia machines. It is claimed for these reproducers that they have a wonderful clarity of sound and will reproduce the sounds as perfectly as the recording at the laboratories, from the highest to the lowest sounds. The New England Talking Machine Co. and its president, Chas. P. Trundy, are well and favorably known to the trade and their new product will, no doubt, receive the high popularity that it deserves.

PLAN TO SIMPLIFY BUSINESS

Credit Men Suggest Rules After Studying Office Procedure That Are Worthy Consideration

In order to co-operate to the greatest possible extent in supplying the nation’s need of men for war service, the National Association of Credit Men recently made a study of office procedure, with a view to economizing labor there by simplifying processes. As a consequence J. H. Tregoe, secretary and treasurer of the association, was provided with three rules, copies of which he has sent out to all members of the association, with the statement that they were drawn up by the Committee on Commercial War Economy, and the request that they be observed. The rules are:

1. That checks received in the course of merchandising, and unimportant letters and communications, be not acknowledged.

2. That every dispensable and non-productive office or business device or system that can be released without decreasing the real abilities of the business be suspended during the war.

3. That credit departments shall not inquire of other departments in unimportant cases, and that promissory and merely general inquiries be discontinued.

Mr. Tregoe, in the letter accompanying these rules, points out that even small economies of this description in office procedure may not only, in the aggregate, prove of value in conserving the working resources of the nation, but may also be vitally important in enabling the individual business to weather the hard times of the war period. These suggestions are well worth adoption by talking machine dealers who are seeking efficient methods of transacting their business.

THE VALUE OF GOOD ADVICE

A New York business man relates that an executive of his, after being in business about eighteen months, found it difficult to meet his obligations. He said, in commenting on the case:

"As it not infrequently is found to occur in such cases, he was fairly beside himself and requested me to call on him. After giving me a résumé of his affairs his first impulse was to consult a lawyer. Instead of doing this I advised him to see his creditors, be open and above-board with them, and explain affairs as they actually existed. At first he remonstrated, but when I demonstrated to him that no possible harm could result in doing this he finally decided to adopt my idea, and he called a meeting of his creditors."

"His creditors, almost without exception, acted splendidly toward him, with the result that he is still in business and gradually getting on his feet again."

"I am strongly of the belief that if more and wider publicity were given to this method it would be an advantage to debtors and creditors."

DETROIT TRADE STARTS THE NEW YEAR IN BOUYANT MOOD

Closed Most Satisfactory Business in 1917—Freight Congestion and Shortage of Stock Badly Felt—Detroiters Without Exception All Optimistic—Good Work of the Local Association

Detroit, Mich., January 7—Well, one more year has passed and it is indeed gratifying to know that the talking machine industry has prospered during the preceding twelve months and that the coming twelve months are very encouraging for good business. With very few exceptions every dealer in Detroit says he enjoyed a very good trade during 1917—better than the year before—and that the new year has started off excellently. The holiday business in December was very brisk, even if it did come in the ten days before Christmas. The early part of the month was just fair, but it brightened up considerably right after the 15th. The shortage of some particular models did not seem to make much difference because dealers were able to sell the customers something else. The announcement by many dealers that prices would advance January 1 had a lot to do no doubt with getting people to buy in December. December was a good month, and January will be a good month as compared with a year ago.

Record business is excellent even right now and has been. Patriotic popular numbers, such as "Over There," are in demand and are selling fast, as are also good dance numbers.

Now that the old year has expired some of the dealers are planning an early departure south for recreation and rest. C. A. Grinnell, of Grinnell Bros., will leave any day for his winter home at Sea Breeze, Fla., while Max Strauburg is planning to go golfing at Pinchurst. Others will take short vacations, feeling that they have earned the same after the strenuous December.

The coal situation is proving somewhat of a setback to business, many families doubling up, and not buying machines as they had previously intended. However, this condition is not interfering with the record business, which, as before stated, is just as brisk as ever.

The Edison Shop, according to R. B. Alling, had a dandy year in 1917, many good dealers having been added to the list. Retail business in Detroit and throughout the entire territory has been on the increase.

Frank Bayley, Edison dealer on Broadway, says that his Edison business ran far ahead of expectations. He and the Edison Shop comprise the only downtown dealers and naturally their business would be good. The Edison Shop used many half and full pages in the local papers during December, which helped all Edison dealers.

Ed Andrew, manager of the talking machine department of the J. L. Hudson Co., says: "We more than reached our quota for December, also for the twelve months of 1917—so that we haven't the least complaint to make. We have been very careful in our credit department so that our collections have been unusually good. You know it's not always how much goods you can sell as how much you can actually collect each month." The Hudson store is now selling both the Victorla and the Sonora, and has been boosting both of them very strong.

Wallace Brown, new dealer for Brunswick phonographs, said he had a dandy holiday business, selling a great many more machines than he had really planned for. He is determined that 1918 shall be even better. Frankly, Mr. Brown did not expect a big business during 1917 on Brunswick's, feeling that it would take six or seven months properly to introduce the phonograph to the Detroit public.

The Detroit Talking Machine Dealers' Association has accomplished excellent results during the year just passed. Some very bad trade evils have been eliminated, partially or wholly, and only by proper co-operation. The organization has been working harmoniously and every member feels that he has received more than his "money's worth" for his dues. During 1918 even greater results will be accomplished, if the plans in contemplation do not go amiss.

Generally speaking, Detroit looks mighty good for 1918. Its industries are staple; war orders for trucks, munitions and shells, running into millions and millions of dollars have already been let, and a number of new million-dollar factories are being erected to handle nothing but war orders. In addition, it is expected to make Detroit the center of the manufacture of airplane motors and parts, and already several big orders in Detroit have been placed by the Government. Detroit business men are all optimistic and really believe that 1918 will be one of the greatest years in the history of the town.

Keenan & Jahn did a nice December business with the Aeolian-Vocalion. It was really their first month with this line. John D. Angell, manager of the new department, says that a great many people have been in "looking" with promises that they would buy later.

Sam Lind, Columbia manager, says he has had a very big year, with more and better dealers than ever before.

Williams, Davis, Brooks & Hinckman Sons, Michigan Pathé jobbers, had more business in 1917 than they thought it possible to secure, and are exceedingly well pleased with their affiliation with Pathé. They have disposed of more machines and records than they originally planned on, and have surprised the factory several times with telegrams for more goods. They now have a big stock and are in excellent condition to fill orders from their dealers.

LOCATED IN NEW QUARTERS

The M. A. Barker Music Co., Popular Bluff, Mo., is now located in new quarters in the Greer Block, that town, where they are featuring Columbia Graphophones, Starr phonographs and other musical goods.

The Browne-Wolf Drug Co., of Healdsburg, Cal., with headquarters on West street, has taken the agency for the Victor talking machine.

WHY-Do You Use Tone Arms

"off the shelf"? You spend time and money freely on the design of a cabinet, why compromise on the tone arm? Why don't you put the same thought into the tone arm? Make it at least as distinctive as the cabinet.

We have experts who are specialists in designing tone arms that will blend with your cabinet in quality and appearance—that will continue quality unbroken from sound chamber connection to stylus groove. These men are ready to serve and prove to you by sketches and figures that "INDIANA" made tone arms will increase the value of your machine and make it a better selling proposition.

Bear in mind that acceptance of this service does not obligate you in any way and anything developed for you is for you exclusively, and is not sold or sampled to your competitors.

OVER 500 VICTOR MEN IN SERVICE

Roll of Honor, Bearing Names of All Those Now in Armed Service of Country, Now Installed in Hall of Administration Building

In paying tribute to the hundreds of their employees who have entered the military service of the country, the Victor Talking Machine Co. has departed from the service flag idea and as a result there now appears in the main hall of the Administration Building a tall mahogany pedestal, surmounted by a silk American flag and bearing, on swinging panels, the names of the Victor employees to the number of over five hundred who have entered the service of Uncle Sam, together with the department in which they had been employed. Surmounting the roll of honor is a plaid card on which appears the following: "In appreciation of the splendid display of loyalty by members of all departments, the directors of the Victor Co. have ordered that this roll of honor, containing the names of the employees who are known to have gone direct from this plant to join the armed forces of the country, be posted and maintained during the period of the war."

ENTERS THE FIELD IN MILWAUKEE

Triumph Phonograph Co., Organized in That City, to Manufacture Machines of New Type

Milwaukee, Wis., January 7.—As the result of years of study of the reproduction of the human voice by mechanical means, Albert C. Ehlmann, a well-known singer and musician, has evolved a new phonograph which will be manufactured and marketed under the name of the "Triumph." Mr. Ehlmann has organized the Triumph Phonograph Co. with a capital stock of $25,000 for this purpose, and with him are associated Julius E. Kiever and Robert A. Kiefer. Offices have recently been opened in this city.

The Triumph Co. has decided for the present to contract for the manufacture of its product. It has made connections with concerns specializing in such work so that the machine will be constructed strictly in accordance with the plans of the designer and under his direct supervision. Mr. Ehlmann has been elected secretary-treasurer and general manager of the new company. Julius E. Kiever is president and Robert A. Kiefer is vice-president. An active selling campaign is now being planned.

GRAND RAPIDS DEALERS TO MEET

Grand Rapids, Mich., January 7.—The annual meeting of the Grand Rapids Retail Music Dealers' Association will be held on January 17. An elaborate program is now being worked out for the occasion. Otto Friedrich, of the Friedrich Music House, and Clayton Hoffman, of the Herrick Piano Co., are in charge of the arrangements.
The Important Part Played by the Talking Machine in Stimulating a Love for Music Forms Subject of Editorial in Munsey's Magazine

In the December issue of Munsey's there was an excellent editorial in which the importance of the talking machine and the player-piano as factors in musical development and appreciation was dwelt upon in a very sympathetic way. These two instruments were estimated as among the most notable inventions of the age, and it was pointed out that the true musical artist neither feels nor affects contempt for the talking machine or the player-piano. In this connection the writer says:

"He (the writer) knows that the roll of perforated paper can sound chords which the fingers of Paderewski cannot compass; that the earliest appreciation of musical timbre and orchestral coloring may be derived from half a dozen black discs.

"In music, as in every other art, the first requisite to the development of a sound and cultivated taste is frequent contact with the work of artists. A person of sufficiently acute mind, hearing music and more music and more music of all kinds, could conceivably end by deducing for himself every principle on which music is based. A person of merely average intelligence who will use it as he listens will, if opportunity to hear music comes often, arrive eventually at a fair understanding of what constitutes good music. More than that, he will have some inkling why it is good, and will appreciate what he hears at somewhat its actual worth.

"The case for vocal music is even stronger. We shall have an unusual lot of it this winter, and the reference is not to concert platforms, but to chorus-singing in the home, in the church, in the camp. The chorus is a community enterprise hitherto undeveloped in America, but less likely to suffer neglect in the future. Interest in choral singing has been powerfully stimulated by the plans of Major-General Franklin Bell and others to make the American soldier a singing soldier because, as General Bell rightly declares, a singing soldier makes a fighting soldier. Choral singing is capable of developing more enthusiasm than any other form of the musical art. It can progress to the heights of Parnassus, and it carries the singer with it.

"The secret does not lie in the artistic knowledge and appreciation acquired, but in the kindling of generous emotions, their liberation or 'motor discharge,' as psychologists would say; above all in the creation of that contagious fellowship and general good-will which are vital to the success of an army and richly profitable to the life of each single human soul."

COLUMBIA MANAGERIAL CHANGES

Geo. W. Hopkins, General Sales Manager of the Columbia Co., has announced the following organization changes:

Geo. W. Hopkins, general sales manager of the Columbia Graphophone Co., New York, has announced the following organization changes:

- R. J. Whelen, manager, Cincinnati branch, resigned.
- F. F. Dawson, of the general sales department, has been appointed manager of the San Francisco branch.
- K. Mills has been appointed assistant manager of the New York branch.
- S. H. Nichols, at his own request, has been appointed manager of the Pittsburgh branch.
- H. A. Verka has been appointed field sales manager, and, as the title indicates, will actively represent the general sales department in the field.

CATALOG OF THOMAS PHONOPARTS

A booklet that should prove of interest to talking machine manufacturers or those who contemplate entering that field is the elaborately designed illustrated catalog of phonoparts issued by the Thomas Mfg. Co., of Dayton, Ohio, recognized as among the largest manufacturers of motors, tone arms, sound boxes and talking machine parts for the trade. The present catalog of the company serves to show various models of the Dayton motor complete and ready for installation, and with the various excellent features clearly indicated.

Facing the pictures of the motors there appear plates showing the various parts disassembled. Each part is fully numbered, and the name of each appears in a list printed underneath the plates.

The second section of the catalog is used to illustrate and describe the various models of tone arm and sound box combinations, with the specifications of each detail carefully set forth. Special attention is given to descriptive matter regarding the Dayton sound boxes. Turntables and other Thomas Co. products also receive attention in the catalog.

Of general interest are excellent views of the exterior and interior of the great Thomas Mfg. Co. plant, illustrating the actual work of making phonograph parts, and two pages given over to a semi-editorial on building business and emphasizing the possibilities of the service idea. The Thomas Mfg. Co. announce that they have now in preparation a new and more elaborate catalog which will be ready for publication in a few weeks.

OVERENTHUSIASM UNWISE

Many advertisements are made misleading, not through any deliberate intention of being dishonest, but because of the overenthusiasm of the advertising man who somehow seems to think that the goods and prices his store has to offer are far better than those of any other store. He feels that each item advertised has to be lauded to the skies, although, as a matter of fact, it is just an ordinary piece of merchandise at a fair price. That is the reason many old established stores prefer to print advertisements with little descriptive matter.

The Wasee Photogaph Co., Salt Lake City, Utah, has changed its name to the Ashworth-O'Loughlin Co.

The Schmelzer Arms Co. recently opened a
completely stocked store in the zone established
just inside the reservation at Camp Funston,
Kansas, which is one of the largest camps
in the country. The space in the zone is leased
to concessioners by the Government and each con-
cessioner must erect his own building, although
all must be of uniform design. In the zone are
to be found three theatres, a billiard and pool
hall, and stores of all sorts, the idea being to
meet the demands of the soldiers without re-
quiring them to leave the reservation and meet
the temptations in the various towns nearby.
The prices in the zone are practically governed
by the general managing, and are in every case
to the advantage of the soldiers. The Schmelzer
Arms Co. building is fifty feet square, and
two stories high, and contains about practically
everything in the sporting goods line from
clothes to fishing tackle. There are also talking
machines and records on hand.

The company has closed the banner year in
its history, due largely to the untiring efforts
of the officers, who are Chas. J. Schmelzer,
president and treasurer; Harvey J. Schmelzer,
vice-president and secretary; Arthur A. Trus-
tler, assistant secretary, and Stanford S. Madden,
assistant treasurer.

ENLARGES ITS BOOTH EQUIPMENT

The Delphone Sales Co., of New York, Aug-
ments Its Conveniences for Dealers

The Delphone Sales Co., 25 Church street,
New York, local distributors for the products
of the Delphone Co., Bay City, Mich., recently
added a number of booths to the equipment of
its New York ware-
rooms in order to
meet the demands of the customers. The
booths are furnished attractively, and
comfortably, the fur-
nishings and decora-
tions being in com-
plete accord with
the musical qualities
of the Delphone and
the success which it
has achieved through-
out the country.

J. D. Manton, head
of the Delphone
Sales Co., is a firm
believer in the value
of attractively decorated warerooms, and his
stores are models in this respect. Well lighted
and ideally arranged, his establishments have
won the enthusiastic approval of all visitors.
The Delphone line is completely "at home" in
New York, and the Delphone Sales Co. is pre-
paring to handle an extensive wholesale business
in this territory during the coming year.

MISS TRUSSLER JOINS NAVY

Miss E. A. Trusler, a member of the Colum-
bia Co.'s advertising department, has been ap-
pointed a yeoman in the U. S. Navy, and on
January 1 assumed her new duties at the
Brooklyn Navy Yard. Miss Trusler leaves for
this patriotic work with the good wishes of all
her associates, with whom she has been very
popular for several years past.

The Attractive Quarters of the Delphone Sales Co.
THE TALKING MACHINE WORLD

FROM OUR CHICAGO HEADQUARTERS

E. P. VAN HARLINGEN, Manager
H. SCOTT KINGWILL, Ass't. Mgr.

January 15, 1918

CHICAGO, ILL., January 16.—What is the use of trying to do a thing yourself when you can get others much more competent to do it for you? The proper thing to do at the present time is to review the talking machine business for the last year and to make a forecast regarding the future. With this idea in mind the Chicago representative of The World asked a number of leading men in the talking machine trade of Chicago to do this very reviewing and prophesying. Of course, this is a very busy time. Inventories are in progress and plans are in the making for the new year. By no means all of the men who were written letters on this subject responded, but those who did accomplished the task to the entire satisfaction of the inquirer, who is very sure that the trade at large will read with great interest these communications. Here they are:

Griffith P. Ellis' Interesting Views

Griffith P. Ellis, sales manager of the Chicago Mfg. Machine Co., in discussing the business situation, said:

“After closing our books with the most successful month of the largest year in our history, I can’t feel anything but pleased over general conditions in the talking machine business for 1917.

“The year was one that brought their alarms to the talking machine industry, just as it did to all others. It was a period of mental readjustment to wartime conditions, with no precedent to guide the trade, as in previous wartime periods the talking machine industry was not of any substantial proportions.

“When war was first declared there was a feeling of anxiety as to the future, but as the first few weeks passed after the declaration of war and retail sales remained about normal, the feeling of confidence returned.

“The two offerings of Liberty Loan Bonds also proved unfettering for perhaps three or four weeks around the period when the strong drive was on; but the bull in business was only temporary and was subsequently offset by increased purchases by the public shortly after the close of the bond selling campaign.

“Had these various economic disturbances been predicted at the start of 1917, it is quite possible it would have had a psychological effect on the campaigns of retailers, and it is quite likely the results would not have been nearly so satisfactory. As nothing of this kind could be guessed at with any degree of accuracy early in the year, the trade naturally laid plans as in previous years and set out with the full determination to surpass 1916—the banner year in the talking machine industry.

“So well formed were these plans that practically without exception retailers were able to meet the emergencies arising out of our entry into the war and pull through with a highly satisfactory year’s business. Most retailers showed a splendid increase over the previous year’s business, and I think I can say that without exception every account on our books showed an increase in record sales.

“Probably the most gratifying feature of the year’s business just closed is the effort that was made by the more aggressive retailers to concentrate their efforts toward the increase of their record sales. Quite a few retailers showed the wisdom of devoting as much as 75 per cent. of their advertising budget to actual advertising appropriation to featuring records.

“Many novel ideas were devised throughout the year, and the result was a very largely increased record business. In fact, this was the general condition with most of our accounts, and I think I am safe in saying that practically 95 per cent. of the accounts on our books showed record increases anywhere from 30 per cent. up to 200 per cent.

“It is a great satisfaction to feel that the retailers have come to a realization of the possibilities of this vitally important and profitable end of their business.

“The wholesaler had burdens to bear in the way of increased corporation income taxes and war taxes on floor stocks of machines and records that were not passed on to the retailer, and which made serious inroads in the net profits of the wholesalers. Our company, for instance, had to pay thousands of dollars in war taxes to cover our floor stocks—not one cent of which was passed on to the retailer or to the public. The Victor Co.’s action in absorbing the entire war tax on records gives splendid and praiseworthy evidence of their willingness to carry, in so far as they were able to do so, the increased burdens brought on us by the war.

“The reports of our traveling representatives indicate there are no stocks in dealers’ stores, and such machines as they are receiving from time to time are going right out immediately to take care of sales already made. The demand seems insatiable and there appears little likelihood that retailers will be able to accumulate any considerable quantity of machines during this year. The goods are sold before they reach the dealer’s floor.

“With twenty billions of dollars being spent by the Government—with labor fully employed at higher wages than ever before—and with savings deposits for 1917 showing an increase of millions and millions of dollars (in spite of all the money that was invested in Liberty Loan Bonds, Red Cross, V. M. C. A. and other wartime contributions) I can’t see anything but a wonderful year ahead of us in 1918.

“I am, first of all, an optimist; but in view of the fact that the Victor Co. have orders for machines and records which will more than take their entire output for months to come, I can’t see anything but hopeful signs for our business; and I believe that even the calamities of the world’s greatest war will not bring about anything but continued good business, limited only by factory production.”

Why Business Will Stand Under Stress

Lester E. Noble, manager wholesale talking machine department of Chicago branch of the Wurlitzer Co., said:

“In going over the talking machine business for the year 1917, the most striking feature to my mind is that the business has proven itself to be one which will stand up under stress, such as has pervaded the country during that period. That fact signifies that the talking machine business is a standard line of endeavor and also signifies that the talking machine itself is a necessity. This latter point is proven by the fact that businesses consisting of the handling of articles that are not necessities have suffered terrifically during the last year, while the talking machine business has not only held its own, but has gone ahead of last year, in demand at least.

“Difficulties that manufacturers have encountered have tended to diminish the normal supply of merchandise, or at least to eliminate or cut down the usual increase in supply, but this fact, while appearing to be a handicap in the face of...”

THE "WADE" FIBRE NEEDLE CUTTER

Is a Consistent Performer

An Athlete or Race Horse is said to be a “consistent performer” when past performances are regularly repeated. This is particularly true of the Wade Fibre Needle Cutter. It is now more than nine years ago that the “plier handle” fibre needle cutter was invented and patented by Samuel O. Wade and at no time since then has it failed in “consistent performance.”

Nothing has yet equaled the simplicity and ease of operation of this plier principle—it gives 18 or 20 new, perfect pointings on the needle in the hands of a child—it is strong and durable and its material and workmanship are guaranteed.

“Consistent performance” is the secret of its large sales.

EVERYTHING KNOWN IN MUSIC

Lyon & Healy
VICTOR DISTRIBUTORS
CHICAGO
increased demand, has proven to be a benefit to the talking machine trade generally. It has proven a very good benefit from the standpoint of credit. The talking machine retailers have taken the instalment and record approval features of their business so much for granted that in many instances this feature of their business, which normally may be very good features, have become detrimental to the business generally through loose manipulation. The shortage of incoming stock has tended generally to make them handle credits more conservatively as regards initial payments and length of terms, and logical limits with regard to approval sales, and in a great many cases which have come to the writer's notice, retailers have discovered that these features were not being properly handled heretofore. Another very good feature, brought about not entirely by the shortage of merchandise, but also by general conditions throughout the country, is that the buying of talking machines is being done more logically by the different classes of people. That is, people are buying talking machines of a price that is within their means, thereby making the business generally more healthy from the financial standpoint than has been the case heretofore.

"From the writer's viewpoint, the prospects for 1918 are very bright. The demand will, without doubt, be normal, and there is strong indication at the present time that the supply will be about normal, and that there will be no radical interruption of manufacture." The Government Should Encourage Business Charles F. Baer, manager Chicago office Columbia Graphophone Co.:

"The year opened with a rush. Business was excellent, showing a substantial increase month by month over the previous year, notwithstanding that war was declared the early part of the year—the flotation of two issues of Liberty Bonds—which money would have under natural circumstances gone into the purchase of talking machines, musical instruments, automobiles, and what not.

"The public had just about survived the first bond issue and business was again commencing to get back into a normal state, when the second bond issue was floated and we are now recovering from that.

"The people and the public speeches of some of our larger men have not been conducive to the proper advancement of business as a whole, for instead of dealing out encouragement, they have dealt out discouragement and yet with all this our business has been better than it was last year.

"There is no question but that the civic morale of our people in this country has bound them, in fact for that respect we are the greatest nation in the world, and with all classes of labor in demand, with money flowing back and forth throughout the entire country, there can be only one answer for the year 1918—and that is: It will be substantially satisfactory from a business point of view."

Lyons & Healy Service

"Advertising is all right if you advertise all right" is the fundamental principle on which the service department of Lyons & Healy are working, and for that reason they are offering to their dealers printed announcements and cuts of every department. In furthering the idea they instruct their numerous dealers as to the proper methods to employ in getting business. Not only is this department offering printed announcements, but they are also giving liberal objection to their advertising service are given cuts to use along with their advertising "copy" that are very original and artistic in every detail. The price of this service is very nominal, and an idea of what this company is offering may be had from the following:

"For Victorla advertising service they submit fifty-two cuts a year, or one each week, and for the Victrola half service twenty-six cuts a year or one cut every second week. For feature records they have replaced the old style envelopes for mailing supplements and have gotten out a very interesting Victor folder for the dealer to send to his customers. Records are also popularized by Victor display cards which are gotten up under the personal supervision of a highly trained and specialized advertising manager. The advantage of this jurisdiction not only a large and highly competent force of copy writers, but also a staff of commercial artists, whose work is considered as being among the best in the city. The drawings that these artists turn out have all the simplicity of composition and line at their command that it is possible for artists to have. The figures used in these cuts, whether they be of line drawing, crayon or color, contain the necessary action and proportion that is necessary to make a drawing that will pass the eye of the most critical observer. Feature advertising is also handled by this service department and is offered to the dealers who represent the Lyons & Healy line of pianos. Circulars and prices are furnished upon application and a good idea of the draftsmanship that is rendered by the art department may be seen on the full-page advertisement of Lyons & Healy in this issue."

C. L. Davidson Recuperating

C. L. Davidson, president of the Talking Machine Shop, was mentioned in the columns of The World last month as being notified to the hospital suffering with an attack of appendicitis and gall-stones, has improved very favorably since his operation and is now resting up at his home in Park Ridge.

Returned From New York Convention

Chas. F. Baer, general manager of the Chicago branch of the Columbia Graphophone Co., reports that he has just returned from New York, where he attended the annual convention held by that company on January 1, 2 and 3. They had three days and one night of solid session of interest, and he says that he has brought back valuable information pertaining to plans and propaganda for the sales for 1918 were discussed. The information gained by Mr. Baer was conveyed by him to his sales force at a banquet, which was held at the Palmer House, Chicago, on Monday of this week. There was a very interesting and enthusiastic meeting held after the banquet during which Mr. Baer conveyed the information he had obtained at the convention in New York. Every man in the sales force went away with a determination that he would "go over the top" in 1918.

G. I. Stanton Improving

G. I. Stanton, advertising manager of the Columbia Graphophone Co., has for the past two weeks been confined to the German Deaconess Hospital, where he is suffering with an attack of bladder trouble. Whether an operation is imminent is uncertain at this time, but it is thought by the physicians in charge that this will not be necessary as he has been improving greatly within the past few days.

Not Books, Why Music?

"Our business has stood the shock of diving into war with remarkable steadfastness, in spite of a great shrinkage in the market value of nearly all the gilt-edge securities, and in the face of a propaganda of retrenchment apparently backing by the Government the public does not see fit to lay aside the music of the phonograph," said C. E. Goodwin, manager of the Phonograph отделение.

"I quote a paragraph from a letter from Mr. Maxwell, vice-president of Thomas A. Edison, Inc., for the benefit of those in the trade who may not be aware of it—they have not brought to the public's conscience about keeping this trade in the front right now. When there is so much strife and suffering in the world. Mr. Maxwell says: 'When you meet a man or woman who thinks a phonograph is an extravagance ask that man or woman if good books are an extravagance. There is scarcely anyone who would dare say that books are an extravagance. Yet books have limitations that music does not have. Music, next to religion, is the world's greatest solace. Don't be afraid to stick up for music.'"

Sales Increased 100 Per Cent.

Messrs. Schif, who control the destinies of the Vitavola Talking Machine Co., state that the sales of 1917 showed an increase of 100 per cent. over those of 1916. This is due in a large measure, no doubt, to the attractive new models that they have recently adopted. Vitavolos are good machines and well built; so are the Schiffs, or they could not have accomplished what they have accomplished.

Made Life of Boys More Happy

The Armstrong Drug Co., Pharmaceutical Ills, recently opened a new Brunswick Shop. Dave C. Miller, manager of the new store, with the assistance of E. S. Bristol, special representative of the talking machine department of the Brunswick-Balke-Collender Co., formerly opened the affair, and nightly concerts were held for a week and were attended by great numbers of the public. One of the most interesting happenings of the event was made possible through the courtesy of D. T. Trumbo, assistant super.

(Continued on page 91)
Prompt Deliveries
— as wanted
— when wanted

(The second of a series of advertisements giving reasons why you should sell The Brunswick.)

With direct factory branches in the 36 leading trade centers, we are always in a position to make prompt deliveries to meet your requirements. This means your order will be shipped when you want it, as you want it. Disappointments are avoided. Our manufacturing conditions are such that we are able at all times to supply all models in all finishes promptly.

This enables the dealer in small towns and remote places to have the same advantages as the dealers in the large cities. A service enabling them to be in a position to make almost immediate delivery of any model listed. An advantage that means much in these days of close competition.

The Brunswick Proposition tells in detail, the other advantages of an affiliation with The House of Brunswick. It points the way to more and bigger profits. It also describes the many points of Brunswick superiority and exclusive selling features. Write or wire for this proposition. There is still some open territory.

Canadian Distributors
Musical Merchandise Sales Co., Excelier Life Building, Toronto
intendant of the Pontiac Reformatory, who gave permission for Mr. Bristol to give a benefit concert for the boys of the institution. Mr. Bristol took one of the large-sized Brunswick machines over to the cell house on Sunday evening and played numerous Pathe records on the machine. The cells of the institution are arranged in five tiers in rows about 320 feet long. There are four of these blocks of cells altogether, each separated by a fire wall, and it was, therefore, necessary for Mr. Bristol to give four individual performances in order that all the boys of the institution could hear the music. Mr. Trombo, the assistant superintendent, was very pleased over the success of the affair and said that that was the first time anything of this kind had ever been attempted in the institution and stated that any time a talking machine man came to town he would be more than pleased to have him give a concert for the boys. On Monday, the day after the concert, Mr. Bristol, the Brunswick representative, paid a visit to the institution’s work shops and with the permission of Mr. Trombo interviewed many of the boys regarding what they thought of the idea. All interviewed showed their appreciation of the event and hoped that Mr. Bristol would return soon and give them another concert. There is in this institution a band composed of the boys, which frequently gives concerts, but this idea was new to them, and the McCormack records, patriotic songs, band pieces and cornet solos that were rendered on the machine were something that they do not hear often, and they were, therefore, very enthusiastic to have Mr. Bristol play for them again.

He Went Broke

The Chicago Talking Machine Co. recently received a letter containing a check and the following information: "The paying teller at the First National Bank of Chicago refuses to honor this check. Therefore, I am returning it to you asking that you straighten out this matter, as the above bank informs me that they no longer carry this checking account." The check in question caused a great deal of wonderment as to what kind of a fellow it was who could hold on to a dollar, the amount the check called for, for such a long time, as it was dated February 24, 1899! One of the officials of the company remarked: "It certainly took a long time for that gink to go broke, but Sherman was right, this war sure is -------.

Some Record on Deliveries

In order to help make Christmas deliveries on time both A. E. Stoll, manager of the Brunswick Shop, and C. V. Yates, of the sales department, came down to the ware rooms the Sunday before Christmas and each donned a pair of overalls and worked all days as "Hikers" on one of the delivery trucks. This was necessary, owing to the fact that there was a shortage of delivery men and over seventy-nine machines were promised for delivery that day. Five auto trucks were employed to take care of the work, but only eight helpers showed up instead of ten.

"Two Aces Change Places"

C. L. Egner and W. F. Fries, both travelers for the Victor Co., have recently been changed from their old territories and new districts have been allocated to them. Mr. Egner formerly traveled throughout the State of Missouri, but is now transferred to the territory embracing Illinois and Wisconsin. Mr. Fries formerly looked after the company’s interests through Michigan, but will now look after the Iowa territory.

Record-Lite Attachment Popular

"Music in the Home," by Anna Shaw Faulkner, author of the popular work entitled, "What We Hear in Music," is now on sale at the Edison Shop and has created quite a demand and is receiving much favorable comment. The accessory department has also been having quite a demand for the "Record-Lite" attachment for phonographs for the past month. The demand for these lights has increased to such an extent that it has become necessary to lay in a larger stock than was the custom heretofore.

Hold Educational Convention

Mrs. Frances E. Clark, head of the educational department of the Victor Co., with headquarters at Camden, N. J., presided at an educational convention which was held in the Congress Hotel on January 2, 3 and 4. Fourteen traveling representatives of the Victor Co.’s educational department attended and various means and methods applicable to this department were discussed.

The Six Best Sellers

The six best sellers in the Victor library for the month are: "Somewhere in France Is the Lily," and on the reverse side "My Sweetheart Is Somewhere in France"; "Missouri Waltz"; "Danny Boy" (vocal selection by Schumann-Heink); "I’d Love to Be a Sailor" (a new Lauder selection); "There’s a Green Hill Out in Flanders," and reversed, "Say a Prayer for the Boys Over There"; "The Rainbow of Love." The six best Columbia sellers for the past month are: "Over There," and on the reverse side "I May Be Gone for a Long, Long Time"; "From Me to Mandy Lee," reversed, "All Round Round With the Mason Dixon Line"; "Send Me Away With a Smile," and reversed side "My Sweetheart Is Somewhere in France"; "Life in a Trench on Belgium" (parts one and two) "Poet and Peasant" (parts one and two, overture); "Livery Stable Blues," fox-trot, and reversed "That Jazz Band." The six best Edison sellers for the past month are: "Battle Hymn of the Republic" (old plantation melody) "Explanatory Talk for La fatal pietra" (The Fatal Stone); "Aida," and reversed "La Fatal Pietra"; "Awakening of Spring" and "Piroette"; "New York Blues," and reversed "Saxophone Solos"; "Ellis March," and reversed "One, Two, Three, Four Medley Waltz," "It’s Nice to Get Up in the Morning." New Hiawatha Line

The Ottawa Phonograph Co. recently presented to the trade their new Hiawatha phonograph, which they feel marks the attainment of an ideal, being the result of a definite intention to produce a musical instrument that will in- cidentally be accepted as a standard of per- fection. The new machine is an expression of quality and refinement in every detail and is de- signed a masterpiece in mechanical perfection. The design is neat and the dignified lines lend grace and charm to the beautiful furnishings. A feature of this machine is that the modifier is built in and is a part of the machine and not an attachment. The machine plays all records with the same attachment. At present they are offering six cabinet machines ranging in price from $50 to $100 and one table machine which comes in mahogany and oak, high polish or dull finish. They are equipped with double springs, powerful and silent motors, automatic stops, tone modifier, speed regulator, etc. The new factory at Ottawa, Ill., has splendid railroad facilities, being situated directly on the side of the Rock Island Railroad. This factory is equipped with modern machinery and is oper- ated by skilled workmen under the supervision of the Rock Island Railroad. This plant is up-to-date in every par- ticular, operating its own power plant: season- ing rooms, which guarantees against warping, and this wood after getting out of the season room is guaranteed to pass a most rigid inspection. The capacity is 300 machines a day, thereby enabling the company to render prompt and ef- ficient service.

Empire Talking Machine Co. Improvements

The Empire Talking Machine Co. report that they have had an exceptionally good start for the new year, and that the business of 1917 succeeded the biggest year in the history of that company. Not only does this apply to talking machines but also to records, and from present indications January will be a very good month. This company has just issued a sixty-four-page record catalog which includes their January and February supplements. This catalog contains sixteen more pages than any they have issued previously and is very beautifully illustrated. Many new articles have been added to the Em- pire list and the new records just being issued by that company are far superior to any they have previously put on the market. The sur- face noise has been eliminated to a minimum and in some records it is absolutely undetect- able. The Empire machine has been steadily proving its worth and is receiving favorable comment throughout the trade. The new motor this company is installing in its machine is guaranteed to play five twelve-inch records with one winding and the style and finish of the cabinet is very beautiful. This company is now in splendid shape to take care of their dealers' needs and has added several expert and experi- enced shipping clerks to its already large ship- ping department, which in itself is an assurance that the dealers' needs will be taken care of immediately.

Wade & Wade Cutters

About nine years ago, when the late Samuel O. Wade introduced his "Ist needle cutter" on the market, there was much speculation as to whether it would prove successful or not. A great many maintained that it was a very simple contrivance, but that, being operated on the "plier" principle the same as a plier used by an electrical worker, that there could, therefore, be no precision made in the cut as there was bound to be a certain kind of spring to the jaws when the tension was put on the handle. Nevertheless Mr. Wade "nursed his invention" and kept plugging away with the dog determination for which he was characteristic and shortly be- fore his death a few months ago put upon the market the cutter that worked on the "plier" principle, an instrument that was perfect in every detail. It is said by many in the trade that nothing as yet has equaled the simplicity and ease of operation of this "plier" principle. The little workshop in which the present Wade & Wade (lor) needle cutter was founded has grown in the nine years it has been in existence to wonderful proportions and this institution has now attained a point where it can turn out thousands and thousands of these "pliers" in a year. The material of which these "pliers" are made is strong and durable and the workman- ship is positively guaranteed. Each cutter is also guaranteed to be foolproof and constant in operation.

New Repair Company

After careful investigation as to the wants of the dealers in the trade, E. O. Chapman and J. J. Elward discovered that dealers in the phonograph business in general were without proper repair service and for that reason they put their heads together and inaugurated the Mid-West Phonograph Repair Co. They are prepared to handle all kinds of repair business.

in general and are lining up numerous dealers whose business is not large enough to have a repair department of their own. Both of these gentlemen have been in the motor manufacturing business for a number of years and are thoroughly experienced along this line, thereby being able to guarantee absolute satisfaction.

Salter Holiday Outfit
The Salter “trade winning holiday outfits” which were especially put out in combination with the regular Salter line to take care of the holiday trade were in far greater demand during the holiday season than had been anticipated. These cabinets were made to harmonize with the portable models of standard machines and enabled the dealer to offer to his trade outfits which served to land customers who would otherwise escape. A feature of these particular Salter cabinets was the felt-lined compartments of which this company were the originators. Each record has an individual compartment for itself and is thus protected from scratch- ing, breakage and dust, and is instantly accessible. The many Salter dealers in order to insure delivery in time for the spring trade are placing their orders now. They are doing this as a precautionary means, as from present indications there will, no doubt, be more business done in the next few months than ever before.

Personal and Visitors

The Monarch Talking Machine Co., Inc., Philadelphia, Pa., has increased its capital stock from $5,000 to $100,000.

NEW DEVICE FOR FILING RECORDS
Interesting Details Bearing Upon Latest Device Placed on the Market by the Automatic Container Co., of Chicago

Chicago, Ill., January 16.—Manufacturers, as well as dealers, will be interested in the new device for filing talking machine records, which is being marketed by the Automatic Container Co. 301-303 Tacoma building, this city. Their full page “ad” appears in this issue, featuring the Automatic Container, a new line of individual filing cabinets in which dealers will be especially interested. Manufacturers, however, will be particularly interested in the “Automatic” filing device as applied to the standard talking machine cabinet. The cut accompanying this article illustrates the practicality of the new automatic container built into a standard cabinet.

This “automatic” record container, which is a patented article, is beyond a doubt one of the most attractive devices for record filing which have yet appeared on the market. When the containers are filled to their capacity, the cabinet contains a solid mass of records separated by thin guides, only. The space usually taken up by shelves, racks, partitions and albums is eliminated. Maximum filing capacity is therefore afforded; actually from 50 per cent. to 100 per cent. more records can be filed in a given space than by albums, racks, or other device.

When the container is drawn from its place in the cabinet, the weight of the records automatically throws the side rods of the container outward, thus giving the necessary expansion and making each record immediately accessible. The opened file-pocket remains open until the record has been returned to its proper place. The simplicity and convenience of this device should appeal to manufacturers and dealers.

The Automatic Container Co., marketing this device, is a new corporation which has pur-

CHARLES J. WOODARD
Room 503 Calh. Bldg., ST. E. Jackson Blvd., CHICAGO
THE PAST, PRESENT AND FUTURE

Discussed by L. C. Wiswell, Manager of the Vic-

tor Dept. of Lyon & Healy, for The World

CHICAGO, ILL., January 11.—L. C. Wiswell, man-

ger of the Victor department of the house of

Lyon & Healy, when interviewed by a repre-

sentative of The World this month, said:

"The retail trade in general during the past

year was very fortunate indeed and did a bigger

business than they had ever dreamed of or dared

anticipate. The one factor that kept the trade
down and which exerted a major influence in

keeping it from reaching greater proportion was

the shortage of machines as is well known. This

shortage did not apply to one particular line

only, but existed in all the well known makes, which

was very unfortunate indeed. With the records, however, the situation that

prevailed throughout the year was exceptionally

favorable and during the holiday season the deal-

fers in general went "over the top" for once

in their life anyway.

"I have talked with the heads of various other

houses and have been assured by them that the

situation was absolutely satisfactory in every
detail with the possible exception of the afore-
said shortage of machines. The year of 1918

is bound to be an excellent one and can only

be measured by the amount of energy and pep

that the dealers exert. There has, within the past

few months, been a great number of new ma-

chines placed in homes. It therefore naturally

remains that the record departments will ben-

efit greatly by this. The pace set by various

wholesale dealers and jobbers in the trade dur-

ing the latter part of the year was amazing.

Some said it was only a sort of thing that they

were merely trying to unload for the holiday

season. This, however, has proved untrue as

to these very same wholesalers and jobbers are

today working just as hard as they were before

the holiday season began and are shipping in as

great quantities as they did during the holiday
season and the tendency is, as may be judged

from the way orders are coming in, that they

will keep right at it indefinitely.

"Another thing that is worthy of mention is

the amount and quality of publicity that was

given to the various makes of machines in the

local papers for the past few months. These

newspapers have been commenting upon this

fact themselves. Never in their history have

they had a like amount of space devoted in their

papers to talking machines and the art work

contained in some of these advertisements are

really masterpieces in themselves. This

condition still prevails in the papers, and for

that reason I base my opinion that this young new

venture will go down in the history before the

new one comes along as being the greatest ever

known in the talking machine trade."

A CHANGE IN CHICAGO

CHICAGO, ILL., January 11.—The Hallet & Davis

Piano Co., of Boston, discontinued on January 1

their Pathé jobbing agency in this city, which

was located in the Shops Building on Wabash

avenue. This does not mean that the Hallet &

Davis Co. are going out of Pathé distribution

by any manner of means. It simply means that

they are going to cultivate more thoroughly than

ever before the New England and Eastern

States. Hallet & Davis have transferred their

accounts in this territory to the Fuller-Morrison

Co., the great wholesale drug house which has

recently taken on Pathé distribution in this ter-

ritory. B. O. Ainsley, who is manager of the

Hallet & Davis talking machine branch here,

will go East about the middle of January. J.

C. Tidmarsh, who has been associated with him,

is now traveling for the Fuller-Morrison Co.,

and helping in getting the Pathé department or-

ganized and in good running order.

The Fuller-Morrison Co. is the largest estab-

lishment of its kind in the world and keeps a

force of over fifty salesmen on the road con-

stantly. M. P. Mears, sales manager of the

company, says that they have the situation well

in hand at present, and that this section of the

country will be covered thoroughly is assured.

LET THE PUBLIC KNOW

The Chicago Talking Machine Co. have pre-

pared and are sending out to their dealers a

very handsomely illustrated Victor window card

featuring the "Missouri Waltz" and "Kiss Me

Again Waltz." This card is mounted on very

heavy material and portrays in the foreground a
couple waltzing and also an illustration of a

large Victor cabinet machine. In the back-
ground are several more couples, the interior of

a ballroom being suggested. This display is a

beautifully colored hand-lithographed window

sign 22-inch by 26-inch and was prepared espe-
cially to increase the sales of Victor dealers.

ADD TO CHICAGO MOTROLA OFFICES

Ernest Horcher is now in charge of the ser-

vice department of the Chicago offices of the

Jones Motrola Co. Mr. Horcher was formerly

connected with the New York branch of this

company, but came on to Chicago last week.

Robert E. Rae, sales manager, and Harry E.

Merrian, electrical expert, both of the same com-

pany, with headquarters in New York, spent the

last week visiting Manager Hey, of the Chicago

office of the company, and attending to details.

ANGELUS TRADE-MARK INJUNCTION

Judge Manton in the Federal Court last week

granted a temporary injunction to the Wilcox

& White Co., manufacturers of the Angelus

piano players, against Frank J. Leiser, doing

business as the Angelus Phonograph Co. In-

fringement of trade-mark and unfair competi-

tion was charged.

The Standard of Perfection

HAITANNA

FINISHES

Walnut and mahogany, in the dull or high

polish. Oak in high polish or finished. Every cabinet built in a thor-

ough manner. Hainawa construction is guaranteed to last indefinitely, not

merely glued together but dove-tailed.

TONE CHAMBER

Made of genuine spruce, is known as the straight way type, extending from

the mouth of the tone arm, with no obstructions to break the sound waves.

The use of spruce wood in the Tone Chamber has the same effect in repro-

ducing the tone as it has in all high priced violins.

TONE MODIFIER

(Battery applied for)

Built in on top of motor board as part of the machine, not an attach-

ment, modifying the tone to suit every taste.

Capacity 300 Machines per Day

CABINETS

Made of five ply stock of genuine Venner, given five coats of finish and each cabinet hand rubbed which gives to Hainawa cabinets the wonderful polish such as is found only in the most expensive furnishing goods.

PLAYS ALL RECORDS

Your selections are not limited to records of any single make, as the Hainawa plays all makes of records with the same attachment.

OTTAWA PIANOPHONE COMPANY

"ALL ORDERS F. O. B. FACTORY"
UNISET REPRODUCER INTRODUCED

This New Reproducer Is Said to Be an Absolute Departure From Other Sound Boxes on the Market—Will Play All Kinds of Records—The Men Behind the Company

CHICAGO, Ill., January 10.—The Uniset Reproducer Co., Cable building, this city, which has just incorporated, is putting a new reproducer on the market, which, many term one of the greatest inventions that have appeared in the talking machine field for many years.

This reproducer is an absolute departure from all existing sound boxes which are manufactured on the market. It will play all records, of no matter which make or description, such as the Victor, Columbia, Edison, Pathé and Grammaphone records, etc., in one and the same position, without any change of any kind.

We understand that this reproducer can easily be slipped on all the tone arms of the standard made machines, and once it is put on, it will remain in one and the same position, reproducing the different records equally well. In consequence the possibilities of this Uniset Reproducer are tremendous.

Manufacturers and assemblers of phonographs will be able in the future to employ a perfectly straight tone arm and thus do away with all the disadvantages which are common to tone arms that have joints, bends and kinks, which very often work loose, rattle and create other unpleasant noises when playing the records. Another vast field for the Uniset Reproducer is amongst jobbers, dealers and the individual owners of machines.

There is no question but that the average talking machine owner does not care to be confined to one particular make of records; there are many beautiful records and titles in other catalogs which he may not be able to enjoy, but his sound box will not reproduce such records.

Although, of course, there are arrangements in the market that make it possible to play different makes of records on a phonograph, it is reasonable to assume that the Uniset Reproducer will receive special consideration, as it is simplicity in itself, and as it is not necessary to change the position, which means more or less trouble, to the user of the phonograph. The Uniset sound box will sell at $5.00, n. p. retail; $6.00 for the Edison machines, and the gold plated sound boxes will possibly be $10.00 more. We understand that the Uniset Reproducer will be ready for delivery about the first week of February, and orders are now being accepted.

The president of the Uniset Reproducer Co. is James B. Orth, prominent business man of Chicago. W. Hadert, the vice-president and general manager, is a man of twenty-two years’ experience in talking machine trade. He knows all branches from factory and recording to selling.

He has traveled for important concerns all over the world and is by virtue of all this experience well equipped for managing a concern of this kind and for marketing the product in a most efficient manner. Joseph Jutter, secretary and treasurer, is a gentleman of wide experience in the business field, a man with a personality and is to be considered as a distinct acquisition to the company. The board of directors is constituted of the above, together with Richard Bauer, of the well-known Chicago piano manufacturing house of Julius Bauer & Co., and Wm. Meissner, the inventor of the Uniset reproducer.

SPECIALIZES IN PLATING

Joseph Musante, electro-plater and silvermith, 168 Centre street, New York, has recently entered the trade, specializing in the plating of phonograph parts. His special process of finishing in gold which prevents turning black has already strongly appealed to a number of houses in the trade. The other finishes used are silver, nickel and antique.

It ain’t the individual nor the city as a whole, but the everlastin’ team work of every bloon’in’—Adapted from Kipling.

FRENCH RECORD POSTER

The Victor Talking Machine Co. has just issued a large three-color poster featuring its series of French language records. There are three records in this series, the records containing those French words that will be found of greatest use to the American who finds himself "somewhere in France," and the French words and their English equivalents can be learned more readily through the medium of a talking machine than through almost any other way. The poster itself represents an American soldier talking to a French soldier and a pretty little peasant girl. The poster is not only artistic in every sense, but should prove a valuable aid towards popularizing this very practical series of records issued by the Victor Co.

No use talking, the individual who makes a habit of looking efficient is cultivating the habit of being efficient.

RED CROSS QUILT BRINGS $700

Embroidered With Names of President Wilson and Thos. A. Edison and Is Auctioned Off

One might think that a quilt which would bring $700 would be embroidered in gold, but such was not the case with the Red Cross quilt auctioned off December 29 at the Edison Laboratories at Orange, N. J. This particular quilt had embroidered on it the names of President Wilson and Thomas A. Edison, both being contributors. The quilt consisted of many small squares with red crosses in each, the name of the contributor being embroidered in each square around the cross. The quilt was made by Mrs. A. Q. Almquist, of West Orange. After much spirited bidding the quilt went for $700, which goes to the West Orange Community Unit of the Orange Chapter of the Red Cross.

If at times you find embarrassment in meeting customers, make it a point to study the manners and methods of successful people and see how they meet strangers.

Stewart Single Spring Motor

Rigid cast frame. Simple design. Hobbled gears. Powerful and silent. Plays one 12" or two 10" records. Furnished with side or top speed regulator control.

We are furnishing this remarkable Stewart Motor to some of the large phonograph manufacturers. It will pay you to get our prices.

Our large plant, equipped with special machinery for economical production in large quantities, places us in a position to offer phonograph manufacturers parts of quality at exceedingly attractive figures.

It will pay you to use Stewart parts. Our facilities enable us to handle large orders promptly. Write for detailed information and prices.

AN OPPORTUNITY

to secure a TALKING MACHINE at a very low cost

We have left over from a large contract a number of cabinets, all of which we have equipped with mechanisms, making a complete Talking Machine, as illustrated.

While they last, we offer them at $6.50 each, net cash, F.O.B. our factory.

Orders for less than five machines will not be accepted.

Specifications

Oak or Mahogany Cabinet, 15 in. wide, 17 in. deep, 8 in. high. Nickel-plated Tone Arm and Soundbox. Single Spring Motor, 10 in. Turntable.

THE GEORGE A. LONG CABINET COMPANY
HANOVER, PA.
WAREROOMS THAT ARE "DIFFERENT"

New Establishment of the Silverstone Music Co., the Center of Interest During the Holiday Season—Initial Recital Held— Formal Opening Will Occur Some Time This Month

St. Louis, Mo., January 4.—The new warerooms of the Silverstone Music Co., Edison jobber, which will be formally opened at a date this month as yet unset, are different from any other in this city, and Mr. Silverstone says that he has carried out many ideas that are entirely original with him.

The first floor fixtures, which consist of a recital hall and three demonstration rooms, are built entirely of quartered oak, finished in what is known as "silvered" oak. The entire floor side-walls are paneled in oak. The windows and doors have the small, long glass, the effect in the recital hall being that of a small-chapel.

The recital hall kits are carried out with specially made lighting fixtures, small busts of musicians and specially designed and stained desks and chairs. The recital hall, although smaller than the old one, seats more because of a different adjustment of the space. On the blank wall side of the recital hall a door was put in to relieve the effect there. It is a real door with open panels and back of it to lend space idea is a working glass.

The third floor is the machine sales floor, and as the customer steps into a small hallway, for all the world like the hallway in an old-fashioned house, he finds in front of him a room that duplicates a formal parlor, slightly stilt in furnishings, and in front of him a phonograph. The salesman sees the customer seated and asks to be excused to get some records. In an alcove, well curtained off, he starts another machine.

So entirely unexpectedly the prospect hears a machine play. In some instances this has been taken for real music and in all trials the effect has been good.

This entire floor is finished with ceiling-high partitions and the various rooms are decorated and furnished as the different rooms of a flat. The effect is very good.

The second floor, finished in white and gold, is a record sales floor. It is frankly a business floor with everything for the convenience and comfort of the customer, with no space wasted.

The warerooms include two shops, one for the mechanical parts and another for the wood-working department. There are storage floors, a large shipping room. Mr. Silverstone has a private office on the second floor and the cashier’s force and the sales offices are on a balcony over the shipping department.

The initial recital in the warerooms, which the Silverstone Co. occupied before the Christmas rush, was by Marie Alcock, who came here to sing solo parts with the Pageant Choral Club in the "Messiah." The affair was entirely informal but very successful.

The best test of the new Edison quarters was during the holiday trade when, with the second floor not yet finished, the largest retail trade of any similar period was handled without serious trouble. It is true that the recital hall was used for record demonstrations, and that the area way on the first floor was used, but everybody was waited on.

TRADE PERIL IN ENGLISH BILL

Proposed Law Would Remove From Register Trademark Used as Name of Article

A dispatch from London states that representatives of American manufacturers in England are much alarmed over a bill pending in Parliament providing that if the proprietor of a word or trademark so uses his mark as to lead the public to regard it as the name of an article it shall be removed from the register of trademarks. If the bill is passed many American articles which have become popularized through name trademarks will probably be imitated under the same name and Americans will have no redress, thus entailing untold loss to them financially if not the ruin of their business in England.

Americans here say that cargo space for England is now so restricted that the trade in many articles has already become greatly affected, and that if the bill becomes a law importers may be successful in getting control of all the business before the cargo space is increased and normal conditions are resumed between the United States and England commercially.

The attention of the American Consul-General, Robert F. Skinner, has been called to the seriousness of the situation and if the representation of American representatives and officials here are unavailing, Washington will probably be asked to intercede with the British Government for the removal of certain objectionable features of the bill.

EXPANSION WITH OGDEN CO.

The sectional record cabinet and sales system manufactured by J. B. Ogden, of the Ogden Sectional Cabinet Co., Lynchburg, Va., continues to grow in popularity throughout the country. Since moving to the new factory they are much better equipped to supply the needs of the trade, and this business promises to be a very important one during 1918.

DEMAND FOR MELOPHONE LINE

Advance Orders for the Products of This Company Indicate Continued Prosperity for 1918

Henry Sobel, president of the Melophone Talking Machine Co., in a recent statement to a representative of The World, stated that the new dealers handling the company’s line of machines are steadily increasing. He says the outlook for the present year is exceptionally bright, as the number of advance orders for shipments for the first few months of the year has been quite heavy. While the Melophone Co. have been featuring their expensive machines during the past few months, the demand for the popular-priced machines has by no means been small, all of which made the year 1917 one of great prosperity for the company.

"BUBBLE BOOKS" POPULAR

Chicago, Ill., January 11.—The local branch of the Columbia Graphophone Co. has recently received an exceptionally large stock of "Bubble Books." This was made necessary owing to the great demand which has sprung up for these books within the past few weeks. The book is devoted exclusively to childhood songs and stories, such as "Tom the Piper’s Son," "Mary Had a Little Lamb," etc. It was illustrated by Rhoda Chase and is gotten out by the Columbia Graphophone Co. in conjunction with Harper & Bros., publishers. The book contains a printed text of these little childhood songs and stories on the front of all the records of an envelope, each envelope containing a six-inch Columbia record. When the record is put on the machine and is started off one may read the words that are being sung or spoken on the pages, and on the opposite page is a picture illustrating the song or story. The book has a hard cover and is printed in four colors. It contains three records and retails at $1 per book.

ANENT EXPORTS TO LATIN-AMERICA

Since the war began American exports to Latin-America have increased 100 per cent. in value, while those of Germany have disappeared entirely, declares the American Exporter, New York, in its current issue. In 1913 we shipped to Latin-America merchandise values at $333,775,885. In 1917 we shipped merchandise to the same market valued at $650,000,000. Our exports to-day to Latin-America actually exceed in value Germany’s annual exports before the war to the combined markets of Canada, the United States, Mexico, the West Indies, Central and South America, plus those to Russia.

These instruments are made of genuine mahogany of exquisite workmanship and design, and compare favorably with the most expensive standard machines now upon the market. They are unapproachable in their priced class anywhere.

The prices of all standard makes of Phonographs have been increased. We have determined to keep ours the same until after the Holiday Season. Write us for our agency proposition TODAY.

No. 100
Our factory makes Simple in design; priced within reach of all. Yet articles enough for the most discriminating.

THE TALKING MACHINE WORLD

WHY MUSICAL INSTRUMENTS ARE ABSOLUTELY ESSENTIAL

Will Payne Handles This Subject in a Masterly Way in the Current Issue of the Saturday Evening Post—Believes in Winning the War Without Destroying Industry

As has been said before, some of those in authority in Washington and other parts of the country, and the general public at large, will continue to believe that the vast and highly organized manufacturing instruments are absolutely essential by the emphasis that has been laid upon that fact by manufac-
turers and dealers in musical instruments or by trade journals. The really cynical among you have not heard the report about the Washington parade. You have been deceived by the false publicity of the radio war. No argument must come from those on the outside, and with no mercenary interests in the music in-
dustry.

I pass particularly gratifying, therefore, to note the manner in which Will Payne, the noted writer, in an exceptionally able article on "Business That Isn't Necessary," in the Saturday Evening Post, upholds the whole importance of music and of the making and selling of musical instruments from the practical, rather than the theoretical, standpoint. Mr. Payne emphasizes the great economic danger that lies in shutting down any industry no matter how non-essential it may appear, suddenly and without warning, and how it is absolutely necessary to provide for the resumption of all industry on a basis as near normal as possible immediately upon the declaration of peace. His conclusions are under-
standable and sensible.

"Shutting down the factory is quite simple," he says. "All you need do is lock the door and walk away. Anybody can do that. But start-
ing it up again again is a long, long story. Repairing the deterioration, assembling the ma-
terials and labor force, and so on, is much more difficult. It isn't merely the factory. There's no use starting up a factory unless you have an outlet for its product. These particular fac-
tories have an elaborately organized outlet cov-
ering the entire country—their agents and deal-
ers in every considerable town. Even if the youngest of them, those agents and dealers were doing something else before they went into the business, they have put their skill and energy and capital into that. If the business had been shut down a good many of them would be broke; most of them would be out of a job. Mainly they would, of course, begin seeking something else to do. The whole extensive organization of the business would begin to fall apart and vanish. No scratch of the pen could build it up again out of hand."

He touches right on the music trade when he says:

"The music shop on the corner looks non-es-
sential enough; nothing in it that you can eat, wear, throw at an enemy or raise the winter temperature with for more than a few minutes. It represents also consumption of materials and labor. If you look over the materials you will find they consist largely of expensive woods that are of very little utility except for an orna-
mental purpose. So far as waging war or down-to-brass-tacks subsistence is concerned the lumber used in building a small reviewing stand from which the mayor inspects a parade would be worth many times all the wood in the shop. Aside from wood, there is perhaps a hundred pounds of wire. But all the material in the shop, for war or hardpan subsistence, would hardly be worth carrying away."

"And if you sorted out all the labor you would probably find that much of it was not very useful for military purposes or hardpan subsistence. It is largely labor that is especial-
ly skilled and valuable for that particular kind of work."

"Nowhere has the war strain been more se-
vere than in France; but the luxury shops of Paris have by no means been cut out. Many of them are open and doing business as usual. They are woven into the business fabric of the country. To cut them out would start a ravel-
ing that would probably weaken the business fabric ever so much in peace purposes. They produce war taxes and bond subscriptions. A good many people subsist by them. True, it is not

imponderable things which keep men in a high, resolute state of mind. To that crucial end music contributes as well as canned beef."

Then, again, says the writer:

"Cutting out is simple enough, but building up is another matter. The vital thing in any business is its organization—the human associa-
tions by which it is carried on. Shut it down and the organization immediately begins to dis-
integrate. Building it up again takes time and effort. No business organization whatever should be destroyed. Cut down where neces-
sary but never cut out. Prune but leave roots and trunk.

"Say it is a talking machine business. If there is war work—time cases, small shells, uni-
form buttons, or what else—that it can do to advantage, turn some of its capacity over to that—gradually so as not to disorganize the factory—and preserve the business organization.

We want it now to pay taxes and buy Liberty Bonds. Sure as sure can be we shall decidedly want it to help take up the slack when war production ceases and the millions of hands now engaged therein must turn to other employ-
ment."

WINDOWS AS TRADE ATTRACTIONS

How the Goldberg Co. Emphasize the Value of the Talking Machine as a Solace and Enter-
tainment in Military Hospitals

The Goldberg Furniture & Carpet Co., 1641st street and Third Avenue, New York, one of the most successful furnishing houses in the upper

absolutely necessary that those people should subsist. They could just go and jump into the river, thereby decreasing the consumption of food. But France doesn't wish them to do that.

"Our music shop contains nothing to cut, wear, hurl or raise the temperature. But the hardest-pressed belligerent finds it advisable to maintain military bands. I am told that the German Government—whose rigorous efficiency for war is daily held up for our emulation—ex-

pends a good deal of money, labor and previous materials for the purpose of keeping a supply of talking machines in the rest and concentration camps all along behind the battle front, because it finds that popular music played on those machines invigorates the men's mind and makes better fighters of them. The military critics are always talking about the morale of the dif-
fertent troops—that is, about the state of their minds. By the common judgment of experts nothing is more essential in this war than those

lumbia records. Incidentally it may be men-
tioned that this display is built around the ma-
terial prepared by the new Columbia dealer service department.

The Goldberg Furniture & Carpet Co. has built up an extensive Columbia following in its section of the city, and Manager Gall has made it a point to offer his patronus efficient Grafo-

nal and record service. The Columbia depart-
ment is growing rapidly, and a portion of this success may be attributed to the up-to-date and progressive sales and merchandising methods which are utilized at all times.

GEORGE W. LYLE LEAVES FOR WEST

George W. Lyle, assistant to President Wid-
mann of the Pathé Frères Phonograph Co., Brooklyn, N. Y., left last week for a month's trip to the Pacific Coast. Mr. Lyle will visit the Pathé jobbers throughout the country, and will also call upon many of the Pathé dealers. In fact, they are a number of important deals for Pathé representation now pending, which will be closed by Mr. Lyle while he is away on this initial trip of the new year.

Enthusiasm is a habit, belief is a habit, pers-
sistency is a habit, politeness is a habit, sales-
manship is a habit.

C. K. BENNETT REVIEWS CONDITIONS

General Manager of Eclipse Musical Co. Reports 1917 as a Most Successful Year in Cleveland Territory—Thoroughly Optimistic Regarding Outlook for Future

CLEVELAND, O., January 7.—In discussing business conditions for the year just close being the future prospects of the talking machine business in this section, Chas. K. Bennett, general manager of the Eclipse Musical Co., prominent Victor distributors of this city, has remarked: "I am pleased to say from a personal observation that this section of the Middle West has just passed through a most successful year, in fact, the most successful one in the history of the talking machine business. Even though a great many dealers were constantly calling for more goods, every dealer's business will show a slight increase over 1916, in fact the percentage will amount to a great deal more than that which the factory produced. 

"I have talked personally with a great many dealers in the last few days and without an exception each one has told me personally the same story with regard to the quality of business done, and more particularly the fact that cash sales during December were three and four times as great as during the same period in 1916.

"The record end of the business comes in for a big share of the credit for increased sales, this applying not only to the large exclusive shops and department stores in the larger cities, but to the little fellows in the small towns. I had a verbal report from one small dealer whose purchases during the year of 1917 will not exceed $100 and whose record sales during the month of December amounted to over $300. Success such as this reflects great credit on the Victor Co. for the publicity given the line and the demand which they are helping to create to say nothing of the wonderful qualities placed in the goods.

"Another very conspicuous item that I have observed was the fact that a great many more high-priced machines were sold during the past two or three months than during the same period of 1916, indicating beyond question of doubt that the prosperity in the country is being enjoyed by a different class of people than heretofore, who, like the wealthy man, enjoy the good things of life equally well.

"Business since Christmas has kept up at a very pleasing gait, in fact most of the large stores have retained the extra help taken on for Christmas, and the demand indicates that this rush is going to continue for some little time.

"The success of the dealers above mentioned during the holidays was so pronounced and their surprise so great that this has inspired them to continue the active campaign and thus reap the full benefits.

"The talking machine business has never been in a more healthy condition, nor has the demand been greater, and with every dealer fully realizing this condition the clamor for goods is just as pronounced as it was before Christmas, and with every other condition equal I predict that 1918 will show up even more prosperous than any year in the history of the business."

BEFTER BUSINESS BUREAU REPORTS

Secretary C. L. Dennis Issues Comprehensive Statement of the Activities of the Bureau During November—Eight New Cases Taken Care of and Many Complaints Investigated

 MILWAUKEE, Wis., January 5.—C. L. Dennis, secretary of the Better Business Bureau of the National Association of Piano Merchants, has just issued a very exhaustive report of the activities of that bureau during the month of November.

During the month the bureau gave direct attention to eight new cases, and two old cases, growing out of charges of misleading advertising and also investigated a number of miscellaneous complaints. The work was carried on where possible in co-operation with the secretaries of local Vigilance Committees. Of the eight new cases handled two were due to overpricing, two to "explosive" advertising of special sales, one to "factory prices" advertised by a "gypsy" dealer, one to questionable special sale, and one to the efforts of the manufacturer to protect his rights against encroachment by a dealer. Price comparisons were the cause of the trouble in most cases.

The report emphasized particularly the activities of "gypsy" dealers in many cities, and it was found that the present situation in the country is being taken full advantage of in forwarding this class of operation. It is suggested that complaints regarding "gypsy" dealers be forwarded to the bureau as soon as possible with full information in order that prompt action may be taken.

Of the eight new cases taken up by the bureau during November two were in Indianapolis, one in Chicago, two in Davenport, Ia., one in Peoria, III., one in St. Louis, Mo., and one in Stroudsburg, Pa. The miscellaneous complaints taken care of came from a score or more cities.

The trade has been much interested in the report of the bureau's work being sent out by Secretary Dennis, and the members have expressed themselves in complimentary terms. A full report of the bureau and its work will be made at the meeting of the executive board, committees, and State Commissioners of the National Association of Piano Merchants, to be held at the Biltmore Hotel, New York, January 30 and 31, 1918.

UNCLE SAM'S MEN HEARD FROM

Roy J. Keith Gets Interesting Letters From W. G. Porter and Morris Owens

Roy J. Keith, vice-president of the New York Talking Machine Co., received a few days ago a very interesting letter from W. G. Porter, who was formerly one of Mr. Keith's "right-hand men," in the executive offices, and who resigned to become a member of the Ambulance Service in the U. S. Army.

Mr. Porter, who has a host of friends in the local talking machine trade, is now serving his country "somewhere in France," and his letter reflects the good cheer and optimism which made him one of the most popular members of the local wholesale fraternity. Mr. Porter is serving in the same company as Joe Swan, another member of the New York Talking Machine Co.'s staff.

Mr. Keith also received in his New Year's mail an interesting communication from Morris Owens, who was formerly a member of the company's sales staff, and who is now with the 104th Field Artillery at Camp Wadsworth, Spartanburg, N. C. In his letter Mr. Owens expresses only one regret, namely, that his former associates—Messrs. Porter and Swan—managed to reach the firing line in France before he did. In other words, his letter emphasized the spirit of patriotism and unselfishness which is going to be an important factor in the conflict "over there."

L. W. Essex, secretary of the Manophone Corp., Adrian, Mich., has resigned his position with this company. His plans for the future have not as yet been announced.
H. L. WILLSON’S MESSAGE TO TRADE

General Manager of Columbia Graphophone Co.
Extends New Year Greetings to Columbia Dealers Through Columns of The World

H. L. Willson, general manager of the Columbia Graphophone Co., sends the following message to Columbia dealers, through the columns of The World:

"By the courtesy of The Talking Machine World, I am able to send a New Year greeting to Columbia dealers, through the news columns of a trade paper which for years has stood staunch and true to musical instrument manufacturers and dealers.

"Nineteen hundred and seventeen has closed with a bigger year, bigger prospects, and greater satisfaction to the Columbia Graphophone Co. and we believe to Columbia dealers than any previous year. We are entering the New Year full of confidence in our dealers, in our product, and in our policies, and in 1918 we hope to give you heartier co-operation and better service, and exert a little more effort in every direction in order that you may reap bigger sales, bigger profits and greater satisfaction in your representation of our company.

"We take the opportunity of thanking all Columbia dealers for their splendid loyalty and co-operation in 1917, and wishing them a happy and satisfactory New Year in the efforts we know they will make in 1918 in their own and our behalf."

Baker joins Traveling Staff

George A. Baker, connected with the local wholesale branch of the Columbia Graphophone Co., for many years has been appointed a member of the company's traveling staff, and will visit the Columbia dealers in Brooklyn. Mr. Baker assumed his new duties the first of the year, and from all indications will achieve very pleasing success.

During the past few years Mr. Baker has been in close touch with Columbia dealers in this territory, and his intimate knowledge of the details of talking machine merchandising well enables him to fill his present post. He understands the dealers' problems, and is in a position to render them efficient service and cooperation.

Somewhat Personal!

For a store salesman, especially, the habit of shaving every morning, for example, is a good habit. No man can shave himself without following it up with clean linen, brushed clothes, a shine, and a smile which begins at his heart and spreads out. Omit the morning shave, and you have not only discounted your appearance for the day, but you have discounted your efficiency for the day.

It was to be expected

Ready File Co. Tells of the Results Secured Through Advertising in The World—Many Orders Received From Foreign Countries

C. Stanley Garrison, advertising manager of the Ready File Co., Indianapolis, Ind., writes as follows to The World regarding the results secured by that company through its advertising carried in the columns of this paper. He says:

"You will be interested in knowing of some of our advertising experiences in The Talking Machine World.

"As a result of our double-page spread and our page spreads, we have received orders from Canada, Cuba and England and several fat ones from here at 'home.' While we expected results from local circulation, we will admit our surprise at the way The World pulls abroad."

Now located in Memphis

John A. Hofheimer, who was formerly connected with the Maison-Blanche Co., New Orleans, La., is now associated with B. Lowenstein & Bros., Memphis, Tenn., where he is making an excellent record in the talking machine department of that business. Mr. Hofheimer is a practical, progressive man, who has given much consideration to the problems of the industry and their solution.

Value of Co-operation

Every one of us needs the very closest cooperation of the other fellow. If you are selling, try to know your merchandise better, be enthusiastic about it, be agreeable to your customers, look neat—in a word, sell better than you ever sold before; or, if you are in the executive end of the business, do your work in such a way as to be satisfactory to your department and to yourself. Remember, you are the final judge of the honesty of your labor.

"MICKEL"

A Great Name in the Victor Game

How Many of Those MILLIONS of Victor Records are YOU Going to Sell During 1918?

It's a big game. So big, in fact, that one cannot sit down and realize it all at one sitting. But if you are properly set for it you know you are going to get your share. A little hustle, "punch," vim and energy will sell you far more than your share. Let's get together on the Victor Record question now; there are many things we can tell you about the game. Will you meet us half way by writing us, NOW?

**PAYS TRIBUTE TO TALKING MACHINE**

Bishop Mitchell, of St. Paul, Tells People of Toronto the Blessings of the Talking Machine in the Home and in the War

Bishop Mitchell, of St. Paul, Minn., recently preached in a Toronto church on the importance of education because of its effect in enlarging the thought of the soul. In illustrating his thought he said: "Unfortunately I myself had not the early advantage of a thorough musical education and for many years my ear was dull to the concord of sweet sounds. Thanks to the player-piano and the talking machine I have gained an understanding of some of the great music of the world and my power of appreciation is wonderfully enlarged. To that extent my life has been made fuller and more interesting. Some musicians, generally those whose performances are only indifferent, insist to look with contempt upon what they are pleased to call 'canned music.' They are surely wrong. Not long ago a young woman assured me that she could not endure a player-piano, it was so mechanical. If it were half as mechanical as the playing of this very young woman the inventor would not be proud of it. "I come home after a hard day. I ask one of the greatest artists in all the world to sing to me. If I do not like his song I can stop it in the middle without discourtesy. If I like it, I say 'Sing it again,' and he sings it again in the same glorious and fervent tone. I may even cry 'Sing it again,' and he sings. Me to the talking machine and the player-piano have opened a new world of beauty and discovered a very universe of splendor."

The eloquence of the bishop was not ill-placed. Beyond the shade of a doubt, the public appreciation of the best music has advanced more since the invention of the phonograph than in a hundred years previous to its appearance. On the remote prairies of Alberta, Scotti and Des-tinn and Rappold and Caruso are singing every evening. In the miner's cabin, on the frontiers of civilization, on the widespread seas as well as in the luxurious city home men and women are gaining an insight into the glories of an art formerly obscured by clouds and darkness. Even on the battle front the art of the greatest living musicians may be appreciated. Many significant stories have come to us from the war zone, but one thinks most frequently, perhaps, of the unholy Tomahawks force captured by the Turks in Mesopotamia more than a year ago. While besieged at Kut el Amara and cut off from the relieving force pro- ceding to its rescue through the treacherous enemy's lines. "Send us some phonograph needles." The needles were delivered by aero-plane.

**VICTOR NUMERICAL CATALOG**

The Victor Co. has just issued its new numerical catalog listing all records up to and including the November supplement for use in combination with the November record catalog. This catalog, containing extra pages are provided for adding to the catalog the new records issued every month.

The suggestions made on the inside of the front cover are particularly valuable. Properly used, this catalog will insure efficiency in ordering and handling records. This is particularly true in meeting the requirements of the small stores.

The six divided spaces before each record number afford a most convenient method for keeping a record of the demand for a particular record—a most important essential in the successful conduct of a business and one which should be taken advantage of.

**NEGLIGENCE WAR ASSET**

President Bird, of Manufacturers' Association of New Jersey, Tells of the Service That Trade Organizations Can Render the Government by Giving Accurate Information

Under the heading of "A Neglected War Asset," J. Philip Bird, president of the Manufacturers' Association of New Jersey, has emphasized the value of existing trade associations in assisting the Government in its war work, by providing the authorities with accurate information regarding capacity, equipment and organization of various manufacturing plants that might be utilized for Government work. The suggestions of Mr. Bird are fully in accord with the plans that have been made, and is being done, by the Music Industries Chamber of Commerce and are therefore of interest to the music trade men. He says: "In the possession of our long established national craft organizations is practically all the information needed by our Government officials for the prosecution of the war as to location of plants, number of men employed, capacity, etc.

"These American craft bodies have at their fingers' ends concrete, definite and up-to-the-minute information on the ability of every industrial plant in their respective and correlated lines. They know every minute of the day where labor is scarce and where it is adequate or plentiful. They have authentic knowledge as to supply and demand for important raw materials.

"If this highly perfected machinery and organization were taken advantage of by the Government, it would unquestionably save our officials the expenditure of considerable time, energy and money now being devoted to the gathering and usage of such necessary information on our economic and industrial resources.

"The patriotic co-operation of the thousand and one craft organizations ought to be availed of. The Government would be most willingly served with trustworthy trade data by the steel men, rubber men, live stock men, hardware men, implement makers, engineers, garden producers, paint manufacturers, etc., through their well equipped and established trade associations.

"An arrangement of this kind would, with proper authority behind it, almost automatically avoid the evil of any district shortage of labor or raw materials causing delay in placing or delivery of important rush orders for badly needed supplies. It would place the industries of the nation under the practical and most effective control of a patriotic, voluntary, and co-operative dictatorship, similar to the present voluntary censorship which our American newspapers are working under so satisfactorily. A properly drawn up set of rules, made by official publication as a supplementary method, would like-wise solve the much mooned problem of essential and non-essential industries.

"Each craft associated in being a specialist in its own line, it is evident that no single national chamber of commerce, manufacturers' association, or even a State chamber or association, has the necessary facilities for doing what trade or craft bodies can do. This machinery for the carrying on of America's most gigantic enterprise—winning the war—should not be neglected.

"Let us cease encouraging 'Manufacturers' War Conferences,' etc., etc., who pass resolutions and go home, and turn our efforts to the utilization of this neglected war asset. The present instrumentalities are adequate to the present demand."

**CLOSED SATISFACTORY BUSINESS**

The Phonograph Clearing House, Inc., New York, which carried its first announcement to the trade in last month's World, reports the closing of a very satisfactory business during the past few weeks. S. N. Rosewater, president of the company, states that his concern found one hundred items for as many manufacturers and dealers, and that he had received inquiries from all parts of the country and more are coming in every day.
THE TALKING MACHINE WORLD

TALKING MACHINE FOR SOLDIERS AND SAILORS

The important part that the talking machine plays in the life of the soldier or sailor has the Y. M. C. A., who so far as possible will see that they are distributed in accordance with the

COLUMBIA MEN IN U. S. SERVICE

Imposing List of Officers, Directors and Employees of Columbia Graphophone Co. in Service of the Government in Various Capacities

The accompanying list of the officers, directors and employes of the Columbia Graphophone Co., New York, who have entered the service of the Government, is a remarkable tribute to the patriotism and unselfishness of the members of the Columbia organization. President Whitten is devoting almost all of his time to the U. S. Navy, and every Columbia employe who has entered the service of the Government is proud of the fact that the head of the company is sacrificing all of his personal interests to assist the United States in its fight for democracy.

The Columbia factories at Bridgeport, Conn., can also boast of a service flag that is a tribute to the whole-hearted patriotism of the employes at this plant. At the present time 285 members of the Columbia factory staff are "doing their bit" for the Government, constituting a splendid body of well trained men.

List of Enlisted Men

Officers and Directors — F. S. Whitten, president, lieutenant in navy; Capt. John J. Phelps, director, navy.

Executive Office Employees — M. D. Finston, secretary, Wm. E. Barry, army; L. L. Manning, army; E. C. Nelson, navy; Edw. Darst, navy; Edw. Polk, army; C. C. Cooper, army.

Baltimore Branch — J. E. Henshaw, navy.

Boston Branch — Eugene Martin, army; D. F. Belfan, army; Wm. Townsend, army; H. L. Dickinnson, army; F. F. McCurniture, army.

Chicago Branch — Vincent Farnham, merchant marine; Gregory Dowin, navy; A. B. McDowin, army; George Murphy, M. C. Master, radio division navy; Wm. Finger, mechanical staff, ordnance department.

Dallas Branch — E. B. Shields, army; Fred Winkle, navy.

Kansas City Branch — Walter Hougl, army; Mary Randall, aviation.

Los Angeles Branch — W. O. Byles, army; Lawrence Power, army.

New Haven Branch — W. W. Kott, army; Harold Wilson, navy.

New Orleans Branch — C. F. Fuller, army; E. J. Hymel, army.

Portland Branch — New York Branch — A. L. Shibe, navy; J. A. Johnson, navy; W. E. Colton, army; J. B. McDonald, army; R. Wagner, army; Wm. Strohmayer, army; Joseph Jones, army; Edw. Flanigan, army; Walter Galloway, army; J. Turley, army; C. R. Rhodes, army; A. Vernon, army; D. S. Barry, army.

Philadelphia Branch — Joseph Callahan, army; John Kelly, army; Chas. Gluesing, army; Benj. Thomas, army; Joe. Millikin, navy; Albert Lancaster, army; Wm. Page army; W. H. Appley, navy; Wm. Wagner, army.

Portland, Me. Branch — Clyde Shiner, navy.

San Francisco Branch — Andrew C. Love, army; Kirk Kelso, army; William Wingtonton, army.

St. Louis Branch — Clyde Ross, army.

List of Drafted Men

Executive Officers — D. V. E. Nye.

Baltimore Branch — William Freeman.

Indiapolis Branch — Samuel C. Fisher.

Philadelphia Branch — Louis Dickmann.

San Francisco Branch — Louis Botteler, Jack Bates.

NOW MAKING PHONOGRAPH

The Coops & Sons' Piano Co., which moved its factory to Pasadena from the East about four years ago, has begun the manufacture of phonographs in addition to its piano line. The new machine is described as a first-class model, retailing in the neighborhood of $100.

CRYSTAL EDGE MICA DIAPHRAGMS

Let us send you samples today of our diaphragms and you will readily understand why the best talking machines are equipped with Crystal Edge Mica diaphragms exclusively.

We use only the very finest selected mica, the best diaphragm material in the world. To insure a supply for the holiday trade place your orders immediately.

PHONOGRAPH APPLIANCE CO., 109 West Broadway, NEW YORK
FINANCIERS SAY BUSINESS WILL BREAK RECORDS IN 1918

Leaders in Important Lines Predict That the Industrial Activity of the Nation Will Be on a Tremendous Scale During the Year Just Beginning—Optimistic Viewpoint Heurts All

Industrial and financial activity on a tremendous scale is foretold for 1918 by representative men in various important lines, whose views have been gathered for the January number of System, the "magazine of business." Demands of the war will, of course, be of chief importance and will engage general attention. Income of supply agencies will be greatly augmented, but the outlook in other directions is also for prosperity because business of every character will adjust itself to the war situation, and the experience of 1917, in which unprecedented Government requirements were met without disturbance of business, will be continued, according to the best opinion. High wages will be coincident with widespread economies.

Following are some of the views sent to the magazine:

Nation's Aim Is to Win War

W. P. G. Hamms, Governor of the Federal Reserve Board—The paramount business of the United States at this time is the winning of the war, and the activities of the American people are directed to this end. The production, manufacture and transportation of those articles which are necessary for the maintenance of the population of a nation engaged in war and for the support of its armies in the field must be stimulated in every possible way. The Government is the largest purchaser of supplies, the chief customer of business, and its financial requirements will be very heavy. The people are fast learning habits of thrift, of industry and of economy. Over 60,000,000 of them are holders of Government obligations in which they have invested their savings and for which many have themselves gone into debt, thus pledges, their future earnings and savings for the support of the Government.

Elbert H. Gary, chairman of the board of directors of the United States Steel Corp.—It is up to us to prove our continued loyalty to the Government; but, more than that, our loyalty to ourselves in the performance of duty. If our country is defeated in the pending military conflict your property and business and mine will of little value. We shall have re-traced our national steps a century and a half. The wealth of the country will be seized and retained as other nations by oil. That's when they have been forced into the war and we are compelled to fight in defense of our persons, our property and our sacred honor. There is no escape. We are in the war to the end, however costly and bitter the struggle. No man, no country, can continue in a more rigorous or a more compulsory defense.

Business Dominated by War

Frank A. Vanderlip, president of the National City Bank—The state of business in 1918 will be dominated by the war, and the energies of this country must be concentrated as fully as possible upon winning the war. In the aggregate, the industries both in quantities and values will be enormous; they will be greater than ever before, employment will be complete and the aggregate of payments in wages will be far ahead of any previous year. The income of our farmers will be larger than ever before. There will be an unusual distribution of income among the masses of the people, and this purchasing power will make a large market for necessities and essentials, not to speak of what may be classed as luxuries. There is a great resource as yet hardly touched in the army of women who have never gone into industry but who will respond now to our appeal to their patriotism. The problem of America is to speed up its productive machinery to the highest possible limit.

Schwab Is Bullish

Charles M. Schwab, chairman of the board of directors of the Bethlehem Steel Corp.—I have always been bullish on the United States. I can see nothing ahead to make me modify my attitude; a tremendous significance attaches to how presently the business situation is apparent, or not yet apparent, which lie before us. We can think only of the successful prosecution of the war—in its every phase—for the end of the war may not be successful but we must be successful in the measure that we put business before pleasure.

Charles H. Sabin, president of the Guaranty Trust Co.—Demand for additional capital is greater than ever before because of general business activity, but the Government's demand for money also is unprecedented, so the bankers must bear the double strain of colossal loan fluctuations and the financing of unexampled trade activities. In addition, a considerable volume of financing obligations must be provided for. Fortunately, the machinery for relieving much of the pressure exists in our strong, centralized banking system and its great credit resources.

George E. Surrat, president of manufacturers' Association—We must buy from neutral countries in order to carry on our own war preparations; if we buy from them we must sell to them and we shall not be able to pay for what we buy. Therefore, I think that it is a very high duty to develop our export trade in the most intensive fashion and with the highest possible efficiency. We may not—probably we shall not—have goods enough for both the home and foreign markets; that which is sold in foreign markets, to pay our way in the war, and hence I should give the foreign markets the preference over the domestic.

D. Caldwell, president of Wells, Fargo & Co.—I do not believe there will be any let-up in the business of this country during the coming year or, indeed, during the war, the end of which does not appear to be in sight. The performance of our part in the successful prosecution of the war is the greatest business we have ever undertaken, and will require that every enterprise which can help in the least degree shall strive for the high-water mark in activity and efficiency.

Wage Demand Exceeds Supply

Alla B. Johnson, president of the Baldwin Locomotive Works—War involves prodigious expenditures and these produce business activity. Therefore, as the conditions of war exist, there must continue to be a demand exceeding the supply, resulting in strongly sustained prices.

January 15, 1918

EXHIBIT AT AUTOMOBILE SHOW

The Doehler Die-Casting Co., Brooklyn, exhibited at the National Automobile Show held at the Grand Central Palace from January 5 to 12. Although the exhibit was naturally devoted in a larger way to automobile die-castings, there was shown a very fine exhibit of die-castings of talking machine parts. The display was varied and wide in scope and contained die-castings of sound boxes, tone arms, tone arm necks, in fact, every possible part of a talking machine that could be die-cast. The exhibit was well visited by the thousands attending the show.

MUSIC FOR OUR BOYS

"Music for Our Boys in the Service" is the heading of a timely and effective poster mailed to Columbia dealers this week. The text of this poster reads as follows: "Send some Columbia phonographs to your men, and make sure that every Columbia Graflexola in your Y. M. C. A. or Knights of Columbus Army Hut. Bring your records to us and we will deliver them for you." It is interesting to note that a Columbia Graflexola may be found in the army huts mentioned, as it indicates the remarkable popularity of this instrument.

LEAVES ON WESTERN TRIP

Leonard Markels, well-known motor manufacturer, left New York Sunday for a Western trip, and according to his present plans will visit Chicago, Milwaukee, St. Paul and Minneapolois. During the past month Mr. Markels has received letters from many Western manufacturers regarding contracts for 1918, and will close these contracts while away on his present trip.

The "INVINCIBLE"

A New and Better Sound-Box

 Plays all makes of records.
 Pure, clear and sweet tone.
 Constructed to give service and absolutely guaranteed.
 No superfluous parts, and production uniform—no seconds.
 Supplied with mica or composition diaphragms.
 Our composition diaphragm is a staple product and is guaranteed to be the best for all sound box purposes, has stood the test equivalent to 200 years' wear and still in service, thousands of them in use in homes throughout the U. S. and Canada.

TALKING MACHINE ARTISTS TO TOUR

Collins, Harlan, Campbell, Burr, Meyers, Murray and Others in Group Giving Concerts in the East—Of Particular Interest to Talking Machine Owners and Retailers Everywhere

As is announced on another page of The World this month, the Popular Talking Machine Artists, the men who have made records of the popular kind for so many years that their names are known and esteemed in the majority of homes, and who are represented in all the leading monthly lists, are now preparing for their spring concert tour.

At intervals during a year or more, these artists, including Henry Burr, Arthur Collins, George H. Meyers, Albert Campbell, Byron G. Harlan, Fred Van Eps and Billy Murray, with Theodore Morse, the noted composer, at the harpsichord, have given concerts in various cities in the East and have met with unqualified success, through co-operation with local talking machine dealers.

The voices of Collins and Harlan, Albert Campbell, Billy Murray and the rest of them, have long been familiar in the homes of the country through the talking machine, and the public generally, especially in the smaller cities and environs, have shown a surprising interest in the opportunity to hear these artists in person on the stage, and to see them at close range. Whether they appear on the records as members of the Peerless Quartette, the Sterling Trio, or as individuals, the interest has been the same, and it has been a rare occasion when the artists have not played to capacity audiences. Instances are cited where talking machine enthusiasts have traveled from fifty to seventy-five miles each way just to see and hear their favorite record artists in the flesh.

The concerts given by the artists are made up of solos, and chorus numbers, and comedy bits, which, with a generous number of encores, run somewhat over two hours. Where practical the concerts are held with the co-operation of the local newspapers and talking machine dealers of the various lines, for, as the artists without exception sing for at least two record companies, and in some cases for a half a dozen or more companies, practically every dealer in town has some direct interest in their work and stands to benefit by their appearance before his customers. In some cases one dealer will arrange for the concert by himself, and more often dealers will co-operate to bring the feature to their city. Instances are on record where newspapers have printed two and four-page supplements featuring the concert, the artists and talking machines generally, and carrying a substantial amount of advertising from local retailers to make the venture pay and to give it impressiveness.

As one newspaper puts it in a review of the concert: "It is something unusually interesting to hear a coterie of the men who have, taken together, have made more talking machine records than any other people on earth." Another says: "It is particularly pleasing to see and hear this aggregation—to gaze directly at persons who have been announced on the printed covers for years." Still another paper says: "This is an event of special interest to owners of talking machines, as it affords them the rare opportunity of seeing these artists in person and watching the manner in which they 'put across' the various songs and instrumental numbers that have become so popular the world over."

Among dates scheduled by the Popular Talking Machine Artists for next month are: February 6, Syracuse; 7, Buffalo; and 8, Rochester, all the dates being made through the co-operation of local talking machine wholesalers and dealers.

GROWING IN POPULARITY

The Widdicombe Line of Phonographs Has Won Favor Among Lovers of Artistic Creations in Phonograph Making and Designing

GRAND RAPIDS, MICH., January 9—The Widdicombe line of phonographs recently introduced to the trade is meeting with a very cordial reception. The experience of the Widdicombe Furniture Co. in catering to the furniture trade has enabled them to offer a line of phonographs whose cabinets have achieved instantaneous popularity even before the fine tone of the phonograph is heard. The accompanying illustration shows one of their concise models in the Queen Anne style. Their years of furniture experience have taught them that the Queen Anne style ranks high among the various period styles. The other popular periods are all represented in the various artistic models in the line made by this company. It is their contention that as phonographs are essentially pieces of living room furniture great care must necessarily be given to the cabinet and its harmonious relation to the other furniture in the room.

The Widdicombe Furniture Co. have also seen to it that every other part of the machine matches in perfection to the cabinet that contains it. This is notably evident in the remarkable reproducing qualities of the instrument which contains so many distinctive features, among which is the modulator which is featured in the phrase "Play it yourself."
You Ought to Know

In case you are contemplating expanding the sphere of your business to include departments devoted to Pianos, Player-Pianos, Musical Merchandise or Sheet Music, that you'll find news and comments about them all in

The oldest and leading music trade weekly, which covers every branch of the industry.

It Contains

- Instructive and educational articles.
- Hints on salesmanship and advertising.
- Editorial that are timely and authoritative.
- Facts about the new things in the trade.

A D. GEISSLER CHATS OF WAR, BUSINESS AND PROSPECTS

President of New York Talking Machine Co. Discusses in His Usual Interesting Way on Business Conditions and Prospects—Lessons Learned in 1917

THE TALKING MACHINE WORLD

January 15, 1918

The representative of The World was thinking of business conditions more than world-wide conditions when he visited recently the office of Arthur D. Geissler, president of the New York Talking Machine Co.

The first question asked Mr. Geissler was, "A lot happened last year, didn't it?" the aim of this question being to get Mr. Geissler's ideas on the different changes in organization, methods of distribution, etc., which had transpired during 1917.

In answer to this question Mr. Geissler said: "Yes, not only last year but the year before that and the year before that. But now, what a different atmosphere seems to pervade, that we have the first inklings of peace and that we can, for a moment, stop and consider all the dreadful debauchery and waste of homes, lives and treasure since this war began.

"And now that we are in it, how fortunate it was that France was ready—that Great Britain was ready with her navy—that little Belgium was able to throw herself into the breach until France could gather herself together and hold the onrushing tide—and then Britain was able to sustain that support!"

"What must be the feeling to have them 'over there' now to know that we, too, are really 'in it'! The months of recruiting and enlistment—the filling up of officers' instruction camps—the draft bill—the shipping and food regulation—the huge appropriations—and finally, for them to realize the glow of heart with which we greeted their Jefferes, their Balfour and their Italian Mission—'Vive L'Italia.' I say. She understands and must—more best as she has been.

"We have had our drives for money—it has been a year of preparation. Our resources—our resolutions—are the things now that must count this year.

"You ask me to predicate business conditions. How can anyone say what is to be?"

"The largest industries in the country have offered their entire resources to the Government. I understand the Victor Talking Machine Co. was amongst the first to do so. If labor, material, fuel and transportation conditions permit the Victor Co. to make even as much merchandise as they made last year, then the business of the retailer and the wholesaler will be as large as last year.

"We are selling Victrolas and Victor records, that is true, but essentially what we sell is music—a product no longer considered a luxury, but a necessity—shown by the liberal ap-

DEMAND FOR FIBRE NEEDLES

Continues to Grow, Judging From the Increased Activity With the B. & H. Fibre Needle Co., Chicago—A Chat With President F. D. Hall

CHICAGO, ILL., January 10—"From present indications," said F. D. Hall, of the B. & H. Fibre Mfg. Co., when called upon by a representative of The World this month, "it looks as though the trade in general is threatened with another avalanche of business for the coming year. Not only in this country has business been exception-

ally good, but there has been an enormous increase in the export trade lately. Shipments to Central and South America and Australia are being handled in a more expeditious manner than for some time past, and now that the Government has taken over the rail situation, the trade can rest assured that all freight in transit hereafter will be sent over the quickest possible routes and that there will be no delay at the point of destination. This will have an effect upon the dealers to whom the goods are being shipped of giving them the necessary stimulus to get out and do more business than they have been doing, knowing that their orders will be taken care of promptly. The freight situation prevailing towards the latter part of the old year was a major factor in keeping a great many dealers from taking in all the business that was possible for them to do."

"The raw material which we use for the manufacture of fibre needles is of better grade and quality than we have ever had before. The Italian and the Portuguese fibre, samples of which the Government sent us some time ago, has proved its merit and will, so far as we can judge, both in quality and workmanship than ever before. Of course, this necessitated a large increase of our forces and we have made all preparations to take care of the trade for the coming year, which, no doubt, will be a banner one. We have also made many improvements and have added several new features to our latest needle cutter and are able to meet all the demand that has been increasing so rap-idly."

TALKING MACHINE MEN TO MEET

New Applications for Membership and Annual Reports to Be Acted on at Coming Meeting

The next meeting of the Talking Machine Men, Inc., will be held in the directors' room of the Merchants' Association Building, upper floor of the Woolworth Building, at 2 p. m. on January 16. Many important matters will come up for discussion at this meeting, and all members are requested to attend. An agenda for the annual dinner will be submitted, and the reports of the various standing committees will be read. Among recent applications for membership, to be acted upon at this meeting, are those of the Berlin Department Store, 1013 Broadway, Brooklyn, and Schmuckler & Singer, Inc., 133 Canal street, New York City.

NEW QUARTERS IN MINNEAPOLIS

Nye's Brunswick Shop Now Located in the New LaSalle Building, That City

MINNEAPOLIS, Minn., January 5.—One of the first business concerns to move into the recently completed LaSalle Building, this city, is Nye's Brunswick Shop, conducted by Ex-Mayor Wallace G. Nye and Geo. M. Nye, and in which the Brunswick phonograph is featured, together with Pathé records. The new quarters are most elaborately furnished. In addition to a full line of phonographs, the Shop also has on display a big assortment of billiard outfits which are also manufactured by the Brunswick-Balke-Colender Co. With the opening of the new shop, Wallace G. Nye remarked, "I find the popularity of the Brunswick Shop most agreeable in contrast with the discord of public life."

Miss Frieda Hempel, the Metropolitan opera soprano, will start on an extended concert tour early in February.

To Our Clientele

Q During this period of unusual conditions we are doubling our efforts in order to maintain our service and assist you in every possible way in marketing Victrolas and Victor records, which have won recognition as an essential product in the camp as well as in the home.

Q As a Victor retailer you are therefore "doing your bit" to provide the necessary entertainment and relaxation for the public and the "boys" in camp, in addition to helping the Government carry its economic burden.

G. T. WILLIAMS CO., Inc. VICTOR WHOLESALE EXCLUSIVELY

217 Duffield Street BROOKLYN, N. Y.
37 hits! 37 sales winners! That's how we have kept our promise with Columbia dealers. The February List is a corker.

**WM. MAXWELL OPTIMISTIC OVER THE TRADE OUTLOOK**

Reviewing the business situation at the request of The Talking Machine World William Maxwell, vice-president of Thos. A. Edison, Inc., writes:

"For a phonograph business in 1917 was the largest in our history, and was 20 per cent. ahead of 1916. The present indications are that our orders for 1918 will be considerably in excess of that of 1917. Our output will be ample to meet the phonograph business good in 1918. We expect our record production to be materially larger than last year."

"Among a large class of bankers, particularly the smaller bankers who absorb their opinions on broad financial questions from the public statements of large bankers, it has become quite the fashion to speak with gloomy foreboding of what the future holds in store for the musical instrument industry. It has been reported to me that various small bankers have said in effect that under present conditions they can't conceive of anyone buying pianos or phonographs."

"The pleasing fact remains, however, that people are buying phonographs and pianos in very large quantities—particularly phonographs."

**REARRANGE SUPERVISORS' DISTRICTS**

The following rearrangement of Edison phonograph supervisors' territories has been announced by the musical phonograph division of Thos. A. Edison, Inc., as having become effective on January 1—Visit Factory for Get-Together Conference

The following supervisors of Edison phonograph supervisors' territories has been announced by the musical phonograph division of Thos. A. Edison, Inc., as having become effective on January 1. The supervisors and the territories which they will cover are as follows:

- H. R. Skelton, with E. F. Bedford, as mechanical instructor for the territory embracing Boston, New Haven, Albany and Syracuse; C. S. Gardner, with J. C. Knipper, as mechanical instructor, for New York, Philadelphia, Williamsport, Pa., Pittsburgh and Richmond; N. Johnson, with J. Findlayson, as mechanical instructor for Cleveland, Cincinnati, Detroit, Indianapolis and Chicago; L. A. Zollner, with A. E. Schiller, as mechanical instructor for Milwaukee, Minneapolis, Des Moines and Sioux City; C. W. Burgener, with D. Lawson, as mechanical instructor for El Paso, Kansas City, Omaha, Denver, Ogden, Utah, and Helena; J. A. Shearman, with C. W. Burgener, as mechanical instructor for Dallas, Atlantic New Orleans and St. Louis; D. M. Martin, with H. D. Gunner, as mechanical instructor for all of Canada.

Over the Christmas holidays Supervisors Skelton, Gardner, Johnson and Martin, and the entire staff of mechanical instructors, were at Orange to participate in a get-together conference, during the course of which they were entertained at dinner by the company.

**MOST APPRECIATIVE OF OFFER**

Otto Heineman, president of the Otto Heineman Supply Co., has received a letter from Major General George Barnett, Commandant, Headquarters U. S. Marine Corps, Washington, D. C., acknowledging Mr. Heineman's offer to furnish each of the U. S. Marine Corps stationed in Cuba and at other points with a phonophone and collection of Emerson records, for which this company acts as export agents in the Latin-American field.

In a chat with The World Mr. Heineman expressed great pleasure at having an opportunity to provide some amusement for "our boys." Mr. Ackerman, export manager of the company, states that the U. S. Marine boys are anxious to be sent "over there." Their enthusiasm can be readily appreciated, for outside of the patriotic spirit involved the Marine Corps is as fine a body of men as ever have fought for Uncle Sam, and this division offers special attractions to the young American with red blood in his veins. Service on land, at sea, or in the air is open to him, and the fact that the Marine Corps contains no conscripted men appeals to many young Americans who desire to offer their services to the Government, in preference to waiting for the draft.

From F. W. Woolworth: "There are plenty of opportunities for young men today. Many fall because they are not willing to sacrifice. No one ever got far who was in houdage to the body." This is especially true to-day when a great war is facing us.

**A POPULAR COLUMBIA MAN**

Frank K. Pennington, Assistant General Sales Manager of the Columbia Graphophone Co.

We take pleasure in presenting herewith Frank K. Pennington, assistant general sales manager of the Columbia Graphophone Co., New York, and one of the most popular members of the Columbia organization.

Although he has been connected with the Columbia for less than a year, Mr. Pennington has already won the esteem, friendship and admiration of every one of his co-workers. His door is always open for visitors to the executive officers, and his many years of practical sales experience, combined with his magnetic personality, have given Mr. Pennington an entrance into the heart of every Columbia man. He is proving an invaluable assistant to George W. Hopkins, general sales manager of the company, and it is Mr. Pennington's earnest hope and ambition that he will soon find time to visit every Columbia branch and become personally acquainted with all his co-workers.

**EDISON MAN GIVES LIFE TO COUNTRY**

The first man of the Edison organization to give his life for his country was Leslie Parker Colton, of the record stock department, Edison Phonograph Works, Orange, N. J. He was a sailor on the Battleship "Missouri." His death occurred the day following the date originally set for his marriage. Mr. Colton had been three years with the Edison organization. He enlisted in the navy and had seen but two weeks' service.

No man can help an organization to become greater, better, more successful and more efficient without making himself tile same.
AN IMMENSE CABINET FACTORY

AN IMMENSE CABINET FACTORY

Plant of Globe-Wernicke Co. in Cincinnati Has
Over Twenty Acres of Floor Space

The accompanying picture will give some idea of

tory at Cincinnati, O., where the Brown disc
record cabinets are manufactured. This plant
has a ground area of fifteen acres, with a floor
area of over twenty acres, and is considered the
largest plant of its kind in the world. The re-
sources of this factory are so enormous that

PROMPT SETTLEMENTS NECESSARY

Credit Men Should Remember That Present
Conditions Should Discourage the Carrying
of Long-Standing Open Accounts

In line with its advice to credit men that “the
country is at war, and it is time to put your house
in order,” the December letter of the National
Association of Credit Men points out that the
carrying of a large number of open accounts
results in an expensive waste that ought not to be
permitted under present conditions.

In the opinion of the association, prompt set-
tlements should be expected, and asked for
where they are not made voluntarily. The mer-
chants who are slow by habit or custom should
be pulled up and shown that they cannot expect
credit favors unless they arrange to take proper
and reasonable care of their accounts. The
merchant disposed to be a little shrewd in his
practices, taking advantage of unearned dis-
counts, returning merchandise freely, or doing
those little tricks which add to the burdens of

Wall-Kane Needles

60 packets without stand, $3.90; 60 packets with stand, $41.

RICHMOND NEEDLE CO., 214 Fifth Ave., New York

the Globe-Wernicke Co. is accustomed to han-
dling carload or trainload orders with ease and
convenience, so that prompt shipments to its
clients are the rule and not the exception in the
trade.

The Globe-Wernicke Co. is recognized every-
where as the leading manufacturer of sectional
cabinets, and this firm has continued to ship
a great volume of Brown disc record cabinets,
which is carried in stock by progressive dealers from coast to coast.

The credit man, it is felt, should be shown with-
out hesitation that the days for the indulgence
of these practices are past, and that, if he ex-
pects the best in treatment and prices, he must
give his best.

“This is no time,” continues the letter, “for the
credit man to flabby in his treatment of
accounts, to be a jellyfish in the hands of his
debtors. Rather he must remember that pro-

ELECTRICALLY EQUIPPED OPERLLOS

All Models in 1918 Line to Be Provided With
Electric Motors, It Is Announced

Detroit, Mich., January 7.—Simultaneously with
the announcement of the Operlo Phonograph Co.,
inc, of this city, that the 1918 models of the Oper-
lolo phonograph will all be equipped with elec-
tric motors. They announce that their motive in bring-
ing out an electrically operated phonograph is in
response to the numerous and repeated demands of
the buying public to which they have ever lent
an attentive ear. The choice in the matter is still left to the buyer, however, as these models
will be equipped with double spring motors if de-
sired. Electric motors are one of the many fine
features to be found in the new models, it is also reported by the firm.

THE ANSWER SHOULD BE “YES”

Geo. W. Pound, counsel and general manager of
the Music Industries Chamber of Commerce,
calls attention to the fact that on the second
page of the questionnaire, which registrants
under the draft are required to fill out, are these
questions:

“Is your business essential to the conduct of
the war?” to which it is urged that all men
from this industry answer “Yes.”

“What is your business?” to which the answer
should be “Music.”

There are many thousand men employed in
the various branches in the industry who will be
called upon to fill out the questionnaires,
and it is pointed out that the answers outlined
above will do no harm and will perhaps set
these with whom they come in contact to think-
ing of the importance of the music trade.

TELEPHONE, CHELSEA 4017
SOLVE THE FREIGHT PROBLEM IN MISSOURI TERRITORY

Shipments by Express so Slow That Many Dealers Use Their Own Cars—St. Louis Trade Surpassed Expectations as a Whole—Interesting News Items From the Saint City

St. Louis, Mo., January 9—In the main, the talking machine business in St. Louis this year undoubtedly surpassed expectations and expectations were for a larger business than last year, despite conditions. The stocks of machines were very heavy at the beginning of the holiday season and they held out well. Practically all lines were broken as to certain styles, but there were enough machines of every kind to supply needs if the person insisted on a certain make and was not exacting as to style.

Several heretofore exclusive dealers added machines to meet the holiday demand, taking on lines that do not demand the carrying of record stocks. In this manner the Smith-Reis Piano Co. and the Vandervoort Music Salon added the Brunswick and the Grand Leader Department Store added the Sonora. These firms made liberal window displays of these types of machines before the holiday season closed.

One unexpected condition put a number of country dealers at a disadvantage. That was the complete congestion of the express companies as to outgoing freight. Several dealers located fifty miles or so from St. Louis declined to accept the explanation of no shipments from local wholesalers and came to town to see about it. The machines ordered were loaded again and taken to the station and seldom did the dealers succeed in getting them shipped.

Manager Staffelbach, of the Pathé line, turned a new deal in this connection. He got his drivers out at 4 a.m. and loaded his shipments onto trucks and applied at the express offices for shipments this early in the day. As a rule, he found the outgoing cars not loaded at that time and his shipments were accepted, but when the available cars were loaded, all later offers were refused. Some dealers twenty miles from the city sent their own trucks to obtain goods.

The Aeolian Vocation had a very merry Christmas, according to Manager Guttenberger, of the talking machine department at Aeolian Hall. Business far exceeded previous years, it is reported, with a big call for higher priced machines.

It recalls that every sales manager in town is remarking on the high percentage of cash on sales and the short term credits asked. The record made this year never has been equaled, so say all of them. But, strange to say, the advertising for long terms was never more noticeable. Several of the large dealers published offers of terms that allow eighteen months on machines at $100 and less and twenty-four months on machines at $300.

C. R. Salmon, of the Columbina wholesale department, is again in possession of the Columbina sales cup for record distribution. He was the first winner and also he is the first salesman to win the cup the second time. He may not realize on his ambition to win the cup enough times to gain ownership, as on the day the cup arrived Mr. Salmon filed his National Army questionnaire and waived all claim for exemption. He expects to be called for service in the spring, but is hoping in vain, he thinks, that he will have time enough to cinch the cup ownership.

Record sales were extremely heavy this year and the dealers have noted with great pleasure the number of persons, even those not owning machines, who have adopted the rule of giving records as gifts. It is notable that a good many of these gifts were high priced records, those which machine owners had expressed a desire to own, but did not feel they could afford. This note in the sales is reported often by the Victrola dealers.

The Silverstone Music Co. is trying the effect of talking machine music on egg production, having loaned an Edison Disc machine to a local newspaper for use in the paper's booth at the poultry show, which is running at this writing.

TRADE CONDITIONS IN VANCOUVER

Vancouver, B. C., January 8—During the early part of the month the Kent Piano Co., Ltd., of this city, conducted a series of tone tests at Vancouver, Victoria, Grand Forks and Trail. These were by Hardy Williamson, of the Edison list of artists and well known in Ontario through his recitals with the Edison Diamond Disc. In Vancouver the Kent Piano Co. issued invitations for a recital in the ballroom of the leading hotel, W. E. Townsend, of the Hudson Bay Co., was recently in Toronto and reported splendid sales of Pathéphones in Vancouver. The Hudson Bay Co. are "strong" in the far west and are putting splendid selling effort behind it, which is bound to bring good results.

Walter F. Evans, Ltd., recently devoured considerable space in the daily newspapers, comprising a series of Victrola advertisements pertaining to construction, educational in character, and one which will be of interest to the dealer of all classes.

The Hudson Bay Co., since adding the Columbia line a few months ago, through the efforts of Manager E. Gowan have created a wide and profitable clientele for this department of the firm's business.

The British Columbia Talking Machine Co., Ltd., have incorporated at Vancouver, B. C., with a capitalization of $10,000.

Informal Friday evening recitals in the store of Fletcher Bros., Victoria, have been found very profitable by the house. These recitals are held on the ground floor, where there is a large phonograph and piano display floor, into which the main entrance opens. Many sales are attributable to these Columbia recitals.

PRAISE FOR STARR PHONOGRAPH

Son of Starr Co. Retail Manager Tells of Value of Starr Phonograph Trench Kit

RICHMOND, Ind., January 1—Charles Curtis, First Division, Camp Shelby, Miss., son of E. S. Curtis, manager of the Richmond retail warehouse of the Starr Piano Co., spent his Christmas vacation with his parents in this city. While here he was a visitor at the Starr store and also at the Starr Piano Co. factory. He was very much interested in the new Starr phonograph trench kit now being manufactured by the Starr Co., and said that music was one of the most enjoyable luxuries of camp life. "In the evening," young Curtis said, "the boys of the training camps will certainly enjoy these phonograph trench kits, as they are just the thing to furnish a good supply of fun."

Henry Gennett, president of the Starr Piano Co. in behalf of the company, presented Private Curtis with a complete Starr phonograph trench outfit for his division, and also a good supply of Gennett records.

The company officials were assured that the gift was very much appreciated and that nothing could have pleased the men more.

NEW FORM FOR EXPORTERS

War Trade Board Prepares New Form of Agreement Which Is of Interest to Manufacturers of Musical Instruments Who Are Exporting

WASHINGTON, D. C., January 5.—The War Trade Board has prepared a new form of agreement for shippers exporting goods to their own branches or agencies abroad to supersede all previous forms. In issuing the form the board warns shippers that the mere signing thereof does not necessarily mean that license will be granted. Heretofore when the War Trade Board granted a license to the shipper to ship to his own branch it exercised no control over what the branch might do with the goods on their receipt. The branch might sell such goods to an enemy house.

It is therefore to the bureau more effective to use at the same time the new agreements to restraints on shippers to reputable shippers who have branch houses in foreign countries that the new form has been prepared.

Why is it that the man who prepares for good business usually finds it? Because sub- sculously he lights to live up to his own expecta- tions.

Clas. 11. Munny, 226 Broadway, Bayonne, N. J., has secured the agency for the Sonora phonograph.
CONFERENCE OF COLUMBIA MANAGERS A DECIDED SUCCESS

Managers of Columbia Branches Visit New York for First Conference—The Many Interesting Practical Talks and Visit to Factories Thoroughly Enjoyed—Banquet at Hotel McAlpin a Fitting Finale—Geo. W. Hopkins, General Sales Manager, in Charge of Arrangements

The first conference of the branch managers of the Columbia Graphophone Co. was held in New York the week of January 2, and was a get better acquainted before the real work of the conference started. On Thursday the visitors were tendered a re-

success far beyond the expectations of Geo. W. Hopkins, general sales manager of the company, who was responsible for the introduction of the conference, and who handled the many incidental details that made the conference of practical value and of benefit to everyone in attendance.

of unusually valuable addresses were delivered, included in which were the following: “Executive Co-operation,” H. L. Willson, vice-president and general manager; “Factory Support,” C. A. Flannan, general works manager; “Motors,” E. L. Tanner; “Traffic Problems,” R. L. French, traffic manager; “Tone and Tone Reproduction,” John J. Scully; “Our New Cabinets,” N. T. Moore; “Record Stock in the Factory,” Cha.

Conference of Columbia Managers at Recital Hall in Fifth Avenue Shop

The managers arrived in New York January 2, and on that evening were entertained at dinner at the City Club of New York, where an informal pow-wow gave them an opportunity to department heads from the executive offices, assembled for luncheon at the Hotel Stratfield, Bridgeport, Conn. During the course of the luncheon a number of unusually valuable addresses were delivered, included in which were the following: “Executive Co-operation,” H. L. Willson, vice-president and general manager; “Factory Support,” C. A. Flannan, general works manager; “Motors,” E. L. Tanner; “Traffic Problems,” R. L. French, traffic manager; “Tone and Tone Reproduction,” John J. Scully; “Our New Cabinets,” N. T. Moore; “Record Stock in the Factory,” Cha.

It's easy to sell people what they're hungry for. People are hungry for Columbia Records.

CONFERENCE OF COLUMBIA MANAGERS A DECIDED SUCCESS

(Continued from page 113)

before adjourning, the visiting managers expressed their keen appreciation of the splendid program of business talks which had been prepared by the sales department. Mr. Hopkins and Mr. Pennington were congratulated upon the careful thought and consideration which they had bestowed upon every detail of the program, and the managers were unanimous in stating that the conference would enable them to greatly enhance the efficiency of their individual organizations.

Banquet at the Hotel McAlpin

On Saturday evening the managers, executives, members of the departments in the district offices of the Columbia Records, the Dictaphone selling organization were the guests of the officials of the company at a banquet held at the Hotel McAlpin, which was a most prosperous and fortunate event. The Dictaphone division had also held its annual conference the week of January 2, and had succeeded in making their conference of practical value in every respect.

at the banquet on Saturday evening N. F. Minlor, general sales manager of the Dictaphone division, presided as toastmaster, and filled this important post with his customary good cheer and ability. He prefaced his introductions of the speakers of the evening with the remark that all of the addresses would be informal, and that each speaker would talk for only a few minutes.

Francis S. Whitten, president of the Columbia Co., was the first speaker of the evening; being accorded an enthusiastic reception from the members of his organization. Mr. Whitten paid a tribute to the men with whom he is associated, and smilingly told the guests that they should all feel the company was "their company," giving them some idea of the expectations of the Columbia executives for the new year.

Mr. Whitten was followed by several members of the Columbia executive organization, all of whom spoke pertinently and in a manner which won the hearty applause of every Columbia man present: H. L. Willson, vice-president and general manager; Frank Dorian, general manager of the Dictaphone division; Edward N. Burns, vice-president; George W. Hopkins, general sales manager; Frank K. Pennington, assistant general sales manager; Marion Dorian, chief auditor; C. A. Hanson, general manager of the Columbia factories. George Means to Edward Smith, president of the Royal Type- writer Co., and prominent in industrial and financial circles, was another speaker at this dinner who earned the hearty applause of the diners.

Musical Entertainment on the Program

One of the surprises of the evening was the introduction of Licut. Gitz-Rice, of the Canadian Army, who had returned only a few days previously from the battle front abroad. The Gitz-Rice proved to be an entertainer of exceptional ability, and his rendition of topical patriotic songs, as sung by the boys in the trenches, together with his fund of timely stories, evoked encore after encore.

The musical program at the banquet called for the appearance of many popular Columbia artists, and that event was made the occasion of success in all parts of the country. Theodore H. Bauer, concert and operatic director of the Columbia Co., was in charge of the musical entertainment, and was determined to have the heartiest congratulation he received at the close of the banquet.

Prince's Orchestra, which is an exclusive Columbia organization, accompanied the artists, with Chas. A. Prince, director of the orchestra, at the piano. Among the artists who appeared during the course of the evening were the following: George Barrere, Henry Burr, Collins and Harlan, Frank Croxton, Miss Amherst Farrar, Arthur Fields, Chas. Harrison, José Mardones, Theodore Morse, Van Swindell, Schneck, Miss Genevieve Zilinski and the Peerless and Stellar Quartets. All of these artists were obliged to render many encores and were the recipients of congratulations from everyone.

Prizes Awarded Dictaphone Men

One of the pleasant events of the evening was the presentation of prizes and medals to the members of the Dictaphone selling organization who had made their quotas in 1917 and in previous years. N. F. Minlor officiated as the donor of these gifts and complimented each member of the organization upon his splendid work in 1917, which had enabled the Dictaphone division to close the biggest year in its history.

Frank Price, of the Pittsburgh branch of the Dictaphone division, was presented fifteen prizes during the year, on behalf of the Dictaphone Sales Club presented Frank Dorian and Mr. Minlor with diamond studded gold fobs, as a mark of appreciation and personal esteem.

"Columbia Convention Camouflage"

One of the features of the banquet was the appearance of an attractive booklet entitled "Columbia Convention Camouflage." This booklet was also prepared in the shape of a record which was presented to everyone in attendance at the banquet, which Arthur Fields sang the record, which was composed by Howard Johnson. This book- leet, under the heading, "Columbia Medley," read as follows:

It costs some dough, as we all know, to buy a phonograph. I tried to buy one just last week, and couldn't help but laugh.

The saga a man goes through selecting a machine; They try to grab your coin so hard they make the eagle scream. I looked at different makes till nearly dead; At last I met a gentleman who said:

"The Columbia's a gem when in motion, Won't you come to our office and see? It's famous from ocean to ocean. Come down and look it over, please, with me. So I thought it over and said I'll go along. We went into the office, I could see I stood in strong. Everyone I saw there had a smile upon his face, I was introduced to everyone around the place.

There was Mr. Hopkins, he's the fellow, don't you know, Put the Pp in Pynes, you in so many ways ago. Try and get away from him, you'll get in the neck; He can sell you stuff until your bankroll is a wreck."
CONFERENCE OF COLUMBIA MANAGERS A DECIDED SUCCESS

Next was Mr. Hanson; he’s the factory support. When I looked him over, I could see he was a sport. He gets all the fun at the plant and puts them all upon aloof. He just says forget it, boys and then forgets himself.

There was Mr. Williamson, the he’s quite severe he’s nice. They called him the big boss, he’s not without a “Vise.” When he walked in the door, he never knew his way. Business is so rushing that he burns the midnight oil.

Next was Mr. Hayden, and I noticed by his hair. They say the diamond in the rough, they be his chair. In his eyes he had a look as will it be. Maybe some wild women gave it to him, you don’t see.

There was Mr. Tuner, quite the mixed little thing—These remarks are all in fun, so don’t mind me. When I looked him over, there were two things that I missed:

Flower in his buttonhole and watch upon his wrist.

I saw Mr. Pennington, he’s bigger than an ax. Everybody says he’s as crazy as a fox. That’s his hair is redder than the blush of any queen. All the boys agreed and told me that he was a “priest.”

Next was Mr. Haines, he’s a man of many tricks. Speaks a lot of languages—I think it’s thirty-six.

When I talked a bit with him, he took me by the hand. English was the only thing he didn’t understand.

Next was Mr. Beitz, the man who’s never known to think. When I looked at him I knew he was a heap for work. All day long he dictates, many letters he will, all day long his wife dictates at night.

Next I met a fellow who is known as Mr. Tall. If I didn’t mention it he’d he’s as sure as—

If I had my way I’ll set him on the post.

All that I know is that he’s a jacked man.

Mr. Knox was on the job, he shook his hand with ease; Knox was passed in his hit, and Knowly was on his ways.

As the advertising man friend Knox was introduced, so you see that goes to prove that ever Knowly’s a honest.

There was Mr. Burnes, the man who picks up the record, when they come out you, everybody all agree to that. If the records turn out that don’t increase his fame; If they’re bad, it’s always Mr. Burnes who gets the blame.

Next comes Mr. Seavey, the man who makes the foreign sales.

When you speak of traveling he’ll tell you many tales. My advice to Mr. Seavey is really not the worst. Speak up, sir, who he don’t see it first?

Then came Mr. Bauer, talk of Oscar Hammerstein, Bauer makes old Oscar look like it was a shine. What I’m going to tell you now is more than any crime: Here’s a guy that can’t temper all the time.

When I mention Harris, then I mean a friend of mine, Also of each jazz band that you met along the line.

He played a record that he values more than spring—

You know the one I mean, made by the Watson girls.

Next was Mr. Dowling, who sells the Dittophon. Friend of all the phonographers who like to work alone. Wives of all these business men declare that he is great; I defy anybody to tell him, “I am the office boss.”

I saw Mr. Goodwin; he’s an educated man; He’s a “highboy”—I could tell by looking at his “map.”

I must give him credit in these simple little terms:

He’s the guy that puts it over on the other lads.

I saw Mr. Minner, also of the Dittophon. Minner is a name that has meaning all of its own; He can tune you when you buy, you all agree to that.

But he is one (Miller) who has never trimmed a hat.

Next was Lenier Lovelace, the marvel of the age, Faster in the office than the boys they call the “pigeon.” Ninety minutes is his record is his record, and they all agree.

Don’t know where he’s going, but he knows he’s on his way.

My little tales’ nearly all over, all over, But there’s one man who’s a Rover. He walked the office all over, he’d be here as of yore. “Big Vision” Whitman, our president, I mean. He’s in the navy, and here he’s seldom seen. So he’ll come back to us once more.

At the start of the banquet a silent toast was drunk in the name of Edward D. Easton, former president of the company; F. K. Warburton, former vice-president, and Andrew Devere, former director.

A toast was also given in honor of L. e. Morton. Director D. Easton, a director of the company, who is now serving his country with credit “somewhere in France.”

Those Who Were Present

Among the managers who attended the con-

ference were the following: Westervelt Ter-

bune, Atlanta; W. S. Parks, Baltimore; Fred E. Mann, Boston; O. M. Kiess, Buffalo; C. F. Baer, Chicago; A. W. Ross, Cleveland; E. R. Erickson, Dallas; S. E. Lind, Detroit; Ben L. Brown, In-

diapolis; E. A. McMurray, Kansas City; W. F. Stitham, Los Angeles; W. L. Sprague, Minne-

apols; H. M. Blakelock, New Haven; W. F. Standke, New Orleans; Laubert Friedl, New York; J. A. Heath, Philadelphia; K. Mills, Pitts-

burgh; G. P. Donnelly, Portland, Me.; L. D. Heater, Portland, Me.; V. H. Jones, San Francisco; G. H. Williams, Seattle; I. W. Reid, St. Louis; James P. Bradt, Toronto, Ont., Can-

SITUATION IN THE TWIN CITIES

General Shortage of Stock Felt in That Section—Working Hard to Catch Up on Orders—Business Totals for Year Show Big Increase

St. Paul and Minneapolis, Minn., January 7—The talking machine business in the Twin Cities of St. Paul and Minneapolis is chugging along like an automobile full of gasoline. Before this season the dealers, both retail and whole-

sale, had all they could do to supply the ma-

chines, and after the holidays they had all they could do to supply records. This does not imply that no machines are being sold. On the contrary, the dealers still have considerable dif-

ficulty in supplying machines.

W. J. Dyer & Bros., the St. Paul jobbing house, has not yet caught up on orders and despite the best efforts of Mr. Dyer and George Mairs, head of the talking machine department, they are unable to ship certain styles of machines. Beck-

with O’Neill Co., the Victor jobbers in Minne-

apols, substantially relate the same story.

The situation is somewhat less restrained than it was two months ago, but the house is short of many popular styles. The record demand is some-

thing tremendous, and an extra force has been organized to fill the calls from every part of their territory.

Likewise the Edison business was at a feverish pace. President Laurence J. Lackner, of the Minneapolis Phonographe, the Edison jobber in this territory, reports that the volume of sales for December, 1917, equaled the grand total for the year 1913. Numerous new accounts were opened within the territory and the entire or-

ganization is riding at high tide, as there has been but little diminution in sales after the holi-

day season. There is still a shortage of goods in the more popular styles, but the want is be-

ing supplied rapidly and normal conditions soon will prevail.

The Columbia concern has had a remarkable record in this territory. Manager Sprague at present is in New York to reap the rewards of his success, in which are included a silver cup and many high praises. His record includes a 100 per cent. increase in December over the best previous December in this territory, a 100 per cent increase for the year 1917 over 1916, and the opening of scores of new accounts. In December alone he opened thirty-one new ac-

counts with substantial houses in South Dakota and introduced the Columbia machines in some of the best stores in the Twin Cities. Accord-

ing to all reports, he earned the silver cup and then some.

Minneapolis is making a new talking machine. It is called the Munosa and is financed by Min-

neapolis capital. It was advertised rather ex-

tensively during the holiday rush.

F. J. Pollettu, associated with the Columbia Co. for seven years, leaves the concern this week to enter a new line of business in Chicago.

In general it may be stated that the talking machine trade in the territory tributary to the Twin Cities is in a most satisfying condition. A holiday activity is observable in all the houses, whether wholesale or retail, and there is every indication that everything will be moving in good style for weeks to come.

GEORGE E. BRIGHTON A GUEST

George E. Brighton, president of the So-

nora Phonograph Corp., New York, was a guest

next Wednesday evening at the dinner of the first panel of the Sheriff’s Jury, held at Den-

munico’s. This dinner was attended by several hundred of the most prominent members of the industrial, financial and legal circles of New York City.

The Bliss Reproducer

Will Play All Records

A new superior and scientifically con-

structed sound box—no mica, rubber or cork used.

Beautiful full, rich tone quality, clear articulation. It individualizes each voice and instrument in the record. Greater volume with lighter needles, thus minimizing wear on records.

A demonstration of the Bliss reproducer means a sale—each one brings additional, for every music lover who hears the Bliss reproducer wants one.

Comparative tests solicited. Write today for dealer proposition.

WINNERS OF EDISON PATCHWORK ADVERTISEMENT CONTEST
Thos. A. Edison, Inc., announce decision in the Interesting Contest Inaugurated During Edison Week—First Prize of $1,000 Won by Earl Insley—Interesting Compilation

Owing to the enormous number of entries in the Edison Week Patchwork Advertisement Contest conducted by Thomas A. Edison, Inc., Orange, N. J., from October 20 to 27, 1917, inclusive, the announcement of winners has just been made. The sales and advertising forces at

narrowed the advertisements down to one hundred, which selections were narrowed for the final consideration of Edison officials. It was from this hundred that the winners were selected after many readings and re-readings by the officials charged with the responsibility of selecting the winners. The winners, who emerged in the persons of the following:

First prize, $1,000—Won by Earl Insley, Nanaet, N. Y. This prize-winning advertisement was made up of words, phrases and sentences clipped from text notices appearing in twenty-eight of the leading papers of the country, and was arranged in the most effective manner so to join the different sections as to make the strongest kind of endorsement of the Edison product and its reproduceable qualities and of the performance of the Edison artists.

Second prize, $500—Won by Edward Crede, 337 Fourth avenue, Pittsburgh, Pa.

Third prize, $250—Won by Miss Jane P. Kelly, 318 South Water street, Crawfordsville, Ind.

Fourth prize, $100—Won by Miss Leta Worral, 1034 West Seventeenth street, Des Moines, Iowa.

The Winning Edison Advertisement Prepared by Earl Insley

Orange had expected to make all readings of the advertisements from the preliminary to the final reading, but the quantity of advertisements was so far in excess of what had been anticipated that the task was beyond the capacity of even the extensive organization at the Edison laboratories. When it was realized that the force at Orange could not cope with the situation alone, it was decided to turn over to the senior class of the School of Journalism at Columbia University the preliminary readings. These readings

The Winning Edison Advertisement Prepared by Earl Insley

enthralled the winning advertisement. Insley's advertisement, which appeared on the same page as the winning advertisement, was the one that had been tagged by a slant.

STERLING Tone Quality

STERLING phonographs have been specially designed throughout for the true reproduction of the original music. Let us show you why the STERLING has "made good".

Every STERLING phonograph is equipped with our specially designed durable spring worm gear motor, playing five ten-inch records with one winding, a motor that is used regularly in machines retailing at $100. All models are equipped with our Universal Tone-Arm.

Your request for samples will have immediate attention. Write Today,

900—$13.50 in quantities
1700—$22.50 in quantities
London, England, E. C., January 3.—At this period with this harrowing war still proceeding, and the prospects of its end seemingly as remote as ever, it is not so easy to offer the usual New Year's greetings, or indulge in prognostications regarding business for the New Year. It goes without saying that manufacturers, factors and dealers are determined to make the gramophone business as live an issue during 1918 as it is possible with conditions as they are to-day. We enter the New Year with the peoples of the world at death's grip—battling to-day as never before in living history, to achieve a permanent peace, for enemy people as much as for the people of the allies. To that sentiment—to its early achievement—must we dedicate our thoughts and wishes on this, the opening of the New Year. Our New Year's wishes must be for an early triumph over the common enemy of mankind, at the same time registering a silent vow to act his or her best in a spirit of determination to "carry on" until to all men are secured those inalienable rights that are essential to civilization and to the world's progress.

To Soothe the Savage Breast

One is somehow reminded that music hath charms to soothe the savage breast, and though perhaps the connection is not too close, it is a relief to switch over one's mind from the all-absorbing horror of war to the charm and consolatation of good music. Its dissemination by means of gramophone records has brought untold comfort to thousands of sorely stricken and nerve-wrecked people, and it is not too much to say that this concentrated value of music is recognized, even officially, as a national tonic of incalculable worth. The gramophone trade can therefore justly regard its existence with a certain amount of pride, and "carry on" in the knowledge that as an industry it is in reality less a luxury than a national necessity, for by no other means is music to widely and usefully distributed. As the music channel of the masses, our trade is more justified in its existence than is the pianoforte, organ, sheet music, or other section. To my mind, it is too obvious for argument, and I have the satisfaction of knowing that in the circumstances of this painful war, not alone at home, but in the trenches, the first thing the soldier, sailor, or munition worker turns to for relief and nerve-soothing effect, is the glorious, the invincible, the gramaphone! It is a logical sequence, then, to find that the demand for machines and records is more insistent than ever. The instruments have to be rationed when possible, so as to secure as wide a distribution among dealers everywhere as is compatible with output. But when it comes to records—well, output is nothing short of gigantic. Manufacturers are working at high pressure all day, and night, and where labor is available. In like measure is the situation from the retail viewpoint, and altogether this season bids fair to create a wartime sales record.

Price of Needles Up—Reuse of Old Needles

The correspondence published in these columns the last few issues indicate the subject of utilizing waste steel needles by the simple method of repointing them, continues to meet with the support of the trade, and certainly has the favour of a degree of interest generally all of which is most encouraging. From recent inquiries and reports I am more than ever convinced that the scheme is a practical one. More important still, and this is becoming widely recognized, is the absolute necessity for immediate experiments along the lines suggested, in view of the war demands for all available supplies of all grades steel.

This fact brings to mind that the price of new needles is steadily on the increase. From time to time announcements are made by this or that firm to this effect, the most recent being an intimation from "His Master's Voice Co." increasing the retail price of their needles to eightpence per box of two 7/6 per thousand, subject to the usual trade discount. This in itself indicates, and indeed confirms more than anything else, the need for steel economy. Let us not try to bulk this solid fact; it has to be faced, and the sooner the better. Individually, a few members of the trade have shown sufficient foresight to plan ahead. They are making experiments with a view to discovering the best possible method for re-pointing old needles, and in one case at least re sharpened needles are actually on sale. I am not going to say that they are, ipso facto, as good as new, being slightly more scratchy, but I assert, after experiment, that these needles offer good results, and excellent prospects of complete success.

To my mind, it is a sufficiently important matter for an official trade investigation. I am not satisfied to leave the matter to individual effort; I want to see action taken by a committee expressly convened by the whole trade for that purpose. The faults of one experiment might easily be remedied by another, and this is considerably less difficult to achieve by co-ordinated effort than it is by uncontrolled individual attempts to solve the problem.

The secretary of the British music trade de

Great Britain:

FROM OUR LONDON HEADQUARTERS—(Continued from page 117)

fence committee has again been approached with a view to securing his cooperation and ad-
vice. By our next issue I shall hope to be in
a position to report progress in this direction, as
obviously the music trade committee is in the
best possible position to raise discussion on the
subject among its members with a view to
arranging the terms of reference upon which to
commence official investigation.

The First Resharpeners of Used Needles
Meanwhile, of especial interest is the sub-
joined letter from L. H. Mealey, of Seacombe,
who may justly pride himself upon being the
first to take up in a practicable way the question of
resharpening used needles:

"Dear Sir—I hope you will give me an opportunity of
explaining my process of sharpening gramophone needles.
During the summer months finding that it was almost im-
possible to obtain needles from factors, I decided to try
and sharpen used needles. My first attempt was with
foot power, and later I had a small electric motor in-
stalled. I obtained the correct grade of wheel for sharp-
en and had an automatic machine made by which it was possible to resharpen many thousand needles per hour. All
went well until I received my first order to sharpen 5,000.

Amongst these were about twenty different sizes and
shapes of needles, and I found that the automatic arrange-
ment would take one size of needle all right, but would not
take various sizes and shapes. I then had to resort to
hand tools, and although this process was slow at first, I
found that a little practice was all to the good. I am
now able to turn out a very good number of needles per
hour. I had window blinds printed, and also packets for
packing needles. Our window till which I exhibited
brought in 100 needles in the first fortnight, but we are
collecting now from shop customers alone in to average
5,000 needles a week.

On July 29 I wrote to Johnson Talking Machine Co., Ltd.,
Liverpool. They were delighted with the idea of resharpening
needles, and I have sharpened thousands for them since. I sup-
plied packets to two other Liverpool factors and several
dealers who made good use of them, and I also wrote to
J. E. Hough, Ltd., as well as to the Columbia Graphophone
Co., Ltd.

"I find there is no difficulty in collecting needles and
money in sharpening, and I think if factors and dealers will
only wake up to the fact that there is almost a famine in
needles, and start collecting used needles, they will find
that the present shortage can be got over.

"Personally I have not bought any new needles for
three months, and I have sold quite a few thousand to
factors and dealers. Yours faithfully L. H. MEALEY."
to take over the control until now. We, therefore, take this opportunity of thanking you for the consideration that you have given to the controller, the staff, and all those concerned with the manufacture and supply of the goods in connection with the orders that you have favored the controller with during the extremely difficult period that is now closing, and we look forward to the continuance of the friendly relations with perhaps a closer connection than has heretofore been possible, as we are desirous of serving you in the future to the fullest extent in our power. The Chairman of this company, and one of its founders, is Sir George Croydon Marks, M.P., well known for many years as chairman of the National Phonograph Co., Ltd., and of other companies in which T. A. Edison was interested, while H. M. Lemoine, formerly assistant manager of the National Phonograph Co., Ltd., and latterly manager of Associated Copyrights, Ltd., will be actively and personally concerned in the management of the company. The whole of the existing members of the staff and others engaged at the Hertford Works, also the recording experts, are being retained by the company. Yours faithfully, Geo. Croydon Marks, chairman.

Opening of Pathé Frères' English Factory

As announced in these columns several months back, the great Paris firm of Pathé had planned to open up on British soil a suitable record and machine factory for the purpose of insuring complete and prompt deliveries of their goods to the British trade. In pre-war days most of the Pathé goods were made in the great Paris factory. Difficulties of manufacture and transport were then unknown, but since the outbreak of war this increasing trouble in this respect has been experienced. I need not elaborate the reasons; they are all too obvious. It is sufficient to say that matters had reached such a pass during the last few months as to render the establishment of an output independent of Paris vitally necessary. Hence, with characteristic common sense, plans were prepared to the desired end. This in itself was a task of no mean magnitude, bearing in mind the official mobilization of industries, labor, idle factories, machinery, etc., all over the country. Nothing daunted, the company's British manager, A. G. Beckett, set about his task. District after district was scoured, most to no purpose from the results viewpoint, until at last his persistence and energy were rewarded by the discovery of a likely place at West Drayton, Middlesex, a few miles from the great "His Master's Voice" factories. Having come as near to the power that be, Mr. Beckett was next met with the difficulty of putting into effect the necessary alterations and improvements to the existing buildings. Rapid arrangements were too easily available for the purpose; labor and material were scarce; time was pressing. All things came to "them as wait," and it may be added, to "them as are determined," in due time the factory was ready for its new occupants.

Here then, at West Drayton, is established for the first time in the history of our trade, the foundation of a large and progressive French enterprise, which, it may be confidently predicted, is but the forerunner of a great expansion, to take effect as and when circumstances permit.

With these new facilities of quick output at their disposal Pathé are on the high road to a healthy output under which they operate commercially in the past, in relation to the prompt marketing of current music.

The situation of the factory for water power, rail and road transport could not be better, and as every such facility exists in close proximity thereto. An up-to-date record-pressing plant has been installed, and suitable arrangements made for machines, concert-box and other assembly shops. The present buildings occupy but a portion of the land available for new shops. This land will eventually be occupied, as circumstances will permit; new buildings, record and cabinet plant, etc. It only remains to heartily congratulate the Pathé people upon their excellent start this side of the channel.

First Records by Granados, the "Sussex" Victim

Jubilant with a special interest, therefore, are the record companies, which have been recorded specially by Sir Henry J. Wood and his orchestra for Columbia, the first two of which are announced this month. These are the "Villanesca" (or Rustic Dance) and the "Andantino quasi Allegretto." It was on his return voyage from New York, in 1916, where he had scored a huge success with these dances, that the great artist visited in German "Kultur" in the ill-fated "Sussex.

The Gramophone Trade Roll of Honor

Apprises the suggestion made in our last issue anent the above, I have received from the Columbia Graphophone Co. the following list of gallant gentlemen, formerly members of the Columbia Wandsworth factory staff, who have given their lives in the service of their king and country: Tom Woods, Sixteenth Middlesex; R. Nye, London Rifle Brigade; B. Robertson, W. E. Anderson, Buffs; Sidney Plumbridge, Rifle Brigade; James Malone, W. Yates, Oxford and Bucks Light Infantry; F. Doughty, Alnric Goodman, E. Surrey Regiment; Arthur Goodman, East Surrey Regiment; A. Gillman, Welsh Fusiliers; and T. Green.

The Attraction of "Guz and guz" Records

The Invicta Record Co. has just issued a most attractive supplement; it is full of good things, so good that it seems invincible to make a selection.

I was not surprised to hear that, despite almost overwhelming difficulties incidental to the critical time in which we now live and that business men have to face. In every direction, the export trade of this enterprising company steadily increases. The extraordinary foresight with which they appear to be gifted enables them to anticipate the popular demand in a way that can only be described as telepathic. We strongly advise our readers to get into touch with the Invicta Record Co., Ltd., by sending immediately a request for their complete catalog and latest supplements.

The Man of Many Parts

Such is the slogan adopted by W. H. Reynolds, Ltd., of City Road, London. Its immediate success has inspired competitors to imitation, the best possible compliment. What it means is that Reynolds' stock of machine parts and accessories, and not as multifarious in pre-war days, is nevertheless still amazingly big, circumstances considered. Practically every fine is cataloged, and a copy of this diverse and useful price-list may be obtained by any bona fide trades upon written application to the firm.

THE TALKING MACHINE WORLD

January 15, 1918

FROM OUR LONDON HEADQUARTERS—(Continued from page 118)
FROM OUR LONDON HEADQUARTERS—(Continued from page 119)

In addition to this side of the business, Mesers. Reynolds factor high-class disc records, and carries their own lines of machines, all of which are a specialty at the moment is the "Bijouphone," a compact portable model which wants a bit of beating. It is of remarkably sweet tone quality, is equipped with reliable motor and fittings, and has compartment room for about twelve records. A really wonderful instrument, is the general verdict.

Unmusical Warfare

Apropos the occasional complaints ventilated in the press by suburban sufferers on the abuse of gramophone playing, usually by a near neighbor, a highly amusing article recently appeared in the London Star newspaper, as a comment upon an advertisement in the Times. The article in question bears the startling caution: "Advertiser who is arming for record reprisals," and proceeds: "If you have one of those great three horse-power gramophones that your neighbors are tired of, here is a chance to dispose of it. An anguished advertiser in the Times is looking for a loud (second-hand) gramophone wanted for reprisals. No delicate-toned drawing-room instruments need apply. What the advertiser wants is a beastian-jungled, bellowing contraption, a six-cylinder machine with a range of about two miles. The sort of thing that Hammersmith people buy to amuse the folk of Kew. There ought to be brute doings when that gramophone comes home. Shortly after dawn this morning the enemy opened fire with their ten-inch records, 'Ipecacuanha,' 'They're Wearing Them Higher in Hawaii,' and 'Hicky-Wicky-Ya-Ka-Hoota.' Our twelve-inch batteries replied, and put in some effective foray into work with The Cellar Door by Moonlight, 'Drinking,' and the 'Soldiers' Chorus.' Reinforcements in the shape of a dust-jbin lid obligato were brought into action, and by breakfast time the enemy batteries were silenced, and the main door was heard to go for music, oil and records. Except for a few bricks and a summons the rest of the neighborhood has so far preserved its neutrality.

"It would be interesting to know in what suburb this harmonious warfare is being waged. House property ought to be cheap there in a day or two.

Thos. Edens Osborne Keeps It Up!

War or no war, the value of advertising does not diminish. Politically, there are many adverse elements to good business—existing in Ireland is the formation of the Sinn Fein. But it is possible that political outlook may be, never fail of their homage to good music. Hence, our Belfast friend, Mr. Osborne, keeps up his interesting editorial advertisements in the local press to good advantage. Business, I learn, is excellent, the demand being almost beyond the limits of supply. This is as it should be, and it is evident that no act of praise is due to Mr. Osborne for his consistent methods in the face of not altogether favorable conditions.

Grand Opera in English

A new article and sales field of endeavor has been opened up by the enterprise of His Master's Voice Co. During the last few years grand opera in English has become increasingly popular, and will be all the more appreciated by the music-loving public now that this company has embarked upon the issue of a large number of records carrying the best songs from most of the popular operas sung in English by the leading British operatic artists. The first list was issued in August, with additions during the succeeding months. The result from a sales point of view is eminently satisfactory, for, with succeeding monthly issues, the November returns have shown a sales advance of well over 1,000 per cent. compared to the August figures. Of course, the Gramophone Co. know how to do things in the way of smart advertising, but without depreciation of this expenditure, the enormous sales advance indicates of itself that there exists a rich and wide field for commercial cultivation. Dealers have been quick to recognize this by stocking up on these records to the fullest possible extent.

More Records Increased in Price

As foreseen in this department, other record manufacturers have followed the price increases opened up by the enterprise of the companies. The further price changes in question apply to "The Popular" series of records, which are now up to 1/8, the "Clarion" disc, now 2½—, the "Clarion" cylinder record to 1/3, and the "Bull-dog" record to 1/8. With the exception of the "Clarion" ten-inch double disc, the price increases are very small, but it is sufficient to confirm that which I have all along maintained—the absolute necessity for higher charges in view of the rapid advance of all manufacturing, carriage, labor and other costs.

Some H. M. V. Statistics

The latest issue of "The Voice" to hand contains many interesting tips, of value to all dealers, apart from other pithy items pertinent to "His Master's Voice" service. Of the latter, subjoined are a few instances. A little lubricating oil goes a long way, and yet the company use a factory in less than twelve thousand gallons per year, in addition to two hundred thousand gallons of cutting and cooling solution for automatic machines.

To give some idea of the extent of the H. M. V. works it may be mentioned that the length of leather belting used to drive the machinery—"if put end to end, would measure close upon fifteen miles."

The machine factory is a building of six floors, having a total floor area of 140,000 square feet. This is stated to be only about one-quarter of the ultimate buildings it is expected will be erected at some future date. The window area of this building is as much as 42,000 square feet, so that it is obvious the maximum of natural light is secured.

Another little item tells us of the great interest the war staff takes in doing its little bit towards the provision of solace for the troops. The collection box is sent round weekly, and so well it is supported that since June, 1915, a grand total of 750,000 cigarettes and 500 pounds of tobacco has been sent to men on active service.

Lauder's £1,000,000 Scheme for Disabled Soldiers

If it comes to pass that the war disabled soldiers are found selling matches or bootlaces at street corners, then I wish to God that my son had not laid down his life for his country." Such were the moving words addressed by Harry Lauder to a great audience at the St. Andrew's Hall, Glasgow, in his appeal for £1,000,000 to be devoted to keeping in comfort disabled Scottish soldiers and sailors. To aid this scheme the Gramophone Co. have published a record by Mr. Lauder, one side of which carries his appeal, and the other his famous song, "Shoulder to Shoulder." A proportion of the profits from the sale of this record will benefit the fund, and this generous action on the part of the company will doubtless interest all dealers with the desire to support the firm's forward their best efforts in the sale of the record. In addition to this dealers might well co-operate in assisting Harry Lauder to collect a large as possible, not only to swell the gramophone trade contribution, but to secure the required total as speedily as possible. We have no doubt that the Gramophone Co., who, it is said, are co-operating in a scheme to collect £1,000,000 in aid of the war effort, would willingly acknowledge on behalf of the organizers any contributions their dealers and other members of the trade might feel disposed to make.

New Record Issues of the Winner Co.

A champion list of records is that issued recently by the Winner Co. The titles itemized make a wide appeal by reason of their diversity. They are entirely in keeping with the high character of the previous list which includes records of Captain Bruce Bainsfather's successful musical production, "The Better "Ole," the "Bicycle Race," the "Lassie," and "The Winner." The list includes many of the well-known songs as well as several new ones, and will be found to appeal to all tastes. The list includes songs from the two popular revues, "The Punjabi Co." and "The Woman of the Year." The handsome fifty-page leaflet, No. 91, introduced by the company last month includes all records issued up to and including last October, and should be in the hands of every member of the trade.

Customer. WANTED: Please write

third

FULTON TALKING MACHINE CO.
640 BROADWAY
NEW YORK CITY

POSITION WANTED—Wanted

RECORD EXPERT with fifteen years' expe-

ence wants position as RECORDING—LAB-

SITUATION WANTED—Middle-aged man with fifteen years' experience in phonograph business. Well connected, & able to build and up trade, enthusiastic and convincing. Highest references from headquarters. Address "Box 48S," care The Talking Machine World, 373 Fourth Ave., New York.

MANAGER of VICTROLA DEPART-

MENT—Doing one hundred thousand dollars, desires a change January 1 or thereabouts. The vicinity of New York City preferred. Age 27, salary $3,000. Further particulars by letter. Address "Box 479," care The Talking Machine World, 373 Fourth Ave., New York.

WANTED—By expert mechanic with thorough

knowledge of motors, assembling, cabinets and inspec-

SALESMAN—Calling on talking machine and phonodeiphone dealers. Must have a knowledge of phonographs, phonodeiphones and phonograph records. Provisional order. Address "Box 484," care The Talking Machine World, 373 Fourth Ave., New York.

WANTED—Experienced salesman in the talking machine and phonograph trade having a slight knowledge of phonographs, phonodeiphones and phonograph records. Must be able to get orders, etc., and a general knowledge as a collector. Must be an experienced collector. Address a letter to the same, 264 C. M.

WANTED—Experienced salesmen in the talking machine and phonograph trade having a slight knowledge of phonographs, phonodeiphones and phonograph records. Must be able to get orders, etc., and a general knowledge as a collector. Must be an experienced collector. Address a letter to the same, 264 C. M.

For Sale—A talking machine business in a city of over 200,000. Established three years, building up every month. Victor contract. Will take from $15,000 to $20,000. Terms would be paid. Address "Box 479," care The Talking Machine World, 373 Fourth Ave., New York.

FOR SALE

SPOT CASH PAID—WANTED

Any amount of records in all languages, Talking Machines. New, No. 54.00, associate parts of all makes. Address Phonograph and Record Exchange, 204 Third Ave., New York Telephone 2484 Harlem.

STEEL NEEDLES

Loud type, 300 in envelope. A few million to choose from. Per thousand at $25.00, in hundred-thousand lots. Barongs in millions.

INSTALL COLUMBIA DISPLAY IN LOBBY OF HAVANA THEATRE

The Frank G. Robbins Co., Columbia Representatives in Havana, Cuba, Now Carrying Complete Line of Grafonolas on Display in the Lobby of the National Theatre of Cuba.

The Columbia Graphophone Co., New York, was recently advised by its representatives in Havana, Cuba, the Frank G. Robbins Co., that they had leased the lobby of the National Theatre of Cuba and in that famous and magnificent opera house will carry a complete line of Columbia product. The significance of this location may be gleaned from the illustrations herewith, for the space occupied by the Frank G. Robbins Co. in the lobby of the National Theatre of Cuba constitutes one of the finest and most artistic talking machine establishments in the world.

AMERICAN GRAPHPHONE CO. PLANS

Arrangements have been made by the American Graphophone Co. for a plan of reorganization and exchange of stock, and a circular signed by President Francis H. Whitten, outlining the details of the plan, has just been mailed to the stockholders. It involves the incorporation of a new company, the Columbia Graphophone Manufacturing Co. of Delaware, to succeed the present American Graphophone Co. of West Virginia, and stockholders are asked to exchange their present holdings for shares in the new company. The present company has outstanding $2,500,000 non-cumulative preferred and $7,500,000 common stock, both of $100 par value. The new company is to have $15,000,000 7 per cent. cumulative preferred, of $100 par, and 500,000 shares of common stock without par value. This capitalization is considered sufficient to meet the financial needs of the business for some years.

Stockholders are offered four options under which they may exchange their holdings, the options expiring on May 1 next, with the provision that President Francis S. Whitten may terminate it any time between February 1 and May 1, 1918.

NEW HOFFAY CATALOG ISSUED

The Hoffay Talking Machine Co., Inc., recently issued a new catalog which is intended, among other things, to be a source of information to the dealers and salesmen of Hoffay instruments. All the patented features of the Hoffay talking machine are described minutely and are accompanied by illustrations showing the parts from several angles. The Hoffay "Artight" sound box and the "Resurrection" diaphragm are shown to particularly good advantage, and the qualities of these parts are minutely described. The several models of the Hoffay machines are shown and the new retail prices accompany the illustrations. The book is artistic from every standpoint.

CHANGE NAME OF BRANCH

The Columbia Graphophone Co., New York, announced recently that the name of its Philadelphia branch had been changed from the Pennsylvania Talking Machine Co. to the Columbia Graphophone Co. This branch, which handles the Columbia products exclusively at wholesale, is under the management of A. J. Heath, and is one of the branches in the territory of W. C. Fukhi, district manager.

The holder of 100 shares of preferred can exchange his stock for 100 shares of preferred and 25 shares of common of the new company; or he can exchange it for 150 shares of new common. If the holder wishes to divide his option he can get 50 shares of new preferred for 50 old preferred and 6½ shares of new common for the other 50 shares of preferred. The holder of 100 shares of common stock can take 100 shares of new preferred and 20 shares of new common, or he can take 105 shares of new common in exchange. If he desires to divide his option he can use 50 shares for a like amount of new preferred and the other 50 shares can be exchanged for 65½ shares of new common.

There will be considerable of the capitalization of the new company remaining after the exchange is completed and this stock will be kept for future needs. The change of the name from the American Graphophone Co. to the Columbia Graphophone Manufacturing Co. is for the purpose of associating the name of the company with the name of its product—the Columbia Graphophone.

It is asserted that the business increased considerably this year and sales for the eleven months, both in America and Europe, were between 25 and 30 per cent. ahead of the same period of 1916. Each month's sales last year showed an appreciable increase over the same month of 1916.

This invention relates to phonographs and has for its primary object to provide an improved construction, combination and arrangement of parts in an instrument of this character whereby a plurality of disc records can be played therein in succession without the intervention of an operator. One of the objects of the present invention is to provide improved means which will automatically remove a record from the turntable of the phonograph as soon as such record has been completed and replace it with the next record in order. A subsidiary object of the invention is to provide record holders of improved construction which are adapted to automatically start the reproducing needle at the beginning of the records and control the removal of said records from the turntable.

Figure 1 is a plan view of a phonograph constructed in accordance with the principles of the invention; Fig. 2 is a side elevation of the same; Fig. 3 is a side elevation at right angles to Fig. 2, parts being removed and parts shown in section; Fig. 4 is a sectional view of one of the record holders; Fig. 5 is a detail section on the line V—V, Fig. 1; Fig. 6 is a detail section on the line VI—VI, Fig. 1; Fig. 7 is a fragmentary detail in elevation; Fig. 8 is a fragmentary detail on an enlarged scale.

Phonograph.—Lewis Cole, Chicago, III., assignor to the Talk-Sing Co., same place. Patent No. 1,244,588.

This invention relates to phonographs suitably arranged for use in toys and other devices, such as cigar cutters, clocks, dolls, savings banks, etc.

The objects of the invention are to provide simplified and improved means for starting, stopping and governing the speed of devices of this class, to provide improved means for automatically disengaging the stylus at the end of operations of the device and restoring the stylus carrying arm to its initial position, ready to repeat operations and to provide improved means for causing the stylus to resiliently engage a record.

Figure 1 is a front elevation of a phonograph constructed according to this invention. Fig. 2 is a rear view. Fig. 3 is a left side view. Fig. 4 is a right side view. Fig. 5 is a plan view. Fig. 6 is a sectional elevation taken on the top of the device in Fig. 2. Fig. 7 is a sectional elevation of the device in Fig. 3.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

This invention relates to a device of this character which will constitute an attractive top.

The invention has as a further object to provide a toy phonograph designed for attachment to a wall or other support and which may be easily mounted in position to be operated. And the invention has as a still further object to provide an improved and simple means for manually operating the phonograph.

Figure 1 is a side elevation of the improved phonograph showing the manner in which the device may be connected to a wall or other support and particularly illustrating the mechanism employed for manually rotating the record carriage of the phonograph. Fig. 2 is a top plan view of the device with the sound box removed, and Fig. 3 is a fragmentary perspective view showing a slightly modified form of operating mechanism for the device.

The purpose of this invention is to combine in a single casing a phonograph mechanism and a player-piano mechanism, and to arrange for driving the phonograph from the same motor which drives the take-up roll of the player mechanism. The invention consists in the features and elements of construction contributing to this result and their combinations described and shown in the drawings: Figure 1 is a perspective view of a player-piano having a phonograph mechanism embodied in its casing in accordance with this invention. Fig. 2 is a plan sectional view of most of the drive gearing for the take-up roll and the phonograph. Fig. 3 is a detail elevation of certain portions of the drive gearing shown in Fig. 2. Fig. 4 is a detail elevation of a gear shifting device. Fig. 5 is a detail view of a clutch shifting device for the take-up roll. Fig. 6 is a diagrammatic view of the pneumatic connections between the trackboard and certain pneumatics adapted for automatic control of the two mechanisms. Fig. 7 is a detail view of a disengagable connection in a tempo-controlling means. Fig. 8 is a detail elevation of speed-varying means for the rotary control of the phonograph. Fig. 9 is a detail sectional view showing a manually operable winding gear for the motor. Fig. 10 is a detail section of a sound-controlling curtain for the phonograph amplifier. Fig. 11 is a front detail elevation of a spring motor for driving the mechanism associated with this invention. Fig. 12 is a diagrammatic side elevation of certain gear trains of the motor shown in Fig. 11. Fig. 13 is a detail of the motor brake. Fig. 14 is a detail view of the speed-controlling cam for actuating the brake and the reversing train.

The main objects of this invention are to provide an improved talking machine including a cabinet, sound reproducing means including a comparatively large vibratory diaphragm inclosed in the cabinet, and sound amplifying means inclosed in the cabinet and arranged to co-operate directly with the diaphragm; to provide improved means for supporting a diaphragm in position to cooperate with a sound record; to provide improved means for supporting and rotating a sound record in co-operation with sound reproducing means; to provide improved means for holding a rotary record support against rotation; to provide improved sound reproducing means and other improvements. In the drawings herewith Figure 1 is a fragmentary top plan view of a talking machine constructed in accordance with this invention; (Continued on page 124)
In the drawing: Figure 1 is a front view of the stylus and the side view of the line 2—2 of Fig. 1. Fig. 3 is a partial rear view. Fig. 4 is a section on the line 4—4 of Fig. 3. Fig. 5 is a perspective view showing the bottom of the stylus bar. Fig. 6 is a similar view of one of the supporting pins for the stylus and a section of one of the mounting brackets for the bar. Fig. 8 is a perspective view of one end of the fulcrum of the stylus bar looking from above, and Fig. 9 is a partial edge view of the reproducer.

This invention relates to devices whereby the talking machine may be adapted to play records of the laterally undulating type or records of the "all and date" type. This consists primarily in the tone arm of the usual construction having at its free extremity a peculiarly shaped connection to which the sound box may be attached and by which the sound box may be shifted from a position in which a diaphragm lies in the vertical plane to a position in which the plane of the diaphragm will be at an angle of about 50 degrees to the plane of the record and this without removing the sound box in any way or changing the radial distance between the center of the tone arm pivot and the point of the needle.

In the patent to Cutacchi No. 1,156,130, dated October 12, 1915, an adapter is disclosed which is designed as an attachment for one of the well-known talking machines now on the market that when in use records of the "hill and dale" type may be played, or by removing the adapter and fastening the sound box to the tone arm of the usual and undulating type may be played. In the present invention none of the parts are removed, and it is only necessary to swing the sound box from one position to the other and vice versa to play all styles of records now on the market.

Figure 1 is a side elevation of the improvement with a well-known sound box attached thereto and so much of a tone arm as is necessary to illustrate the invention arranged to reproduce records of the "hill and dale" type. Fig. 2 is a sectional view of the sound box arrangement to play records of the laterally undulating type. Fig. 3 is a plan view of the sound box. Fig. 5 is a fractional view partly in section of the improvement. Fig. 6 is a cross section of line 6—6 of Fig. 5. Fig. 7 is a cross section of line 7—7 of Fig. 4. Fig. 8 is a plan view of the sound box in such connection. Fig. 9 is a side elevation of said sound box showing one of its flattened sides.

Another object is to provide improved means for embodying a joint, whereby the sound box is adapted to the adaptation and improved means whereby any wear on the parts of the joints may be readily taken up and the joint maintained tight.

In the drawings: Figure 1 is a side elevation of a portion of the tone arm and sound box embodying this invention in one of its forms. Fig. 2 is a section with respect to the inter-tescooping and swiveled members. Fig. 3 is a detail side elevation showing the two parts at the different adjacent surfaces and the box. Fig. 4 is a side elevation of the improved form, the parts being broken away and shown in axial section. Fig. 5 is a detail section at the line 5—5 on Fig. 4. Fig. 6 is a detail section at the line 6—6 on Fig. 4. Fig. 7 is a view similar to Fig. 3, showing a modified form.

This invention relates to improvements in double-disc records for sound producing machines, the object of the invention being to produce a record which will carry a greater number of impression lines to a given diameter than the discs now commonly used.

A further aim of the invention is to so construct the record that it will allow of a better reproduction especially as the needle of the sound producing machine moves toward the center of the record.

The invention embodies a record formed in two layers with a sound box adapted from the outer edges of the valleys between the waves to the inner edges thereof so that as the needle travels toward the center of the record it will move on a slight inclination upward, causing it to maintain a slight frictional action which will greatly increase the efficiency of the sound reproduced. Also in the records the impression lines are relatively longer than they would be on flat surface, and hence a greater number can be placed on a record of a given diameter than on the now commonly used flat records.

In the drawings similar characters of reference indicate corresponding parts in the several views.

$3,000,000,000 TRADE BALANCE

Figures Show Economic Resources of U. S. to Wage Winning War

WASHINGTON, D. C., January 2.—America's exports were estimated to-day at the Department of Commerce to have passed the $6,000,000,000 mark in 1917, a new high record. Imports were below $3,000,000,000, and the trade balance in favor of the United States probably will be more than $3,100,000,000, when final returns are computed.

The country's gold supply showed less increase than last year because of the substitution of credits for cash in handling allied purchases after the United States entered the war. Imports of gold in March amounted to $339,000,000, but in November were less than $3,000,000. The total for the year was estimated at $537,000,000, compared with $606,000,000 in 1916.

Exports of gold showed a heavy increase over the preceding twelve months, due chiefly to the large movement to Japan, Spain and South American countries. The total was estimated at $734,000,000, compared with $155,000,000 last year.

The trade balance of more than $3,000,000,000 with the country at war was regarded by officials as the best evidence that this country has the economic resources necessary to defeat Germany.

A NEW INCORPORATION

The Automobile Record Container Co. has been incorporated under the laws of the State of Delaware for the purpose of manufacturing talking machines and record containers. The object of the incorporation is the concern is $50,000, the incorporators being Frank P. Read, of Chicago, II.; Fred M. Sargent, of Evanston, III., and Harry G. Chamberlain, of Glencoe, II.

THE INSTRUMENT OF QUALITY

Sonora

CLEAR AS A BELL

LAST year Sonora’s sales were over one hundred times what they were four years ago.

Only a phonograph of extraordinary excellence, you realize, could make such a phenomenal record. Sonora dealers make money.

Sonora’s big sales are the result of Sonora’s exceptional merit, Sonora’s liberal, progressive selling policy, and Sonora’s original, forceful advertising. Now—(not six months from now when you may be troubled because of delayed deliveries owing to the filling of previous orders of more foresighted dealers)—now—investigate the remarkable opportunities which are offered to you through the sale of this superb instrument which, point for point, is unequalled.

At the Panama-Pacific Exposition Sonora won highest score for tone quality

IMPORTANT CHANGE IN TACOMA
Shaw Supply Co. Takes Over the Eillers Talking Machine Co. and Now Handles Three Leading Lines of Machines and Records

TACOMA, Wash., February 1 — John Ramaker, manager of the phonograph supply department of the Shaw Supply Co., 1015 Pacific avenue, announces that his company has taken over the Eillers Talking Machine Co.

“We have been handling the Edison and Columbia machines,” said Mr. Ramaker, “and with the addition of this stock we will be carrying the three standard makes of talking machines. We are enlarging our space to accommodate our new stock and will have three new record rooms, making a total of eight record rooms.”

Mr. Ramaker also announced that with the addition of stock the Shaw Supply Co. will introduce a novelty into Tacoma in the form of daily talking machine recitals. The artistically and comfortably furnished record room at the front of the Shaw Supply Co. will be used for these recitals, which will be given daily from 10 a.m. until 5 p.m.

“When I was East recently,” said Mr. Ramaker, “I was told that a number of daily record recitals in various music houses were very successful. Some of the houses even served tea during the afternoon. Women downtown shopping would drop in and listen to the music for a few minutes. We will commence these recitals at once and invite all Tacomaans to attend.”

W. M. RANDOLPH WITH B. H. ROTH
Takes Charge of Victrola and Sporting Goods Departments in Big Stores in West New York, N. J.—Hopes to Increase Business

William M. Randolph, formerly connected with Landay Bros., New York, is now associated with B. H. Roth, of West New York, N. J., one of the largest exclusive Victrola dealers in Hudson County. Mr. Roth has enlarged his parlors and taken the two adjoining stores, adding large and separate sporting-goods and toy departments. Mr. Randolph will have full charge of the Victor and sporting goods departments and expects to increase the business daily. The sporting goods line is new to Mr. Randolph, for he was formerly buyer of sporting goods for a large New York house. He also has had wide experience in the talking-machine field.

TALKING MACHINES FOR HAITIANS
Natives of West Indian Island Show Strong Desire for American Products

Since the occupation of Haiti by the United States there is said to have developed throughout the island a strong demand for merchandise made in this country, says the New York Times. The development of this demand is a number of orders for low and medium priced phonographs which exporters in this city have received during the last few weeks from Haitian importers to replace goods formerly obtained in Europe. Some of the higher-priced machines have also been sought, though in more or less limited quantities. The South American trade in American phonographs seems to be continuing strong in spite of high freight rates and the difficulties of transportation.

The advertising of your store is a reflection of its personality! You are as much a part of the store’s advertisement as the printed daily store news! You are part of the “inside adv.” the daily paper and auxiliaries represents the “cover and trimmings”

GALLI-CURCI SCORES IN NEW YORK
Noted Victor Artist Heard with Chicago Grand Opera Co. in New York—Her Remarkable Career—Puts Royalties Into Liberty Bonds

One of the stars who are making history with the Chicago Opera Company, which has attracted large audiences at the Lexington avenue Opera House, New York, the past few weeks, is Amelia Galli-Curci. This distinguished soprano was not entirely unknown, either here or in the West, for her voice, through the Victor records, has long been appreciated. Naturally, therefore, the desire to hear this artist was strong, and there was much uneasiness when it was rumored that owing to a needed rest she would not be able to sing in this city, but this newest of prima donas, unknown in this country a year and a half ago, appeared in New York and conquered. As a matter of fact she swept musical New York off its feet.

Mme. Galli-Curci’s career is an interesting one, and it appears that she has never had a singing lesson in her life, that as a girl she heard all the operas at La Scala; that Maseagni, her piano teacher (she was a professional pianist before she became a singer), told her singers were born, not made; and, having found she was so born, she had taught herself. And never would she let any one, not even her husband, hear her practice (if practice is the right word for what coloratura sopranos do when in training).

She locked all the doors, she said, and made her piano her only intimate.

The Italian soprano confesses that in an incredibly short time she has collected royalties from 80,000 talking machine records and put those money into Liberty Bonds—practical and patriotic, isn’t it? Mme. Galli-Curci and her painter husband, Luigi Curci, who is a marquis but doesn’t mention it, who are “at home” at 27 West Sixty-seventh street, have expressed themselves as delighted with New York and its people.

Next spring Mme. Galli-Curci expects to visit California. One fact stands forth, that no matter where she goes her voice and her ability will be known in advance by reason of her Victor records. Will the greatest aid to public appreciation existing to-day.

INTERESTING THE CHILDREN
The children of to-day are the men and women of to-morrow. Build for the future of your store by cultivating the children to-day. Impressions are easily made. It will not be hard for a talking machine dealer to win their friendship, he has such a fascinating line to interest and entertain them. And they’ll not forsake you later, when they grow up.

AFTER MISLEADING ADVERTISERS
Talking Machine Trade Should Be Interested in Efforts of Music Industries—Better Business Bureau to Protect Legitimate Business

The Music Industries Better Business Bureau, which has headquarters at 432 Broadway, Milwaukee, Wis., with C. L. Dennis as secretary, is doing good work in the elimination of advertising of musical instruments in various sections of the country.

As has been stated before in The World, the bureau makes a monthly report of the activities and the report for December recently issued is particularly interesting. Although the bureau was organized under the direction of the National Association of Piano Merchants, Secretary Dennis has also directed his attention to advertising of all types of musical instruments, including talking machines. Among the cases handled by the bureau during December were two in Chicago, Ill., both concerning the advertising of talking machines in a misleading manner.

One dealer used the name of a prominent machine as the basis for selling his own instruments, and the other made most extravagant statements regarding the capacity of his talking machine to reproduce his machine and the profits that could be made by selling them. In the first case several papers were persuaded to refuse the advertisement, and similar action is expected in the second instance.

Talking machine dealers throughout the country who are suffering at the hands of unscrupulous advertisers and “cut-price” manufacturers would do well to acquaint the Better Business Bureau with the facts.

PRICE CUTTING A MENACE
Damaging to the Manufacturer and Inimical to the Public Welfare—Points Worth Considering

Price cutting is not only damaging to the manufacturer but also inimical to public welfare. Careful buyers do not care to deal with the price-cutter. They rightly question his good faith, suspect he has a different price for different buyers, and are convinced that when he loses on a standard article this sacrifice is made up on other articles. The person who never buys unless he can get a bargain, the haggler over the price of the advocate of the theory that the public is a large New York store.

Fixed prices have stabilized business and given a fair field to the small dealer, who is hardest hit by the price-cutting practice. We are glad, therefore, remarks Leslie’s Weekly, that one of the leading makers of an advertised commodity has determined to fight in the courts the Government indictment that the company’s refusal to sell its products to dealers who persistently cut prices is in violation of the Sherman law. We agree with Mr. Sidney Colgate that a “great ethical principle ever has been involved that affects vitally the entire manufacturing industry, that every manufacturer has “the moral and legal right to protect his good will and his good name.”

HOW JARDINE IS “DOING HIS BIT”
A. E. Jardine, who conducts the Sonora Phonograph Agency at 711 Boardwalk, Atlantic City, N. J., has just lost his last engagement on the West coast, in the person of Fairfax A. Jones, who has joined the Aviation Service. Last April Mr. Jardine’s son, who was acting as sales manager of this establishment, joined the Naval Service, and is now a commissioned officer on the U. S. S. “Wisconsin” somewhere at sea. Meanwhile, Mr. Jardine is not only loyally contributing to the forces of Uncle Sam on land and sea, but he is “doing business as usual,” and thus helping to stabilize industrial conditions.
Why the Salesman Who Oversells His Customer Is Not Exercising Good Business Judgment

The average talking machine salesman if he can induce the prospective purchaser of a $50 machine to take one worth three or four times as much feels that he has done a good piece of work, that he has justified the term salesman as applied to himself and is looking out for the interests of his house. In a great many cases the salesman is right, but there are some cases where to induce a customer to invest several times the amount originally intended shows bad business judgment, and may lead to embarrassment later.

It frequently happens that a man feels that he has $50 or $60 to spend for a talking machine and starts out to buy one at that price, with the intention of paying cash for it. He is also prepared to buy a few records, and with his machine payment out of the way at one time may be expected to keep on buying records, possibly in small quantities, at regular intervals.

If the salesman gets hold of such a man and persuades him to invest in a $150 instrument, for instance, the customer, finding that he cannot pay in cash, grabs eagerly at the regular terms of the house which may be as low as $10 down and $10 a month. The result is that fourteen months are taken in paying off the obligation, the house has to wait for its money and the customer, meeting his payment every month, has little left to buy records, and the whole deal is indeed most unsatisfactory to both parties. If this same man had been permitted to buy his $50 machine and a few records each month, the total sales during the fourteen months would have approximately equalized in amount the price of the $150 machine and the few records bought with it. Meanwhile, the dealer would have had the use of the cash he received from the customer.

There are, of course, many instances, on the other hand, where people inquire about cheaper models who could well afford the more expensive styles. The salesman owes it to himself to be able to judge in some manner the customer's buying power and govern himself accordingly. The salesman who oversells the customer, however, is not only placing on his customer a burden he should not bear, but is adding to the dealer's troubles, by giving him a new account to fret over, for the customer who has not contracted to pay more than he really feels he can afford to pay is going to be slow in meeting his obligations, and will keep the collection department hastening to see that the payments are met.

In closing any kind of a sale, too, the salesman would do well to look at the cash side, and to endeavor to close on that basis if possible. There are too many salesmen who at the first sign of hesitancy on the part of their customer immediately emphasize the point that the machine can be bought on very low terms. In other words, they place all their cards on the table at once. It is just as easy to concentrate on the sale of the machine first and talk for cash. They forget that if the customer really wants the records and does not feel like paying for them at the time, he will most likely come back and get them a little later, and that if he once finds out that his record purchases may be added to his account without argument, he will be inclined to overstep the bounds and keep his account on the books for an indefinite period. Credit is a mighty valuable thing, whether it is individual credit or business credit, and it should not be handled carelessly.

It is cash business that helps men to pay the rent and discount bills, and the salesman who leaves it to the customer to ask for credit and to suggest terms will find that his volume of cash business will show a most satisfactory increase.

MISS MORRISEY'S 35,000-MILE TOUR

Popular Young Contralto Gave 74 Concerts on Recent Tour—Visited Many Military Camps

Miss Marie Morrisey, contralto, the brilliant young Edison artist, who is recognized as one of the foremost concert singers of the day, is a true American artistically as well as patriotically. Her programs show her loyalty to American composers, and she featured American songs in a recent record-breaking three-months' tour on which she traveled 35,000 miles and gave seventy-four concerts—ten of the concerts just "doing her bit" singing for the soldiers in the camps.

"Just a-Wearing for You" and "Last Night When You Said Good-bye," well known to Diamond Disc owners, and "Happy Days," which is soon to be recorded, found a much-encorded place on her program.

"American audiences love American songs," declared Miss Morrisey the other day, "and they are going to have a chance to hear many of them. One good effect of the war will be that the country is not lacking in composers, but heretofore there has been rather listless encouragement for them, and very little opportunity to be heard. Now, with many foreign composers left off our programs, there is a great cry for American composers, musicians of great talent, who have been patiently waiting, and who successfully are answering the cry."

SINCERITY

AN IMPORTANT ACCESSORY—ALBUMS FOR FILING DISC RECORDS

The enormous demand for "National" Record Albums keeps pace with the ever increasing demand for machines and records, and our output capacity has been enlarged to meet the greater needed supply. Record Albums have proven themselves to be the best and most convenient, as well as economic, method of filing and keeping disc records.

THE PULLING TEST—THE STRENGTH IS THERE

STRENGTH AT THE STRESS AND STRAIN POINT  PRACTICALLY UNBREAKABLE FOR REGULAR USAGE

Albums are an Indispensable Requisite in the talking machine business and wherever records are sold. An accessory that is necessary and worth while. Practical and handy. Save time and records. A profitable adjunct to the business. All owners of machines and records want Albums to file and preserve their records.

We manufacture disc Record Albums containing 12 pockets to fit cabinets of all sizes and styles. We also make Albums containing 17 pockets. With the indexes they are a complete system for filing all disc records.

For durability, finish and artistic design, our Albums are unsurpassed. We have unequaled manufacturing facilities, and considering quality our prices are the lowest. Write us giving quantity you may desire, and we will quote prices.

OUR ALBUMS ARE MADE TO CONTAIN VICTOR, COLUMBIA, EDISON, PATHÉ, AND ALL OTHER DISC RECORDS

NATIONAL PUBLISHING CO., 239 S. American Street, PHILADELPHIA, PA.

CHANGING WINDOW DISPLAYS PAY

Butler’s Music House, Marion, Ind. Believes in This Policy—Patriotic Records Featured

Marion, Ind., February 8—Despite the severe winter weather and the abundance of snow that kept many people off the streets, Butler’s Music House of this city, of which Edwin Butler is the head, followed its usual practice of changing the window display each week, and even under the most unfavorable weather conditions the efforts put into this work were more than repaid by the sales registered.

The company has been paying particular attention to featuring patriotic records, and the accompanying illustration shows one of their recent windows devoted to that purpose. As will be seen, the Victor French Course for Soldiers, embodied in three records, is strongly advertised in the center of the display, while on the right appears the company’s service flag with its five stars. The background for the display consisted of large-sized flags of our Allies with the Stars and Stripes in the center. Opportunity was also found for showing the popular models of the Victrola and the Edison Diamond Disc phonograph, for the company handles both lines. The display of records about the floor served to facilitate the making of selections by those who stopped to look.

That the entire display was effective was proved by the increased volume of record sales.

DEATH OF BENJON M. HARGER

Harger & Blish, Inc., Des Moines, Ia., have sent out memorial cards announcing the death of Benton Merritt Harger, president of that corporation, who died recently at his home in Hollywood, Calif., where he had resided for some years past. Mr. Harger had not been prominent in the trade of late years, merely retaining a financial interest in the corporation which bears his name. Following the death of his wife two months ago, Mr. Harger suffered an epileptic stroke from which he rallied, but a second stroke proved fatal. Mr. Harger was born in Syracuse, N. Y., April 12, 1839, and during his long, active life had been one of the foremost citizens of Dubuque.

The man who attracts attention is the man who is thinking all the time, and expressing himself in little ways. It is not the man who tries to dazzle his employer by doing the theatrical and spectacular.

MAKE BIG RECORD IN SMALL CITY

Huntley-Stockton-Hill Co., Greensboro, N. C., Sell 178 Edison Phonographs in a Six Weeks' Holiday Drive—Good Team Work

The Huntley-Stockton-Hill Co., of Greensboro, N. C., who handle the Edison line of phonographs and records, report an unusually active demand for those goods, a demand stimulated considerably by the energetic efforts of the company’s staff.

During the six weeks’ holiday drive, ending January 1, the company disposed of 178 machines as a result of competition developed by two selling teams.

In a letter to C. B. Haynes & Co., Edison jobbers, of Richmond, Va., the company says regarding its holiday drive:

"On about the 17th of November we divided our sales force into two teams and told them that the team that sold the most machines would receive a fine dinner and twenty-five dollars ($25.00) in gold. There were only three or four machines sold until the first of December, when they began to get busy, and by the first of January one team had sold eighty-seven and the other ninety-one, making a total of one hundred and seventy-eight machines, which we feel is a very good showing for a town of this size, and also taking into consideration that we have only had the Edison line for a little over one and one-half years.

"We feel that if you could have supplied us with all the machines that we wanted we could easily have sold two hundred and fifty. We want to thank you, as well as the Edison factory, for the co-operation you have given us in the way of advertising matter, and we expect to sell twice as many machines in 1918 as we did in 1917."

The company’s record of business is particularly good when it is considered that Greensboro has a population of approximately 30,000, of which about a third are negroes.

THE TALKING MACHINE WORLD  FEBRUARY 15, 1918
Victor Supremacy

The supremacy of the Victrola is linked with the world's greatest artists.

The prosperity of the music trade, the success of Victor retailers, are the natural result of this overwhelming supremacy.

Victor Talking Machine Co.
Camden, N. J., U. S. A.

Long Distance Telephones—Numbers 5982-5983 Madison Sq.  
Cable Address: "Elibh," New York.

NEW YORK, FEBRUARY 15, 1918

ORDER well in advance, and order up to the hilt, is the advice that should be followed by the talking machine wholesaler and retailer just at the present time. For, remember, placing orders is getting the goods are two widely separated and distinct things at present.

The freight situation continues serious. With fuel, food-stuffs and munitions having the right of way on the railroads, and with the Government in control of the transportation systems to see that this priority order is enforced, the shippers and consignees of freight not coming within those favored classes must take their chances of delivery, and they are long chances.

Until weather conditions improve, there are only certain days when freight of certain classes will be received by the railroads, and then only in limited quantities. Moreover, there have been tight embargoes placed on the bulk of freight by several Eastern railroads, and there probably will be more embargoes in the future. The wise and logical thing to do, therefore, is to get the jump on the situation wherever possible by having goods on order and ready to ship at every opportunity.

Freight received by the jobber and dealer in normal times within a week or so after shipment—now takes anywhere from six weeks to three months en route. That means that the jobber and retailer must work at least that far ahead.

There has been much talk of the curtailment of the manufacture of "non-essentials," or all those goods not required to provide the necessities of life. Such curtailment would depend upon the point of view of the men issuing the order, and who might or might not have full appreciation of what music means in the present crisis. Assurances from Washington, however, are to the effect that no such discrimination will be practiced by the authorities, that any curtailment order will apply broadly to all manufacturers, and no one group of industries will be singled out for special attention.

The Garfield order can be accepted as proof of this attitude, and with assurances of a square deal from Washington the trade can go ahead and by foresight and the exercise of the proper spirit keep at least even with the game.

IT may interest talking machine men to know that there is a strong movement among piano merchants in the East, backed by the National Piano Merchants’ Association, to eliminate the advertising of instalment terms, and to leave that question for adjustment between the customer and the salesman as circumstances warrant.

It has been proven to be a fact that where minimum terms are quoted in an advertisement, such as $1 down and $1 a week, or $5 down and $5 per month on the various models, simply as a bait, the prospect comes into the store filled with the idea that those amounts are all he is expected to pay on the instrument he selects, and consequently most of the business is done on that basis, although in many cases the customer is in a position to pay either cash or substantial amounts each month. Where it is advertised that the terms may be arranged to suit the customer’s convenience, provided they are within reason, the average amounts received as first payments and the instalments arranged for each month are much higher than the average.

The ordinary business man in making a $200 purchase, for instance, would hesitate to offer $5 or $10 to bind the bargain and agree to pay a similar sum monthly. He realizes the amount of the investment and generally offers an initial payment averaging at least 20 per cent, of the amount of the purchase. Advertiser of terms does not affect the talking machine dealer as much as it does the piano dealer, but while in the former case the average value of an individual purchase is smaller, there is at the same time an equal tendency to cheapen the products. A $200 machine for which the dealer will accept $5 or $10 as first payment does not seem nearly as valuable to the purchaser as would be the case if he had to pay $25 or $50 down.

Advertising that the dealer will accept the customer’s own terms, if in reason, appears to the ordinary reader to be a most generous proposition. The customer feels that he is safe to make a purchase because he can pay for it any way he sees fit, and his terms, ninety-nine times out of one hundred, will be better than the minimum terms that the retailer has been in the practice of asking.

Just now every dollar in cash has an added value, and if by adopting this idea of the piano man the talking machine dealer can bring in the cash on their sales in larger quantities and with greater rapidity, then it certainly is worth trying.

THE drastic orders of Fuel Administrator Garfield closing down practically all of the industries located east of the Mississippi River for the five-day period from January 18 to 22 inclusive, and for each of the nine Mondays following, naturally hit the talking machine trade hard, although probably no worse than it hit hundreds of other industries.

Wherein the talking machine trade suffered, and will suffer, particularly, is that the majority of the larger factories are far behind in the production and delivery of orders booked for machines and records, and that had relied on uninterrupted work during January and February to catch up in some measure with the demand so as to fill the holes in the retail stocks left by the holiday rush.

The spirit of the trade, however, was admirably shown in the observation of the Fuel Administrator’s order to the letter. In practically every instance the factories shut down tight on the days named, keeping only a portion of the office force on hand to look after the mail.

Certain manufacturers in many industries apparently found a loophole in the order permitting the heating of plants and offices sufficiently to prevent damage to stock and the freezing of sprinkler systems. The heating thus deemed necessary ranged from $5 to 50 degrees, and it was found that employers could do certain work in that temperature without discomfort. In view of the fact that the greater part of the work in talking machine and record manufacturing is done by machinery, even to the varnishing of the cabinets, and that the use of machinery was absolutely prohibited on the “fuelless” days, however, put the bars up against any manufacturing activities.

Although there was naturally a strong protest immediately the order was issued, the talking machine men, manufacturers, jobbers and dealers fell in line with other business interests and accepted the order as a war necessity, and made the best of a bad situation.

According to reports from Washington, it seems, as this is written, that the effect of the five-day closing down and the subsequent workless Mondays has not been as satisfactory as hoped for in effecting a saving in coal, and in permitting of trans-
portation of fuel in increased quantities on those days. Therefore, instead of the order being rescinded in part, it is not improbable that it may be, in some manner or other, extended.

Meanwhile indications are that the trade has adapted itself to the changed conditions and is working along lines that will overcome in a considerable measure the effect of the shut-down, by increased efforts during the five working days, and overtime occasionally, when feasible. There are still many who grumble anent the severity of the Garfield order and who are not yet thoroughly convinced regarding its necessity, but these are war times, and the great majority of the people of the United States comprehend that there must be fire where there is smoke, and have set themselves to grist and bear it, regardless of personal opinions—in other words, to use a familiar advertising slogan, "there's a reason."

A little extra effort, a closer attention to details, and the go-ahead spirit will enable the trade to overcome these and other obstacles and, barring unforeseen conditions, make 1918 just as good a year for the talking machine industry as has been predicted.

THE merchant and his salesman should bear one fact in mind, that the first impressions are the most lasting, and if you give a man a good impression of your place when he enters you have accomplished half the battle of separating him from his money. A quick walk forward, a pleasant greeting and close attention are not hard things to give, but they will make sales where a glum dyspeptic countenance, with mouth drooping at the corners and a general look of having liver trouble, will put a customer in an antagonistic mood that will mean a hard fight to win his trade.

The desirability of applying the trade acceptance to all classes of transactions in buying and selling merchandise is becoming more generally understood in all the leading industries of the country. Leading trade associations are recognizing the value of this plan of putting credits into available liquid form in this way expanding the use of commercial paper.

There is no doubt but that the war, through its related activities, has done much in forcing developments which formerly and for some time recently had appeared disposed to hang fire. For instance, the trade acceptance, an institution whose merit is obvious, and which for years has been included among the fundamentals of commercial systems in practically every other civilized business country of the world, was up to a year ago understood but by a small number of people in this country, while a greater number considered the matter hardly worth their time or effort. What a change, however! Today every merchant and business organization is giving this subject the closest consideration

The matter of credits has been much in the public mind since the United States entered the war, and business men in particular have become alive to the beneficial results of the use of trade acceptances, with the result that this subject is before the country in a new light. People are getting a better comprehension of how it will broaden industry by liquidizing credits, and thus give the merchant greater opportunities for trade expansion.

Manufacturers and jobbers are giving considerable attention to these days to the subject of advertising. Every live man to-day concedes that advertising is a necessity, one that returns good dividends on the investment when space is properly utilized. In this connection it is well to bear in mind that every advertising medium has two costs—space cost and service cost. One gives use; the other gives results. Space cost is fixed. Service cost varies. The amount this varies determines the amount of results—that is, the amount of value received. But this varies always in proportion to the circulation of the medium. The more representative the circulation the higher the service. Since you purchase advertising space to put it to use and secure results, it is false and momentary economy to consider any but the medium of greatest representative circulation. Results, through use, soon offset any initial saving in cost of space. Service includes safety. It protects your reputation and guarantees your sales. Let "Service First" be your motto; it is ours—it is a winning policy.

And, talking about advertising, there are many concerns in this and other industries which, through lack of courage or for other reasons, during the war, have set about curtailing expenses by cutting down, or eliminating their advertising appropriations, and thus undermining the value of their sales departments.

Economy along these lines is not sound nor sensible. The concurs that will reap the harvest when the harvest time of peace comes will be those which have had the courage to push their businesses in the face of war, and the foresight to maintain their advertising campaigns, and keep their sales organizations just as close to normal as conditions will permit. Money spent along this line is not money thrown away by any means. It is money definitely invested for future dividends. It insures a permanence of name value and develops a cumulative effect that cannot be extinguished—one that will bring most satisfactory returns.

The business men who lose courage and plan to hibernate during the period of the war are, unless peace comes unexpectedly, going to find themselves and their advertising forgotten and their names but distant memories. The time the live ones spend in going ahead the others must spend in starting up again—a handicap which no successful business man desires to have placed upon him.

WASHINGTON'S POLICY

in taking the worst night for crossing the Delaware helped him to succeed. It's easy to sell machines, but the fact that so few dealers specialize on selling Victor Records is a BIG reason why you would make more money by devoting more energy to the work. You will celebrate a year of unusual record profits by beginning right now to SELL MORE RECORDS, and to use

The Need for Music

Food, raiment and shelter are absolutely essential to existence. But it is not these necessities that make life worth living, they merely make existence possible. In order to sustain the highly developed life of today the individual requires something more than physical sustenance.

In striving for a better, a higher, a more ideal existence, the absolute necessities bear no part but the sustaining of physical life. Life, without many things which are often misnamed "luxuries," would not be "living" at all, it would be mere existence.

Who but the most narrow-minded could possibly call music a luxury. A luxury is anything that can be taken out of our lives without actual suffering. Music could not be taken out of our lives without real suffering. It is honey to the soul. It speaks in all tongues and all ears understand. It brings man into closer touch with his Creator and with his fellow-man than any other medium. It speaks to the souls of men, and men respond with the noblest and purest deeds of heroism. Inspired by it they make the sublimest sacrifices with a smile on their lips. They go into battle—they go down on ships at sea singing songs.

People buy food, clothing and shelter simply because they must have them. We are very proud to feel that they invest in the instrument of Music's Re-Creation because they want it; not because it is absolutely essential to existence but because they very deeply feel that they need it to round out their lives, to help make living worth while, to brighten leisure hours and to bind the home ties closer.

Music's Re-Creation is helping to sweeten the bitter cup that the world now holds to its lips, and every loyal member of the Edison organization is doing his part to make the influence of Mr. Edison's new art felt in every American home.

What a privilege—what a satisfaction it is to be associated with such a wonderful factor in the life of today!

THOMAS A. EDISON, Inc.
Orange, N. J.
It Doesn't Pay for the Salesman to Laugh at the Mistakes of His Customers

It is not difficult for the average talking machine salesman to recount the humorous instances that occur in the course of his experience in the store, of the people who have come in without any knowledge of what they wanted or with the wrong name for the desired record, and people who have been confused as to artists and makes of machines, and brought their troubles to the salesman. These instances for the most part are really funny, but the time to laugh at them is when the customer has left the store, and when there are no outsiders to hear.

We all know of the story of the brazen Irishman who entered a talking machine store and demanded a record by "Al McGuck." The incident is related as a story, but the average salesman has to meet demands equally as ridiculous every day in the week. Every customer is not well versed in the names of musical compositions, nor can everyone pronounce correctly the names of foreign artists. If fact, there are many salesmen, supposed to be authorities, who have weird methods of pronouncing some of the artists' names.

When a customer enters the store and asks, as did the colored woman, for the record "Human Rust," it is up to the salesman to inquire carefully if the record wanted is not "Hummoresque," and to act as though the customer had simply made a slip of the tongue. No matter how peculiar may sound some of the demands of customers, to the salesman who knows his line of records there is always a possibility of associating the customer's demand with some record in stock. The words may be different, but there is a phonetic similarity that cannot be mistaken. To grasp that similarity upon the instant and to save the customer embarrassment by bringing the desired record forward without delay is one of the traits of the salesman who knows his business.

We have seen incidents where the salesman has smiled in a superior way at the demand of a customer, and taken long enough to explain to that customer just where he, or she, was in error in pronouncing the name or indicating the desired selection. If he has, in these circumstances flushed with embarrassment, or more frequently with anger, and hurried out of the store before completing a purchase. Even when the customer later stays, after being corrected, they acted as though their feelings were hurt and only bought the one record asked for to prevent the further embarrassment of having the salesman sneer as they went out empty handed. We have seen occasions where salesmen have smiled and actually laughed at the mistakes of a customer. It doesn't require statistics to prove that the customer once laughed at is a customer lost.

One of the great problems of the talking machine has been to bring into the lives of the musically uneducated the greatest works of the masters. The man or woman who formerly depended for his music upon the vaudeville theatre or even the hand organ can now play at home and by means of the talking machine the great arias and symphonies that under ordinary conditions would be as foreign to him as Chinese. It is but natural that the average mortal cannot delve into this new musical world without making some mistakes, and every mistake thus recorded in the talking machine store may be accepted as proof positive that another convert has been won over to the cause of good music.

The man or woman who comes in and pronounces the name of some foreign composer casually and without hesitation generally has much experience with the higher types of music, but the person who comes in and stumbles is exploring a new realm, and the salesman who is looking towards the future of the business should make a special effort to make that exploration pleasant and to remove the stumbling blocks of almost unpronounceable names with courtesy and tact. Then the customer leaves the store with the feeling that he has been well treated and will come again, rather than with the feeling that he has been laughed at and that his trade is not wanted.

Moreover, if after the exit of the customer making the humorous mistakes the salesman sees fit to laugh by himself, or in company with his fellows, that fact is noticed by other customers who happen to be present, and we may be sure, if any among them is not quite sure of his ground, he is going to think awhile about coming into that store again, unless for a record that is perfectly familiar to him. Of course if the salesman's sense of humor is strong enough to overcome his sense of business and he can only control himself sufficiently to let the customer get out of the store, why, there is a valuable stock of business in the rear of the talking machine store to which he can repair and roll on the floor in glee for a few moments to relieve his feelings.

The salesman is selling records to the customer and not paying for and should not expect free entertainment. The customer comes into the store not in the role of a comedian but in the role of a purchaser and should be treated as such. The adage "Laugh and grow fat" is all right under certain circumstances, but the salesman who laughs at customers' mistakes is going to lose sales and have a poor reputation and he will not be able to purchase and the wherewithal to purchase same.

NEW WAR USE FOR THE TALKER
Kansas Cattleman Finds That Cows Fatten Quicker Under Influence of Music—Should Help Increase Meat Production of Country

KANSAS CITY, Mo., February 5—Now comes Arnold Berns, of Peabody, Kan., pioneer cattleman who has seen the cattle industry take the same wide-awake way to the grade Hereford and Shorthorn in the cattle industry, and declares that the phonograph can be made a great factor in fattening cattle. At the meeting of the Kansas State Board of Agriculture at Topeka, Kan., Mr. Berns said that the phonograph will serve to quiet the nerves of cattle in the fattening stalls and make them more submissive to the grains and feeds given them and that they will take on fat faster by being quiet and less nervous.

"Many of the cattle in one Western feed lot and stalls," said Mr. Berns, "have been raised on the ranges of the West where the howl of the coyote has been the music of the range. These cattle taken off the range and confined in close quarters naturally become restless and nervous and miss the sounds and music of the ranges."

"Two bunches of cattle fed under identically the same conditions near Peabody, Kan., differed in weight and price when marketed. The man who sold the higher priced bunch of cattle was asked for an explanation by his less successful neighbor and was told that the men of the higher priced bunch of cattle had arisen from his bed when he heard the cattle running around in nervous excitement in the feed lot at night and had gone dinner and talked gen-tly to them until they became passive and their fright had passed away."

"Not many of us would care to get up of nights and go to the feed yard to talk or sing to a restless nervous bunch of cattle that were not taking on fat because of their nervousness. The phonograph could be employed to take the place of the human voice under such circumstances. We could start with a coyote record that would cause the range cattle to forget their homesickness and to take advantage of the freedom of the open prairie ranges and then we could educate them up to some of Caruso's or Melba's wonderful arias or the "Marseillaise" or some of the patriotic airs. Think of how inedible an army of soldiers would be if fed on beef that had been fattened to the music of such soul-stirring war airs as we are all hearing these days."

Mr. Berns spoke on "Cattle Feeding as a Business" and his introductory remarks were in relation to phonographic music as a feature of cattle feeding. His address was the leading feature of the Topeka meeting.

The Brunswick Shop, Dallas, Tex., has installed a stock of Columbia Grafonolas and records.
To the Talking Machine Dealer: HAVE YOU CATALOGUE No. 317 T W?

Globe-Wernicke

(BUILT-TO-ENDURE)

Sectional Cabinets
For Disc Records

The better the facilities you furnish your customers for housing records the greater the quantity of records you will sell.

Look carefully at the cabinet.

It invites you to fill it, in fact, you cannot resist the temptation to fill it. No matter how many sections are bought there will be empty compartments and these are always in sight, inviting you to fill them, and the records too are always in sight, inviting you to play them. Any record is so easily found and quickly replaced that this cabinet adds an extra charm and fascination to the playing of records.

Suppose each of your customers had this cabinet and you had a sample on your salesroom floor to remind them to buy additional sections. Not only would the sale of the cabinets increase but what a tremendous increase in the sale of records would result and there is excellent profit in the sale of both.

Each section has 90 compartments numbered consecutively from 1 up. Globe-Wernicke Catalogue No. 317 T W describes and illustrates these goods fully.

Brown Disc Record Cabinet

For every talking machine made

Every record right in front of you always.
No searching—No confusion.
Records lie flat when drawer is closed—No warping.
Records are vertical when drawer is open. Every record at your fingers' ends.
A separate compartment for every record.
No Scratching—Rubbing—Cracking or Breaking.

The Brown Disc Record Cabinet was devised to preserve a record perfectly and thereby insure Perfect Reproduction of Sound.

C. K. BENNETT HEADS OHIO ASS'N
Manager of Eclipse Musical Co. Elected President of Talking Machine Dealers' Association of Northern Ohio—Annual Banquet of That Organization Be Held on February 21

COLUMBUS, O., February 2.—At the recent annual meeting of the Talking Machine Dealers' Association of Northern Ohio, held in this city, Charles K. Bennett, manager of the Eclipse Musical Co., Victor distributor, was elected president for the year 1918, with H. E. Roos, of the Columbia Graphophone Co., vice-president; James Card, of the Lakeside Music Co., secretary; A. L. Maresh, of the Marsh Piano Co., treasurer, and E. B. Lyons, of the Eclipse Musical Co., recording secretary.

The annual banquet of the association will be held at the new Hotel Winton on February 20, and the program on that occasion will be an elaborate one. Among the speakers will be Henry C. Brown, assistant to the general manager of the Victor Talking Machine Co.; J. Raymond Bill, associate editor of The Talking Machine World, and a representative of the Columbia Graphophone Co. An autographic message from Thomas A. Edison is also looked for.

KEEPING SHOW WINDOWS CLEAN

Those who are located in regions where the illuminating medium is natural or artificial gas have experienced considerable difficulty with a peculiar greasy deposit on plate glass windows, which gives to them a bluish appearance regardless of the amount of energy expended in the cleaning. If after having followed the ordinary procedure of cleaning a piece of glass, a small sack be made of coarse cheese cloth and filled with lamp black and the glass thoroughly polished with this and then polished with a clean cloth, it will assume a brilliancy unattainable by any other means.

TALKING MACHINE AT THE FRONT

Major H. H. Noyes, Who Formerly Traveled for W. D. & C. N. Andrews, Buffalo, Writes of Experiences With Pershing's Army in France—Asks About the War Sentiment Here

BUFFALO, N. Y., January 21.—"The Frenchman warms himself by suggestion. He builds a fire in the fireplace and so long as he can see a small blaze he is content."

This was one of the many interesting comments of life in France by Major H. H. Noyes, who traveled in the Buffalo territory for W. D. & C. N. Andrews of this city for five years. Major Noyes is now serving his country in France. He is with Pershing's army and an interesting letter from him was recently received by Mr. and Mrs. C. N. Andrews.

Referring to the subject of heat Major Noyes said: "We are different. We build a fire and put in a good-sized chunk of wood for a back log and really get some heat. We bought wood at about $4 a cord. Coal is a luxury. If one has a piece of hard coal he wears it on his finger in place of a diamond. The houses here are cold and have no furnaces."

"The weather here is so rotten that I cannot wax very eloquent over the scenery. There are wonderful roads and lots of woods, which are mostly planted. Conservation is a religion here. They plant trees which they are not allowed to cut for thirty years or more."

"We eat, sleep and work war, but still you folks know more about the war than we do," continued Major Noyes. "We are concerned with our own particular little world and have our hands full. Would be glad to learn the general attitude of the people in the United States. Are they taking this war seriously or not? They should and the pacifist and slacker should not be allowed to sport and exhibit their views, for they are a menace. The pacifist is the worst enemy we have—worse, in fact, than the boche, and that is beyond one's comprehension. I have personally seen things over here on my trips to the British and French fronts that make one wonder whether or not civilization is more or less of a myth."

"One group of German prisoners wouldn't believe the American army was here. They thought we were British dressed in the uniform of the U. S. A., just to impress and mislead the Germans. A German prisoner, who had lived in America for several years, said to one of our men that the entrance of America in the war would make no difference. He also said that although we might get a few men over casually, a U. S. troop ship would never reach Europe. The funny part of this is that while he was talking a big fleet of transports was steaming in and he hadn't noticed them. When his attention was called to the fleet he was told it was one of several already landed, he looked dazed for a minute and then turned away—licked."

Do your bit—but don't talk of it beforehand.

The ADVERTISING of the SCHUBERT PHONOGRAPH

is concentrated right in the newspapers of the dealer's own home town, hitting hard the only people to whom he can expect to sell a machine.

The dealer's own name is in every ad.

We shall be glad to tell you all about our plans.

Talking Machine Aids Piano Technicians in the Study of Tone Composition

There is in Chicago a group of technicians in the phonograph trade who are engaged in research work and discuss scientific matters relating to the designing and construction of pianos and the development of tone with a view to finding some way to increase the quality of pianos as much as possible. A recent meeting of the technicians was devoted to the study of tone composition, and of particular interest from the viewpoint of the regular reproducer, was given the talking machine, which helped to illustrate many points in the discussion.

In his opening remarks F. E. Morton, acoustic engineer of The American Steel & Wire Co., the chairman, said: "A knowledge of acoustics may be had by any one who can hear. In instruments and voices we learn to recognize certain combinations of those partial tones making up the entire tone and without specific analysis we hear a sound and say: 'That is the sound of a cornet or the sound of John's voice.' When we understand why we cannot hear one sound from another the pleasure of hearing and comprehending is multiplied. There is not a sound that you hear during the day that is not interesting from a scientific viewpoint. The fact that a sound may be reproduced, whether the characteristics are quite the same or not, is enough to interest the days of the little cylinder with the tin-foil around it up to the present day when the sound and reproduction are so nearly identical. That it is not exactly the same in quality as recorded is obvious to the listener. I have more respect for the talking machine now that I know its limitations than I bad before I learned them. I also know there are many possibilities. I want to explain briefly for your direction in listening that first we will hear the natural voice and then the reproduction of that voice on this talking machine. The recording studio is a fact. Any room is a reverberating chamber and hence there are echoes. The diagram of the recording instrument possibly has a better ear than we have and the echo is recorded. The better the reproduction the more obvious the echo. The voice energy enters the microphone. That horn has an inner tube. That horn has a certain number of cubic inches of air which determines its pitch. The column of air vibrates more intensely in response to its own keynote than any other. The horn material responds with a greater degree of intensity to its own keynote, which may or may not be the same as the column of air contained. The diaphragm, which has its own keynote responds with a quality peculiar to flat bodies. It responds to odd numbered high partials with greater intensity than to other partials. In the reproducing the process is reversed and the same conditions obtain. If the reproductions were made by the same diaphragm through the same horn and into the same room as that in which the record was made, each augmented partial would be doubled. If reproduced through another instrument having another horn of different capacious content, a different keynote of horn material, a different keynote of diaphragm, other odd numbered higher partials would be augmented as would also the reverberations in the room. And so it is that we have a number of sounds foreign to one to be recorded.

After very many repeated experiments there is a general idea that a talking machine record of a banjo number gives a better banjo tone than the banjo itself. The same is true of the xylophone. Those partial tones characteristic of the banjo and xylophone are not augmented. There are certain voice qualities which are improved by recording and reproduction. There are other voices and instruments which are not improved, but all are changed.

With a knowledge of that change we have no difficulty in appreciating a great deal. You recognize another's voice but it is doubtful if you would recognize your own voice recorded and reproduced. Let us go back to our pictured piano tone composition having a relative intensity of 50 per cent. In the fundamental and the other six partials in sequentially decreasing intensity until only a trace of the seventh is audible. A heavy stroke on a piano key brings out partials to or above the twenty-fourth. By means of the resonators they may be heard.

"The horn material and the diaphragm are loads carried by the talking machine and constitute its limitations. If these loads were eliminated a true reproduction would remain. Break a talking machine record and with a microscope observe the track of the needle and you will find there truly recorded all the tone it was given and more because it recorded the vibrations of part of its own material."

"It is not a limitation of failure to record but of faithfulness. If a horse hauls a wagon weighing a ton and the contents weighing one-half ton the limitation cause of hauling capacity is the weight of the wagon, or one ton. The horse hauls both. I am not criticizing the talking machine. It is a wonderful instrument. E. H. Rose will now sing for us, alternating with his own record on the talking machine as a demonstration."

Mr. Rose (Prince Lei Lani, Hawaiian tenor) sang "Pui Sabina," "Aloha Oe" and the "Romance of a Hawaiian (Kekuhi), taking one period with his voice, the next with the record and so on throughout the number.

Applying the same theory to the reproduction of piano tone, remarked Mr. Morton, "I confess I spent many hours trying to find the cause of some apparent distortions. I couldn't understand why a piano record sounded so much like a cross between a banjo and a xylophone. The limitations are not failure to record or reproduce, but caused by other partials, other tones. In volume I think we could approach very closely the volume of the original instrument. The augmented partials would become more obvious than in the talking machine of smaller tone chamber, or horn. We can't magnify the good without magnifying the evil. The relative intensity of partials contained in a tone determines its quality. If that relative intensity is disturbed the quality is changed. The more increase in intensity of one partial above its normal degree would change its quality and this factor, as I have already mentioned, would account for its distortion. It is wonderful that we get as true an effect as we do with that handicap. If you have a naxal-toned piano, with odd numbered high partials you put your tone regulator on the job, expecting him to make a perfect-toned piano. When such tones appear on a talking machine record we are apt to condemn the talking machine. By the collaboration of the piano manufacturer and the talking machine manufacturer that fault may be eliminated. We are fortunate in having the assistance of Mr. Harold Triggs, who will play for us. We will then have the reproduction of this number on the piano itself—an instrument not yet on the market, a Brambach electric player grand—and reproduced by the autograph roll, then reproduced on the talking machine." Mr. Triggs played "The Polonaise Militaire," which was then reproduced on electric player grand.

Mr. Morton (at talking machine): "I am playing a certain sustained portion of the composition over where the echo occurs. It is in effect not unlike a 'shale' which follows what..."

(Continued on page 18)
"What would you like to hear?"

No matter what musical taste may be expressed in the customer's reply, the Columbia salesman can meet it.

Popular and patriotic songs, opera, plenty of Columbia's own unequaled dance music, sparkling gems of violin and piano, the grand harmonies of a great symphony orchestra, brass band music—all are to be found in Columbia's offerings for March.

As for the new and novel—there are two splendid features. The first of the Thornton Burgess Bedtime Stories, told for Columbia kiddies, in the author's own voice, are "Johnny Chuck Finds the Best Thing in the World" and "The Christmas Joy of the Beautiful Pine." Lacalle's Spanish Orchestra makes its Columbia debut with "Alegrias" and "Los Crotalos," two mad dances from the sensational New York musical success "The Land of Joy."

We've given you just an idea of the good things in this March list. Examine it in detail, and you will realize its surpassing excellence.

Columbia Records

Columbia Grafonola
$18
Let one Grafonola sell another

Columbia music is always good music, whether the Grafonola on which it is played costs $18 or $250.

People buy Columbia Grafonolas in order to enjoy Columbia music. The wise dealer’s first aim, in making a sale, is to sell Columbia music. He is not over-anxious that the Grafonola purchased be an expensive model.

He knows that many a home hungry for good music is not yet ready to purchase a Grafonola of the more costly type. But such a home has a place, today, for the model at $18, or $30.

The dealer who sees that this want is met has made two sales. The inexpensive instrument will establish the enjoyment of Columbia music, and some day there will be an exchange for a higher-priced model—with a second profit.

ASSOCIATION DOES NOT TAXABLE
War Tax Law Held to Apply Only to Social and Athletic Organizations

WASHINGTON, D. C., February 5—Commercial organizations, even though they have social features, are not subject to the tax imposed by the Internal Revenue Act according to a ruling just issued by the Commissioner of Internal Revenue. The Commissioner ruled: "Particular attention is called to the fact that the tax is imposed only on voluntary membership fees, including initiation fees, paid to any social, athletic or sporting club or organization, where such dues or fees are in excess of $12 per member per year. The tax does not attach upon dues paid to chambers of commerce or other business organizations primarily organized and maintained for the furtherance of business interests. Such organizations may have social features without incurring liability to tax, provided such social features are entirely subordinated to the predominant purpose of the organization.

TALKING MACHINES VALUED BY SOLDIERS AT THE FRONT

Some Interesting Facts in This Connection Set Forth by Junius B. Wood, a War Correspondent

Who Tells of the Joy They Bring in the Hospital and in the Camp

What a talking machine and even a limited supply of records means to the soldiers at the front, particularly in the military hospitals, was set forth recently in a graphic manner by Junius B. Wood, who, writing for the New York Graphic, said:

"In a certain unnamed spot a few miles back of the French front are the long one-story frame barracks of a regiment of American railroad engineers. These buildings, with those of a French hospital, near which is a cemetery that is daily growing larger, form a mushroomlike military city. Day and night the Americans take trains up under fire and return to sleep and rest in the barracks.

"Every morning, and sometimes oftener, according to how the fighting goes, they bring in a long train which stops at an equally long platform. While its load of helpless, suffering and bandaged humanity is carried into the wards of the adjoining hospital. Each one who is more seriously wounded is taken farther to more comfortable and better equipped permanent hospitals in Southern France. The wounds have been bandaged in the temporary field dressing stations, but only in a few cases has there been an opportunity to wash off the dirt of the trenches before the patients are hurried to this evacuated hospital. Then starts the fight to fan back the flickering flame of life.

"In that war-born city is one phonograph. Grand-opera singers, amusing actors and entertaining speakers do not come to that city and the war zone. A single box of "canned music" is all they have to relieve the monotony of the puffing locomotives, the stifled groans of their fellow wounded and their own growing pains. Occasionally German bomb-dropping machines seem reluctant even to permit these fragile of humanity to escape."

It is never Silent

"One thoughtful New York mother sent this ray of brightness to her son, a captain in a railroad regiment. He turned it over, records and all, to the hospital so that all might use it. Now it is never silent day or night until taps sounds. Early in the morning it starts on its rounds through the hospital wards and by evening it reaches the Y. M. C. A. But and finishes the night on a rough pine board table in the officers' quarters grinding out the old, familiar homesick tunes.

"Occasionally when work is slack the owner goes himself to run the machine. Here is his description of a Sunday afternoon in that strange city of the ill.

"I spent an hour and a half playing the machine in a ward where two men carried in the records. There were from sixty-five to seventy-five men in the ward. Some were suffering from pneumonia and still others were terribly burned by mustard gas. Nearly half of the remainder had not seen daylight for a long time. All eyes seemed to be bandaged and there was an everlasting coughing.

"I started off with the "Marseillaise" and every last man who had an ounce of strength left in his system sat up on his cot at salute and tried to raise a bandaged hand if one was left. After that we had some American marching songs, comic opera, grand opera, and everything left on the worn-out records.

Records Nearly Worn Out

"We have used these records until they sound like the proverbial tin can. I wrote to America a couple of months ago for more, but they never materialized. The machine works all day in the hospital and we use it only when the patients have gone to sleep. It would be a calamity if they were deprived of its solace.

"For military reasons I am not permitted to give the name or location of this American regiment which, in addition to its war work of carrying forward ammunition and supplies and bringing back the wounded and dying, is also spreading the Good Samaritanism of music. How ever, anybody who wishes to answer the appeal can send records to me and the American post office here will see that they are delivered. Anything in the line of music is a balm in the ears of the wounded, even of the French Poilu, who does not understand English. Send what you can and what you can in care of Junius B. Wood, war correspondent, American Expeditionary Force in France."

MISS MURRAY AND THE GRAFONOLA

The Universal Film Mfg. Co. will shortly present a new picture entitled "The Eternal Columbine." The star in this film will be Miss Mac Murray, one of the most popular and successful motion picture actresses now appearing in films.

SAN FRANCISCO OFFICE, Room 530, CHRONICLE BLDG.
WALTER S. GRAY, Manager
THE TRADE IN BOSTON AND NEW ENGLAND

February 6—It is of special interest that, despite general conditions, the month of January proved to be a far better month for most of the dealers than they had looked for. Most of them were able to show a business fully up to that of a year ago, while others were considerably ahead of January of 1917. This is doubly interesting in view of the fact that the business day is now shorter by one hour and there is a whole day, Monday, taken out of each week in deference to the request of the fuel administrator, which for the month has considerably shortened the hours, although the Monday closing did not really begin until the middle of the month. For the current month the situation will be worse, for there will be four Monday shut-downs and Washington's birthday, and all in the shortest month of the year. It will be interesting to see how the period will show up.

One good business asset just now is the demand for machines and records that comes from the Navy Yard, the forts down the harbor, Camp Devens at Ayer, and other places where soldiers and sailors may be stationed. The immense quantities of second-hand records that are sent away of course do not affect the dealers, but there are in addition a large number of records that are bought and sent away by friends. This is a most appreciable aid to business.

Oppose Instalment Plan of Doing Business

The trade is interested in the position lately taken by the Retail Credit Men's Association at a meeting held at a Boston hotel, when a resolution was passed abolishing the instalment plan of doing business. The reasons given for taking this attitude were that conservation is the watchword in the present crisis; that with the increase in the cost of merchandise a proportionate increase in capital becomes necessary; that it is neither wise nor economic to tie up large sums of capital in this form of credit; that it is essential to the national welfare to keep capital liquid, and therefore that all goods sold on credit be paid for on the first of the month following the date of purchase and in no case beyond thirty days from the date of purchase. A copy of this resolution was submitted to the Boston Chamber of Commerce for inclusion by that body.

Fifty Victor Machines for Camp Devens

Herbert L. Royer, who has a well-appointed Victor and Sonsora shop in Chaseney street, a few feet from Summer street, is being congratulated by his friends on having successfully completed a deal whereby more than fifty Victor machines are soon to be sent to Camp Devens at Ayer. The purchase was made by a committee headed by Francis H. Spalding, which is interested in supplying music for the boys in camp. The money was largely secured by sums being raised from the proceeds of the sale of a large flag, which was made by Mrs. Martha Pierce Chute of Cambridge and Manchester. With these machines Mr. Royer was able to sell nearly 300 records. The outfits are to be distributed among different companies at the camp.

Dealers' Co-operation Service

Earl J. Stillman, who was transferred a while ago from the Vermont territory of the Columbia to the Boston wholesale headquarters, has launched a large record demonstration room where dealers, especially those from out of town, who are not familiar with all the details of good selling, may be coached. It is what might be called dealers' co-operation service.

Magnificent Display of Brunswick Phonographs

The dealer not acquainted with the line of phonographs carried by the Brunswick-Balke-Collender Co., at 94 Washington street, will be really surprised at the display which is on the second floor of the building. R. H. Booth is in charge of this phonograph department, and he has two men constantly in the field presenting the merits of the Brunswick machine, F. H. Walter and E. S. Campbell, who have between them all of New England with the exception of Connecticut, which is handled from the New York end. There is A. J. Kendrick besides, who is the district manager, with headquarters in Boston, and between these three live wires the Brunswick is getting a good showing in this field. There are several new styles of Brunswick machines soon to be put on the market which are sure to interest present and prospective agents.

Brann Is Chasing Larger Fields

A. R. Hillian, manager of the Aeolian Vocalion, says that the business during January was good, all things considered. This house has begun to branch out into larger fields and to establish wholesale accounts around the city. The large department store of Magrane-Hous ton Co. in the downtown retail section has contracted for the Vocalion; and, at the present time there is a good display in one of the large Washington street windows. This wholesale end of the business has been placed in charge of C. C. Westervelt, who has been with the Emerson Phonograph Co. J. F. Meade, the treasurer of the concern, who makes his headquarters in New York, was a Boston caller a short time ago.

Takes Charges of Victor Department

The Victor department of the Henry F. Miller Co. is now in charge of P. R. Smith, who has recently assumed the position. Mr. Smith has had a good experience in the phonograph business, for he was Thomas A. Edison's personal representative for some time and as such was called upon to go into many territories to straighten out knotty business problems facing the Edison dealers. Lately he has been in the employ of the United States Government.

Generous Action of A. Hume Co.

A space in the A. Hume Music Co.'s Victor warerooms has been generously donated to the Greater Boston Women's Committee, and authorized by the National War Work Council of the Y. M. C. A., whose purpose is to promote music and other forms of entertainment for the soldiers and sailors. Members of this committee are at the Hume warerooms for three hours each day and the Victor prop- osition is one that especially appeals to them as a desirable form of music.

Reports an Excellent January Business

Manager Fred E. Mann of the Columbia Gramophone Co. makes a most encouraging report of the January business just closed and says that while the demand for goods was naturally light at the beginning of the month, there was considerable speeding up as the days wore on, so that the sum total was considerably in advance of the January business last year. Manager Mann was over in Springfield a while ago looking over the territory and arranging to give that field good service from the Boston end as it formerly had when there was a local headquarters in that city.

M. C. Perkins, who is now assistant to Mr. Mann, since the closing of the Springfield branch, is rapidly making good in his new line and he is fast familiarizing himself with his new work, which for the time consists of:

Habits Have to Grow

For several years past Eastern Victor Service has made a specialty of speeding up the record end of the Victor business.

We have therefore contracted the good habit of giving the Victor dealer efficient record service.

EASTERN TALKING MACHINE CO.

177 TREMONT STREET

BOSTON, MASS.
largely in perfecting the service stock department where several new men have had to be taken on owing to the demands which the draft has made upon the local Columbia employes.

Pleasant Surprise for Billy Fitzgerald
Wholesale Manager Billy Fitzgerald of the Eastern Talking Machine Co. got a pleasant surprise a few days ago, when he received a package which, upon being opened, brought back vividly to his memory an incident which happened back last summer when he played the part of Lifesaver. A woman was crossing Tremont street almost in front of the Eastern establishment when she got mixed up between several teams and she was in danger of being crushed when gallant Bill rushed to the scene and dragged the frightened woman to a place of safety on the sidewalk. The gift was accompanied by a card which spoke the appreciation of the woman.

Tells Story of Progress
Business throughout the Edison territory handled by the Pardee, Ellenberger Co., Inc., is reported as excellent by Manager Frederick H. Silliman, but the staff of traveling men who have Northern Massachusetts, Maine, New Hampshire and Vermont as their fields have interesting stories of the amount of snow to be found in that territory these days.

Announce New Sonora Agencies
Joseph H. Burke, who is associated with Richard Nelson in the local management of the Sonora Phonograph Co. has been doing some telling work lately, and one of the good-sized deals which he lately put through was the placing of the Sonora agency with three of the Blake Co.'s large piano houses at Lynn, Attleboro and Pawtucket, R. I. The local management also reports that the large Springfield house of Forbes & Wallace has lately taken on the Sonora line. Both Mr. Nelson and Mr. Burke were in Hartford, Conn., lately in attendance on the salesmen's convention, when plans for the current year's business were considered from every angle.

Franz-Yahn Service Tells of Progress
The wholesale department of the Columbia Graphophone Co. is highly gratified over the volume of business which is being done by F. E. Yahn, who is head of the newly organized concern known as the Franz-Yahn service, which maintains departments in the Poole Dry Goods Co. in Springfield, the Steiger-Cox Co. at Fall River and the Steiger-Dudgeon Co. at New Bedford. Mr. Yahn maintains an exclusive Columbia department in the Springfield establishment, and in arrangement and volume of goods displayed it makes one of the best showings to be found anywhere about. Mr. Yahn has been in the talking machine business for several years and at one time was connected with the Springfield warerooms of the Columbia, and he is well informed with every phase of the business.

Doing Good Business in Lowell
Thomas Wardell, a Lowell dealer in Victor and Edison outfits, was a caller on Boston dealers a few days ago, in fact he comes up here frequently to buy goods. Mr. Wardell bought out the Ring Piano Co. in Lowell a couple of months ago, and has been meeting with good success especially in his talking machine line. Mr. Wardell has had considerable experience on the stage and is full of interesting reminiscences. He is a veteran in the talking machine business, having been one of the early dealers in the days when the cylinder records were the only thing to be had.

Some of Our Distinguished Visitors
Visitors on the Boston dealers lately have included H. L. Tuers, manager of the Columbia's national dealers' service department, who came to Boston to take his examinations for the
The 1918 outlook is extremely bright for the Victor dealer who goes about his business, spurred by the knowledge that the war chiefs are placing increasingly heavy emphasis on the war value of music in general and of the Victrola in particular. During 1918 patriotic inspiration will add increased gingko to "Eclipse Victor Service". 'Nuf said!
The appeal of the Boston Store of Chicago from the injunction granted by the United States District Court for the Northern District of Illinois in September, 1915, enjoining it from selling Columbia records at cut prices was argued before the United States Supreme Court recently. The case came before the Supreme Court upon a certificate from the United States Circuit Court of Appeals in aid of the Seventh Circuit.

It appears from the certificate that the appellant, the Boston Store of Chicago, entered into an agreement in writing on October 15, 1912, with the Columbia Graphophone Co., acting as the agent for the Columbia Graphophone Co., "under the terms of which, among other things, the Boston Store agreed to maintain prices on the Columbia product. Subsequent to entering into the contract mentioned above, the appellant secured a stock of Columbia records and prior to the filing of the suit had sold at retail to the public the records which it had thus obtained, at prices less than the Columbia Co.'s official retail list prices. The records in suit were covered by United States Letters-Patent.

The appellant is contended on behalf of the Graphophone Co. that a patentee may, while exercising any of his three co-ordinate monopoly rights of making, using and selling, reserve, by proper agreement, any or all of these rights to himself if he may so see fit, and that such a proper reservation was made upon the monopoly right to resell by a contract directly with the Boston Store, which was entered into at the very instant of the transmission. It was also contended on behalf of the Graphophone Co. that the patent gave the article a status which enabled monopolistic barriers to remain and that the rules respecting ordinary sales did not apply.

Counsel for the Graphophone Co. pointed out that the Columbia price maintained by the Boston Store was based upon a contract—a direct contract between patentee’s agent and its immediate vendor, the Boston Store. No attempt was made to go beyond this, or by a mere "notice" to enforce its price system against any concern which was not a party (or privy) to a contract as in the Victor-Macy and Sanatogen cases recently decided by the Supreme Court.

It was further contended on behalf of the Graphophone Co. that inasmuch as competitive conditions existed to protect the consumer, the contract between the Graphophone Co. and the Boston Store, which imposed a resale price upon the latter, was valid as being a reasonable restraint of trade, and that the question as to the validity and legality of such a contract was not foreclosed by the decision of the Supreme Court in the Dr. Miles case.

The Boston Store claimed that under the recent Supreme Court decisions it had the right to sell the patented articles at any price it saw fit notwithstanding the fact that it had agreed by contract to maintain prices on them.

The questions certified to the Supreme Court were the following:
1. Does jurisdiction attach under the patent laws of the United States?
2. If so, do the recited facts disclose that some right or privilege granted by the patent laws has been violated?
3. Can a patentee, in connection with the act of delivering his patented article to another for a gross consideration then received, lawfully reserve by contract a part of his monopoly right to sell?
4. If jurisdiction attaches solely by reason of diversity of citizenship, do the recited facts constitute a cause of action?

The case was argued by Elista K. Camp, general counsel for the Graphophone Co., and Daniel N. Kirby and James M. Beck. Walter Bachrach and Hamilton Moses made the argument for the Boston Store.

Character is a by-product," as Woodrow Wilson in one of his illuminating talks once told a group of college boys. Everybody knows that a salesman's success is largely determined by his power of impressing his "character" on his customers. For this reason many salesmen go after character much as though it were money—something they could put in their pocket and forget about until needed, says "The Voice of the Victor." What they get when they do this is character, but another by-product, a sort of self-consciousness that is more of a liability than an asset.

If a man attends simply to his duty he will unconsciously develop the kind of character best calculated to help him carry on his work. Take the policeman, for instance. He probably never thinks about his "character" or "personality." The uniform, the discipline, the nature of his work all combine to harden and toughen him until he is fit to cope with criminals and to view with alertness a world that to him is always more or less under suspicion. Unconsciously he develops a "cop" mind, and becomes one of Squashville's "bravest." Precisely the same thing with the salesman who attends to his work. His plain duty is to consider his customer's interests and his employer's interests and to make the two fit in with each other. He must be tactful, must keep his wits about him, may be put to sudden tests, and must be prepared to endure long periods of slack business. He must, in short, be a good salesman, and this will be done if he attends to his work.

This album made us famous
by selling it. Why don't you try?

This advertisement was placed by the Boston Record Company in newspapers to promote sales of Columbia records. It was part of a series of advertisements aimed at increasing sales and promoting the company's reputation as a leader in the music industry.
INDISPENSABLE TO DEALERS

What a Prominent Canadian Merchant Has to Say of The Talking Machine World—Believes in Getting as Near as Possible to a Cash Basis

Day after day The Talking Machine World receives communications from dealers located in all parts of the world, expressing words of appreciation for the merits of this publication, and the great value it is to them in the conduct of their business. For example, one which came to hand last week from Wm. Lee, Ltd., 616-622 St. Catherine St. West, Montreal, is interesting in this connection. It reads:

"We are very much alive to the benefits received through your very excellent magazine, The Talking Machine World. It is very interesting to hear the views of America's successful merchants from a financial standpoint. Finance in the musical instrument business means credit, and the advanced ideas of getting this talking machine business on a nearer cash basis is a very excellent move, as we are all beginning to recognize that the talking machine is to-day a necessity in every household, and when the general public gets educated to the cash basis, or short term payments, there will be just as many machines sold, and the dealer's risks will be at a minimum. Enclosed find check for the following year's subscription to your publication, which no talking machine dealer to-day can afford to be without."

WILL A. WATKIN CO. EXPANSION

The Will A. Watkins Co., Davenport, Ia., are doing an excellent business with the Columbia and recently installed several new demonstration rooms. They are carrying on a very forceful campaign of publicity in the local papers, in which the Columbia records are featured in a very striking and effective way. James I. Cruse, of the talking machine department of this house, is making a specialty of adjusting and repairing, and is building up quite a clientele.

EXPORTS OF TALKING MACHINES

The Figures for November Presented—Exports Show Machines and Records Both Increase

WASHINGTON, D. C., February 5—In the summary of exports and imports of the commerce of the United States for the month of November, 1917 (the latest period for which it has been compiled), which has just been issued by the Bureau of Statistics of the Department of Commerce and Labor, the following figures regarding talking machines and supplies appear:

Talking machines to the number of 4,523, valued at $164,762, were exported in November, 1917, as compared with 6,039 talking machines, valued at $163,311, sent abroad in the same period of 1916. The total exports of records and supplies for November, 1917, were valued at $173,159, as compared with $169,224 in November, 1916. For the eleven months 79,117 talking machines were exported, valued at $2,000,371 in November, 1917, and $6,009, valued at $1,414,631 in 1916, while records and supplies valued at $1,893,196, were sent abroad during 1917, as against $1,121,885 in 1916.

NEW DELPHON DEALERS IN TEXAS

DALLAS, TEX., February 4.—The Verahlen-Delphon Co., of this city, which was recently formed to act as distributor for the products of the Delphon Co., Bay City, Mich., has been closing a very satisfactory business. Walter Verahlen, head of the company, recently made a trip through the territory and closed a number of important deals. One of the new dealers which he appointed is the firm of Knight & Pevoto, of Sherman, Tex. This house is a very successful furniture concern and is making plans for an aggressive Delphon campaign in its locality.

There is rarely ever much work for the chemical engines and hose carriages when a man starts out to set the world on fire.

WHY—Do You Use Tone Arms

"off the shelf"? You spend time and money freely on the design of a cabinet, why compromise on the tone arm? Why don't you put the same thought into the tone arm? Make it at least as distinctive as the cabinet.

We have experts who are specialists in designing tone arms that will blend with your cabinet in quality and appearance—that will continue quality unbroken from sound chamber connection to stylus groove.

These men are ready to serve and prove to you by sketches and figures that "INDIANA" made tone arms will increase the value of your machine and make it a better selling proposition.

Bear in mind that acceptance of this service does not obligate you in any way and anything developed for you is for you exclusively, and is not sold or sampled to your competitors.

WE ESTIMATE FROM SAMPLE OR BLUE PRINT

"INDIANA" DIE CASTING COMPANY

East 11th Street at Cornell Ave. INDIANAPOLIS, IND.
EVERY good product desires a good name. We want the Talking Machine trade to supply us with a good name for our product, needles made right to play right.

To the person or persons who suggest the most appropriate name for our needles we will offer as a reward 100,000 needles. None is barred from participation. We prefer the suggestion of some coined word that can be copyrighted.

To assist in selecting the proper name we wish to state that we will manufacture the best steel needles that can be put on the market.

Needles should be changed for each record played. Our process of manufacture will be such as to insure the reproduction of every delicate shading and tone. Continued use of our needles by your customers will mean contented patrons at all times.

We are desirous of hearing from distributors of needles who wish to establish a source of supply which can be depended upon at all times for quality, price and real service.

The contest will close at noon on March first, and the name chosen for our quality needles will be announced in the March issue of this periodical. In the event that more than one person suggests the prize-winning name, the full reward of 100,000 needles will be given to every one who submits said name. Anyone interested in the Talking Machine industry is invited to participate. All we ask is prompt action and to indicate at the same time the name of machine handled and firm with which you are connected.

Record Needle & Manufacturing Co.
Manhattan Bldg., Milwaukee, Wis.
Dollar bait! Al Jolson has sung the great Dixie hit, "I'm All Bound Round with the Mason Dixon Line." A Columbia headliner for March.

Columbia Graphophone Co. Woolworth Building, New York

WESER PHONOGRAPH

For 39 years the piano trade has recognized in Weser instruments the highest piano and player piano value. It always has been our delight to invite comparison of the Weser products with those of other makers. Many of our best dealers have been acquired by such comparisons.

Weser Phonographs are making rapid headway in the same manner. Compare them with the world's most expensive makes—in tone quality—in appearance—in reliability, and solidity of construction, and we are content to abide by your decision.

The Weser Phonograph will play any record. Made in satin finish mahogany. Other woods on special order. Electric motor will be furnished if desired. Write for catalog.
Necessity—The Mother of Invention

The Great World War has taxed the resources of the human mind, both lay and professional, to produce substitutes for articles made scarce.

Humanity has benefited by this, for in experimenting many new substitutes have been brought to light that are an improvement on the original articles.

These are here to stay.

We are now offering the trade a new needle—the Vallorbes Semi-Permanent Needle for playing lateral cut records.

At present, they retail for 15c per package of five and will return far more reproductions than 15c worth of the ordinary changeable steel needles will. They will not damage records. The points are parallel and as they wear down do not enlarge the lateral surface as do the tapered steel needles, thus conserving the life of the record.

Send 25c in stamps for a sample package. We will also send you dealer’s discounts, etc.

THE TALKING MACHINE WORLD

WHY ONE PRICE POLICY IS RIGHT

The Right Price for the Right Product Insures Satisfaction and Makes Better Business for the Salesman and Satisfies the Customer

The desire is born in the majority of people to purchase an article a little bit lower than the quoted price. Even though the original price may not be so high, a feeling of elation pervades the being of the person who has succeeded in beating the shopkeeper down. It flatters his vanity, and after a successful deal he considers himself an excellent business man. But does he ever take into consideration the fact that if a man lowers a price on his goods it really wasn't worth the first price, anyway, and probably isn't even worth the second price? How disappointing is it to a man who purchases an overcoat after haggling down the salesman to see a duplicate of his coat in the window the following week tagged at least $5 cheaper?

The one-price policy eliminates all the dissatisfaction that arises from the thought that the lapse of a week or so will probably see the lowering of the price of a purchased article. Those people who are unable to buy anything without haggling over the price need not trade with a one-price house. But the person who desires real satisfaction will find it in that house and in that house only.

Another advantage of this system is that it makes it easier for both the salesman and the customer. If the price quoted is too high, the buyer is privileged to look at other goods not quite so expensive. No friction arises between the two; no argument is possible when the goods are permanently priced. The manager of the one-price establishment is in peace and is not called to make an article any cents cheaper than it is marked; he is enabled to carry on his end of the business without any unnecessary interference.

Of course, it takes time to educate some people to this system. It takes some time to impress upon them the desirability of a process in which it is impossible for human nature to enter and prove that the "Survival of the Fittest" is the winning law. This great system is a time saver and an energy saver. It does not leave the salesman utterly exhausted, so that he is cross and uncivil to the next customer he waits upon. It does not make his day one constant battle of wits. But what it does is to give him more time to display his goods and explain their value to each customer as he comes along.

And what does it do for the customer? It gives him more time to go from shop to shop and get exactly what he desires. He does not have to buy in the first shop he enters because he can beat the salesman down lower there. It does not leave him so weary after the long struggle that he is incapable of making another purchase that day.

But this deplorable state of affairs will not continue when every retail firm in the country adopts the only system that really gives satisfaction to both the customer and the shopkeeper.

PATHE ARTISTS IN GRAND OPERA

Artists of the Chicago Opera Co., Who Have Made Pathé Records Were Featured During the Season Recently Opened in New York

The advertising department of the Pathé Frères Phonographe Co., New York, has called the attention of Pathé dealers to the fact that a number of famous artists, who are members of the Chicago Opera Co., record exclusively for the Pathé library. As the Chicago Opera Co. began recently a four weeks' stay at the Lexington Avenue Opera House, Fifty-first street and Lexington avenue, these Pathé artists are being featured extensively by the Pathé Frères Co., in the local newspapers.

The members of the Chicago Opera Co. who are exclusive Pathé artists are the following: Lucien Muratore, world-famous tenor; Anna Fatima, Royal Magaset, Marcel Journet and Chennai. These artists are appearing during the company's New York season, and the Pathé dealers are taking advantage of their appearances by featuring their records in every possible way.

GEORGE DEACON BECOMES MANAGER

George Deacon, former traveling representative for the New York Talking Machine Co., Victor wholesalers in Pennsylvania territory, has been appointed manager of the Economy Music Co., Scranton, Pa., well-known Victor retailers. During his association with the New York Talking Machine Co., Mr. Deacon won the esteem and friendship of the Victor representatives in his territory whose intimate knowledge of dealers' problems will doubtless enable him to achieve pleasing success in his new post.

A QUESTION WORTH CONSIDERING

"What have I personally done the last year to help increase profits?" is a pretty good straight forward question to put to ourselves. Each one knows in his heart what the answer shall be; whether he has put his shoulder to the wheel, or, on the other fellow take care of profits. That is not the point, however. The past is gone, but it can help us to take stock and plan for the future.

EDISON DISC JOBBERS TO MEET

Annual Convention of Association to Be Held at Hotel Knickerbocker on February 18 and 19—An Interesting Program Planned

The annual convention of the Edison Disc Jobbers' Association will be held at the Hotel Knickerbocker, New York, on February 18-19. As is usually the case, the elaborate program is being arranged for the affair. There will be papers on important business subjects read by members of the association, talks by factory officials and comprehensive discussions of business conditions. Although nothing official has been announced it is believed that the factory will provide the usual entertainment for the visiting jobbers, which generally includes a dinner and theatre party.

The present officers of the association are: Walter Kipp, of Indianapolis, president; L. N. Bloom, of Cleveland, vice-president; F. E. Bolsway, Syracuse, N. Y., secretary; and H. H. Illish, Des Moines, Ia., treasurer.

OPTIMISTIC REGARDING BUSINESS

R. W. Greaser Finds Delphene Jobbers in Atlanta and Dallas Steadily Expanding Their Agencies Throughout an Important Territory

Bay City, Mich., February 6—R. W. Greaser, sales manager of the Delphene Co., in this city, returned from a trip to Atlanta and Dallas, where he visited the Delphene jobbers who established headquarters in these cities during the past few months. Mr. Greaser states that these jobbers are very optimistic regarding business for the new year, and he was pleased to learn that they had established a number of important agencies in their respective territories, which means enlarged sales.

Mr. Greaser states that the greatest difficulty of the Delphene Co. at the present time is in getting machines to these jobbers soon enough to meet the demand. He states that the Delphene product is being accepted enthusiastically, and that it is being sold with push and earnestness. He is quite optimistic regarding the way in which the Delphene is being received and contracts already closed will triple the factory output for 1918.

AL WILLIAMS TAKES CHARGE

Scranton, Pa., February 8—Jack Davis has resigned as manager of the Victor establishment of Storm & Faust, of this city. He is succeeded by Al Williams, who formerly occupied this position and is well known in the local Victor trade.

NYOIL

is the last word in the refining of high-grade oils, for every impurity is taken from it, leaving nothing but what is required to keep machines in perfect condition, being combined of four oils perfectly blended.

Will not Gum, Chill or become rancid; is free from acid. It is colorless and has no sickening smell, being absolutely odorless.

"The finest and most delicate pieces of mechanism do not prove effective unless properly lubricated. Skill, Genius, Invention and Workmanship must have the proper Oil. Stop and consider this when you have Oil for your household one.

A family can never have enough Oil."

Hundreds of satisfied customers have written us that they would never use anything else for TALKING MACHINES, GRAPHOPHONES, PHONOGRAPHS AND SEWING MACHINES

NYOIL will lubricate the machinery and polish all woodwork and can be obtained of any "Up-to-date" Talking Machine Dealer in the world, and is manufactured by Wm. F. Nye, who for 50 years has made 80% of all the Watch, Clock and Chronometer Oil that is used in America.

WM. F. NYE, NEW BEDFORD, MASS., U. S. A.
BUILDING UP or TEARING DOWN?

Which are you doing in your Talking Machine Business?

Just remember that unless you are putting real quality—super merit—into the working parts of every Talking Machine you make, you are tearing down instead of building up. Every poor machine sent out hurts you, hurts the dealer and displeases the customer. The success of your business depends on your motor. Build quality into your product. Use the one best motor, because it is the life of your machine.

The Dayton Motor

is considered by manufacturers as being the

Best Motor in the World

The highest engineering skill was appealed to, and responded with designs for the “Dayton.” The machine is built by careful workmen, trained in such enterprises as National Cash Register, Delta, Computing Scale, Wright Airplanes, and others which have given Dayton the title, “The City of Precision.” Its workmanship had to be the highest to equal the merit of the design. It has made good wonderfully in thousands of machines.

You will gain reputation and re-orders if you equip your Talking Machines with it, and you will have no motor troubles. Why take chances on other makes when the “Dayton” means satisfaction?

Dayton Tone Arms are universal, playing any disc record. Five styles.

Dayton Reproducers are scientifically correct, and thoroughly practical. Two styles.

Write and let us tell you how to enhance the value of your machines at no more cost. Get our new phono-parts catalogue.

The Thomas Manufacturing Co.

322 BOLT STREET

DAYTON, OHIO
THE WORLD PROMINENT IN EXHIBIT

This Publication, Together With The Music Trade Review, Featured as Representative Organs of Two Leading Divisions of Music Trade at Trade Journal Display in Newark

Two of the outstanding features at the Trade Journals’ Exhibit now being held in the Library Arts Building, Newark, N. J., under the auspices of the Newark Free Public Library and the Newark Museum Association are The Talking Machine World and The Music Trade Review, which are prominent publications of the representative organs of the two divisions of the industry which they cover.

The World and The Review are placed in conspicuous positions on sloping screens near the entrance of the exhibit, so that they may be readily seen and examined by those who attend. Altogether there are about one thousand trade jots without any attempt to enumerate all branches of business in the industry, many of them little known by the layman. The exhibit, however, serves to emphasize the importance of strictly business publications, for the two Journals have not at least one representative publication in the group.

The Newark Library has a business branch which makes a specialty of “Prints for Business Men.” Over 250 trade journals, 350 house organs, and hundreds of publications along other and often obscure lines are on file at all times and the library subscribes for about $3,000 of such publications annually.

The library officials have long been urging the publication of trade periodicals in the city, and literature recently issued says:

“Why does the teacher teach children to read and give them practice in reading fiction, poetry, essay, drama, literary description, and give them to read so little of directly informational material? Children ask for facts, Heaven knows; and we give them only fancies. Why does the teacher teach children to write friendly letters, anecdotes, descriptions of natural scenery, biographical sketches, moral homilies, yea, even poems, and fail to practice them on clear narration of how the Clothes Wringer Works and What to do to a Squeaking Hinge, or de.

scriptions of the Purse I Lost, or Jack’s Boh-sled? Why do librarians act as though their buildings were constructed and their salaries paid for lending light literature to be lightly read by light heads? And, for that matter, why do business men give to demand that the exist-

ence of things written for the business world be recognized in libraries, and finally, why do not the business man read what the libraries do have if material that would be of value to his work and and life and business?

“This exhibition stimulates one to the asking of these questions. If they will come to see it, it will stimulate some of the community to answer them.”

COLUMBIA EXPANSION IN CANADA

Mervin E. Lyle, of the executive office staff of the Columbia Graphophone Co., has been ap-

pointed to the Canadian division of the company for the time being as assistant to James F.Brad, general manager of the Columbia, in the instal-

lation and organization of a new Columbia fac-

tory in Canada. Mr. Lyle’s many years of ex-

perience in the manufacturing division of the Columbia Co.’s activities ideally equip him to render material assistance in the establish-

ment of the new plant.

FILE SCHEDULES IN BANKRUPTCY

Phonograph Specialties Mfg. Co., of 120 Walker street, New York, has filed schedules in bankruptcy with liabilities of $11,091, of which $3337 are secured claims. The assets of the concern are listed at $4,891.

The Peyer Music Co. has opened showrooms at 415 Cedar street, St. Paul, Minn., where they are featuring Columbia Gramofonolas and Sonora phonographs. W. H. Simpson is manager.

TRADE situation in SWITZERLAND

U. S. Consul at Berne Tells of Class of Talking Machines in Demand in That Country

WASHINGTON, D. C., February 7.—United States Consul at Berne reports that there are some very strong concerns producing talking machines in Switzerland, but German products have a very large sale. Talking machine parts are manu-

factured extensively in and near Geneva. The greatest concern is the Deutsche Gramophon Gesellschaft of Berlin, represented in this district by Kaiser & Co., Marktgasse, Berne. No talking machine discs are manufactured in Switzerland. Mostly all of them are imported from France and Germany. Current prices are: German (American) makes, from $32 to $50; German, $8 to $12; Swiss, $7 to $100; French, $10 to $10. German, French and Belgian discs are on the market at $9.80 to $11.50. Since the war started prices have increased 15 per cent.

The German Gramophon Co. of Berlin and Pathé of Paris have the largest share of the trade. The German imports, including German-made American machines, amounted in 1914 to $47,826, and French imports to $15,488, while the direct American imports were valued at $8,752.

Talking machines without horns have the widest sale, but the demand has been reduced by the war. Orders are regularly executed by Ger-

man manufacturers, however, at $5 per cent. is granted to dealers on talking machines and discs. France is a keen competitor in discs.

The exports of talking machines, cinematographs and similar machines in 1914 amounted at $384,574; the imports, to $70,755. The duty on phonographs, according to the Swiss customs tariff No. 955, is $3.86 per 200 pounds.

The Victoria Talking Machine Co. contributed $2,500 to the $50,000 fund being raised by the Knights of Columbus, of Camden, N. J., for work in the army cantonments.

BAYONNE, N. J., DEALERS ORGANIZE

Talking Machine Men Form Association for Purpose of Bettering Business Conditions

The talking machine dealers of Bayonne, N. J., who are far from New York City, have organized a local association and adopted for it the name of “The Talking Machine Men of Bayonne,” with Louis Gurian, president; E. G. Brown, secretary, and S. Wolfson, treasurer.

The association was organized at a meeting held recently in the store of the Bayonne Talk-

ing Machine Co., under the direction of Mr. Gurian, and it was believed that by getting to-

tgether the dealers it might aid in eliminating the various trade abuses, and otherwise improve trade practices.

E. G. Brown was named a committee of one to draft and submit a constitution and by-laws for the new association, the charter members of which are Mr. Brown, S. Feldman, Louis Gurians, Harry Gleich, T. H. Reifer, S. Wolfson, J. H. Marshall and E. F. Munly.

FEATURING HEIFETZ RECORDS

Victor Co. Issues Handsome Posters for the Use of Talking Machine Retailers

The four new Victor records by Jascha Heifetz represent the latest sensation in the Victor catalog, for this young violinist has taken the musical world by storm. The Victor Co. has planned its advertising to give full prominence to the Heifetz records and has sent to dealers most artistic postcards bearing a life-size portrait of the virtuoso, together with an announcement of his exclusive contract with the Victor Co. and the production of his first records. Special advertising electro's are also provided.

The Mid-West Phonograph Co., Chicago, has been incorporated with a capital stock of $2, 500 by Marion Luce, Anna Thunstrup and H. A. Boelset.

Manufacturers—jobbers—dealers

PERFECTION FLEXI-TONE reproduces attached to PERFECTION full-housing tone arms No. 3 and No. 4 play all lateral cut records, on all types of Edison Disc machines. Made in nickel and 24 carat gold finish, extra fine quality disc.

Tone arms fitted to Edison machines only

PERFECTION FLEXI-TONE reproduces No. 3, No. 6 and No. 7 full types of Victor and Columbia machines. Made in nickel and 24 carat gold finish, extra fine quality.

These reproducers and arms are the very finest made mechanically. The PERFEC-

TION FLEXI-TONE reproducers are the most perfect phonograph reproducers built, reproducing all lateral cut records, from the highest pitched soprano, to lowest pitched bass, as perfectly as the records were recorded in the recording room. Wonderful clarity of sound, as well as great volume. Extra fine quality of finish guaranteed. Manufacturers, jobbers and dealers will find in this line of reproducers just what they have been looking for, as they are assembled by skilled workmen especially adapted to this kind of work, producing a product built with watchlike precision.

All accessories in stock ready for immediate shipment. Phonograph machines can have PERFECTIOn FLEXI-TONE reproducers fitted to their machines. Write for prices, information, etc.

SAN FRANCISCANS OPTIMISTIC ABOUT TRADE OUTLOOK

Believe Action of Government Has Done Much to Help Freight Conditions—Considerable Stock on Way From East—California Phonograph Co. Takes Over Kohler & Chase Department

SAN FRANCISCO, CAL., February 5.—The demand for talking machines of all grades continues very great, particularly in the Bay area. Shipments are slow in coming in and the stocks of some of the more expensive machines, especially those in art cases, are practically exhausted. The last arrivals have been the familiar stereos of the freight and the subsequent order of Fuel Administrator Garfield shutting down industrial plants for a period of from five to seven days demand considerable attention. The first realization came that the order was for the purpose of relieving the freight situation a more optimistic spirit prevailed. The last shipments have been sold out and factory and this year’s demand has kept up so well that the dealers feel that they will get enough stock to keep them going, even if it is not just the kind that they want. The public is beginning to understand the situation as it applies to phonographs, much better, and in most instances the would-be purchasers are selecting some other case when they cannot get just what they wanted. This keeps the stocks moving, and notwithstanding the clouds of doubt in the sky for the present business is good.

Benzing over the Convention

F. A. Dennison, formerly district manager for the Columbia Graphophone Co. and newly appointed local manager of the San Francisco office, accepted the reins from San Francisco manager, together with T. O. Moore and Paul West, of the dictaphone department, and has started up the company’s convention in New York. They are all enthusiastic over the convention and the prospects for the coming year. During the absence of the district and local manager A. G. Pargum had charge of the business. Both managers speak in high terms of his efficient management while serving in the dual capacity of district manager and sales manager. S. Stratton, district manager of the Columbia at Los Angeles, returned with the San Francisco boys, and spent several days in this city before returning to his duties in the South. W. W. Weaver has joined the local sales force.

B. buys Stock of Fox Piano Co.

The Jackson Furniture Co., of Oakland, which is responsible for the talking machine department and stock of the Oakland branch of Kohler & Chase, could not reach an agreement with the latter and broke off negotiations. This week the company purchased the Piano Co., and with the purchase secured a Victor sales agency.

California Phonograph Co.’s Important Move

Kohler & Chase, of this city, have sold their entire stock of talking machines to the California Phonograph Co. and gone out of that end of the music business. As yet they have not sold their stock in the Oakland store, although it is understood they are several dealers negotiating for it.

California Phonograph Co. by the purchase of the stock of talking machines formerly handled by Kohler & Chase, secured the Victor agency to add to the California and Edision, which it already possesses. This company, which started as a branch of Eilers music house and later became independent, it moved to its present quarters just before Christmas, retaining its display on the ground floor of Eilers until this middle of the month when it moved the balance of its goods to the second floor and added binding it to the parent house was severed.

Plans an Active Campaign

The Steger talking machine, made by the Steger press, is still enjoying considerable and some favorable attention on the Coast. George Heidinger, who represents the company, says he is going to make an active sales campaign with the machine this year.

Stern Talking Machine Corp. Branching Out

Frederick Stern, of the Stern Talking Machine Co., has been very busy opening sales in several Coast cities. This company was formed only a couple of years ago and now has stores in Oakland, Los Angeles and Richmond as well as San Francisco. Mr. Stern says his only difficulty is in getting stock. He finds the easiest part of business is to raise money to finance new stores and to sell machines.

Progress of Brunswick Phonograph

The Brunswick-Balke-Collender Co., with headquarters in this city, has established an agency in every city of any size in the State, and is planning to run a big campaign for 1918. The local manager is a “live wire.”

Geo. W. Lyle Enthusiastic Over Pathé Prospects

George W. Lyle, general manager of the Pathé Company, has become the western manager for Western cities with San Francisco as his temporary headquarters. While here he went over the situation with the dealers, especially with the California Phonograph Co., who act as agents for the Pathé machine. Mr. Lyle is enthusiastic over the outlook for the present year, and says that his machine is constantly growing.

Sells Carload Quickly

George T. HViley, manager of the phonograph department of the Eastern Outfitting Co., says that he received a carload of Columbia phonographs shortly after the first of the year, and nearly all of them were sold before they arrived. The rest, he says, were quickly snapped up and now he is trying to get some more rushed through.

Anxiously Waiting Victrola Shipments

Sherman, Clay & Co. have received notice that a shipload of Victrolas is to be shipped to them, and A. G. McCarthy, the manager of the department, says that their arrival will be very welcome, as his stock is very much depleted. After the carload arrives they ought to arrive in about twenty days, but under present conditions he cannot predetermine when the machines will get through.

Developing Pacific Coast Trade

The senior member of the firm of Passow & Sons, of Chicago, who make the Musictrola, has been in San Francisco for some time assisting in making their talking machine better known on this Coast. The Century Co., which has two stores in this city under the management of Miss Field, is the agent for the Musictrola, and during his stay Mr. Passow makes his headquarters at these stores.

Featuring Lansing Khaki Covers

W. S. Gray, manager of the Domestic talking machine, has moved his office to 530 Chronicle Building, where he is planning to open up a general manufacturers’ agency for lines used by talking machine dealers. Mr. Gray is now representing the Lansing khaki moving covers made by H. E. Lansing, of Boston, and should be able to place these necessary supplies in every live agency along the Pacific Coast.

Edison Shop Pleased With January Trade

The Edison Shop in this city reports that its last year’s business was more than satisfactory, and that the business opened up in January looks as if this would be a banner year unless something unforeseen happens.

Joins the Baldwin Sales Force

William Lawrence, who for a long time was with the phonograph department of the Em- porium department store, and more recently in the same department at Kohler & Chase, has, since the latter discontinued its talking machine department, made connections with the Baldwin Co., in this city.

Making Machines in Pasadena

Coops & Sons, who have been manufacturing talking machines in Pasadena, are said to have improved their machine so that it will now play all makes of discs and records. The company is establishing agencies all over the Pacific Coast.

MEXAPHONE CO. INCORPORATED

The General Mexaphone Co. of West New York, N. J., has been incorporated for the purpose of manufacturing mexaphones with a capital stock of $500,000. The interested parties are: Henry T. Crapo, Boston; Willis A. Farnsworth, Winthrop, Mass.; James H. DeJeen, Brookline, Mass.; William Walser, West New York.

An Open Letter to Every Live DEALER in the Trade

We want more dealers to know about STRADIVARA, and the quickest way we know how to do so is to "deliver the goods," and here’s how we intend to do it:

Why Not Feature
The Century Phonograph
as Your 1918 Leader?

What the Century Represents

The dealer who handles the Century Phonograph is not handling an experiment or a fly-by-night product, but a substantial, established and guaranteed phonograph.

Why the Century Leads

The Cabinets are manufactured by the largest talking machine cabinet manufacturers in the world, the Century Cabinet Co. The tone quality is pronounced by experts as unsurpassed and every part is a distinctive Century product. The Universal tone arm on the Century phonograph is the best on the market and an established success—every part on this phonograph except the motor is a Century guaranteed product, and the motor is the best obtainable.

What We Offer the Dealer

We offer progressive dealers a complete line of machines and a liberal proposition, backed up by a company that is in business to stay—not for a few weeks or months.

What Amount Should A Dealer Spend to Make Publicity Profitable

:: By W. Denville Simons

The talking machine dealer who avoids advertising is a man absolutely make the dodo before very long. Here and there may be found firms or individual traders who, by virtue of a good position contiguous to some more successful rival, are able to “ reap what they have not sown,” and benefit by efforts to increase trade to which they have contributed nothing.

But firms nowadays are, however, in the exception, and the item of advertising looms more or less largely among the expenses which have to be watched warily so as to attain the greatest possible result for the money spent.

In the face of competition, which grows keenly every day, advertising is absolutely imperative and necessary if a respectable profit be to realized.

Certain expenses are incidental of course to every business, and it is a well-known axiom that “one must spend money to make money,” and this cannot be avoided. The money for rent, light, taxes, delivery charges, and salaries, all has to be spent before money can be earned to constitute a profit, and in the same way advertising is coming to be regarded more and more as an inevitable charge.

Here is no experimental work in advertising nowadays, as it has been conclusively proved to be a profitable investment, but the question is, what is the right amount to devote to this indispensable item? In this article it is proposed to endeavor to fix a standard of advertising cost whereby individual cases of advertising may be tested and a more or less satisfactory working basis arrived at.

Many traders working under different conditions in different localities have given the writer the benefit of their experience, with the result of such information imparted being of considerable value.

Broadly the trade must be classed as national and local, each having its own distinct problems to solve. It is not proposed to deal with the national advertising problem, though doubtless investigation here would demonstrate that advertising nationally is even more costly than the local. The reason to be borne in mind is that the large city stores making any State their field of operations are considered general advertisers to a large extent that would have to pay a local store to emulate. Consequently we are here concerned only with the traders with a definite circumscribed sphere of influence.

The average local trader who inquires of the several departments runs several advertising agencies in the distinctly local problem and therefore this is the object of our consideration.

After making every inquiry and giving careful thought to the whole subject the writer believes the average figure to be somewhere about four per cent. on the gross turnover, which should cover all work and mailing charges on your mailing list and whatever press advertising is done. This may be rather a generous estimate to some, though many successful traders place it higher.

Below this figure is just enough to make advertising an irritating expense, but not sufficient to make the expenditure an investment. No man can advertise a business of this kind scientifically and profitably on less than four per cent., although it ought to be nearer the five per cent. mark.

A dealer advertising to a better class clientele at slightly under this figure obtains a small measure of results, while the aggressive dealer or store out for the trade of the Tom Dick and Harry type, to supply everything that brings in a profit at all, must be prepared to come nearer the five per cent. of his gross turnover towards his advertising expenditure. The above figures are arrived at by actual experience of men who regularly advertise and who should know. Furthermore, the firms who have given the writer the above information are now successful and progressive, and not likely to continue spending money without being perfectly assured it is for their own benefit and profit.

For the benefit of the doubters as to the advantage of spending so much money, a few words as to what advertising really means to a business man would not be out of place.

Far too many business men consider advertising a bugbear—they feel they ought to advertise, and when they make a spasmodic attempt, it has the experience of a nightmare, and is a constant worry until it is safely handed over to the postal authorities for distribution.

Can you wonder why such men doubt if it pays? Then again, class of advertiser expects too much for his advertising, as should his announcement fail to produce an immediate return of orders the whole system is put down as being no good, money thrown away, etc.

That is the fetish of “direct result” which has a deterrent effect on many a man who could advertise to his own great advantage, but fails to grasp the real significance of what advertising can do for him.

One of our cleverest American copyrighters once said: “The essence of advertising is repetition that is indispensable to any considerable advance being made.” That is a solid truth and nothing will create reputation quicker than smart and careful advertising. It goes without saying that the writer who must be backed up by the performed action, otherwise it was best that it were not written.

The greatest value of any advertisement, in the writer’s opinion, however, lies in the power of suggestion. It is now well recognized that people do not always buy merely the things they want in a strict sense of the word. If that were so many talking machine houses would find, like Othello, their occupation gone.

It’s the things people believe they want after reading a carefully drawn out advertisement that increase the turnover, and the fellow who draws up the advertisement helps the “almost persuaded” to make up their minds. A salesman must have his customer in front of him before he can do anything, whereas the work of the advertisement can be done anywhere, and this is its chief value.

Any particular line advertised may not be asked for at once if the talking machine is used as a side line in the business, but they have stimulated interest and brought the folks into the store to spend. That is what you pay the 4 per cent., for and it is worth it every time.

Don’t let it be believed that the writer has no belief in the possibility of direct sales from advertising. Such is far from the case, but the contention is that the ordinary retail business must look for more or less indirect results, in fact, will find it more satisfactory to proceed on such lines and be guided by the collective effort.

Advertising is but one link in the chain of business. One wheel in the machine set up to attract custom. Do not expect one wheel or that one link to work alone and do not expect an undue share of work from other parts by omitting it.

The consideration of one other aspect of the case must suffice for the present time. The favorite cry of one who never advertises is, “we give too good a value to be able to afford to advertise.” In reality it is the advertising firm that gives good value every time, because, un—

PUBLICITY THAT AIDS PRESTIGE
An Illustration of How Ads With a Strong Amount of Newsy Personal Flavor Help to Interest Public in a Talking Machine Store

The recent newspaper advertising of the Martin Bros. Piano Co., of Springfield, Mo., offers retail talking machine department. The second piece of "copy" is a very striking way of letting the local community know about "the boys who have joined Uncle Sam's fighting forces." Particularly in the smaller-sized cities this latter type of advertisement must have a strong amount of newsy personal interest.

SUCCESS FOR THE PRESENT YEAR
The Pepstalist, Issued by the Columbia Graphophone Co., Contains Interesting Forecast of Possibilities for Success This Year

Under the heading of "Success in 1918" the following timely and interesting article appears in the current issue of The Pepstalist, the successful house organ published by the Columbia Graphophone Co. for and about Columbia men:--"The year for the recasting of the American people is coming. "

"Music Is a Real Necessity—Now in the midst of strife, the human soul, whether of the rich or of the poor, has the right to be fed and satisfied. People are too busy to make music of their own, but they will listen. Music is the voice of the people.

"Every Night in the Music Line"

A new feature of the Martin Bros. Piano Co., is introduced in the Pepstalist. The "Every Night in the Music Line" spotlights the activities of the company in an appealing manner. The feature is aimed at the newsy element of advertising and is designed to make an impression upon the public.

"EVENING IN THE MUSIC LINE"

A new feature of the Martin Bros. Piano Co., is introduced in the Pepstalist. The "EVENING IN THE MUSIC LINE" spotlights the activities of the company in an appealing manner. The feature is aimed at the newsy element of advertising and is designed to make an impression upon the public.

How W. G. Fulghum Told of Victrola Owners in Richmond—A Sales Developing Idea

Business is certainly humming down in Richmond, Ind., where Walter G. Fulghum is now engaged in the retailing of Victor talking machines and records. Mr. Fulghum the latter part of the especially commendable ideas Mr. Fulghum introduced during the holiday season consisted in a window display, the central feature of which was a large map of the city of Valparaiso, Ind.

A Window Display With a Purpose of January informed The World regarding several of the new plans he is trying out. One of the especially commendable ideas Mr. Fulghum introduced during the holiday season consisted in a window display, the central feature of which was a large map of the city of Valparaiso, Ind.

Mr. Fulghum and Car in Front of Store Richmond. On this map tacks had been set in to represent every Richmond home in which a Victrola was already resident. This unique tabulation not only offered concrete evidence of the great popularity of the Victrola in Richmond homes, but also aroused considerable interest among the local inhabitants, who frequently gathered before the window in order to pick out their own personal friends in town who owned a Victrola. The size of the map made it easy possible to tell exactly what home each individual lived in.

Another idea, apparently simple and yet full of value, that Mr. Fulghum is now employing is what for lack of an official title may be called a score-card calendar. This presents on each sheet the days for just one month. As soon as the first machine sale is made a cross is marked through the first day of the month. Each machine that is sold thereafter means the crossing off of another day on the calendar. The goal is to sell one machine for every day in the year and at the present time the crosses have already been registered several days ahead of the actual date. This plan has developed a remarkable "esprit de corps" among the salesmen as every one in the organization watches the calendar with keen interest and fights to keep the sales right up to scratch.

Two Words comprise Mr. Fulghum's motor fleet. One of these is a delivery car and the other, a picture of which is herewith shown, is utilized for direct personal solicitation. Mr. Fulghum has succeeded in drawing a word picture of Mr. Edison that will prove a revelation even to those privileged to have a business acquaintance with the great inventor. He has brought out facts often overlooked in the average biography, and portrays Mr. Edison not as a man apart but as a man among men. He points out that there are two Edisons—one is the Edison of coldly scientific mind, who reasons ruthlessly and relentlessly to a conclusion far beyond the average man's foresight. The other is an Edison vividly human, intensely sympathetic, extremely generous and incessantly active in the interests of mankind. Edison can be the lion that he resembles, he can even be unjust; but he is never vengeful, and he is unfailingly generous."

FINE BUSINESS RECORD IN LOUISVILLE

The talking machine department of the Kaufman-Straus Co., Inc., Louisville, Ky., of which H. V. Boswell is manager, has been moved to the second floor, a much better location than heretofore, where a good stock of Edisons and Cubistias is being shown. Business last month showed an increase of 25 per cent. over the same month last year, while an idea of the holiday business may be gained from the fact that the day before Christmas the department sent out thirty machines, all sold for cash.

SOME PERTINENT POINTERS

Customers are guests, and more, they are guests that pay. Be sociable with your customers; they like it. The more people you know personally, the greater can be your hold upon your trade. If people talk about your store, if it becomes noted, you will do business. Get all your store improvements commented upon in the news columns of your papers. It costs nothing and it all counts.

TRAVELERS' LICENSE IN CHILI

The United States Consul General L. J. Keena at Valparaíso, Chili, reports that importers in that country are urging enforcement of the law of December 22, 1916, imposing a license tax of $50 pesos (about $20) on foreign commercial travelers. The importers threaten to refuse to do business with any salesman who has not obtained the necessary license.
THE TRADE IN PHILADELPHIA AND LOCALITY

PHILADELPHIA, Pa., February 4.—The month of January was a profitable one for talking machine dealers in this city, despite conditions that served to keep the trade guessing most of the time. The poor transportation facilities handicapped the jobbers considerably in the shipment of their machines, but the fact that it was hard to ship machines out of the city worked to the advantage of local dealers in carting distances of the jobbers' warehouses.

Although there was considerable improvement in the Victor machine situation during the month, both jobbers and dealers were only able to get a percentage of their record orders filled from the factory, due, it is believed, to various conditions, including labor, governing record production. Dealers in Columbia and Edison lines also reported stock shortage, due to delayed shipments from the factory. The trade, however, is keeping up courage, and for the most part is optimistic regarding the future.

New Columbia Dealers' Service Pleas

The Columbia Graphophone Co. (formerly the Pennsylvania Co.) report that their business in January was quite satisfactory, and especially so considering the circumstances. Their new dealers' service has been meeting with hearty approval, and the latter appreciate the assistance the Philadelphia office is giving them in the exploiting of the Columbia, both machines and records. They had an enormous record business in January, and having had the foresight to order heavily, they felt little the inconvenience in the delay of shipping, caused by the weather and the freight embargo.

W. C. Fuhr, formerly the district manager here, has gone on a trip to Florida for a rest, and will not return until the end of the month. The Dictaphone office of the company, now at 924 Chestnut street, has changed managers, C. J. Welford being replaced by Clifford Malliet. O. F. Jester, formerly connected with the Baltimore store of the Columbia, has joined the Philadelphia offices as salesman. The local manager says that he is very optimistic over the business this year and adds: "I feel that if we get some relief from this transportation condition, it will be the greatest year in the talking machine business."

Business Good With Buehn Co.

Louis Buehn, of the Louis Buehn Co., says that his business has been very good, considering the situation. "We were tremendously handicapped by the lack of goods, especially records, and by shipping difficulties, but in spite of all these troubles we have had a very good month. Our machine shipments this month have been about on a par with last year."

Gillies Co. Buys Connor & O'Neill Stock

The James B. Gillies Co., talking machine dealers at Broad and Susquehanna avenue, have purchased the stock of the Connor & O'Neill, and has removed it to his store. The Connor & O'Neill firm have been located for a number of years, on Fifteenth street, below Chestnut. Mr. Gillies has one of the finest stores up town, and is constantly being compelled to enlarge it.

Increase Prices

G. Dunbar Shewell, who is the eastern representative of the Cheney talking machine, has announced in the papers the past week that the Cheney will be raised in price from $15 to $25 beginning the first of February.

Dictaphones for Large Companies

The Dictaphone Co. report that their business was very fair in January, and they believe it will be very good from this on. Owing to the great scarcity of stenographers and typists they have just placed a complete outfit of the Dictaphone in "The Grit" office at Williamsport.

with George Wharton Pepper; the Lehigh Portland Cement Co., of Allentown; and the Wasser-Neust. Mfg. Co. have added a large complement of machines during the month.

Penn Co. Stocking Up

Manager Barnhill, of the Penn Co., says that in January our business was about as good as could be expected under the weather conditions, the freight embargo, and the impossibility to move stock promptly. "Records have been very scarce and especially in the better grades." Mr. Barnhill, however, believes that business is going to be first rate this spring and summer, when transportation again becomes normal, and they are getting in a stock that will assure them the ability to fill all orders, and with promptness. J. Fisher, of C. C. Mellor Co., Pittsburgh, Pa., was one of the recent visitors to the Penn Co.

Weymann's War Music Display

H. A. Weymann & Son have this week a very attractive window display which show how the Victor talking machine is an absolute necessity in war times. They have the machines and records done up in non-destructible packages, and about these packages are war relics picked up in many sections, and especially from the war front in France. They report that their Victor business in January was very good, and believe that the remainder of the winter and spring is going to make an excellent showing, for Mr. Weymann says that music, he believes, has become a war time necessity.

Dictaphone Stocking Results

The Pathé Shop has been having a most excellent business in January. While there were only nineteen working days in the month, they have put forth their best efforts and have made every minute count. Their business was not

(Continued on page 38)
AGGRESSIVE Victor Record selling is the key-note of 1918 work. You cannot exhaust the record sales mine. Doubling of record aggressiveness this month actually increases your sales for March, too.

And so it goes—an endless chain of profits.

A stimulated record buying sustains its own buying power if you maintain the momentum with suggestions.

BUEHN SERVICE sees that the records you recommend are in your store to DELIVER. It is the deliveries of sales that prove the value of your record work and Buehn Service is most vital to record sales success.

Buehn Service does only one thing—"delivers the goods." And with the deliveries goes the co-operation that is helpful because it represents the nucleus of the information on problems solved by other dealers.

Buehn Service means a great deal to you in 1918.

The Louis Buehn Co., Philadelphia
From a patriotic standpoint

the Victor dealer can't jam more peace into the leisure hours of men-of-war and men-of-peace than to dole out, in ever-increasing quantities, the comfort and inspiration that characterize Victor talking machine records.

From a service standpoint

Penn service at all times is consistent with factory production and delivery.

Distributors for the Ready File for Victrola X's and XA's.

Penn Phonograph Co.

PHILADELPHIA

THE TRADE IN PHILADELPHIA

(Continued from page 36)

quite as good as in December, but of this they have no cause to complain. They are finding considerable difficulty in making shipments to their dealers, but through judicious management they have been able to keep all their dealers and have added a number to their already long list during January. They report that business looks very promising for February. Walter Eckhardt, the head of the Pathé Shop, was in New York on Wednesday of this week. They expect, in February, to make quite a publicity campaign, and are arranging some extensive recitals to be given at their warehooms.

The Pathé Shop must be seen to be appreciated.' It is one of the show places of the city. It is most artistic in its color effect and the arrangement for business, and customers cannot go away without a return announcement impressed on everything about the place, whether it is the Pathé machines and records, or the fine accommodations that Mr. Eckhardt has made for the comfort and convenience.

Closed Great January Business

Herbert Blake, of Blake & Burkhart, reports that their business was very good in January. It was the biggest January they have ever had with the exception of 1916, when their sales were extraordinary for that month. This month, Mr. Blake says, has started off very good, and that it looks very promising. He is especially pleased with the February list of Edison records, which contains many Broadway hits.

Gathering of Edison Dealers

On Tuesday night next at the monthly meeting of the Edison dealers here, which will be held at the Bingham House, T. J. Leonard, the sales manager of the Edison Co., will address

the association. Charles Gardner, the district superintendent for this district, will also be present and is expected to make a speech. They expect to have present about twenty-eight to thirty dealers.

DOMESTIC CORP. CHANGES

Horace Sheble Resigns as President and General Manager—George Anderson, Treasurer of Company, Now in Charge of Business

George Anderson, recently elected treasurer of the Domestic Talking Machine Corp., of Philadelphia, became acting head of that concern on January 25. Mr. Anderson succeeds Horace Sheble, the former president and general manager. Mr. Sheble's retirement is entirely voluntary and it is rumored he is to take up Government war work. He carries with him the best wishes and hearty good will of his associates and the board of directors.

DEATH OF MRS. D. K. WENDHEISER

Mrs. Delia Kivel Wendheiser, widow of the late Peter Wendheiser, founder of the Wendheiser Music Store at Rockville, Conn., and mother of George F. Wendheiser, at present a well-known piano and talking machine dealer in that city, died recently at the family homestead.

PLANT DESTROYED BY FIRE

The plant of the Carolina Veneer Co., Columbus, S. C., was totally destroyed by fire last week with a loss of $100,000. Among the stock destroyed was much cabinet veneer intended for talking machine manufacturing, the shipment of which had been held up by traffic conditions.

THE VICTOR TALKING MACHINE COMPANY, in recognition of his twenty years of active service as Manager of the Traveling Department, has appointed Mr. GEORGE D. ORNSTEIN a Wholesaler of Victor Products in the city of Philadelphia and the neighboring territory. In order that the retailers of that district may enjoy the benefit of Mr. Ornstein's unique experience, the undersigned company has carried on an exclusively wholesale business, with temporary quarters at 9 North Eleventh Street, Philadelphia, for the purpose of providing the retail trade with the most direct, efficient and satisfactory service.

Very sincerely yours,

THE GEO. D. ORNSTEIN COMPANY.

TALKING MACHINE MEN MEET

First Session of New Year Held on Wednesday —Amendments to By-Laws Passed—To Determine Membership Status of Jobbers

The first meeting of the new year held by the Talking Machine Men, Inc., took place on Wednesday, January 23, in the rooms of the Merchants' Association in the Woolworth Building, New York. President J. T. Coughlin, of the association, presided, and one of the most successful meetings held in some time resulted.

The action of the executive committee at a recent meeting, making an amendment to the by-laws to require seven days notice of intention to propose a new member, was adopted and the amendment will provide two days for the membership committee to investigate the candidate and allow the secretary to give the usual five day's notice by mail to every member of the organization.

The committee appointed several meetings ago to solicit new members and also try and persuade the larger stores to change 6 per cent. interest on installment sales reported progress and a new committee was appointed to assist them in their endeavors. It is thought that with a campaign along these lines during the next few months the association will be able to announce that every dealer in the Greater New York district is charging 6 per cent. interest on time sales. Already a number of local dealers have put the interest clause into effect and this has also been done by dealers who are located in the New Jersey district.

The executive committee also sent out a letter a number of days ago to the leading jobbers to test out the consensus of opinion in regards to whether they wish to continue as active or associate members. This is a question that has come up many times during the past year, and the letters from a number of jobbers show the majority of them feel they can be of more value to the organization as associate members than otherwise. This includes such jobbers as H. Ditson & Co., S. B. Davega & Co., Omnes, Inc., American Talking Machine Co., Emmanuel Blout, and I. Davega, Jr. A letter from J. Newcomb Blackman, of the Blackman Talking Machine Co., who has been interested in the Talking Machine Men, Inc., since the birth of the association, gave it as his opinion that the cash and distributor who is interested as a member, but is not interested in being an active member, should be allowed not to be a member, but as a member of the association, and that he would be interested in getting more jobbers interested in the association.

Since the death of the founder, the Blackman Talking Machine Co., had been interested in the association, and had been interested in the association.

The law committee was instructed to draft an amendment to the constitution which will embody the ideas of the distributors as well as the association in regard to the membership of jobbers. This will be done after an amicable agreement is reached with the distributors as to the fee they should pay for membership. The constitution will be amended to take in the distributors as associate members at a somewhat larger fee than is now in force, which is $3.

The secretary was instructed to address a communication to every already interested jobber, to find out their views in regard to the suggestion to close all talking machine stores at 9 p.m. If it is not feasible to close in every district at the same time, it may be feasible to do so in certain localities, and, with the expressed opinion of all the members, agreements in different sections can be made.

TRADE CONVENTION POSTPONED

Fifth National Foreign Trade Convention to be Held April 18, 19 and 20

The executive committee of the National Foreign Trade Council announced this week that, owing to the railroad congestion and the desire of the Council to co-operate with the Government in the relief of the situation due to the war, the dates of the fifth national foreign trade convention, to be held at Cincinnati, O., have been changed from February 7, 8 and 9 to April 18, 19 and 20.
This is the MOTOR whose phenomenal success made it necessary for us to double our factory capacity.

The "Butterfly Motor" has won the endorsement of leading talking machine manufacturers everywhere. It is giving excellent service under exacting conditions, and is a motor that is guaranteed in every detail. Read its specifications and you can readily understand why the Butterfly Motor is accepted as a standard in its field.

Try a Sample of
The BUTTERFLY Motor. You will use it exclusively after a thorough test.

SILENT BUTTERFLY MOTOR
Jewel Bearing

Specifications

Beveled gear noiseless winding.
New ratchet device that prevents clicking.
Bakelite intermediate gear—absolutely silent.
Plays seven to eight 10-inch or five and a half 12-inch records at one winding.
Cast iron nickel plating.
Powerful, durable, compact, accessible.
Built especially for the highest-grade machines.
Guaranteed in every minutest detail.
The perfection of mechanical genius as applied to the phonograph motor.

INDIANAPOLIS DEALERS REPORT LARGE JANUARY TRADE

Record Business Has Been Exceptional—People Staying More at Home Has Helped Sales—How Victor Publicity Helps—Good Demand for Talking Machines But Difficult to Get Them

James Gage, Inc., February 5.—Although the month of January was the coldest in the history of the local weather bureau and in spite of the closing orders of the national Fuel Administrator, the local talking machine dealers generally reported that they did better business during the month than they had expected.

All of the dealers said the record business was exceptional and they attributed this to the fact that the closing of theatres on Tuesdays, together with the extremely cold weather, indicated that people were staying at home and enjoying their talking machines.

There was a marked increase considerably during the last few days and this had the effect of stimulating the sale of machines. Most of the dealers express the opinion that the Monday closing order simply makes Saturday or Tuesday a bigger day in sales and that the loss of Monday does not figure to any extent on the week's business.

"Our record business increased during the month and the sale of eight machines on the first Tuesday after the first Monday holiday indicates that we are making up for the lost Monday business on Tuesdays," said A. H. Snyder, manager of the Edison Shop. The total January business was ahead of last year in the same month, he added. Mr. Snyder is working his outside salesmen in zones and his plan is paying off well.

H. A. Smith, manager of the Pathé Shop, said that January business was showing up well, but he doubted whether it was offsetting the loss of Monday. The January business as a whole was good, he said.

H. E. Whitman, manager of the talking machine department of the Pearson Piano Co., reported that the record sales were far ahead of January of last year. Both the Edison and Victor machines were in steady demand, but a shortage of stock has been the worst problem, Mr. Whitman said.

This Christmas the Pearson Co. did not send out larger machines to be exchanged later for the smaller models when they arrived and as a result it was able to sell most of the largest machines.

C. P. Hendran, manager of the Columbia department of the Baldwin Piano Co., said that while the weather had naturally affected business it had held up well and that with a change in weather conditions he believed it would soon be back to normal.

A. E. Heffter, manager of the Starr Piano Co., said that the Starr records and machines had enjoyed a good business in spite of the weather, although the Monday holiday closing was affecting business to some extent.

George Standke, manager of the Brunswick Shop, ran an ad on optimism on the first Monday closing holiday and he received congratulations from many persons on its timely appeal.

He was in Chicago this week conferring with the factory men recently. The art model, No. 1500, of the Brunswick has attracted considerable attention on display in the shop.

Among the wholesalers the chief complaint has not been a lack of demand for talking machines but the shortage of them have to worry with due to transportation. R. B. Goldsburly, of the Pathé department of the Mooney-Mueller Ward Co., said that January had been better than anticipated, the record business being exceptionally brisk. A number of new contracts have been signed with dealers.

Edgar Eskew, formerly manager of the department, has resigned.

The People's Outfitting Co. has had an exceptional run on Pathé machines. During the last six months only one-half of one percent of the records shipped to dealers have been returned. Manager Goldsburly said, adding that this indicates the strong demand for records throughout the State.

At the Stewart Talking Machine Co., Victor jobbers, it was said that the demand for machines was much heavier this January than in 1917, but that transportation difficulties had kept the business down.

The national advertising done by the Victor Co. is bringing practical results, according to the Stewart Co. From fifteen to twenty inquiry cards sent to the Victor Co. by prospective buyers have been reaching the Stewart Co. every day. These cards are in turn sent to the nearest Victor dealer.

The local Victor dealers are expecting a large demand for the records of Jascha Heifetz, the Russian violin master, who will play in Indianapolis February 14.

The appearance here last week of Victor Herbert with the Cincinnati Symphony Orchestra boosted the sale of the Herbert records. A large number of the latest musical comedies are scheduled to appear here in the next few weeks and the record song lists of these shows will be in demand.

O. C. Maurer, in charge of the Sonora department of the Kiefer-Stewart Co., was a guest at the convention of Sonora dealers held under the auspices of the Yahr & Lange Drug Co., of Milwaukee. With, recently. Mr. Maurer said that the enthusiasm evinced by the Wisconsin dealers in spite of the cold weather that prevailed was notable and he added that he obtained a number of good points from the meeting.

Cleveland, O., February 6.—Shortage of stock, for which the responsibility is divided between the factories and the railroads, weekless days, as prescribed by the Fuel Administrator, and other conditions similar to those affecting business throughout the East, serve to put a slight damper on the talking machine trade in this city, although the jobbers and dealers are going right ahead endeavoring to get the best results possible in the face of the handicaps.

C. K. Bennett, general manager of the Eclipse Musical Co., and the new president of the Talking Machine Dealers’ Association of Northern Ohio, states that at the annual banquet of the association, to be held on February 20, an effort will be made to thresh out the problems for the benefit of the dealer. He states that one particular point will be emphasized, the necessity of pushing stock records that do not have the call under ordinary conditions. He says this is the time for the real salesman and not for the fellow that travels along the line of least resistance.

At the annual Cleveland food show this week a practical demonstration of how phonograph records are made is being given by C. A. Johnson in the booth of an exhibitor. He explains in detail how records are turned out so they may furnish pleasing music in cafes and dining rooms while diners enjoy their meals. This feature of the show has greatly excited the interest of the thousands of visitors.

The annual meeting of the Cleveland Music Trades’ Association will be held February 14 at the Hotel Winton. Several talking machine dealers are members and out of town guests are expected. This association recently expelled one of its members, who, it was declared, resort to unfair methods in advertising. It was declared he advertised second-hand instruments without using the word “used” in his ads.

Not for months has Cleveland seen a bigger campaign of publicity for any talking machine than that launched January 27 by the Young Furniture Co. This concern operates two immense stores in Cleveland, one in the swell shopping center of the upper Euclid avenue section, and another in West Side. Full newspaper page advertisements pointed out the merits of the phonographs handled by this house.

The Muehlhauser Brothers Piano Co., organized last October, opened a modest sized store at 1613 Euclid avenue, somewhat out of the lower shopping district, and began an active fight for business. It came right off the reel, in Hallet & Davis pianos and Sonora phonographs. The firm of four brothers did not have to make its name known, for the brothers had already established their reputation with the Cleveland trade. Since opening an additional store room has been found necessary, so the firm’s future is assured, despite the handicaps met at the start in getting stock.

The Fisher Co., 25 Taylor Arcade, Ohio distributors for Pathe phonographs and records, is doing a splendid business despite war conditions.

Buescher’s, 1306 Euclid avenue, still glorifies in the sale of Victrola outfits and Victor records. This firm carries a large stock of records and machines.

Gennett records reproducing Helen Ware’s violin music are features widely advertised by the Starr Piano Co. This firm carries a complete library of Gennett records.

The Clifton Furniture Co., Madison avenue and West Ninety-ninth street, has joined others using phonographs to attract patrons.

The McMillin Music Co., 2053 East Ninth street, continues to champion Victor records accompanied by their slogan, “Cleveland’s Leading Music Store.”

John McCormack, great tenor, is coming to sing for the Red Cross in Keith’s big Hippodrome, March 5. As soon as McCormack’s coming was scheduled dealers handling McCormack’s songs and records reproducing them got busy with window displays and catchy ads. Meanwhile everybody is trying to get educated to McCormack’s wonderful songs which the talking machine has popularized in every music-loving home in Cleveland.

The Fischer Co. declares the Edison record, “On the Banks of the Brahmsyrene,” is one of the winter’s best sellers, while Harry Lauder’s “Wee House ‘Mang the Heather” is another of the Victor records having a phenomenal run since Lauder appeared here in person.

The Eclipse Musical Co. has been having a run on Victor records reproducing the music of Jascha Heifetz, the new Russian violinist, who will appear in person in Gray’s Armony to-morrow night. Cleveland violinists pronounce the new Russian a wonder with “his fiddle.”

A Pathé record that is a winner here is the “Arrival of the U. S. A. Troops in France.” Fred Fairbanks’ “It’s a Long Way to Berlin,” another Pathé record, is also a big seller at stores handling these favorites.

Song hits which carry inspiration for the boys in military camps and “over there” characterize the offerings of most of the talking machine dealers. “La Marseillaise,” by the Gennett Military Band, is a Starr hit among the latest records. “The Royal Hymn of the Republic” is another Starr catch.

The New Edison is attracting attention and selling rapidly at the two establishments of the Phonograph Co., whose main emporium is the entire third floor of the building, 1240 Huron road.

The Dictaphone Co., 1275 Euclid avenue, reports a good January business, particularly the latter half of the month.

**A Great Name in the Victor Game**

**YOUR Part of the Country Is No Different Than Any OTHER Part of the Country, and Victor Record Sales Are Increasing Daily, Hourly, in EVERY Part of the Country!**

The point we want to make is THIS—Are you making the most of the situation? Are you making the most of our superior sized stocks? Are you making the most of the “SERVICE” we offer? There are so MANY things to be gained if you will make an immediate contract with—

Quality Wins Again

The talking machine trade has shown its enthusiastic appreciation of a high grade product by ordering liberally. So liberally that the initial cutting of the Widdicomb Phonograph was not sufficient to supply the insistent demand.

But during March we will be able to ship to all buyers.

A Finished Product

The most expensively constructed and intelligently assembled phonograph in the world in its respective class is now ready for those dealers who believe in "quality first" last and all the time.

THE WIDDICOMB PHONOGRAPH IS MADE

For the dealer who wants to offer better value for the money
For the dealer who wants a better profit than usual
Do you come under this classification?

If so send for our catalogue now, and secure a Widdicomb agency or still better—send for a sample instrument and "Play it Yourself." Compare it point by point with the machine that you consider the best.

Aside from the beautiful case, noiseless precision motor, efficient filing device, and great attention to all details, you will be greatly impressed with the perfectly natural tone reproduction of the Widdicomb and will enjoy the sensation of controlling that sound from a distance by the medium of our sound modulator with which each Widdicomb is equipped.

These good points all mean sales for the Widdicomb dealer.

Aggressive jobbers will do well to connect with this line

PHONOGRAPH DIVISION

The Widdicomb Furniture Co.

Price $190—with electric motor $175.
"Play it Yourself"
Columbia's national advertising has just one big aim and purpose—to make people buy Columbia Records through hearing them played on the Columbia Graphophone in Columbia stores.

MILWAUKEE DEALERS ARE TOO PATRIOTIC TO COMPLAIN

Believe in Carrying Out Instructions of Government—Dealers Had Excellent January—Jobbers Short of Stock—Sonora Dealers in Convention—Enlightened by Yahr & Lange—News of Month

MILWAUKEE, Wis., February 10.—Milwaukee talking machine dealers are just a bit too patriotic to make serious complaint over the effect of the Federal Fuel Administration order which restricted business to five days a week during the last half of January and early part of February. Nevertheless, it is a fact that the curtailment has cost all of them a considerable volume of business. Perhaps the only compensation they have is that every other line of business suffered, too.

Under the circumstances, local talking machine dealers have been doing mighty well since the holiday season passed. Although one full business day has been taken away from them, they have made the best of an unfavorable situation and worked so hard on the other five days of the week that most of them have been able to equal or even improve upon the volume of business for the corresponding period of 1917. It can be imagined how it would have been possible to show good gains if the "fuelless Monday" order had not been promulgated.

Local jobbers state that they are still not able to procure all of the stocks that are required to fill the demands upon their retail dealers, and they express the opinion that under existing conditions in manufacturing, traffic, and other phases of the situation, it is not likely that a surplus can be accumulated for some time to come. It is felt, however, that it is better to have a shortage than a considerable surplus, and by this token it seems conditions are better than those of the reverse.

Harry A. Goldsmith, secretary of the Badger Talking Machine Co., Victor jobber in Wisconsin and Upper Michigan, says that the business situation in the territory served by the house is unusually favorable, considering war-time conditions. While the Badger Co. is in a somewhat better position to fill orders than in recent months, including the holiday rush, there is still a large shortage of numerous styles. Records, needles and other supplies are not to be had in the volume demanded by the state of business. As a matter of fact, the shortage of supplies and accessories is relatively greater than that of machines.

A. G. Kunde, Columbia jobber and retailer, expressed the opinion that business is being maintained at a level that is rather surprising under the conditions. While trade could hardly be expected to be as brisk during the first month and a half of the new year as it was during the last two months of the old year, it is better than anticipated.

At the Edison Shop, Edison jobber and retailer, much time in recent weeks has been devoted to overcoming the effects of the big fire which caused a heavy loss early on Christmas morning and wiped out a considerable part of the wholesale stock. Shipments have been coming in fairly good volume and while stocks are not yet what they should be the Edison dis-

tributors are much gratified over the situation.

Paul A. Seeger, manager of the talking machine department of the Edmund Gram Music House, representing the Aeolian-Vocalion and Columbia, is very much pleased with the condition of business. It has been Mr. Seeger's experience that the higher-priced styles have been selling relatively better than others. This does not mean that medium and low-priced styles are not moving, for many excellent sales of these are being made right along. Yet the tendency has been toward the costlier machine, due probably to the better financial position of buyers who patronize the Gram house.

Yahr & Lange, Sonora jobbers for Wisconsin and Upper Michigan, recently entertained more than one hundred of its retail representatives at a first annual sales convention and banquet at the New Plankinton House in Milwaukee. Fred E. Yahr presided as toastmaster at the dinner, and among the principal speakers were F. D. Andrews, Minneapolis, and O. C. Mauer, Indianapolis. Since taking the wholesale representation of the Sonora a year ago, Yahr & Lange have built up a remarkable organization.

ARRANGE TO MEET ALL DEMANDS

Vice-President Ravis, of the New York Album & Card Co., Tells of Increased Facilities—New Representative for New England

In a chat this week with The World, Philip A. Ravis, vice-president of the New York Album & Card Co., 23-25 Liverpool street, New York, commented as follows regarding general conditions:

"With the additional facilities that we are now utilizing in the production of our albums we have every reason to believe that we will be in a position to supply our clientele promptly with albums the coming season. However, I would suggest that the dealers anticipate their requirements whatever possible in view of shipping difficulties at the present time and in order to make sure that the albums will be on hand when they need them. With the additional space which we now occupy we have also increased our facilities for printing delivery envelopes, and this branch of our business is steadily growing.

"Our new No. 1012 album is meeting with a ready sale throughout the country and the dealers are greatly pleased with the distinctive features embodied in this album. Our metal-back albums continue to be a prime favorite with our clientele and is giving excellent service everywhere."

L. W. Hough, well known in the New England talking machine trade, has been appointed New England representative for the New York Album & Card Co., with headquarters at 20 Sudbury street, Boston, Mass. Mr. Hough will carry a complete line of the company's albums in stock at all times and will also carry a stock of delivery and stock envelopes.

NOW SOLE PATHIE DISTRIBUTORS

The Pathéophone Sales Co. of New York, Inc., 111 East Fourteenth street, New York, is now the sole distributor for the Pathé products in the metropolitan territory, having taken over the interests of the Pathéophone Distributors Co. and the Silwoll Co.

PERSONAL SERVICE

The members of our Company are always available and will gladly see you personally or write you at any time we can possibly serve you.

Why not communicate at once with us?

BADGER TALKING MACHINE CO. 135 Second Street MILWAUKEE, WIS. VICTOR DISTRIBUTORS
THE wise ones know that the phonograph business doesn't hold still a minute.

It's too healthy.

Maybe you know all the latest moves. And maybe you don't.

We warrant there's something Pathé can tell you which will strike a bright, white light in your mind, and get you busy.

PATHE FRERES PHONOGRAPh CO.
20 GRAND AVE. BROOKLYN, N. Y.

No Needles to Change
The Pathé Sapphire Ball takes the place of needles. It need not be changed.

Records Don't Wear Out
We guarantee every Pathé Record to play at least one thousand times with the Pathé Sapphire Ball without impairing the unexcelled beauty of tone.

The Pathé Controla
With the Pathé Controla you may increase or decrease the total volume of the Pathé Phonograph at will.

Each Pathé Phonograph
plays not only Pathé Records, but all other makes of records, and plays them perfectly.
The Quality Phonograph

IT isn't altogether a question of retail price, either — though that's important.

And it isn't altogether a question of better tone and longer-lasting records — though they're mighty important.

No, it's a number of things and they mean money you can't get otherwise.

INVENTS NEW RECORDING METHOD

New York Engineer Applies for Patent on Multiple Diaphragm Phonograph—Each Instrument of Orchestra Recorded Separately on Film—Reproduced in Synchrony

H. Hartman, electrical engineer of New York, has invented and applied for patents on a multiple diaphragm phonograph, or electric orchestra, which offers a brand new idea in the recording and reproduction of musical sounds. It is claimed by Mr. Hartman that recording for talking machine records as at present conducted is limited in its possibilities, owing to the fact that a single diaphragm must take and record the tones of a great variety of instruments at one and the same time. He points out that as the musical vibrations produced by a violin and contrabass are widely different, and the vibrations produced by other orchestral instruments, it is not scientifically possible to record perfectly all the instruments at one time, because the diaphragm cannot respond simultaneously with the great variety of vibrations.

In recording for Mr. Hartman's electric orchestra he uses, in place of the usual records, a special film on which the tones of every instrument in the orchestra, to the number of forty-eight, if desired, are recorded in a separate track. By recording the music of each instrument separately the diaphragm can confine its action to the particular vibration of the one instrument and therefore there is no confusion or distortion of sound.

For the purpose of reproduction the film is wound on a reel and is fed from a special compartment over guide rollers to a long, narrow and horizontally arranged apparatus which contains as many sound boxes as there are record lines on the film. The sound boxes are separated as far as possible, and each is provided with a separate trumpet, the various trumpets being arranged in rows facing the audience. In order to regulate the movement of the film it is taken up over a sprocket wheel or on a drum at the opposite side of the cabinet. It is stated that a film of 1,500 feet in length will play continuously for more than an hour, and when the end is reached can be readily replaced by another film bearing other music. The sound boxes are fixed in position, welded to one another and rest freely upon the film, with the needle in a certain sound line. Sapphire and diamond needles are used to avoid the necessity of changing needles. It is claimed by the inventor that the device has been so perfected that perfect synchronization is obtained between the various instruments in the reproduction of the record.

Mr. Hartman is also the inventor of the “speaking clock,” which also uses a flexible film, two inches wide, in place of the usual type of record. Operation of the clock is so arranged that the exact time is announced every fifteen minutes. A continuous film is used that runs twelve hours before regulating.

ONE PLAN FOR SAVING SALES

John F. Dittell, of the Famous & Barr Store, Takes Advance Orders for Machines and Has Customer Make Payments Until Machine Is Delivered—Follows Automobile System

ST. LOUIS, Mo., February 6—Several models of Victorolas have been very scarce in this market since the holidays, notably those formerly sold for $109, $125 and $75. It was impossible for most if not all of the dealers to make deliveries of these machines in popular finish. John F. Dittell, of the Famous & Barr talking machine department, solved the selling problem and it was not the old-time solution of putting in another make machine.

Mr. Dittell’s solution was the selling of ownership certificates. He explained it to the customer in this way:

“There are many popular articles of merchandise that you must wait your turn for. For years buyers of F. & B. have paid their money to get their names on the delivery program of that company. They cannot be insured delivery without paying a part or all of the money. Victorolas are like the Fords, the demand at present exceeds the supply.

“We do not know just when we can deliver this Machine to you, but if you begin paying now you will get the first machine of this model that we receive. We will deliver it just as soon as we can.”

It is surprising to many folk that the plan has succeeded and some of the most surprised persons are on Mr. Dittell’s force. They predicted that the plan would not sell any machines, but it has. In one case the buyer not only paid in full for the machine, but he has visited the store several times to hear records and make his selection and these are paid for and have been put aside to be delivered to him when the machine arrives. This many, and the others who have not paid as much, are content because they are going to get exactly what they want as soon as it is possible.

Mr. Dittell tells rather an amusing story in this connection, which illustrates the point. E. C. Rauth, the Victorian wholesale distributor herein and under a difficult and critical model. The company did not have that car, so Mr. Rauth made a payment and was assigned to a place on the delivery list. Some time later Mr. Dittell informed him that he had picked another model and this sort was ready for delivery, so, despite the fact that he started later than Mr. Rauth, he was driving a Buick from one point to another place. He said, rather surprised Mr. Rauth, but he told him that it was exactly the same proposition as the Victrola situation. Those who selected the models in stock got immediate delivery, while those who selected other models had to pay their money and wait.

BUILDING UP SUCCESSFUL BUSINESS

The Faultless Caster Co. Closes Many Contracts With Talking Machine Manufacturers

The Faultless Caster Co., Evanston, Ind., one of the most successful manufacturing concerns in the Middle West, has closed a number of contracts with prominent talking machine manufacturers whereby the company’s casters will be used exclusively on 1916 product. The Faultless Caster Co. manufactures a complete line of high-grade casters, suitable for all kinds of furniture, and has perfected a special caster for talking machines designated as C-6-5 which has won the endorsement of well-known manufacturers, including Thomas A. Edison, Inc., the Sonora Phonograph Corp. and the Aeolian Co. The C-6-5 caster is a nickel-plated, steel wheel caster, and as the company guarantees all of its casters against imperfection of workmanship and material, talking machine manufacturers using this caster have called the attention of their dealers to its merits and the fact that it is absolutely guaranteed.

The Faultless caster was awarded a gold medal at the Panama-Pacific International Exposition, and in fact this caster has won recognition from the most successful furniture manufacturers as a product which embodies all the necessary requirements for use on the most expensive manufacture. The Faultless Caster Co. manufactures 500 styles of casters for different uses.

A recent circular issued by the company featuring the C-6-5 caster for talking machines emphasized the following points of superiority as compared with the ordinary caster: (1) All the weight rests on a round-headed pivot stem; only one point of contact in each caster—friction reduced to a minimum. (2) Springs fitting into the neck of the stem never allow the caster to drop out of the socket. (3) The steel wheel is made of two shells, one fitting inside the other. The outside shell being rimmed leaves the edge smooth and this evenely corresponds with the other side of the wheel. (4) A reinforcement around the bushing holds it tight and gives the wheel double strength and long life. (6) Stem made of screw stock steel is tapered so the caster will be held in true alignment—always ready for maximum service with minimum effort.

Salesman Carrying Case Holds 25 Records.
HEAVY RECORD DEMAND A FEATURE OF BUFFALO TRADE

BUFFALO, N.Y., February 7.—A heavy demand for records is the dominating feature of the talking machine trade this month. The booths are crowded, the demonstrators being kept busy from morning to night in taking care of the customers. Machines, however, are as scarce as sugar, coal and other staple articles. Added to the shortage reported at the factories are the delayed shipments on account of railroad embargoes. The dealers are closing their stores on the “heatless Mondays” and are trying to crowd six days’ business into five and most of the dealers are satisfied with their receipts during the short weeks.

One great source of hope for plenty of trade during the coming year is Buffalo’s remarkable industrial activity. According to the State Industrial Commission, the total amount paid wage-earners here in 1917 was 168 percent more than the total in 1914. The number of wage-earners in Buffalo was increased 70 percent in the past three years. There is not likely to be a let-up of this activity for many months.

Goold Bros., Inc., has filed a certificate of incorporation, with a capital stock of $150,000. This firm handles the Victor line at its store at Main and Utica streets. The directors are George A. Goold, T. Amesbury Goold, Fred L. Armstrong, Gerrtrude A. Armstrong and William Goold.

“Our business stands practically as before,” said T. Amesbury Goold. “My brother and I hold 55 percent of the stock in the company. There will be no change in policy. Our trade is in an excellent condition.”

By means of vigorous advertising and extra good values the store of Victor & Co., Pathéphone jobbers, is crowded these days. The Pathéphone is always well represented in the firm’s advertising and window displays and superior results are attained.

The Adam, Meldrum & Anderson Co. is conducting a series of Pathéphone recitals.

“The train service is slow and all the dealers are crying for goods,” said C. M. Logan, traveling representative of W. D. & C. N. Andrews. “On account of slow trains Mr. Logan has experienced many delays in covering his territory.”

“We have a pretty good supply of the New Edisonss,” said Charles J. Hereth. “We were warned of a shortage some time ago and players are being kept from falling by laying in a good stock. This was before the advance in prices. We made no mistake in stocking up because the demand for the New Edison is steady even during this severe weather.”

“You can see that our booths are always crowded, so we are doing a wonderful record business,” said W. B. Gardner, manager of J. M. Adam & Co.’s Victrola department. “The cold weather seems to create a desire on the part of people to stay at home and enjoy their selections.”

“We are supplying a heavy demand for the Heifetz records,” said C. H. Heinke, manager of Denton, Cotter & Daniel’s Victrola department. “This demand shows that he is one of the most popular of the Victor artists.” Heifetz will give a recital in Buffalo on the evening of March 22.

Harold E. Kahn, of Kahn Bros., talking machine dealers, has been engaged temporarily as organist and chorister at St. Paul’s Church, this city.

Trying to have “the bad check” law enacted in New York State is engaging the attention of the Buffalo Association of Credit Men, of which some of the talking machine dealers are members. The proposed law would make the issuing of a bad check prima facie evidence of intent to defraud and subject the maker to fine and imprisonment.

H. A. Brennan, manager of the William Henger Co.’s Victrola department, has returned from New York City, where he looked over the trade and received some new ideas for the coming season. Another purpose of his trip was to try to overcome the machine shortage in his department.

Howard W. Webb, talking machine dealer at 150 East Genesee street, is a member of the Jackson Glee Club of this city.

“The Missouri Waltz records are in great demand,” said H. G. Towne, manager of Robert L. Loud’s Victrola department. “The heaviest demand for records at this store is on Saturdays from 2 to 3 o’clock in the afternoon until 10 o’clock at night.

GEORGE L. SCHUETZ THE FINAL WINNER

George L. Schuets, of the Indianapolis branch of the Columbia Graphophone Co., is the final winner in the Pittsburgh district of the individual salesmen cup donated by President Whitten for each district, his third victory in November giving him permanent possession of the trophy. He now enters the Columbia “Hall of Fame,” along with L. C. Ackley, of the Los Angeles branch, who won the cup offered in the Pacific Coast district. The contests in Philadelphia, New York and Chicago territories are still undecided, a three-time winner in these districts having not yet been registered.

VICTROLA SPEEDS UP TYPISTS

PORTLAND, Ore., February 4.—The High School of Eugene, Ore., has adopted an original and effective method for speeding up the typewriting classes of the commercial department. A Victrola is used and at each beat of music a letter must be struck on the typewriter. As the typists develop speed the class strike two letters to each beat. Not only is speed acquired, but a smooth, steady movement is obtained.

They don’t give rain checks for the Seats of the Mighty.
Mr. Dealer:

Do you know that if you seat your prospect in a comfortable chair before the

GABELOLA

and "Just Push the Button"

that it will sell itself?

You can say with perfect frankness and without fear of contradiction that—

"This super-talking machine is winning its way in the thousands of homes where something more than a mere talking machine is desired."

It is self-operating—you don’t have to change needles, records, or wind it up because these things are taken care of automatically.

The Needle magazine contains 600 needles, and a new one drops into place each and every time a selection is played.

The record container (which contains a repertoire of 24 selections) automatically changes the record just as soon as a selection is played.

The motor is electrically driven and controlled.

It is ideal for the home, dancing school and restaurant.

A personification of pleasure and entertainment "with all the bother left out."

You can say all this and more, but it would be unnecessary.

"Just push the button" and then have your order blank ready.

TALKING MACHINE SHORTAGE BADLY FELT IN NORTHWEST

Dealers Complain That Manufacturers, Transportation Officials, Federal Government and Weather Man Are Making Life Miserable These Days—Sonora Men Meet in Minneapolis—News of Month

ST. PAUL and Mankato, Minn., February 5.—The distributors are running short, whether they be in the retail branch or the jobbing branches, have distinct and adequate cause for complaint against almost everywhere excessiveness of present methods. The manufacturers, the transportation officials, the Federal Government and even the weather man are combining to make life miserable for the trade men by hampering and limiting shipments of all machine goods while the people are clamoring for instruments and records.

Yet one will travel far to hear any talking machine dealer offer a different criticism. They realize full well that no complaint and no agitation that they may make will aid them one iota and the least that they can expect is that fate will be as kind as possible.

The general Northwestern situation for the entire business is well stated by Eugene F. O'Neill, of the Beckwith-O'Neill Co.

"The machine receipts in this territory during January virtually amounted to nothing as the factories centered more on Eastern points as the holidays approached. The carload shipments have not come through and hardly can be expected before the middle of February on account of the uncertain traffic conditions. In the meantime the record sales situation has become fully as complicated as the machine situation and our afflictions instead of disappearing after the holidays only are increasing. I speak only for the Victoria situation as my information concerning other machines naturally is very limited.

The dealers in what might be considered non-contiguous areas will receive an awful jolt some day if they do not realize that war-time conditions now prevail and will govern every angle of the business from the production of the raw materials, through the factories and jobbers to the retail dealers.

"We must face every new cross with the best grace possible and trust that the future will bring a marked improvement in our affairs, but, to tell the truth, the labor situation, the difficulty in obtaining raw materials, and the transportation problems hardly warrant one in building up with enthusiasm."

Sonora dealers from all over the Northwest will gather at the West Hotel, Minneapolis, February 6, for their annual convention and banquet. The Minneapolis Drug Co., distributor of the Sonora products, will do the honors, with Sewall D. Andrews as the chief steward. President Brightman of the Sonora Co. will be president as one of the headliners with some of the leading Eastern distributors in his supporting company.

W. L. Sprague, manager of the Minneapolis branch of the Columbia Graphophone Co., is back with the fine trophy he won at the Columbia convention. Having won the honor three times in succession the trophy becomes the permanent property of his branch. Although greatly hampered by various conditions, the branch increased its business for January, 1918, by 100 per cent. It could have shown much better results had certain matters been more favorable.

E. F. O'Neill, of the Beckwith-O'Neill Co., returned from Boston, after an absence of two weeks. He was summoned to his old home by the death of a sister.

Several of the dealers to musical instruments are exhibiting in the Industrial Exposition, which is a winter fair and the outgrowth of the annual automobile shows. The exposition is conducted at the immense assembling plant of the Willys-Overland Co. The Minnesota Phonograph Co., in conjunction with Boston & Brown, Ediphone distributors, has four booths for the display and demonstration of products of the Edison laboratories. Laurence H. Luker personally supervised the arrangement of the Edison display.

Columbia Grafonolas and Dictaphones were shown in a suite of four booths, with W. C. Hubbard, Dictaphone expert, and W. L. Sprague in charge. The show, opening February 2, will close about February 9, and is drawing thousands of visitors, mostly from St. Paul and Minneapolis, but also from the rural districts. Included among the latter were the Sonora dealers.

R. E. RAY NOW SALES MANAGER

Takes Important Post With Jones-Motrola, Inc. — G. K. Stickle Returns to Canada

R. E. Ray has been appointed sales manager of the Jones-Motrola, Inc., New York, the manufacturers of the Jones-Motrola. Mr. Ray has already taken up his new duties and will organize the sales force of the company along most efficient lines. He is now making a short trip. G. K. Stickle, sales manager of the company since its organization, has resigned to enter another line of business in Canada, while C. E. Reiss will continue in charge of the New York office.

The Jones-Motrola has steadily gained ground and has been endorsed by various prominent talking machine companies, among the latest being the Brunswick-Balke-Collender Co., manufacturers of the Brunswick phonograph, having recommended the Motrola to their dealers.

THE PATHÉ IN PORTLAND, ORE.

PORTLAND, Ore., February 4—Ten days before Christmas Calef Bros., of Portland, Ore., began selling Pathé machines. The Calef Bros. have a big furniture store and never handled talking machines before. They have the exclusive sale of Pathé for furniture houses in Portland and are amazed at the success they are having.

SILVERSTONE MUSIC CO.'S OPENING

Handsome New Warehouses in St. Louis Open to Public With Special Musical Display

ST. LOUIS, Mo., February 6.—The Silverstone Music Co. held the formal opening of their new warehouses this week. There was no formal program, but there were daily test recitals all week by Prof. Charles H. Beall, a violinist of the St. Louis Symphony Orchestra, and Miss. Blanche Skrampa, a local soprano. As an added attraction, a band of Hawaiian stringed instrument players were brought on to perform for the week and proved to be a popular attraction.

Despite the fact that this opening was first planned to be in December, there was much work yet to be done at the last moment. Working men put on the finishing touches to the interior were scarce and materials hard to get and even the removal of the eight booths from the old warehouse to the new, where they were installed on the second floor as record demonstration booths, proved to be a work of weeks.

Instead of days it required a grand rush to get all of the reserve stock out of boxes and into the new bins before the opening day came.

There are those who accuse Mr. Silverstone of second sight in the renting of an additional five-story building across the street and stock- ing it with machines several weeks ago in anticipation of the present conditions. That is what he did and it is this stock that is supplying the means for the present trade.

In his opening advertising, Mr. Silverstone featured a letter from Mr. Edison explaining that he was unable to attend the opening because of his work "for Uncle Sam" and he invited people to come and see the first Edison machine, the massive iron affair that was fashioned in 1878.

Asking a customer to call again helps some, but the thing that counts for most is to treat him so well that he will come without asking.

Manufacturers

Jobbers—Retailers

If you are ready to take advantage of the enormous demand for good talking machines, we can serve you two ways.

We are in the position to sell you the finest looking and scientifically constructed cabinets at reasonable prices.

We can sell you fully equipped machines under your own trade mark or ours, in dealers lots at jobbing discounts.

If you are a dealer, please bear in mind that we manufacture only high grade cases and are installing the best mechanical equipment that money can buy. A postal will bring you our catalogue with full details.

Our prices and discounts are fair to the manufacturer, liberal to the jobber, right to the dealer and just to the public.

Write us today as we are now placing orders for raw material for our 1918 requirements.

Man-Made FURNITURE CO.

CEILNA

OHIO
NEW COLUMBIA HOME IN BALTIMORE

Local Branch of Columbia Graphophone Co. Plans to Occupy Handsome New Five-Story Building on South Howard Street on March 1

BALTIMORE, Md., February 4.—Announcement is made by W. S. Parks, the local manager for the Columbia Graphophone Co., that the local branch will shortly prepare to move to larger and more commodious quarters at 16 South Howard street. There they will have a five-story building with an entrance on German street as well as Howard. The new Columbia headquarters will have three times the floor space of the present home and it is planned to occupy it on March 1. The first floor will be devoted to handling incoming records on the Howard street side and they, together with machines, will be shipped out of the German street side of the building. A model show window will always be kept trimmed as a suggestion to dealers how to properly display their machines and records, with the aim of increasing business. The first floor will show display rooms as models, after which dealers who want to improve their business may easily pattern. The second floor will be used principally for general offices. Mr. Parks plans to spend most of his time outside on the firing line looking after the sales and the headquarters will be practically taken care of by S. C. Cooke, the assistant manager, who did such fine work for the company during Mr. Parks' illness. The Baltimore headquarters looks after business in Maryland, Virginia, West Virginia, North Carolina, and the District of Columbia. Business at this branch is gone away ahead of many of the branches and is now in good position with only New York, Philadelphia, Chicago and Pittsburgh leading in sales.

Mr. Parks has just returned from a tour of Virginia and among the places he visited were Richmond, Norfolk and Petersburg, Va., and also Washington. Mr. Parks says he found all of the merchants happy and confident that business would show from 50 to 100 per cent. increase this year over the past year. The trip was in part taken for the purpose of introducing A. C. Creal, the new district salesman, to the trade in that territory. Mr. Creal has joined the Columbia forces and will be in charge of the selling end in eastern Virginia and District of Columbia. He was formerly advertising manager of the Eagle Furniture Co., of Memphis, Tenn. William Korchmayer will be in charge of sales in the western part of Virginia.

W. B. Sibbett, formerly in charge of the Dictaphone end of the business here, has become city and State salesman for the talking machine line and is succeeded in that branch by C. F. Smythe, formerly of the A. B. Dick Co., of Boston. A. Hoffmam has been added to the Dictaphone department sales force.

THE TRADE SITUATION IN ATLANTA

January Business Very Good Considering Conditions—Future Prospects Unusually Bright—What the Dealers Are Doing

ATLANTA, Ga., February 4.—Everything considered, talking machine business for the month of January in this section was quite satisfactory. The South, in common with the whole country, having recently come through the most severe weather in years, has been affected in a business way, but with the advent of better weather and the fact that cotton, the South's great staple, is bringing the highest price in years, the phonograph business at present is large and broadening.

I. M. & R. D. Bame, Victor dealers, have added the Sonora to their line, and are enjoying a fine business on same.

The Haverty Furniture Co. have taken on the full line of Pathéphones and Pathe records, in addition to their leading line, the Columbia Grafofone.

Phonographs, Inc., local Edison jobbers and retailers, have been enlining their store with tone tests and recitals. At the time of this writing Miss Anna Case is due in the city for a concert at the Auditorium and will doubtless be favored with an enormous crowd.

The record business with all phonograph stores is quite active, the late patriotic and war hits being in great demand.

A. J. Endres has purchased the entire interests of the Brueett Piano Co., Gay Building, Madison, Wis., and will continue to feature the Kimball piano and phonograph line. A. J. Brueett, founder of the company, has returned to Milwaukee and will engage in the piano and talking machine business in that city.

NEW BRUNSWICK SALES MANAGER

Edward Strauss Takes Charge of Wholesale Phonograph Department of Brunswick-Balke-Collender Co. in New York—Other Changes Among the Salesmen—Trade Good

Edward Strauss, long connected with the Brunswick-Balke-Collender Co., manufacturers of the Brunswick phonograph, at their offices in Chicago, has come to New York as manager of the wholesale phonograph department here, with headquarters at 29 West Thirty-second street. Mr. Strauss has made a thorough study of the phonograph field and comes to his new post well equipped to develop business for the Brunswick phonograph in the East.

The sales organization of the company is being strengthened constantly. J. J. Brophy, formerly with the New York office, will in future travel through New England, with headquarters in New Haven.

A. J. Kondrack is returning to the West to continue his promotion work in establishing exclusive Brunswick shops. This work was temporarily suspended on account of readjusting the Eastern situation. The work now being resumed, it is planned to enlarge its scope and several Eastern cities may be included in this campaign.

These specialized shops, now fourteen in number and established throughout the Middle West, are based upon an idea of diversified merchandising carrying several of the Brunswick products. The Brunswick phonograph is, however, the prime factor in each case.

The Brunswick phonograph has recently been exhibited in the various furniture shows held in New York, Grand Rapids and Chicago. In every case the Brunswick booth was well visited and the results from each exhibit were gratifying. Among the recent visitors at the New York headquarters of the house were J. F. Ditzell, of Famous & Barr, D. J. Nolan, of the May Co., enthusiastic Cleveland Brunswick dealers, and O. A. Field, of Field-Lippman, St. Louis, who are Brunswick dealers in that city. Mr. Field reports that the holiday business transacted in Brunswick phonographs was particularly fine.

The progress of the Brunswick phonograph in and about New York has been most satisfactory and the outlook for the year is declared to be excellent.

Clear in Tone, Beautiful in Design, Smooth Running Motors

AMERICAN embodies all the good qualities and special features of phonographs and you cannot afford to be without this popular line. The finest of materials used, workmanship that cannot be surpassed, and a line designed and made from a dealer's standpoint. With this line many dealers are increasing their profit and adding materially to their volume of business.

AMERICAN PHONOGRAPH COMPANY

Main Office, 39 Fountain St., N. W., GRAND RAPIDS, MICH. Branch Office, 503 Cable Bldg., CHICAGO, ILL.
THousands of homes will welcome the Columbus Records of Father Finn's Paulist Choristers. "Agnus Dei" and "Salve, Regina" are the newest.

Woolworth Building, New York

GOOD RESULTS FROM MILWAUKEE ADVERTISING CAMPAIGN

Talking Machine Men Enthusiastic Over Co-operative Publicity Plan of Milwaukee Association of Music Industries—Standards of Practice Adopted by the Trade

MILWAUKEE, Wis., February 6.—No members of the Milwaukee Association of Music Industries are more pleased with the results of the co-operative advertising campaign conducted by the association at a cost of $3,000 for ten weeks ending the middle of January than the talking machine men. For direct results, as shown by the talks with patrons, the campaign did wonders for the men of this industry. They have been able to trace a large volume of business to the publication of ten full-page advertisements, one of which was devoted exclusively to the talking machine and the others being combining sales efforts directed at all types of pianos and talking machines.

A result of the advertising campaign has been the adoption by the association of a code of ethics, or standards of practice, which place the Milwaukee dealers in a most commanding position as a progressive organization, and one which has ventured perhaps a step further ahead than any similar body in the United States. The code consists of ten articles and has been aptly styled "The Ten Condemnments." It reads as follows:

Standards of Practice
(Ten Condemnments)

1. This association condemns advertising of, or otherwise offering by any dealer, instruments not regularly carried in stock by such dealer with the consent of the manufacturer, unless the instrument or instruments so advertised or offered shall first have been offered to the manufacturer thereof or to the nearest regularly authorized agent at cost.

2. This association condemns the practice of advertising instruments not regularly carried, unless the advertiser offers them in good faith and stands ready to sell said instruments at once to any buyer.

3. This association condemns the breaking of sales or malicious criticism of any instrument by a dealer or salesman for the purpose of dissatisfying the buyer after the sale of such instrument has been consummated.

4. This association condemns the advertising of used instruments stating the prices original, and the price charged for the instruments when new.

5. This association condemns advertising as "Free" those articles included in the purchase price of the instrument, such as book, scarf, etc.

6. This association condemns advertising as "Factory Prices," and the offering of instruments at "Factory Prices," and the advertising of "Special Sales" in which instruments "Must Be Sold Regardless of Cost or Value."

9. This association condemns "Puzzle Contests" and "Guessing Contests," as the result of which "Purchase Coupons," orders or vouchers are given.

10. This association condemns advertising in which high-grade instruments and cheaper grades are listed indiscriminately, with the lowest prices and terms quoted to appear to apply to all.

The Milwaukee association, which was organized in February, 1917, has been incorporated under the laws of Wisconsin, and at its first annual meeting as a corporation elected the following officers: President, Henry M. Steussy, general manager Steussy-Schulz Piano Co., representing the Magnola and Pathiphone; vice-president, Paul F. Netrow, secretary-treasurer Milwaukee Piano Mfg. Co., representing the Imperial; secretary, Richard H. Zinke, general manager Badger Talking Machine Shop, Victor dealers; treasurer, William R. Winter, president Winter Piano Co., representing the Columbia; directors, Edmund Gram, representing the Aeolian-Vocalion; Fred B. Bradford, Victor dealer, and Leslie C. Parker, manager of the Victor department of Gimbel Bros.

Edmund Gram was president during the first year of the association’s existence and Mr. Steussy was secretary. The latter’s splendid work in that position made him the unanimous choice for president when Mr. Gram announced his determination to retire because of the extraordinary demands upon his time by the presidency of the National Association of Piano Merchants of America and his private business affairs. In electing Mr. Zinke as secretary, the association gave deserved recognition to one of the most prominent and influential talking machine men of the Middle West. The association has a total of forty-one members, embracing practically every reputable music house in Milwaukee, and has made a splendid record since its inception.

SECURES THE EDISON AGENCY

The Land Jewelry Co., Seymour, Conn., has been appointed representative for the Edison Diamond Disc Phonograph and Edison Re-Creation, and the establishment will be known in the future as The Edison Shop. The store has been remodeled, to admit of the installation of demonstration rooms and a large reception room.

MULTUM IN PARVO

Take all the men who have failed since Creation; take all the causes of their failure; and, though there be ten, or ten million, not one is proof of your failure. Every man is master of his own destiny.

Anticipate Your 1918 Requirements Now

by investigating at once the merits of our improved Veeco Electric Motor and Vitraloid Turntable for electrically equipping your higher grade machines.

The Veeco motor runs on either A. C. or D. C. of 100-125 volts without any adjustment, and can be supplied to run on any voltage from 6 to 250.

To dealers we supply the motor mounted on either 12" or 12½" square mahogany boards, all ready to install.

Send for a sample and try it out. Orders for 1918 should be placed at once.

THE VEECO COMPANY

The Original Producers of a Complete Electric Drive for the Talking Machine Manufacturer’s Use
TRANSPORTATION THE BIG PROBLEM IN ST. LOUIS TRADE

St. Louis, Mo., February 6—Local talking ma-

chine dealers are talking transportation more

than sales at present. It is their belief that the
talking machine dealer who has an ample stock
in this section is the one who will reap the
harvest this spring. Stocks of certain styles of
machines are exceedingly short and with other
company’s records are the difficult point. The
Columbia Co. was considerably embarrassed for
a time because the after Christmas shipments
of records expected for the first of the year were
lost in transit. The Victrola line of machines
has been short of the styles selling for $120
and the styles priced above and below this have
been entirely out of stock.

Robert Cone, of the Artophone Co. said that
the freight question had become a very serious
one with that company. They had a large num-

ber of machines almost ready for use but that
the minor parts were several weeks past due and
machines that were to be shipped on after
Christmas shipments were still held. “Some of
our working men have shown considerable
ingenuity in getting by the scarcity of certain
parts,” he said, “and we have kept up fairly
well with the most acute demands, but we are
much farther behind than we like to be. As
to cabinets, we are well fortified for reason
of precautions taken last summer and recent tracers
have shown that our most needed shipments
are making progress.”

One of the unfortunate happenings of the
month was the burning of the Mozart Talk-
ing Machine Co. plant the second day after
it had begun operations. The plant was for-
merly known as the Colonial Cabinet Co. and
was bought by the Mozart Co. after a fire.
It had required six months to re-equip the plant,
chiefly because of the delay in obtaining motors
and certain machinery. The plant had been
in operation only two days when it was again
destroyed by fire. The plant was well covered
by insurance and so the heaviest part of the loss
will be in the rearrangements of plans and the
necessary wait to get the new plant equipped under
the war conditions. In the meantime President
Fitzgerald expects to find means of continuing
the production of the Mozart machines.

Despite the handicaps of the shipping trade
has been very good, according to all reports.

Of course, it could be better with the full stocks
of records and machines, but some of the houses
will show an increase over any previous Janu-
ary, they assert. The jobbing trade has been
excellent, counting by orders filed. Not so
good if counted by orders delivered.

I. D. Agee, Jr., president of the Columbia Co.,
spent a busy month-end after his return from
the New York conference of branch managers,
which he termed “the greatest sales meeting
he had ever attended.” He was among his whole
staff together and pass on some of the ideas
and enthusiasm brought back from the East, but
was unable to call this meeting until February 4
because of the pressing business.

The new Columbia records made by Handy’s
jazz band at Memphis has proved a winner in
the St. Louis district, where that band was
well-known and its fame is sure for the present
kind of music. The records have proven to
be wonderful sellers in the country districts
and especially in that section nearer Memphis.

TO ISSUE "TRADE NEWS SERVICE"

I. Davega, Jr., Inc., to Render Practical Co-
operation to Dealers—Important Move

I. Davega, Jr., Inc., Victor factory distrib-
utors, 123 West 123rd street, New York, are com-
piling a “News Service” for Victor dealers. This
publication will be named “Trade News Service”
and will be full of free news and timely help
for the dealers. It will be compiled and edited by
Abram Davega and Joe Schwartz, who have a
wide and varied experience in the merchandis-
ing of Victrolas and amplifiers. It will prove
a very valuable assistant to the dealer and nu-
merous requests have already been received to
have their names placed upon the list. The
initial issue is expected to make its appearance
within about one month.

TO AID TRADE ACCEPTANCES

Council Asks War Credits Board to Insist on
Their Use by Manufacturers

With the view of hastening the more general
adoption of the use of trade acceptances, the
American Trade Acceptance Council has sug-
gested to the authorities in Washington that
the War Credits Board, which looks after the grant-
ing of advances to manufacturers and con-
tractors doing Government work, should adopt
the policy of refusing to advance advances
ments until the applicant has availed himself of
his own credit by resort to trade acceptances in
the purchase of goods. It is felt that, while the
Government cannot itself pay for goods on the
trade acceptance plan, by reason of certain
legal obstacles, there is no valid reason why the
contractor should not reduce the financing re-
dards of the Government by using trade accept-
ances to the widest possible degree. It is be-
lieved by bankers that these manufacturers and
contractors should receive advances only after
they have entirely exhausted their own credit
facilities.

TRAVELING MEN’S TROUBLES

They Are Multitudinous in These Days of Dis-
rupted Train Schedules

The troubles of traveling salesmen these
days are not confined to paying taxes and en-
forced idleness on Mondays, says the New York
Times. One traveling man who just recently
returned from a trip through the South relates
that, due to the curtailed passenger service on
the railroads, he was delayed for three days in
one town, and that in order to pay his swollen
hotel bill he had to pawn his watch. He ex-
plained that, while his expense checks had been
mailed by his firm on the prescribed dates to
various points along his route, it had taken him
so much longer to get from one point to an-
other that it was frequently impossible to make
his last check cover his expenses until he
reached the town at which the next one would
be waiting.
The Quartet of Strings

These facts have more than an academic interest. The violin and its big sisters, the violoncello and viola, are, beyond doubt, the loveliest and most generally attractive of all instruments to the ear, taking into consideration all possible advantages and disadvantages, and balancing one against the other. It is, however, a well-known fact that violin records do not sell so well, on the whole, as those of the 'cello, while the viola is hardly known. But what is more important still is that none of these instruments is as popular among buyers of records as its qualities would make one expect it to be.

To what extent, now, should one suppose that the peculiar modification of the violin tone in the upper registers, which makes it sound like a flute in these regions, is responsible for the relative slowness of sale, of which I have been speaking? Candidly, I don't think we should put too much importance upon this fact, although it is one that ought to be mentioned and taken into consideration. As I said above, when you listen to a trio of violin, flute and harp, you undoubtedly like the violin tones best. Why then should not the records of solo violin playing be even more widely appreciated?

The Source of Trouble

To tell the plain truth, I am pretty well convinced that the whole trouble is to be found in the retail stores. I think it would, in fact, be wrong to blame on the record or on the instrument itself what is really not of enough importance. I felt sure that someone would speak of the well-known facts regarding the reproduction of high violin tones; so I also spoke of them. But, while this is all true, it is also true that a trio of violin, flute and harp, where two of the three instruments sound almost wholly alike in certain registers, is a very popular form of instrumental music with record buyers. Then there must be some other reason for the slowness of which I complain.

In fact, we come back to the old facts. The violin is not appreciated by record buyers as it should be, any more than great violin playing is appreciated as it should be when it comes out before the public in the person of an Ysaye, a Powell or a Heifetz. Of course, the musicians rave over it; but the musicians are only a small minority. Now, I believe that one of the underdeveloped fields in record selling is right here in solo violin and solo 'cello reproductions; and I feel sure that if intelligent and well-informed work is put into promoting these, any salesman can reap a rich reward in his community, and among those who habitually visit him to buy.

The Great Players

The list of great artists who have made and are making records of their violin playing for the various talking machine record makers is formidable in quantity and dazzling in quality. Fritz Kreisler, Eugene Ysaye, who shall choose between them? Maud Powell and Kathleen Parlow; are they not the greatest women players of the world, unsurpassed since Norma Novareux herself? Albert Spalding, Francis Mollen and Eddy Brown, are they not making patriotic Americans proud of their country? Indeed, there are plenty of great violin players from whose records the best of violin music can be chosen at one's own sweet will anywhere and at any time. But I shall perhaps be excused for remarking that here, as elsewhere in the record game, one finds a narrow-mindedness on the part of the retailers which can only be put down to want of familiarity with the contents of the catalogs. It is simply incredible that any man who has once heard the lovely playing of Kathleen Parlow in that exquisite slow movement of Mendelssohn's violin concerto could fail to recommend the record to his customers. Of course, you cannot expect the latter to know for themselves; the very word "concerto" will frighten most of them. But the salesman owes it to himself to know at least the sound of every record made by a well-advertised artist; simply because, in the first place, the Victor, Columbia, Edison and Pathé people do not promote and exploit an artist unless he or she is really A1, and because, in the second place, these manufacturers have a right to expect that the labor and the artists expend, not to mention the money and time, in getting out fine records.

(Continued on page 54)
THE MUSICAL POSSIBILITIES OF THE TALKING MACHINE

(Continued from page 53)

shall not go in vain even to the smallest degree. When I add that the violin and 'cello records are all excellent, and that while and that they are suitable to every kind of decent taste—to every kind of taste that is not actually degraded—I have said all that need be said to recommend them. It only remains to point out that records as good as these can and should be made hot-cake sellers.

Taste!

In this respect may I say just a word on that very much discussed subject, public taste? Nothing is easier than to argue from one's own standpoint about other persons' ideas; and nothing is more fallacious. When a sensational, salacious newspaper is accused of degrading public taste, it always replies that it gives the public what it wants. The truth is that it gives the public what its own vulgarity wants; and the public responds to the suggestion in numbers always large enough to look superficially impressive, yet never really representative. The same thing is true with music; the vulgar mind wants only trash, when it does not actually want flth; and instinctively says that this is what the public wants, too. Yet it is a serious mistake all the time! The taste of the public is always better than it is supposed to be. That does not mean that the plain people are all educated in the latest musical ideas and fads; but that the public taste is always towards the sane, the healthy and the clean in art, when it has a chance to go in its own direction to suit its own ideas.

That is why it is always much easier to sell high-grade instrumental records than it seems to be; when the salesman himself knows what he is selling and cares for it.

Getting Acquainted

Now, then, what is easier than to make a sort of at-home study of the stringed-instrument records during the next few weeks, with a view to becoming acquainted with them more completely and definitely? I am convinced that there exists a great and almost undeveloped field for exploitation in this particular department of record selling, and I know, from observation, from talks with owners of talking machines and the statements of men in the business who know how to look for themselves at facts, that ignorance and not indifference or dislike is at the bottom of any public slowness to take up the reproduction of violin and 'cello music.

Some of Them

Just a word must follow about some of the violinists and 'cellists and about some of their records.

It is always safe to introduce a prospect to Kreisler or to MacMillen. Kreisler is many, energetic and tonally lovely in his playing. His interpretation of the Dvorak Humoresque has sold well, but his other pieces have been badly neglected. I should like to have one every listener to his records of his own adaptation of Viennese dance tunes, to his Tambour in Chinois, and to some of the lighter music he has recently played. MacMillen is charming, quiet and less energetic. He has as yet done too little, but the two or three light bits he has recorded will tickle the ear and fancy of even an untrained music lover.

For clear, virile calmness, commend me to Spalding. He, too, is an American and a fine one; and now I believe is in the service. Get some of his Edison records and try them. You will enjoy them and him.

Pure glory of tone and pure serenity of thought are Kathleen Parlow's. Her playing of that lovely Andante of the Mendelssohn violin concerto is the best thing she has yet done. Its title is against it, but if you don't want to be out of date in heaven's name get out that record and listen to it. Then go and sell it.

Maud Powell might almost be called—apololo-}

gies to a charming lady—a "veteran" of the concert stage. Her very fine violin and her superb fine playing have been exhibited through Victor records for some time, but she is yet to be acquainted with the public. Let us hope that the Dvorak Humoresque, a Chopin value arrangement, and, I think, the finale of Mendelssohn's violin concerto. She is a woman without a doubt but all "nerves" are not
FEATURING EDUCATIONAL SIDE OF THE VICTROLA

What Dealers in Various Sections of the Country Are Doing to Impress Upon the People in Their Communities the Value of the Victor in the Schools—Original Ideas Set Forth

PHILADELPHIA, Pa., February 4.—One of the important forces operating for the advancement of music lies in the work being done by the educational department of the Victor Talking Machine Co. Within the last few years such remarkable headway has been made in introducing talking machines into the schools, as a means of educating young America, that today the list of public and private institutions of learning equipped with Victorolas includes several that have blackboards in their rooms alone. The possibilities of the Victrola along strictly educational lines are, of course, being empha-

display utilizes the blackboard and desks, but in addition has introduced dummies to represent the children and the teacher, thereby adding a human element that is decidedly attractive. The Calder window features the school model Victrola and shows several very interesting pictures of the Victrola being put to use for educational purposes.

NEW STORE OPENED

The Munn-Brunswick Phonograph Co. has leased the Roehmler business block at 209 Main street, Cedar Falls, and has installed a complete line of phonographs and other musical instruments.

Tone—the vital thing

If you, as a manufacturer, can talk and prove tone superiority in your product, you have a selling argument to overshadow all the "talking points" of cabinets, and designs and accessory features.

And you can talk tone superiority. You can put out a product that will be a revelation in tone-purity, tone-quality, and tone-volume. When you realize what vivid, lifelike, colorful tone can be produced and sustained by the talking machine equipped with Parr Magnetic Reproducer fitted with the Vibratone Patented Diaphragm.

Take the Parr Magnetic Reproducer—

The most sensitive of reproducers. The permanent magnetic device, an integral part of the reproducer, acts on the stylus box. No possibilities of giving warmth and dullness in the tone reproduction of silent passages make old-style sound boxes seem obsolete. And in tone-volume it overshadows them all. Parr reproducers create un-pleasant, music destroying blasts, caused by the needle jumping and losing its grip. The Parr Magnetic Reproducer, with its unerring flexibility, follows every wave and vibration in the music, giving the record hold.

LOCATED IN NEW QUARTERS

Clifford A. Wolf, manufacturer of diamond and sapphire phonograph points, is now situated in new quarters at 229 Fulton street, New York. The new offices greatly exceed the space formerly occupied and are combined with the manufacturing end of the business. Mr. Wolf reports the continuance of good business and is optimistic over the future.

OPEN NEW BRUNSWICK SHOPS

Handsome Establishments Opened in Boston and Quincy by Arthur Koerner

Boston, Mass., February 6—Arthur Koerner, prominent in the affairs of this city and an officer in the American Bankers' Association, is interested in two specialized Brunswick phonograph shops, one in this city and one in Quincy. It is announced that he has made arrangements to open up additional departments and stores to be conducted as exclusive Brunswick shops. He will devote his entire time to these establishments. It is reported that these will probably number eight or ten. The addition of these stores is a direct result of the success of the two stores mentioned above, which were only opened last September. A. J. Kendrick, of the Brunswick-Balke-Collender Co., who consummated this deal, left the early part of the week for New York.

LYRIC RECORDS ARE POPULAR

The Lyraphone Co. of America, manufacturers of the Lyric records, report that the sales of their records during the past two months have exceeded the expectations of the management. The February releases have met instant response from the dealers, who seemed to be especially pleased with the concert and operatic numbers. Both the February and the March lists contain a goodly number of the latest popular songs.

PARR MANUFACTURING CORPORATION

1 UNION SQUARE At Fourteenth St. NEW YORK
Quality and Economy—Plus

FOR highest quality at a low price we do not know of any line of merchandise that compares with the New Edison Diamond Amberola and Edison Blue Amberol Records.

The New Edison Diamond Amberola repeatedly has defeated the best known makes of talking machines costing from two to four times as much in side-by-side “tone” comparisons before unbiased, uninfluenced audiences of phonograph experts.

Incidentally—no needles are required to play the Amberola because it has a permanent stylus (reproducer point) made from a genuine diamond, beautifully rounded and polished, and Edison Blue Amberol Records are practically unwear-able and unbreakable.

If you would know the “reasons why” the New Edison Diamond Amberola is so much superior musically to talking machines costing several times as much, and if you are interested in the profits being made by Amberola dealers, address:

THOMAS A. EDISON, Inc.

Orange, N. J.
INCREASED MACHINE DEMAND EXPECTED IN KANSAS CITY

Prospective Prosperity in Agricultural Sections Encourages Talking Machine Men—Working Hard to Prepare for Demand—Excellent Reports From Both Jobbers and Dealers

KANSAS CITY, Mo., February 6—The present prospects indicate that a much larger number of persons will want talking machines than before the last fall, and local dealers generally are laying their plans for a substantial increase this summer, and for a good trade in the fall and winter. The statement is made advisedly that they are thus laying plans considerably in advance, since many of them realize the possibility that freight conditions might hamper shipments, and that war conditions may interfere with the production of machines. The distributors at Kansas City have made an even more careful survey than usual of the conditions here and have closely in touch with their dealers. The recent extremely cold weather in this territory has been stimulating to optimism among business men and farmers; chiefly because it was accompanied by heavy snows, which provided needed moisture for planted wheat, and for the soil which will bear corn and other crops in the spring.

The supply of machinery has not been excepted any more interestingly in Kansas City territory than at a "convention" of Edison dealers at Coffeyville, Kan., Tuesday, January 29. Edison dealers gathered from eastern Oklahoma and eastern Kansas for a conference, the meeting resulting in the effecting of a definite organization. M. M. Blackman, manager of the Phonograph Concern distributor in Kansas City territory, and C. L. Smith, of the same office, were among the "outsiders" present, Mr. Blackman especially joining in the discussion of the methods and trade matters. The dealers present reported a great deal of benefit from the discourses, and also much pleasure from the discussions of assistance to other members of the Edison family.

F. J. Morthoy, formerly with the Manhattan Furniture Co., Kansas City, Kan., is now traveling for the Edison Co. in western Missouri, eastern Kansas and Oklahoma. This territory was formerly covered by C. L. Smith, who now has duties in the sales department of the Kansas City distributing headquarters.

Kansas City business men are up against the same problem that business men in other cities are, with the office holiday. While there seems to be a bountiful supply, the turnover is extraordinarily fast. The Dictaphone, naturally, is helping with this problem. The branch office in Kansas City probably received more voluntary inquiries with reference to Dictaphones in the last two or three months than at any other time in its history.

The Henley-Waite Music Co. is taking time by the forelock and anticipating any possible inconvenience with reference to freight shipments by ordering six months' supplies in advance, and designating shipments. This company, like most of the others, is not afraid for the business that will develop this year. It looks like a big trade during the summer and of course next fall a repetition of the increases of the past year.

Mrs. Nellie Williams, manager of the Victrola department of the Jomes Store Co., stated that January was the biggest January the department had ever had, in fact, that the sales went way over those of last year. She added that were it not for the shortage of machines, thousands of dollars' worth more of goods could easily have been sold—in fact, many sales were lost outright for this reason while in others substitutions were made. Mrs. Williams stated that the long waiting business had been especially good, especially the sale of out-town records, which has increased 200 per cent. John McCormack's concert on January 31, as usual, greatly stimulated the sale of his records. Before the opening of the store on the morning of February 1, people were calling up and asking for the records of the songs McCormack had sung the night before.

Burton J. Pearce, manager of the talking machine department of the J. W. Jenkins' Sons Music Co., stated that a tremendous volume of business has been done, ever since the holidays, both in the wholesale and retail departments, the only handicap being the insufficient supply of goods.

Miss Paty Ann Epperson, head of the record department, says that the sale of records continues to be wonderfully good. The firm's extensive advertising to the effect that the war spirit of the home should be counteracted by lots of music in the home seems to have a direct effect on the sale of records.

A. T. Trosler, manager of the talking machine department of the Schulzner Arms Co., is in the East where he will stop off at the Victor factory. The Jenkins-Riley Co., Pathé jobbers, report business having slowed down considerably since Christmas but say that collections are holding up splendidly. This great plenitude of money on the part of the people is particularly true in Oklahoma. Business has never been better there, especially right in the oil district. Here the new art models are a great favorite. F. G. Abernathy, Highland, Kan., a Pathé dealer, recently died following a short illness.

Baily Bros., Greenacres, Mo., recently took the agency for the Pathé machine and say the initial business has been really excellent.

Otto D. Stacke, manager of the talking machine department of the Geo. B. Peck Dry Goods Co., stated that business was better than ever before—the department having made a very substantial increase over last year's volume. Like every one else, however, Mr. Stacke lamented the shortage but said that it was only recently that he had been seriously handicapped, as he had been fortunate enough to have had a fair supply on hand.

The Winderich Piano Co. has been having its usual steady business in Victorolas. Of course, it has felt the lack of machines and is, in fact, practically cleaned up on almost all models.

Miss M. E. Tower is the new assistant to Mr. Hall in the Hall Music Co.

The Edison Shop recently put on another stunt which, like its Hawaiian players, drew the crowd. In a series of recitals, Spalding records and other violin records were used in conjunction with the playing of Gilbert Jaffy, the "Boy Wonder" of Kansas City. This boy, who at fifteen is considered an embryo genius, was recently "discovered" in the city's Little Italy quartet.

Miss M. Ellis, Architects' and Engineers' Supply Co., Pathé and Sonora dealers, is a new assistant in that department. She was formerly with the J. W. Jenkins' Sons Music Co.

The Kansas City Photo Supply Co., which is in the center of the shopping district, installed on October 15 the Columbia line. It was an experiment, but it has developed in less than four months into a big retail distributing point. Practically one-half of the floor space of the company has been turned over to its use. Three additional rooms for demonstrating machines and record stocks in addition to a beautiful rest room are open in the course of construction. H. P. Laster is in charge.

The Brunswick Shop, 229 Walnut street, which has not yet licen in existence a year, has had a steadily increasing volume of sales until the owners now feel that they can well hold their own with some of their oldest competitors. Their most popular model has been the $180 in Adam boxed. The more expensive records have not been as popular as formerly but collections are holding up fine on all sales of machines.

The patented spun vibratory horn is finished in Roman Gold.

Two Artistic Window Suggestions Described for Talking Machine Dealers

The hearty response from dealers all over the country to the small but effective Washington Birthday display, illustrated and described in last month's World, and of which all of the ready-made display material was disposed of, not only to the Eastern dealers but as far west as Fresno, Cal., has proved without a doubt that dealers are very much alive to the importance of good talker trimmings.

Going over my file of letters received during the last year (this being the twelfth article on window displays) I find that some of the most effective displays have been criticized and complained about on account of being too large, too costly and too difficult to make to be practical for the average dealer. Among the dozen or more described the two finest are to my mind, undoubtedly, the silhouette display in the May, 1917, issue and the Edison prize display published in the November issue. In this article I have simplified these very fine displays and, in doing so, I have reduced the size about one-half, which will enable the great majority of stores to make use of them.

The tendency in the making of musical instruments, and particularly so in talking machines, is to produce the artistic and beautiful. Just look at the improvement in the appearance of talking machines the last few years! Some of the fine period cases now on the market are veritable works of art. But even the inexpensive instruments are in many cases convincing proofs of the skill of the designer, with a dignity of line and real skill in decoration to make the picture of the window harmonious and attractive.

An ideal setting for a fine period cabinet would be a music room furnished in the same historic design as the instrument. This is being done by at least one big store in Chicago (Lyon & Healy) and the result is very beautiful. But the average store has not the space nor does the expense justify such a realistic window display. There is, however, some well-defined and specific decorations used for music rooms that could be applied to the average show window and which would make that sympathetic and appropriate environment that adds its charm to the tastefully decorated music salon. Music suggests allegory and symbolism. Nowhere is the power of symbolism more attractively manifest. The musical instruments pictured in allegorical decorations lend themselves beautifully to decorative effects. The accepted meanings of some of the symbols most useful for music dealers (in window as well as printed advertising) are here recorded.

Pan Pipes: Music.
Lyre or Harp: Heavenly music.
Mask: Dramatic art, light or grand opera according to expression of mask.
Lamp or Torch: Learning; education; wisdom.

Bell: Joy, earthy music, call to worship, invitation.
Candle: Study, information, attribute of Christmas (with holly wreath).
Trumpet: A message, a warning.
Scroll: Poetry, ancient learning.
Laurel: Victory, earthly success, reward.

But the richest field for the decoration for music windows are the thousands and thousands of paintings and panels on musical subjects from which the thoughtful decorator can choose the motif that is suitable for his purpose.

The most attractive features of the two displays herewith illustrated are the symbolic pieces.

In the Edison grand opera window, No. 1, and in the silhouette display, the joyous and triumphant groups of dancing and playing children tell the true story of the joy and happiness that music adds to life.

All the several features that made the two original displays so successful have been retained, as will readily be noticed by comparison.

THE TALKING MACHINE WORLD

February 15, 1918

Here's the kind of record that makes the customer's eyes sparkle, and makes him reach for his pocketbook. It's A2475, the Columbia debut of Lacalle's Spanish Orchestra!

Columbia Graphophone Co.
Woolworth Building, New York

TWO ARTISTIC WINDOW DISPLAYS FOR "TALKER" DEALERS

(Continued from page 59)

Every one and all of the other twelve displays pictured the time this series of articles appeared can be simplified and reduced in size and cost the same way.

Dealers should be able to adapt for their

own needs the most important display features in any display described in this journal suitable for their own particular clientele and their own particular location. No other people on the face of the earth appreciates "Yankee ingenuity" more than the people in the land of its birth, and Yankee ingenuity is only another word for originality, and this applies equally to window trims as well as to Ingersoll dollar watches and other distinctive American inventions.

Display Adapted From Edison Window No. 1

This display consists of three frames made of wood and enameled ivory ornamented with one-inch black velour strips, as plainly seen in picture. Four ornamental wood supports serve to keep the side frames securely fastened to bottom of floor. The art panels consist of hand-colored figures mounted on black velour, which makes a very rich and striking contrast. The open space with the flower wreaths is intended for the name of the phonograph that is to be featured.

Description of Silhouette Display No. 2

The frame work is identical with the Edison display except the circle on top, which is intended for the trade-mark, monogram or any other effect wanted. The silhouettes are hand-

Details of Simplified Relief Art Window

(No. 2) Shown at Bottom of Page 59

cut from black reinforced velour and mounted on white silk. The large center panels in the two uptight years are intended for showcard and poster work.

STEINBACH & CO. EXPANDS

Asbury Park, N. J., February 7.—Steinbach & Co., of this city, one of the leading department stores in this section of the State, has purchased the Victor business of the Zacharias Co. Steinbach & Co. have opened up a very attractive Victor department on the fourth floor of their building, and according to their present plans will give the Victor products an aggressive representation, fully in accord with their prestige and quality.

Sometimes we feel that the ultra-progressive stores are to-day suffering from over-management as much as some of the old-timers have been suffering from neglect.

STILL JOINING THE SERVICE

Ernest Fontan, of the Traveling Staff of the New York Talking Machine Co., to Serve Uncle Sam—This Company Now Has Twenty-Three Stars on Its Service Flag

Ernest Fontan, one of the most popular members of the traveling staff of the New York Talking Machine Co., N. Y, Victor wholesaler, who has been covering New Jersey territory, was accepted this week as a member of the new National Army and according to present plans will enter the service of Uncle Sam the end of the month.

With Mr. Fontan's entry into the Government's service the New York Talking Machine Co. now has twenty-three stars in its service flag and this number is considered one of the finest records proportionately that has been attained by any commercial organization, in view of the fact that the company's staff is comparatively limited. At the present time several of the former members of the sales force are "somewhere in France" while others are in camps getting ready to leave for "over there" in order to do "their bit" in the war for democracy.

It is also understood that five members of the shipping force will soon be called for duty in the second draft giving the company's service flag a grand total of twenty-eight stars.

WILLIAM L. GARBER RETURNS

William L. Garber, who was formerly associated with the New York Talking Machine's executive offices for several years and who enlisted as a member of the artillery corps some months ago, has just returned to New York and has rejoined the company's sales staff.

Mr. Garber was ready and willing to serve his country, but after spending several months in camp the medical examiners found that he was suffering from an "athletic heart" and this ailment necessitated his return home.

"I'm going to break a record one of these days," remarked the athletically inclined youngster.

"Fine," said his dad. "What record?"

"One of the phonograph records," replied the boy.

SCHUBERT PHONOGRAPH

VALLORBES JEWEL CO.'S NEW NEEDLE

Manufacturers Well Known in the Sapphire Trade Introducing a New Semi-Permanent Needle for Talking Machine Records

LANCASTER, PA., February 6.—The VALLORBES JEWEL CO., of this city, have recently perfected a new needle for the talking machine, playing lateral cut records. It is to be known as the "Vallorbes Semi-Permanent Needle," and is attractively carded in sets of five and then placed in a moistureproof waxed envelope.

The VALLORBES JEWEL CO. have been engaged in the needle business for some time, and claim to be the originators of the diamond point. As their name would imply they have hitherto restricted their output to the VALLORBES sapphire ball needle, which has made quite a name for itself in the trade, and diamond points W. F. Meikyey, president of the company, realizing the demand for needles and their scarcity, due to the great worldwide war and its prior claims on the steel industry, set about to produce a needle which would be semi-permanent in form.

The VALLORBES semi-permanent needle, he announces, is not only a "conservation" needle but a great improvement as well. Necessity has brought forth many new inventions during these wartime that have proved a great boon to industry. The VALLORBES semi-permanent needle, it is claimed, is one of these and is here to stay. These needles are made in soft, medium and loud tones.

EFFECTIVE COLUMBIA PUBLICITY

A Timely and Attractively Arranged Advertisement in the Saturday Evening Post Has Come In For Considerable Notice and Much Praise

The Columbia Graphophone Co., New York, used a very attractive advertisement last week in the Saturday Evening Post featuring a picture that was recently shown in the Talking Machine World which portrayed a family in England seeking shelter from the bombs dropped by German air raiders and taking along with them a Columbia Graphophone to relieve the wait until the "all clear" signal was given. It is said that this photograph pictures a scene very usual in the London district.

"Under the heading "What Would You Have Taken With You?" the text of this interesting advertisement reads as follows:"

"The people in this picture are seeking shelter from the bombs dropped by German air raiders. When the 'Take Cover' siren sounded they hustled to the dugout. You will notice that there are seven people here, and a Columbia Graphophone (as the English prefer to call it) is the only thing they are taking along.

"You who have never been bombed, and you who have never owned a phonograph may think this a queer choice. Some might have taken bed clothing, others food, others silverware and valuable china, others a picture, a Bible or a lamp. "But this family, owners of a phonograph, do not appear to have hesitated.

"Only the people who are actually feeling the horrors and dangers of war can truly appreciate the necessity for music."

"Music allows you to forget the discomforts of the present hour—it helps you to remember happier things and to dream of still happier seasons."

"The Columbia Grafonola, by virtue of the diversity of records, songs, dances, and instrumental selections that it will play, represents the greatest relief from boredom or oppression that is known."

"Incidentally, for the benefit of the curious, we will state that this is a Columbia instrument shown in the photograph. Any good phonograph would have been desirable in the dugout, but this happens to have been a horn type of Columbia Grafonola. They are very popular in Great Britain and all her colonies.

"In the United States the most popular Grafonola is the standard type, with the horn encased in the cabinet."

SOME WARTIME SUGGESTIONS

If you arent at the theater ever, you had better be there! Don't you bother me with that ridiculous Playin' dead! Walk, on, on, whizz when you walkin'; Smile, smile, do some friendly talkin', and you'll get there without buildin'.

MAKING SONA-TONE PHONOPHONES

The Sona-Tone Phonograph Co., Inc., Organized With Men of National Prominence Invited to Manufacture Some Prominent Purchasers of the Sona-Tone

Thomas Dixon, author of "The Birth of a Nation," recently wrote the following letter to the Sona-Tone Phonograph Co., Inc., referring to a Sona-Tone phonograph which he had purchased for his home.

"Mr. W. Ladd, inventor of this instrument: I am enclosing you my check for the Sona-Tone phonograph which we have played almost continuously in our home for the past week. I find it the clearest and sweetest toned musical instrument I have ever heard."

Two years ago Mr. Ladd, who holds patents on several successful and widely used mechanical devices, became interested in phonographic reproduction, and particularly along the lines of greater resonance. He worked to produce an instrument that would practically eliminate the noises due to accidental imperfections or the ordinary wear of the record, and as a result of his experiments the Sona-Tone was placed on the market and soon won considerable praise.

The commercial success of the line attracted the attention of a group of local business men, and a new company was formed as a new head of the production department, and controlled by interests identified with the United States Steamship Co. and its subsidiaries. The following are the officers of the Sona-Tone Phonograph Co., Inc.: President, B. G. Higley, vice-president and general counsel of the United States Steamship Co.; vice-president, H. F. Morse, president of the Hudson Navigation Co.; and vice-president of the Groton Iron Works; secretary and treasurer, T. A. Sherman, counsel for the United States Steamship Co.

It is planned to manufacture a complete line of instruments, and among the recent purchasers of Sona-Tone phonographs are the following: Mrs. John F. Mugger, president of the New York City Federation of Women's Club; L. H. Griswold, president of the Bell Telephone Co., Plattsburgh, N. Y.; Stuart Gibbons, member of the law firm of Barker, Watson & Gibbons; George Hodgson, prominent in Buffalo social and religious circles; H. C. Hequembourg, president of the Dunkirk Iron Works, Dunkirk, N. Y.

BROAD IN CHARGE AT SCHIRMER'S

Henry Broad, well known in the Victor trade, is now in charge of the Victor department of G. Schirmer, Inc., 4 East Forty-third street, New York. This department will be under the general supervision of Mr. Andrews, the manager of the various retail departments of G. Schirmer, Inc. Mr. Broad succeeds H. O. Hunter, who resigned as manager of the Victor department last week.

DISTRICT MANAGERS' CUP TO VERKES

Field Sales Manager, Making His Headquarters in Chicago, Wins President Whitten's Sterling Silver Trophy Offered to District Managers

George W. Hopkins, general sales manager of the Columbia Graphophone Co., New York, announced recently that H. A. Yerkes, field sales manager of the company, had won the President's Cup Won by H. A. Yerkes

Whitten district managers' cup, a handsome sterling silver trophy, which had been donated by Mr. Whitten, and which had been keenly contested for among the district managers throughout the country. The terms of this contest provided that permanent possession of the trophy rested with the district manager who won the cup for three months, and notwithstanding the fact that he did not register his first victory until October, Mr. Yerkes won the cup with three consecutive victories.

Mr. Yerkes won the President Whitten district managers' cup as district manager of the Middle West territory, and W. L. Sprague, manager of the Minneapolis branch, is also being congratulated upon this victory, for his branch was a most important factor in bringing the trophy to the Chicago division.

The final result of the contest was in doubt until the last moment, for several of the district managers had been winners for two months, and needed only one more victory to clinch their right to permanent possession of the cup.

H. A. Yerkes is one of the most popular members of the Columbia sales organization, and was recently appointed field sales manager. He is at present making his headquarters in Chicago.

PRESSER CO. TO HANDLE VICTROLAS

Philadelphia Music House to Inaugurate New Talking Machine Department on March 1 With A. D. Proudfit in Charge as Manager

Philadelphia, Pa., February 8.—It has been announced that the Theodore Presser Co., prominent music publishers and dealers of this city, have arranged to open a new Victrola department with a store at 1710 Chestnut street, adjoining their present quarters, on March 1. The new store is being fitted up in a most elaborate manner with a full equipment of sound-proof demonstrating booths. Passageways will be cut from the present store of the company into the new Victrola section. The Victrola department will be under the management of A. D. Proudfit, at present manager of the retail piano store of the Estey Piano Co., New York, and formerly connected with the piano and Victrola department of Frederick Loeser & Co., Brooklyn, N. Y., as assistant manager. Mr. Proudfit has had much experience in handling Victorias with the Loeser house and is considered well qualified for his new post.

TO ISSUE "EMERSON SPOTLIGHT"

Emerson Phonograph Co. Bringing Out House Organ for Its Dealers

The Emerson Phonograph Co., New York, manufacturer of the Emerson records, has announced the publication of a new house organ which will be known as the "Emerson Spotlight." The company decided to publish this house organ in order to keep its dealers posted on the latest developments of the Emerson business. The first issue of the house organ is now in the hands of the printers and will be in the mail by the end of the week. The "Emerson Spotlight" is essentially a practical publication and aims to tell the dealers how to increase the sale of Emerson records. If the first issue is any indication of the future numbers, this new periodical will be helpful, entertaining and useful to every storekeeper handling Emerson records.

Grafonolas Popular in Oregon

M. E. Everitt, of North Bend, Selling Many of These Instruments in His Territory

PORTLAND, Ore., February 4.—The local branch of the Columbia Graphophone Co. recently received an interesting photograph from M. E. Everitt, North Bend, Ore., who owns one of the finest drug stores in the State. Mr. Everitt handles the complete Columbia line and is an enthusiastic "booster" of all of the Columbia products.

The accompanying photograph shows a shipment of Grafonolas recently received by Mr. Everitt.

Big Columbia Shipment for M. E. Everitt

This shipment of machines being the third shipment sent to Mr. Everitt during the last few months. Up to about six months ago there were no railroads in the town where Mr. Everitt is located and most of the machines which he sold were taken out from this town with either a rowboat or a gasoline launch, up the various rivers to the dairy farms and logging camps.

PATHE WINDOW HANGER FOR MARCH

The Pathé Frères Phonograph Corp., New York, has sent to its dealers a very attractive hanger featuring the new Pathé March records. This hanger contains a splendid picture of Grace Hoffman, a prominent coloratura soprano who records for the Pathé library exclusively. Miss Hoffman has a new record in this March list which will doubtless meet with a ready and extensive sale.

The March supplement of Pathé records also contains a number of well-known popular hits, dance records, Hawaiian numbers, standard vocal records, instrumental solos, band and orchestra records and a specially selected list of Irish records.

Liquid Music in Portland, Ore.

Phonograph Cases Found to Contain Imitation Machines Lined With Five-Gallon Kegs of Whiskey—Columbia Co., Manager Through Error Aids in Foiling the Smugglers

PORTLAND, Ore., February 4—Phony phonographs they proved to be, all done up in Sonora boxes and billed to the Columbia Graphophone Co., this city. Liquid music indeed it was which was sent from San Francisco to Portland. When Deputy Sheriff Christofferson opened the cases at the county jail he found instead of phonographs five five-gallon kegs of perfectly good jazz whiskey which hadn't any business in dry Oregon.

The shipment was consigned to an unknown person, but the boxes bore the address and name of the Columbia Graphophone Co. They came up on the steamer “Deaver” from San Francisco, and were lying round in everybody's way waiting for somebody to come and take them away. Finally, in order to relieve the congestion the dock officials telephoned to S. D. Heater, of the Columbia Co., to send for the boxes. This he did, and when the boxes arrived at the house wonderment was expressed that they should be Sonora cases. Down into the basement the janitor moved them. Mr. Heater went down shortly afterward and found the janitor trying hard to shove something quickly back into the cases. Examination showed a five-gallon keg of liquor.

Mr. Heater promptly notified the sheriff's office and the offending cases were removed. Inside the cases were tall fir boxes painted a mahogany red to imitate the conventional talking machine. Inside each box, securely fastened, was snugly resting a five-gallon keg of liquid music.

The person to whom the shipment really belonged appeared at the dock with a bill of lading covering the shipment after it had gone and demanded his goods. Upon being informed what had become of it he disappeared abruptly and has not been seen since, although the sheriff is looking for him.

A Display Card Series of Value

The cards are 14" x 22", each individual card painted by an artist, and presenting a striking sales appeal for Victor Records. Designed especially for Bruno Service and are "exclusive." The service consists of two cards monthly.

We Do Not Retail
How Best to Weld the War Spirit and the Sales End Advantageously :: :: : By Warfield Webb

The only way to sell talking machines and to increase the sale of records is the method that will attract customers to your store. You want to get a legitimate trade and you want to increase the sales in a manner that will not smack too much of side-show methods. You want to line up the customers with a novel method that will give you an opportunity for real business getting. Why not make your talking machine department a feature? Why not make it appeal with something of a novelty that will attract without undue publicity?

TRADE NEWS FROM BALTIMORE

Dealers Complain of Shortage of Machines and Records—Bad Weather Delaying Shipments and Hurting Trade—New Pathe Dealers Established—Reports From Leading Dealers

BALTIMORE, Md., February 8.—With a general cry of shortage of machines and records from most of the firms, business went ahead in January of the previous year, despite the difficulties faced by all dealers. The most severe January that the retail trade has had to face from the standpoint of weather in the history of the industry was the lot of these merchants in this city and this section. One snowstorm followed another in rapid succession, and even with a vigilant street cleaning department it was not possible to keep the streets clear of snow in the retail shopping centers.

Stores having talking machine departments away from the main centers improved their business until the shortage of records of the late numbers stopped them. The freight congestion is the most serious phase of the situation, and even goods shipped by express are just as hopelessly delayed as those sent by the freight route. Some of the Baltimore jobbers are now taking up the question of bringing in goods by motor trucks from New York and Philadelphia, a motor truck line being in course of organization at this time. This will take care of the freight problem in a measure, for Victor records will be brought down over the line from Camden.

W. C. Roberts, manager of E. F. Droop & Son, Inc., is in anything but a pleasant frame of mind. He says January business went back considerably over last year, not because of business conditions, but because of lack of instruments and records. It would have been easy to have sold hundreds of them if he had been able to get goods. There was a demand for 10 per cent. more records and 20 per cent. more machines than could be taken care of. "I am in conference with a truck company," said Mr. Roberts, "and plan to have shipments brought in on five-ton trucks. This will help to relieve the situation, but the difficulty we are facing in getting the shipment up here is that we have to send the shipments up to New York or Philadelphia because there is more tonnage in New York to come here than can at present be handled. I am hoping that this congestion will improve because the business is here and we ought to be able to get hold of it."

Jesse Rosenstein, for the National Piano Co., Pathe distributors, says that business went ahead last month, but not very much, owing to the shortage of records and instruments. He looks forward to showing big improvement in business just as soon as the goods that have been in transit for a long time arrive. A. Sindler & Son, furniture dealers of this city, have signed up a Pathe contract and will handle the line in a new music department to be established by them.

Mr. H. Eisenbrandt, of H. R. Eisenbrandt, Victor distributors, says that business showed an increase in January despite the shortage of instruments. He expects to see further improvement if only shipments of goods reach him.

HIGHER PRICED MODELS IN DEMAND

Victor Department of Ludwig Baumann & Co., New York, Tells of Increasing Demand for the More Expensive Types of Victorolas

In a chat this week with a representative of The World, F. J. Conn, manager of the Victor department of Ludwig Baumann & Co., Thirty-sixth street and Eighth avenue, New York, commented upon the fact that business the past month or so had been marked by an increased demand for the higher priced models of Victrolas. This is particularly gratifying in view of the fact that Mr. Conn's department during the past year has been the largest consumer of the smaller models of Victorolas in the city, and it is pleasing to learn that this demand is now in the market for cabinet Victorolas with an evident appreciation of the true musical qualities of the Victrola. Mr. Conn states that business has kept up very well so far this year, and judging from all indications these activities will continue for some time in coming to the talking machine trade.

D. A. CREED A NEW YORK VISITOR

D. A. Creed, vice-president and general manager of the Chicago Talking Machine Co., Victor wholesalers, was a visitor to New York last week. Mr. Creed left Chicago for this city in company with A. D. Geissler, president of the New York Talking Machine Co., and the Chicago Talking Machine Co. Mr. Geissler had planned to spend a week or more in Chicago, but was called home suddenly owing to the illness of his little daughter, Martha. Mr. Geissler's many friends will be glad to know that this little lady has fully recovered from her recent operation and has now regained her usual good health and spirits.

YOU'VE GOT TO KEEP SHOVING

Graspin' opportunity ain't the only thing. You've gotta put your shoulder to it and shove and keep shovin'. When you get a big thing movin' it's easier to keep it movin' than to stop and rest.

Standard Sectional Record Cabinet

A practical, inexpensive, convenient cabinet for dealers; made on the sectional principle, affording the following advantages:

1. It grows with your requirements: You first purchase just the number of sections you actually need for your present requirements; as you need more space, add more sections.

2. Adapted to any space: As many sections as desired may be placed in a stack; as many stacks may be used side by side as wall space will permit. Each section or cabinet is indicated by a letter and each compartment by a number, forming a system of filing unsurpassed for simplicity and convenience.

3. Neat in appearance: No empty shelves; no overcrowding. Case always complete, yet always capable of additional expansion.

Carefully made and beautifully finished in plain and quartered oak, and in imitation and genuine mahogany.

Made in two sizes; to hold 10-inch and 12-inch records. Each section holds 200 records (100 Edison records). Stack may be made up with all sections of the same size; or sections for 10-inch records may be used above sections for 12-inch records by means of a reducing section as shown in accompanying illustration.

Record sections furnished with or without doors.

Price for section $3.00 and up.

Cases shipped on approval direct from factory at cost, adding saving to you; on orders amounting to $10.00 and over we pay freight to all points East of Montana, Wisconsin, Colorado and South of Missouri. To points in and West of these states, we equalize freight charges. For further particulars and full list of prices for the different sections in the different grades, write for illustrated circular No. 80.

RECORD MAKERS APPEAR IN BUFFALO

Favorite Recording Artists Draw Capacity Audience at Concert Given in That City on February 7 Under Auspices of Dealers

BUFFALO, N. Y., February 7.—Buffalonians of all classes who own talking machines thronged Elmwood Music Hall to-night to see in the flesh, and to hear at close range, the artists who have made records for years and with whom they have been long acquainted through that medium. The occasion was the concert given by the Peerless Record Makers, a group of favorite recording artists brought to this city by the Talking Machine Dealers' Association of Buffalo, and the event proved successful beyond all expectations.

Those who appeared with the Peerless Record Makers included Henry Burr, Billy Murray, Arthur Collins, Byron G. Harlan, J. H. Myers, Albert Campbell, Peerless Quartet, Theodore Morse, Fred Van Epps and Sterling Trio.

The dealers threw plenty of human interest in their advance notices to the public regarding the program. Everything was done to herald the importance of the unique concert. This was one of the typical announcements of the dealers: "Recognizing the popular desire to hear the famous Record Makers, we have arranged this concert at great trouble and expense and through special arrangements with the recording laboratories. This is Buffalo's first and probably only opportunity of hearing these artists. Your record library contains selections by one or more of these artists and you will welcome this opportunity of hearing them sing and play just as they do when making records for their millions of admirers. A varied program, which will include many standard and up-to-the-minute numbers as well as old-time favorites, will make an appeal to every taste. Knowing these artists as you do, you can appreciate that their personal appearance in a concert will be an added treat."

The plan of bringing the Peerless Record Makers to Buffalo was presented to the local association by C. N. Andrews about a year ago. Mr. Andrews did considerable correspondence in the matter, but arrangements for the Buffalo appearance could not be made at that time. When the present concert was recently considered Mr. Andrews, O. L. Neal and C. H. Heineke were appointed a committee to make the arrangements.

President T. A. Goodl also appointed the following committee on advertising and tickets: V. W. Moody, Neal, Clark & Neal; F. G. Hohn, Bricka & Enos; John G. Schuler, Schuler Piano Co.; G. M. Kiess, Columbia Phonograph Co.; banquet committee, W. J. Bruehl, Neal, Clark & Neal; H. A. Brennan, William Hengger Co., and H. G. Towne, of Robert L. Lord's store.

Thousands of circulars advertising the concert were furnished free to the dealers and were enclosed with their monthly lists. The dealers all sold tickets and everyone was appointed a booster. This personal canvassing of friends by the dealers helped greatly in swelling the attendance. No details were overlooked in the use of window signs and billboard and newspaper advertising. Many reading notices of the event appeared in the local press.

H. G. Towne, secretary of the Talking Machine Dealers' Association, sent to each member a comprehensive notice regarding the entertainment.

"It is believed this concert will be a powerful impetus to the sale of records in this section. At the conclusion of the concert the record makers were entertained at a special banquet by the local dealers and were heartily congratulated on the success of the entertainment. W. J. Bruehl paid tribute to the singers in several original parodies.

Last night the Peerless Record Makers gave a very successful concert in Syracuse under the auspices of the local talking machine dealers and have also arranged to offer their two hours of pure entertainment in other cities in the East in co-operation with the members of the trade."

MEETING OF COLUMBIA DEALERS

To Be Held at Columbia Shop on Fifth Avenue on February 15 Under the Auspices of the Local Wholesale Branch of Columbia Co.

An informal meeting of the Columbia dealers in the metropolitan district will be held to-day, February 15, in therecital hall of the Columbia Shop, 411 Fifth avenue, New York, under the auspices of the local wholesale branch of the Columbia Graphophone Co. Lambert Friedl, manager of this branch, is responsible for this meeting and, according to his present plans, Columbia representatives in this territory will have an opportunity to discuss practical problems and hold a general "pow-wow" regarding merchandising and sales activities.

Mr. Friedl has prepared a program that includes many topics of vital interest to the dealers and he has planned to balance the serious part of the program by arranging for the appearance of several well-known Columbia artists, who will render a number of selections during the course of the afternoon.

In a chat this week with The World Mr. Friedl stated that business had kept up splendidly during the past few weeks and commented upon the fact that the Columbia Co. is leaving nothing undone to co-operate with the dealers in this territory. Referring to the difficulties incidental to securing goods at the present time, Mr. Friedl said: "We are going to almost unreasonable expenses in order to co-operate with the Government as well as our customers. In other words, we are making the Columbia Co. the third consideration in our business activities."

"The other day we paid express charges totaling several hundred dollars in order to secure some machines from the factory, and our dealers can therefore readily understand that the cost of doing business has increased tremendously during the past few months. However, we are charging this increased expense to patriotism and loyalty to our dealers."

TORONTO CONTINUES TO BE VERY ACTIVE TRADE CENTER

Leading Makers of Talking Machines and Records in Demand—Steady Expansion in Stores and New Concerns Indicate That 1918 Will Be a Big Year in This Progressive City

Toronto, Ont.—February 6.—The Robert Simpson and Tait & Sons establishments, which have not long been identified with Toronto, are the latest addition to the local list of “His Master’s Voice” dealers. The company’s “Music Studio” is located on the sixteenth floor, where they have a large demonstration room for visitors. It is in charge of Mr. Brown, formerly manager of the Mason & Risch Victrola department in Vancouver, and more recently on that firm’s sales staff in this city.

The Canadian Symphonola Co., Ltd., have just received at their factory an interesting souvenir of the Halifax disaster. A couple of their De Luxe Symphonolas that had not been opened by W. H. Phinney & Co., Ltd., the Nova Scotia distributors of these lines, came back for repairs, the cabinets being badly used up by fire and water. The packing cases being broken, scorched and soaked.

“No records exchanged” is the policy of the Toronto Grafonola Co. A notice to this effect is displayed in each of the twelve demonstration rooms. In discussing this policy H. Ritz, manager of the company, stated that he could credit increased record business to it.

The “Musical Trade” report A. R. Blackburn & Co., “in both the piano and Victrola departments.” The same report was made by R. P. Wilks & Co., who handle Columbia Grados.

The branch store opened up at 1657 Dufferin street, this city, last fall, by Toronto Grafonola Co., is reported by H. Ritz to have proven a good sale-getting agent.

“We are well satisfied with the amount of business developed during 1917,” said I. Montgomerie, referring to the Canadian distribution of Symphonola. He thinks it would be a good start if all the fine lines of Symphonola were to have the Canadian representation. E. Van Gelder of this firm has just recently returned from New York, where he visited the Sonora factory to arrange for 1918 deliveries. In their retail department they report good success in closing cash sales for the higher priced makes, a number of Toronto’s best-known citizens being among their recent customers. Mr. Harry R. Ebersole, manager of this department, said that the Christmas and New Year’s business arising out of the December campaign was very gratifying.

The Talking Machine Co., Ltd., are now running a newspaper series of lists of Edison re-creations.

Domestic records are now being distributed in Canada by the Pollock Mfg. Co., Ltd, in various towns and cities, with the exception of the Columbia Graphophone Co., which visited the Canadian branch during the past month. This was Mr. Willson’s first visit to Canada and was the coldest day ever experienced by him. After his return to New York, his friends and patrons of the Music Supply Co., Columbia distributors, were please to receive with that firm’s good wishes for Christmas and New Year’s a neat little vest pocket tickler. This with renewable fill came in a fine quality of seal with the Columbia trade-mark in gold.

With the calendar year Pathé Frères Phonograph Co., Ltd., have started their next season. As usual, they have started their feature of a picture on their second year. “The first year’s result exceeded our expectations,” remarked Otis C. Do-rian, general manager of that firm.

Arthur M. Temple, general manager J. A. Banfield of Winnipeg, Man., was among the January visitors to the Columbia factory in this city. During his visit he cabled a Columbia department in which Mr. Tanner stated more busi-

TO OPEN PATHE DISTRIBUTING BRANCH IN MONTREAL

Move Necessary to Take Care of Growing Business—Taking Machine Men Have Successful Meeting and Dinner—Berlin Gramophone Co., Enlarges Quarters—General News

MONTREAL, Que., February 5.—Owing to the rapidity with which their business is growing in the Province of Quebec, the Pathe Co. have decided to open a branch in this city to take care of that province. This branch will be under the management of Mr. Perrault, who has been so successful in handling the wholesale business in Ontario. Mr. Burgess’ promotion is a well-earned one, and will cause great satisfaction to those who are connected with him. The territory will be a large one, but with his long experience and natural ability he should have no difficulty in handling it successfully.

The Berlin Machine Men’s night out entertainment and dinner, this is the way the tickets read, will take place at Cooper’s February 8, when it is expected a large assemblage of Berlin machine men, piano and musical men will be present. The object of the gathering is to foster and stimulate an interest outside of business amongst the members of the trade, and no doubt this informal gathering will be the nucleus of an association for social enjoyment, to create better fellowship and have the members of the trade gather together. The idea is not to form a business association but to confine it strictly for social purposes.

In conformity with their policy of service, the Berlin Gramophone Co., Ltd., are making constant material enlargements to their record output and facilities for carrying larger stocks. An entire new building, with a private siding on the Grand Trunk Railway, has just recently been leased for a term of years.

The entire stock of Victrolas will be stored in this building along with materials for record making. The building itself is a fireproof structure and warehouses will be devoted entirely to the record business of the head offices and sales department.

This building just leased and of which possession has already been taken, gives the firm an additional 23,000 feet of floor space or an increase of 50 per cent. It is being fitted up to the requirements of the company, while extensive alterations in the record storage warehouses in the way of additions are being made. Not only is the factory output increased and the storage space doubled but even greater records of records will be carried at the company’s distributing houses in Toronto, Winnipeg and Calgary, making possible quick deliveries, so essential in recording.

A particularly interesting feature of the Berlin plant in Montreal is the recording department. Experiments and research work carried on by H. S. Berliner, vice-president of the company, personally, and with a staff of expert assistants for a number of years, has resulted in Canada possible. His Master’s Voice discs have been able to stock many hits, while still hits, through the efficiency of this recording department, which has made possible records of special value in this country and special by Canadian standards. Many of his made recordings of particular titles desirable.

Henry Burr recently made a special trip to Montreal to see how the Pratte Piano Co., Ltd., manufacturers of the Pratte piano, have registered their manufacturing phonograph department under the name of the Prattephone Co., Ltd., and report an exceedingly heavy volume of business in January for Columbia Grafonolas and Columbia records, and Miss Vejina, who has been with this department, is very pleased that there has been no apparent falling off after the record business established by her department in December last. The amount of stock received in the past few weeks promises a good outlook for its continuance.

The Berlin Gramophone Co., Ltd., report no falling off in sales of Victor machines and records as compared with their record December

TRADE CONDITIONS IN THE DOMINION OF CANADA—(Continued from page 68)

AFTER MISLEADING ADS IN CANADA

Amendments to the Criminal Code Advocated
As a Means for Checking That Evil—Text of Proposed Law—Grafonolas in Army Camps

TORONTO, Ont., February 2.—The subject of fraudulent advertising has been vexed a question for some time past. Many parties have been accused of advertising goods, but owing to the loopholes existing in the present law many cases that seem to present fraudulent methods have been allowed to escape through technical difficulties in its enforcement.

To meet these difficulties, amendments of the criminal code have been suggested and will come up for consideration in the near future. The original act of 1899 was amended in 1914, is reproduced herewith, with the inclusion of the proposed amendments:

"His Majesty, by and with the advice and consent of the Senate and of the House of Commons of Canada, enacts as follows:"

"I. The Criminal Code, chapter 146 of the Revised Statutes, 1906, is amended by inserting the following section immediately after the section 406 thereof:

"A. Every person who either himself or by his servant, agent, or anyone on his behalf, knowingly publishes or causes to be published any advertisement for either directly or indirectly promoting the sale or disposal of any real or personal, movable or immovable property, commodity, or service, or of any false or misleading statement, or false representation which is of a character likely to or is intended to enhance the price or value of such property or any interest therein, or to promote the sale or disposal thereof, or is liable to mislead anyone as to the true value of such property, shall be liable upon summary conviction to a fine not exceeding two hundred dollars or to six months’ imprisonment, or to both fine and imprisonment, or in the case of a corporation to a fine not exceeding five hundred dollars.

"The provisions contained in any advertisement containing any statement alleged to be false or misleading shall be prima facie evidence that the same was knowingly published or caused to be published, and shall be mentioned therein, as the advertiser, or proprietor, owner, agent, manager, as the case may be, of the business referred to in said advertisement. The said word person shall include an individual or partnership company or corporation."
CINCINNATI TRADE OPTIMISTIC

Excellent Business for January Gives Rosy Tint to Future—Many New Dealers Enter the Field
—Freight Empties Handicap the Trade

CINCINNATI, O., February 4.—Fair deliveries of records and a good demand for this phase of the talking machine business resulted in the trade accumulating a good record for the first month of the year.

It can be stated without question that the volume of disc sales in January was considerably above the anticipation of the trade. Much of this may be attributed to the prolonged cold spell and the heavy snows during the month, which caused a decline in the amount of street travel and forced people to remain at home and entertain themselves with concerts. Constant playing brought about a demand for additional records and the trade benefited accordingly.

The Fritzsch Phonograph Co. is looking forward to a decided increase in its business this year. Many new openings have been established and the officers expect to continue this work for several months. Among the agencies established in January were the Roberts Jewelry Co., Augusta, Ky.; Phonograph Record Exchange Co., Huntington, W. Va.; Smith Music Store, Parkersburg, W. Va.; Burgen Music Co., Charleston, W. Va., and the Intermont Drug Co., Appalachia, Va.

The Phonograph Co., Edison dealers, according to O. A. Peterson, manager, is daily expecting a decided increase in its depleted storage department. His assistants have spotted several cars and an opening of the weather, now apparently under way, is expected to enable the railroads to rid themselves of many “dead” cars. These have been on sidings for weeks, no attempt being made to haul these while the Middle West was suffering from lack of coal.

F. F. Dawson, acting manager of the Graphophone Co., is still on the job at the Cincinnati branch and is not likely to be relieved until March 1. His assistant, Herbert Schmiedeke, has joined the colors, the vacancy not being filled.

The Crystal Co. is handicapped by embargoes placed against outgoing shipments. Dr. A. J. Swing, of the company, reports many inquiries and looks for a big year.

A LIVE NORFOLK, Va., INSTITUTION

Columbia Co., Inc., Doing Very Well in That City With Columbia Line Exclusively

NORFOLK, Va., February 6.—One of the most successful retail establishments in this city is the talking machine store conducted by the Columbia Co., Inc. This store handles the products of the Columbia Graphophone Co. exclusively.

Store of Columbia Co., Inc., Norfolk, Va. and through the use of aggressive sales methods has built up a substantial demand for that line.

T. J. Carey, president of the company, is a firm believer in the value of efficient merchandising, and during the eight years that the Columbia Co., Inc., has been in business has left nothing undone to render service and cooperation to the store’s patrons. Mr. Carey attributes the success of the company largely to the fact that it carries a complete stock of everything listed in the Columbia catalog, both Grafonolas and records. It also maintains an expert repair department which proves of great advantage.

CLOSING MANY IMPORTANT DEALS

Century Cabinet Co. Steadily Expanding Its Line of Phonograph Representatives Throughout All Sections of the Country

The Century Cabinet Co., New York, manufacturer of the Century phonograph, has closed a number of important deals the past few months whereby this high-class instrument will be handled by representative dealers in different sections of the country. Some of these new Century dealers are leaders in mercantile activities in their respective cities, and are in a position to give this line splendid representation.

The Century Cabinet Co. is recognized as the largest manufacturer of talking machine cabinets in the country and the Century phonograph is therefore the product of a concern which has already won the confidence of the talking machine trade. James T. Lee, president of the company, is personally supervising the production and merchandising of the Century phonograph and is keenly interested and gratified in the fact that these products are being well received by the dealers.

PRAISE BRUNO DISPLAY CARDS

This Enterprising Firm of Victor Wholesalers Issue Most Artistic Announcements

C. Bruno & Son, Inc., Victor wholesalers, have received several letters from Victor retailers praising the display cards which this company is issuing monthly. These cards, which are 14 by 22 inches, are painted by a well-known artist and contain a sales appeal that acts as a stimulant to the sales of the records that are featured. One of the attractive cards in this month’s series presents the hit of “Chu Chin Chow,” entitled “At Siesta Time,” and if this card is displayed properly it is certain to increase the sales of this particular record.

Petiteness in money matters encourages petiteness in many matters.

REPAIRS
TALKING MACHINE TROUBLES AND HOW TO REMEDY THEM
Conducted by Andrew H. Dodin

(The department of The Talking Machine World is designed for the service of all classes of our dealers, including those who make and those who sell, machines. Andrew H. Dodin, who conducts the department, has a wide and careful reputation as a repairer of talking machines and conducts an excellent factory department at No. 26 South Fifth Avenue, New York. He is prepared to help you in any trouble which may befall you in the repair of your machines. The service is free.—Editors.)

SOME INQUIRIES ANSWERED

West Allis, Wis., January 31, 1918.

Editor, The Talking Machine World:

I would like advice on the following items, as I find phonographs people do not seem to agree on these points:

What is the correct playing weights of points on records of various standard makes of machines?

Is there a definite angle at which to place the needle or jewel point when in playing position on the record? If so, what determines this angle?

H. H. R.

Answer—The weight or pressure at the needle point of the Edison Diamond Disc sound box is between three and four ounces, and at the needle point for sound boxes playing lateral cut records, should be about six ounces. A diamond needle should track the groove of the record at an angle of about 50 degrees to the surface of the record, steel needles at about 45 degrees. In some cases a little more or less degrees of angle will give better results. The angle is determined by setting the sound box in the position giving the least blast. For instance, a sound box might play satisfactorily at the angle of 45 degrees, but would blast at an angle of 50 degrees, etc.

New York, N. Y., January 30, 1918.

Repair Department.

The Talking Machine World:

Some time ago one of the governor springs in a machine in my store was broken, and I was forced to substitute a spring not quite so long, but carrying a governor ball of about the same weight as the two that remained. Although the motor apparently runs at proper speed, there is a peculiar grinding noise coming from the governor, although it seems to revolve all right. Could the shorter spring have that result?

M. M.

Answer—If there is one short spring and two long ones in the governor it will naturally be thrown out of balance and is most likely to cause grinding or knocking noise. I would suggest that you write to the manufacturer of your motor for a complete set of springs and governor balls of the same size and attach them to the governor.

Bosion, Mass., February 2, 1918.

A. H. Dodin.

Editor, The Talking Machine World:

Is it possible to resharpen steel talking machine needles so that they may be used again without damage to the record? I understand that the shortage of needles has resulted in placing on the market of machines for resharpening them. Can these machines be used safely?

J. E. W.

Answer—Steel needles of the usual types are generally hardened at the point by some special process, and if this hardened surface is not entirely worn away by use it should be possible to repoint them successfully. The point and sides of the needle, however, will have to be ground smoothly, and then polished until no roughness is discernible. There have been needle-sharpening devices on the market here, but they have met with indifferent success, owing to the plentiful supply of needles up to this time. It may be that if there is a genuine needle shortage an improved sharpening machine may make its appearance.

THE TALKING MACHINE WORLD

NEW JOBSBER IN PHILADELPHIA

The George D. Ornstein Co. Appointed Victor Jobber With Quarters at 9 N. Eleventh Street

Philadelphia, Pa., February 4.—George D. Ornstein, who recently severed his connection as manager of the traveling department of the Victor Talking Machine Co., and in direct charge of the company’s traveling representatives throughout the country, after over twenty years in the Victor service, is president of the new George D. Ornstein Co., which has been appointed wholesale Victorola and Victor records in this city, and opened quarters at 9 North Eleventh Street on February 1. Associated with Mr. Ornstein in the new venture is George A. Lyon, who for several years past has been the company’s representative in the Philadelphia market, and is well known to both retailers and wholesale dealers in the city.

As a Victor wholesaler, Mr. Ornstein is particularly well equipped to win success. He is in a position to render distinct service to the dealers in the matter of giving advice, and his company is planning some original things in the manner of general service. The company will confine itself to wholesale business exclusively, and starts with a floor space of nearly 10,000 square feet in the business center of Philadelphia, a location most convenient in every respect.

INCREASED WIDDICOMB DEMAND

This Artistic Phonograph Grows in Favor With the Trade, Judging From Orders Placed

Grand Rapids, Mich., February 9.—The Widdicombe Furniture Co., of this city, report that the demand for the Widdicombe phonograph has far exceeded their expectations, and appreciative words regarding its meritorious product are heard on all sides.

The Widdicombe phonograph was the object of much interest at its debut at the Furniture Show held in Grand Rapids during the month of January. The full line was exhibited, four upright models and four column models, and the popularity of the line was attested to by the fact that they were entirely cleaned out of a manner of the models. It is announced that they are now able, however, to resume uninterrupted deliveries. With the immense facilities of the Widdicombe Furniture Co. at its back, the phonograph division will be enabled to expand to take care of all business.

With such an auspicious start, H. C. Howard, manager of the phonograph division, looks for great things during the coming year. It is his opinion that a large part of the success the Widdicombe line has built up for itself has been through the prospective jobber or dealer following their suggestion to "Play It Yourself."

ISSUE FRIEDA HEMPEL FOLDER

Thomas A. Edison, Inc., have just issued an artistic and impressive folder calling attention to the fact that Frieda Hempel, the noted Metropolitan opera prima donna, has been added to the already extensive list of Edison artists, as announced in The World last month.

The folder, which is produced in two colors, contains an excellent portrait of Miss Hempel, together with something about her career in opera, and the announcement that the Edison Re-Creation of her voice will soon be available.

NEW YORK, N. Y.
A War Policy

Being an Announcement from Stephenson, Inc., New York

We have entered this war to see it through to a deadly finish; an end that will insure for always the homes of civilized peoples against unbelievable ravage.... Stephenson Precision Made Motors are manufactured by DeCamp & Sloan, Incorporated, of Newark, N. J., whose enviable reputation for the manufacture of precision machinery has brought to them much work for the Government.... tools and dies of infinite accuracy..... parts for munitions, for aeroplanes. Thus, it has been their duty to apply their skill to things that wound and maim and kill; and, in the strange way of Fate, to apply the same skill to parts that gladden the heart..... the phonograph in the home, where a service flag means a son at the front..... and phonographs in the camps of the boys "over there."

And their war policy is to do their bit in every way. To apply their skill on Government work..... and always to apply the same skill on our work—the manufacture of the Stephenson Precision Made Motor. For, surely, music as well as shrapnel, has its part in war..... and who shall say it has a lesser part?

Vice-President

Stephenson, Inc., One West 34th St., New York
Detroit Talking Machine Dealers Elect Officers

S. E. Lind Heads Organization as President—Annual Convention of Grinnell Forces Tells of Progress—Busy Pathe Jobbers—Edison Shop Looks for Big Trade—The Business Outlook

Detroit, Mich., February 7—We have had many adverse conditions confronting us for the past thirty days owing to the coal situation. Offices in almost every section of the State have been without coal, and so serious has been the lack of coal and fuel that numerous cities have had to shut down their retail stores and factories almost completely. Railroad traffic has been tied up, and freight and express shipments have been the worst in their history. Notwithstanding this condition of affairs, it is really remarkable the encouraging reports one hears from dealers of talking machines and records. We don't mean to infer from this that all dealers are reporting a brisk business, but it is true that most of them report that business is entirely satisfactory. There are complaints by some dealers of their inability to get certain popular-priced models of machines, while others report a shortage of records. The wholesalers attribute the shortage to poor railroad shipments. Several dealers who ordered talking machines from outside jobbers had them sent by express and even then it took nearly thirty days to get them through to destination.

The Detroit Talking Machine Dealers' Association held its annual meeting in January at the Hotel Charlevoix with a very good attendance, the meeting itself being one of unusual interest and enthusiasm. The election of officers resulted as follows: President, S. E. Lind, Columbia Graphophone Co.; vice-president, Wallace Brown, Brunswick dealer; secretary, W. D. Trump, Jr., Max Strasburg Shops; executive committee, A. A. Grinnell, Strasburg Co., Graesser, Phil B. Lang and Edward Andrews, Jr. The association passed resolutions to render unanimous and hearty support to the city and State fuel administrators; also to put on the proposed concert some time around Easter, the money for tickets sold to be turned over to one of the patriotic funds. Reports of the various past officers and committees showed the association had prospered, and that with a larger membership than ever the new year gives promise of great things.

Grinnell Bros., operating twenty-four branch retail stores, held their fifteenth annual convention at Detroit from January 29 to 31. It was the greatest meeting of its kind in the history of the company. C. A. Grinnell, vice-president of the company, president at the business sessions. Among the numerous subjects discussed were the Victrola retail and wholesale departments. Reports showed that these departments enjoyed splendid business during 1917—probably the best of any in the Detroit or branch stores. A. A. Grinnell, vice-president and treasurer of the company, and C. H. Grinnell look after the Victrola departments both as to buying and distribution.

Max Strasburg, of the Max Strasburg Shops, who had planned to leave early in January for the South, has postponed his trip until some time in February. He will probably be "chasing the white ball on the green" under balmy skies ere this issue of The Talking Machine World is off the press.

Williams, Davis, Brooks & Hinchman Co., Michigan distributors for the Pathé line, are very well pleased with their sales the past year on Pathé machines and records, and both Mr. Chambers and Mr. Saunders, of this department, report that 1918 is going to be much better. In their building at Bates and Congress streets they have fixed up a very attractive room of what can be termed a "perfect Pathé Shop." It is of special interest to those who are already in business or who contemplate entering the talking machine business. The room shows just how a modern Pathé Shop should look as to decoration, booths and display as well as stock-keeping.

The East Detroit Music House and the J. L. Hudson Co. are doing a good business with the Sonora phonographs.

R. B. Alling, of the Edison Shop, is confident that 1918 is going to be a big year for all Edison dealers in his respective territory. The Phonograph Co., of Detroit, which is the jobbing house of the firm, is doing well with the Talking Machine. The last quarter of 1917 was the best ever in the shop's history. S. H. Haggerty & Co., of New York, wholesale and retail dealers, report that business is brisk and the future promises to be even better.

S. E. Lind, President T. M. D. Association member for Edison phonographs, and of which Mr. Alling is also manager, is taking on new accounts right along, but they are the kind that produce results and this means profits to the dealer. Daily recitals are given at the Edison Shop, and too much praise cannot be given the two young ladies who have charge of these recitals. Both are high-class artists themselves and the increasing attendance shows that they are worthwhile and worth the effort. The Edison Shop is the only phonograph store in Detroit that actually boasts of a recital hall—and it is right on the main floor.

S. E. Lind, local Columbia manager, was in New York during the early part of January, to attend the convention of Columbia Graphophone Co. branch managers. He is still effectuative over the convention, and he is determined that regardless of adverse conditions his books shall show an increase over the great record made in 1917.

W. F. Hurtie, sales manager of the Starr Piano Co.'s branch in this city, assisted by five other branch managers, were in Grand Rapids most of January in connection with the midwinter exhibition of furniture manufacturers. Their purpose in spending so much time in Grand Rapids was to sign up furniture dealers for the Starr line of phonographs and records. Mr. Hurtie had splendid success, as did the other men there.

J. Henry Ling, Columbia dealer, Detroit, was hurt February 1 in a motor car accident, but is now on the road to recovery.

H. L. Tuers in Aviation Service

Manager of Dealer Service Department of Columbia Graphophone Co. Joins Aviation Section of the Signal Officers' Reserve Corps

H. L. Tuers, manager of the dealer service department of the Columbia Graphophone Co., New York, has been accepted as a member of the Aviation Section of the Signal Officers' Reserve Corps and expects to be assigned to his new duties in the near future. Mr. Tuers is in line for an officer's commission at the end of the technical ground school course and the branch flying examinations. His successor has not yet been appointed.

A bluff is good (when you have enough reservoir power to protect yourself should the bluff be called).

THE TALKING MACHINE WORLD

CHICAGO, ILL., February 11.—While the manufac-
turing end of the Chicago trade has been ma-
terially handicapped by the recent five-day shut-
down and the "heathen Moon" edict, there is no grumbling among the dealers from this source, their only means of complaint at pres-
ent being the lack of crating facilities through-
out the country. They are having a great deal of tron in securing the necessary cars to make deliveries and when they are fortunate enough to secure some of the railroad rolling stock and place their product aboard they are out of the woods by no means, as then begins the real tron. Owing to the fact that the railroads have discontinued the use of their car tracers, many consignments are miscarried while in trans-
bit, as there is a likelihood that a shipment consigned to New York may turn up in New Mexico or vice versa.

A great many of the manufacturers were also inconvenienced somewhat by the recent coal shortage, which was brought about by the big blizzards during the middle of January, but no fuel administration proved its worth in the emer-
gency by literally commandeering numerous train loads of coal throughout the South and heading them off to Chicago. The railroad sit-
uation is bad throughout the entire country at present, as is well known; and for this reason jobbers as well as the retail dealers handling the products of the old-established concerns lo-
cated in various parts of the country have suf-
fereed from a shortage of goods. The medium-
priced machine has created such a strong de-
mand throughout the trade that the stocks of the dealers have been rapidly depleted.

While the "heartless Monday" edict has been a means of curtailing the retail business to a certain extent so far as the sale of instruments is concerned it has had a tendency to cause impetus in the record business. Those of the people who already owned machines are at present coming down on Saturdays and loading up with records that will tide them over the "double holiday." There is also quite a demand for records on Tuesdays, owing to the fact that theaters and moving picture houses are com-
pelled to close that day and people are pre-
pared, therefore, to spend the evening at home. The dealers who keep their fingers on the pub-
lic's pulse by watching the bookings of the big shows that are billed for Chicago are the ones reaping the harvest in the record business at present. For example, the demand for pop-
ular music records is being caused by the Ziegfeld Follies at present in Chicago is very brisk. The dis-
	water dealers have got in their supplies of these months ago, and are therefore, able to take care of the demand. There are musical shows that will reach Chicago in the near future which will also create a demand for other selec-
tions, and those dealers who have been far-
sighted enough to watch the bookings of these big shows have a plentiful supply of records on hand to care for the demand as it arises. There is still the shortage of steel needles, but not so great as during the holiday period, as shipments of these are coming in in fair shape at present, having been ordered several months ago.

Discussion of Conditions

H. P. Ellis, of the Chicago Talking Machine Co., reports that they are still inconvenienced by the bad shipping conditions. "We have," he says, "no problem as we all know sellers on the way that had been shipped from the factory on December 12. They are some place between here and the Vic-
tor factory, but just where we don't know. As the railroad companies are using their cars for trac-
ers other purposes, the shipper has to look out for himself. We have, therefore, em-
ployed a man who does nothing else but tear up and down the railroad tracks trying to lo-
ate our shipments for us. The only way we are receiving the goods from the Victor fac-
tories at present is through a very roundabout route. The city of Camden seems to be en-
tirely tied up so far as the railroads are con-
cerned, and for this reason shipments are being sent by boat through either Norfolk or New-
port News, and then placed upon the cars and shipped to their destination over the B. & O. and C. & O. We can trace our cars, up to the time they are loaded on the trains at these points, but after that it takes a veritable Sher-
lock Holmes to find them.

"Records are coming in by express and this is increasing our overhead expenses materially. The record situation so far as popular selections are concerned is very grave at present. The demand is exceedingly strong, and the factories are working to capacity. Nevertheless ship-
ments are a bugbear in this instance also.

A great many of our dealers who profited by our advice and ordered ahead way back in October and November are profiting. There are also a great many dealers who have a large supply on hand of records other than the popular ones, but they never took the trouble to use their sales-
ship ability in selling these records. They just merely put them in stock and took a chance on their being called for, as they devoted their time to selling the popular numbers. These dealers are now having a demand for popular stuff, but are unable to fill them. They have, therefore, taken the trouble to go over their stock and are finding numerous selections that can be sold with little effort, as they are selec-
tions that give satisfactory returns to the pur-
chaser.

All that these records needed was a little energy behind them, and now that they are being pushed they are selling in the majority of cases better than the popular ones. We have a plentiful supply of these records on hand, and, therefore, can take care of the demand, as they are all good sellers and are liked by the pur-
chaser if he is given the opportunity to hear them. By pushing these records the dealer cannot only relieve the situation materially, but can continue to do a good business as well if he will just expend a little energy towards push-
ing these numbers. In machines, the demand for elevens and fourteenths got beyond the con-
trol of the dealers and the demand for these instruments grew to such proportions that the dealers' stock was rapidly depleted in many in-
stances early in the season. The wise ones, therefore, began pushing the tens and sixteens, and these models have proved very satisfactory in taking care of the demand." New Repeating Device

The Repeato-agraph Co., of Illinois, is being incorporated with a capital stock of $10,000 for the manufacture of a new device for a repeater and stop for talking machines. The attorney for the company says that their clients do not wish to make any announcement at present, al-
though they will furnish details regarding their organization and prospect in the near future.

Exhibitors at the Furniture Show

The January furniture show in Chicago was a big success notwithstanding trade conditions that were not considered altogether favorable. (Continued on page 79)

THE "WADE"
FIBRE NEEDLE CUTTER
The "Original" Repointer Which Gives 20 or More "Original" Repoints

The term "Original" applies to the Wade Fibre Needle Cutter in several interesting ways. The Plier-handle principle (protected by patent) of the "original" Wade Fibre Needle Cutter was the "original" idea of the "original" Mr. Samuel O. Wade, an inventive genius and skillful mechanism of great ability and wide experience. The "original" invention of Mr. Wade to make the very best, most economical and durable Fibre Needle Cutter on the market has long since been fulfilled. The "original" Wade Fibre Needle Cutter is simple in opera-
tion, strong and durable.

AND BEST OF ALL, GIVES 20 OR MORE "ORIGINAL" REPOINTS as shown by accompanying illustration.

YOU'LL SELL MORE "WADES" BECAUSE THEY GIVE FOR THE MONEY

WADE & WADE, 3807 Lake Park Ave., Chicago, Ill.
SERVICE

Your customers will enjoy improved service at lower cost if you sell them fibre needles and a L. & H. Fibre Needle Cutter.

CHICAGO COVER BALANCE

It is not merely a Talking point; it's a Positive point of vantage.
Don't take our word for it. Ask the users. Investigate.

CHICAGO COVER BALANCE NO. 1

CHICAGO HINGED COVER SUPPORT AND BALANCE CO.
2242 WEST 69th STREET, CHICAGO, ILL.

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 77)

In the various buildings on Wabash avenue de-
voted to exhibits there were a number of dis-
plays of talking machines, and the exhibitors all
seemed to be satisfied with the amount of busi-
ness done. Among those having displays were
the Brunswick-Balke-Collender Co., Elmhola
Talking Machine Co., Vitaola Talking Machine
Co., Mandel Mfg. Co., and the United Phono-
graph Corp.

B. & H. Fibre Co. Preparedness

"Notwithstanding existing conditions," said
F. D. Hall, president of the B. & H. Fibre Co.,
"there seems to be no let-up in the amount of
orders coming in for our product. These or-
ders are not coming in from any particular part
of the country in excess to other parts, but it is
general all over the country, and for this rea-
son I am inclined to believe that the only thing
that will interfere with the trade in general
this year will be transportation. While several
of my most expert and valuable employees have
been called to the colors there has been no
interruption to our progress. It is, of course,
a hard matter to get workers to make fibre
needles, as it takes from four to five months to
drill them properly. Nevertheless, I was pre-
pared in a measure for the loss of some of my
most valued employees, because I always keep
several in training prepared for any emergency
that may arise. The absentees who have been
called to the colors have been assured by me
that whenever they return their same positions
will be waiting for them, and not only that, but
I think that I will have a mighty pleasant little
surprise awaiting each one just as soon as he
returns, as I am keeping their names on the
salary list, and every payday I put their salary
into a savings account which was taken out
under their name. Therefore, should any of
them come home and be physically unfit for
work they will have a little nest egg waiting
for them which they don't expect.

"I have been receiving a great number of testi-
monials from people all over the country who
have purchased the B. & H. fibre needle pointer.
Some of these letters are very amusing and
others are written by intelligent, keen thinkers,
and the prevailing statement which seems to
appear in all of them is "best I have ever used."

In making this statement, perhaps one is apt to be
skeptical and accuse me of bragging; never-
theless I make this statement in all fairness. It
is only the quotation contained in a great num-
ber of these testimonials which have been re-
ceived recently, and, therefore, is not original on
my part."

Gets Responsible Position

Miss H. McCormack, formerly with the talk-
ing machine section of the Hillman department
store, is now connected with the Wade Talking
Machine Shop, and is in charge of the record
department. Miss McCormack is a very capable
young lady and, although having been in the
talking machine business for a little over a year,
she has proven her worth in this short space of
time and is considered a valuable asset to the
Wade Shop.

Acquire Canadian Patents

The Orilla Furniture Co., of Orilla, Canada,
have recently made arrangements with the Auto-
matic Container Co., of Chicago, whereby they
have acquired the Canadian patent rights to
manufacture the automatic filing devices that
are produced by the latter company. A. V.
Taylor, superintendent of the company, has
written a letter to Mr. Read, president of the
Automatic Container Co., in which he states
that there is a very big demand for this product
together Canada. The holiday trade reached
proportions far beyond their expectations, never-
theless with their completely equipped factory
and their unlimited stock on hand they were able
to take care of the demand.

Mr. Read states that the business of the Auto-
matic Container Co. has progressed steadily of
late and had grown to such proportions that
it has become necessary to enlarge their factory
facilities. For this reason he has made ar-
rangements with a cabinet manufacturer located
in Buffalo to make the necessary cabinets in
that city and handle the Eastern trade from the
Buffalo factory.

Arthur D. Geisler a Visitor

A. D. Geisler, president of both the Chicago
Talking Machine Co. and the New York Talk-
ing Machine Co., spent last week in Chicago
looking after the business interests of both com-
panies.

New Victor Store

The Pearson Piano Co., of Anderson, Ind., a
branch of the Pearson Piano Co., of Indian-
apolis, have acquired the Victor stock of the
Meyer Bros. Drag House, of Anderson. The
Pearson Piano Co. have a well-established ware-
room in Anderson, and are better able to take
care of the talking machine business, being a
piano house, than were the Meyer Bros. Drag
House. They have been located in their pres-
ent premises for the past year and a half and
have a very fine trade established. They have
fitted up their wareroom with the necessary dem-
stration booths and have a competent sales
force to handle this business.

Bausch & Lomb

"The year of 1917 surpassed our expectations
and the new year has started off with a rush," said
H. B. Blb, sales manager of the phono-
graph division of the Brunswick-Balke-Collender
Co. "The number of new contracts coming in
daily is very gratifying indeed. We are very
fortunate in having our factory located in Du-
buque, Iowa, as it is west of the Mississippi
river and does not come under the Garfield
fuel saving order. Our plant is working over-
time and while some difficulty is being experi-
cenced in moving freight to the Eastern territory,
we are able to keep our different branches sup-
pplied with stock by making express shipments.

Are One-Record Phonographs Doomed?

A Frank Discussion of a Situation Which Faces Every Dealer

There are two kinds of fine phonographs now, the one-record instruments and the all-record Brunswick. Many dealers, noting the welcome of this new, final-type phonograph, are wondering about the future.

And they may well spend time in studying the trend of public demand . . . . the changing attitude.

Up to now, the music lovers have had to content themselves with one-record instruments. They have been compelled to take one certain line of records, barring all the others. This has meant a limited selection and the uncomfortable feeling that they were deprived of many favorites.

No One-Record Maker Offers All the Great Singers and Musical Selections

Indications point strongly to the fact that music lovers prefer to make up their selection of records by names of singers of musical organizations instead of by name of record makers.

The Brunswick plays all records.

This includes Pathe Records.

An alliance between Brunswick and Pathe gives each Brunswick dealer the right to handle Pathe Records. This includes one of the largest musical collections in the world—all the latest hits, all the great operas, all the instrumental and band selections.

The Brunswick is the premier instrument with the all-record feature. All Brunswick dealers unite in the belief that this new-day phonograph is destined to dominate the entire musical world.

Nine customers out of ten, once they hear The Brunswick and compare it with others, prefer it. And no Brunswick owner would ever go back to an old-type machine.

Dealers with a vision of tomorrow’s trade, men who want to know more about the tendency of the times, are invited to write to us so that we may present further interesting and important facts. For those who are looking ahead, we have a very interesting proposition.

The Brunswick

"A large contract has been closed with Martin Bros. Piano Co. by our representative, R. McClain, who travels out of a St. Louis office. C. W. Kalder, who was in charge of our exhibit at the recent Grand Rapids furniture show, closed a number of contracts with some of the largest furniture dealers in the U. S."

G. F. Gamble is the new Brunswick representative in the New Orleans territory.

The large wall map of the United States hanging in Mr. Bibb's office, which designated by means of small tacks the location of Brunswick dealers throughout the country, is beginning to look like a forest. The central States are completely covered and the Western States as well as the Pacific Coast States are filling up rapidly.

A. G. Kendrick, in charge of the Brunswick's Eastern territory, is showing some aper in securing new accounts.

Edward Strauss, formerly connected with the Chicago office of the Brunswick Co., has been transferred to their New York office, of which he will be general manager.

Wallace Brown, the live wire Brunswick dealer of Detroit, hopped into Chicago on a visit one day last week, stirred things up a bit and then hopped back to Detroit.

Among other Brunswick visitors to Chicago within the past week were J. Lane, of the Brunswick Shop, Toledo, and G. F. Standke, manager of the Brunswick Shop, Indianapolis.

E. S. Bristol, who covers in a most interesting way thirty-six counties in northern and central Illinois, has been spending a week or so in Chicago attending the furniture show. Mr. Bristol has had remarkable success in the restricted but populous territory covered by him.

The New F. & W. Sound Box

The F. & W. Mfg. Co., of this city, is about to place on the market a new and distinctive sound box. It is constructed on new lines, inasmuch as the sound waves have no direct communication with the tone arm, but are passed through a separating partition into an acoustic or tone chamber, then through proper channels, into the tone arm. The stylus bar or needle holder is suspended in an entirely new manner, making perfect connection, yet without friction, thus the sound is amplified with excellent results in point of tone and projection. Its reproduction of both vocal and instrumental music is decidedly realistic.

With this sound box, it is claimed that one can use the tone arm and get better detail, and in most cases a volume of tone equal to the ordinary box with the steel needle, thus saving wear and tear on records.

The sound box was invented and perfected by Elmar Fletcher, of Chicago, an old-time phonograph man, having been in the business both in the making and reproducing of records, before the molded record was known. The box will be marketed by Roscoe L. Wickes, a well-known business man of Chicago, and Mr. Fletcher under the firm name of the F. & W. Mfg. Co., 6 East Lake street. The trade will be duly notified when the box will be ready for the market.

H. A. Yerkes' New Post

H. A. Yerkes has been appointed field sales manager of the Columbia Graphophone Co. and will shortly leave his present office in Chicago to take up his new duties at the Columbia headquarters in New York. He has just returned from a successful tour of the Central States, having visited Indianapolis, St. Louis, Kansas City, Omaha and Minneapolis and reports that his business throughout the sections of the country he had just visited is in fine shape and the dealers he visited are very optimistic. Mr. Yerkes has just received an announcement from the New York headquarters that he has won the President Whitten district manager's cup, a handsome sterling silver trophy, which had been donated by Mr. Whitten, and which had been keenly contested for among the district managers throughout the country. The terms of this contest provided that permanent possession of the trophy rested with the district manager who won the cup for three months, and notwithstanding the fact that he did not register his first victory until October, Mr. Yerkes won the cup with three consecutive victories.

Mr. Yerkes won the President Whitten district managers' cup as district manager of the Middle West territory, and W. L. Sprague, manager of the Minneapolis branch, is also being congratulated upon this victory, for his brand was a most important factor in bringing the trophy to the Chicago division. The final result of the contest was in doubt until the last moment, for several of the district managers had been winners for two months, and needed only one more victory to clinch their right to permanent possession of the cup.

"All Through the Night"

Mr. Griffith, in charge of the stockroom of the Chicago Talking Machine Co., came down to work the other day wearing a big grin on his face, and said good morning to everyone in the office, and then began to pass cigars around to the boys. When asked the reason of his geniality he replied: "The stock brought a new baby girl to our house last night, so I have a sneaking suspicion it is up to me to receive congratulations." After giving everyone in the office a cigar he tipped his hat over one eye and sauntered majestically to his desk in the stock room. Soon after, strange and various well-known lullabies issued from a Victrola in the stockroom.

Talking Machine Shop News

C. L. Davidson, of the Talking Machine Shop, reports that they are still doing a nice business regardless of weather conditions and "beauties Mondays." "Our business for the past month compares very favorably with the January of last year," said Mr. Davidson, "and we therefore have no reason to be particularly anxious." We have a good supply of records on hand, just exactly the stuff that people want at present. We are, therefore, able to fill 90 per cent. of our orders. The trade so

(Continued on page 83)

The following are unsolicited testimonial letters which come to us from dealers and owners in every day's mail:

A characteristic letter from an Empire owner sent to us by the dealer who sold him the machine:

"The Model B Talking Machine I bought of you reached me last Saturday in splendid condition. I was impressed with my choice among different ones which I looked at and heard play. I heard 8 other leading machines and none of them came up to the Empire. A friend of mine here also has a Model B. The Empire records are all good, some of them very good. The machine in appearance is as good as any $200 cabinet I have seen and the quality of tone and the simplicity of operating are superior to anything I have seen for the price."

Our files contain many letters from dealers similar to this:

"We are in receipt of the Model B Empire Phonograph and must say that it is all you claim it to be, and for that reason we are mailing you order for four models today. Please ship these out at once as we have only one machine on hand at this time."

Write today for our complete catalogs of Empire Machines and Empire Records, and full information regarding our Splendid Dealer Helps

The Machine that Plays
any Record

Model B

Price $110

The Empire, Model B, con- ceded in price, but to the value ever offered in a high grade talking machine.
Our first announcement has brought us an enormous number of enquiries and orders from Manufacturers, Assemblers, Jobbers and Dealers all over the country.

"Uniset Reproducer" with Straight Tonearm, of all absorbing interest to Manufacturers and Assemblers, large and small.

"Uniset Reproducer" for Victor, Columbia, Edison, Pathe, etc. Machines—the Dealer's best side line. Stimulates record business in all makes of records. Prevents losing sales of Machines.

"Uniset Reproducer"—greatest progress in Phonography

UNISET REPRODUCER CO.
Cable Building, Jackson Boul. & Wabash Ave. Telephone, Harrison 1166 CHICAGO, ILL.
for this month has been steadily picking up, and at present is far ahead of the first two weeks in February, 1917. I think that trade in general has a good year before it, as we are now settling down to business, and the people are not as flighty as they formerly were when they read a newspaper, but are taking a more philosophical view of the situation."

Miss Ruth Lundgren, formerly with the Wade Shop, is now connected with the sales force of the Talking Machine Shop, having taken the place of Mrs. Myrtle Frame, who has joined the forces of the Davis Phonograph Co. on Adams and State streets.

Eddie Cantor, with the Ziegfeld Follies Co., who plays the part of the son of the character taken by Bert Williams, just returned from college, came tearing down the street the other day and dashing into the Talking Machine Shop, approached Miss Pauline Tishler and whispered savagely, "I must have them at once!" "What?" stuttered Pauline. "The four new Heifetz records—oh, boy, some music—I must have them."

To Handle Parquet Record
C. J. Woodward, 57 East Jackson boulevard, has secured the representation for Chicago and Cook County of the Parquet record, made in New York. He plans an active campaign in his territory for these products.

Mandel Mig. Co. Plans Big Things
The Mandel Mig. Co., Inc., with headquarters at 501-511 South Laflin street, have consummated arrangements whereby they will bring their full line of talking machines to the attention of the trade in this country in a most prominent way during the present year. They have concentrated considerable attention on this branch of their business and are turning out a very attractive line which shows extreme taste in designing, and better still, a most careful attention to details, as far as tone reproduction is concerned. The Mandel phonographs of 1918 represent the combination and concentration of some of the keenest minds in the industry, to the end that their products may be of a standard to win the approval of the most critical purchasers. That this enviable position has been attained is evident from the fact that the output last year far exceeded expectations, while the volume of orders which have been reaching this company since the first of the year, is of such magnitude as to demonstrate that the Mandel phonographs are constructed along lines that please the critical purchaser.

Open New Victor Department
Elle Bros., South Bend, Ind., will formally open their new Victor department this month. The new department is beautifully decorated and is situated on the ground floor of the building. They have installed twelve beautiful soundproof record demonstrating booths, and this, together with their large record department, gives them the largest Victor department in the State of Indiana.

New Hillman Manager
Forrest Edwards, formerly connected with the Rheinhart Piano Co. at Sixty-third and Halsted streets, is now manager of the Victor department of Hillman's department store. This department is operated by the National Talking Machines Sales Corp. of Boston.

New Wilson Manager
W. E. Cotter is now in charge of the retail phonograph department of the Thos. E. Wilson & Co. warehouse on the corner of Monroe and Wabash avenue. Mr. Cotter is very well known throughout the trade, having been for the past twelve years connected with the firm of the W. W. Kimball Co. as wholesale traveler, representing them as salesman for pianos and talking machines. He has for his assistant Miss Margaret Campbell, a very pleasing and charming young woman, who is an experienced "Columbian" girl, having been connected with many of the largest talking machine departments throughout the city. Mr. Cotter stated that they contemplate enlarging their phonograph department and adding four new soundproof demonstrating booths, as well as a new series of record bins. "Our business has shown a decided improvement for the past month," he stated, "and is rapidly increasing, due to our extensive advertising throughout the local daily papers as well as from the combined efforts of twenty-four women we have working for us on the outside. These women are bringing in great numbers of prospects and as a result we are making some very satisfactory sales. We are handling both Columbia and Sonora machines as well as the Wilson talking machine, which is manufactured by ourselves, and, therefore, have an exceptionally good line that will please the most exacting purchaser.

New Company Formed
There has just been organized in this city a new firm which has been incorporated in Illinois for $10,000 and is known as the National Phonograph Co., Inc. They are located at 2713 West Twelfth street and occupy the three-story building which was formerly the plant of the Elkin & Seidel Mig. Co. They are equipped with the most modern machinery both steam and electrical and have the capacity of turning out 1,500 cabinets a month. Their specialty is to produce a complete machine for the trade. Frank Cummings, an experienced and capable man, is the manager of the company, he was formerly connected with the World Phonograph Co., and had had charge of the finishing, machine shop, cabinet and assembling departments. The new company at present has two beautiful and original models prepared for the general trade and already over 200 machines are on the floor awaiting delivery.

Maurice Hebert represents the new company as chief designer. He is well known to the trade as one of the most capable artistic and original draftsmen in the country. He is known not only for his work in the talking machine industry which is in itself remarkable but also as... (Continued on Page 82)
Bigger Things for 1918
Bigger for You — Bigger for Us

We have planned and prepared for BOTH a larger output — insuring better services, prompt deliveries, and even a better product than in 1917.

The Mandel line of talking machines, varying in retail price from $35 to $250 and meeting the price demands of every class of trade, has been improved in many details which means in the aggregate a considerable increase in intrinsic value.

This is a line which has proved a distinct satisfaction giver from the start.

Every part of every Mandel—Case, Motor, Tone Arm, Sound Box, Horn, Tone Chamber not only is distinctive but made in the Mandel factories, thus securing standardization and uniformity of output.

Do you want to handle just this type of machine?

It costs you nothing to investigate.

Let us send you model No. 3, illustrated here on FREE TRIAL.

CHARLES J. WOODARD

Room 50 Cabinet Bldg., E. Jackson Blvd., CHICAGO
FROM OUR CHICAGO HEADQUARTERS—(Continued from page 85)
dealers are carrying over a large amount of business. With more women wage earners than we ever had before, combined with the wonderful crops we had all over the country in the past year, which necessarily brought with them better wages than ever before, there is bound to be a notable improvement in business in the near future."

Returns From Eastern Trip
L. E. Noble, manager of the wholesale Victrola department of the Rudolph Wurlitzer Co., returned last week from a trip through the East, where he visited several of the large Eastern cities, as well as the Rudolph Wurlitzer headquarters at Cincinnati. "I received quite a shake-up on January 23," said Mr. Noble, "while aboard the Manhattan Limited, running through Philadelphia about three miles outside of North Philadelphia, something happened and all the coaches tilted up. One man was killed and eight men were injured severely, but I managed to escape unscathed. The visit I paid to the Victor factory left me full of optimism, as they certainly are doing things down there. Many of our dealers have reported that their business has increased materially in the past year and that the holiday trade was very satisfactory."

The Six Best Record Sellers
The Columbia library announces the six best sellers for the month as follows: "Alleluia Haec Dies" and "Veni Jesu" (Paulist Choristers of Chicago); "Barbiere Di Siviglia," "Largo Al Factotum" (Make Way for the Factotum); "Battle Hymn of the Republic" and "Star Spangled Banner;" "The Best Things in Life Are Free" and "For You a Rose;" "Calling Me Home to You" and "There's a Long, Long Trail;" "Caprice Viennese" (Opus No. 2) and Thai "Meditation," a violin solo.

The six best sellers for Pathe for the past month are: "The Honeysuckle and the Bee" and "Pansy Faces;" "Liberty Loan March" (Sousa) and "The Invincible Eagle" (Sousa); "Gold and Silver Waltz" and "Jack o' Lantern" (Medley Fox Trot); "The Darktown Strutters' Ball" (Fox Trot) and "Homeward Bound" (Medley One Step); "Leave It to Jane" (Medley Fox Trot) and "Umbrellas to Send" (One Step); "Pigtails and Chopsticks" (Xylophone Solo) and "Concert Polka" (Xylophone Solo). Edison's six best sellers for the month are: "Battle Hymn of the Republic" (Old Plantation Melody); "My Heart at Thy Sweet Voice —Samson and Dalilah" and "Triumphal March —Aida;" "Loth du Ball" and "Marche Loraine;" "New York Blues (Rag Classical)" and " Saxophone Sobs;" "Ellis March (Instrumental Duet)" and "One, Two, Three, Four Medley (Waltz);" "It's Nice to Get Up in the Morning;" and "When the Bonnie, Bonnie Heather is Blooming (I'll Return, Annie Leather to You)."

Victor six best sellers for the month are as follows: "My Sweetie" and "Some Sunday Morning;" "Midsummer Night's Dream" (Orchestral); "Over There" and "Laddie Boy;" "Stars and Stripes Forever" and "Fairst of the Fair" (Sousa); "Somebody Loves Me" and "The Lily" and "My Sweetheart is Somewhere in France;" "Modern Maiden's Prayer" and "That's the Kind of a Baby for Me."

Big Order for Uniset Reproducer
The Uniset Reproducer Co., which is located in the Cable Building, Jackson boulevard and Wabash avenue, expect to make deliveries of the "Uniset Reproducer" the second week in February. Manufacturers who have tested this reproducer are enthusiastic over its great possibilities.

W. Hadart, vice-president and general manager of the company, has just closed contracts with a large phonograph company in the Middle West, which manufactures 75,000 machines a year. This is only one of several important deals that emphasizes how the "Uniset Reproducer" will play a prominent part in the industry this year.

As was mentioned in this department last month this reproducer is an absolute departure from all other sound boxes that are now on the market. It will play all records no matter of what make or description, including Victor, Columbia, Edison, Pathe and Gennett, etc., in one and the same position without change of any kind.

Charles H. Green Coming
Charles H. Green, who will be the manager of the National Music Show at the Grand Central Palace, New York, during the planned convention in June, will be in Chicago this month. He will be prepared to outline in detail the plans for the show to the local manufacturers. Mr. Green was very successful in his conduct, not only of the previous piano exhibitions, but also of shows in other lines, consequently the Music Trade Exhibitors' Association is to be congratulated on having secured him for this year's event.

Talking machines will be featured at this year's show on an elaborate scale, as they were last year in this city.

A PROGRESSIVE CHICAGO MAN

Wm. Tures, of Combination Attachment Co., Has Built Up an Excellent Business With the "Orotund" Universal Tone Arm and Sound Box

CHICAGO, ILL., Feb. 10.—Wm. Tures of the Combination Attachment Co with headquarters in the Republic Building is a man who conducts his own business in such good shape that the men observing him want to avail themselves of the same intelligence and energy. Mr. Tures has just been made a director of the Republic Merchants Association, who conduct the wonderful service system in the great building in which the Combination Attachment Co. is located. He is also a member of the publicity committee of the same organization. The Republic Item, a spirited little monthly published in the interests of the Merchants Association, recently told the history of his life and also printed the photo cut of him. Mr. Tures in a recent talk with The World described the latest introductions in the line of "Orotund" universal tone arms and sound boxes—combinations which give an excellent tone and also are adapted to both hill anddale records. Talking about the combinations represented by either number 3A or number 311 tone arms and sound boxes, Mr. Tures said:

"Is mechanically correct as it can be adjusted to the addition so that the proper angle is obtained, regardless of the height of the turntable or the size of the sound box. It is the tone arm in which such adjustments can be obtained. The special adjusting sleeve construction and the continuous tapering elbow enables the arm to be lowered or raised, also the tone is carried unobstructed down into the throat of the tone chamber."

"The graduated or tapering effect is correct to produce perfect acoustic conditions."

"The tone produced by the sound box is convveyed to the tone chamber in such a way as to produce rich, clear, musical tones."

"The base of the arm is mounted to swing on ball bearings, a patent construction not found in any other tone arm and the only ball bearing arrangement where all bearings are in contact at all times, and have a perfect rolling action."

"A perfect turn back joint which also can be adjusted, is the most convenient method for changing needles."

"The universal sound box centers perfectly when changing from the bill and dale jewel record to the lateral cut record position."

"The weight is correct so that any record can be played safely and the fibre needle can be used universally on all records. This cannot be said of any other tone arm construction."

"The "Orotund" universal tone arm and sound box is a work of art, as it is symmetrical and very attractive in appearance. It is an ornament on any talking machine. It was not the idea of the designer to see how cheap it could be made, but to embody all the best and important features to make it the highest grade tone arm on the market and to produce it at a fair price."

TO EXHIBIT AT NATIONAL MUSIC SHOW

Among the leading talking machine companies in the East who have reserved space at the National Music Show, to be held at the Grand Central Palace, New York, in June, and of which Charles H. Green is manager, are Thos. A. Edison, Inc., the Columbia Graphophone Co. and the Pathé Freres Co.

NEW EMPIRE RECORD CATALOG

Attractive Volume Just Issued Includes All Records Up to January, 1918—It Is Carefully Indexed and Interestingly Prepared

The Empire Talking Machine Co., Chicago, has just issued a comprehensive record catalog which lists in convenient form all Empire records issued up to and including January, 1918. For the convenience of machine owners the records are first listed in alphabetical order, and then, according to the type of selection whether concert music, dance music, etc. For the further convenience of the reader there is also a list provided in the back showing the pages upon which each record is illustrated and which size may be found.

The volume is carefully indexed, and makes a most impressive showing. It also indicates the substantial progress that has been made by the Empire Talking Machine Co. to date in the production of records.

CHRISTINE MILLER MARRIED

Popular Edison Artist Married to Daniel M. Clemom, of Pittsburgh—Spending Their Honeymoon in Chicago, Many Congratulations

CHICAGO, ILL., February 12.—The many friends in this city of Miss Christine Miller, the distinguished contralto, who is widely known in the talking machine trade through her Edison tone tests and her large repertoire of Edison records, were somewhat surprised to-day to learn of her marriage. The happy man is Daniel M. Clemom, formerly one of Carnegie's partners, and one of the big magnates of Pittsburgh, where it is stated he has prepared a $67,000,000 home for his beautiful and talented wife. Mr. and Mrs. Clemom are spending their honeymoon in Chicago to-day, and are receiving the most cordial felicitations of a host of friends in the talking machine trade, for there are few artists who have such an army of admirers in and outside the industry.

VITANOLA

"The Quality Goes Clear Through"

Make Every Dollar Count

And remember—Vita-Nola Talking Machines work in perfect accord with the spirit of the times—the spirit that demands efficiency without waste.

While good to look at, thoroughly dependable and wonderful tone qualities, not one unnecessary dollar goes into the maintenance of a Vita-Nola.

Thousands of people have seen our VITA-NOLA TALKING MACHINES last month at the furniture exposition. Hundreds of them have commented upon them. And what they all say is this:

"We had no idea that the VITA-NOLA was such an extraordinarily good phonograph."

"That's our fault. We have been modest. We still are. We believe it is good business in the long run to give our buyers more than they have been led to expect."

"But we know we are selling "MORE PHONOGRAPH" for the money than any other manufacturer.

To prove this write for our FREE TRIAL OFFER and you will be the judge. Also write for catalog and surprisingly low prices.

WANTS TO SEE THE TRAINS MOVE

Just a Little Sunshine and Rain Needed, Says L. C. Wiswell—Lyon & Healy Resume Concerts—Bartlett Markets Die Castings—New Morenus Phonograph—Other Timely Topics

CHICAGO, ILL., February 11.— "All we want is just a little sunshine, just a little rain. That will melt the snow—so the trains can go. And the trade will smile again," mused L. C. Wiswell, manager of the Victor department of Lyon & Healy, when called upon by The World this month. "But," he continued, "that's getting to be an old story now, sad but true. Too much snow and not enough trains. If the train service of the country had been normal through the past month, I don't believe there is a dealer in the country who would not be doing an enormous business to-day, more even than he would have dared anticipate. It is really surprising, when one stops to consider, how great the demand for talking machines is to-day."

"A great many dealers ask me this question," continued Mr. Witwell. "If the factories are working to capacity how is it that there are not more machines produced than formerly?" "Now that is a very simple question to answer," he continued. "If one stops to think. In normal times there is an average of twenty-six working days during the month. But take January of this year for example. To begin with there was the usual New Year's holiday, four Sundays and four half-day holidays on Saturday making the average of seven days that the factories were idle that month. But added to this we have had packed on a five-day shutdown on account of conserving fuel, as well as two heatless Mondays, which makes a total of fourteen days that were lost out of the thirty-one. For the month of February we have before us, counting Sundays and Saturdays, Saturday half days, Lincoln's and Washington's birthdays as well as the four heatless Mondays a total of twelve fall days out of the month that will be lost. Taking these facts into consideration, in spite of the factories working at full capacity, how can anyone wonder why they are not producing the same amount as formerly? That is a concrete example of the situation at present, but just as soon as the railroads are in good working order again and there are no more added holidays there is certainly going to be a busy season ahead."

A Good Sales Puller

Lyon & Healy have resumed their concert season and attracting large numbers of people daily with their three afternoon performances. One of the features of these recitals are two very talented and entertaining young ladies who appear each during performance. Miss Olive June Lacy, one of the pleasing entertainers, demonstrates to the audience the applicability of the Victrola to the student of vocal culture by singing duets, accompanied by the instrument, while the other young lady, Miss Edna Baum, is accompanied by various instrumental selections in presenting classic and fancy dances. Many inquiries from prospective purchasers of machines are resulting from these concerts and numerous sales have already been made.

They Market Die Castings

E. P. Bartlett & Co., jobbers and manufacturers' agents of steel copper products, 15 North Jefferson street, this city, represent the Indian Die Casting Co. of Indianapolis, in Minnesota, Michigan, Indiana and Illinois. They not only take orders for die castings, but also market the company's complete tone arms, sound boxes and stylus bars. They are in a position to manufacture to order practically all parts for talking machines. They report excellent business.

New Morenus Phonograph

The Morenus Piano Co., well-known manufacturers of pianos and player pianos on West Superior street, corner of Orleans street, Chicago, have entered the talking machine trade with a line which is well worthy of the attention of dealers everywhere. R. F. Morenus, president of the company, himself a practical piano manufacturer of many years' experience, naturally turned his attention to the acoustic proposition at the start. The horn of the Morenus machine is shaped like a saxophone and enters the tone chamber from the bottom instead of the top. It is made entirely of wood and the tone, which is big and vibrant although large in volume, is in no way unpleasant. Play the machine with a fibre needle and you get the fine result. It is equipped with a unique graduating tone modifier, which Mr. Morenus himself designed. The machine has a high-grade reproducing tone arm and many little conveniences which are calculated to please the consumer. It is equipped with a Chicago hinged cover support. The Morenus is made in three attractive styles, retailing respectively at $110, $125 and $150.

Ottawa Pianophone Co. Progress

The Ottawa Pianophone Co., with general sales offices at 862 Republic Building, Chicago, states that the factory at Ottawa, notwithstanding the deterrence caused by the "fuelless Mondays" and difficulty in making their shipments, is now rapidly heading towards the desirable state of being able to make shipments of Hiawatha talking machines with some degree of promptness. They also show some very fine letters from dealers who have been selling these excellent machines in direct competition with other machines, all of which goes to show that the merits of the Hiawatha are being widely recognized.

Death of Mr. Ryde, Sr.

James Ryde, father of J. B. Ryde, assistant manager of the Victrola department of Lyon & Healy, died at his home, 7229 Princeton avenue, Wednesday, January 30. He is survived by his widow, two sons and one daughter. Albert Ryde, one of the sons, is at present in training at the Great Lakes Naval Station, Great Lakes, Ill. The funeral was a private affair, the services being conducted at the family home and interment was at the Oakwoods Cemetery.

Different But Practical

The MORENUS Phonograph is a Distinct Departure from a Tonal Viewpoint.

The horn, which is entirely of wood, is built on the principle of the saxophone and enters the tone chamber at the bottom, not the top. The tone is big and full but mellow, and the reproduction of the artist's voice or instrument is faithful to an unusual degree.

Among the other features is a unique tone moderator which actually graduates: an exceptionally high grade and acoustically correct tone arm and reproducer, and a cover support which makes handling the lid a delight.

The case designs are right and the cabinet work and finish unexcelled.

The MORENUS is in 3 STYLES

Patriotism on Records

Words of Leaders Will Be Heard All Over the Country—Campaign to Start Soon

The Four-Minute Men, who now make speeches to audiences on the war work of the country, will soon have their rivals in the addresses of leaders of America and her allies, which will be taken on the talking machine and delivered far and wide to public meetings throughout the country. The new idea was conceived by Guy Goltzeman, a St. Louis attorney, who is now in the East in the interest of the Nation's Forum, the organization which he has founded to push the work. He is inducted by the Committee on Public Information, which sees in this new method the possibility of getting the war speeches of America's leaders, not only in their own words, but in their own voices, before the entire country.

Among the American leaders who have already made five-minute records for the movement are Senators McAdoo, Daniels, Baker and Lane; Frank A. Vanderlip, Samuel Gompers, Senators Harding and Lewis, Champ Clark. James W. Gerard and Otto H. Kahn. Mr. Goltzeman expects to add to this list General Pershing and the leaders of the armies, navies, and civil governments of Great Britain, France, Italy and Belgium. The master records on which the speeches have been recorded are on plates of steel and will be preserved in the Government archives at Washington. For use at public meetings, in moving picture theatres, lodge rooms, assembly halls, Y.M.C.A. auditoriums, and similar gathering places, other records will be manufactured in great numbers, and on the reverse of each record will be a selection of patriotic music. These records will be spoken by especially manufactured talking machines, which will project the voice for a distance much further than usual.

"The idea came to me," said Mr. Goltzeman, "as I looked at the facade of Washington's farewell, and the original of Lincoln's Gettysburg address, in the Congressional Library. I profoundly wished that the vitality of their voices could have been preserved."

Live Publicity of Wallace Brown Phonograph Shop

Detroit, Mich., February 12—Wallace Brown, the well-known talking machine man of this city, is a hustler, and especially so when it comes to concentrating the attention of the public on the Brunswick Shop, which he controls, and the Brunswick phonograph, which he handles. The illustrations herewith give a very impressive idea of his activity in this direction. One shows two different sign boards which are used by Mr. Brown on the roads leading to Detroit, and the second illustration shows Wallace Brown's Brunswick Shop ad, which he is using in this city. This is advertising of a result-producing kind.

Form Million Dollar Corporation

The Aluminum Ware Mfg. Co., of Elmira, to Take Over Toyophone & Woodward Co.

Elmira, N. Y., February 8.—A new million dollar corporation, with its plant and home offices in this city, has been formed recently under the name of the Aluminum Ware Mfg. Co., of Elmira. The consolidation effected absorbs the National Aluminum Works of this city, the Toyophone and Woodward Mfrs. Corp., of New York City, and the Aluminum Distributing Co., of New York. The latter is a sales company headed by James H. Opp and this company undertakes to sell the whole production of the three plants.

The Aluminum Ware Mfg. Co., in taking over the Toyophone and Woodward Co., New York, secures the patents for a talking machine which this company has made and exploited during the past year. This machine has met with considerable success and all of the parts will be manufactured at the new company's plant in Elmira.

The Mirrophone Co., of Troy, O., has been incorporated with a capital of $10,000 to take over the output of the Lorimer-Hicks Co., manufacturers of the Lorophones.

"Combination" Plan Interests

Trade Well Pleased With "Combination" Plan, of Otto Heineman Phonograph Supply Co.

In a chat with The World this week, Otto Heineman, president of the Otto Heineman Phonograph Supply Co., Inc., New York, commented upon the fact that the manufacturers throughout the country are very well pleased with the "combination" plan that the company featured in last month's issue of The World.

In this plan Mr. Heineman called attention to an ideal combination for an $85 machine; this combination including the Heineman motor No. 77, tone arm No. 11 and Ideal sound box No. 2. An ideal combination for a $165 machine was featured as the Melssbach motor No. 18, tone arm No. 98 and sound box No. 20.

These two combinations are being used to excellent advantage by talking machine manufacturers who state that the motors, tone arms and sound boxes featured are ideally adapted for the different types of machines presented in this combination plan. The Heineman motor No. 77 and Melssbach motor No. 18 are recognized as two of the most popular motors on the market and talking machine manufacturers state that they are giving excellent service.

Test offered to dealers to prove the superiority of Wall-Kane Steel Needles

Take two standard disc records of the same selection, play one ten times with the same WALL-KANE loud needle; play the other record, the same selection, ten times, but with ten, new, full tone steel needles.

You will find that the record played ten times with the same WALL-KANE needle will sound clearer, will have less surface noise, and that under the magnifying glass the grooves of the record played ten times with the ten steel needles will seem to be more disturbed.

 Beware of Imitations

Package of 30 WALL-KANE needles. Load, Extra Load and Medium, greater value than 500 ordinary steel needles, retails for 10c, costs the dealer 65c. Jobbing territories open.

THE TELEPHONE AS A SALESMAN

How Eugene E. Hardie Has Increased Colum-
bia Sales by Demonstrating Records Over the
Phone—His Plan of Operation Interesting

BUTTE, MONT., February 11.—A novel idea has
been introduced by Eugene E. Hardie, who has
charge of the Columbia Graphophone depart-
ment of the Newbro Drug Co., of this city, for
increasing the sales, by demonstrating records
over the telephone. He has had a telephone in-
stalled specially for this purpose and has fixed
up a separate booth and apparatus which allows
any person to hear any record over the phone
just as clear as if they were standing by the
machine. And from the success that the New-
bro Drug Co. has had there is no doubt it would
be to the advantage of any dealer to try Mr.
Hardie's plan. He says that during the cold
and wet weather they had to have a demonstra-
tor specially to take the calls and demonstrate
the records, and, if the calls increase, that they
will have to install more telephones and spe-
cial booths. If you don't think this works call
up No. 162 Butte, Mont., and Mr. Hardie will
demonstrate personally and to your satisfaction.

MORE TIME FOR INCOME TAX RETURN

Time Limit Moved From March 1 to April 1 by
Internal Revenue Commissioner Roper

WASHINGTON, D. C., February 11.—Internal
Revenue Commissioner Roper announced to-day
that the time for filing income and excess profits
returns had been extended from March 1 to
April 1. The ruling applies also to reports on
payments of more than $800 a year to be made
by employers and business enterprises, and
covers incomes both above and below $3,000
and corporation incomes.

Delay in the preparation of blank forms and
regulations was the principal cause of the post-
ponement.

J. C. Fulton has arranged to carry a line of
phonographs and records in his sewing machine
store at 231 South Broad street, Middletown,
Pa.

THE TALKING MACHINE WORLD

February 15, 1918

WM. A. SCHREINER Co., at 55 Warren street, New York. This de-
partment is a division of the local branch which
devotes its entire time to co-operating with the
Columbia dealers in the development of Co-
olumbia Graphonola and record business. This
department carries out the activities of the ex-
ecutive dealer service department, which plans
and prepares all such material for the Colum-
bia dealers throughout the country.

Mr. Schreiner is well known in the local trade,
having formerly been a member of the Colum-
bia Co.'s sales organization and also occupying
important posts in various retail talking ma-
chine establishments. He is therefore splen-
didly equipped to render the dealers efficient
service in his new position, as he thoroughly un-
derstands their problems and can handle their
requirements adequately.

RAISE PRICE OF SCHUBERT MACHINES

Bell Talking Machine Corp. Will Assume War
Tax, However—Also Introduce New Style—
Extra Charge for Walnut Machine and Elec-
tric Motor—Mr. Rummell Discusses Situation

The Bell Talking Machine Corp., 44 West
Thirty-seventh street, New York, has announced
an increase in prices of the Schubert phono-
graphs, and the introduction of one new style,
to be known as Standard No. 73. The increase
in the price averages about $15.00 per machine,
and the company assumes the war tax, while an
extra charge is made for machines of wal-
nut, the regular styles including mahogany and
oak. A charge of $30.00 is to be made where
it is desired to have a machine equipped with
electric motor. The new prices, which will go
into effect on April 1, are as follows: Unity,
Style 60, $60; Standard, No. 75, $75; Opera, No.
100, $100; Melody, No. 115, $115; Concert, No.
165, $165; Grand, No. 215, $215.

L. Rummell, speaking to a representative of
The World this week, said: "We have taken
great care to see that our regular customers
are provided for, and during the last year, even
through the holiday season, we made this our
policy, not taking on new customers until our
regular trade had been well taken care of.
Owing to the increase in cost of material we
have been forced to increase our prices, and
are laying plans for a greater increase in facili-
ties, so that we may give even better service
than we have in the past."

Fane T. Nutre, vice-president and sales
manager of Stephenson, Inc., New York, manu-
facturers of the Stephenson Precision motor,
who has been visiting the Western trade, go-
ing as far as the Pacific Coast, has booked some
large orders.
Help Us Bring the Best Youngsters of Your City to Your Store

The week of February 25th to March 2d is to be "Thornton Burgess Week." There will be a full page advertisement in the Saturday Evening Post and Youth's Companion appearing February 28th. And in a large list of newspapers there will appear three advertisements—all featuring Thornton Burgess Bed Time Stories on Columbia Records. The readers will be urged to visit their Columbia Dealers and hear these records played.

Your Chance to "Cash-In"

Use our special window-display material, counter cards, leaflets, etc., and have your own "Thornton Burgess Week." Your branch will supply gladly all your needs. Do some special advertising yourself. Circularize homes and schools. This is a real opportunity you ought to take advantage of. Cash in on it.

COLUMBIA GRAPHOPHONE COMPANY, NEW YORK

Columbia Grafonola
SOUTHERN CALIFORNIA TRADE NEWS

January Proved a Better Month Than Was Predicted—C. S. Ruggles Visits New York—Fitzgerald Music Co. Recalls—Other News

Los Angeles, Calif., February 6.—January proved a better month than was predicted by most of the local dealers. Scarcity of stock has, of course, been a great handicap to the merchants, and now it is not a case of ordering from your jobber, but take what he can give you and be satisfied.

The demand for the large models continues brisk, and most of the dealers are entirely out of them by now, with little hopes for future deliveries.

Southern California is experiencing the driest winter season in years, and this year's rainfall is far below normal. Not much damage has been done so far, but if the rains do not come soon some of the crops are bound to suffer.

The new draft will take a number of salesmen who were exempted before, and at the present writing a number are already on the way to American Lake.

C. S. Ruggles, manager for Sherman, Clay & Co., Victor jobbers, has left for New York to see his youngest son, Wesley Ruggles, who is due to sail for France in the near future. Mr. Ruggles will be gone three or four weeks, and will visit the Victor factory before returning to the coast.

R. B. Bird, from Sherman, Clay & Co., San Francisco, is taking charge of the local branch during the absence of Mr. Ruggles.

The Willey R. Allen Co. have lost two of their boys this week, Robert P. Raygust having already been called to the colors, and Walter Allee expecting to leave in the near future.

The Andrews Music Co. report a fine business during the month of January, and expects to also have a good February trade, providing the stock holds out that long.

Miss Jeanita Brown, of the talking machine department of Barker Bros., was married on Monday, January 21, to Walter Mack, who left the next day for the Aviation Training Camp at Atlanta, Ga., preparatory to service in France.

The bridge remains in the employ of Barker Bros.

The Fitzgerald Music Co., which in its phonograph department handles the Edison exclusively, recently gave two Glen Ellison and Edison tone-test records. The first was held on Tuesday of last week and the second on the Friday following. Both were attended by crowds that packed the company's recital room to their full capacity, about 500 persons. They were naturally the most of in an advertising way.

Mr. Ellison left Los Angeles after the second recital for Des Moines, la.

THOS. A. EDISON NOW 71 YEARS OLD

Well-Known Inventor Passes a New Milestone in Life—At Present In Florida—No Formal Celebration at West Orange Factories

Thomas A. Edison, head of the Edison interests in Orange, N. J., and honorary president of the Naval Consulting Board, celebrated his seventy-first birthday anniversary on February 11.

Owing to his absence there was no formal celebration at the West Orange plants as has been the custom for several years past, but his associates and employees did not let the occasion go by unnoticed. Since the declaration of war Mr. Edison has been working for the Government in an effort to solve the U-boat problem and has taken only one short vacation. He is at present in Florida with Mrs. Edison.

The "Edison Pioneers," an organization composed of the old associates of Thomas A. Edison, gave a luncheon at the Lawyers' Club on Monday in celebration of the inventor's birthday, there being forty-five present, and they took the occasion to send the inventor the following message:

"We, the Edison Pioneers, assembled at our first annual luncheon to celebrate your birthday, express our pride in your present patriotic occupation and send you our warmest love and hearty congratulations on this anniversary."

Secretary Daniels also sent the following telegram to Mr. Edison:

"Congratulations upon your birthday. Your friends rejoice in your youthful optimism and clear vision of national needs. It has been a privilege to be a co-worker with you."

CONDITION OF INTERNATIONAL TRADE

Secretary Redfield Discusses on the Likely Course of Foreign Trade—Declares Present Condition Is Deliberately Abnormal

That the current condition of international trade is deliberately abnormal is the opinion expressed by Secretary of Commerce Redfield in a statement addressed to the Bureau of Foreign and Domestic Commerce on the subject of foreign trade organization by industries after the close of the war.

"It seems to me," he writes, "there are two abnormal stages through which we must go before what we may call the normal ebb and flow on international trade will, after the war, resume its movement.

"First, the current condition is deliberately abnormal. All the great exporting nations are directly interfering with the progress of their export and import trade and treating it as a war measure on a strictly and avowedly different basis from that of peace.

"Second, another abnormal state must follow immediately after the war, which may be described as like the process of settlement to rest of particles suspended in a fluid in order that the fluid may become clear. In other words, there will be a long period of international reconstruction. It will take the form, at the beginning, of excessive demands for raw materials of many kinds, and probably for finished lumber and machinery and certain kinds of equipment. The whole object during this time will be restoration toward a normal economic manufacturing and productive basis. This period must be gone through fully before the third period, which I speak of as the normal condition, shall arise."

"Pathé Records"

Their Significance to the Dealer:

They signify not only the largest record collection in the world, but they signify the only records that bear the Pathé Record Guarantee:

Pathé Records Won't Wear Out

We guarantee every Pathé Record to play at least one thousand times with the Pathé Sapphire Ball without impairing the unexcelled beauty of tone.

They signify:

No Needles to Change

THE PATHÉ SAPPHIRE BALL takes the place of needles. And it is permanent. It never wears out.

They signify the world-wide Pathé Record Repertoire: Music new to America—vocal and instrumental celebrities of European fame.

And the Pathé monthly list of patriotic, popular, musical comedy and sentimental songs and dance hits—

Plus the brilliant Pathé artist personnel:

Maratore, Musio, Ober, Cavalieri, Dider, Thibaud, Ganz, Biapham, Grace Hoffmann, Siczak, Ursus, Weil, Fittsui, Sammarca, Ruffo, De Cisneros and others.

Of further significance is the fact that Pathé Records, despite their unique guarantee, cost no more than other makes of records—

And the fact that they are subject to a dealer's discount so generous it will well repay you to investigate—today.

FISCHER COMPANY

940 Chestnut Avenue

CLEVELAND, OHIO
EXHIBITION OF COLOR PICTURES

The New Process of Producing Motion Pictures of Color of Nature Invented by Leon F. Douglass Is Demonstrated in New York

Under the direction of Thomas Boyd, of San Rafael, Cal., a private exhibition was given on February 12 and 13 at Warlitzer Hall, New York City, of the new process for producing motion pictures of the colors of nature invented by Leon F. Douglass. Mr. Douglass is well known in the trade as the chairman of the board of directors of the Victor Talking Machine Co. In discussing Mr. Douglass’ latest invention Mr. Boyd said to The World:

"Mr. Douglass for many years devoted his time to photographic processes which would bring superior tone qualities to the talking machine, and it was due in part to his efforts that the Victrola has been brought to the high standard of excellence as a sound reproducer which it enjoys to-day. Having mastered the laws of sound, he took up, at San Rafael, Cal., the problem of reproducing pictures in their natural colors, and for many years made a most exhaustive experiment to develop a theory which he had formulated when he first began this work. Success has been attained, and the pictures should now faithfully the invention is able to reproduce every hue, shade and tint of the colors of nature.

"The process is not only practicable, but is comparatively inexpensive. By means of a small and not costly device that may be attached to any motion picture camera, several color values of the image photographed are given to the negative, from which positive films are printed by a chemical process which I am not at liberty to at this time to divulge. A film is thus produced which contains a series of images so colored as to give, when projected, a moving picture in natural colors, without the use at all of the rotary colored shutter which is usually required.

By this contrivance the brilliancy and intensity of the projected colored picture is increased and a stereoscopic effect is obtained, improved over the black and white. There is no more light required than is used in projecting black and white, and a speed of only twenty-four to the second is required, and through certain experiments being made this speed will be reduced. The cost of producing pictures by this process is slightly more than that for making black and white pictures, but the advantages in the art of producing motion pictures is considerable.

"The effects obtained are marvelously true to nature. The range of tint and hues unlimited. The various tints in the image being always present in nature, and which soften and tone down the harsh colors, are plentiful in these pictures. Thus, in addition to showing the vivid colors, all of the delicate shades and hues of flesh tints, of coalings and draperies, of the gradually changing sky tints of sunrise and sunset are reproduced with magical subtleness.

"The art of producing motion pictures of great brilliancy, showing every slight difference of the various shades of color, by a practicable and inexpensive process, has been accomplished."

INCREASES LINES HANDLED

S. N. Rosenstein, of the Phonograph Clearing House, New York, announced this week that he is now handling a number of well-known lines in color music which he has represented during the past few months. The latest additions to Mr. Rosenstein’s line are the products manufactured by the Automatic Recording Container Co., Chicago, and the Carlin Photographic & Geographical accessories manufactured by the Barnhart Bros. & Spinder Co., Chicago; the lines made by the Weber, Knapp Co., Jamestown, N. Y., and the Crescent Talking Machine Co., New York. Mr. Rosenstein is planning to give these lines aggressive representation in New York, and judging from his activities the past few months the success of his company is assured.

TO INTEREST SHORTHAND WRITERS

How Talking Machine Records May Be Utilized by Students in the Taking Down of Actual Dictation—Some Pointers of Interest

It is herewith suggested that talking machine dealers investigate the possibilities of selling records to the students who are learning shorthand. After a student has mastered the symmetrical handwriting process is a period of several weeks’ duration during which the student must practice taking down actual dictation. At first the student cannot keep up with the speed of ordinary conversation, and it is only by continued practice that he or she learns to work fast with shorthand. While the student is learning to write fast he is often hard put to get somebody to read or dictate to him, as the occupation is exceedingly boring for the person lending the “helping hand.” This is just where the talking machine can fit in, for there are many records in the catalog of recitations, speeches, poems, etc., which the student could play to his heart’s content and at any desired rate of speed. While the record was playing he could take down what was said in shorthand and then afterwards be able to verify the accuracy of his stenographic effort. In this way the student would not have to bother any one else while he was going through the “practice makes perfect” stage.

In a great many cities located throughout the country there are commercial colleges teaching shorthand. The talking machine dealer can interest the instructors in these institutions to introduce the idea of listening to records for dictation as part of the course. Shorthand is also taught in the majority of the public high schools and arrangements could be made with the local teachers to suggest that their pupils practice by listening to prose talking machine records. The many people learning shorthand by correspondence would also be excellent prospects for the progressive talking machine dealer to consider.

PUTNAM, PAGE CO. DOING THEIR BIT

The Putnam, Page Co., Victor wholesalers, Peoria, Ill., are certainly doing their bit for the country. Roy Page, junior member of the firm, enlisted when war was declared with Germany, and is now a First Lieutenant in the U. S. A. Next in line to volunteer was Arthur Graham, who is in the Aviation Corps, and last week William Dane joined the Radio Electrical Corps and will doubtless be sent to Chicago, after which he will obtain a six months’ course at Harvard University.

A SIGNIFICANT LETTER

Fred A. Girdwood, druggist and stationer, Perth, Ont., Canada, a Talking Machine World subscriber, writes as follows: “We are now handling Victor records and Victrolas, and find them the best paying side line we ever introduced, in fact, if we are not careful, the drug business will soon be the side line.” This letter is a significant tribute to the growing popularity of the talking machine throughout Canada, and the prospects are for a wider appreciation as time goes on.

McCORMACK’S POPULARITY GROWS

John McCormack, the famous Irish tenor, whose Victor records are so widely popular, has been scoring a great success with the Metropolitan Opera Co.’s forces in New York this season. His splendid old toward raising funds for the Red Cross has also been a large measure of public recognition. Next summer he plans to visit France and sing to “our boys” who are “over there.”

A New Record Repertoire and Greater Record Sales for the New Year!

NOT only do Pathé Records represent the largest and most unique record repertoire in the world: music of which America still knows little—the great voices of all Europe; romantic instrumental ensembles of the Old World's Bohemia; the famed military bands, the songs and melodies of lands that live romance; the brilliance and beauty of a world of art so far a closed book to most Americans—

To say nothing of the regular monthly list of up-to-date patriotic, sentimental, musical comedy and popular song successes and dance novelties—

But they represent continuous sales
And increased "record dividends" to the dealer—

because there is a fast-growing demand for records that play without needles. And Pathé Records mean:

**No Needles to Change**

THE SAPPHIRE BALL takes the place of needles. And it is permanent. It never wears out.

**Pathé Records Won't Wear Out**

We guarantee every Pathé Record to play at least one thousand times with the Pathé Sapphire Ball without impairing the unexcelled beauty of tone.

**The Pathé Phonograph Plays All Makes of Records**

Each Pathéphone, at any price, plays not only Pathé Records, but all other makes of records.

**The Pathé "Controls"**

With the Pathé "Controls" you may increase or decrease the volume of the Pathé Phonograph at will.

No Needles to Change is a Pathe Record Guarantee: "We guarantee every Pathé Record to play at least 5000 times with the Pathe Sapphire Ball without impairing the unexcelled beauty of tone."

Pathé recordings are not merely phonographed recordings of such world-famed artists as Muratore, Muzio, Cavalieri, DeCisneros, Grace Hoffman, Ober, Slezak, Urlus, Bispham, Sammarco, Ruffo, Weil and others. They are the realism of those voices.

Pathé Records cost no more than other records and because they offer the dealer an unusually generous discount.

Write for details TO-DAY.

DETROIT, MICHIGAN
DEALERS' ASSOCIATION IN LOS ANGELES JUST ORGANIZED

Herman Beck Elected President of Organization at Recent Meeting—Association to Try for Trade Betterment—To Take Up Question of Approvals and Time Sales

LOS ANGELES, CAL., February 7.—One of the most important happenings that has taken place in the talking machine business in Los Angeles for some time was the organization recently of the Retail Talking Machine Dealers’ Association of Southern California. The meeting was called at the Hotel Hoffman, and was attended by twenty-six dealers, or their representatives. The following stores were represented: The Vernon Music Co., Mr. Holland, proprietor; the Hollywood Music Co., Messrs. Chamberlin and Tilden; Southern California Music Co., George Marygold, vice-president, and William Hobbs Richardson, manager, talking machine department; Zellner Music Co., Mr. Patton; George J. Bikel Music Co., Messrs. Geisler and Beck; Colyer’s Furniture Co., Curtis Colyer; Barlett Music Co., Frank Salyer, manager; Glockner Music Co., Mr. Glockner, proprietor; Platt Music Co., Mr. Gallagher; Overell’s Furniture Co., Mr. Stoll; Eastern Outfitting Co., Mr. Brown; Lyon-McKinney-Smith Co., Howard Brown; Shireson Bros., Mr. Shireson; Holmes Supply Co., Mr. Gibson; Fitzgerald Music Co., Mr. Earl Dibble, manager; Barker Bros., Mr. Booth; Wiley B. Allen Co., Mr. Tucker; Andrews Talking Machine Co., Irving Andrews; Barnes Music Co., George Barnes.

The following officers were elected for the ensuing year: Herman Beck, president; Curtis Colyer, first vice-president; C. B. Booth, second vice-president; Earl Dibble, secretary; George Barnes, treasurer.

The object of the association is for the betterment of the trade in general and to try to regulate the approval system on records, and also fix a limit to the time for contracts to run. This is to be strictly a business organization to meet once every month at the different stores. It is the intention of the officers to have three or four open meetings during the year when all employees in the trade will be welcome, and a special program is to be provided for their benefit.

SEEK SPY EVIDENCE ON RECORDS

U. S. Secret Service Operatives to Examine Many Discs Brought in by “Nieuw Amsterdam” for Dangerous Messages From Enemy

One thousand phonograph records brought to an Atlantic port last week aboard the Holland-American liner “Nieuw Amsterdam” are to be tested by United States Secret Service operatives, who believe the discs may bear code messages for German spies.

The records are in several languages, and none will be passed until it has been translated, read backwards and forwards and sideways, tested for acrostics and musical note alphabets and examined microscopically for marks that might be messages.

Many messages have been cleverly concealed among the words and the apparently meaningless “tra-la-las” of song records. And frequently messages have been hidden under the labels of discs.

MARCH VICTOR RECORD SUPPLEMENT

Little Volume Is as Usual Full of Interesting Text and Illustrations

The Victor record supplement for March is a most interesting volume gotten up in the usual elaborate form and with pictures of unusual character. The cover design illustrates the Barcarolle from “Tales of Hoffman,” with descriptive text on the front inside cover. Then there is a full-page portrait of Jascha Heifetz, the latest Victor acquisition, pictures of DeLuca engaged in the popular pastime of knitting, a view of John Philip Sousa leading the band of the Great Lakes Naval Station, and a picture of Lieut. Gitz-Rice in the trenches leading a group in song. The two center pages tell of the Victrola’s service to the nation, and quotes from the comments of Walter R. Creighton, son of the late Lord Bishop of London, on the value of talking machine music in the trenches.

TALKING MACHINES FOR SOLDIERS

Talking Machine and Record Committee for Army and Navy Base Hospitals Doing Good Work in Getting Outfits for Sick Soldiers

An important war work is now being conducted by the Talking Machine and Record Committee for Army and Navy Base Hospitals, which is headed by Arthur L. Lawson, of the Nevada Apartments, Broadway and Sixtieth street, New York. The object of the committee is to get talking machines of all makes with disc records and needles to provide for the amusement and diversion of our soldiers when they return wounded or invalided, as well as for the sick already in camps and hospitals. Mr. Lawson is a Canadian who is unable to serve in the army, but has done excellent work both in that country and the United States for the comfort and welfare of the fighting men. Those who have no machines or records to donate are appealed to for cash donations for the purchase of same.

Stracciarri, the baritone and Columbia artist, scored a big success with the Chicago Opera Co. at its debut last week.

1917 FOREIGN TRADE RECORD

Total of $9,178,000,000 Reported; $1,300,000,000 Over 1916

WASHINGTON, D. C., February 5—America's for-

eign trade surpassed all records in 1917, amount-
ing to $9,178,000,000. Official figures just is-

sued by the Department of Commerce showed

that there was a gain of nearly $1,300,000,000

over the preceding year. December exports of

$589,000,000, an increase of $100,000,000 over No-

tember, caused the big increase. The year's ex-

ports amounted to $5,250,000,000, and imports to

$2,952,000,000. Free imports formed 72 per cent.

of the total.

The balance of trade in favor of the United

States has nearly doubled in the last two years,

amounting to $3,274,000,000 in 1917, compared

with $1,270,000,000 in 1915.

Gold imports amounted to $538,000,000, against

$665,000,000 in 1916, the decrease being due

largely to the fact that since the United States

entered the war purchases by the Allies have

been financed by credits. Exports of gold totaled

$272,000,000, compared with $156,000,000 in 1916.

Silver imports were $53,000,000, against

$32,000,000 in 1916, and exports $48,000,000,

against $71,000,000.

The general outlook as far as foreign trade is

concerned is certainly improving.

TRIBUTE TO THE TALKING MACHINE

It is silent when you're weary
And therefore useful for your friend,
It never bores nor grunts,
Never laughs, never frowns.
It is always waiting for you
With the thing your mood most wants,
Whether rowdy, happy, sad or
Or by whisper or by shouts.
You sit back in a corner
With the shadows all about,
And the music you're dreaming,
And your pipe goes out.
False tears gather round you,
Sometimes whispering in your ear,
Sometimes lulling down your eyelids,
Leaving on your cheek a tear.
Glare of long ago peer at you,
Blinker back forgotten things.
While the machine that is the Graphophone
Plays melodies or songs.
There's the tickle of a cow bell
Or the purring of a brook,
Then a strain recalls to memory
Some scene from a loved book.
There's the scent of apple blossoms
And the murmur of the way,
And a capril comes a whispering
"Thee' I listen, Love, in thee."
And he throws a few love looks
From the record where he stands
And he dances to the music.
While he waves his cherry hands,
Then comes a strain that makes you hear
A voice that's long been still.
And you see the grains and related flowers
On a narrow silken-lined hill.
Then the ladies come back laughing,
(Music must give joy or pain)
Ragtime gets a sitting
And to light your pipe again.
All your heart is with the phantoms
As they dance about your chair.
Ah! But when you try to touch them—
They're but music in the air.

SUPPLY MUSIC TO THE SOLDIERS

Company K at Camp Logan Proud of Their New
Edison Phonograph

Kewanee, Ill., February 10.—W. A. Bowen &
Son, who handle Edison phonographs and rec-
ords in this city, recently supplied an Army and
Navy Edison phonograph to Company K, at
Camp Logan, one of Uncle Sam's white fighting
forces. This firm have built up a very excellent
business for the Edison in this territory.

CONGRATULATIONS FOR F. P. OLIVER

Fred P. Oliver, vice-president of the Black-
man Talking Machine Co., New York, Victor
wholesalers, is receiving congratulations from
his many friends in the trade upon the arrival
on Sunday morning of a baby girl. Miss Oliver
has been christened Virginia, and, if early signs
are any indication of the future, her career as
a vocal star is almost assured.

The Mickel Bros. Co., Victor wholesalers in
Onahla, Neb., and Des Moines, la., closed a
large volume business the past month.

THE DELPHOEIN IN THE SOUTH
Delphoein Co., Inc., in Atlanta to Distribute Delphoein Phonographs in Georgia, North Carolina, South Carolina, Florida and Alabama

ATLANTA, Ga., February 7.—The Delphoein Co., Inc., of this city, which was recently organized to distribute the products of the Delphoein Co., Bay City, Mich., in the States of Georgia, North Carolina, South Carolina, Florida and Alabama, has opened a very attractive store known as the Delphoein Shop, a photograph of which is shown herewith. This store is considered one of the finest talking machine establishments in this State, and the company is planning to conduct it on a basis which will impress music lovers with the quality of the Delphoein phonograph.

D. G. Sunderland, who is the head of the Delphoein Co., Inc., of Atlanta, is leaving nothing undone to give the Delphoein aggressive representation in this territory. The Delphoein Shop has already been the subject of several news-

JASCHA HEIFETZ IN PITTSBURGH
The Standard Co. Makes Capital of Coming Appearance of Popular Violinist in That City

PITTSBURGH, Pa., February 12.—The appearance in this city of Jascha Heifetz, the latest wonder violinist, whose first Victor records have created such a sensation, is not to go unnoticed by the local dealers if the Standard Talking Machine Co. can prevent it. The Standard Co. has sent out elaborate notices of Mr. Heifetz’s concert at the Shriners’ Mosque on March 11, with the Philadelphia Orchestra, and has made arrangements to receive subscriptions from dealers for tickets to the concert. The special slips supplied by the company for the ticket orders are coming in at a rapid rate and indicate that there will be a large attendance.

ADVERTISING AND SELLING PRACTICE
Excellent New Book, Treating of This Subject in a Most Comprehensive Manner. Written by John B. Updyke and Published by A. W. Shaw Co.—Thoroughly Practical

“Advertising and Selling Practice” is the title of a most interesting and valuable volume of information for the advertising man and salesman, written by John B. Updyke, specialist in advertising training in the New York City schools, and published by the A. W. Shaw Co., Chicago and New York. Price, $1.25 net.

The book explains the origin of advertising and shows just how modern advertising and selling developed. It shows how to study the specimens of early advertisements which are reproduced, and to compare them with advertisements in the papers and magazines to-day.

But the book is not limited to the history and theory of advertising and selling. It also gives specific plans and knocks which distinguish the superior from the mediocre merchantizer, and the well-selected illustrations will help greatly in quickening the interest of the employes.

The preparation of copy, the style of copy that builds business, how to judge the effectiveness of advertisements, what mediums to use, methods for checking returns, the advertising morgue, etc.

Mr. Updyke also takes up some principles of selling and explains the policies and methods that pay best in merchandising, giving a careful analysis of the fields and kinds of advertising and salesmanship.

All the way through the book he guides the beginner in a practical, helpful manner with problems at the end of each chapter to cover the text matter and require the reader to think for himself. Here is a problem selected at random: “Make a chart of the advertising you find in your community, in all mediums, and account for the mediums selected by certain advertisers for certain commodities.”

In addition the book includes a most comprehensive bibliography on advertising and selling.

WANTS UNIFORM CITY POSTAGE
Senator Calder’s Bill Would Abolish Increased Rates Between the Five Boroughs

To establish a uniform rate on first-class mail matter within the confines of Greater New York, Senator Calder has introduced the following amendment to the pending Post Office Appropriation bill:

“Provided, that the rate of postage on drop letters of the first-class, mailed in the City of New York for delivery within the confines of that city, shall be 2 cents an ounce or fraction thereof.”

The effect of this amendment will be to provide a 2-cent rate on all first-class matter mailed in any of the five boroughs of Greater New York, a most necessary move.
CLOSE IMPORTANT CONTRACTS

Leonard Markels During His Recent Trip West Closed a Number of Deals Whereby the Markels Motor Will Be in Demand This Year

Leonard Markels, well-known motor manufacturer, recently visited the manufacturers throughout the West and closed a number of important contracts whereby Markels products will be used exclusively by these manufacturers during 1918. These contracts include both the customers who used the Markels motor in 1917 and manufacturers who were so impressed with the samples of Markels motors that they received recently that they desired to place good sized orders for the coming year.

Mr. Markels states that the demand for the “Butterfly” motor is exceeding all expectations and that in order to keep pace with the orders which he is receiving for this motor, he has been obliged to materially increase his factory output. This motor has won the enthusiastic praise of manufacturers throughout the country, who state that it embodies the necessary requisites for a successful silent running motor. According to present plans, the Markels factory will produce in 1918 a motor output considerably ahead of last year, and the “Butterfly” will be one of the leaders in this production.

D. R. Doctorow, credit and sales manager for Leonard Markels, will leave for Canada during the next few days in response to several requests that have been received at the executive offices from well known Canadian manufacturers who contemplate using the Markels products in 1918.

JOIN COLUMBIA SALES FORCE

A. B. Creal, formerly a member of the sales staff of a prominent Memphis furniture house has been appointed a member of the sales force of the Baltimore branch of the Columbia Graphophone Co., W. S. Parks, manager.

A. E. Landon has been appointed a member of the sales staff of the Columbia Co.'s Cleveland branch, A. W. Roose, manager. Both Mr. Creal and Mr. Landon have been spending some time in New York, prior to assuming their new duties.

SOSS INVISIBLE HINGES

Preserve Beauty

In many beautifully designed, finely finished Talking Machines, Pianos, Music Cabinets, Piano Players, and Phonographs, the elimination of the insignificantly protruding Hinge is essential to preserve the beauty of the design.

Design and Construction

The fine cabinet work which is required in many instances to preserve the disguise of the instrument requires that the hinges be as inconspicuous as possible. SOSS Hinges are invisible.

Write for catalogue "T".

HOFFY CO. MARKETS SPECIALTIES

Decide to Put the "Resurrectone" and New "Half Fork Tone" on the Market in Response to Numerous Requests for Those Products

The Hoffy Talking Machine Co., Inc., manufacturers of the Hoffy "Airtightphone" and the "Resurrectone," the special Hoffy sound box and diaphragm, have decided to place the "Resurrectone" and a new "Half Fork Tone" sound box and diaphragm on the market. Joseph Hoffy, president of the company, decided on this move some time ago in answer to many requests the company has received throughout the past year. In speaking of the release of these products Mr. Hoffy said: "I owe a lot of apologies to those to whom in the past we refused our products to, owing to the policy of the company in force up to this time."

The Hoffy announcement appears on another page of this issue of The World, and among other things of interest to the trade is technical description of the action of vibrations on the diaphragm.

The Hoffy Co. will shortly inaugurate a campaign of publicity in behalf of their product. The various specialties will be illustrated and every feature will be numbered in accordance with an accompanying description.

SOLDIERS AND THE VICTROLA

Squad in New York Transports Machines and Records Very Carefully Through Streets

A convincing illustration of the part played by the talking machine in the life of the soldier was seen on one of the principal streets in New York recently. A squad of twelve or fourteen men in charge of a corporal was parading alongside the sidewalk in the column of two, the first two men carrying between them a Victrola IX and one of the men in the rear transporting a sizable bundle of records. The Victrola was fully exposed so the public could gaze and be impressed with the instrument and the guard of honor that accompanied it, just to show, as it were, how essential is music.

"THORNTON BURGESS' WEEK"

February 25 to March 2 Designated by the Columbia Co. as "Thornton Burgess" Week—Under Auspices of Educational Department

The week of February 25-March 2 has been designated by the Columbia Graphophone Co. as "Thornton Burgess" week, and under the auspices of the company's education department, an interesting and practical campaign will be instituted to stimulate the public's interest in the Thornton Burgess Columbia records during this week.

As announced recently in The World, Thornton Burgess, creator of the famous "Bed-Time" stories for children has made a series of these famous stories for the Columbia Co. exclusively. These records have already met with a remarkable sale throughout the country, and Columbia dealers are unanimous in acclaiming them as the best selling children's records that have yet been introduced.

According to its present plans "Thornton Burgess' week" will be observed by the use of full-page advertisements in the Saturday Evening Post and the Youth's Companion featuring these records. These pages will appear in the issue of February 28, and three other advertisements will appear in the long list of newspapers that are included on the Columbia advertising schedule. The value of this publicity is tremendous, and this advertising, together with the special window display, counter-cards, leaflets, etc., prepared by the Columbia advertising division cannot fail to arouse the public's interest in these "Bed-time Stories."

EXPEDITING FREIGHT DELIVERY

A. J. Marshall, an Authority on Electric Vehicles, Proposes Means for Eliminating Confusion Now Existing in Trucking

Interesting suggestions for remedying inefficiencies at railroad terminals and in the present methods of handling goods to and from such terminals have been submitted by A. Jackson Marshall, secretary of the Electric Vehicle Section of the National Electric Light Association. The subject is of immediate interest to members of the trucking industry.

To emphasize the need of improvements Mr. Marshall makes the statement that where the cost of transporting freight from Philadelphia to New York by rail is 27 cents a ton, the terminal charges amount to no less than $1.65. Even for the long haul between Chicago and New York the terminal charges are 65 cents more per ton than the rail charge.

Considerable delay and consequent confusion result from undue demands on terminals for service. Trucks deliver freight at the terminals and call for freight at the same time, the result being that long lines of vehicles wait for service. This lack of schedule, and the inability to serve trucks properly, owing to inadequate facilities at the terminals, not only blocks the streets but entails considerable monetary loss due to idle investments represented by the waiting trucks.

Mr. Marshall suggests that a more reasonably uniform demand on terminals would reduce congestion, make possible the use of fewer trucks and drivers, and improve traffic conditions in the streets. He thinks that co-operation of individual trucking interests, resulting possibly in an arrangement whereby a few well-organized truck concerns would handle the bulk of the freight, would tend to expedite freight handling.

Co-operation with experienced concerns such as the express companies is also urged. Another suggestion is that a plan could be worked out whereby the railroads themselves, or operating through co-operative truck concern, could handle freight directly from shipper to consignee, thus minimizing confusion and effecting many economies.

The interesting proposal is made that much of the freight could be handled at night by noiseless trucks, with trailers if necessary. These trucks would not have to contend with the usual daytime congestion in the streets, and would in fact help to reduce such congestion. The railroads work on a 24-hour schedule and it is expecting too much of the terminals to hold up their end with only a ten or twelve hour day.

The Commercial Economy Board, Council of National Defense, has been investigating the subject of co-operative deliveries, and has found that when such systems are properly organized and managed savings of no mean proportions have been effected. Mr. Marshall thinks that the country is likely to witness extensions of co-operative delivery systems in the not-far-distant future, especially if the war continues for any length of time.

Make your store a receiving headquarters for talking machine outfits donated to the fighting men—it will help.

BUILDING UP GOOD BUSINESS

How the Armstrong Drug Co. Is Featuring the Brunswick Phonograph and Pathe Records in Pontiac, Ill., to Good Purpose

Pontiac, Ill., February 9.—The photograph of the store of the Armstrong Drug Co. of this city, illustrates the manner in which talking machines can be carried and displayed effectually in connection with other lines and where the space is limited. It is simply a corner of the store, where the drug company has placed a full line of Brunswick phonographs and Paté records and is pushing this end of the business vigorously. Mr. Armstrong has the able assistance of Dave C. Miller and Melvin Horn, and the results of the holiday trade made them very enthusiastic regarding Brunswick phonographs as an annex to the drug business.

They are not only getting a good business from the town, but are going aggressively after the country trade and are getting it. The Armstrong deal was engineered by E. S. Bristol, who travels the northern Illinois territory for the Brunswick people. He is a man who believes in service of a constructive kind as the dealers he calls on can testify.

THE BRONX EXPOSITION

Governors of Several States and Others Associated in an Advisory Capacity

The management of the New York Permanent International Industrial Exposition, which opens in the Bronx next Memorial Day, has announced the association with the project in an honorary advisory capacity of the Governors of a score of States, United States Senators, members of Congress, many large industrial concerns, and men prominent in financial and commercial affairs throughout the country. The chairman of the committee is Governor Charles S. Whitman, of New York.

Invitations to join the committee and to assist in the effort of the Exposition management to establish in New York a permanent nation-wide market place have been extended to the Governors of additional States and the Mayors of the larger municipalities. It is hoped that in this manner the manufacturing interests throughout the entire country will be interested in joining in a concerted effort to expand American trade in foreign lands, especially South America, and in the education of the masses of the people along lines of thrift and economy.

Now is the time to push those "slow-selling" records.
ILSEY’S GRAPHITE PHONOGRAPH SPRING LUBRICANT

RL S Lubricant makes the Motor motor good
and reduces friction; will not freeze in cold weather or stick in hot weather, thus its resistance to friction is indefinitely prolonged. Ideal for Libraries, Schools, etc.

ENLARGE CAPACITY OF DEAN PITCH
Demand for Dean Needles Necessitates This Important Move—Doing Phenomenal Business—Looks Like 1918 Will Be Biggest Year

Adolph Heinemann of the Otto Heinemann Phonograph Supply Co., Inc., who is in charge of the John M. Dean division of the company, states this week that arrangements are now being made to increase the capacity of the Dean needle factories will soon be tripled. Mr. Heineman and his associates are working indefatigably to catch up with the demand for the Dean needles, and it now seems as though these efforts will be productive of gratifying results.

Mr. Heineman states that the company has closed a phenomenal business the past few weeks, the total business being limited only by the factory capacity. The Dean steel needle is winning new friends day by day and Mr. Heineman feels that the increased appreciation of the broad-minded spirit of the company’s patrons, which has taken into consideration the many obstacles and handicaps that have confronted manufacturers since the first of the year.

REMOVER EXECUTIVE OFFICES
The New Jersey Reproducer Co., Now Located at 847 Broad Street, Newark, Has Considerably Larger Floor Space—Business Excellent

The New Jersey Reproducer Co., manufacturer of the “Invisible” sound box has removed its executive offices from 10 Olive street to 847 Broad street. In its new quarters the company has considerably more floor space than in its old home, and moreover, the present offices are in the heart of the business section of the city, easily accessible to all modes of travel.

Hector Pocoroba, sales manager of the New Jersey Reproducer Co., is now away on a Western and Canadian trip, and to date has been very successful in interesting the trade in the company’s sound box. He states that in his opinion it does not require an expert salesman to sell the “Invisible” for a demonstration of its tone quality invariably results in the placing of an order.

Mr. Pocoroba recently returned from a trip through the New England States, where he closed several deals with prominent houses, and made arrangements whereby the “Invisible” will be included in the regular stock of a number of successful manufacturers. He states that the fact that the “Invisible” plays all types of records has helped materially in the introduction of this new sound box.

DON’T LIKE SLOW ACCOUNTS
How credit conditions are viewed in other industries is of interest to members of the music trade industry. For instance, the New York Times says: "Here in this city who takes issue with those of his profession who insist that certain accounts are good even if they are slow. His contention is that they are good which can ultimately be good, and in addition to this it is a very hard account to handle. "Suppose an account is slow sixty days," he said yesterday, "that makes an actual loss of 1 per cent. for the store. Even if interest is paid on an account of this kind, there is still a question of loss throughout the period. It is not always able to make his money in the meantime for earning discounts on merchandise he buys, etc. For this reason, if no other, it must be conceded that a slow account is not desirable in the long run and should be avoided."

RECORD VERSUS SHEET MUSIC SALES
One Publisher Sells Only 40,000 Copies of a Certain Song But Receives Royalties on Over 70,000 Records From a Single Company

When the present copyright law, that of 1909, first went into effect, the provision that the owner of the copyright receive 2 cents per copy for the mechanical reproduction of his music, there was considerable unfavorable comment from music publishers and song writers regarding that phase of the measure. With checks for hundreds or thousands of dollars received regularly from talking machine companies in settlement of royalty statements, these complaints have dropped off to practically nothing.

Just what the talking machine records do towards increasing the income of the copyright owner has been generally the publisher of the music, was brought to light in a recent case in New York, where one talking machine company paid $52.50 for 27,849 records of a certain number, while the sale of the number in sheet music form totaled only slightly over 40,000 copies. In other words, there are actually over two records sold for every copy of the music itself.

AN INTERESTING LETTER
Recording Department of Columbia Co. Receives a Letter in Spanish From Would-be Recording Artist Who Admits He Is a Wonder

The recording department of the Columbia Graphophone Co., New York, received the other day a letter which is attributable to the most confirmed pessimist in the building, for if self-valuation can be considered as a recommendation the writer of this letter is destined to become one of the world’s greatest singers.

In this letter which is written in Spanish, the sender makes a request to be enrolled as a member of the Columbia Co. as part says: “In this community my name has obtained so much fame that I am considered one of the best singers in the northern section of my State, and I will say here as much as on the strength of my word, I will be ready to give you entire satisfaction, because I have always won fame which was practically impossible of attainment.”

“I am voluntarily demonstrating the gift with which God endowed me. I should like to show the public in general the little success that I have obtained. It does not take me to make any difference, I can even sing songs in English, and I hope to the omnipotent-God that I will be one of the greatest singers in history.”

“While it is true that up to the present I have not taken any lessons to sing for phonograph, but is upon my own right hand, I figure that it would not take me even one-quarter of the time that it takes others, and I only twenty-nine years of age.

“If you don’t avail yourselves of my services after I have given you the first chance, and whereas I shall wait until I receive your answer to see whether I can secure a place with you, I shall be obliged to communicate with the —— Co., to whom, I believe, I have already been recommended.”

R. B. CALDWELL AT HIS DECK
Many friends in the trade of R. Caldwell, sales manager of the Pathéphone Sales Co. of New York, Pathé distributors, will be glad to learn that this popular “veteran” of the talking machine business is on the road to permanent recovery, after being confined to his home for fourteen weeks. On election night Mr. Caldwell was waylaid by highwaymen on a quiet street, New York, and injured to such an extent that his condition was considered critical for several weeks. He suffered two relapses in December and January, but is now back at his desk, and visiting the Pathé dealers in his territory.

THE WONDERFUL "RESURRECTONE" and the "HALF-FORK-TONE"
Here are illustrated and described two superb reproducing devices which are being used on 3M machines of other makes, to show what is the minimum tone that can be expected from the "HOFFAY"—the usual "Airightphone."

PRICE: Nickel-plated $10. 22 karat gold plated $21.50. To fit Victrola, Sundion, and attachments for Edison machines, etc. Money refunded if reproducer returned within five days from purchase.

Naturalness of sound requires accuracy of reproduction which is obtained with the aid of "RESURRECTONE," a valuable addition to the "RESURRECTONE," which makes the diaographs in the extent of the Columbia record wording adding the "Resurrectone" to your machine means: every sound is reproduced with the truest possible results. All-steel "HALF-FORK-TONE"—the last word in reproducing devices.

In the "RESURRECTONE," the diaphragm is vibrated by a "tuning-fork" working on both sides, the resiliency of the two arms being automatically "taken up," accuracy of vibration and "naturalness" of sound being therefore accomplished facts.

In the "RESURRECTONE," the connection of the two arms to the diaphragm is of the HOFFAY Flexible kind, which is another exclusive feature making this reproducer absolutely superior to all others. In the "HALF-FORK-TONE" a one-arm lever rigidly connected vibrates the diaphragm instead of the "tuning-fork."

The "HALF-FORK-TONE" is still more excellent than reproducing devices of other makes because the lever is supported by the other remainders. Of course the lever is called the "RESURRECTONE"—including the "flexed" Piano Wire Mounting which "insets" the sound, and which has the added great value of being "inslated" from the casing of the reproducer.

PRICE: Nickel-plated $15. 22 karat gold plated $34.90. To fit Victrola, Sundion, and attachments for Edison machines, etc. Money refunded if reproducer returned within five days from purchase.

Order a sample; improve your machine; increase the value of your records, and learn by experimenting how much better the complete "HOFFAY" Instrument must be than other reproducing devices. The "RESURRECTONE" and "HALF-FORK-TONE" are absolutely "autographed."
Are you selling your share of the Columbia Records which the folks at home are buying for their soldier boys? Remember there's a Columbia Grafonola in every Y. M. C. A. and Knights of Columbus Army Hut.

Columbia Graphophone Co.
Woodworth Building, New York

OHI O EDISON DEALER GIVES PROOF OF GOOD BUSINESS

The excellent volume of holiday business handled by N. E. Olin & Son, Edison phonograph dealers at Kent, O., and particularly the number of machines sold, is indicated by the array of empty cases which contained machines disposed of during Christmas time. Now the members of the company wish at times that they believe that the end of the world had come. That merchant happens to be an American, and last year his store paid the English Government an excess profit tax of $200,000.

"When the war broke out," Mr. Selfridge told George T. Bye, of The Nation's Business, "it was the general opinion that the end had come for business. Many merchants reduced staffs and cut wages. The second or third day of the war I was waited upon by a committee of our buyers, who informed me that they were sure of heavy losses, and that they wished to see it through with me on a half-salary basis.

"But I wasn't sure business was going to be bad, and, with thanks for their loyalty and good spirit. I told every one in the house that Selfridge's would make no changes for the present. To that stand we owe something of our present prosperity. By keeping on our brightest face, spending more money for advertising, and serving our patrons with greater attention, we have increased our business to a volume of over $15,000,000—a gain of $2,500,000 in one year."

Mr. Selfridge took advantage of every twist in the war situation. He advertised that every person in his store during any German airplane attack was insured free, without preliminary registration, to the amount of $5,000 for death resulting directly from the raid. The result was to make every woman turn to his store as a safe place to shop and lunch; and to direct public attention to its solid concrete construction. He has consistently sold "war bread" a cent or two cents a loaf lower than any one else in London—another great trade attraction.

But most important has been the maintenance of his personnel, and the adaptation of his line of goods to meet the changed conditions.

As fast as men have been called away, he has substituted women workers; and many of these, he says, will never be replaced by men. And he has foreseen each shift in the public demand, and provided for it. The luxuries of the rich early ceased to be a factor in his trade, as social life in London quickly diminished; but the luxuries of the poor—inexpensive pianos and jewelry and the like—have rapidly grown more important as the wages of workers have risen.

His advice to the American merchant is:

"Keep your business going at high pressure. Watch with the greatest care your organization, and your ability to fill with women or men above enlistment age the posts vacated by men called away. Watch the market, and keep your stock as full and up-to-date as you can."

NEW YORK ALBUM & CARD CO.
23-25 Lispenard St., New York
R. F. BOLTON IN NEW POST

Appointed This Week as Sales Manager of the International Record Department of the Columbia Graphophone Co.

George W. Hopkins, general sales manager of the Columbia Graphophone Co., New York, announced this week the appointment of R. F. Bolton as sales manager of the Columbia international record department. Mr. Bolton has already assumed his new duties, with headquarters at 104 West Thirty-eighth street, New York.

R. F. Bolton

R. F. Bolton is one of the most popular and best-posted members of the talking machine industry, having been associated with the Columbia Co. for twenty years. During this time he has occupied posts of importance and responsibility, and has always been in close touch with the Columbia dealers. He enters his new work with the determination to co-operate with Columbia representatives in every possible way, with the idea of materially increasing their foreign record sales.

The success of the Columbia Co.'s international record department has been one of the salient factors in the company's remarkable growth the past few years. Anton Heindl, manager of this department, is thoroughly versed in all the intimate details of this important branch of the business, and as one Columbia dealer remarked the other day: "The combination of Heindl and Bolton will doubtless mean big things for the Columbia international record department."

HONOR EDISON ON BIRTHDAY

Edison Disc Jobbers' Association Pay Strong Tribute to the Patriotic Work of Thomas A. Edison on Occasion of 71st Birthday

The Edison Disc Jobbers' Association, made up of the jobbers of Edison phonographs and records throughout the United States and Canada, recently sent the following letter to Thomas A. Edison upon the occasion of his seventy-first birthday anniversary on February 11.

Indianapolis, Ind., Feb. 11, 1918.

Mr. Thomas Alva Edison:

Greetings and congratulations to you on your seventy-first birthday. The Edison Disc Jobbers' Association, representing the entire body of distributors of the Amberola and Edison Disc phonograph products in the United States of America and the Dominion of Canada, unite in extending to you a warm greeting on this, your seventy-first birthday.

Our association with the name of Edison is always the source of great personal satisfaction to each and every one of us, as we extend our greetings to you, sir, on this, your seventy-first birthday, we bring with them a deep sense of gratitude for your untiring devotion to your country and the cause of democracy throughout the world.

We are proud of you, Mr. Edison, and while you are throwing your great energy into the fight against the brutal autocracy that threatens the future of every liberty-loving people of the earth, please accept our pledge of unwavering loyalty to you and yours, through each trying hour of the task you have so nobly and cheerfully undertaken for mankind. We will try to profit by your splendid example and courage and we wish you many, many happy returns of this day.

Very obediently yours,
WALTER E. KEPP, President,
L. N. BLOOM, Vice-President,
FRANK E. BIRCHETT, Secretary,
H. HARRIS BRIEH, Jr., Treasurer,
A. H. CARR, Executive Committee,
W. F. ROSENBLETT,
F. BOWMAN.

A PHILADELPHIA INCORPORATION

The North Philadelphia Talking Machine Co., Philadelphia, Pa., has been incorporated, with a capital stock of $10,000, by Henry A. Gausch and others. Pudney & H. was a new firm which will open a music store at 18 Broad street, Ossining, N. Y., on March 1 will test—as Victrolas as well as pianos.

MURATORE WINS IN NEW YORK

Leading Tenor of Chicago Opera Co. Accoridng Great Reception in Metropolis—Pathé Records of His Voice in Great Demand These Days

One of the outstanding factors in the remarkable success achieved by the Chicago Opera Co. in its New York season which recently started at the Lexington Theatre has been the individual honors accorded Lucien Muratore, leading tenor of the company, and one of the greatest artists of the present generation. Mr. Muratore has appeared at a number of performances at the Lexington Theatre, and every

Lucien Muratore

role in which he has been presented has served to enhance his fame and renown. Not since the days of Jean de Reszke has any tenor won such public acclaim.

Although Muratore had been accorded the most enthusiastic praise by Chicago musical critics, and his appearance with the Chicago Opera Co. in this city had been heralded as one of the "star" events of this company's local season, the New York music-loving public was hardly prepared for the superb brilliancy of Muratore's voice. Every local critic referred to his New York debut as an epoch-making event in operatic history, and each succeeding performance helped to augment this spontaneous praise and acclaim.

Muratore is an exclusive Pathé artist, and his Pathé records have been sold in large quantities by Pathé dealers everywhere. The Pathé Frères Co. has been congratulated upon their acquisition of Muratore as one of their artists, and this company's local representatives have taken advantage of the New York season of the Chicago Opera Co. to feature Muratore's records to excellent advantage.

Specifications

Oak or Mahogany Cabinet, 15 in. wide, 17 in. deep, 8 in. high. Nickel-plated Tone Arm and Soundbox. Single Spring Motor. 10 in. Turntable.
PRIZES AWARDED FOR EDISON WEEK WINDOW DISPLAYS

Adam Schaaf, Chicago, Wins First Prize, With Capwell's Department Store, Oakland, Cal., Second, and A. D. Elster, Meriden, Conn., Third—Great Interest in Contest

Winners of the three grand prizes of $300 for first prize, $125 for second prize and $75 for third prize in the Edison Week (1917) Dealers' Window Display Contest have just been announced. They are: First, Adam Schaaf, Chicago; second, Capwell's Department Store, Oakland, Cal.; third, A. D. Elster, Meriden, Conn.

This contest was entirely in the hands of Edison jobbers with the exception that the Edison Laboratories offered to give three prizes to the best three photographs submitted in the United States and Canada. Each jobber conducted a contest in his zone in accordance with rules laid down by him and gave from three to seven prizes, winners of first and second prizes being eligible for the grand prizes. This method necessitated a considerable length of time to eliminate non-winners in the various zones, to forward all of the photographs to Orange and have the non-winners in the grand prize contest eliminated.

An unusually large number of attractive displays were entered in the contest which is indicated by the three prize winners illustrated on this page. A considerable improvement over the previous year's display was readily noticeable, not only from a purely decorative standpoint but from the success of the dealers in telling the story of Mr. Edison's new art—Music's Re-Creation—by means of their displays. Many displays included life-size figures standing beside the laboratory model of the New Edison to represent Edison artists as they sing in direct comparison with the New Edison at the tone tests, which have been witnessed by upwards of 2,000,000 music lovers and music critics on approximately 1,500 different occasions, with the result that the auditors failed to distinguish the faintest difference between the actual voice and the New Edison's Re-Creation of it. Thirty noted Edison artists have participated in these tests, which have taken place in all parts of the United States and most of Canada.

The first prize winning display in the Grand Prize Contest was truly a masterpiece in the art of window dressing, as one glance at the reproduction on this page will readily confirm. The following description of this window will help to visualize its attractiveness:

Several novel ideas were introduced in this display, among which the most noteworthy were the two stage pictures—the garden scene from "Faust," portraying Alice Verlet singing the jewel aria, and the very beautiful ship scene from "La Gioconda." These scenes were painted by artists and arranged exactly like stage settings, lighted by twenty incandescent concealed lights, and made a very realistic appearance. Even the moon appeared in one of the scenes and the moonrays were playing on the water, which, by

Card No. 1

Faust Re-Created on the New Edison

Gounod's opera "Faust" is recognized as one of the world's greatest operatic masterpieces. To every voice is allotted a superlative—each one in itself sufficient to make Faust famous.

Card No. 2

A Musical Triumph in the Life of Edison

The ten news clippings here reproduced contain extracts from newspapers, magazines, and other periodicals of America's principal newspapers, after hearing artists sing in direct comparison with Edison Re-Creations of their work. Two thousand five hundred different materials and compositions had to be tried and discarded, and more than one million dollars expended in research work, before Mr. Edison obtained his desired results.
Joseph C. Smith and his famous dance orchestra are now making records for Columbia. Like all Columbia Dance Records, they sell themselves.

The color scheme of the display was pink, black and gold, and the friezes representing grand opera were painted in light water colors and mounted on black velvet which made a very beautiful and strong contrast. Five New Edison and twenty Edison Re-Creations were displayed.

AN INTERESTING ANNOUNCEMENT
Name Desired for the New Steel Needles of the Record Needle & Mfg. Co., Milwaukee

The Record Needle & Mfg. Co., of Milwaukee, Wis., have a very interesting announcement in another part of The World, in which they ask the co-operation of the trade in selecting a fitting name for their new steel needles. H. A. Goldsmith, who is actively interested in this enterprise, is a practical talking machine man, who is fully acquainted with the needs of the trade, and it goes without saying that whatever he and those associated with him place on the market will be most reliable and satisfactory. The company are planning to conduct a large volume of business during 1918, and they have already booked some very large orders.

O. K. HOUCK AIDS HOSPITAL FUND
Well-Known Piano Man of Memphis Works Hard to Corner the Dollars

MEMPHIS, Tenn., February 5.—O. K. Houck, of the O. K. Houck Piano Co., is one of the most active workers in raising a fund of $200,000 for the Baptist Memorial Hospital in this city. Mr. Houck has not only worked hard in getting actual subscriptions, but has been one of the principal speakers at the various meetings held to stimulate the work. Mr. Houck's well-known fund of humor has in many cases gotten more results than some of the more serious discussions of other business men.

E. L. THOMPSON A WINNER
E. L. Thompson, a member of the local wholesale branch of the Columbia Graphophone Co., 55 Warren street, was the winner of the President Whitten individual salesman's cup for the month of December in this district. This was Mr. Thompson's first victory, and the contest for permanent possession of the trophy continues to be "fast and furious."

TWO COLUMBIA ARTISTS SCORE
Mme. Barrientos and Hipolito Lazaro Win Triumph at Metropolitan Opera House

Two famous Columbia artists, Hipolito Lazaro and Mme. Maria Barrientos, figured prominently in New York's operatic news this month, for both made their initial 1918 appearance with the Metropolitan Opera Co. Mme. Barrientos had made her debut with this opera company in the season of 1915-1916, but Lazaro's performance in "Rigoletto" last week marked his initial appearance at the Metropolitan Opera House.

Both of these artists won the enthusiastic praise of the musical critics, their performance in the leading roles in "Rigoletto" being referred to as one of the finest renditions of this popular opera that has been heard in recent years. These artists are scheduled for a number of performances this season at the Metropolitan Opera House, and their 1918 debut augers well for their continued success at America's celebrated opera house.

Mme. Maria Barrientos and Hipolito Lazaro are both exclusive Columbia artists, and their Columbia records have already met with a very favorable reception throughout the country. Mme. Barrientos is a coloratura soprano who has achieved fame here and abroad, and her debut with the Metropolitan Opera Co. was one of the sensations of that season.

Hipolito Lazaro is considered one of the greatest tenors of recent times, and his appearance in Spain, Italy, Buenos Aires, London and Havana has given him international renown. He has won praise from distinguished critics for the remarkable range and power of his voice, and his Columbia records have served to add to his laurels as a tenor who will be an invaluable contributor to the history of operatic music.

MICKEL BROS. CO. HANDLING PIANOS
The Prominent Victor Jobbers of Omaha Are Now Handling Pianos and Players

OMAHA, Neb., January 28.—The Mickel Bros. Co., jobbers of Victor talking machines and records, with headquarters at Fifteenth and Harvey streets, this city, who also carry other specialties, are now handling pianos and are working up a nice and satisfactory trade with the Packard and Hobart M. Cable pianos and player-pianos. The Mickel Bros. Co. are widely known throughout the State of Nebraska and have a big trade following.

THE TALKING MACHINE WORLD

London, England, E. C., January 30.—As in most countries, the period immediately succeeding Christmas tide is somewhat slack from the viewpoint of talking machine sales. In normal times the British market quickly recovers, and indeed the volume of trade often surpasses the ephemeral pre-holiday rush. This year all this has changed. The trade recovery is considerably slower, the demand for records and machines being non-progressive. Front inquiries around the trade and in conversation with retailers I learn that sales of, records especially, are only just picking up again after a period of somnolence, and now that the postholidays are in full swing there is every prospect of increasing business. Every gramophone concern has published a list of records bearing the catchy numbers from the chief pantos, which, by the way, are very well patronized; aerial and other wartime exigencies considered. The lure of the theatres directly reflects itself in favor of the dealer; every theatre-goer possessing a gramophone being a potential buyer of records. This fact is utilized to good advantage in the publicity announcements of manufacturers, though unfortunately the average dealer this side fails to grasp the value of coupling up his activities and publicity propaganda therewith. One day, I suppose, dealers will come to realize that, once the link between supply and demand, it is up to them to work in close association with the manufacturer, and thus double the value of the latter’s expenditure. As it is, the enterprise is all on one side, with the result that a percentage of its selling power—how much it is impossible to estimate these times—is absolutely lost. Now and again one hears of a few real live dealers, like Jake Graham, of Liverpool; Thos. Edens Osborne, of Belfast; Faskell, of London, apart from the big stores, who actively co-operate with manufacturers, but taking the average dealer his apathy in this regard is very disappointing. Indeed, it is fair to say, of at least 50 per cent. of retailers, that they do not sell gramophone records; people come in and buy them. That is a basic truth, notwithstanding the great difficulties which surround us.

In the machine domain trade conditions are not much better. A year ago, when I wrote that most record players existed, we had a Motor. Now we have a dozen. Motors are coming along in larger quantities from Switzerland, at least for a period, and deliverer are more prompt. The British output of motors is still poor. There is, I am told, not much hope of improvement while the war is on, as it continues to absorb all available labor and material. Nevertheless, it is a matter of satisfaction to the trade that experiments are progressing along lines which should insure a big output immediately the situation permits, and, in any case, render it unnecessary for any Britisher to entertain the thought that we need ever again allow to be re-established the pre-war German monopoly. If this is to be achieved, however, I would suggest that the trade co-ordinate its plans so as to embrace a definite offer of encouragement of any and all legitimate efforts to secure to British interests alone the British gramophone market. This co-ordination should take the solidly practical form of financial support, if possible, and certainly the actual placement of a good order after a satisfactory demonstration of the motor. Such action would materially assist the manufacturer, enabling him to plan a definite post-war campaign in the interests of British Empire trade. I am not aware that this matter has yet received the attention it deserves at the hands of our trade as a body, though individual support along the lines suggested has not been, and is not, wanting. In this connection, however, there is need for the establishment of a central authority for the encouragement and introduction of a set plan of campaign along lines of more or less general agreement in conformity with the trade’s aims and ambitions, based upon an intimate knowledge of the situation. A “prepared” policy is much preferable to any hasty or haphazard plan evolved at the last minute. The trade should know in advance of what it is hoped to accomplish. The best incentive to the success of those aims is to entice individuals with the thought that it depends largely upon personal effort of an active and passive nature. Let us try and get each member of the trade to realize this.

Industrial Fairs Postponed

It is announced that the new accommodation for the British Industries Fair (Glasgow), 1918, may not be entirely completed by February 25, and as it is of great importance that the British Industries Fair in London and Glasgow should be held simultaneously, the Board of Trade have decided to postpone the opening of both fairs for two weeks. Accordingly, the period for which the British Industries Fairs in London and Glasgow open, will be March 11 to March 22.

Prohibited Exports From Sweden

The news is published by the Swedish Chamber of Commerce for the United Kingdom that plates and cylinders for gramophones, phonographs, and like instruments, also worn out plates and cylinders, have been added to the list of goods which are now prohibited for exportation from Sweden to all countries.

Of Special Interest to Advertisers

A recent official announcement makes known that "The unrestricted dispatch of trade catalogues and price lists from traders to traders is permitted up to January 31, 1919. Other classes of advertising circulars may be distributed up to the same date on the basis of one-third of the total weight of such matter distributed between February 1, 1916, and January 31, 1917. Annual reports of companies or societies issued to their own members, auctioneers' and surveyors' catalogues and price lists, prospectuses and application forms dispatched by insurance companies in response to requests in writing are definitely excluded from the order.

NEW JERSEY REGIMENTS EQUIPPED WITH ARMY AND NAVY MODEL EDISON PHONOGRAPH

This photograph, taken in front of Phonographs, Ltd., Newark, N. J., shows a few of the Army and Navy Model New Edison Phonographs recently given to the New Jersey Regiments, the purchases being made with a fund raised by the Newark Call at a Benefit Recital given by Edison Artists at the Broad Street Theatre, Newark

TWO SALESWOMEN GO WEST

PORTLAND, Ore., February 4.—The talking machine trade in the East has contributed several members to local sales staffs recently, among them being Miss Alma Hartman, formerly with Lyon & Healy, Chicago, and now with the record department of the G. F. Johnson Music House, and Miss Helen Zedell, of New York, who has taken charge of the record department of the Graves Music Store. Evidently the familiar slogan embodying the advice to the male sex to journey west must now include the fair sex—a tribute to woman's new place in the commercial world.

SOUTH AMERICAN IMPORT FACTS

Some Important Data Which Exporters to South America Should Remember

Manufacturers and exporters selling trade-marked goods in foreign countries, particularly South America, may be interested in these few vital and important facts as set forth by the First National Bank of Boston:

(1) In Argentina, Bolivia, Chili, Costa Rica, Cuba, Guatemala, Paraguay, Peru and Venezuela, trade-mark titles absolutely depend upon priority of registration. Furthermore, any one may lawfully register a United States trade-mark (registered or unregistered) and thus prevent entry of the goods into the country.

(2) In Brazil, Cuba, Guatemala and Panama the trade-mark must be registered in the United States Patent Office before it can be registered in these countries.

(3) In Ecuador, Mexico and Nicaragua no suit may be brought for infringement of a trade-mark without registration.

(4) It is said on good authority that our enemies are now registering United States trade-marks in countries mentioned in clause (1) through "dummies." The result is obvious; manufacturers who anticipate exporting trade-marked products will find themselves blocked in their effort to do so.

More and effective business would result, says this institution, if American merchants and exporters would state exactly who their representatives are in Argentina. By making this information more public, the local Argentine buyer, when in the market for goods, would then not need to write the head office, and thus much time would be saved.

The decided drop in freight rates from $1 per cubic foot to 70 cents in the past few months for shipments to South America is very encouraging.

B. H. WOLFMAN APPOINTED MANAGER

Bernard H. Wolfman has been appointed a member of the traveling staff of the local wholesale branch of the Columbia Graphophone Co., 53 Warren street. Mr. Wolfman will cover the territory in the southern part of New York State and, although he is a newcomer in the talking machine industry, his previous experience with several prominent organizations well equips him to work in close co-operation with the Columbia dealers in his territory.

FACTS ABOUT THE KENT ATTACHMENT NO. 1
To Play Lateral Cut Records on the Edison Diamond Disc Phonograph

Paired March 2, 1913

It has been recognized by experts as the perfect device of its kind on the market.

It has been endorsed by the leading Edison Diamond Disc Phonograph dealers.

It can be played with or without reproducer and is made in two lengths.

It is guaranteed by the Manufacturer in every way.

F. C. KENT & CO.
Manufacturer of Phonograph Accessories
24 Scott Street
Newark, N. J.
WASHINGTON, D. C., February 8.—PHONOGRAPH SOUND BOX CONNECTION.—Charles S. Burton, Oak Park, III. Patent No. 1,247,220.

The purpose of this invention is to provide an improved connection between the sound box and the tone arm of a phonograph, adapted to permit swiveling of the two connected parts for adjustment of the sound box to two positions, and particularly adapted to permit such adjustment for zigzag and hill-and-valle records, the specific purpose being to insure the adjustment from one position to the other being made completely and not halted at the parts in an intermediate position.

In the drawings, Figure 1 is a side elevation of a portion of the tone arm and sound box embodying this invention, a portion of the sound box being broken away to show other parts which are in section with respect to telecopying and swiveled members. Figure 2 is a similar view with the sound box in the other of the two positions to which it is adjustable for adaptation to the different types of records. Figure 3 is a section at the line 3—3 on Figure 2. Figure 4 is a section similar to the sectional part of Figure 1, showing a modification in certain details.

ATTACHMENT FOR TALKING MACHINES.—Lester Moroney, Manhattan Beach, Ore. Patent No. 1,247,441.

This invention relates to a means adapted to be attached to a talking machine of the Edison type, whereby to cause the raising and lowering of the cover to perform various detail operation now required to be performed manually and which usually are found more or less irksome. The invention provides a means whereby the horn is automatically swung to bring the sound box over the record, and then lowered, the operations being performed in proper sequence by the lowering of the cover, and the reverse operations taking place by the raising of the cover. The attachment includes means to automatically stop and release the turntable with the swinging of the horn, and a means automatically adjustable to the size of the record to govern the movement of the horn-actuating means.

Figure 1 is a perspective view of the attachment and indicating the cabinet of the talking machine in dotted lines, the view showing the position of the parts when the cover is in the raised position. Figure 2 is a fragmentary plan view. Figure 3 is a similar view to Figure 1 with the cabinet cover lowered, certain trip elements being indicated in the positions they assume just as the cover reaches its lowermost position but at the final movement of the said trip devices; Figures 4 and 7 are views similar to Figure 2 but showing the parts in different positions; Figure 5 is a fragmentary plan view with parts broken away and in section, the view being given to show the relation of the brake device to the depending brake flange of the turntable. Figure 6 is a perspective view similar to Figures 1 and 2 with the parts in the position after the sound box has moved to the center of the record and which results in the automatic stop being brought against the turntable.

This invention comprises a pad of peculiarly adapted material for cleaning and make-up for treatment of talking machine records for the purpose of incidentally removing dust but primarily to polish or smooth and lubricate the surface of the record and lubricate the needle which traverses it.

Figure 1 is an elementary form of this device that experience has demonstrated to be highly efficient; and Figure 2, shows a modification. The device comprises a pad of appropriate soft materials adapted to be superficially coated or impregnated with graphite. The pad shown in the drawing may be a piece of felt, plush, corduroy, fuzzy or other fabric, all of good quality.

This invention relates to sound boxes for talking machines, and has for its object the provision of an improved construction whereby the vibration of the sound box will not be transmitted to the stylus.

Another object in view is to provide a separate support for a style formed independent of the parts forming the sound box proper, in order that none of the vibration or movement of the stylus caused by the grooves in a record will be transmitted to the diaphragm.

In the accompanying drawing: Figure 1 is a rear view of a sound box disclosing an embodiment of the invention. Figure 2 is an edge view of the sound box shown in Figure 1.

This invention relates to record cleaners for sound reproducing machines of the type described and claimed generically in United States patent to Henry A. Place, dated September 25, 1906, No. 831,987, and in which a brush-holding arm is fixed to an attaching clamp having opposite spring fingers to clasp the sound box, sound tube or member which moves over the record, so that the cleaner can be quickly attached to or detached from the moveable member, and can be adjusted thereon so as to bear at the proper point and with the proper amount of pressure on the record directly in front of the following stylus.

In Letters Patent No. 865,074, issued September 26, 1907, is described a specific improvement on said generic invention, in which a spring fingered reproducer clamp is formed integrally with the brush holding clamp and arm. The specific examples of the left hand side of the drawings of the said Place patent are also made in this way.

The disadvantage of this specific construction is that whereas the material of the brush-holding clamp should be soft and pliable properly to bind the brush bristles when set thereon, and the reproducer clamp should be of elastic material so as properly to grip the reproducer, the integral construction of the brush clamp and reproducer clamp does not permit such a divergent construction.

The present specific improvement on the said Place invention, therefore, consists of a brush clamp permanently attached to an improved reproducer clamp.

This invention relates to sound reproducing apparatus known as a "disc machine." Among the objects of the invention is to attain a sound reproducing machine using a disc record in which the stylus will maintain the same relative relation to the groove in which the stylus is moving as the groove in which the stylus happens to travel without the provision of special compensation devices and attachments for varying the position of the stylus needle as it travels in the record groove. The most advantageous relation for the reproduction of sound is to position the stylus or needle so that it will be tangent to the record groove in which the stylus happens to travel without the provision of special compensation devices or attachments for varying the position of the stylus needle as it travels in the record groove, the increased life is given to the record and a more perfect reproduction of the sound is attained, as when the position of the stylus varies from tangent to the record groove the needle breaks or chips the walls of the grooves and destroys the record as well as failing in accurately reproducing all the sounds registered in the groove. It has been heretofore proposed, especially in machines in which the record disc rotates on a fixed support and the sound box travels across it, to vary the relation of the sound box to the record as it moves across it by mechanical compensating devices of various designs, but such expedients have failed to come into practical use owing to the unattainability of increasing and complicating the mechanism of sound reproducing machines with the attendant unreliability. By this invention the sound box is maintained in an essentially constant position and causes the rotating record disc to travel with relation to it in such manner that tangency of the stylus with the groove in which it is traveling is maintained. By this invention it is also possible to success fully employ records of almost any diameter without providing the special compensating devices above referred to and which permits the reduction of compositions heretofore not practical.

Other objects will be apparent from the subjoined description, among which might be mentioned the reduction of the number of movable joints or connections in the reproducing arm to which the sound box carrying the stylus is attached which reduces the liability to loose connections owing to continued use and the consequent imperfect operation of the arm is practically overcome.

The accompanying drawings, Fig. 1 illustrates in plan view the mechanism, in accordance with this invention, for rotating the record and for causing it to travel bodily, the balance of the apparatus being removed. Fig. 2 is a side elevation, and partial cross-section through a sound reproducing apparatus constructed in accordance with this invention, the cabinet containing the amplifying horn being broken away. Fig. 3 is a similar view, illustrating a slight modification in the disposition of the disc driving mechanism. Fig. 4 is a similar view to Fig. 3 showing the parts as shifted to position to reproduce the longitudinal vibration of the record. Fig. 5 is a plan view of the apparatus.

This invention consists of a repeating device for talking machines. One object of the invention is to provide a device which can be quickly and easily attached to a talking machine and which will efficiently operate to effect the movement of the reproducing elements of the talking machine to repeat the record. Another object is to so construct the invention that it will not injure any of the several parts of the talking machine or record. Another object is to so design the invention that it will be durable and of comparatively simple construction.

Figure 1 is a top plan view of the improved repeating device. Fig. 2 is a section on the line 1—1 of Fig. 1. Fig. 3 is a section on the line 3—3 of Fig. 1. Fig. 4 is a section on the line 4—4 of Fig. 1. Fig. 5 is a section on the line 5—5 of Fig. 1. Fig. 6 is a section on the line 6—6 of Fig. 1. Fig. 7 is a fragmentary sectional elevation showing certain of the elements of the invention. Fig. 8 is a section on the line 8—8 of Fig. 7. Fig. 9 is a fragmentary plan view showing a modification of certain of the parts illustrated in Fig. 1. Fig. 10 is a section on the line 10—10 of Fig. 1. Fig. 11 is a section on the line 11—11 of Fig. 9, and Fig. 12 is a view of a cross arm employed in combination with the ordinary form of phonograph needle and in stead of the specially constructed needle shown in Figs. 7 and 8.

Phonograph.—Wagnus W. Turnquist, Chicago, III. Patent No. 1,249,251.

This invention relates to phonographs, and its principal object is to provide improved means for rotating the tone arm and therewith the reproducer and needle to their starting place, whereby the musical selection or other sound produced may be repeated automatically without any further attention on the part of the attendant. Another object is to provide a simple, comparatively cheap, efficient and practical mechanism for accomplishing this result. Another object is to provide a repeating mechanism for phonographs, actuated by the turntable or disc which supports the record. Another object is to produce a repeating mechanism for phonographs, having adjustment means to accommodate various sizes of record discs.

The accompanying drawings, Fig. 1 illustrates a plan view of a phonograph, showing a simple embodiment of the present invention applied thereto; Fig. 2 is a view partly in side elevation and partly in vertical section of the parts seen in Fig. 1, the line of section being indicated at 2—2 in Fig. 1; Fig. 3 is a view partly in plan and partly in horizontal section, the line of section being taken through the original position; Fig. 4 is a detail plan of a fragment of a certain oscillatory and reciprocating frame; Fig. 5 is a detail vertical section taken on the line 5—5 of Fig. 3; Fig. 6 is a detail vertical section taken on the line 6—6 of Fig. 3; and Fig. 7 is a detail end view of certain anti-friction bearing rollers.
Reference has been made in The World before to the beautiful new home of Phonographs, Ltd., at 87 Madison street, San Francisco, Cal. A further idea of their comprehensiveness may be had from the picture here-with. The four views show the general office, "Many of us know Mr. Ireton as the former general sales manager of Thomas A. Edison, Inc. We are more than glad to make his acquaintance as a jobber. We hope to see him in New York at the Jobbers' Convention in February. And you, Mr. Dealer in the San Francisco zone, will find it well worth your while to pay A. C. Ireton a visit. We know him. We know what he did for our Edison education. We know what he can do for yours." A pretty nice tribute.

PLAN TO RELIEVE FREIGHT JAM

Merchants' Association of New York Devises Pick-up System Which Should Help Restore Transportation Facilities to Normal

In order to relieve the congestion at the freight terminals in New York City, both in the handling of incoming and outgoing freight, the Merchants' Association of New York has evolved a "store door delivery" and "pick-up" system to free the railroads from the accumulation of freight and likewise to serve the interests of the consignees.

As conditions now stand, a truck may stay in line all day in order to reach an unloading pier, and carry away a single case of goods. Under the proposed plan, as fast as the freight is received it will be placed in charge of a trucking company controlled by a carrier, according to the zone in which the consignee is located, and immediately delivered to him. By this system one truck could handle as much incoming freight in a day as a dozen trucks do under present conditions. The association urges that the carriers be permitted to form trucking companies or that present trucking companies be permitted to consolidate under Government supervision for the purpose of following out the system.

For outgoing freight the "pick-up" method would be followed, the trucks on their way back to the pier stopping at various points and gathering up freight intended for shipment.

The Highest Class Talking Machine in the World

THE INSTRUMENT OF QUALITY

the talking machine taught Galli-Curci!!

from an interview with Amelita Galli-Curci in New York Times

"I had no training such as most opera singers have. I learned all I knew about the voice while studying the role I was to sing. When I tried to sing in New York several years ago there were in my voice faults that worked against me, and now I know that these imperfections sent me away from the wonderful city. To get rid of them I turned to the talking machine. I knew that I could correct them if I could hear them myself. I used many, many records, each time listening for the faults and the next time trying to correct them. I may say that my most painstaking teacher was the talking machine."

FOR the instruction of singers, for the learning of foreign languages, for the entertainment of family and friends, for delightful dance music, for cheering up the boys in camp and those left behind, nothing can equal the phonograph.

1918 sales will break the 1917 big records.

The preference of the public is for the highest class instrument. The Sonora with its superb tone which won highest score for quality at the Panama Pacific Exposition, its many superior and exclusive design and constructional features, and its unequalled prestige, is the phonograph for you to handle.

Sonoras sell with astonishing ease, they delight the purchasers and make splendid money for the dealer.

MME. GALLI-CURCI'S TRIBUTE

Noted Soprano, in Interview, Declares That Talking Machine Enabled Her to Learn of and Remedy the Faults in Her Singing

Mme. Galli-Curci, of the Chicago Opera Co., and who made a sensational debut in New York records, is one of the opera artists who pay a high tribute to the talking machine as a medium for voice training. Mme. Galli-Curci, as is well known, is under contract to make records exclusively for the Victor Co., and her records have been in tremendous demand.

In an interview in the New York Times following her appearance in opera, Mme. Galli-Curci declared that the talking machine had enabled her to correct various faults in her singing, and was, therefore, largely responsible for her success. She said in part:

"I had no training such as most opera singers have. I learned all I know about the voice while studying the roles I was to sing. The machine helped me a great deal, but I did not go through the long hours of vocal labor that are the bane of most artists. Always to me singing was a joy. It was never work. Perhaps that is why I was able to win New York.

"My friends have always helped me. Of them, Mr. Thorner, of the Chicago Opera Association, has been the most so kind to me. In Catania, Italy, five years ago and told me I had a voice. When I tried to sing in New York seven years ago there were many people who thought that work against me, and now I know that those imperfections sent me away from the wonderful city. To get rid of them I turned to the talking machine. I know my voice can correct them if I could hear myself well. I used many, many records, each time listening for the faults and the next time trying to correct them. I may say that my most painstaking teacher was the talking machine. I hope to go on improving, and shall work to do so, but I do not think I shall ever have the perfect voice. For eight years I have sung in public, and they have been eight years of the most joyful work ever done. Perhaps when I have sung eight years more I shall have been able to improve! Who knows? But no matter how long and where I sing, never do I expect to have the thrill of that first New York night in 'Donizet,' when I knew that the New York which had once refused to hear me had taken me to its heart."

STUDYING FRENCH WITH THE TALKER

Uncle Sam's Forces at Spartanburg, S.C., Making Good Progress in This Direction

It is interesting to note that in the recent news from the camps at Spartanburg, S.C., special attention is paid to the fact that the members of several regiments are studying French at the rate of four talking machine records. Notices to this effect have been published in the local newspapers, and have attracted considerable attention. The use of records to improve the pronunciation of French is another significant indication of the importance of the talking machine in war times, and the fact that it can be considered as a first-class essential in the true meaning of the term.

IMPORTANT PURCHASE IN DALLAS

DALLAS, Tex., March 2.—The Phonograph Shop, at 1300 Elm street, this city, recently purchased the complete stock of records of the American Music Co. that concerns' entire stock of phonographs and records. The deal places the Phonograph Shop in the position of controlling exclusive selling rights for Edison phonographs in this city and vicinity.

This wars should teach us to do without many things—except real loyalty.
How Recognition of the Pride of Race Will Increase Record Sales

Pride of race is something that will not be downed even in these abhorrent times, and the existence of that fact should provide many opportunities for the talking machine dealer to realize at least more than ordinary results from his record-selling campaign.

We all realize that it is the Italian to whom Italian records most appeal, or the Swede who takes most interest in Swedish records, and so on, but there are many records in the catalog proper, records of the popular, or standard, type sung in English, that will make a special appeal to certain classes—something connected with them, either the title of the piece, or the name and nationality of the singer.

This fact has been emphasized particularly by a live talking machine dealer in an Eastern city, who has practically doubled his sales of McCormack records. There is a large natural demand for McCormack records from musical people of all classes, but this particular dealer realized that the voice of McCormack sounded particularly sweet to the Irishman. He, therefore, sees to it that announcements regarding the new McCormack records as they appear find a place in the Irish and Catholic weekly papers and in the bulletins issued by the Catholic churches in his section. The success of the plan is demonstrated by the fact that the sales of McCormack records, even though good before, have practically doubled with this dealer as a result of this special publicity. The same plan was followed in connection with the publications of various Knights of Columbus Circuits, and with astonishing results.

Take the case of Caruso records, for instance. Practically everybody who buys records buys one or more of the recordings of this famous tenor, but even the lowliest Italian, unacquainted with English to any extent, can nevertheless be appealed to in his native tongue through special publications reaching him by the fact that the great tenor himself is an Italian.

There is a certain Polish singer who has recorded the songs of his native land for one of the prominent companies, and who has stimulated his royalty receipts tremendously by bringing his records personally to the attention of his compatriots. Not only that, but he has increased the sale of several of his records in English by that same direct means.

There are in the leading catalogs, and not all in the foreign sections by any means, records that lend themselves particularly to exploitation in certain fields. There are, for instance, records that are designed particularly for use in the ceremonies of various fraternal orders—records that find a place in the ritualistic workings of the Masons, Elks, Odd Fellows, etc. Just simply to have these records on the shelf and to call attention to them in a desultory way, is not enough. All of these orders have special publications issued at regular intervals and devoted to their interests. These publications offer the logical mediums through which the talking machine dealers can call attention to special records of the fraternal-order type.

By advertising in mediums that go direct to the people most interested, there is a saving of wasted circulation, and consequently of considerable money. It is the same principle that influences manufacturers to advertise in trade journals. They might advertise to the dealer in national publications with circulations running into the millions, but of all that circulation only 1 per cent. would be interested in the proposition, and the 99 per cent. remaining would be wasted, even though paid for. In the trade journal the manufacturer appeals directly to those whom he desires to reach, and thus gets the benefit, at a restricted cost, of 100 per cent. circulation.

The talking machine dealer who studies racial sympathies, and in his publicity makes a special drive along that line, studying his records, what they offer, who the singer is, and whom he is most likely to appeal to, is going to get results that count.

There are almost as many people who will buy records because they are sung by artists of their own nationality, and through pride of that fact, as well, buy the records solely for their musical value. It is the ability to appeal directly to those people on a logical basis that will save exploitation expense and effort, and produce maximum sales.

There are a great many dealers to-day who have on their shelves, and classed as slow-selling records, selections that, if presented to a special class of buyers and in a special way, would move with a very satisfactory rapidity. The question is worth thinking about and studying.

MOZART PHONOGRAPH CO. RESUMING
Overcoming Effects of Recent Fire and Will Be Working at Capacity Soon

St. Louis, Mo., March 4.—The Mozart Phonograph Co. will be working to full capacity again this month, according to a recent statement by President Fitzgerald. One of the buildings of the former Colonial Cabinet Co., which were acquired for Mozart production, is now working full time following the fire in January, and the second and more seriously damaged building will be entirely repaired and restocked soon.

"We are taking care of the orders now coming in," said Mr. Fitzgerald, "but business threatens to get too good."

CAN RECORD READINGS FROM NOVELS

Apparently the American law does not prevent talking-machine companies from making records of readings taken from novels. It does protect plays against such reproduction.

The question arose recently when records were made of chapters from "Pollyanna," the reciter merely cutting out descriptive paragraphs. The secretary of the American Publishers' Copyright League, after examining the law, gave it as his opinion that there had been no infringement of copyright.

SUFFERS HEAVY FIRE LOSS

The building occupied by the Emil Granberg Mfg. Co., manufacturers of talking machines and furniture, was the scene of a fire recently causing damage to building and stock of about $8,000.

SINCERITY

That's the slogan back of every factor in Ditson Service

It means much just now

**AN IMPORTANT ACCESSORY—ALBUMS FOR FILING DISC RECORDS**

The enormous demand for "National" Record Albums keeps pace with the ever increasing demand for machines and records, and our output capacity has been enlarged to meet the greater needed supply. Record Albums have proven themselves to be the best and most convenient, as well as economical, method of filing and keeping disc records.

**MAKING THEIR SELECTION**

Illustrating the daily actual usage of the Album, the most convenient and satisfactory record filing system extant.

**A PLACE FOR EVERY RECORD AND EVERY RECORD IN ITS PLACE**

Albums are an Indispensable Requisite in the talking machine business and wherever records are sold. An accessory that is necessary and worth every dollar was ever known. Save time and records. A profitable adjunct to the business. All owners of machines and records want Albums to file and preserve their records.

We manufacture disc Record Albums containing 12 pockets to fit cabinets of all sizes and styles. We also make Albums containing 17 pockets. With the indexes they are a complete system for filing all disc records.

For durability, finish and artistic design, our Albums are unsurpassed. We have unexcelled manufacturing facilities, and considering quality our prices are the lowest. Write us, giving quantity you may desire, and we will quote prices.

**OUR ALBUMS ARE MADE TO CONTAIN VICTOR, COLUMBIA, EDISON, PATHÉ AND ALL OTHER DISC RECORDS**

**NATIONAL PUBLISHING CO. : 239 S. American Street : PHILADELPHIA, PA.**

**PROSPEROUS TIMES IN ATLANTA**

Leading Establishments Make Cheery Reports Regarding February Trade and Are Optimistic About Outlook for March—News of Month ATLANTA, GA., March 8.—The talking machine business in this city was very active during February, and the outlook for March would indicate that we are entering on a very prosperous era in this section.

The Diamond Disc Shop, Edison retailers, report that their February business was larger than that of December, 1917, which is unusual, as December is everywhere recognized as the banner month in the talking machine business. The Edison dealers, however, have been advertising consistently and the results are now becoming apparent in their increased business.

The Edison from $165 up, including the $215 and $265 models, has certainly taken the market in a larger proportion than ever.

The Delophone Shop, dealers in the Delophone phonograph, are meeting with fine success in Atlanta, and they have qualified recently as Columbia dealers, having had such insistent demand for Columbia product, as to necessitate their taking on this old and popular line.

The Atlanta Talking Machine Co., Columbia and Vocalion dealers, report a $200 cash sale of records, this being one of the nicest sales of the kind that your correspondent has heard of in this city, for some time.

The Aetolian-Vocalion records which have now been on the market for some weeks are marvels in respect to their smooth finish and beautiful appearance.

**THE ALBUM**

soon pays for itself in time-saving and preserving records.

The initial cost is really an investment which comes back fourfold.

**THE PERFECT PLAN**

The pockets holding the records are substantially made from strong fibre stock, firmly joined together and bound in attractive covers.

We manufacture hardware for all styles of cabinets

Our harbor for lack of coal. No one could leave the ship but the captain, according to regulations. So there in sight of land an entire crew stayed cold and idle. "We would have gone mad if it had not been for the Victrola you gave us," one of the men said.

"A submarine chaser about to start has just become the proud possessor of a Victrola given it by the Navy Club," and among the records is a set of French ones made by the Victor Talking Machine Co., so the men can study French on the way over.

"Another ship carrying many men goes over in the near future. 'We have no Victrola on board. Do you think you could get us one?' said one of the men. It means cheer and hominess, and gives a comfort where otherwise the boys might grow homesick and discouraged for lack of entertainment.

"You use your Victrolas but seldom; they will use them constantly. There are three ships waiting for a response to this notice; and the response has always been so wonderful I feel that many may be willing to make the sacrifice to brighten up the days in crossing which are so monotonous—those first days, the hardest for the troops and the crews of the ships. Donations are received at the headquarters of the Navy Club, 505 Fifth avenue."
Victor
Supremacy
is universally acknowledged

The Victrola has time and time again demonstrated its supremacy in the great things it has actually accomplished.

And with genuine Victrolas from $20 to $400 it is easy for every Victor retailer to reap all the advantages that come with such supremacy.

NEW YORK, MARCH 15, 1918

Another month has gone by and still the talking machine trade, every branch of it, continues to be faced with many problems involving both manufacturing and distributing. The bright spot in the situation during the past month has been the withdrawal of the fuelless Monday order, thereby giving back to the industry several days in which to endeavor to meet demands. It is steadily becoming more apparent that the question facing the trade is one of adjustment, and quick adjustment, to conditions that promise to continue for an indefinite period and which will most likely become worse before they get better. In other words, the companies, or individuals, in the trade, who sit still and decry the situation in general and wait for times to change for the better, are simply stirring up trouble for themselves.

Conditions are real. They must be faced, and every endeavor should be made to so regulate existing business demands and practices that a minimum of inconvenience may be occasioned. If stocks of machines and records are scarce, and there is every indication that they will be scarce for a long time, the problem resolves itself into doing the largest amount of business, and the best class of business, with the stocks now on hand, or that can be obtained. If the popular hits of the day cannot be secured from the factories, feature the records lying on the shelves, those selling at higher prices. If the leading styles of machines are unavailable, develop some salesmanship and sell the styles that are in stock or can be secured from the factories, those machines that will bring in more money to the house.

Shorten terms of credit and get after the cash business, for there is plenty of it for the seeking. In fact, now is the time, as old Omar Khayyam would say, to "take the cash, and let the credit go."

One genuine consolation, if we may accept assurances from Washington, that the talking machine trade, or for that matter the music business generally, will suffer no more than hundreds of other industries in any action taken to conserve fuel and metal supplies, clear up the transportation tangle, or curtail production. Forceful arguments presented at Washington have convinced the administration that there is really no such thing as a "non-essential" industry, the hysterical economy talk of prominent bankers and others to the contrary notwithstanding. It has been found that one industry depends so much upon the other, and plays such a prominent part in the business and social fabric of the country that to cripple a single line of trade would threaten wide disaster.

War conditions are not pleasant. We are getting abundant proof of that fact, but with the assurance of a square deal from the Government, the trade is in a position to grin and bear it, to make the most of the opportunities that are offered, and to bring about an adjustment that will reduce possible loss to a minimum.

On and after May 1, 1918, the subscription price of The Talking Machine World will be $2 per year. For a period of twelve years, since 1906, to be exact, the subscription price has been $1 per year, and has been maintained in the face of increasing production costs, meaning a steadily growing loss on every subscription. Pre-eminent in its field, and the representative organ of the talking machine trade at large, it is but natural that the circulation of The World should increase by thousands each year. The size of the paper, too, has increased tremendously, reflecting as it does the great development of the industry as a whole, and the confidence of our advertisers based on profitable returns. The steady rise in the cost of paper, of printing and of all the elements that go to make a newspaper has placed a burden on the publishers of The World that can no longer be borne and still observe good business practice.

For several years past members of the trade, as well as other publishers, have marveled that we could produce and offer a publication of the size and scope of The World at such a small subscription price. To us, however, we have given to our readers the full fruits of The World's development at the subscription charge fixed over a decade ago. At the new price of $2 we promise to our subscribers, who have so loyally supported us, still further development and greater value. An announcement in another section of The World tells how the present subscription rate can be enjoyed for some years to come. It is worth reading and acting upon.

The value of the talking machine as an entertaining factor and gloom disperser in the great army and naval camps in this country, and in the American military headquarters and trenches in France, is emphasized by the numerous letters sent by the soldiers to their folks at home and by the correspondents to the magazines and to the daily papers. Week after week pictures appear showing how the talking machine is utilized in the great social centers which are fathered by the Y. M. C. A. and the Knights of Columbus, and high tributes are paid to its power to bring joy and pleasure into the lives of these men who are serving Uncle Sam, and who are preparing to battle for the odium against the rights of might in the great field of war in Europe.

While the piano and the player have aroused enthusiasm among the soldiers, yet the talking machine, through its ability to bring into the camp the voice and personalities of the great operatic and concert artists, as well as the music of the symphony orchestras and the great bands of the nation, give a variety of music that has made the strongest kind of appeal to the soldiers, because of its educational influence. Moreover, in connection with popular army songs, the "talker" has proven a veritable song leader, for "the boys" have taken up these songs and joined forces with the talking machine in making them still more popular.

Music in war times is truly a necessity, and not only in the camps, but in the homes, the talking machine and its music appeals to the emotions and stimulates the imagination. In these days of stress and strife the people who can weld music into their daily affairs are blessed, for what can compare with the talking machine in this respect? Through its medium even the very poorest home can afford to have the best of music as well as the palaces of the rich.

The average business man cannot but view the provisions of the income tax and excess profits tax sections of the War Revenue Act, which he will be called upon to meet very shortly, with more or less misgivings. No matter how anxious a business man is to bear his fair share of the country's war expense, he is bound to be troubled by the complexities of the law in determining just what he should pay and how he should pay it.

Out of the darkness, however, comes one bright light, and
that is the fact that in obeying the law and making his tax returns even the most indifferent merchant will be compelled to take an accurate inventory of his business for the inspection of the Government. He will have to give the matter thought, and is more than likely to come across facts that surprise him.

Taking an inventory for the purpose of making a good showing for the year’s business is quite different from compiling an inventory that will mean the basis for tax assessment. Facts and not alone pretty figures will be demanded, and in the long run perhaps it is a good thing that some merchants in our own trade, for instance, will be compelled to find out just where they stand financially and what their business amounted to during 1917.

In an interview in the New York newspapers, following her sensational debut in New York with the Chicago Opera Company last month, Mme. Galli-Curci gave full credit to the talking machine for aiding her in training her voice properly. The noted soprano emphasized the point that it was by means of talking machine records that she learned of the various faults in her singing and was enabled to correct them.

The statement of Mme. Galli-Curci is important as coming from an artist of recognized standing, and is practically in line with the claims that have been made for the talking machine as something more than a simple entertainer. Leading artists have long ago learned that the talking machine record presents their voice exactly as it is, with imperfections and all. Before an audience, and on the concert stage, personality may be made to counteract existing faults in singing, but on the talking machine record personality does not count. It is the singing itself that must pass the test. When the artists reach the point where they can, without prejudice, study the recordings of their voices and profit thereby, then is the full value of the talking machine realized.

It may be a difficult task to convince the average manufacturer or dealer that when business is slow it is oftentimes advisable to increase his advertising. Too many overlook the importance of publicity as a prestige builder and as an educational factor in bringing directly to the attention of the purchasing public the fact that the house that keeps its name before the public is the house that can supply the goods they require most promptly and most completely. And even when a shortage prevails in certain products, as now, the public expects from the “live” houses that advertise, the best and quickest service when the opportunity affords.

The accepted rule among a great many institutions is to reduce the advertising appropriation when trade quiet down a bit. No greater mistake can be made. Experts in advertising who study the game from a cold, scientific standpoint—that is for producing results—are a unit on the proposition that a full should mean increased advertising if anything.

With the professional advertising man such ways and means are the best to adopt that have “pulling” power; they therefore advise no curtailment of the publicity campaign when business is slow. Then is the time to make still further efforts. Where this plan has been followed success has always crowned the endeavors of the advertiser. Quite a few talking machine men are wise enough to pursue this course and are reaping the reward. Would there that were more, and these observations apply with equal force and cogency to every branch of the trade.

A MOST praiseworthy tendency to feature in an unusually energetic manner the better class of records is noted among talking machine dealers in many sections of the country. In their advertising they call particular attention to the records by the noted artists—records that retail at $1. up, and at least one dealer has gone so far as to publish in his advertising special articles on the desirability of a library of records of the better sort. We all know that records are scarce, and that it is the proper thing to make the most of the records on hand, and the limited number that can be obtained, by featuring them in an unusual way. The logic of paying particular attention to the high-priced records is that the gross amount received for their sale is much larger and, therefore, serves to measure up with the total sales volume of popular types of records in normal times from a monetary standpoint. In other words, if a normal business cannot be done on accumulated profits, the condition can be offset to a certain degree by doing a smaller business on large profits.

If a bill before the New York State Legislature becomes a law, it seems as though merchants in all industries in this State will be compelled to observe a one-price policy regardless of their personal desires. The bill seeks to amend the personal property law in order to make it compulsory upon the merchant offering goods on contract, or conditional sale, to place upon the article both the cash price and the conditional sale price. If the bill becomes a law it should prove of material aid to merchants who are already observing the one-price policy, and it should likewise serve to increase the number of cash sales by presenting to the customer the saving he can effect by buying for cash.

Chase the Delay-Snakes Out of Recordland

It is the delays in record deliveries that prevent you from rolling up the big record business that you are planning to do every month. Start right now and be free from "delay-snakes" by getting your Victor Records thru PEARSSALL SERVICE

This service is operated FOR your requirements. The definite purpose of getting records promptly is all the "magic", there is to it. March your record orders right in now.

SILAS E. PEARSSALL CO.
VICTOR DISTRIBUTORS
18 West 46th Street New York, N. Y.
Edison Message No. 18

O take music out of the world would be a calamity. To withhold music from the home would be a tragedy.

Today music is doing its part, a tremendously effective part, in feeding the soul of America and vitalizing the spirit of her sons and daughters—in soothing tensed nerves—in sustaining the pitch of efficient living and doing—in keeping the world from falling below present standards and keying it up to higher standards—in helping to save the world for democracy.

The Edison dealer who comprehends that, in Music's Re-Creation, he has in his hands a power for great good in his community, and who exercises that power, is a true citizen and a valuable member of the Edison Organization.

THOMAS A. EDISON, Inc.
Orange New Jersey
Why the Sales of High Priced Records Should Be Featured Just Now

The present record shortage is not a thing to be dismissed in the belief that it is solely a manufacturing problem and therefore impossible of solution outside of the record factory. As far as the present shortage affects the dealer’s profits, the real solution lies right with the dealer himself. Here is what The World recommends, and our suggestion is based on the premise that it is as easy to press operative records as to press records devoted to ragtime.

We recommend that every dealer get down to brass tacks and utilize every possible idea that is practical that will boom the sale of high-priced records. In this way, it will be possible for both wholesalers and retailers to do a greater cash turnover than last year, but on a numerical—smaller record stock.

In the past dealers have relied pretty much on national advertising and other outside influences to sell both talking machines and records for them. The public has acquired the habit of coming in, making its own choice, and taking home whatever it pleases. Because of this practice there has been comparatively little hard pan selling—selling that convinces the buyer he wants what you want him to select.

Without doubt the national advertising of the record manufacturers, the record bulletins, and the numerous attractive store posters have gone a long way toward creating a demand for specific records. But there are few dealers who have taken up the problem in earnest where the manufacturer is forced to leave off. Examples are not over frequent where retailers are conscientiously engaged in devising ways and means for increasing the sale of high-priced records. There remains, therefore, a very broad field for expansion along this line. It is folly to think aggressive work on the part of the dealer and his staff of salesmen will not materially augment the sale of high-priced records.

The personal element and the "home town" element can certainly be made to produce more sales for high-priced records than is now the case.

If the dealer will inject into his entire sales force the fact that every $3 record sold is equivalent to selling three $1 records or four 75-cent records, it is reasonable to suppose his sales force will soon be offering good practical suggestions for increasing the sale of the high-priced stock.

At this writing we will not discuss in detail, plans for selling high-priced records. Broadly speaking, however, there are five excellent channels to work through, five channels the possibilities of which have to date been developed by the dealer to a small degree only. They are: one, newspaper advertising; two, window display; three, direct mail communications; four, featureing of records after the customer enters the store and the booth; five, conversation engaged in by the salesmen and saleswomen.

Considered in a general way here is the extent of the benefit and the possibilities of using these different ways and means of selling high-priced records:

1. Newspaper advertising offers an opportunity to introduce the pictures of famous artists. Individual selections can be featured, and it would not seem advisable to run a list longer than ten records in any one advertisement. The playing up of specific pieces and of popular artists will introduce a very new element into retail advertising, and it will therefore be possible to use small-sized space very effectively.

2. Window display offers the opportunity for originality on an extended scale, with an option between simplicity and extravagance. Just as Hawaiian windows have, for instance, been built around Hawaiian dance records, just so window displays built around famous opera scenes, etc.

3. Direct mail communications to regular and prospective customers, feature cards, etc., can be built around individual records of the high-priced class, thereby helping the public to select from the current record bulletins in favor of the high-priced records and thereby offering the chance of bringing back to mind some of the high-priced records of an earlier date.

4. Many plans may be devised for featuring records inside the store and in the demonstration booths. Special staffs, saleswomen, special records left apparently carelessly on the machine in the booth, special display tables in the middle of the store, etc., etc., add the limit of human ingenuity.

5. Great things can be accomplished by having the salesman carefully study the nature of each client, so that he can suggest in an artistic and diplomatic way certain high-priced records. Weekly meetings of the sales staff will help bring out the effective ways of working along this line.

All in all, the present is a time when the talking machine man who sits back and says "records are short" and lets it go at that is a slacker. The present is a time when men of action are needed, men with ideas to promote the sale of high-priced records. Every wholesale and retail record department will profit by hearing this thought firmly in mind. The department will have the satisfaction of knowing it is making good in spite of a numerical shortage and at the same time will be definitely advancing public appreciation for music of the better sort.

MME. GALLI-CURCI IN CONCERT

Amelita Galli-Curci, the great operatic soprano and Victor artist, whose records are so much in demand these days, gave her first song recital in New York on Monday, March 4, at Carnegie Hall, under the auspices of the Baldwin Club, of which Mrs. W. R. Chapman is president. The club bought the entire floor platform seats and lower boxes, and had as its guests 150 presidents of women's clubs in Manhattan and Brooklyn. Mme. Galli-Curci will give one other concert, her last this season, on Sunday, March 17, at the Hippodrome.

JOINS MERCHANTS' ASSOCIATION

The Blackman Talking Machine Co., Inc., the well-known talking machine distributor of 97 Chambers street, New York, has been elected to membership in the Merchants' Association of New York. Several other talking machine houses are also enrolled in the association.

THE BROOKS
Automatic Repeating Phonograph

Plays Any Kind of Record—Any Desired Number of Times and Then Stops Automatically—The Phonograph Sensation of the Age

MR. DEALER:—

You cannot duplicate the value we offer for twice the price. In size and appearance the "Brooks" compares favorably with Instruments retailing for $800.00 and up.

In tone qualities it is unexcelled by any talking machine on earth! In mechanical equipment and automatic features it is years in advance of its nearest competitor. We have been building automatic machines for three years—last year our sales doubled every four months. The BROOKS DEALER has no competition. The machine creates interest and discussion—sold—advertises—sells. Send for particulars, terms, prices. Do it Now.

BROOKS MANUFACTURING COMPANY
Talking Machine Dept. ▪ SAGINAW, MICH., U. S. A.

View of Controlling Dial

This dial sets, starts and stops the machine. Will play any desired number of times you wish recorded played.

Simplest Machine to Operate

Instructions

Set the machine on the lower edge of record cutting and then move pointer upward to indicate number of times you wish record played. That is all there is to it. Set and forget the machine; when the record has been played as many times as you have set for, the machine will stop automatically with the tone arm notched in the air above record.

Globe-Wernicke

(BUILT-TO-ENDURE)

Sectional Cabinets FOR DISC RECORDS

The better the facilities you furnish your customers for housing records the greater the quantity of records you will sell. Look carefully at the cabinet.
It invites you to fill it, in fact, you cannot resist the temptation to fill it. No matter how many sections are bought there will be empty compartments and these are always in sight, inviting you to fill them, and the records too are always in sight, inviting you to play them. Any record is so easily found and quickly replaced that this cabinet adds an extra charm and fascination to the playing of records.

Suppose each of your customers had this cabinet and you had a sample on your salesroom floor to remind them to buy additional sections. Not only would the sale of the cabinets increase but what a tremendous increase in the sale of records would result and there is excellent profit in the sale of both.

Each section has 90 compartments numbered consecutively from 1 up. Globe-Wernicke Catalogue No. 317 T W describes and illustrates these goods fully.

THE UNIT IDEA

of sectional construction was originated and brought to the highest state of mechanical and artistic perfection by the Globe-Wernicke Co. It applies equally to Bookcases and Disc Record cabinets for the home and to Public Departments of every kind.

The Value of S/W Sectional Construction

Sectional records. This idea. You have only what you need to-day—saving that you can add to your purchase to meet the demands of your record library.

The most important thing is to start right—not the first section is not important, what is important is the future of your record library.

BROWN DISC RECORD CABINET

FOR EVERY TALKING MACHINE MADE

Every record right in front of you always.
No searching—No confusion.

Records lie flat when drawer is closed—No warping.

Records are vertical when drawer is open. Every record at your fingers’ ends.

A separate compartment for every record.

No Scratching—Rubbing—Cracking or Breaking.

The Brown Disc Record Cabinet was devised to preserve a record perfectly and thereby insure Perfect Reproduction of Sound.

Records for "Boys" in Trenches

Emerson Phonograph Co. Sends 10,000 Disc Records to the Y. M. C. A. for Entertainment of Uncle Sam's Boys at the Front

The Emerson Phonograph Co., New York, manufacturer of Emerson records, has sent out to the Y. M. C. A. 10,000 Emerson disc records to be forwarded to the boys in the trenches. Forty of the most popular selections have been selected for this purpose; the kind that the boys in camp will like—catchy song hits, dance, instrumental, humorous—the kind of music that will keep them in joyful spirits. Two hundred and fifty sets made up of these fifty selections are on their way, and will be distributed from the headquarters of the Y. M. C. A. Needless to say they will be welcome.

In a chat with The World the secretary of the Emerson Phonograph Co. said: "This is just the first of a series of contributions which we anticipate making to the boys. We feel that it is only our patriotic duty to do this, and that every phonograph company, whether manufacturer or retailer, should send as many records as possible to the boys in camp and in the trenches. This should also apply to the music-roll houses, to the sheet music companies, and, in fact, to everyone whose product can afford entertainment for the boys who are 'doing their bit' for their country."

When you "take time by the forelock," be sure it is your own time you're taking!

TRI-STATE VICTROLA DEALERS' PLANS

Officers of New Association Elected at Recent Meeting in St. Louis—Will Assist Dealers in Reaching Adequate Understanding of All the Important Phases of Their Business

St. Louis, Mo., March 4—The Tri-State Victorola Dealers' Association, which effected a temporary organization here November 21, has been permanently organized and the temporary office and the name. They are President, Arthur M. Magone, Kieschel Piano Co.; secretary, C. P. Lippman, Field-Lippman Piano Stores; treasurer, E. H. Lehman Music Co., East St. Louis. These three, with V. Reis, of the Smith-Velas Piano Co., and John A. Ditzel, of the Famous & Barr Co., are directors.

President Magone, following the permanent organization meeting, said that he believed that the Exchange Bureau, under the management of John A. Ditzel, would be the big feature of the organization, judging from the comment of new members and the large number of letters that have inquired as to memberships. This bureau, undertaken at the suggestion of Mr. Ditzel, is modeled after the similar bureau of the Victor jobbers. Any member dealer having a surplus of records or machines can file an inventory with Mr. Ditzel, and these will be reprinted and distributed to all members, who will then arrange an exchange among themselves. Mr. Ditzel will have nothing to do with the actual exchange. His part is completed with attending to the prompt distribution of the lists. It also has been decided that the bureau will not attempt to pass on credits. Prospective exchanges, wishing credit information, can get such data by applying to the jobber. The association rule is that all exchanges must be settled by cash for the balance due within thirty days. Preliminary reports are that there is much dead stock on certain shelves that will prove very live stock on other shelves. Informal arrangements were made for extensive exchanges at the last meeting.

The prime object of the association is to assist the Victor Co. and Victor dealers in reaching an adequate understanding of their business. The territory originally contemplated was Missouri, southern Illinois and Arkansas. But the membership will extend beyond these lines, as applications are coming in from eastern Tennessee and the southern part of Kansas. It may reach into Iowa, it is said.

Charles J. Taylor, an advertising counselor who has had much experience with Victor advertising, spoke at the last meeting on the benefits of organization and his co-operation with the association is assured.

An employment bureau for experienced talking-machine men will be organized under the direction of Secretary Lippman. Blanks will be drawn for the job seeker to fill out and these will be open to members seeking experienced help. The appropriation has been made. Salesmen and other staff members will be admitted as associate members. Some of the dealers elected to membership at the recent meeting are: Highfield & Neild Furniture Co., Caruthersville, Mo.; Vandervoot Music Salon, St. Louis; F. S. Gravenhorst, Effingham, Ill.; J. P. Lechridge, Mayfield, Ky.; Boveris Store Co., Ste. Genevieve, Mo.; Meach & Son, Mansfield, Mo.; R. V. Johnson, Memphis, Tenn.; W. C. Daumweller, Lebanon, Ill.; H. A. Aranalis, Natcha, Mo.; Walter H. Riem, Belleville, Ill., and Frank H. Perand, Granite City, Ill.

TACOA A BUSY TRADE CENTER

Rhodes Brothers Department Store Doing Big Victor Business

Tacoma, Wash., March 7—Business of all kinds in Tacoma is active these days, and the talking machine people are getting their share of it. One of the lively Victor departments is that conducted by the Rhodes Brothers Department Store, with P. H. Seha as manager. The volume of business transacted has grown so rapidly that it is planned to enlarge the department, moving into a better floor location and making it three times as large as it is at present.

The great complaint with this concern, as with all the Victor stores, is the shortage of goods, but it is expected that with the improvement in the weather, and the quicker railroad shipments from the East, this condition will be overcome to some extent.

A recent acquisition to the sales force of Rhodes Brothers is B. L. Miller, who was formerly with Sherman, Clay & Co. in Seattle. He is making a good record.

SCHUBERT

PHONOGRAPH

FOR 1918

There will be some slight changes in the cabinets of some of the models for 1918, not very material, however, because the Schubert cabinets have always out-classed other phonographs in attractiveness, materials and workmanship.

Cuts are being made and as soon as sheets are printed we will notify dealers.

It Isn’t Wise to Judge Prospective Purchasers by Their Outward Appearance

By Alfred Parsons

In the business of selling talking machines, or in the music trade, an outward appearance of prospective purchasers is not always a safe guide to judge of their purchasing ability. There is a tire-worn story in the trade of a gentleman who entered a fine piano wareroom, was side-stepped and joshed by all the star salesmen, and finally was turned over to a “rookie” for final consideration. The young man tried out the piano, with fingers knotted by earnest toil, and with fingers nails in deep mourning. The final outcome was that he bought a magnificent grand and paid cash for it, taking the money out of a grossy old wallet dragged from the depths of one of his overall pockets. The illustration is one that draws deep laughter from the all-wise salesman.

One of the first pieces of advice which capable managers give to salesmen is to treat every customer with equal courtesy and consideration, regardless of their apparent circumstances. That this should be the natural attitude without suggestion goes without saying, but it doesn’t require a psychologist to note how fine clothes and a suave, cultured manner win the immediate attention of talking machine salesmen, as compared with the indifference shown the ill-dressed, uncultured visitor. An excellent illustration of how this attitude works in another branch of the industry is pointed out in the experience of a man who related it to The Talking Machine World in this wise:

Some years ago a salesman entered the employ of an up-State piano house and worked hard to make a record. It was when player pianos were in the vogue and the demand for them so great that the salesman was lolling about the warerooms hoping for the best, when late one afternoon an old chap, who would have been better off for a good scrubbing, whose clothes were not only unkempt but had the fragrance of the stable about them, entered the wareroom. The salesman sized the visitor up either as a poor farmer or a stable hand, with hard work. He was about to pass some bright and witty remark when there flashed through his brain the story of the old farmer. He said to himself, “Well, I have nothing else to do this afternoon, I might as well talk to this man.”

“I want to see one of those here piano play- ers,” said the visitor. The salesman looked him over, and finally decided that it wouldn’t do any harm to let him look at them, so he conducted him to the upper floor where the player pianos were displayed and proceeded to demonstrate. As he played, the old gentleman’s feet began to quiver, and finally ended by beating time to the music. “Pretty fine pianos,” said he, “how much?”

“Seven hundred dollars,” answered the salesman.

“That so? Got any better ones?”

“Here,” said the salesman, and conducted him to a large and massive instrument.

“This sells for $500?”

“How much for cash?” asked the visitor while the salesman’s brain began to reel.

“Seven hundred and sixty-five dollars for cash,” was the answer.

“Not bright, deliver the one to-morrow,” said the customer, and proceeded to draw from the inner recesses of his coat a long black stocking, simply full of money of all kinds, small change, bank notes and checks. The $765 was counted out, a receipt given and the sale closed.

The salesman was naturally curious, and at the first opportunity stopped at a nearby town where the player was delivered, ostensibly to see if it had given satisfaction, and found that the man was a prosperous farmer and well off. Moreover, he had come to the store direct from the court house where he had settled an estate for his niece amounting to something over $100,000—hence the stockin full of change.

“After that,” declared this salesman, who, by the way, is now a successful executive of a talking machine concern, “the rougher they looked the better I treated them.”

During Christmas time in a town not far from New York, two of the most expensive styles of talking machines were purchased by customers whose outward appearance would not indicate that they could afford to buy a $15 machine. The salesman was so unimpressed with the appearance and supposed financial indigence of his visitors that the head of the business, who happened to be around at the time, was forced to the opinion that these people were not being handled discreetly. He took them in hand himself and sold each of them a $200 machine, much to the amazement of the salesman who first dickered with them when they entered the store. As a matter of fact, clothing doesn’t always proclaim the size of the pocket-book.

Needless to say that circumstances like these are unusual, for there are few businesses where the salesmen are so efficient, so courteous, and so attentive as in the talking machine trade. But there are exceptions in this as in every other trade, and these remarks are meant for the “exceptions”—the men who sometimes fail to keep in mind the initial, elementary advice to salesmen to treat visitors to the store, no matter what their station in life may be, with equal consideration. There are many rough diamonds among talking machine buyers in this great country of ours.

PROSPERITY PROOFS IN LOUISVILLE

Louisville, Ky., March 4—H. V. Boswell, manager of the Edison and Columbia department of the Kaufman-Straus Co., Inc., this city, reports that business for February showed an increase of 100 per cent, as compared with the same month last year. In fact, at the present time this house is doing the largest talking machine business in its history, and judging from the outlook at present it expects an increase of 120 per cent. in March. The demand is for high-class instruments, and 75 per cent of the sales made are for cash. Mr. Boswell is a hustler, and believes that business can be secured if it is gone after properly. A handsome new motor truck has been purchased exclusively for the use of the talking machine department.

WANTS PHONOGRAPHs FOR CUBA

S. Sarmento, of Manzanillo, Cuba, has notified the Foreign Trade Bureau of the Commercial Museum, Philadelphia, that his concern is in the market for phonographs and disc records to be marketed in Cuba. It is stated that correspondence should be in Spanish.

VICE-CONSULADO DEL PARAGUAY

WILMINGTON, DELAWARE

E. E. U. U. DE A.

January 28, 1918

16-18 Beach Street,
Boston, Mass.

Gentlemen:

I am indeed pleased with the PERFECTION FLEXI-TONE Reproducer that you sent me for use on my phonograph. It does all that you claim it to do—and a lot more. It makes certain lateral-cut records that seemed thin before, full and rich when played with your reproducer.

I tried it on my records, using an "oblique" attachment that is adjustable, and both centering the stylus properly to the --- record grooves, obtained with your reproducer a very rich and beautiful tone, and of course, all necessary volume. It also plays the ---- records very clearly and beautifully.

I congratulate you on a most remarkable product.

Very truly yours,

[Signature]

N.B.—This is only one of many letters we have received praising the NEW PERFECT FLEXI-TONE REPRODUCER. You can see and hear for yourself by sending for a sample to

NEW ENGLAND TALKING MACHINE CO., 16 Beach St., Boston, Mass.
Wonderful Choral Records Feature Widely Varied April Program

Father Finn’s Paulist Choristers took New York by storm; their tour is a triumphal success. These famous boy singers, who make records exclusively for Columbia, have two splendid numbers in the April list—Tschaikowsky’s “Legend” and Bach’s “Sing Ye to the Lord.”

Stracciari, who won new laurels in his recent appearance with the Chicago Opera Company, sings with tremendous power and fervor for the Columbia April program the heart-touching song to the courtiers from “Rigoletto.”

Al Jolson revels in melodious ecstasy over a priceless gem—his “Lump of Sugar Down in Dixie.”

A pair of song hits from Chu Chin Chow—swirling, coaxing, compelling dance records by Handy Jazzers; Jazarimba Orchestra; Jockers Brothers and Prince’s Band—the very newest war songs—Cohen at the Telephone Again—these give just an idea of the straight-through superlativeness of Columbia’s April offerings.

Give them half a chance, and they’ll sell themselves. Order early.

THE TALKING MACHINE WORLD

Columbia

Grafonolas

Sell the Joy of Good Music—Let the Price Fix Itself

No matter how little money a customer can afford to pay for good music, there's a Columbia Grafonola to suit his purse.

The one he can afford to buy is the one to sell him. For, though it is the instrument that is delivered at his home, what he is really buying is the joy and comfort of music.

The low-priced model, at $18 or $30, will give him his desire. A moderate expenditure for an instrument will enable him to buy more records than if he puts nearly all his available purchase money into a higher-priced Grafonola.

Acquaintance with the Grafonola, increasing enjoyment of the wide variety and splendid quality of Columbia music, will make your customer a regular purchaser of Columbia Records, and an advertiser of his Grafonola among his friends.

Some day he will buy a higher priced instrument. That day will take care of itself, if you take care of his present desire in the right way.

Columbia superiority is as marked in the lowest priced instrument as in the Grafonola de luxe.

VICTOR WIRELESS COURSE READY

Instruction in Wireless Telegraphy by Means of Records and Instruction Books Heralded as a Distinct Aid to the Government

The Victor Talking Machine Co. has just announced a special course of instruction in wireless telegraphy by means of records and accompanying books of instruction. In announcing the course the company says in part:

"Higher pay and better rating are two benefits which the Victor retailer may now help our soldiers to obtain. He may also assist the nation in overcoming a critical need."

In co-operation with the Marconi Institute in New York, we have printed a course in wireless telegraphy with that object in view.

The United States Army and Navy are in need of thousands of skilled wireless operators and a complete course of study may be carried on by means of these records, in camp and at home, at a very small fraction of the expense that is ordinarily involved.

"The course consists of six ten-inch double-faced records with book of instructions, all securely packed in a special container in which they may be transported readily. Our retail price is $5.00 per set.

"Here again the Victor retailer is in position to assist solving one of the big national problems and enable the individual soldier to promote himself from the ranks."

"A special poster and descriptive folders will be issued for the use of the dealers in featuring this latest Victor product, which should meet with a ready demand."

Arrangements have recently been made with the Marconi Institute in New York to accept orders through Victor dealers for the books on wireless, "Practical Wireless Telegraphy," and "Military Signal Corps Manual," as well as subscriptions for the magazine, "The Wireless Age." A discount will be offered on the orders.

L. L. LEVERICH AS A WRITER

Assistant Advertising Manager of the Columbia Co. Clever With His Pen—New Cohen Record

In the April list of new Columbia records will be featured a record to be added to the already popular "Cohen" series. This record will be designated as A2488, and will contain two recordings: "Cohen at the Reformed Church" and "Cohen Calls His Tailor on the Phone." It is interesting to note that the former selection was written by Lester L. Leverich, assistant advertising manager of the Columbia Co. Mr. Leverich has achieved signal success as a writer and composer of witty song and verse, and a number of his compositions have been published in magazines and newspapers. It is said that his "Cohen" record is well calculated to compare in popularity with the original "Cohen" selection, the sales of which have reached phenomenal totals. Both sides of this new record are recorded by Joe Hayman, who has made all the "Cohen" records to date.

FIRE IN ALBANY STORE

The stock of the Standard Phonograph Co., 618 Broadway, Albany, N. Y., was badly damaged by fire last week. After the blaze it was found that several talking machines had been stripped of their electric motors and an investigation is being made.

AIDING WAR STAMP CAMPAIGN

Charles K. Haddon, vice-president of the Victor Talking Machine Co., is directing the War Stamp sale movement in Camden County, where it is expected $3,500.00 will be raised by the sale of the stamps.
Frank J. Coupe Returns From whirlwind Trip in Which He Booked Big Orders for 1918—Big Selling Campaign Now Being Planned

Swinging out from the executive offices in New York, Frank J. Coupe, sales and advertising director of the Sonora Phonograph Sales Co., Inc., jumped from city to city visiting the trade, and after a two weeks' whirlwind trip (with fourteen nights on sleepers), returned recently with over a million dollars' worth of 1918 orders for Sonoras. The first stop was Indianapolis, where Coupe found Chicago and Sonora phonographs in the Windy City is excellent. Mr. Coupe reports, the local representatives, C. J. Van Hotten & Zoon, ordering very heavily for the coming year's business.

At Milwaukee Yahr & Lange, Sonora distributors, were the hosts at a banquet given to the Wisconsin Sonora dealers. In this section everyone has money, is spending it for talking machines, and the prospects are splendid. Two of the out-of-town guests at the Milwaukee meeting were Sewall Andrews, of the Minneapolis Drug Co., and Oscar Mauter, of the Kiefer-Stewart Co. of Indianapolis, two important Sonora distributors. Many new dealers were signed up, Sonora 1917 sales having been so extensive that it was clearly apparent to every prospective dealer that the Sonora is an extremely easy instrument to sell, decidedly popular, and in strong demand. Many dealers were almost completely sold out and rush orders for immediate delivery by express were commonplace.

At St. Joseph, Mo., a salesman's meeting was being held by C. D. Smith & Co., and Mr. Coupe outlined the policies of the Sonora Co. for 1918 with reference to the plans for extensive and unique dealer co-operation and assistance which the Sonora advertising department now has in preparation.

Business in Salt Lake has been phenomenal and the Strewe11-Patterson Co. were found to be highly enthusiastic over the merits of the Sonora and are preparing for a great year.

That the farmers are cashing in on wheat, corn and other high-priced food products and are buying Sonoras was attested by the Southwest Drug Co. of Wichita, Kansas, who expect that the coming twelve months will establish new high-selling records. Dealers everywhere were urged by Mr. Coupe to order early this year because of extraordinary transportation and manufacturing conditions.

The results of this short trip of Mr. Coupe's were highly gratifying to George E. Brightdon, president of the company, who also visited some of the dealers during this period.

The distributors all along the line were at stations to welcome "Frank J.," as he is popu-

"TALKING MACHINE IS THINKING MACHINE" SAYS LAUDER

Well-Known Singer Points Out That the Thoughts It Inspires in the Soldiers at the Front Are Pleasant Thoughts of Home and the Dear Ones Left Behind

"When I was across in France seeing the boys," said Harry Lauder, "I often thanked the inventor of the talking machine for not having lived in vain. A record out yonder, where the mud is much deeper than even in the streets of dear old Glasca on the worst winter day, a record brings back the snift o' the hills, the wee ingle neuk, and the days o' auld lang syne. It's grain, I'm tellin' ye! What an invention! Voices o' loved ones always wi' you; sangs o' the hameloud, the mountain and gin to strengthen your arm, the talking machine is a thinking machine, and the thoughts that it inspires are pleasant thoughts—thoughts o' hame and the dear ones left behind."

Such is Harry Lauder's description of music among the men at the front in an interview with the London Phon-Record shortly after his return from his recent visit to the Western front. "I'll tell you a wee story," he proceeded in his own pucky and inimitable way, "so it's no' a madcap yin, m'd; I'm tellin' ye!" This is a story of how a gramophone back up the galant soldiers o' a gallant Scottish Regiment. The regiment's duties had been long and arduous, and for hours and hours the Jocks had been known, and when this cheerful sales man told of the coming period models and outlined the new plans for aiding the dealers in increasing sales (which for the present must remain confidential), the Sonora dealers were quite in declaring that in selling methods the 1918 Sonora program is bound to prove an eye-opener to those who do not realize that the phonograph industry is one of the fastest growing and most progressive lines in the country, and that despite all pessimistic talk the war is bound to increase and not decrease sales. Mr. Coupe stated that the more expensive models from $150 up are in surpris'ugely good demand, and the Sonora officials are all gratified that the Sonora idea of making the "Highest Class Talking Machine in the World" rather than the largest number of the lowest-priced talking machines is being emphatically approved by the public.

It requires as much courage to go over the top of a trench as to go over the top of a trench, under a fierce bombardment—without a rest and without a halt. Then day gave way to night. Shells were continually bursting. Lazy Lutes, Whistling Willies and a' the rest o' the devil's messengers. Now the rain came on. Sheets and sheets o' it—rain that looked and smelt never would stop, and made one wonder where it all came from. Even the trenches were flooded. That night passed and at dawn the Germans were scattered and new positions were taken. But still it rained. Harry at this stage quietly chuckled, puffed away at his pipe, and went on. "Several hours later the boys were relieved, and tramped miles back to their rest camp—amid mud to the knees all the road, and with the water streaming down their necks and splashing in their boots. It was even before they arrived at the place where warm tea, warm clothing, and a good dry bed awaited them, but, man, even before a helmet was doffed one o' the Jocks made for the company gramophones. He slipped on a record, wound up the machine, and started it again. And the disconsolations of the past thirty-six hours' hours were sent into oblivion when the music changed out. 'When You Come to the End of a Perfect Day.'"

ADDRESS GRAND RAPIDS DEALERS

L. C. Wiswell and C. B. Gilbert Principal Speakers at Recent Annual Meeting of Retail Music Dealers' Association in Grand Rapids.

GRAND RAPIDS, Mich., March 2—Among those who attended and spoke at the recent annual meeting of the Grand Rapids Retail Music Dealers' Association were Leslie C. Wiswell, manager of the wholesale Victorola department of Lyon & Healy, Chicago, and C. B. Gilbert, representing the Victor Talking Machine Co. Camden, N. J.

Mr. Wiswell dwelt at length upon present existing conditions in the trade and their effect on the distribution of both machines and records and stated that now was the time for the development of closer co-operation between the merchants in the various cities. Mr. Gilbert also reviewed the present trade situation from the standpoint of the factory man, and gave the retailers some valuable information.

THE TALKING MACHINE WORLD

$1,000,000 IN SONORA ORDERS
The Trade in Boston and New England

John H. Wilson, Manager, 324 Washington Street, Boston, Mass.

Boston, Mass., March 5—As emphasized a month ago, February was a very showy month, the shortest one of record, because of the coal shortage which closed up tight three successive Mondays so far as business was concerned. As to the advantages of this Monday, which all told continued for five successive weeks, there is much difference of opinion. Spring is approaching, the weather is milder, the days longer, and all the means of avoiding the use of coal for which the business interests certainly are most grateful. It is not surprising, therefore, that business has been rather light, but the one thing that has acted as a welcome stimulus has been the visit of the Chicago Opera Co., which is treated at more length in the succeeding paragraph. One thing that the talking machine men must be given credit for: they have uniformly accepted the unpleasant conditions gracefully; there have been no murmuring, no complaints, and they have come forward generously in response to every appeal for assistance, and there is not a week going by that some new campaign is not inaugurated. Two forthcoming whirlwind campaigns are to be the second drive for the Red Cross and the third Liberty Loan, and the trade may be depended on in advance to do its share. All honor to the patriotic stand which the trade is taking.

Chicago Opera Co. Stimulates Trade.

With the appearance of the Chicago Opera Co. in Boston for two weeks, its season at the Boston Opera House ending on March 2, the various talking machine houses in Boston were keenly alive to the importance of exploiting the records of the various artists. Incidentally the company made a great success; a far greater one than had been expected, and the publicist manager, Rufus Dewey, showed himself an adept in giving proper prominence to the company and in working in effective union with the talking machine headquarters managers. At all of the Victor distributing centers, notably the Oliver Ditson Co., the Eastern Talking Machine Co., M. Steinert & Sons, C. C. Harvey Co., George Lincoln Parker and A. M. Hume Music Co., there was a great call for the Galli-Curci records, for this artist made as pronounced a hit in Boston as in New York. The Columbia stores featured Stracciarri, Baklanoff and Mary Garden, all exclusive Columbia artists. The Pathe, which does the recording for Muratore, Fitzin, Chenal, Bimini and Risu (the latter won new laurels for her work here) featured these singers in their advertisements. In the program there were advertisements of the Vocation Co., the Pathé Phonograph Co. with Hallet & Davis Co. mentioned as one of the dealers; the Brunswick-Balke-Col- lender Co., which used a picture of Muratore in calling attention to the Brunswick machine; M. Steinert & Sons Co., the Oliver Ditson Co., the Grafonola Co. of New England, the C. O. Harvey Co. and the Victor Co. itself, which had the whole of the back page.

Increases Executive Force

Oscar W. Ray, the New England manager of the Emerson Phonograph Co., is rapidly filling his field with a staff of competent men, and there is growing evidence of the value of the school for salesmen which the parent company has started over in New York. One of Manager Ray's new men is H. L. Coombs, who comes from New York and will handle Connecticut and Western Mahacan. The local headquarters also have lately connected up with several important stores in the western part of the State through which such cities as Fall River and New Bedford and others will handle the Emerson line. Copies of the first issue of the "Emerson Spotlight" have reached this city and dealers are delighted with its appearance. Mr. Schwartz, in charge of the Emerson foreign department, was a visitor in Boston the latter part of February, making his headquarters with Manager Ray. Mr. Ray, by the way, was up in Montreal a week ago looking over the Emerson business there. On his way he encountered severe storms and cold and saw no less than eight engines stalled between Rouss' Place and Montreal.

L. W. Hough Increases Line Handled

L. W. Hough, of 20 Sudbury street, who is well known as the representative of the George A. Long Cabinet Co., manufacturers of disc record cabinets, has added a general line of albums for records which are manufactured by the New York Album & Card Co., in whose line of goods discriminating representatives of the trade are interested. Mr. Hough is ready at all times to give prompt attention and service to his customers, no more to any extent than there will always be a full line of goods.

Steinert Co.'s Patriotic Records

M. Steinert & Sons Co., Victor wholesalers, have issued two booklets of a patriotic nature. One is a little song book with words and music of favorite patriotic songs, the other is an essay on "Your Flag and Mine," with reproductions of famous pictures and colored facsimiles of the various flags of American history. The Victor warerooms of the Steinert Co. at Arch street and at the Boylston street stores have been experiencing very good business these past few weeks, despite the comparatively few business days.

About Will Ellister

Townsend Walsh, dramatic critic for the Boston Traveler, thus writes in his paper of a well-known salesman at Arthur C. Erliman's establishment in Tremont street, one, it may be added, who has a great many friends in the business: "I ran across Will Ellister on Washington street the other afternoon. No more road-touring for him, he sagely said; at least not till theatrical conditions regain their normal equilibrium. Mr. Ellister is the son of John A. Ellister, one of the pioneer managers of the Middle West who was responsible for launching Abraham L. Erlanger in the business. Effie Ellister, the one-time favorite, is Will's sister. Mr. Ellister is now located here in a trustworthy position with the Grafonola Co. of New England."

Some Grafonola Co.'s News.

Louis Bassin, who has been a valued member of Arthur C. Erliman's staff in the Grafonola Co. of New England, is in service, and is attached to the Charlestown Navy Yard, where, as he is an experienced musician, the violin being his specialty, he has been placed in charge of the orchestra.

Stanley D. Bowman, who left the Grafonola Co. of New England some time ago to associate himself with the Columbia distributor at Portland, Me., has returned to his first love, where his old associates are glad to have him with them.

Lillian Dummigan has severed her connection with the Grafonola Co. of New England after having served as cashier for five years.

Makes "Hit" at Pilgrim Publicity Dinner.

George W. Hopkins, general sales manager of the Columbia Co., arrived in Boston on the first of the month, especially to be present at the dinner that night of the Pilgrim Publicity Association. Mr. Hopkins came here from Chicago and at the conclusion of the dinner took the midnight train back to New York, which made it all the merrier for the next day's meeting.
THE TALKING MACHINE WORLD

THE TRADE IN BOSTON AND NEW ENGLAND—(Continued from page 20)

made his visit here with Manager Fred E. Mann a very short one. The topic of his address at the advertising men's dinner was "The Psychology of Merchandise." Mr. Hopkins got a big reception from his Boston friends, who are legion here, and he has fond memories of the days he lived in this city.

Books Good Brunswick Phonograph Orders

F. H. Walter, of the Brunswick-Balke-Collender Co.'s staff, has just returned from a very successful trip taken to Providence, Fall River and New Bedford, in all of which places he was able to quicken the spirit of dealers as to the merits of the Brunswick line of machines. Just now the Boston headquarters are pushing the sale of Pathé records as well as Brunswick photographs and the demand throughout New England is rapidly growing. Mr. Walters has the sympathy of his friends in the loss of his mother, which occurred three weeks ago in New York.

Recovered From Indisposition

A. M. Hume, head of the A. M. Hume Music Co., Victor dealers, was confined to his home in Melrose for a few days lately with a severe cold. He is now back at the warerooms; we are glad to say. Herman Baker, also of this house, is back from a trip taken to Philadelphia a while ago.

Perfect New Flexi-Tone Reproducer

The New England Talking Machine Co., with which Charles Trundy is closely identified, has finally perfected its new Perfection Flexi-Tone reproducer, on which Mr. Trundy has been diligently at work for some time. Demonstrations are being given at the factory, and a number of talking machine experts are dropping in to study this reproducer at close range.

Composite Victor Retail Publicity

The Eastern Talking Machine Co., Victor wholesalers, has just worked out a scheme of local advertising which is finding immediate favor with those directly interested in the plan. It is a sort of composite advertising in which sixty or seventy Victor dealers are co-operating. The advertisement, which is two columns wide, is to appear weekly throughout the year in one or more of the Boston dailies, and each week there is some special artist featured at the top.

Visiting Columbia Artists

R. F. Bolton, who has lately been made sales manager of the Columbia International record department, was in Boston for a short time toward the end of February. Another local caller at the Columbia warerooms quarters was L. L. Leverich, the company's assistant advertising manager, who came here largely in the interests of some of the Columbia artists who at the time were appearing with the Chicago Opera Co. at the Boston Opera House. S. J. Pisky, a salesman of the international sales department, is spending some time in this territory just now looking over the local field.

Good Reason for His Pride

Wholesale Manager Billy Fitzgerald, of the Eastern Co., is proud of the fact that he now has three nephews in the service of the country. The last one to ally himself with the great cause is now a lieutenant of engineers in the 101st Regiment. Another nephew is a lieutenant in the Regulars, and the third one is a radio inspector.

Good Showing for Shortest Month

R. S. Hibshman, manager of the Acolian-Vocalion, says that despite the short month business made a good showing in the machines which his house handles. Mr. Hibshman is regretting the anticipated loss of one of his good men, Albert Feldman, who is expecting to be called any day now to enter the service. He is to be connected for a time with the army and expects to go to Dartmouth College for a course.

TRADE CONDITIONS IN BOSTON
(Continued from page 21)
of training. Mr. Feldman has made a marked success in selling Vocalion machines.

The Pardee-Ellenberger Co., Inc., reported having had a very good month in Edison photograps and records despite the brevity of the working days in February. Manager Stillman says that March has made an excellent start, all the traveling men are out and sending home enorimy reports of trade conditions, which are rapidly improving, and the prospects, generally speaking, are rosy for a good spring business. He states, also, that little difficulty was experienced from the coal shortage, that there were only a few hours on one day when the

DEATH OF GEO. A. WALDRON
Old-Time Talking Machine Man Who Has Been Closely Associated With Its Mechanical Development Passes Away In Quincy, Mass.

Boston, Mass., March 8—The talking machine world will be sorry to learn of the death of George A. Waldron, familiarly known as "Pop" Waldron, which occurred recently at his home in Quincy following an operation, which was the first illness he had had in many years. His relation to the talking machine business covered a period of twenty-seven years, he having entered it in 1891 as master mechanic for the New England Phonograph Co., then located in the Boylston Building at the corner of Washington and Boylston streets. He was one of the original talking machine men in the country, and invented many devices for cylinder machines which Mr. Heron had the good fortune to get patented, and these he held closely to himself to the time of his death. In those early days he was associated with Carl G. Childs, who to-day is manager of the Victor recording laboratory at Camden, N. J.

Mr. Waldron was the originator of the first dictating machine, which he installed in the Boston police department and in the offices of several local lawyers, and from this beginning came the first complete machines of to-day that are in widespread use. The Eastern Talking Machine Co. possesses two of these original dictating machines.

Mr. Waldron used the old wax cylinder record and died used to shave these in a back room at his home in Quincy. He had been associated with the Eastern Co. for the last thirteen years as master mechanic. He was a native of Quincy, and is survived by his widow and two daughters, both school teachers. He was fond of hunting and duck shooting, and he often could be found sailing his craft in the waters of Quincy Bay.

The man with money may succeed, but he must have more money; he must have brains to handle the business in which that money is invested.

steam got down to a point where inside work was uncomfortable.

To Form a Victor Dealers' Association
A Boston visitor, welcomed among the Victor trade, has been J. A. Frye, a representative from the home office who makes periodic trips to this city. He is here at this time in the interests of forming a Victor dealers' association, a plan which has met with considerable encouragement, and of which there will be more report to in a subsequent issue of The World.

Well Satisfied with Results
The C. G. Harvey Co. feel well satisfied at the business done in both Edison and Victor outfits in February. The early closing had some effect on trade conditions but there always seems to do in Manager White's department from morning till closing time.

ILSLEY'S GRAPHITE PHONOGRAPH SPRING LUBRICANT
Ilsey's Lubricating Cord. Makes records slide instantly. In a convenient size, will not rust, dry out, or become sticky or grumpy. Reasonably priced. A necessity for anyone using records. Manufactured by ILSLEY-DOUBLEDAY & C. 229-231 Front St., New York

FEATURING BROOKS PHONOGRAPH
Some Interesting and Informative Literature Bearing Upon the Phonograph Made by the Brooks Mfg. Co., Saginaw, Mich. Recently Sent Out to the Trade—Tells of New Model

The Brooks Mfg. Co., Saginaw, Mich., has issued a very attractive large-sized circular devoted to a detailed description of the 1918 model of the Brooks phonograph. This model embodies a number of distinctive improvements over the 1917 design, and in its present form is one of the most attractive instruments that has been offered the dealers during the past six months. The Brooks phonograph has won considerable comment from talking machine dealers throughout the country, owing to the fact that it is the only machine on the market that is equipped with an automatic repeater that plays and repeats any size and any kind of disc records any number of times and then stops automatically at the will of the operator. This is all controlled by means of a small dial which sets, starts and stops the machine, and which will play any desired number up to nine or continuous. The dial is a model of simplicity, and when a record has been played as many times as set for, the machine will stop automatically with the tone-arm suspended in the air above the record. There is no necessity of lifting the needle off the record to change records, as this is done automatically. In operation the needle is lifted from the inner edge of the record, and gently deposited at the outer edge of the record cutting, accurately and perfectly. Other improvements in the 1918 model include a counter-balanced lid support. Large nickel or gold-plated casters replace the smaller ones formerly used. The greatest improvement of the 1918 model, however, is a lever that may be moved with the finger which throws the repeater on or off. When this lever is placed in the off position the phonograph operates the same as the ordinary phonograph, thereby allowing the user to utilize the repeater at will.

The Brooks Mfg. Co., which is one of the country's leading high-grade furniture manufacturers, has a five-acre plot of land at Saginaw. It has been manufacturing the Brooks phonograph for three years, and during 1917 its sales doubled every four months. It manufactures only one size of phonograph, retailing at $45 with the repeater nickel-plated, and $30, with the repeater gold-plated.

A salesman's indifference will discourage the most eager customer.

The Talking Machine Business Most Active in St. Louis

Great Record and Machine Demand—Educating Brunswick Dealers—Value of Window Displays

Emphasized by Columbia Co.—Victor French Course Admirably Featured—Art Models Popular

St. Louis, Mo., March 5.—The talking machine business in this community is as good as the trade in any similar line, records and machines being made up at a material rate. The dealers are making high-water marks of sales where the dealers, jobbers or retailers, have the stock to meet the demands. Even the used-machine dealers report unusually good business. Collections are reported very good from a retail standpoint, although some of the jobbers and manufacturers report that country dealers in some instances are anemic.

Manager Jackson, of the Brunswick agency, is changing the method somewhat of introducing the dealers. The first time Representative McGinnis will, henceforth, spend a longer time with each dealer to better equip him to meet the problems that arise. A good many have had the chance to examine the Columbia signed are now to the talking machine business and the idea is to prepare them to give service from the start. The Brunswick distribution in this district has exceeded expectations, but the only embarrassment in meeting demands has been the freight traffic situation.

One of the recent successes in retailing has been a display distributed by the Columbia Co. These have scored a decided success in bringing to the front the records named and dealers without exception note instant sales. C. H. Salion, Columbia wholesale dealer, says that while there was much trouble in getting dealers to order the displays at first, now they are signing contracts at the earliest possible moment. Mr. Salion, by the way, has finished with the draft board. After waiving all exemption and going in Class I A, he has been sent back to Class 5 because he is too light for his height.

The effort to push the Victor French course created a good deal of interest. The Famous & Babies feature on this fantastic stand has been a feature. Manager Ditzell had obtained the approval of the French Consul on the records before he began his advertising campaign, and when the special days came he had present at the record room the consul and a visiting French airman, both of whom added to the attractions of the sale and gave their best efforts at showing the people that they were good records. An adequate number of records were in stock but later demand cleaned up even what was regarded as reserve stock, but more arrived by the time it was planned to make a second drive on them.

Ben Phillips, for two years retail sales manager for the Columbia Co., has been transferred to the wholesale department and will travel in the north kisside. His early reports indicate that he is taking on his new job. L. Tippen, who came to St. Louis from Pittsburgh, where he was employed by the Columbia dealers, is in charge of the wholesale store at present. The Columbia Co. is planning a rather energetic advertising campaign on behalf of records under the management of Ed Williams and Eddie Brown, who are to be attractions here shortly.

Guy Golterman, the former manager of the St. Louis Symphony, whose plan for reproducing the addresses by President Wilson and other notable by talking machine records, returned from the East a few days ago and brought some of his records with him. These will be produced through “The People’s Forum.” Soon after his return he called a meeting of the local committee, consisting of Homer Bardwell, a local newspaper man, A. L. Conlon, of the Baldwin Piano Co. staff, and himself to try out the records in the public buildings here. Manager C. H. Co., and C. R. Salion, of the Columbia Co., were called upon to accompany the committee and they went to the Coliseum to try the records in the hall, the largest in the city, which in some respects the $20,000 personal can be seated. A $60 horn machine was placed in the middle of the main floor and the records could be plainly heard in all the galleries. Those privileged to hear the records declared that they were a most pronounced success.

President McGinnis of the Silverstone Music Co., Edision jobbers, has gone to France, Wick Springs, Ind., for an extended vacation. He was ordered away from his business by his physician, who declared that the strain of the work had given rise to a nervous breakdown. Mr. Silverstone had been working excessively hard since he began his plans to remove his store to the newly opened warehouses and the delays pertaining to building at present, the constant changing of plans to make the new warehouses more distinct and the trouble of not being able to open the consequent opening plans were too much for him and he was unable to attend any of the opening festivities. When he left here he planned to leave the health resort long enough to go to New York to the Edison jobbers’ meeting and then return there. Before going Mr. Silverstone installed Myron Goldberg, of Philadelphia, as vice-president and general manager of the Silverstone Music Co.

The Artophone Co. reports an excellent retail trade and that the jobbing trade is all that the firm can handle. Among the recent notable shipments was one that went to Chile, putting this comparatively new institution in the ranks of exporters.

The last week in February the talking machine trade in the four department stores was seriously disturbed by a strike of many of the clerks in those stores, who sought recognition of a clerks’ union. While none of the sales folk in the talking machine departments “went out,” the trade conditions in the stores were very seriously disturbed and trade was more or less slack all week, especially the record trade. Many persons would not go into the stores for small purchases while pockons were on duty. The machine trade was less affected as persons seeking to make larger purchases braved the pickets and the ill will of organized labor. The strike did not reach the violence stage.

Late in Febuary considerable interest attached to the window displays on Oliver street of high art models. The Silverstone Music Co. displayed a $1,600 Edison machine, the Field-Lippman Piano Store the Brunswick Italian Renaissance model and the Columbia Co. the $800 model. One of these machines was put into the window without signs and with all doors closed, and it was amusing to stand outside the window and watch the period that it was thus exhibited and hear the specifications as to what it was.

A. H. Curry, an Edison jobber at Dallas, was a recent visitir. He wished to see the local stores with a view of getting suggestions. A recent peculiar circumstance was that Miss Ross Marshall and Miss Bessie Platt, experienced and efficient saleswomen with the Thibes Piano Co. talking machine department, resigned to go into the millinery business. It has been very seldom that the talking machine folk have quit the game to go into something else here. Usually, the talking machine trade draws from other lines.

Making Improvements in Store

Williams-Barker, Pa., March 4.—The Landau music and jewelry firm at 20 South Main street, this city, are making important changes and improvements in their store which will cost several thousand dollars. Recently they closed a new floor of the building for ten years, and plan to install several elaborate Victrola salons on the second floor, and also enlarge their sales and display rooms throughout the building. The Landau firm, which is one of the oldest and most progressive in the State, having been located on South Main street since they began business in 1893, is composed of S. Landau, H. Landau and H. M. Michelsky.

Never mind about the regular way of doing things if you have a better way.

To the Talking Machine Man Who Is Not Selling Pianos—Why?

When Piano Dealers started to sell Talking Machines with so much success, did they do so at the expense of their piano business? NO—the combination proved to be an instantaneous success—each has helped the other

Your business, selling talking machines only, is probably as big as an exclusive business as you can make it. Why not branch out? You can do with Pianos what the piano man did with Talking Machines.

With little additional investment and the same overhead, you can sell Pianos and Player Pianos profitably. Your piano business will help your talking machine business, and you will make more money. For particular address

TEAR OFF THIS COUPON AND MAIL
BUFFALONIANS ARE CROWDING THE RECORD DEPARTMENTS

Impossibly to Supply Demands for Grand Opera Records—H. A. Brennan With Victor Co.—New Brunswick Dealers—Some Changes in Sales Staff—New Patheth Dealers—Sonora Line With Good

BUFFALO, N. Y., March 5—Buffalonians are crowding the record departments of the local stores these days and are clamorng for the latest records. Their enthusiasm is unbounded and their purchasing power seems to fall little short of this standard, but everywhere the oft-recurring report is made: "The supply of records, like the machines, is far less than the demand." Jobbers and dealers say that unless factory output and railroad conditions prove an insurmountable handicap this will be a banner year in the trade. Expanding business in machines and records has caused one concern to seek larger quarters. New dealers are being appointed in the Buffalo territory and the list is to be augmented as the year advances.

It is reported that the recent performance of the Peerless Record Makers in this city has helped the local sale of records materially.

O. M. Kless, manager of the local branch of the Columbia Graphophone Co., has let contracts for new Columbia quarters at 733-737 Main street. There will be two floors, with 10,000 square feet of space. The place will be ready for occupancy by May 1.

C. M. Wall, assistant manager of the Columbia, is spending the greater part of his time on the road. G. B. Stucy, in charge of the Dictaphone, reports that that branch of the business is increasing rapidly, and that he has equipped some of the largest business houses in Buffalo.

Charles Powers, of Neul, Clark & Neul's shipping department, and O. H. Williams, traveling representative of that firm, have joined the colors.

H. A. Brennan has resigned as manager of the Victorola department of the William Hengger Co. to go with the Victor Talking Machine Co. Mr. Brennan successfully reorganized the Hengger Co.'s Victorola business, which in 1917 was the largest in the history of the firm.

J. R. Flynn is manager of the Buffalo branch of the Brunswick-Balke-Collender Co. and Fred G. Eigenbrod is in charge of the Brunswick phonograph department of this branch. These firms were recently appointed Brunswick dealers: J. G. Seeger & Sons, Buffalo; E. W. Edwards & Son, Rochester, and the Kane Furniture Co., Kane, Pa. These concerns, as well as Fress Bros. and Stafford & McArdle, both of Erie, Pa., and the H. H. Roberts Trading Co., Hobbson, Pa., all report good business on the Brunswick.

Arthur Gesser has been appointed a salesman in J. N. Adam & Co.'s Victorola department. W. R. Gardner, manager of this department, will conduct shortly a spring Victrola week. He will be backed by plenty of newspaper advertising and window displays.

In the windows of Denton, Cotter & Daniels are military posters advertising "New Victor rec-ords of popular patriotic selections."

Victor & Co., Pathéphone jobbers, have appointed McNamara & Sharro Pathéphone dealers. This last-named concern is opening an exclusive Pathéphone shop at 335 Elk street, Buf- falo.

Albert Schweger, of Schweger Bros., Vic-trola dealers at 219 Genesee street, is building an attractive bungalow in Butler avenue.

W. D. Andrews, of Syracuse, a member of the firm of W. D. & C. N. Andrews, was a recent visitor.

The H. D. Taylor Co., 99-115 Oak street, is jobbing the Perfection talking machine in Buf-falo and vicinity.

John G. Schuler, Sonora dealer, who received considerable publicity last fall by taking a sen-tational ride in a Curtiss aeroplane, says he in-tends to repeat the performance "as soon as the frost is out of the ground this spring."

The Hoffman Piano Co., a Buffalo dealer, re-ports that embargoes have somewhat lifted and that shipments are coming through more promptly.

J. H. Hackenheim, of C. Kurtzmann & Co., has returned from a Western trip. Roy S. Dunn, representing that firm, is in the South. Lawrence H. Montague, Columbia dealer, has written a new "America," which is being used at the various military camps and by Billy Sun-day choruses.

The Edison is being widely advertised in the Buffalo newspapers. The company is handling the Roach-Reid Co., 316 Mutual Life Building, Buffalo. Goold Bros., Inc., have taken on the Sonora line. This is in addition to the Victor line, which they have handled for some time. The Boston Music Co., of 216 Genesee street, features the Columbia. Harry Fairbanks, pro-prietor of this store, has been a violin instructor in this city for several years. The Verbeck Musical Sales Co. reports active spring business on the Columbia and Delphonon.

INDIANAPOLIS TRADE COMPLAIN OF STOCK SHORTAGE

Business, Both Wholesale and Retail, Very Active—Conference of Pathé Dealers—Stewart Co.’s Big Victor Business—Standke Boosts Brunswick—Ready-File Co.’s Expanding Trade

INDIANAPOLIS, Ind., March 5—Business for local talking machine dealers picked up briskly during the closing days of February and rounded out a good month for most of them. The wholesale dealers report their business as exceedingly good with the chief difficulty being in getting sufficient machines and records from the factories to supply the demand.

W. E. Pearce, of the phonograph department of the Brunswick-Balke-Collender Co.’s branch here, reports that the Brunswick business has been exceptionally good since the first of the year. George McCartney, of Fortville, Ind., is making a record on the number of the higher-priced Brunswick models he is selling.

J. E. Nash & Son, of Franklin, Ind., who also do business in Greenwood and Edinburgh, are showing good results with the Brunswick. Jensen Brothers, who run the Brunswick Shop of Terre Haute, Ind., are figuring on opening a larger store soon.

T. H. Bracken, manager of the Starr Piano Co.’s branch, said that he is looking for a big year for talking machines. Mr. Bracken is planning to push this end of the Starr business this year.

The Stewart Talking Machine Co., distributor of the Victor line, reports that the dealers have been doing a phenomenal record business, and Emerson Knight, advertising manager for the company, says that the national advertising done by the Victor Co. continues to "pull like a team of oxen."

Miss Agnes Fryeberger, of Minneapolis, will come to Indianapolis soon to talk to Indianapolis school teachers on the use of Victor machines in the schools. The Stewart Co. is planning on calling a meeting of its dealers to have Miss Fryeberger, who has written several texts on this subject, address them.

A. H. Snyder, manager of the Edison Shop, does not believe in letting conditions control his business.

"The business is here to be got, just the same as it was before the war," said Mr. Snyder. "But we have different conditions to meet and must adjust our tactics to meet them.

"The dealer who sits in his store and expects the buyers to come in might as well close up his shop. You’ve got to get out to the homes and take your proposition to the homes to do the business." Mr. Snyder has been very successful in working his salesmen in zones in which he has divided the city.

George Standke, manager of the local Brunswick Shop, gave the Brunswick a big boost before the American Club in the Chamber of Commerce. This club is composed of about sixty business men who meet every Monday and each member is allowed a day to boost whatever business he is in. Mr. Standke brought a Brunswick machine to the meeting on his boosting day and the machine did the work in great style. He also gave souvenir calendars away.

M. C. Rosner, manager of the Vocation department of the Aeolian store, said that business picked up during the last days of February, and that the record business had been exceptionally good since the holidays.

The Mooney-Mueller-Ward Co., distributors of the Pathé, are planning to invite their dealers to a conference to be held within the next two weeks. R. B. Goldsby, in charge of the company’s Pathé department, reports that many contracts have been signed in the last month, and that business for 1918 is looking fine. Lambert Bertha, of La Fayette, Ind., has been engaged to assist Mr. Goldsby.

H. A. W. Smith, manager of Pathéphone Shop, reports that February business was normal, and that indications are for a good business.

E. E. Whitman, manager of the Victor and Edison department of the Pearson Piano Co., says that the record business continues unusually brisk while the sale of machines runs only fair during January.

Officials of the Ready-File Co. are highly pleased with the way Edison dealers in convention at New York recently took to the Edison machine ready-files which will be ready for the market soon. The company has been unusually successful with its file for Victor machines.

Ben Brown, manager of the Columbia store, reports that February business was satisfactory. George W. Hopkins, general sales manager of the Columbia Co., visited the store Tuesday.

The Ideal Phonograph Co., Rockford, Ill., has been incorporated with capital stock of $5,000 by B. J. Swanson, John Kinge and M. H. Gustafson.

Three
Styles

Dayton Tone Arms are universal, playing any disc record. Five styles—all good.

Dayton Reproducers are scientifically correct and thoroughly practical. Two styles.

Build satisfaction into your products by using the quality line—Dayton Motors, Dayton Tone Arms, Dayton Reproducers. They will bring you more business and satisfy the most exacting customers.

THE THOMAS MFG. CO., 322 Bolt Street, Dayton, Ohio
STEELCRAFT NEEDLES

"MADE RIGHT TO PLAY RIGHT"

Harry R. Leithold, of the Fred Leithold Piano Co., La Crosse, Wis., wins 100,000 Needles for sending us the "first choice" name for talking machine needles of

"STEELCRAFT"

What influenced Mr. Leithold in submitting the name "STEELCRAFT" was our recent announcement in this publication in which we said:

"To assist in selecting the proper name we wish to state that we will manufacture the best steel needles that can be put on the market. Our process of manufacture will be such as to insure the reproduction of every delicate shading and tone. Continued use of our needles by your customers will mean contented patrons at all times."

"STEELCRAFT" means PERFECTION. This name emphasizes that the Steelcraft Needle is the supreme achievement of modern craftsmanship.

Remember the name "STEELCRAFT" when ordering needles from your wholesale distributors for Steelcraft Needles are "Made Right to Play Right."

Why Grand Opera Artists Are Heard at Their Best Through Talking Machine Records

No greater tribute to the perfection of talking machine record making can be conceived than the remarks of critical purchasers these days when selecting records of noted opera artists whom they have heard in New York, Chicago and Boston, that their records are not only equal to their voices, but in some respects the numbers are sung with a perfection and artistry that even transcends the work of the artists in person on the operatic stage.

This is not surprising, for it is a well-known fact that almost without exception many grand opera stars would rather sing before the most critical audience than before a talking machine. The latter is a critic that records every imperfection, and when the test comes it often tells the story of slipshod work. The grand opera singer must sing 100 per cent. perfect, in making a record, and this is oftentimes impossible on the opera stage. Hence it is that talking machine records of the grand opera artists are so absolutely perfect.

One would think that it is the simplest thing in the world to stand up before a talking machine and sing, and it might be if the singers did not have to use any more care than they do before an audience.

In the first place it is rather uncanny, standing in a big empty room before a mammoth horn protruding from between curtains, with the conductor away up high where he will not interrupt the sound waves, and the orchestra made up in number and instrumental quality especially for this work.

The singer stands on a wooden platform at the mouth of the receiving trumpet. A few hurried directions are given, and then strict silence is the rule. No human voice or sound but that of the singer and the music must now disturb the atmosphere, for the machine behind the curtain relentlessly records every little sound with a fidelity to which no ear can render justice.

A red light is flashed, and the orchestra gets to work. Then at the crucial moment the artist has to sing to this strange little assembly with the same zest he would under the inspiration of brilliant lights, beautiful clothes, splendid settings and an applauding audience. It is an ordeal, because he has to sing with far greater care in front of the talking machine than is required when an audience is to be pleased. The slightest variation means a start-over, a slight clearing of a throat, a deep breath or slight shuffle of the feet—and the revolving discs record every one of these faults—and the record is spoiled. But these faults are all criticized by an experienced record-director, and it is his business to see that nothing short of the perfect records are produced—because from these first moulds are made all of the thousands of records that go into so many homes.

When the artist has finished, the record is played over and the imperfections criticized. The weak spots are rehearsed, and the whole trying business commenced over again. And so it is acknowledged by many of the operatic, concert and music-hall stars that to produce a record of pure and distinct tone is far harder than to make their way successfully through a whole operatic score. It is a tremendous task to get a set of the perfect records from the opera favorites. It has been said that Caruso has been forced to spend over four hours of unremitting work before he was able to perfect his "Ridi Pagliacci" in the opera of "I Pagliacci," and in that time was forced to make over thirty fresh starts before a disc of pure and distinct tone was obtained. This may be fiction, or extravagance of statement, but every operatic artist, whether Caruso or Mme. Galli-Curci, knows that when they make records they are singing to millions rather than to the thousands in the opera house, and the most particular pains are taken to have them right absolutely perfect.

EXPANSION OF DELPHEON BUSINESS

Sales Manager R. W. Gresser Says That the Business of the Delphphon Co. Has Tripled in Volume During the Past Two Months

Bay City, Mich., March 5—The Delphphon Co., of this city, manufacturer of the Delphphon phonograph, is making rapid progress in all parts of the country, and R. W. Gresser, sales manager of the company, states that the Delphphon business has practically tripled itself in the past two months. It has grown so rapidly that the company is only able to barely keep up with the demand, and it seems as though immediate preparations to provide for adequate expansion are imperative.

Mr. Gresser states that the company is in a better position to do this now than a year or even six months ago, as the work in the factory is now thoroughly systematized, and it is possible to turn out the completed Delphphon phonograph with far less work than before, and on a far more efficient basis.

Orders are being received daily from the Delphphon distributors in the South, and, judging from their reports, there is an era of stability and prosperity in this section of the country.

Foreign Records, too, at Grinnell's

WE HAVE A LARGE STOCK OF ALL THE FOREIGN RECORDS

Those of foreign birth, irrespective of country, are, almost without exception, music-lovers, and if there are such in your territory you are missing a fruitful source of added business and profits if you are not provided with vocal selections in their own tongue or instrumental music characteristic of the country from which they came.

Glad to go into this matter with you further and give you fullest information regarding any and all details.

Grinnell Bros

Distributors Victrolas and Records
First and State Streets, Detroit

You Should Have a Stock of the Marconi-Victor Wireless Telegraph Records.

They meet a present, and very great demand—they provide a service that is not only unique but of definite value to the country—they demonstrate your up-to-dateness and up-to-dateness—they afford another source of profit for you.

No better time to order them than TODAY!
MAKING TOUR OF WHOLESALERS

W. P. White, Manager of Wholesale Victor Department of Thomas Goggan & Bro., Houston, Tex., Making a Most Interesting Trip

A recent visitor to New York was W. P. White, manager of the wholesale Victor department of Thomas Goggan & Bro., Houston, Tex., who is at present on a tour that is taking in the principal cities east of the Mississippi. Mr. White is devoting his efforts to calling on Victor wholesalers, and negotiating the purchase, sale or exchange of surplus stocks, and is meeting with an excellent measure of success. On the way to New York he called on a number of Southern jobbers and also visited the Victor factory. He also called on the trade in New England, and on his way home will visit Pittsburgh, Cleveland, Detroit and nearby cities.

Mr. White, who took charge of the Goggan department about a year ago, was before that time connected for some months with the traveling sales department of the Victor Talking Machine Co., covering New England, and thus has an excellent knowledge of the problems of both the Victor wholesaler and the Victor dealer.

TO AMEND PERSONAL PROPERTY LAW

Bill Now Before State Legislature Provides for Cash and Installment Prices Being Shown

A bill has been introduced in the New York State Legislature by Assemblyman H. W. Smith to amend the Personal Property Law in relation to displaying the selling price on goods sold under contract or conditional sale. The bill (Assem. Int. No. 537, Pr. 580) adds new Section 68 to the Personal Property Law providing that a conditional vendor who displays or exhibits goods to be sold under conditional sale, shall attach to such goods or chattels, samples or samples, in a conspicuous place, a statement of the selling price for cash and under conditional sale. Violation is a misdemeanor.

PERFECTION FLEXI-TONE reproducers fitted to Edison machines only

These reproducers and arms are the very finest made mechanically. The PERFECTION FLEXI-TONE reproducers, as they can be attached to the joint that is being sold with the machine for playing those records.

16-18 Beach Street
Boston, Mass.

Will you spend three cents to get rid of that vexing sales problem? That's all the expense necessary—a letter to the Columbia Dealer Service Department will bring you the answer you need.

Columbia Graphophone Co.
Woolworth Building, New York

L. M. COLE WITH GIBSON-SNOW CO.

Appointed Eastern Representative for New York State Distributors of Sonora Line

L. M. Cole, the "Sonora Man," whose well-prepared booklet on phonograph merchandising received favorable comment from the trade some months ago when Mr. Cole was manager for John G. Schuler, Buffalo, N. Y., prominent Sonora dealer, has been recently appointed Eastern representative for the Gibson-Snow Co., Inc., New York State distributors for the Sonora line.

Mr. Cole's thorough knowledge of the Sonora line ideally equips him to render valuable and efficient service to the Sonora dealers in the territory he will visit, and there is no doubt but that his previous retail experience will stand him in good stead in his present post. The Gibson-Snow Co. is planning an aggressive wholesale campaign, and judging from their business to date, it will be productive of excellent results.

INCORPORATED

The Bolway Co., Inc., Syracuse, was incorporated in Albany, N. Y., last week with a capital stock of $40,000 for the purpose of dealing in sporting and athletic goods. Those interested are F. E. Bolway, the well-known phonograph jobber, of Syracuse; A. W. Fielder, New York, and E. V. Powell, Chicago.
Ohio Talking Machine Dealers Hold First Annual Banquet

CLEVELAND, O., March 4.—The first annual banquet of the Talking Machine Dealers' Association of Northern Ohio, Hotel Winton, the evening was held, was witnessed by representatives from the European War. The attendance was representatives of several out-of-town men prominent in the talking machine business being guests.

The "messages" from the Victor, Columbia and Edison factories delivered by representatives of these big producing plants were stimulating and assured retailers that the manufacturers are not discouraged but will drive straight ahead turning out machines and records as fast as physical conditions will permit.

Charles K. Bennett, general manager of the Eclipse Musical Co., qualified as president and acted as toasting master. The other officers installed are: First vice-president, A. W. Roos, of the Columbia Graphophone Co.; second vice-president, Elsie E. Bier, of the M. O'Neill Co., Akron; secretary, James G. Card, of the Lakewood Music Co.; treasurer, A. L. Maresh, of the Mackay Music Co.; and assistant secretary, E. R. Lyon, of the Eclipse Musical Co.

Mr. Bennett will not announce his standing committees until the March meeting of the association. These are: committees on Wednesday of the month.

There was a splendid menu of catables and popular patriotic songs, in which the diners joined, helped to put every one in good humor.

Presbyterian Review, Conditions

President Bennett spoke the speech-making with an excellent address, during the course of which he said:

"I cannot help but feel that we all have been well repaid for our efforts in organizing this association, and which. I am quite sure will develop into one of the strongest and largest organizations in the country, first, because we have represented here merchants from all over this State showing the spirit and desire to cooperate for the good of the business, and secondly, because we have a great number of large cities and all within a comparatively short distance of each other, thus making it possible to have these get-together meetings frequently.

"I am strongly impressed that it is the intention of each individual member of our organization to keep his shoulder to this wheel of progress and do his bit and part to spin the pottery, many stores looking towards the uplift of the business, and as President Hart, of the local Mus. Trades Association, said the other evening, 'the more open frankness and the better acquaintance we have with one another the more satisfactory will be our business,' and I wish to urge that we adopt this slogan ourselves."

Many Changes Due to War

"It has been necessary for us to make a great many changes in our business as well as our social life during the past year, and undoubtedly it will be necessary for us to make others in the future, but in no case has the Government interfered with our business, because Mr. Wilson has no intention of doing so. If anything, the President has made our business better because he fully realizes that music is one of the most, if not the most, essential in developing and keeping up the morale of this army and navy, we are now building. Music is, therefore, in more demand to-day than ever before and that in a manner accounts for the scarcely machines and records, and with but few exceptions every dealer here to-night showed an increase in his business over 1916. However, he did not come anywhere near supplying the demand that was made upon him.

"The war has opened up a world of new machine and record prospects, as we read in the papers that nine billions of dollars are to be distributed among the working people in the United States this year in return for their labors. These same workers in the past never hoped to be able to earn more than $15 or $20 per week, but are now earning $35 and upwards. These same laborers never even dreamed of such a condition and so shaped their lives to live within the $15 limit. To-day, with the prosperity they are enjoying, they do not know as a matter of fact just how to spend this money, and saving is almost beyond their imagination. They do not enjoy the fine luxuries, such as fine homes and fine clothing, and outside of the larger cities, they find it difficult to secure announcements such as theatres, and the 'boost' question is being carried to a most marked degree. The conclusion, therefore, is a very plain one.

"This new field open to us now is that section in the mill and fable districts. These work-ers are now for the most part of the laboring class. They are plentiful, and like my old boss used to tell us boys on the road, 'the proposition is just like gold mining, you have got to dig it out'—and so it is you must dig out these fellows who are making salaries, and you will flatter them, offering them the popu-lar-priced machines as well as to offer the service of your up-to-date store. I could keep on enumerating a lot of ideas that could be worked and given serious thought; however, just take this little tip and go after the working class; you will find them ready buyers and quite liberal spenders."

Thos. H. Davies' Poem Letter

Following Mr. Bennett, Thomas H. Davies made a short address flavored with lots of good humor along the line of existing machine and record shortages. He closed with this poem:

Aerothery has now passed by,

The future grass was all a sigh.

When 'er machines we try to buy,

The shortage reaches to the sky.

It starts at us as we pass by.

All we can say is, me, oh my.

The jobbers use 'er old excuse,

And make us all feel like the dour.

They tell us all there is to do.

To pester them, they don't produce

There say they are all a bust.

But that mistakes keep going West.

They told us this a year ago,

And we all thought that it was so.

We dealers do not want to grow.

We all have made a lot of dough.

Machines come slow but they're good.

Let's hope it will be ever so.

And as we get down to facts,

I'm sure we all agree,

We're lucky that we're living

And in a land that's free.

Our business has been very fine,

Let every one keep this in mind.

We've all made money in the past,

Now is the time we must hold fast.

Our ship is in a heavy storm.

Our duties we must perform.

Let's help each other this year through.

That is the least we all can do.

A. W. Roos was the next speaker and he dwelt briefly on the efforts to be made during the coming year along the line of preserving the present high merchandising ethic of the talking machine retail business.

"A Message From the Victor Factory"

Henry C. Brown, in his "Message From the Victor Factory," declared the ladies are largely responsible for the great demand for talking machines and music. He drew a picture of the early days of talking machines and said the Victor Co. will continue to do what it has done from the start—and dealers in building up the business and placing it on a high basis.

"There is no limit to our business," said he. "Talking machines have added much to the life of our people; they have added both pleasure and profit to the world. Before the advent of talking machines the voices of the world's great singers died when they passed away. We have no way of comparing the voices of artists now dead with those of the great living singers, but the talking machine and its records have made it possible to preserve the human voice, so that when its owner dies posthumously it will be able to make comparisons between the singing and playing of living and dead artists.

"Before the advent of the talking machine the great artist was silent forever after his or her life was done. Now their efforts are preserved to posterity, like the sculptor's or the painter's.""

"Our business is one of the greatest in the world. We should look at it from a high viewpoint. There is no place in our ranks for the fellow who gets discouraged." "The Victor Co. is probably the largest adver-

(Continued on page 32)
Father Finn’s Paulist Choristers are taking the country by storm; their New York appearance was a triumph. Are you among the many dealers who are sending in repeat orders for their exclusive Columbia records? A new one in April that will go big.

Ohio Talking Machine Dealers Hold Annual Banquet

(Continued from page 31)

Stirrer in the world and we expended on publicity much more than $2,000,000 last year and are going to keep right on spending in 1918. I believe in uplift advertising. We are doing it and we are going to keep on doing it. We are optimistic at our headquarters and are trying to spread this optimism over the country. We are appropria-
ting as much money for publicity in 1918 as we expended in 1917. We are going to give you the same support we did last year and want your co-operation.

“We gave you more goods in 1917 than you got in 1916,” said he. “We are going to keep right ahead giving you goods as long as it is physically possible to produce machines. No man can forecast the future cost of goods. Labor, raw material—everything—has advanced and is going higher. The price of some articles has jumped 1,600 per cent. We have solved prob-
lems as they came before us and will continue to do so.” He cited an instance where repre-
sentatives of the Victor went to a big brass cen-
ter to get materials with which to build machines. They were able to get the materials but could not get them accepted by the railroads. Trucks were bought, automobiles hired, and the goods transported 250 miles in this manner to the Cam-
den factories.

In referring to current shortages Mr. Brown said:

“The higher ups set the pace for the buying of talking machines, and naturally when the better classes buy machines the lower classes fall into line. The Victor people could vastly increase their sales if they lowered their prices and put forth an inferior grade of products, but we will not do this. Every machine that leaves our factories is tested. We invite honest competition, but we have no use for the thief in the dark. It is up to you to defend and stand by the merchandising principles which have made your business what it is to-day. We will protect dealers and the trade as far as we can, if the Federal Government will aid us.”

Mr. Brown also explained the needle shortage, and described the Tungs-tone stylus and its par-
ticular merits. He explained that the taper point of the ordinary steel needle wears away so that it does not fit down into the groove, while the point of the Tungs-tone is of the same diameter its entire length, and wears away evenly and thus al-
ways fits into the groove. He recommended the use of the Tungs-tone stylus as it will help re-
bate the needle shortage.

George W. Hopkins Talks on Salesmanship

George W. Hopkins, general sales manager of the Columbia Graphophone Co., who was scheduled to drive a “success from the Colum-
bia Factory,” really delivered a most inspiring address on salesmanship, in which line he ranks as an expert. In opening his remarks Mr. Hop-
kins declared that the heart of Columbia em-
ployees, each and every one of them, is in the company they serve.

“I went to accept the resignation of a certain man,” said Mr. Hopkins, “but when I saw a card in his office reading—‘To hell with yesterday—what’s doing to-day?’ I did not ask for the resigna-
tion, believing that this employee was de-
termined to overcome everything in his path. This typifies the new spirit in the hearts of Columbia employees. We are seeking to put the buyer in the picture with Columbia Grafonolas. If a buyer is in a snap shot with a machine the buyer is in the picture.

“A retailer can start two ways—right or wrong. The phonograph business is different from other lines. Retailers, or many of them, must learn how to merchandise their wares properly in an honest-to-God way.

“It is unfair not to charge interest on instal-
ments. The each buyer should have a discount
equal to the interest on instalment payments.

“The human eye is a finane committed in seeking selling goods. In too many stores goods
are not changed about. You find the same old thing in the same old place from day to day and the result is that no attention is paid to such displays. The ways of our grandfathers get us nowhere in business to-day. We must learn to look out—out in. We should get out and talk business methods with other men to get their viewpoint and swap ideas. When two men swap dollars each has what he had be-
fore, but each has an idea. When each swap an idea each has two ideas instead of one.

“We are apt to look too much at big—
and not to watch the small affairs in our business. We have many little details and small
matters which should have our attention. The best advertised line of goods in the world can easily be dunned by clerks and salesmen who have been offended.

“I would like to see each and every retail store re-
 sponsible for the store. Place these men on
their merits and their mettle. I would impress
upon this class of help why I engaged in busi-
ness and endeavor to have them look at the re-
sults through my eyes and with my ambition to
cucceed.

“If Tom, Dick and Harry were my clerks I would give each one of them an opportunity to run the store. Each would vie with the other in
seeking new ideas, new ways to dress shop win-
dows, etc. In a short time this trio of clerks would be exhibiting wares with clerks all over the city and gaining ideas to build up my busi-
ness. It pays to make thinkers and originalists out of mere clerks behind the counter.

“I would pass from clerk to clerk when patrons were in my store and offer suggestions which would make the clerks know that I was personally interested in pushing their sales. I would impress my personality on every patron when I could.

“Don’t play your game the way the other fel-
 lows play it, for he will beat you; play it a new way, one of your own. Six months is the usual
life of a talking machine, so it is up to us to find a way to prolong this life—that is, give the
machine a new lease on life by offering buyers records which reproduce the proper music—melodies that are wanted. The better-grade music, if reproduced at the psychological mo-
tion in trying to make a sale, will start a pho-
notograph on a new lease of life.

“Soldiers want music, yet wherever I go I hear pleas for cigarettes for our boys—but seldom a plea for music.

“We will have more failures than ever this year. The rich will buy less, but there is another class making war wages that must be taught how to buy. The fellow who up to now has not spent a dollar now knows how really how to buy. The two great themes for our educa-
tional propaganda are “What to buy” said “How to buy.” By advertising the advantages of buy-
ing a talking machine we will educate the greatly enriched laboring class to long to own a talking machine. In other words, teach them what to buy. By advertising how to buy a talking machine we will reach that class whose income has been cut down by the war and who therefore are now interested in spending judi-
ciously and with good reason, where heretofore they spent freely and without special thought.”

William Maxwell Discusses Non-Essentials

Owing to the fact that he was called upon to attend the annual convention of the Edison Disc Choristers’ Association in New York, William Maxwell, vice-president of Thomas A. Edison, Inc., was unable to be present at the local ban-
quet as expected, but sent a paper, which was read by President Bennett. After a character-
istic introduction Mr. Maxwell, in his paper, launched into the discussion of the question of non-essentials and said therein:

“A while back there was quite a number of prominent gentlemen who were pulling long faces and urging that the manufacture and sale of non-essentials be discontinued. A great deal of time was devoted to the preparation of a list of non-essentials. Finally, however, it was discov-
ered that nobody knew what a non-essential really is. I understand that one gentleman said the only non-essential he could think of was lager beer. I do not know why he did not in-
clude Bourbon whiskey. Perhaps he is a man who packs a flask on his lip. Another gentle-
man thought that maybe perfume was a non-
essential, but we married men who are familiar with the secrets of feminine toilettes know that perfume is regarded in certain quarters as quite essential.

“The dollar-a-year man and others who were railing against said non-essentials ap-
parently did not get very much encouragement from President Wilson. Mr. Wilson intends to

The spirit of cheery confidence, in spite of what all the preachers of melancholy from Frank Vanderlip down may say, has been our great national asset during the war.

"Happily for the nation, many of the 'preachers of melancholy,' if that is the name to call them, have experienced a change of heart. It is no longer quite so popular as it was to preach the wretchedness of business as an aid in winning the war, and I do not think the national instrument trade needs to fear any drastic action on the part of the Government. The musical instrument industry, as an act of patriotism, stands in readiness to take a back seat to war industry whenever it is necessary. As soon as the freight tangle is straightened out I believe we can look forward with absolute confidence to a year of unusual prosperity. We must not forget, however, that conditions are somewhat changed. The purchasing power of the country has been shifted around considerably. At least 9,000,000 families are better able to purchase phonographs this year than they were last year. Opposed to these are several hundred thousand families whose purchasing power has been reduced. It is up to the retailer to get in touch with his share of the 9,000,000 families to compensate for his share of the several hundred thousand families.

"Retail business depends upon the earnings of money makers. The 1910 census showed that at that time there were 30,000,000 male money makers in this country and that there were 8,000,000 female money makers. Of these 33 per cent. were engaged in farming; 2 per cent. in mining; 28 per cent. in manufacturing and mechanical industries; 7 per cent. in transportation. In other words, about 70 per cent. of the money makers in this country are making more money than they ever made before, and, when I say making more money, I am talking in full account our old enemy—the high cost of living.

"I do not think I am naturally an optimist. But I can say to you gentlemen that, in my opinion, nothing short of some great calamity

Annual Banquet Talking Machine Dealers' Association of Northern Ohio, Hotel Winton, Cleveland

At Speakers' Table, Left to Right: C. B. Grinnell, A. W. Root, G. W. Hopkins, Louis Meyer, Retiring President of Association; Charles F. Kipfer, New President of Association; Henry L. Brown, Lew Halff, President Pittsburgh Talking Machine Dealers' Association; Thomas H. Dexter and J. Raymond Hall.

Ohio Talking Machine Dealers Hold Annual Banquet

(Continued from page 32)
kind of civilization we have in this country. In America food for the body is only a little more important than food for the mind. Next to religion music is the greatest mental solace. Everyone of you members of the association ought to be proud you are in the musical instrument business and you ought to be insistent if anybody hints that music is a non-essential. We are going to win the war and we are going to make every necessary sacrifice, but the President of the United States, in my opinion, will do his best to see that no unnecessary sacrifice is made. I have confidence in his wisdom and the sincere belief that he possesses the courage of his convictions at all times. I am not a Democrat, but I take off my hat to Woodrow Wilson, the greatest of all Democrats and perhaps the greatest of all American statesmen.

J. Raymond Bill's Address

J. Raymond Bill, associate editor of The Talking Machine World, spoke in part as follows: "My sole message is to enter a plea that we music men of America bend every effort toward making our nation intensely optimistic. No doubt mistakes have been made at Washington, but many of the errors have already been rectified and if the next six months are characterized by as much forward progress as the last six months have been, Uncle Sam will be in line for hearty congratulations.

These days it is important to look at things from the very broadest viewpoint possible, if we would not have our enthusiasm sapped by that worst of parasites, pessimism. Viewed with regard to the immediate present, the fuel shortage, the rail congestion and the non-essential bugaboo might have offered grounds for alarm. And yet we all know mild weather is the certain solution of the fuel and transportation problems. During the last two months, moreover, those in close touch with Washington have seen a definite knockout delivered to the non-essential bugaboo. Banker Vanderlip, chief exponent of what I choose to term irrational economy, has subsided to California where, let's hope, history will repeat itself in that California will not be heard from for some time. Along the same line, I would call attention to two articles appearing in the February issue of The Nation's Business, the official organ of the United States Chamber of Commerce. One article is by Dr. Garfield and the other by Mr. Hoyes. Both are important figures in the National Fuel Administration and both in their articles directly refute the idea that there is anything as a non-essential. It, therefore, remains for us of the music industry to convey to the consumer public the common sense attitude that now prevails in official Washington.

"There are many other signs of a highly encouraging nature. Take, for instance, the practice of the modern army. It has been definitively established that the soldiers cannot and will not endure the fearful waiting periods of modern warfare without relaxation. The generals have found that army morale seriously deteriorates when the men are favored with only the so-called essentials of life—food, raincoat, lodging. The military experts have found the modern man is not a savage and that his list of essentials is somewhat longer. To-day we, therefore, find theatres, reading matter of all kinds and music have joined the colors both with the American Expeditionary Force abroad and with our troops in the national canteens at home. Three things, which one not versed in human psychology might imagine unnecessary, have proven to be in fact bulwarks of army morale. And if the fighting forces can't do without these things, it is folly to imagine the great civilian populace will dispense with such obvious life-essentials.

"I do not hesitate to predict that the music industry will come sooner or later to be recognized as a war industry proper. In the meantime, as I see it, our slogan might well be 'Cheer Up, America' and our purpose, if the ladies will pardon the reference to Sherman, might well be to show Germany that Uncle Sam can fight to victory and at the same time endure the hell of war with a smile on his face."

What Pittsburgh Dealers Have Done

French Nestor, scheduled to tell about what has been accomplished in Pittsburgh by the dealer association in that city, could not attend, and Leo Hall, president of the Pittsburgh Dealers' Association, spoke in part as follows: "First of all we got together and got acquainted—both with each other and with each other's problems. We learned to call ourselves and our mistaken methods by their right names. We canned the spirit of antagonism and retaliation and instituted instead a real honest-to-God desire to help each other in trade matters, to build up clean methods of advertising, etc.

"All that we have accomplished or hope to accomplish we attribute solely to getting started right and to maintaining the closest possible friendly relations, to frank discussions in open meetings, and genuine desire on the part of all members to keep conditions and competition clean. Do we believe in competition? We do. We believe in more business just as strongly as in better business and we have religiously avoided from the start any ruling or policy that would limit members. We favor complete freedom to formulate and carry out one's own sales policies and to advertise them in his own way —so long as the essential principles of fair play and trade betterment are observed.

"It is our policy to encourage initiative and 'pep' of whatever variety or kind.

"True, we believe in co-operation for trade building, but we realize success of the individual merchant depends solely on his own individual effort, energy and foresight. We do not jolly ourselves into believing that our association guarantees us continued prosperity, unless each member puts the right amount of effort and energy into conducting his particular business.

"We believe in music as a prime human necessity. We believe absolutely in the future of the talking machine industry, because the talking ma-[Image 0x0 to 761x1098]
choline and records to-day are the most convenient and satisfactory form of music for the average American, and for this reason the peak has not been reached for a long time. More talking machines and records will be sold this year than ever before provided they can be produced and sold under proper conditions. The dealer who lies down is on the wrong track. If certain machines or records cannot be procured, he may as well close out the business type that can be procured.

An important change coming out of the war conditions is the development of higher service standards. In the future the retail merchant must be prepared to give more studied attention to the actual helping and assisting of his patrons—rendering a distinct service value wholly beyond and outside the article of merchandise delivered. The customer is rightfully entitled to this form of helpfulness in return for money spent through the dealer.

"We believe co-operation should not be confined to separate districts. We believe districts should co-operate. For example, there should be closer co-operation in trade matters between Pittsburgh, Cleveland, Buffalo, etc.

"Organizations of this kind in important centers should encourage the formation of smaller local associations to co-operate with the central organization."

C. H. Grinnell Talks on "Value of Co-operation"

The next speaker on the program was C. H. Grinnell who made a special trip from Detroit, and who was one of the forty-two leading dealers of talking machines in the city of Detroit and Highland Park.

"To say that the association has been a tremen-
dous success for good among the members of the talking machine dealers would be putting it mildly. In my judgment the one great cardinal feature which it has accomplished above all others has been the personal element which has been injected into the business.

"Previous to the organization of the association the various dealers, located at their several stations throughout the city, were practically unknown to one another and as a consequence irritation was very common among them and many times they were fighting with one another. After a period of two years this heretofore disturbing element has been entirely corrected. By the monthly meetings friendships have been formed between the various dealers and in many instances the prefixes of Mr. have been entirely disposed of and John meets Frank and Frank meets Bill.

"More could be said on this point, but why should I continue lest I be called presumptu-
ous?"

"In passing I wish to mention some of the special things which the dealers of Detroit feel have been accomplished through the efforts of the association. There has been a noticeable shortening of time of the life of contracts which are now secured upon talking machines. The approval business has been helped tremendously. Previous to the organization of the association it was not uncommon for records to be out for at least seventy-two hours. Through the concen-
trated efforts of the association at the present time twenty-four hours is a maximum and prac-
tically all the records take the form kept by the various people who avail themselves of the approval privilege.

"Further, the association has encouraged the circulation of catalogues which are small and the returning of small record orders, thus cooperating with the United States Government in this world-wide war for democracy's safety.

"Records upon a Saturday and days preceding holidays has been entirely dispensed with and the ten days preceding Christmas of the year 1917 no records whatsoever were sent out on approval.

A departure from the old-established preced-
ent previous to the organization of the talking machine associations, has been impossible to have accomplished—the upholding of the interests of those contracts has been gener-
ally complied with. Previous to the organization of the association it was found that department stores failed to recognize the import of the inter-
est loss. Since the advent of the association they have refrained from buying from newspaper ad-
vertising, bills, cards, etc.

"In conclusion, the one great thing that has been accomplished by bringing the different dealers together is an extremely kindly feeling for one another. Honest differences that were practically impossible to adjust previous to the organization of the association are now ad-
justed to the satisfaction of all concerned."

Send Protest to President Wilson

V. W. Moody was called on for an impromptu report on what the dealers' association in Buffalo has accomplished, and following this a telegram was sent to Woodrow Wilson as follows:

"To His Excellency Woodrow Wilson,

"President of the United States,

"The Talking Machine Dealers' Association of Northern Ohio, assembled at their annual meeting at the Hotel Win-
ton, raises a voice of protest against the ruling of the Justices Court, prohibiting the recording of Bohemian, Pol-
ish and Slovak airs, on the grounds that the above-men-
tioned people are an alien enemy.

"These unfortunate countries, especially Bohemia, have sent thousands of volunteers to the Allied armies to join in the fight for freedom, from the tyranny of the Hapsburg dynasty, so that the whole world will have everlasting peace.

"The Slavs in America, as records show, are the most honest and peaceful citizens. This law may create unrest and bitter feeling if enforced.

"Therefore be it resolved, that the Talking Machine Dealers' Association of Northern Ohio pledge our loyalty to the republic, and protest against any law or measure that may put a foot upon the face of liberty and freedom of the world."

Those Who Attended

Among those present at the banquet were:
Mr. and Mrs. T. H. Towell, Mr. and Mrs. P. J. Towell, Mr. and Mrs. C. K. Bennett, Mr. and Mrs. E. B. Lyons, Mr. and Mrs. Jack Kennedy, Mr. and Mrs. Norman H. Cook, Arthur Donald-
chine World, New York; Mr. and Mrs. Louise M. Meier & Sons, C.; R. B. Carna-
han, Carnahan Music Co., Ravenna, O.; T. A. Davies, William Taylor Sons' Co., Cleveland; William Bowle, and the Misses Home, Terry & Wilcox, E. Dreher's Sons Co., Cleveland; George C. Willie, George C. Wilkie Co., Canton, O.; Jerry Fraiberg, H. Friberg & Son, Cleve-
dland; J. A. Bartholomew, Ashbakla Phonograph Co., Cleveland; W. E. kittenger Co., Cleveland; J. H. Gunn, Columbia Graphophone Co., Cleve-
dland; Mr. and Mrs. Arthur Leopold, Leopold Furniture Co., Cleveland; W. Buescher, and Ed-
Buescher, W. H. Buescher & Son, Cleveland; Frank Cerne, Cleveland; J. J. Fedderman and Mr. Zinner, Cilton Furniture Co., Cleveland; C. A. Yates, Cleveland; R. E. Herscher, Cleveland; J. A. Tucker, Phonograph Co., Cleve-
dland; James Card, Lakewood Music Co., Cleve-
dland; Grant Smith, Euclid Music Co., Cleveland; Mr. and Mrs. A. L. Marsh and Charles Marsh, Mar-esh Piano Co., Cleveland; Philip Dorn, Col-
ister & Sayle Co., Cleveland; C. C. Lipstro, Cleveland; F. C. Enoch, Carey, Jackson & Enoch, Parkersburg, W. Va.; W. L. Kellogh, Whitney & Currie Co., Toledo; A. Smerda and Frank Smerda, Smerda's Music House, Cleveland; Miss Johnson, Taylor Co., Cleveland; Mr. and Mrs. George C. Robinson, Steubenville, Miss Verna Schaefer, Steubenville; Miss Kittinger and Miss Wornell, William Taylor Sons Co., Cleveland; Mr. and Mrs. Curry, Hilliard & Curry, Wads-
worth, O.; Mr. and Mrs. Norton, Wadsworth, O.; Miss Decler, V. W. Moody and O. L. Neal, Neal, Clark & Neal Co., Buffalo; Mr. Switzer, Caldwell Piano Co., Cleveland; Joseph Phillips, Biro & Mr. Dow, Massillon, O.; Mr. and Mrs. Frank Weigand, Barberton, O.; Miss Groth, the Bailey Co., Mr. and Mrs. C. H. Ken-

The Bliss Reproductor

Will Play All Records

A new superior and scientifically con-
structed sound box—no mica, rubber or cork used.

Beautiful full, rich tone quality, clear articulation. It individualizes each voice and instrument in the record. Greater volume with lighter needles, thus minimizing wear on records.

A demonstration of the Bliss reproductor means a sale—each sale brings another, for every music lover who hears the Bliss reproductor wants one.

Comparative tests solicited. Write today for dealer proposition.

WILSON LAIRD PHONOGRAPH CO., Inc. 29 West 34th Street, New York City

Canadian Distributors: HAWTHORN MFG. CO., 145 Yonge St., Toronto, Can.
Philadelphia, Pa., March 6—The talking machine business in Philadelphia during the month of February has been as good as could reasonably be expected, from the general condition of affairs. It was hardly as good as February a year ago, but then this country had not entered the war, and the February of 1917 was an exceptionally good month, and the question of meeting war demands did not enter into the situation, tending to curtail the output.

During February the Victor Co. have delivered a fair percentage of the machines ordered, but they have been shy on records, and many of the most popular sellers have been hard to obtain, and therefore the amount of business has been somewhat curtailed. The freight situation has eased up a bit and the jobbers and dealers are getting out their goods very much more satisfactorily.

Larger Quarters for Geo. D. Ornstein & Co.

George D. Ornstein & Co., recent retailers and jobbers of the Victor talking machine, who for a brief period were located at 9 North Eleventh street, have taken very large and commodious quarters at the southeast corner of Eleventh and Chestnut streets, where they will occupy the second, third and fourth floors of that large and spacious building. They began to move in the past week, and are having the place shelved and will have as much floor space for the handling of machines and records as any firm in this city. The offices of the firm are on the second floor, and they will have fine elevator service.

Two new Victor dealers in this city are Theodore Presser, the big music publisher, and the Estey Piano Co. at Seventeenth and Walnut streets.

Busy Times With Columbia Co.

The Columbia Graphophone Co., at 210 North Broad street, report that their business has been remarkably good for the past month. During the early part of the month they were pretty well tied up with freight embargoes, but this was lifted, thereby enabling them to get records from the factory in sufficient quantities to keep the dealers supplied, especially with the popular sellers. Machines from the Columbia factory have been coming through in fairly good volume. Among the visitors at the company’s offices the past week was F. K. Pennington, assistant general sales manager of the Columbia Co.; W. A. Quint, of the office force, has enlisted in the navy and has been sent to Fort Trumbull, New London, Conn.

Solving the Freight Problem

J. E. and W. H. Nace, Columbia dealers at Hanover, Pa., took the freight troubles by the horns the past week. They came to Philadelphia with four automobile trucks, loaded them with Columbia machines and records and returned home. The only trouble they experienced was the running short of gasoline, one puncture and one blowout. The drivers of the trucks were W. H. Nace, Allen G. Nace, George T. Adams and C. B. Myers.

Sell Records

If Victor dealers will adapt themselves to war conditions by pushing the sale of the higher priced records, it will be possible to do the same cash turnover with a numerically smaller stock.

Good Report From the Louis Buhen Co.

Louis Buhen, of the Louis Buhen Co., Inc., states that his business in February was very satisfactory on the whole, but showed a loss against February of 1916, due entirely to their inability to secure goods from the factory. "The record supply question," Mr. Buhen says, "is very serious at present, and it has been almost impossible to secure the most popular of the records. Machines in February came through on a par with last year." Mr. Buhen does not believe that conditions will improve to any great extent during the spring and summer, owing to the supply and manufacturing situation.

Among the Buhen visitors the past week were Leon Wittich, of Reading, and Mr. Kleinhaus, representing the Werner Co., of Easton, Pa. Edward J. Elias, of the Buhen sales force, who recently enlisted in the navy radio service, has been transferred from the Navy Yard here to the Marcus Hook station, where he will be in charge of the wireless plant.

Good February for Penn Co.

February was the best month the Penn Phonograph Co. has ever had, "strange as this statement may seem to the trade," said Mr. Barnhill, but it was due to a condition, the stating of which would reveal a trade secret. Mr. Barnhill states that business looks very promising for March.

Charles A. Reed, who has a large talking machine store at 321 North Fifth street, has put in two new hearing rooms, and otherwise improved his store.

Minnie M. Hart, of Chester, Pa., has just opened a new store and fixed it up with new booths, and had a very satisfactory opening a few days ago.

At "The Home of the New Edison"

Blake & Burkart, "The Home of the New Edison" in Philadelphia, are very much elated over the business they do here in February. "We are going at it strong this month," says Mr. Blake. "Machines and records are coming through very well, except the delay in shipments." If the delay should continue they are contemplating bringing the goods here by auto trucks. They have placed an attachment on the Edison machine in their store which is called the C and E.

(Continued on page 58)
Four words only of the English language end in CION.

But EVERY sale of a Victor Record ends in COIN.

So we can create "Record-coin," which is most essential for your business vocabulary.

Make this new word your slogan for Spring record sales. Buehn Service has been telling you for years about selling more records and has been backing it up with such efficient record co-operation that altho it operates locally in one sense, its reputation has become National.

You would be surprised to know about the many record orders received by Buehn Service from all over the country; it does make deliveries if we have a surplus, but our main efforts are exclusively for the Victor dealers of Philadelphia territory.

The Victor factory sends you many good points on HOW to sell more records and Buehn Service delivers the records when you want them.

Create a prestige as "the record house" of your city.

THE LOUIS BUEHN CO.

PHILADELPHIA

BUERHN SERVICE
on VICTOR RECORDS

Every Victrola in your city should have a Record-Lite. It corresponds to searchlight on an automobile. It gives more light where the Victrola owner needs it and nets you a good profit for your interest in his behalf.
Repeater. It is a very useful device for its purposes, the attachment lifting up the arm of the machine and carrying it back and placing it in the proper starting position on the record, making possible the playing of a record over and over until the machine runs down.

Blake & Burkart have begun the issuing of a little magazine of information, which is entitled "Re-Created Notes." It is attractive in appearance, is utilized for the advertising of every part of their business, as well as for the exploiting of the Edison machines and records. They are preparing an elaborate celebration for their Anniversary Week, which occurs April 14-20.

Pathé Shop Starts Publicity Campaign

The Pathé Shop here has started an advertising campaign in the local papers and with telling effect. In February Mr. Eckhardt says there was a constantly increasing interest and sale for the Pathé products, and notwithstanding the limited number of days they were able to do business in February, the month ended with a most satisfactory finish. Mr. Eckhardt says: "The finish was even beyond our most sanguine expectations, the month's business having exceeded somewhat the quota that had been established. It is quite evident that the local trade and patrons in this vicinity are becoming aroused to the advantages of the Pathé line, and we have made some very valuable and high-class connections."

A new addition to the Pathé Shop sales force is Louis Winch, the well-known singer. He has been making records for other companies for some time. H. H. Smith, a former Columbia employee, has joined the sales force at the Pathé Shop. The Pathé is represented in this city and vicinity by seventy dealers at present, and others are being constantly added.

George W. Lyle, of the Pathé Co., spent a day in Philadelphia recently, his first visit to the Pathé Shop. He was more than well impressed with the institution and organization.

The New Pathé Recordings

Manager Eckhardt says that he has only the highest compliment for the Pathé Co. in its record offerings, the April list representing a number of records which they have been permitted to put on special sale, and he says they are of the class that cannot help but make a deep impression for the artistic interpretation as shown in the recording.

Lively Demand for Dictaphones

C. A. Malfeet, manager of the Philadelphia Dictaphone Co., reports that they have had a very good February in spite of the short number of working days. March looks fine to him. They have at length gotten their school in thorough operation, and it is in charge of Miss Belle R. Kinaldo. Among the recent visitors was William Kobin, of the executive offices of the company. They have added several new men to their selling force.

The Dictaphone Co. had a very interesting exhibit of the machine at the Atlantic City convention the past week of the National Educational Association. C. P. Hanson was in charge.

Cheney Machines Forging Ahead

The Cheney talking machine has been rapidly forging to the front in this city. A number of new agencies for the machine were created in February. G. D. Shewell, who represents the machine in this city, spent nearly a week at the Chicago factory recently. One of the most substantial of the dealers who started the handling of the machine in February was the Mather Brothers of New Castle, Pa. Marion Cheney, a son of the inventor, whose home is in Philadelphia, and who is a sergeant in the army, was in Philadelphia on a ten days' furlough.

Victor Display at Weymann's

The Weymann firm is this week making a very fine window display of the Victor. They have a miniature British tank with military surroundings which is attracting a great deal of attention. The Weymann business in February was very satisfactory. They succeeded in securing large orders for the Marvel Victor Record Display Holders from firms who have come to recognize in this the best device on the market for the attractive display of records. The dealers who have used it find that it materially increases the sales of Victor records. The firm have placed in their Victrola department the past week Freda Robson and Leo Sandman to take the place of their men who have gone into the Government service.

WESER PHONOGRAPH

For 39 years the piano trade has recognized in Weser instruments the highest piano and player piano value. It always has been our delight to invite comparison of the Weser products with those of other makers. Many of our best dealers have been acquired by such comparisons.

Weser Phonographs are making rapid headway in the same manner. Compare them with the world's most expensive makes—in tone quality—in appearance—in reliability, and solidity of construction, and we are content to abide by your decision.

The Weser Phonograph will play any record. Made in satin finish mahogany. Other woods on special order. Electric motor will be furnished if desired.

Write for catalog.
MOTOR PERFECTION

The achievements and progress in phonograph motor manufacturing in recent years are emphasized in the latest designs of HEINEMAN and MEISSELBACH MOTORS.

HEINEMAN and MEISSELBACH Motors are recognized the world over as the best horizontal and vertical spring motors that are produced.

They are offered to the trade with an iron-clad guarantee from the world's largest manufacturers of phonograph motors.

BUSINESS VOLUME BREAKS ALL RECORDS IN MILWAUKEE

Comparative Figures That Are Most Impressive—Another Co-operative Advertising Campaign—

New Brunswick Dealers—Badger Co.'s Big Victor

The success of the Pathéphone departments established December 1 in the four stores of Kroeger Bros. Co., Milwaukee, has induced the company to open plain departments in connection with each store. A. J. Zinke, manager, of the new departments and co-operating closely with the Pathéphone.

The Brunswick-Balke-Collender Co.'s Milwaukee branch at 225-227 West Water street, of which Thomas I. Kidd is manager, has increased the number of its retail dealers in the city of Milwaukee to nine, and is enlisting new dealers throughout the State almost every day. Manager Kidd says that business is so good that the demand for Brunswick rights in Wisconsin and Upper Michigan at this time is even greater than during the recent holiday season, which is considered excellent testimony that the Brunswick is growing in popularity at a rapid pace. Retail jewelers of Wisconsin are especially anxious to represent the line, and Manager Kidd oftentimes encounters many perplexing problems in deciding which of numerous applications from a single community shall be accepted.

At the Badger Talking Machine Co., Victor jobber, The World representative found that the same old problem—the question of obtaining adequate stocks—continues to be the most perplexing. In fact, the problem is more acute now than three months ago, when the retail trade was swinging into the last lap of holiday trade. Although practically as many machines are being provided now as then, the demand is much greater from all points in Badger territory. The situation is such that incoming stocks rarely reach the wareroom, but are marked up for the dealers practically on board freight cars. Harry A. Goldsmith, secretary of the Badger Co., says he has never experienced so overwhelming a rush for goods as during February and so far in March.

Yahr & Lange, Sonora-jobbers for Wisconsin and Upper Michigan, report that they are meeting with a constantly increasing degree of success in wholesaling the line throughout the territory. The retail drug trade is taking a particular interest in the Sonora and, in addition, retailers in many other lines are applying for local dealerships in large numbers. The New Edison is passing through the most remarkable period since the first Edison machine was marketed in Wisconsin. The Edison Shop, Edison jobber and retailer, is getting further and further behind on its orders, although it is getting practically the largest supply of Edison machines since its establishment. Mr. Schmidt, manager of the house, virtually has been swamped with business for sixty days—and the end is not yet.

IMPORTANT COLUMBIA CHANGES IN PITTSBURGH DISTRICT

J. F. Henk Forms Columbia Music Co.—Wholesale Division Moves to Larger Quarters—Dealers Connect Publicity With Noted Artists’ Appearances—Pittsburgh Association’s Advertising Plans

PITTSBURGH, Pa., March 6.—The Columbia Graphophone Co., Sixth street and Duquesne way, has announced an important change involving both the wholesale and retail departments of this branch, whereby the two departments will be operated separately. The new arrangement became effective March 6. Following out the policy adopted in other cities, the retail agency has been sold to the Columbia Music Co., which concern is continuing that end of the business at the present location. The Columbia Music Co. is owned and managed by J. F. Henk, formerly assistant manager of the Columbia Graphophone Co.

The wholesale department of the Columbia Graphophone Co. is moving to new and larger quarters at 632-642 Duquesne way, where it will have greatly improved facilities for handling its trade. Manager E. H. Nichols states that the change has been made necessary by the vast increase in the business of this distributing agency and to permit a still greater expansion. The spacious building leased by the Columbia Graphophone Co. is well adapted to the needs of the business, and will be one of the finest wholesale talking machine establishments in the country. Further announcements of the reorganization and rearrangement of the Columbia wholesale branch are to be made in the near future, Manager Nichols states.

The Pittsburgh Talking Machine Dealers’ Association is now carrying on a very aggressive newspaper publicity campaign, in which the idea is being effectively developed that music is a vital wartime necessity. The seven leading newspapers in the city, and over forty nearby out-of-town newspapers are being used in this campaign.

Leo Half, of Half Bros., Homestead, Pa., president of the Pittsburgh Talking Machine Dealers’ Association, delivered an address before the Cleveland Talking Machine Dealers’ Association on February 20 on the subject of “The Value of Association Work and Dealer Co-operation,” in which he outlined in a graphic manner the evidences of the successful furthering of this work from the history of the Pittsburgh Association. Mr. Half also outlined the “warning” campaign now under way here.

The Standard Talking Machine Co., local Victor wholesale distributors, aided the Victor dealers of Pittsburgh and vicinity in the work of connecting up their advertising with the appearance here of two of the foremost Victor artists of the week of March 4. One of these events commanding wide attention is the appearance of Galf-Cerru, the famous coloratura soprano, at Syria Mosque, March 8. The other is the appearance of Jascha Heifetz, the noted young Russian violinist, at Syria Mosque, March 11, and at the Nixon Theatre, March 12. The Standard Talking Machine Co. supplied the dealers with printed matter, cards, etc., and with seats to sell to record patrons to still further connect up their stores with these Victor artists.

John O’Melia, manager of the Standard Talking Machine Co.’s record department for several years past, left on February 23 for Chicago, where he enters a course of instruction in preparation for Y. M. C. A. war work. Mr. O’Melia is the fourth member of the Standard organization to take up some line of war work, three others having enlisted in various branches of the service.

J. C. Rush, president of the Standard Talking Machine Co., is spending several weeks’ vacation at Sea Breeze, Fla., accompanied by Mrs. Rush and their two children.

Manager Brennan, of the Pittsburgh Pathéphone Co., reports continued active trade in this territory, and the dealers in the midst of an aggressive drive for spring business. The following additions have been made recently to the list of live Pathé retailers in western Pennsylvania: Gross & Rosenblatt, Beaver Falls; W. F. Beck & Son, 36 Bellfont avenue, Lock Haven; and A. D. Ritz, Fallston.

Manager George Meyer, Jr., of the Brunswick-Balke-Collender Co., First avenue and Wood street, reports business quite active, the only handicap being the shortage of machines and delays in transportation. The Brunswick-Balke-Collender dealers in this territory continue to show a nice increase in sales over last year. Mr. Meyer states, and the outlook is quite favorable.

J. A. Endres, of the talking machine department of the Brunswick-Balke-Collender Co., is visiting for a week at his home in Buffalo, N. Y. Cooper Bros., New Kensington, Pa., have just completed an addition of six handsome demonstration booths to care for their rapidly increasing trade. The Victor line is handled exclusively.

EDYTHE GLADYS EPSTEIN ARRIVES

Louis Epstein, Well-Known Victor Dealer, Proud Father of Bouncing Girl

Louis Epstein, big Victor dealer of 2763 Third avenue, New York, could hardly give his attention to business the past couple of weeks, owing to his excitement over a new arrival in his household—In the person of a bouncing baby girl. The young lady is named Edythe Gladys Epstein, and was born early in the morning of February 17 at Mr. Epstein’s home, 827 Cauldwell avenue, the Bronx. Both mother and daughter are in fine shape, and Mr. Epstein has again come so close to normal that he feels safe in having the various buttons replaced on his vest.

The greatest master is master of yourself.

"The Greatest Move You Ever Made
WE'VE SELLING MORE and
MAKING MORE"

These are the words expressed just as definitely and even more enthusiastically by dealers all over the country.

"At first we thought that the increase in price might temporarily reduce our Emerson sales volume," said one of these dealers last week, "but it has had quite the opposite effect.

"There must be something about human nature which makes people readier to buy something for which they pay 35c or $1.00.

"We have sold more people 3 records than previously we had sold only one.

"The number of people buying Emerson Records hasn't decreased, but the quantity purchased by each buyer has gone up."

This is the report sent in from all parts of the country concerning

**Emerson Records**

**Retail 3 for $1.00 or 35c Each**

But this is only one-half the advantages of the new scale of prices. The new fact about Emerson Records now is that you make more on every Record that you sell than you did before.

Emerson Records now cost you 21c in unbroken packages, and 22c in broken packages of less than 25 records of a selection.

The new list is the best we have ever issued. Included in it are most eminent stars; backing it is some of the finest display material we have ever printed.

FLAG RAISING DAY AT EDISON LABORATORY, ORANGE, N. J.
Ceremonies Also Included the Flinging to the Breeze of a Service Flag Containing 362 Stars—Stirring Address by General Sales Manager Leonard a Feature of the Celebration

Flag raising was the order of the day February 26, at Edison Laboratory, Orange, N. J. Following the annual custom Old Glory was raised to the top of the flagpole on the roof of Mr. Edison’s laboratory. An added feature of this year’s ceremony was the flinging to the breeze of a service flag containing 362 stars, each star representing a man from the Edison organization who has gone into the service of Uncle Sam. The service flag hangs out of one of the top windows of Mr. Edison’s laboratory and faces Valley road, where it is in full view of all passersby.

The Edison Employees’ Band participated in the exercises by marching from their headquarters in one of the buildings around to the front of Mr. Edison’s laboratory and into the laboratory yard where they played the “Star Spangled Banner” while Old Glory was raised on the top of the laboratory, and “America” when the service flag was run out of the window, all in the midst of a lively snowstorm. Thomas J. Leonard, general sales manager of the musical phonograph division, was master of ceremonies and made a most appropriate and splendidly delivered address following the raising of Old Glory and preceding the breaking out of the service flag. Mr. Leonard said in part:

“At the call of their country in its hour of need and inspired by the example of their employer, serving the Government devotedly and as modestly as the humblest soldier in the ranks, 362 Edison men stepped into the service of Uncle Sam. This is a magnificent showing, but probably not more than might be expected from the organization which set a standard for all other manufacturing organizations in its response to the Liberty Loan appeals and which, through its individual employees, has contributed with corresponding generosity to the successive forms of wartime demands.

“We gather to-day to pay a simple honor to our comrades and associates who have joined the colors of their country. This is a specially selected, for the principles for which the father of his country fought the good fight are the same principles that are to-day imperiled by the false doctrine of Prussianism.”

After some eloquent comments regarding the origin of the service flag and what it is intended to typify, Mr. Leonard continued:

“There is another significance to the service flag. It is a reminder of our duty to the boys who are going to the front. Nothing is too good for our boys in the service. These boys, the chosen defenders of our flag, are willing to suffer hardship and every inconvenience that you and I may be permitted to live in peace and security. Remember that they are no more under obligation to risk their lives than you and I are. It is our country as well as their country—our responsibility as well as their responsibility. Yet these boys—our boys—are willing to make the supreme sacrifice to protect our homes and our wives and children—yes, they are willing to go through hell itself that this great of that duty. Let it have this additional significance. Let it inspire you to subscribe to the necessary things which will help win the war and make the task of our boys easier.

“* * * All these will call for a sacrifice on your part, but this is the season of sacrifice and sacrifice is the least duty you and I can perform. Let the service flag on the old ‘Lab’ wall be a

TALKING MACHINES AND PIANOS

Herbert Simpson, Vice-President of Kohler & Campbell, Inc., Formerly in Talking Machine Industry, Knows Requirements of Dealers—Is Ready to Aid Dealers Who Can Handle Pianos

The results of harmony between the talking machine and piano industries have been force-it profitable to handle talking machines in connection with their piano business. There have been many men who, previously connected with the piano industry, have been very successful in merchandising talking machines.

Believing that a greater harmony between the two industries will promote even greater success to both Kohler & Campbell, Inc., Fifteenth street and Eleventh avenue, New York, one of the largest and most progressive piano manufacturers in the country, have been carefully studying the requirements of the talking machine industry, and have developed a department for meeting the requirements of the retail talking machine trade, so far as pianos are concerned. Their familiarity with the talking machine trade has been greatly augmented by the fact that Herbert Simpson, vice-president of this concern, was at one time assistant advertising manager of the Victor Talking Machine Co. Upon leaving this organization he became advertising manager for Kohler & Campbell, and through his success in the field of merchandising has gradually worked his way up the ladder to his present capacity. During his affiliation with the talking machine industry, Mr. Simpson made many fast friends, who appreciate his capabilities and who realize that he has a thorough knowledge of the requirements of the talking machine dealer.

The tremendous manufacturing facilities of Kohler & Campbell, Inc., places them in a position not only to give the trade pianos and player-pianos of highest quality, but also an unexcelled service both in deliveries and merchandising aids.

Herbert Simpson

The Jersey City Talking Machine Co., Jersey City, N. J., was incorporated this week with a capitalization of $10,000.

PRIZES FOR BEST WINDOW DISPLAYS

Emerson Phonograph Co. Make Announcement Regarding Sales-Producing Record Displays

Prizes to the value of $300 in Emerson records are offered to dealers in a new store and window display contest just inaugurated by the Emerson Phonograph Co. These prizes will be given for the most original and best sales-producing displays in either the interior or in the window of the dealer's store.

The dealers are asked to send photographs of the displays to the offices of the Emerson Phonograph Co. before April 15, and in order to assist the dealers in every possible way the company's advertising department has prepared a special package of bunting, announcements, etc., which the dealer can secure upon request.

It is planned to print the various winning photographs in early issues of the "Emerson Spotlight," the company's house organ. The first prize is $75 worth of Emerson records, the second prize, $50 worth; third prize, $25 worth, and five prizes of $10 worth of Emerson records each. Only those records that dealers had on hand before March 1 may be used in their displays.

WANT RECORDS IN NAVAL CAMPS

Phonograph records to be sent to the aviation training camps throughout the country are greatly needed, says the aeronautic committee of the Woman's Naval Service, and its members make an earnest appeal to the public to aid in supplying them. Several thousand are required. They may be sent to the Woman's Naval Service, 289 Madison avenue, in care of Mrs. Charles A. Van Remscheider, chairman of the aeronautic committee.
TWIN CITY DEALERS ENDEAVORING TO MAKE ENDS MEET

Make a Strenuous Effort to Meet Demands Pending Improvement in Transportation and Receipt of New Stocks—Machines Being Brought in by Express—General Trade Very Satisfactory

MINNEAPOLIS and ST. PAUL, MINN., March 6.—Between the shortage reported by manufacturers and transportation delays the local talking machine market is much upset owing to their inability to supply their customers with machines as rapidly as they sell them. They are hopeful, however, that with better weather things will mend.

F. M. Hoyt, of the Beckwith-O'Neill Co., showed the writer twenty-six contracts on which he had taken first payments, but has been unable to deliverVictrolas that the contracts called for.

"It cost me $2,000 extra expense for express charges in February alone," remarked W. L. Spangle, manager for the Colton district. "With improved weather conditions we are hoping for better service, but are somewhat consoled because of a growth of 80 per cent. in the volume of business for February as compared with the same month of 1917, and also because we have become the permanent owners of the $800 silver trophy which this branch won in three successive months."

"Six carloads of Edison machines, ordered sent by express are being held up somewhere in America," said Lawrence H. Luckes, president of the Minnesota Phonograph Co. "Virtually the entire shipment will be transhipped the moment it arrives. Express is slower than slow freight was a short time ago and we are ready to become Bolsheviks or almost anything else if it will help the industrial and railway situation. The carload of records I obtained on my visit to headquarters in January is all gone and not as much is obtainable as we had hoped."

"I just dread it when we run out of a line and must give the factory an order," complained Jay H. Wheeler, who manages the Pathé department for G. Sommers & Co. "It takes from six to eight weeks to get an order through by freight and fully twenty days by express, at greatly additional expense. We hope for a better showing now that the weather has improved."

The only jobber in the Twin Cities who is not complaining is R. L. Kern, manager of the Brunswick-Balke-Collender Co., manufacturers and distributors of the Brunswick phonographs. He has started four travelers through the Northwest and is opening new accounts almost daily.

Incidentally, although a recent arrival in the field, he hopes to make some of his veteran competitors move very lively.

Thirty Sonora dealers in this territory, which includes Minnesota, North Dakota, South Dakota and Montana, attended the first annual Northwest Sonora Dealers' convention and banquet at the Hotel Rogers, Minneapolis, last month, as guests of the Minneapolis Drug Company, Sonora distributors. Sewell D. Andrews did the honors as representative of the house and made the dealers acquainted with the Sonora officials. Those attending the convention and banquet were George E. Brightman, president of the company; Frank J. Coope, general sales manager; Superintendent Fahr, of the Saginaw factory; Fred E. Yah, of the Yah & Lange Drug Co., Milwaukee, and Walter J. Hamlin, of C. J. Van Houten Zoon Co., Chicago. Sonora distributors also attended the convention and made themselves generally amiable to the dealers.

The latter returned to homes enthusiastic Sonora boosters.

The Minnesota Phonograph Co. announces a gross increase of 25 per cent in the volume of the Edison sales in the Northwest for the year 1917 as compared with 1916. It may be said that the company officials are contented with the showing and hope that they will be able to repeat.

Miss Salome Batton is to change her name via the marriage route this week, but will not retire from business at once, as she had expected. The lady selected to become her successor is Miss Dorothy Deetz. Thirty are general salesmen and also talk other articles, but four give their entire time to Pathé products. The growth of the business has quite exceeded expectations, according to Manager Wheeler. The latter will leave soon for the East to order stock for the coming season.

F. M. Hoyt, with the Beckwith-O'Neill Co., returned last week from an Eastern tour, during which he visited Victrola jobbers in Chicago, Buffalo and New York and also the Victor headquarters in Camden.

FINDS CANNED PROPAGANDA

Chicago Official Discovers Praise of Kaiser on Phonograph Record

A dispatch from Chicago says that United States District Attorney Clyne is investigating what he believes to be active pro-German propaganda conducted through phonograph records.

The text of one of the German language records seized by Federal officials, which was given out yesterday without comment by the district attorney, denounced the Kaiser and war lords of Germany. The record in question, according to the district attorney, was made for the Mozart Lodge of New York.

Joseph Fiaccni, of 1442 Third Avenue, president of the Mozart Lodge, New York, when seen said that while the lodge had purchased such records a long time before the war, the practice had been discontinued as soon as the United States entered the world conflict.

These 4 Beautiful Models Make The Elmbrola Easy To Sell

There's an Elmbrola Model for everyone—a low priced machine, a reasonably low priced machine, a medium priced machine, and a very fine machine at a price way below what you would expect to pay for it. This is what makes the Elmbrola so easy for dealers to sell—but there are still more exceptional selling features to the Elmbrola.

Handsomely Finished In Beautiful Woods
There's a distinctive, high class appearance to every Elmbrola. The appearance is so out of the ordinary and the finish is so beautiful that your customers are surprised when you tell them the remarkably low price. You feel proud to display these wonderful Elmbrolas, because your customers are bound to be pleased.

Sweet And Clear In Tone
Sit down for a minute and listen to the Elmbrola play. Its clear, sweet tone is so delightful that you want to hear it play for hours. Never before have you heard a tone that surpasses the tone of the Elmbrola. Thousands of people say that nothing can equal it, but judge the machine for yourself.

The dealers who are selling the Elmbrola are making big profits because the machine is right and the price is right. You should be handling the Elmbrola right NOW, and you certainly will handle it if you get our special low dealer prices.

Wonderful Improved Tone Regulator
This big feature enables you to get all the delicate shades of tone so necessary in the perfect reproduction of sound. You can play loud or soft as you wish by simply turning the button.

We Guarantee Prompt Deliveries
When you handle the Elmbrola, your orders will be shipped to you promptly the same day we receive them. There's no waiting—no delay. Our factory turns out the machines as fast as you can sell them.

This Is Your Opportunity To Cash In
Now is the time to sell the Elmbrola. Get our special proposition to dealers and see what big profits you can make. We have a Sales Plan for you that is a winner. Write us at once for full particulars—there's no obligation whatsoever.

Write for our proposition to dealers NOW

ELMBROLA TALKING MACHINE CO.

ST. PAUL, MINN.
SAN FRANCISCO BUYERS MEETING DEALERS HALF WAY

Show Willingness to Accept Available Styles of Machines or to Place Orders for Future Delivery — More Commodious Quarters for Columbia Co.—General Trade News of Interest

SAN FRANCISCO, CAL., March 4.—The talking machine dealers are well satisfied with their February business. While there has been a shortage in some makes and styles the dealers report that their customers are accepting the situation good naturedly, and either ordering the machine they want, to be delivered when it arrives or accepting a substitute that is nearest to the machine desired. During the past ten days of the month several cars of machines, some of them shipped almost sixty days ago, arrived, and the dealers feel that the worst of the shortage is now over. Of course, in those factories where sufficient help cannot be obtained the shortage will continue. That is the manufacturers’ problem, and one that must be solved by each manufacturer for himself. The demand is here and the people have the money. Now, if the manufacturing end can be solved and the transportation end improved 1918 will prove a banner year in San Francisco. From the viewpoint of the local merchant the number of traveling salesmen who have been sent into this territory during the past month is an indication that the manufacturer is not worrying to any great extent over his output, and San Francisco rejoices accordingly.

Receives Records by Express

George T. Hively, manager of the talking machine department of the Eastern Outfitting Co., says that he has kept up his stock of records during the period of the worst freight congestions by having them sent by express. These additions to the heavy stock he had on hand have prevented him from feeling any serious shortage. Mr. Hively says that he placed heavy orders for deliveries nearly a year ago, and he does not anticipate any shortage during the present year.

Lease New Columbia Quarters

The Columbia Graphophone Co. has taken a lease on more commodious quarters in the Halliday Building at 130 Sutter street. The company will move by the first of April to its new quarters, which are nearly twice as much space will be available as was provided in the old location. The Halliday Building is a new structure erected by the regents of the University of California, and is locally known as the “Daylight” building. The entire front is of glass and excellent light is provided everywhere without recourse to electricity. The first floor of the building is occupied by a clothing house and a large office furniture store. The Columbia Co. will occupy the portion of the second floor over the clothier. The location is more desirable than the old one and the additional space makes the move one for congratulation.

Victor Business Exceptional

The California Phonograph Co. reports that its business for February was exceptional. The company does not complain of a shortage of machines or records except of Victoros. As it was only recently that the company took over the Victor agency, with the purchase of the talking machine business of Kohler & Chase, this shortage is easily explained.

Andrew G. McCarthy’s Views

Andrew G. McCarthy, of the talking machine department of Sherman, Clay & Co., says that there is plenty of demand for talking machines, but comparatively few are arriving. He has placed enormous orders for Victors at the factory, but as his company are joining the Victor as well as selling it at retail in their several stores the business of the Victor on the Coast passes through their hands. With such a demand he finds it impossible to keep everyone well supplied.

Humphrey Making a Fine Record

Edward Humphrey, who was recently put in charge of the talking machine department of Byron Mauzy, is making a splendid record in his department. Chas. Mauzy, the general manager of the company, says that his department is far ahead of the previous year despite the fact that a real shortage of Victor records and Victor higher-priced machines exists in the store. Mr. Humphrey has had his department redecorated and fitted up for the greater convenience of his customers, and the results are showing themselves in the record of the sales.

Kohler & Chase Sell Stock in Oakland

Kohler & Chase have sold their Oakland stock of talking machines to the John Breuner Co., a furniture dealer of that city, and they have now retired definitely from the talking machine business in both cities. By this purchase the furniture company acquires the agencies of both the Victor and Columbia machines.

Salesman Badly Injured

F. A. Smith, of the Brunswick-Balke Phonograph Co., is a furniture dealer of that city, and they sold an additional five machines in the month. He has just received information that James F. Mahoney, salesman for the company, met with a painful accident at Fresno on February 27, which may incapacitate him for some time. According to the information in Mr. Smith’s hands Mahoney slipped while boarding a train at Fresno and either sprained or broke his ankle. An X-ray will be necessary to ascertain the extent of the injury.

Noted Artists Coming

The announcement that McCormack and Galli-Curci will sing in this city at early dates has already stimulated the demand for Victor record of their voices. It is expected that the sale will increase still more and continue for some time after their appearance.

Dealers to Give Annual Dance

The talking machine dealers of San Francisco are making ready for their second annual dance to be given at St. Francis Hotel on April 2. William Morton, of Sherman, Clay & Co., will have charge of the dance as chairman of the committee appointed for the purpose.

Some Trade Briefs

F. B. Travers, of the Sonora Phonograph Co., has just returned from a trip through the southern part of the State. While there he covered the territory in company with E. M. Bennell, the company’s regular representative.

E. N. Clintsman, one time manager of the wholesale talking machine department of Kohler & Chase, and at another time in the general talking-machine business in the Northwest, has recently been appointed deputy assessor of Alameda.

Charles S. Ruggles, who has charge of the wholesale Victor sales for Sherman, Clay & Co. at Los Angeles, has returned from a trip East, where he visited with his son, Wesley, who recently finished his military course and is leaving for France.

The San Diego branch of the Wiley B. Allen Co. has greatly enlarged the floor space of the talking machine department.

G. E. Morton, recently with the Columbia Graphophone Co. in New York, has been appointed manager of the talking machine department of the Emporium.

Serious Question of Labor

A. G. McCarthy, of Sherman, Clay & Co., says that one of the difficult problems which the dealers in talking machines have to solve is the question of labor. The number of young men wishing to go into the business in the past has always been ample, but, so many have gone into the service of Uncle Sam that the dealers have been taking on younger boys. The call of the shipyards with pay of $5 or $6 a day is now depleting the supply and many are having recourse to girls. Girls with any experience are now scarce, and many dealers are really short-handed because they do not feel that they can take the time to train green girls.

On Selling Records

There are many excellent ideas the Victor Dealer can use to stimulate the sale of slow moving stocks. Some of these ideas have already been put into practice, others have not yet been discovered. We urge Victor dealers to encourage their salesmen in originating new plans for selling records, and along the same line our travelling representatives will be glad to offer several good suggestions.

ECLIPSE MUSICAL COMPANY
CLEVELAND OHIO
DROOP'S EDUCATIONAL PUBLICITY

E. H. Droop's Campaign to Inculcate a Better Appreciation of High-Class Music Excites Commendation—Helps Industry as a Whole

WASHINGTON, D. C., March 8—E. F. Droop & Sons Co. Victor wholesalers and dealers, have been carrying on an original and most effective advertising campaign in the local newspapers in the interests of high-class Victor records. The advertisements are in the form of articles credited to E. H. Droop, head of the company, and give Victrola owners some new angles from which to regard their record libraries. In one of the articles, for instance, Mr. Droop says:

In our previous article we dwelt on the lack of knowledge possessed by the average Victrola user of the higher and better forms of music known as "classic" or "semi-classic" compositions.

It is not surprising that this condition should exist, and it must be said in justice to the great masses of our people that it is of comparatively recent date that they have had made available to them a medium through which every form of music could be brought right into the home— the Victrola—and that quite naturally they took up with the more catchy and trivial things in music, because these amused and entertained them; little thought has been given to the more serious forms of music—which are not only far more beautiful and lasting than the catch-penny airs that are whistled to-day and forgotten to-morrow—but they have an educational value which proves a great help as progress is made in the study and understanding of music.

Again we make the statement that if we can interest you to listen attentively for a little while to a few good selections chosen from the lighter classics—explaining what the composer had in mind when he wrote his tone picture, and helping you to clearly understand its rhythm and "phraseology," as it were—you will, if you persist in hearing similar selections, rapidly grow into appreciation of the masterpieces with which the great minds in music have endowed the world, and a realm of melody will be opened which you will never cease exploring—

Music is a vital force and from the cradle to the grave plays an important part in our lives; it entertains, refines, educates, soothes, comforts, and inspires, and now that the Victrola records have made it available, the best music by the best artists and musical organizations of the world should find a place in every heart and home.

We are at your service to help in building up a library of choice records of which you will not tire and which will always reflect credit upon the owner's taste.

Whether you want to buy or not—our Victrola booths are at your disposal and we invite you to call and try out the suggestion we have made. Suppose you hear some or all of the latest records.

It may be said that the articles have been effective in bringing about increased sales of the higher class Victor records, and it is planned to continue the series of talks for some time to come.

No matter how perfect a locomotive may be, it takes steam to drive it. All matter have clever men may be, he will get nowhere without hustle.

FAULTLESS

GIVES TALKER TO JAPANESE SCHOOL
PORTLAND, Ore., March 5.—Away off in far-away Japan will be felt the generosity of a music dealer of Portland, Ore., Harold S. Gilbert, of the Harold S. Gilbert Piano Co., who has presented a Columbia graphophone to the Boshibo Girls' School of Kyoto, Japan. Mr. and Mrs. Gilbert have had as their guest Miss Denton, a missionary from the school at Kyoto, which is a school supported by the Congregational Church. The interest which Mr. and Mrs. Denton felt in the school after hearing Miss Denton's description of conditions resulted in the handsome gift.

SECKURES ORDERS FOR VEEOO MOTOR
H. A. Robbins Has Most Successful Trip in the Interests of His Product
One of the recent visitors to New York was H. A. Robbins, treasurer of the Veeco Co., Boston, Mass., manufacturers of the Veeco electric motor for talking machines. Mr. Robbins had just completed a tour of the West, spending some time in Chicago, and succeeded in securing orders from a goodly number of representative manufacturers. He also garnered a substantial bundle of orders in New York before leaving for his Boston headquarters. Mr. Robbins had with him the new model Veeco motor, which embodies many improvements over the older models.

IMPROVED TRANSPORTATION HELPS CINCINNATI TRADE

Although Conditions Are Far From Normal Retailers Can Get a Fair Amount of Stock—Automobile Deliveries Are Popular—Demand for Both Machines and Records Very Strong

CINCINNATI, O., March 8.—An opening of the lines of transportation in and out of Cincinnati, which took place to a fair degree towards the close of February, put pep into the trade and exhilarated the retail situation. While certain of the lines still in the embargo class, enough territory is open to enable the talking machine merchants to do some shipping.

So crying is the need of Edison machines among Bellocquers, O., over 100 miles from Cincinnati, that J. C. Smucker, of Smucker Bros., representatives of the Phonograph Co., this city, travelled with a truck to the Queen City Friday to secure what goods he could get. It was Smucker's idea, and he benefited. Two weeks ago Manager Peterson's house secured goods from New York City which had been in transit since department to November. J. F. Heneman, Middletown, likewise came to the city in a machine during the past week and secured Edison goods.

Carload shipments are coming through to the Columbia house. It has been doing some shipping by express, and the breakage out of Cincinnati has been so great in recent months that R. L. French, traffic manager, came here last week from the Bridgeport, Conn., factory to get a line on the situation. F. F. Dawson, who took charge of the Cincinnati branch in December, expects to remain here several more months. He reports having an increase of almost 100 per cent last month over February of a year ago. J. L. Dubiel, of the general sales department, arrived in the city Saturday to temporarily fill the position of assistant manager. G. W. Hopkins, general sales manager, passed through earlier in the week, on route to St. Louis. Another of Mr. Dawson's visitors was W. C. Fuhri, of the Chicago branch, on route home from a Florida vacation.

C. W. Neumester, local representative of the Heimann Phonograph Supply Co., is spending the week in New York City, attending a convention of the outside agents. Just before leaving he reported quite a boom in business in his territory.

A. J. Swing, of the Crystals Co., is in the East on several important matters in connection with the local factory.

J. M. Dolby, manager of the Dictating Machine Co., left to-day for Nashville, where he will open a branch office for the Edison.

Mr. Byars, Vocalion manager of the local Aeolian store, reports a very gratifying volume of Vocalion business for the month of February, just closed. He reports that a number of the new period designs have been received, and several were sold in the last few weeks. One of the largest and most elegant of these models is being shipped to New York as one of Louisville's most prominent citizens. It is the Hepplewhite design, with the hand-painted front and inlaid front and top. This instrument is going into delivery as well as less delay in shipments.

"Inasmuch as during the past year it has been a question of supply rather than demand, we can only hope for the future and trust that the factory output will in a measure take care of the requirements of the dealers.

"We find that the demand for the March records was exceptionally heavy and, as this list is a very good one, the demand will undoubtedly be lastingly. The appearance of Jascha Heifetz in Cincinnati caused a tremendous demand for records of this order. His appearance here about the time the records were released was a very happy coincidence and the demand was undoubtedly taken advantage of to its fullest extent by all of the local dealers."

NEW CONCERN IN TROY, O.

The Mirophone Co., Troy, O., has been incorporated with capital stock of $10,000 by George M. Jackson and others, and it is stated that the company has been formed to take over the output of the Lorimer-Hicks Co., manufacturers of the Lorophone, which company is at present in the hands of a receiver.

BUILD ON ROCK OF SOUND VALUES

Thy business is not built upon the sands of speech, be it ever so well spoken; it is built upon the rock of sound values. If ye have not sought and found that foundation, seek it for the good of thy house.

The New VEECO

THE ELECTRIC MOTOR WITHOUT A FAULT

The improved Veeeo Electric Motor for Talking Machines represents the last word in scientific development with special regard for the purpose for which it is intended.

Runs on either A. C. or D. C., 100-125 volts without adjustment. Can be supplied to run on any voltage from 6 to 250.

Supplier mounted on 12" or 12½" square mahogany boards, all ready to install.

SEND FOR A SAMPLE AT ONCE

Then, after testing it thoroughly, place orders at once to insure delivery.

THE VEECO motor and the VITRALOID turntable make a complete motor unit for high-class machines.

THE TALKING MACHINE WORLD

PROTECTION OF TRADE NAME

Recent Decision in Favor of the Aeolian Co.

of General Trade Interest

The Aeolian Co., New York, was successful recently in a trade-mark case which should prove interesting to the talking machine industry, as indicative of the value of trade names. This decision in the Aeolian Co.'s favor was handed down by the Circuit Court of Appeals, from whose decisions there is possible no further appeal.

Some time ago a talking machine company made application for the registration of the trade-mark "Orchestra" for a talking machine. The Aeolian Co. filed a claim in opposition to the granting of this trade-mark in behalf of its well-known instrument the "Orchestrille," an automatic pipe organ which has been on the market for many years.

After the case had passed through the usual trade-mark channels it reached the highest court in the land, which handed down an opinion denying the talking machine company the right to use the name "Orchestrille." This decision is clear and concise; one section, which gives the most important factor influencing the opinion, reading as follows:

"Assume that a person who had a good opinion derived from use or otherwise of an automatically-operated organ produced by the Aeolian Co. and marked 'Orchestrille' desired to purchase a phonograph (the Aeolian Co. as we have seen, now produces phonographs), and is shown one marked 'Orchestrille,' would he not be likely to think it was produced by the same company as produced the organ and buy it on that account?

"Perhaps if the two instruments were placed side by side, one marked 'Orchestrille' and the other 'Orchestrille,' he would be able to detect the difference between the marks; but where they were not so placed, and he was compelled to rely upon his memory only, unless he possessed one remarkably accurate in its impressions—the law considers the ordinary, not the extraordinary in cases like this—we believe he would not distinguish the one from the other. To be sure, they have points of difference, but the points of resemblance dominate and give character to the terms.

"We entirely agree with the Assistant Commissioner that the two words are 'confusingly similar' and would be likely to mislead not only as to the goods themselves but also as to their source of manufacture, and hence his decision is affirmed."

DEBUT OF "EMERSON SPOTLIGHT"

The first issue of the "Emerson Spotlight," the new house-organ published by the Emerson Photophone Co. for benefit of Emerson record dealers, made its appearance a fortnight since, and has already won the enthusiastic approval of the Emerson selling organization and Emerson representatives throughout the country. It is planned to publish this house-organ monthly, and there is good reason to believe that it will be a pronounced success.

The first issue contains a number of practical suggestions to Emerson dealers how to boost Emerson record sales; these suggestions appearing under the headings "Phone Customer," "Attractive Packages," "Special Bulletins," "Newspapers Free," "Dance Programs," etc. There are some timely hints as to ad. helps, and the dealers are acquainted with the likenesses of some of the most popular artists in the Emerson record library.

When Service and Quality keep house together, Satisfaction hangs up its hat for a long stay.

THE "TALKER" AT THE FRONT

Uncle Sam's Forces Rapidly Learning French Through the Talking Machine

The talking machine as an educator is proving quite a favorite with Uncle Sam's forces who are now in France "doing their bit" to make the world safe for democracy. As a means of learning the French language they find the talking machine invaluable. In a recent letter from the front we read:

"The American soldiers attend a class in French every day at the Y. M. C. A. or at the Soldiers' and Sailors' Home, where an American volunteer or French professor gives lessons. The boys know a few set phrases when they land, but they are adding to their vocabulary all the while. Professors are rather scarce at the camps, but lessons are given by the talking machine. The Americans have found that a deep knowledge of French is not necessary for the short time they are here, in Paris, and especially so since they trade only in shops where at least one of the clerks speaks enough English to carry through a deal. Some of the college fellows have carried on their reputation of slang making, and they have invented funny phrases both in English and French.

"The Americans like the talking machine method. Its voice may be metallic and the tone monotonous, but the machine is a patient teacher and the pupils make it go over the words till they are satisfied. It is effective for pronunciation, for it does not vary, and the constant call on it for phrases does not wear on its voice. No living teacher could be put through such stunts."

To make this year one of the best you've ever had in "making good"—is a good resolution to make!

IT HOUSES A SMALL VICTROLA

The Lundstrom "Converto" Cabinet converts the small "Victrola" into a handsome cabinet type, completely enclosing the machine. It takes the place of a stand and provides a dust-proof record rack for 60 records. It revives interest in records. It helps you meet low-price competition in cabinet machines and gives you a good profit. It costs the customer no more than a good stand! It has proven very successful for many of the country's leading Victor dealers.

Detroit Trade Buyout Regarding General Outlook

Removal of Restrictions Helps Business Expansion—A. A. Grinnell's Interesting Views—Button Collier With Cheney Co.—Patsh Jobbers Pleased with Outlook—Some Noted Visitors

Detroit, Mich., March 9.—The worst is over so far as adverse conditions are concerned in the talking machine business in Detroit. We do not mean by this that business has been dull, but simply that certain conditions have prevented sales being much greater. During the months of January and February dealers were up against the crisis in the coal situation—the extreme cold weather, freight congestion, and the after-effects of December holidays. On top of this came the restrictions on business hours and workless Mondays. Now, however, all this is over—there are no restrictions on business hours, the crisis in the coal situation is passed, and freight shipments are improving. It's a positive fact that of all the lines of business investigated recently by The Talking Machine World correspondent, except those devoted to war orders, the retail talking machine business is the very best.

A distinguished visitor was in Detroit the last day in February—being none other than H. C. Brown (and wife), of the Victor Talking Machine Co., of Camden, N. J. The visit of Mr. Brown was a combination of business and pleasure. He spent a few minutes with A. A. Grinnell and C. H. Grinnell, of Grinnell Bros., who are Victor jobbers, and E. P. Andrew, general manager of the J. L. Hudson music store. A part of his time was spent with Mrs. Brown in motoring about the city.

At 247 East Jefferson avenue, Detroit, is the wholesale branch of the Brunswick-Balke Co., State jobbers for the Brunswick phonograph. F. S. Kratzke is in full charge. While the company handles the full line of Brunswick products, the product is invariably given over to the display of Brunswick phonographs, the displays being changed very frequently so as to show off the different models. In Detroit the principal Brunswick dealer is Wallace Brown, 33 East Grand River avenue, who has a national reputation for hustling. But Mr. Kratzke has other live dealers throughout the state, and is gradually developing good accounts in every town of 10,000 population or over. A large stock is always carried at the Detroit branch, so that dealers can always feel assured that their orders will be filled promptly.

C. H. Grinnell, manager of Grinnell Bros., wholesale victrola department, was in Cleveland the last of February to address the Northern Ohio Talking Machine Dealers at their first annual convention. The address was devoted to the accomplishments of the Detroit talking machine dealers' association during its two years' existence.

A. A. Grinnell, treasurer of Grinnell Bros. and who devotes a great deal of his time to looking after the talking machine department, says that "1918 looks mighty good." Mr. Grinnell feels that it may be a while before the business is booming, still he feels that 1918 will be one of the best years the industry has ever seen. He continues that it is not a question of seeking orders but that his company could move more than double the business now on its books if it could only get the merchandise. "Collections are very good," he said. "Our stock is large, although not quite as large as we would like to just see it."

Ed Andrew, manager of the talking machine department of the J. L. Hudson store, spent the last week in February in Cleveland and Philadelphia. He plans to visit quite a number of other cities during March just to get a line on local conditions in various sections and to see where there is room for improvement at the Hudson store. It is a paying proposition to the manager and to the department to get out occasionally and go to some other city and see what the dealers there are doing," he said. Mr. Andrew, by the way, has been elected secretary of the Detroit Music Trades Association.

That dealers believe that this is no time to be bellicose is proved by the amount of advertising space in the daily newspapers. There is hardly a live dealer—yes, we don't know of a single one—that is not advertising in the daily newspapers, billboards or theatre programs. And the space per dealer is larger than it has ever been at this season of the year. The new concerns that entered the retail field last year, after business by advertising so that the talking machine is brought forcibly to the attention of the public, no matter where the people look.

Button Collier, manager of Detroit Corprators with the player-piano department of Grinnell Bros., resigned sometime ago to become sales manager of the Cheney Talking Machine Co., of Chicago. He has had his home in Detroit to be near the home office. He spent the month of February in Grand Rapids and Detroit attending furniture expositions and conferences. The Detroit Talking Machine Dealers are perfecting plans for the coming recital which is scheduled for sometime in April or after Easter. We previously reported that the proceeds of the recital will be turned over to some patriotic fund. President Sam Lind is working hard to offer a program that will draw crowded houses.

Williams, Davis, Brooker & Hinsliff, who are reliable jobbers in Mr. Andrew's department, report very good business, larger stocks than ever and more orders than ever before. "Yes, business is coming along splendidly," said Mr. Andrew, in charge of the sales of this department. "Our business the first two months under the adverse conditions has been far beyond what we had expected and we have every reason to feel that 1918 is going to be a good year, with business improving each month." The miniature Pathé store in the company's building is attracting unusual attention and it is proving of great help to dealers who are taking on the line. It shows them just how a modern, up-to-date shop should be laid out.

The Strasburg of the Strasburg Shops, judging from letters received, is having a very enjoyable time in the South playing golf at every opportunity. He expects to return to Detroit the last of March.

A. F. Noble Piano Co., Woodward avenue near Warren, is now retailing the Cheney talking machine. Keenan & Jahn, who are retailing the Azolan-Vocalion, are going after business harder than ever—even exceeding their efforts at Christmas time. Sales have been growing in numbers, and the new records that are coming in are proving very popular. John DeAngelis is in charge of this department.

Wallace Brown, Brunswick dealer, says this is going to be a big month for both him and the company, but this is the time when the dealer must awaken interest in the talking machine business by judicious advertising, publicity and salesmanship. He is giving his attention to all three phases of business and is getting results.

The Edison Shop celebrated Thomas A. Edison's birthday in February by special recitals, special vocalists and giving away gratis a book containing the biography of Mr. Edison. The year 1918 is going to be a big one for the Edison Shop, judging from sales the first two months and the number of prospects. The same statement can apply to the Phonograph Co., of Detroit, state jobbers for the Edison. Branch firms are managed by R. B. Rilling.

The number of international artists from a musical standpoint who have been in Detroit for recitals the past sixty days has proved a splendid stimulus to the record business here. There is no better stimulant to the sale of records than the noted artists who come for recitals. Before and after their coming record sales are big.

The Majorana Graphophone Co., Louisville, Ky., has been incorporated with capital stock of $50,000 to engage in the manufacture and merchandising of talking machines. The incorporators are G. B. Shumate, Peppino Majorana and S. M. Raffo.
Brunswick Outfit for Hospital

“Red Cross” Brunswick Machine and 400 Records Donated to Lilly Base Hospital in France by Brunswick Shop and the Public

Indianapolis, Ind., March 5—The base hospital unit in France equipped by the Eli Lilly Chemical Co. of Indianapolis, and known locally as Brunswick for Lilly Base Hospital, France, the Lilly Base Hospital, will soon be enjoying a “Red Cross” Brunswick machine with about 400 records.

George Standlee, manager of the Brunswick Shop, decided the Indiana men and women who have patriotically donated their services to the Government by joining the hospital unit company, were deserving of anything that could be done for them. The owners of the shop heartily endorsed Mr. Standlee’s idea of sending the unit a “Red Cross” machine. The 400 records representing all kinds and makes were donations from Indianapolis people who saw the machine in the window of the Brunswick Shop.

Ninety-Two Victorolas in One Camp

Rhodes-Mahony Furniture Co., Chattanooga, Does Nearly $9,500 Worth of Machine and Record Business at Camp Near That City

Chattanooga, Tenn., March 4—The important position held by the talking machine as a means of entertainment at the various military encampments is strongly emphasized in the record just hung up by the Rhodes-Mahony Furniture Co., this city. Through the efforts of H. G. Ray, manager of the Victrola department of the company, there were sold to various individuals and organizations at the army camp here ninety-two Victorolas valued in all at $5,448.65, together with over $3,000 worth of records. The machines were bought in some cases by officers, and in other cases by company units, and Victorolas IX, XI and 14, were surprisingly frequent in the list. The figures, as offered, were compiled up to and including February 26, and several outfits sold since that time are not included.

Mr. Ray has made a complete list of sales to the camp, including the name of the purchaser, style of machine, and the price, and it makes a most impressive showing, one of which the company can feel proud.

Put on Your Deduction Cap

When a goose lays an egg, she just waddles off as if she was ashamed of it—because she is a goose. When a hen lays an egg—ah, she calls heaven and earth to witness it! The hen is a natural-born advertiser. Hence the demand for hens’ eggs exceeds the demand for goose eggs, and the hen has all the business she can attend to.—Andrew Lang.

Arthur F. Odell, a jeweler of Quincy, Ill., has bought out the Quincy Phonograph Co., at 411 Hampshire street, that city, and has placed Theo. Arnold in charge as manager.

Victor Records

How Scarce Records May Be Obtained

TO VICTOR RETAILERS

Instruct us what records you desire us to hold on order and to ship whenever received from the factory. We will thus be able to fill in your stock on the good numbers.

Very often good numbers arrive after your order has been filled and unless we have instructions to back order, the opportunity of getting them is lost.

The retailer who places his order in this manner has the advantage over the one who doesn’t.

Get the advantage—Order NOW.

Magic-Tone Needles

For Immediate Delivery

We are in a position to make immediate deliveries on loud Magic Tone steel needles packed in envelopes of 100.

PRICES

In lots of 10,000 and up 65c per thousand. In lots of 100,000 and up 60c per thousand.

We will also furnish them, if you desire, in tin boxes, packed three hundred to the box, at the following prices:

In lots of 10,000 and up 75c per thousand. In lots of 100,000 and up 65c per thousand.

In lots of 300,000 and up 60c per thousand.

Owing to the scarcity of needles, it would be to your advantage to anticipate your requirements and send us your order by return mail.

The House of Service
VICTOROLAS—SUPPLIES—NEEDLES
Mr. Dealer:

Do you know that if you seat your prospect in a comfortable chair before the

GABELOLA

and "Just Push the Button"

that it will sell itself?

You can say with perfect frankness and without fear of contradiction that—

"This super-talking machine is winning its way in the thousands of homes where something more than a mere talking machine is desired."

It is self-operating— you don't have to change needles, records, or wind it up because these things are taken care of automatically.

The Needle magazine contains 600 needles, and a new one drops into place each and every time a selection is played.

The record container (which contains a repertoire of 24 selections) automatically changes the record just as soon as a selection is played.

The motor is electrically driven and controlled.

It is ideal for the home, dancing school and restaurant.

A personification of pleasure and entertainment "with all the bother left out."

You can say all this and more, but it would be unnecessary.

"Just push the button" and then have your order blank ready.

The customer who is not asked to buy a more expensive Columbia Grafonola than he can afford will come back for a higher-priced model, some day. And he will spend more for records, in the meantime, because he will have more to spend.

Columbia Graphophone Co.
Woolworth Building, New York

MANY NEW DEALERS ENTER THE FIELD IN BALTIMORE

Retailers Generally Have Fair Supplies of Goods Though Jobbers Are Kept on the Jump—Columbia Co. Occupy New Headquarters—Motor Truck Service Proves Big Aid

BALTIMORE, Md., March 5—Talking machine business with the retailers is in fine shape in this territory, but the jobbers are not as well off, owing principally to the lack of goods to meet the demand of these trade. For the month of March, however, goods began to arrive in better shape, but not quite sufficient to meet the demand of the orders the firms have on hand. While some of the wholesale houses went behind on their shipments of goods the orders they have, if they could have been filled, would have run up a staggering total for increased business. At the same time there is a strong current of optimism among the dealers, who are looking forward to better shipping conditions and finally additional consignments of records, which have been coming in very poor for some time.

During the month the Columbia Co. ran a series of advertisements in one of the local papers, featuring the Burgess Bed-Time Stories for Children, which they have put out on records. This paper carries the Burgess feature and the advertisements appeared on the same page. The local Columbia headquarters expects some good business from this plan, which was given but an experimental trial.

Several talking machine dealers also took advantage of the advertising feature, which is being conducted in The Star and appeared with the other piano houses offering pianos and players. The ads were attractive and all music dealers believe the page will make an increased music public and bring about business.

The Columbia Co. moved into its new headquarters at 16 South Howard street this week and are just getting things in shape to handle business for the coming season. W. S. Parks, the local manager, is delighted with the new home and is looking forward to big business, which will be handled with more facility and dispatch. Mr. Parks expects to devote most of his time on the road, and the general office work will be in the hands of S. Clifford Cooke, the assistant manager. Mr. Cooke just now is devoting most of his efforts to watching the shipping department and making every effort to get goods out. During the month A. R. Creed, W. T. Shribbert and F. W. Peck, of the sales force, were sent to the New York headquarters of the Columbia Co. to take a special selling course.

The Columbia Co. is using motor trucks to ship machines and records to Washington and points along the line. Many dealers in the outlying territory are driving to the Columbia headquarters in their motor cars and obtaining their supplies of machines and records. Mr. Carlyle, of Gaithersburg, Md., who recently became a Columbia dealer, grew impatient in not getting its goods quickly and motored to Baltimore and obtained his supply. Mr. Bullock, of the Bullock Furniture Co., of South Carolina, was a visitor to local Columbia headquarters during the week. February business with the city trade showed an increase for the Columbia Co., but the territory did not go ahead, owing to shipping conditions, and not the lack of orders. For the past three weeks Mr. Parks and Mr. Cooke have been getting on the job at daylight, and working until late in the evening with the force getting things in shape.

The Brunswick phonograph is now getting established in this territory, according to Mr. Loesch, of the local headquarters of the Brunswick-Balke Colfender Co. In Baltimore Braggers' department store is handling the line exclusively and showing good results. The following dealers have just been signed up to handle the Brunswick: Ira Weights, Bedford, Del.; York Record Exchange, York, Pa.; Hodnett-Chisman Furniture Co., Danville, Va. Mr. Loesch is well satisfied with conditions and expects to announce additional dealers next month, there being several contracts in the making at this time.

W. C. Roberts, of E. P. Droop & Sons Co., Victor distributors, reports that business in the retail department showed up very well, but the wholesale end fell back 33 per cent. over the same month, shortage of goods and inability to ship being the cause. Mr. Roberts was made happy to-day, for while The World representative was speaking with him his shipping department reported the arrival of a shipment of goods, but the amount received will not begin to fill the orders.

Jesse Rosenstein, for the National Piano Co., the Pathé distributor, reports business fairly good, but held back for the lack of goods. George W. Lyle, vice-president of the Pathé Frères Phonograph Co., was a visitor to him during the month.

H. D. French, of the H. D. French Piano Co., W. W. Kimball representatives, is still handling all of the Kimball machines that are sent to him. He has not been able to properly introduce them to the Baltimore public because of the inability to obtain a sufficient number of machines to make a big drive.

H. M. Little, in charge of the retail department for Cohen & Hughes, Victor distributors, reports a wonderful business in his department, despite the lack of back number records. The wholesale business of this firm was also held back because of lack of goods. During the month Mr. Cohen, the largest music dealer in Highlandtown, and who handles the Victor line, has been doing a good business, but has not been able to meet the demands for either records or machines. He has curtailed his sales force about 40 per cent. and is thus able to handle the business at a good profit.

Mr. Pink, of the Frank-Park Talking Machine Co., Victor dealers, is well satisfied with business, and is planning to improve his department by installing three additional booths and a new record room.

The jobbers received many orders from Southern merchants during the past month, for this is the season that the Merchants' & Manufacturers' Association of Baltimore provides its retailers to visitors. More than 600 merchants from the South have registered with the bureau up to this time, the influx of merchant buyers to the city showing an increase of more than 100 per cent. over the same period for several years past.

C. H. HOPPER VISITS NEW YORK

C. H. Hopper, president of Hopper, Kelly Co., Seattle, Wash., was a visitor recently at the executive offices of the Columbia Graphophone Co., New York. Mr. Hopper, who is recognized as one of the most progressive talking machine men on the Pacific Coast, spoke optimistically of the business situation in his territory, and commented upon the fact that Columbia business is increasing by leaps and bounds. Mr. Hopper was gratified to learn that the Columbia Co. is making plans for a banner 1918, and was particularly impressed with the plans which the company is making for a record-breaking Columbia record business.

CRYSTAL EDGE MICA DIAPHRAGMS

Let us send you samples today of our diaphragms and you will readily understand why the best talking machines are equipped with Crystal Edge Mica diaphragms exclusively.

We use only the very finest selected mica, the best diaphragm material in the world.

PHONOGRAPH APPLIANCE CO., 109 West Broadway, NEW YORK
THREE YEARS PROGRESS

The last report of our Board of Directors to our Stockholders states that the increase of sales of "HOFFAY" products during 1917 was 1,808 per cent over those in 1916.

WHY?

Because we manufacture the perfect instrument. Because we manufacture the reproducer which has led the World for the last four years—the "Hoffay Tone-tongs." Because we have the sextest reproducer—the "Tone-fork-tongs." Because we manufacture the unique "Air-tight" mechanism from the Reproducer to the grill of the cabinet, which preserves the beauty of the "HOFFAY" tone.

If to a "wind" instrument you add or change the position of a hole or "key," the tone changes.

If a "string" instrument gets cracked the tone is lost.

If a "singer" loses a front tooth his tone is lost.

If a "cigar" gets broken the flavor is gone.

The same applies to a talking machine—that is why the "HOFFAY," although playing Victor and Edison types of records, is "Air-tight."

...
THE WONDERFUL

"RESURRECTONE"

and the

"HALF-FORK-TONE"

Here are illustrated and described the two supreme reproducers, which are now sold to fit machines of other makes, to show what is the minimum tone that can be expected from the "HOFFAY"—the unusual "Airright-

phone."

In the "RESURRECTONE," the diaphragm is vibrated by a "tuning-fork" working on both sides, the ridges at the two arms being automatically in contact with each other. This produces a harmony of vibration and naturalness of sound, being the concentrated parts.

In the "HALF-FORK-TONE" the resonance of the two arms in the diaphragm is of the "HOFFAY" fork type, which is another exclusive feature making this reproducer absolutely superior to all others. In the "HALF-FORK-TONE," a one-arm lever rigidly connected vibrates the diaphragm, instead of the "tuning-fork."

The "HALF-FORK-TONE" is still much better than reproducers of other makes because the lever is supported by the other remarkable exclusive feature of the "RESURRECTONE"—the "Brasfall" Pencil Wire Mounting which bends and rebinds the sounds, and which has the additional great value of being practically a "reaction" lever.

Order a sample: improve your machines, increase the value of your records, and learn by actual test how much better the complete "HOFFAY" instrument must be than any other machine. "Your own ears will pilot you right to the "HOFFAY," as there are no two records alike."

Hoffay Talking Machine Co., Inc., 3 West 29th Street, New York City

VALLORBES NEEDLES IN DEMAND

The Vallorbes semi-permanent needle, which was recently announced to the trade, has jumped into instant popularity. The Vallorbes Jewel Co., producers of this new needle, and who are located at Lancaster, Pa., are in receipt of orders from practically every section of the country and are industriously tending to their filling.

ROY MARSHALL AGAIN AT DESK

The many friends in the trade of Roy Marshall will learn with pleasure that he has recently returned to his duties in the advertising department of the Victor Talking Machine Co. Mr. Marshall has just recovered from a severe siege of pneumonia.

The Brunswick-Munn Music Co., of Waterloo, Ia., has opened a new branch at Cedar Falls, Ia., making the third store now operated by the concern. The new store will handle the Brunswick phonograph and Pathe records.

T. McCREADY NEW VICTOR TRAVELER

Thomas McCready has been appointed successor to Roger N. Lagow, on the traveling staff of the Victor Talking Machine Co. Mr. McCready will travel in the Middle West, concentrating his energies as a business ambassador in the State of Ohio.

JOINS THE NATIONAL ARMY

M. P. Fitzpatrick, who was formerly a member of the traveling sales staff of the Silas E. Pearsall Co., New York, Victor wholesalers, is now a member of the National Army, stationed at Camp Meade. Mr. Fitzpatrick is well known in the Victor trade, having visited the Victor dealers in the West before joining the staff of the S. E. Pearsall Co.

Edward Quick, of North Milwaukee, Wis., has been appointed distributor for the State of Wisconsin for the World phonograph, manufactured by the World Phonograph Co.
New York gave Stracciari an ovation. Stracciari has given the Columbia April program a splendid record—the song to the courtiers, from "Rigoletto." Every opera lover will enthuse when he hears this one.

Columbia Graphophone Co.
Woolworth Building, New York

FREIGHT CONGESTION CHIEF DIFFICULTY IN PORTLAND

Volume of Business Only Limited by Ability to Meet Demands—Dealers in Every Line Under Stock Handicap—Early Relief Expected—Reserve Supplies Help Out

PORTLAND, Ore., March 4.—When the freight congestion is relieved Portland, Ore., will have talking machines in nearly every home—at least it so appears from the demand. This demand, by the way, is almost too great for the supply. Talking machines and records are in stock in nearly every music house in Portland. Wheeler & Co., Portland, Volland & Co. of the Victrola department of the Ira F. Powers department store, says it is impossible to get records enough to satisfy customers. The Gadsby Furniture Co., which has recently added the Columbia machine to its stock, while pleased with the success of the new department, regrets the condition which seriously handicaps the business. C. E. Moore is in charge of this department and its success is largely due to him.

All the music houses that carry the Victor, Columbia, Edison, Sonora, Brunswick and Stradivaria are feeling the effect of the railroad difficulty. Eilers Piano House, which has one of the largest talking machine departments here, is selling the machines and records so fast that a new supply will be imperative in a short time.

H. A. Raynor, manager of the phonograph department of this company, is cheerful in spite of the railroad snags and feels that the good spring trade with plenty of goods coming.

Sherman, Clay & Co.'s immense stock of Victrolas is well looked after, but business is scarce so that even this big stock is not exhausted unless more Victrolas and records are received.

F. B. Norris, of the Wiley B. Allen Co., is also selling machines and records much faster than they are coming in.

Business men, in other lines as well as in the talking machine trade, believe, however, that there will soon be a great improvement in the transportation problems for the Pacific Northwest. The car shortage in Oregon on the Southern Pacific lines has been entirely wiped out in the last few weeks and a slight surplus recorded. A few months ago there was a shortage of more than 2,000 cars on this one line. The Oregon Washington Railroad & Navigation Co. has almost wiped out its car shortage and the Northern Pacific and Great Northern promise to have a surplus in a short time.

The Hyatt Talking Machine Co. has a big supply of Victrolas, Columbia and Edison, but they are selling fast. Records are plentiful in the various houses, but there are certain popular records that are impossible to obtain.

The Harold S. Gilbert Piano Co., which is also carrying the Columbia, is running short of machines.

Bush & Lane is eagerly awaiting the arrival of a carload of Sonorans which are on the way.

The G. F. Johnson Co., which carries the Victrola, is looking for more goods, as is the Wakefield Music Co., which is doing such a big business with the Brunswick machine that the supply will have to be renewed in a very short time or there will be a lot of disappointed customers. The Edwards Furniture Co. has a big supply of Brunswick and Usona machines, but these cannot last all spring.

James Loder, formerly manager of the talking machine department of the Wiley B. Allen store at Portland, Ore., is now manager of the talking machine department for the Bush & Lane house here. Mr. Loder is so well known by Portland people and has such a big following that his customers depend very much upon his opinion. The Bush & Lane people consider themselves singularly fortunate in securing him. Mr. Loder is very much interested in the Sonora talking machine, which is sold exclusively in Portland by Bush & Lane. Mr. Loder says the Victrola, the Sonora and the Columbia make a splendid combination and satisfy the tastes of all customers.

Taylor C. White, manager of the local Victrola department of Sherman, Clay & Co., has made this department of the well-known music house one of the most efficient on the Pacific Coast. Maud Powell, the famous violinist, has been a Portland visitor for several weeks, giving a course of violin lessons. She visited the Sherman, Clay store and expressed her delight at the beauty and excellent service shown in the talking machine department.

Miss Pauline E. Norris, the new Victrola manager, is making a wonderful record and that indefatigable work is bringing results.

The Wakefield Music House reports large sales of Brunswick machines and records. February trade was a record-breaker and March has started off even better than February. Spring trade promises to be the greatest in the history of Portland.

Lack of records is one of the big features noted in the Portland trade. Miss Olga Binder, of the record department of the Wiley B. Allen Co., is almost dismayed at the lack of popular records in stock. While the Wiley B. Allen Co. has an enormous stock of records, the demand for patriotic and popular records has been so insistent that the immense supply is rapidly becoming exhausted.
This is the MOTOR whose phenomenal success made it necessary for us to double our factory capacity.

The "Butterfly Motor" has won the endorsement of leading talking machine manufacturers everywhere. It is giving excellent service under exacting conditions, and is a motor that is guaranteed in every detail. Read its specifications and you can readily understand why the Butterfly Motor is accepted as a standard in its field.

Try a Sample of The BUTTERFLY Motor. You will use it exclusively after a thorough test.

SILENT BUTTERFLY MOTOR
Jewel Bearing

Specifications

- Revealed gear noiseless winding.
- New ratchet device that prevents clicking.
- Bakelite intermediate gear—absolutely silent.
- Plays seven to eight 10-inch or five and a half 12-inch records at one winding.
- Cast iron nickleated frame.
- Powerful, durable, compact, accessible.
- Built especially for the highest-grade machines.
- Guaranteed in every minutest detail.
- The perfection of mechanical genius as applied to the phonograph motor.

New Jersey Plant: NEWARK, N. J.

KANSAS CITY DEALERS ARE STRONG AFTER BUSINESS

Despite Shortage of Stock They Are Carrying on Strong Campaigns With the Goods on Hand—
Junkins-Riley Co., Pathe Jobber, Turns Over Dealers to Wm. Volkter—Other News

KANSAS CITY, Mo., March 5.—Despite shortage of stock, and the problems brought about thereby, talking machine dealers in this city and vicinity are not in any sense marking time. Although some of the more popular models of machines and the most desirable records are practically impossible to get, they are, nevertheless, carrying on strong campaigns to dispose of the goods already in their stores and to build up for the future when conditions get back to normal. There is a lot of missionary work being done that cannot, and is not expected to, bring results for some time to come.

An interesting development of business in this section is found in the demand from the oil district. Fortunes are being made in oil over night, and the mechanic, or laborer, who yesterday was a prospect for a $20 machine may to-day be in a position to buy one costing several hundred dollars. The pleasing part of the situation is that most of the deals with the oil men are for cash.

The Junkins-Riley Co. who have been Pathe jobbers for the Kansas City territory for a number of years, have sold a large part of their stock and turned over their dealers to the Wm. Volkter Co., jobber of household furnishings. The Wm. Volkter Co. is now the sole Pathe jobber of this territory.

A BIG DEMAND
Throughout the Country for

CORTINA FRENCH AND ENGLISH MILITARY RECORDS

Get your share of this business. An ideal gift for the boys in training or the teacher. Is often sold a machine with it.

The course consists of an authoritative Military Manual containing a foreword by Major Gen. Leonard Wood, with twenty phonograph records of 10 1/2 inches, with full information. Advertising matter, military posters gratis.

Also Spanish, Italian, German, and French for gunnaries.

CORTINA ACADEMY OF LANGUAGE

DEALERS EVERYWHERE ARE SELLING QUANTITIES OF OUR

HANALEI BANJUKES (Ukuleles in Banjo Form)
A bigger hit than the Ukulele because much louder and more pleasing in tone. Simple to play and easy to construct. Perfect two octave scales. A thoroughly practical instrument for both solo playing and for chorus. Send for illustrated catalog and price list today, at

The Banjukes are one of the biggest sellers in the musical instrument line.

SHERMAN, CLAY & CO.
Sole Manufacturers
165 Kearny Street
San Francisco

If the store dancing of the Edison company was merely a success at Pori, at Clinton, and at East Orange, it took Kansas City by storm. On March 2, the end of the second week, the enrollment was up to 800 in the Kansas City Edison House, and it was in Kansas City that, for the first time, the clumsy male insist on coming to learn to dance. The first boys’ classes were organized because the demand was so insistent. Those over eight years are not enrolled. But a large number between four and eight (garbed in guine costumes of cheesecloth) put in a regular hard time, and seem to enjoy it as much and more than baseball.

Miss Baldwin says that never before have the school’s records been such a success. Hundreds of the little people come daily for registration while the mothers of many others register them over the phone. The lessons are being given in the Edison Shop (which has been fitted up splendidly for the purpose) and the mothers wait for the children in the concert room above and listen to the machines.

A unique feature at Kansas City is the large class of children from the city’s slum district. They come every Saturday morning with a teacher from their ward school and to them that hour of dancing is a brief stay in Paradise. Many of them are Russians and the art of the dance is born in them.

STRONG DEMAND FOR PHONOGRAPHs

In a review of general business conditions, the New York Times had the following to say regarding the market for phonographs at the present time:

“The demand for phonographs continues strong, according to reports from several manufacturers with offices in this city. Though the hundred-dollar article seems to be the most sought, there is said to be a good many of the more expensive lines selling as well as a large number of the cheaper grades. The table cabinet continues in the lead among the higher grades. It is predicted that its sale this Spring and Summer will be unusually large due to its being particularly well suited for the Summer cottage. It was explained that besides being a musical instrument of rare qualities it combines practical utility with beauty in a manner that is very pleasing.”

HANALEI BANJUKES (Ukuleles in Banjo Form)
Featuring the Musical Possibilities of the Talking Machine

By William Braid White

Records of Piano Solos

At the present moment the world finds itself very much in a state of flux. Everywhere new ideas are being tried out with an enthusiasm which a few short years ago would have been thought almost inconceivable. Old notions are being reevaluated and whatever does not seem to weigh up to standard is being thrown on the dunghill. Every business, whether directly or indirectly interested in the great war which is now engaging our energies, is feeling the impulse of new and fresh ideas. The business to which the energies of this paper are devoted is one which, before the war, could rightly have been called new, fresh and untrammelled, yet even in this bustling industry we find the signs of a profound and quickening spirit. We live in great times.

It is my especial business to discuss with those who sell talking machines ways and means of using and stimulating the public interest, by showing how the musical possibilities of the talking machine may be turned to best advantage. In so doing I am forcibly reminded of a tour de force, by observing that the current of events, how much in these days our business must be kept abreast of new ideas and new criticisms by a better understanding on our parts of its strengths and virtues.

The fact is not to be concealed that the public is learning to-day more quickly than it ever learned before. Its feelings are sharper, its perceptions quicker, its criticisms more pungent.

Wartime is bringing increase in efficiency and corresponding increase in demand for the best of everything. The shoddy and the cheap look shoulder and cheaper than ever. The good is becoming more and more thoroughly appreciated and understood. All this is well. And it has its moral value for itself.

Records

In the retail selling of talking machines the record is, of course, the dominating feature. I mean that it is the record which excites the interest in the beginning, and mainly sustains it during the process of selling. The machine itself is, of course, complementary and essential, but the record is the interest-groove; the kernel, so to speak.

A fine set of records may be sold with a relatively cheap machine, but the finest machine cannot be sold without records that much above the plain. It becomes our duty in these days of wartime prices, keen public criticism, intense competition and smaller margin of profit, to develop intensively every branch of the business which shows good profit and helps to produce more business.

Piano Records

It is a fact that certain branches of the record business, which normally should be good sellers, have not been developed by retailers with quite the intensity to which their advertising value would properly entitle them. When we consider that violin records by Kreisler and voice records by Galli-Curci (to mention only two names that come to mind), sell extremely well, while piano records by Paderewski and Go- dlowsky (again choosing at random) sell only moderately well, we must ask ourselves what can be the reason for such a curious condition.

It cannot be that the violin or the voice is necessarily more popular than the piano, of itself. Indeed, it is well known that the piano is one of the most popular of all musical instruments and that piano music is the most popular of all music. How is it that piano records do not sell as well as they ought to (that is to say, in

eXtreme quantities) and what can we do about the matter?

I need make no apology for choosing such a topic, since quite obviously high-class piano rec- ords are profitable to make and sell; and therefore any defect in the public demand for them should be investigated and if possible corrected.

The task is harder than it seems, perhaps, but while I must decidedly disclaim any ability or inclination to teach the manufacturers or retailers what they know better than I do, I must neverthe- less be allowed to say some things which come to mind through long-continued observation, and which are without doubt useful in affording some gleams of light in a rather dark corner.

Two Reasons

There can only be two possible reasons for any lack of public demand for piano records, or for any slowness, even, of such demand. These reasons may be (1) some possible defect in the composition of the record, or (2) some lack of interest in the product on the part of the retailer.

Let me briefly examine both of these ideas for our mutual benefit.

Ear vs. Record

Those who have watched the progress of re- cording are well aware that until about ten years ago, scarcely any attempts to record solo piano music had been seriously made. The piano had been from the first used as an accom- panying instrument in voice recording, but the support it afforded in this respect is of only the slightest weight, being perceptible and no more. The art of recording solo piano work has pro- gressed quite slowly, meanwhile, and it has gradually come to be seen that much technical re- finement has yet to be brought about before the marvellous fidelity and power of the vocal rec- ords are approached. The piano record does not show the slightest defect in respect of its "hearing." Certainly the record takes up all the sounds that proceed from the piano. The only trouble is that the record picks up and fixes permanently a certain varying number of fugitive incidental sounds that accompany all playing of the piano, and reproduces these with complete fidelity. Indeed it reproduces them with more than complete fidelity, for it tends to give us these incidental sounds in forms not in- deed really exaggerated but in their actual right proportionate powers; something which our ear, when listening to piano playing, naturally and instinctively rejects.

Reverberation

In a word, we hear selectively. The play- ing of a piano in a small room produces a multi- tude of reverberations or echoes, from the reflec- tion of the sound waves back from walls and floor. These echoes the ear rejects or ignores. But the record does not. Hence the record gives us certain incidental additional sounds mixed up with the intended sounds, in such a manner that an effect of "blurring" and of some- thing that can only be described as an initia- tion of the jangle of a cymbal after it is struck sticks out from the sounds of the piano and per- ceptibly modifies them. It need hardly be added that this modification does not make for im- provement.

Now, some of these matters have been dis- cussed briefly at some recent piano technicians' meetings. A report of one of these appeared in the February number of this paper. I was glad to observe at this meeting evidences of respect for, and interest in, the talking ma- chine and especially the plain indications that the piano itself is recognized by these practical piano men to be responsible for a good deal of whatever criticism may be leveled at records of piano music. Although it could not be said that any specially conclusive results were obtained, it is fair to say that all present were able to perceive that the piano, as played and built for ordinary playing, is not an ideal instrument for recording of sound.

Defects of the Piano

The defects of the piano may be briefly sum- med up. In the first place, the sounds which proceed from this instrument are too widely diffused over the field of sound-wave operation. In the second place, the sounds which proceed from stuck strings begin with a great intensity which rapidly subsides, and so tend to reflection from the walls of a small room, thus producing reverberations and echoes which are picked up by the record and interfere

with the clarity of the reproduction. In the third place, the bass strings vibrate in such a manner that the strong fundamental sounds which form the best cutting qualities of the piano that the record are swallowed up in a mass of incidental partial tones. In the fourth place, the vibration of the case and metal framing of the piano is transferred to the non-conducting material, such as felt, with all re-entrant angles and elliptical concave corners eliminated. This will tend to reduce, if not eliminate entirely, reverberation from walls, floor and roof. Secondly, such construction of the piano’s case as will tend to deliver its sound waves in one given direction is highly desirable. This might be done by enclosing the piano, save only the keyboard, in a concrete box, having a tapered end with an opening to the talking machine bore, which also should be of concrete or nonconducting material. Solid glass would be as good but more expensive.

The perfect piano for recording purposes will have to be built particularly, I think. Such a piano must be able to play all longer, so as to permit of longer bass strings. I should like to see a twelve or even fifteen-foot grand built for the special purpose of talking machine recording. Many of the present difficulties would then vanish. The technical reason I have only been able to state briefly and inadequately; but so far as they go they are thoroughly valid.

Selling
So much for the recording side; but now what about the selling? After all, the facts that I have mentioned so far are not operated to prevent the sale of talking machine records of piano music, nor is there in any particular reason why they should have. I have stated what one can perceive for himself, but I have not failed to show likewise that the art of recording for the piano is in a state of progression. Why then be subjected further improvements—which will come in good time—when we can have so much that is good already, and moreover can do our part towards educating the public into the desire for piano music records now? As the manufacturers solve, one by one, the problems of recording, they will increase the number thereof and will go after piano music more and more persistently. They will do this because the piano is the most popular musical instrument; and because the player-piano and the hand-played player-piano record has awakened a new and vital interest in all that pertains to piano playing. All the ideas set forth above tend to show, in the aggregate, that the art of producing piano records relative as perfect as those which the voice permits is a matter only of adjustment to certain conditions. Let the conditions be recognized and especially let the piano trade show a willingness to cooperate. The problem will then very soon solve itself.

"Push Them"
Therefore, it should be the aim of every wise retailer to push the sale of piano records with all his might. He should remember that, in the first place, many eminent pianists, with all the recognition and applause of their names, have been willing to make records of their act. He will then realize that these men plainly see the possibilities in front of them and are not ashamed to associate themselves with a movement entitled to the highest respect and encouragement. He will likewise realize that any line of merchandise to which is attached the prestige of a great name is worthy of all encouragement and at the same time possesses an advertising value that does not pertain to any which is not in the same position as to name. He will realize, in short, that he can sell piano machine records of piano playing, and make them profitable in every way.

Choices
Space does not allow me to do more than merely mention the names of a few records which might especially be studied by those who would sell piano music for the talking machine. But a word of suggestion may be useful. Numbers which involve brilliant runs, glittering scales and ornamental playing generally, but which do not call for heavy basses, deep sustained tones and the tragic side of the piano, as it might be called, sound best and will be the most popular. Such records as the Chopin study in G minor (double notes) by Bachauer, the Liszt Gnomenreigen by the same, Go- dowsky’s record of the Chopin Vale August 5, 1921 and of Henselt’s "If I Were a Bird," are excellent examples of just the thing to offer to prospective customers who are not yet well acquainted with the possibilities of piano music in talking machine records. Little things like the Paderewski Minuet, like "Harri, Harri the Lark," or anything else that is mainly depend- ent on graceful lightness and ornament, sounds charming on a good record. It is better, I am quite convinced, to work on these always before attempting to show more serious pieces. Moreover, the customer will like them better and will buy them more readily.

The salesman can find many others of the same sort which a study of the catalog will suggest to him. This is a case where wisdom and discretion are desirable in every sense.

I believe in the piano record for the talking machine and in its future development. I want to see the public educated to it. It is a fine wide field. Let us get at it now with plough and harrow.

**PLAN TO FINANCE EDISON DEALERS**
Thos. A. Edison, Inc., Makes Arrangements Whereby Dealers May Utilize Installment Contracts in Payment of Their Accounts With Distributors—Details of the Plan

Thomas A. Edison, Inc., have recently completed a plan for the financing of their dealers’ deferred payment contracts. Under this plan, which is operated in conjunction with the Commercial Investment Trust, of 61 Broadway, New York, Edison dealers may utilize their retail installment contracts in payment of their account with the distributors. The charges for the accommodation are within the amount now collected as interest from the retail purchaser of the phonograph.

In a recent interview Mr. Harrison Duran, financial supervisor of the Edison Co., had the following to say regarding the new plan: "The financial plan formulated by the Commercial Investment Trust is a broad one, and decidedly advantageous. The charges are considerably less than those previously quoted by any of the regular discounting companies offering the same accommodation. The plan includes the insurance against loss or damage by fire, without additional cost, of all instruments in a purchaser’s possession for an amount equal to the unpaid balance of the amount advanced. The plan is based on the well-known trade acceptance—in this case termed a ‘collateral ac-
ceptance.’ A dealer attaches his customer’s paper to the acceptance, and receives credit for an amount not exceeding 84 per cent. of the unpaid balance of installments.

"The plan has our entire approval, and no doubt will be of great advantage to us. We are now in touch with Edison dealers throughout this country and Canada. It is the only plan of its kind which the Thomas A. Edison, Inc., recommends to its dealers, and is the result of very sincere efforts on our part to relieve our dealers of some of the burden of their financing. The fact is that Edison installment plan has terms which up to the present date have not been available to phonograph dealers."

**CONGRATULATIONS TO W. H. BISHOP**

W. H. Bishop, manager of the Trinity Talking Machine Co., 52 Broadway, New York, is receiving the congratulations of his many friends in the trade, upon the arrival at his home recently of Shirley Frances Bishop. This young lady is already taking a keen interest in Red Seal Victor records, and endeavoring to emulate the examples set by some of the famous Victor operatic sopranos.

The Trinity Talking Machine Co. is one of the most successful Victor retail establishments in the lower part of New York City, and Mr. Bishop has been an instrumental factor in developing the company’s business to its present satisfactory totals.
EDISON DIAMOND DISC JOBBERS HOLD ANNUAL CONVENTION

Only Three Members of Jobbers' Association Fail to Attend—Important Trade Topics Discussed—All Officers Re-elected—Edison Officials Make Addresses—Banquet at Sherry's

The Edison Diamond Disc Jobbers' Association held its annual convention at the Hotel Knickerbocker, New York, on Monday and Tuesday, February 18-19, and, despite the unusual travel conditions prevailing, only three members were missing when the roll was called, the jobbers coming from all sections of the United States and Canada to attend the gathering.

The convention program in the main followed closely those of other years, and included special papers read by various members of the association, talks on important topics delivered by factory officials, and general discussions at an open forum.

The first business session was held on Monday, at which time various officers and committees made their reports for the year. The reports for the most part were very encouraging.

All officers were re-elected for another year, they being: Walter Kipp, Kipp Phonograph Co., Indianapolis, president; L. N. Bloom, Phonograph Co., Cleveland, vice-president; F. E. Bolway, Bolway & Son, Inc., Syracuse, secretary, and H. H. Blish, Harger & Blish, Des Moines, Iowa, treasurer. The advisory committee for the coming year will consist of A. H. Curry, Dallas, Tex.; Albert Buehn, Pittsburgh, Pa., and George Babson, of New York.

Tuesday's sessions were given over to the reading of special papers and addresses by members of the Association and by factory officials, the latter including William E. Maxwell, vice-
Walter E. Kipp, President

on the Edison phonograph, which was discarded upon to considerable extent. F. E. Bolway read a paper on "Retail Selling Plans," and H. H. Blish, Jr., read a paper on "Tone Tests."

The session broke up at 1 o'clock when the factory officials and supervisors were the guests of the jobbers at a special luncheon at the Knickerbocker.

The afternoon session was opened by Harrison Durant, who presented a new and interesting financial plan to the jobbers, following which A. H. Curry read a paper on "Wholesale Selling Plans," W. B. Eddy read a paper on "Accounting and Collecting," and B. A. Treasrail, Toronto, led a discussion of war and business in Canada and the United States.

At the conclusion of the regular program, an open forum was announced, and a number of interesting informal discussions were indulged in.

On Tuesday evening the jobbers were the guests of Thomas A. Edison, Inc., at an elaborate banquet at Sherry's, where addresses were made by William E. Maxwell, vice-president of the Edison Co.; Walter Kipp, president of the Jobbers' Association, and others. A number of cabinet artists provided entertainment for the occasion.

Wednesday morning the jobbers went to the Edison factory at West Orange, N. J., for an informal get-together and were served a special luncheon in the Edison restaurant, after which several of the newest Frieda Hempel Re-Creations were provided for their entertainment and information.

THE VICTOR "VOICE" FOR FEBRUARY

Interesting Series of Pictures Show How Vic- trolas Provide Comfort and Entertainment for Fighting Men on Land and Sea

The February number of "The Voice of the Victor" might well be termed a war or military number, for most of the illustrations are calculated to show the interest in music, and particularly Victrola music, displayed by the fighting men of the nation.

The cover design of the February "Voice" consists of over 500 service stars representative of the number of Victor employees who have entered the service of Uncle Sam to date. The big feature, however, is the reproduction of a yard in length of a photograph of something like 40,000 soldiers in camp at Tacoma, Wash., listening to the singing of Alva Gluck. The point is emphasized that the soldiers asked for the selections they had heard on the Victrola.

The center spread is made up of a group of enlarged photographs taken on land and sea, and showing how Victrolas are utilized to provide comfort and entertainment for the soldiers and sailors. One photograph depicts the use of a Victrola in a hospital where its music serves to soothe the patient while he is undergoing an operation.

If you hustle so eternally that your system demands a vacation, you have gotten where you cannot do good work. If you have reached a point where you cannot do good work, you cannot enjoy a vacation.
In every industry there is a leader and this Company has conducted its business with the one thought in mind of being the leader in the talking machine cabinet industry.

How well we have succeeded is indicated by the fact that Century Cabinets are being used exclusively by the majority of the leading talking machine manufacturers. Century Cabinets are giving absolute satisfaction to every user, and every cabinet is guaranteed by the world's largest manufacturer of talking machine cabinets.

We are ready to quote on your 1918 contracts

CENTURY CABINET CO., 25 West 45th St., N. Y.

FACTORY: UTICA, N. Y.
Happenings in Dominion of Canada

TRADE CONTINUING ACTIVE IN TORONTO AND VICTORIA

Toronto, Ont., March 8—W. C. Wilson, for the past fourteen years secretary-treasurer and manager of Mfg. Co., of Meaford, Ont., has joined the Pathé Frères phonograph organization in this city. He comes in the capacity of assistant manager of Pathé Frères Canadian Co., of Canada, and will have charge of the firm's internal organization. Mr. Wilson brings to the Pathé organization not only a wide manufacturing experience, but a business enthusiasm of young men who has boundless faith in Canada's future and the part that Pathé Phonophones and records will play in building up a musical and theatrical industry.

The R. S. Williams & Sons Co., Ltd., on March 12 will close an essay price contest which they have been conducting for the best essay on Mr. Edison's life and inventions, particularly his personal favorite among all his inventions. The contest is open to the girls and boys between the ages of five and fifteen, and $2.50 in all, $100 are offered. This firm is now having daily Edison recitals for school children from 4 until 6 each afternoon, and all day on Saturdays.

J. P. Bradt, general manager of Canada for the Columbia Graphophone Co., has been planning ever since 1917 closed with a business with reports of a business per cent, larger than 1916, how to keep pace with growing demands. Two things he found necessary—largely increased factory facilities, and an enlarged staff. The filling of the latter need is now announced, and factory negotiations are in progress. To aid in the direction of the greatly enlarged manufacturing and growing business, Mervin E. Lyle has been transferred to Canada. Mr. Lyle comes from the head offices in New York. His experience of over fourteen years embraces every phase of the business. With such an experience Mr. Lyle will be of great aid to Mr. Bradt in building up the business; in taking care of sales and the general development of the business to the benefit of dealers in Columbia products.

That music is being demanded more and more by Canadians, and that they have developed musical taste in the last three or four years is the experience of J. Montagnes & Co., distributors in Canada of Sonora phonographs. "Business increases every day," reports Mr. Montagnes. Shipments are now coming from New York by express as a result of the freight congestion, and stocks that they thought ample for some months have been cleaned out.

"Specialists in Victor records," is the way Harry E. Wimperly describes the Victrola Service Co. recently opened up by him in the new Lyllie Building, this city. Having proved his theories right concerning upstairs piano sales-rooms, Mr. Wimperly was encouraged to take on "His Master's Voice" lines, in which he is strength, by being thoroughly up-to-date and enthusiastic as a result of his experience with the line when manager of the Bell piano salesrooms in Toronto. Mr. Wimperly has many original ideas that he is putting into ef- fect, resulting in quite an extensive list of patrons for Victor records being built up in a very short time. By the way, Lieutenant Claude C. C. Bradt, son of Mr. Wimperly, who was among the returned officers from the war front, attached for duty with the First Depot Battalion 1st C. R. C.

F. A. Trestrail, general manager of the Musi- cal Merchandise Sales Co., who are Canadian distributors of Brunswick phonographs and records, is back from a trip to Chicago where he visited the immense factories of the Bruns- wick-Balke Co. The Musical Merchandise Sales Co. has started on its campaign of outdoor ad- vertising, with a handsomely signed "At the Dome," Toronto, which is not apt to leave any passer- by's mind unimpressed with the same "Bruns- wick." Among the newest additions to "His Master's Voice" stores in this city is one opened up by Armand Heintzman, at the northwest corner of College street and Osington avenue. Mr. Heintzman is vice-president of Gerhard Heints- man, Ltd., and superintendent of that company's factories. The retail Victor store is a personal venture "on the side," being an outgrowth of Mr. Heintzman's enthusiasm in connection with talk- ing machine business in general, and Victor lines in particular.

The following is from a letter sent Columbia distributors in Canada by James P. Bradt, gen- eral manager of Columbia interests here: "While we have for many months restricted our manufacture and sales of German, Austrian, Hungarian, Bulgarian and Turkish records, this has now been decided to withdraw from the market every selection which could possibly arouse or foster hostile national sentiment among peo- ple of enemy-country origin resident in Canada. A list is being prepared and will go to you in a few days, showing what records we are sup- pressing. Upon receipt of this list you please im- mediately withdraw the prohibited selections from sale and advise us of your stock of each selection, if any.

CASSIDY'S, LTD., COLUMBIA DISTRIBUTORS IN WINNIPEG

Robert Shaw Continues as Manager—Grand Opera Season Helps Season of Record Sales—Trench Gramophone Appears—Berlin Gramophone Co. Enlarges Its Business—Other News

Winnipeg, Man., March 6—The Western Fancy Goods Co. distributors of Columbia lines in the West, have now been taken over by Cas- sidy's, Ltd., and have moved into very much larger quarters. Robt. Shaw has been re- tained as manager and Garden Stark has been en- gaged as assistant manager. Mr. Shaw reports goods coming in considerable quantities—record shipments from factory but there are thousands of orders for records still unfulfilled.

During the appearance of the San Carlo Opera Co. in Winnipeg the local phonograph dealers (Victor, Columbia, Edison and Balke) took advan- tage of the occasion and used a whole page in the Winnipeg Tribune featuring each day a list of records of the opera playing that night. A Winnipeg officer has just sent to his wife in Winnipeg one of the new trench gramo- phones, which are sold by a London firm. Small in construction, this little machine fits into a compact leather case and is most portable. Its most remarkable feature is the tone it produces. This is effected from a copper reflector which is fixed at the rear of the sound shutter, which resembles those shown in the new electric circular beaters. The great Harry Lauder, the soldier's hero, was heard to great advantage on this wonderful little instrument which takes any sized record. Above the cannon's roar and the constant bursting of shells the lads in the trenches are able to enjoy the dulcet tones of Melba or the rollicking ballads of McCormack. Cross, Goulding & Skinner, who are featuring the Columbia and Brunswick machines with great success, give favorable reports of activities in this department since the beginning of the year. The continued development of the talk- ing machine business improves this firm that the desire of the public for music in the home con- tinue to grow.

The White House (the largest departmental store in St. Boniface) has taken up the Colum- bia line and is specializing in the French records on the Columbia list. Sturwood's, Ltd., announces a big sale of the new Columbia record "Blighty." In connec- tion with this record Mr. Shaw says the output was phenomenal, over one thousand being sold in the first day and a half.

Talking Machine Supplies and Repair Parts

SPRINGS, SOUND BOX PARTS, NEEDLES

THE RENE MANUFACTURING CO.
MONTVALE, NEW JERSEY

"We also request that you send a copy of our list to every dealer on your list who may have in stock any of the prohibited records, with in- structions to withdraw them at once. Please return list, too, as to your dealers' stocks and inform us. We do not intend to withdraw the records of standard composers, or other selec- tions which are without objectional flavor."

To meet the convenience of their outside dealers visiting Toronto, the Canadian Phonograph Supply Co., of London, Ont., distributors of Starr phonographs and records in Canada, have arranged for a local branch. Samples of the various types will be on display. M. E. Stan- field, on the firm's selling staff, will look after this branch, in addition to handling his Ontario territory.

P. K. Wood, of the Thomas Mfg. Co.'s local branch, has returned from a visit to the firm's headquarters in Dayton, O.

Thomas Nash, the well-known "His Master's Voice" enthusiast, who is manager of "His Mas- ter's Voice" Ltd., is developing new ideas from which dealers can sell still more records, was a recent visitor to New York.

Mme. Barrientos, the eminent coloratura-so- prano, exclusive Columbia artist, gave a song recital recently in Toronto and a large sale of records of her recordings is reported.

G. P. Sharkey, who is well known to the Ca- nadian music trade, has started up a new branch under the name of Sharkey Novelty Co., and is offering the trade etched brass nameplates for pianos and talking machines.

Mr. Bas is opening up with "His Master's Voice" lines. The store equipment will include a number of demonstration booths for the Vic- tor department.

(Continued on page 70)
All Columbia dealers have lately shared in a good distribution of Godowsky records, due to this artist's appearing in the leading centers of Western Canada and British Columbia.

The announcement of enlarged manufacturing facilities by the Berliner Gramophone Co., Ltd., Montreal, has been received with considerable elation by the management of the Western Gramophone Co., Western distributors of "His Master's Voice" lines.

Ashdown's has built new mahogany and glass tone rooms and have very materially enlarged the Grafonola department, putting Chas. White in immediate charge under the direction of Ralph Patterson. Business is reported as brisk.

Balson Bros. report conditions and prospects good for immediate future trade in the Edison lines.

The Western Gramophone Co. say there has been a big demand for Victor records, and are looking forward to bigger times when Harry Lauder comes to Winnipeg.

RECENT DINNER OF MONTREAL TALKING MACHINE MEN

About Thirty-Five Members of the Trade Have Most Enjoyable Reunion at Cooper's—Black Diamond Needle Co. Organized—Brunswick Phonograph Popular—Congratulations for Edison

Montreal, Can., March 5.—A dinner free from long-drawn-out cut-and-dried speeches was that of the Montreal talking machine men held recently at Cooper's. The entertainment furnished by professional talent was given hearty applause and numbers of encore.

VALUE OF PERSISTENT PUBLICITY

Kirkman Engineering Corp. Tell of the Progress of Their Products—Advertising for Six Years in The World—Have Built Big Business

The Kirkman Engineering Corp., New York, manufacturer of automatic stops and other successful phonograph accessories, has been making rapid progress the past year, and in a chat with The World Thomas W. Kirkman, president and general manager of the company, stated as follows:

"We have been advertising our accessories in your paper for the past six years, and at the present time have a steadily increasing list of patrons, which includes manufacturers and dealers from coast to coast. As an indication of the value of persistent merchandising and advertising, it is interesting to note that the demand for our K-E automatic stops is far ahead of our expectations, and in advance of our manufacturing facilities."

"When we started to produce our automatic stops, the manufacturers of talking machines did not accept the idea with unanimous favor. Some argued that it was an added expense, and an unnecessary innovation, but our persistent campaign to the trade and the success of our device has 'sold' the idea of an automatic stop to manufacturers and dealers everywhere."

"To-day we are selling the K-E automatic stops to many different talking machine manufacturers, including some of the leaders of the industry. From a new accessory, handled by the dealer only, it has progressed until it is now recognized as a part of the standard equipment of the high-grade, successful talking machine. We have weathered many storms in manufacturing and merchandising these stops, and as we look back upon our six years' experience in this field, we are inclined to believe that the practical merit of our device has enabled us to overcome all the obstacles which confronted us during the first few years, and gained for our product country-wide recognition."

CLAIMS PATENTS ARE INFRINGED

Mutual Talking Machine Co. Announces That It Plans to Prosecute Several Concerns for Imitating Its Ball Bearing Tone Arm

"During the past few weeks," said Wm. Phillips, president of the Mutual Talking Machine Co., New York, "my attention has been called to the fact that several concerns in the trade are infringing on the Mutual ball bearing tone arm. Some of these infringements are sufficiently flagrant to warrant our attention, especially in view of the fact that this tone arm is a patented product, and patent claims have been granted on all of its distinctive features."

"It is our intention to prosecute vigorously all infringers of this ball bearing tone arm, and I have just placed in the hands of our attorneys proofs against two concerns whose infringements have been so serious that our customers have called our attention to their duplication of our product."

"We do not sell the Mutual ball bearing tone arm to motor manufacturers, but market it direct to the talking machine manufacturers or dealers, thereby eliminating the middleman, and enabling us to give maximum service to our clients. We, therefore, feel that the talking machine industry should be conversant of the infringers of our tone arm, particularly as this ball bearing tone arm is an original product, which is fully covered by patents. I may add that we intend to prosecute not only under the patent laws, but under the laws covering unfair competition."

Frank M. Elmer, talking machine dealer of Watertown, N. Y., has purchased a controlling interest in the Watertown News Co. here.
An Artistic Easter Window Suggestion Described for Talking Machine Dealers

By Ellis Hansen

Easter has come to be looked upon as the occasion for elaborate window displays. Department stores, to which the world undoubtedly is indebted for the high standard of commercial art in show windows of this country, generally make the Easter season the time for the "spring openings" and to-day—more than ever before—the success of any "opening" depends to a great extent on window displays. Years ago it was considered good form during the Easter season to use religious emblems, such as a giant cross made up of artificial flowers or wax figures made to represent angels with flapping wings, mammoth eggs with big dolls inside. Stuffed rabbits and live chicks were also noticed in many windows, all to signify Easter and jolly the crowds into the spirit of Easter shopping.

To-day such an appeal from the show windows of any self-respecting store would be considered coarse and poor in taste and, therefore, bad business. The idea to-day of a successful Easter display is rather to carry the spirit of spring, the rebirth of Mother Earth with the flowers, trees and all the living things so dear to all of us after the long cold winter sleep, the floral decorations and show cards the additional first cost will pay in the long run. The fixtures consist of two tall flower stands built on simple straight lines. The lower parts are intended for palms or other graceful leaf plants. The upper parts are made into a kind of flower basket not only intended for holding flowers and foliage, but also serving to support the center decoration. The circular opening in the center piece is to be used for show cards which can be changed from time to time as the occasion might dictate. The illustration of the Easter sign can be made into a beautiful center piece by being done in an effect to resemble art glass. The sign could be painted on thin cloth; the letters in transparency on an opaque background. By having an electric light back of the sign the effect would be charming. Any good card the lower part of the stands, Easter lilies, tea roses, and foliage and separate palm leaves. These can be furnished by any dealer in artificial flowers.

Such decorations can be used again and again, but care should be taken in storing them away when not in use. The making of artificial flowers has reached a high degree of perfec-

Easter Window Display Suggestion for Talking Machine Dealers

The writer is able to make such a transparent sign, but, of course, an ordinary and less expensive card could be substituted. The size of the card should be twenty-five inches in diameter to give plenty of space to fasten at the back. The center opening is twenty-one inches, which would leave two inches all around. The floral decorations used consist of two potted palms for the lower part of the stands, Easter lilies, tea roses, and foliage and separate palm leaves. These can be furnished by any dealer in artificial flowers.

Such decorations can be used again and again, but care should be taken in storing them away when not in use. The making of artificial flowers has reached a high degree of perfec-

Easter Window Display

(Continued on page 72)
AN ARTISTIC EASTER WINDOW SUGGESTION FOR DEALERS

(Continued from page 71)

this is done some very effective results can be obtained.

Now for the making of the fixtures. The easiest way would be to have a carpenter give an estimate as to the cost, and if satisfactory let him make all of the woodwork.

But for those who can spare the time and want the fun of making it themselves, I shall try to describe the material needed and how to go about the job.

Basswood 3/4-inch thick should be used throughout the display except for the square strips as stated. The base should be made 6 inches high, 30 inches wide and 10 feet in length. The height of the two flower stands is 7 feet 6 inches, which added to the 6-inch base makes these 8 feet high. Four strips, 3/4-inch by 1 1/2-inch, is needed for each stand; the length of these should be 6 feet 3 inches. Now mark each corner of the base in the shape of a square 10 1/2 inches, saw out four square holes 1 1/2-inch by 1 1/2-inch, into which the four 1 1/2-inch strips should fit snugly. It is best to lower them to the bottom of the base as they are the main support of the entire fixture. The stands are 10 1/2 inches square, which leaves 7 1/2 inches between the uprights on all sides. The lower part of the stands intended for the palms is 21 inches high and contains 1 1/2-inch by 1 1/2-inch strips four on each side, divided up between the 1 1/2-inch uprights. These should be 19 1/2 inches in length. The distance between the strips must be exact. The two baskets on top of the supporting uprights overlap the uprights 1 1/2 inches on all four sides, which makes the bottom of the baskets 13 1/2 inches square. These are made of strips like the lower part of the stand, but instead of four strips 1 1/2-inch by 3/4-inch six pieces are divided up between the corner pieces. The height of the baskets is 9 inches, which makes the length of the 3/4-inch strips 7 1/2 inches. The "handles" of the baskets are made of 3/4-inch basswood, 2 3/4 inches wide by 10 1/2 inches long. Four such pieces are needed for the two baskets. Four square holes 1 1/2-inch by 1 1/2-inch are sawed out in the bottom of the baskets to hold the four uprights in place.

Now for the center piece. First make the pattern. Get a piece of fairly heavy paper (wrapping paper will do) size 32 inches by 90 inches, which will make one-half of the pattern. First enlarge the working diagram to the proper size, make the inside circle 21 inches in diameter and use this as a basis. The distance between the upper and lower bars in the center piece is 13 1/2 inches; the bars are 1 1/2 inches wide, which makes the size over all correspond to the size of the basket, handles 16 1/2 inches. Copy and enlarge the outlines as nearly as possible. Then take the pattern to a mill and have it hand sawed. The wood should be 3/4-inch bass wood as said before, and the size required for the center piece would be 32 inches wide by 10 feet long. Finish the woodwork in ivory enamel or any other color you might desire.

BOSTON BOOK CO.'S NEW HOME

Have Spacious and Central Quarters at South-east Corner of Washington Square, New York

Hereewith is shown a photograph of the new home of the Boston Book Co. This building, which is a daylight plant, is equipped with the latest time and labor saving machines. The building is situated at the southeast corner of Washington Square, New York, and overlooks the park, thus giving the workers a view of nature both winter and summer. J. M. Alter, president of the above company, is very solicitous after his employees' welfare, and the new home of the company was selected with the view of having one of the most efficient factories, and at the same time, by the installation of every convenience, make the work of the employees a

New Home of the Boston Book Co. pleasure. While the Boston Book Co.'s plant is quite large the necessity of carrying large reserve supplies of paper stock has compelled the firm to negotiate for other space in which to store such material.

MAKES IMPROVEMENTS IN STORE

Since taking over the management of the Rudolph Wurlitzer Co. store in Hamilton, O., H. J. Lee has made a number of improvements in the arrangement of the various departments, special attention being paid to the display and demonstration of Victrolas and player-pianos.

THE GEO. A. LONG CABINET COMPANY
HANOVER, PA.
TWO MILITARY GRAFONOLA TRUNKS

Now Ready for Styles 15 and 25—Have Tray for Records, Needles and Accessories

The dealer service department of the Columbia Graphophone Co. has just issued an attractive circular calling the attention of the Columbia dealers to the fact that there are now ready for distribution, two military Grafonola trunks, which hold Grafonolas Nos. 15 and 25.

Military Grafonola Outfit No. 25

These trunks were designed to meet the steadily increasing demand for such an article, and those dealers who have visited the Columbia headquarters are enthusiastic in their praise.

The trunks are equipped with a tray to hold a quantity of records, needles and accessories, and are especially built to hold Grafonolas securely at the bottom—the tone arm secured so as to permit no swinging, the winding crank fastens to the record tray. The whole, when locked, will adequately protect a Grafonola outfit from the most severe handling. Grafonola trunks are finished in olive drab, with brass and black japanned fittings, locked with two keys, and leather grab handles provided for ease in handling.

This circular calls attention to the fact that Grafonolas are playing an important part in the life of American soldiers and sailors, being recognized as practical necessities in every military unit.

The Columbia Co.'s dealer service department suggests that the local dealers introduce Grafonola military outfits into the camps, and interest the local civic bodies and country organizations in the desirability of presenting these outfits to the boys who have joined the service from their communities.

By reason of the fact that the Columbia Co. has placed an order for a very large number of these trunks, Columbia dealers are enabled to purchase them at a very low price, and there is no doubt but that they can be featured by the dealer profitably and advantageously.

TAKES CHARGE IN DAYTON, O.

DAYTON, O., March 5.—Dorville Gebhart, who has been engaged in the piano business in this city for the past few years, has become manager of the phonograph and record department of the Starr Piano Co. at 27 South Ludlow street, that city. Mr. Gebhart is very enthusiastic regarding the Starr phonograph and Gennett records, and has planned a strong campaign in that line.

UDELL WORKS ARE BUSY

Sales Manager Griffith Tells of the Active Conditions Prevalent at This Establishment

Tom Griffith, the well-known and popular sales manager of the Udell Works, Indianapolis, has recently joined the Indiana State Militia. Mr. Griffith does not come within the military service age, but very evidently is one of those practical Americans who, during wartimes, want to do their "bit" in a concrete fashion.

In a recent chat to The World Mr. Griffith remarked: "The Udell Works of Indianapolis, specialists in the building of cabinets for records and rolls, find themselves at this time with the biggest volume of business on their books that they have ever before enjoyed at this time of the year. In fact, the problem that we confront is getting men to make the cabinets and then getting them shipped. It is very evident from the demand for Udell cabinets that the talking machine business and the piano and player business is unusually good. It simply emphasizes the fact that in wartimes people must have music to get their minds off the more serious side of this proposition."

"The Udell people take the position that the dealer is not rounding out a complete service unless he sells a cabinet, and from the good business standpoint he should sell the cabinet because he can make a profit on it and make a pleasing account. There is another angle on the cabinet sale which a dealer must not overlook, namely, that beyond any possible doubt the cabinet owner is a better buyer of new rolls."

In this connection we recently received a letter from a prominent talking machine dealer in which he said:

"We found that the always satisfied owner of a Udell cabinet bought more records and rolls to start his library, and was a better repeat customer of the selfish desire to have a generous showing when he swung open the door of that well designed, properly constructed and beautifully finished Udell cabinet."

Some Official Facts Regarding the Foreign Markets for Talking Machines

The development of the export business of the American talking-machine manufacturers is not so much due to war conditions and the shutting off of foreign manufacturing markets, as it is due to the urging of their representatives in those countries. They have been very successful in convincing the foreign manufacturers of the value of American machines, and in persuading them to use them in their business. Several well-known American manufacturers, however, have found it necessary to use their own machines in their own business, and some business is done with them.

This class of goods is sold almost entirely by music stores or by stores handling them exclusively, although occasionally a jewelry store will carry them as a side line.

Records are on sale here, but they are almost entirely Japanese and Chinese music and pieces. The production of these records is a large business in the Far East. European music is seldom stocked locally, and those foreigners who have machines usually get their supplies of new records from Shanghai. Nippophone needles are commonly used. An electric motor winder was imported some time ago, but apparently the importer has been unable to do much with it.

Some well-known manufacturers, including the American Phonograph company, are now using the American machines for their own business.

The imports of phonographs, gramophones, etc., are increasing, and the manufacture of those products is now being carried on in various parts of the world. In particular, the manufacture of phonographs is now being carried on in China, Japan, and other countries of the East.

The records of these manufacturers are sold in various parts of the world, and are much in demand. The export business is now being carried on in a great variety of countries, and the business is increasing rapidly.

The export business is now being carried on in a great variety of countries, and the business is increasing rapidly.

The export business is now being carried on in a great variety of countries, and the business is increasing rapidly.

THE NEW VICTOR MOTOR

During the past two or three months about every Victor dealer that I have met has asked me the following question: "Have you had much trouble with the new Victor motors?"
Inasmuch as the average Victor dealer is more concerned with trying to get enough machines than he is for retaining in his memory answers to casual questions, I am going to outline the construction and give you my idea of the adjusting and repair of the new Victrola X. A. motor.

The spring barrel attracts our attention at our first sight of this new motor. Made of one piece of steel and containing the two main springs it is so entirely different from the usual Victor spring barrel that it stands out as the most important change in the method of construction.

Removing the sleeve screw (Part No. 5486 C. P.) permits us to push the spring barrel arbor (Part No. 5429 C. P.) through the castings and so take the cage out of the motor. Place the cage on a bench—ratchet end down—then take hold of the main drive gear (Part No. 5428 A. C. P.) and pull straight up and we find that the sleeve slips out of the center of the main spring. We also find that, unlike the old style models, the spring center has no hole for the customary rivet but instead, the sleeve has a slot cut in its side, into which a V shape bend in the end of the main spring slides. When winding, the first turn of the spring presses this V part into the groove in the sleeve and the tighter the spring is wound the tighter the V part holds. This method of fastening the spring at its center does away with the old troubles of hooking the spring on the sleeve rivet and also prevents a lot of breakage of springs as the rivet head caused a uneven surface in the spring coil and had a tendency to cause springs to break a few inches from the center. Next the winding ratchet and gear (Part No. 5336 A. C. P.) are pulled out in the same manner as the main drive gear and we are ready to remove the retaining ring (Part No. 3692 W. N.), take out spring barrel cap (Part No. 5363 A. W. N.) and take a look at the main springs. It is not necessary to take out the top main spring in order to get to the second one, and also the retaining plate (Part No. 3551 B. F. P.) which will be found between the two main springs. In replacing the main springs care must be used to get them coiled back in the right direction, the one in the center of the cage is coiled to the right and the one at the top to the left.

Care must also be used in the handling of the main driving gear—that it is not bent out of true and that the teeth are not nicked or bent. The arrangement of the teeth of the top plate winding gear (Part No. 3861 A. C. P.) and the winding gear and ratchet (Part No. 5336 A.) makes this type of motor one of the easiest winding machines on the market to-day.

The balance of the motor is practically the same as the previous type Victor with the exception that the governor drive gear (Part No. 5357 B.) is larger in diameter than the old governor gear (Part No. 2755 B.) and the same is true of the governor spring (Part No. 5354 P. F.), as compared to Part No. 3275 P. F. in the older type.

The long sleeve on the governor friction (1995 D. P. F.) will prevent the breakage of governor springs, for it will strike against the governor collar (Part No. 3399 A.) before the springs have spread enough to break. Another guard against governor spring breakage is the little pin in the casting frame which engages the screw on part No. 5331 A. and prevents the improper movement of the regulating shaft (Part No. 5338 W. N.).

Outside of a few minor adjustments I have very little trouble with this type of motor, and if it is carefully adjusted, properly graphited, oiled and greased there is no reason why it should not last and stay in adjustment longer than any other motor on the market to-day.

McCORMACK’S $75,000 INCOME TAX

Noted Irish Tenor’s Contribution to the Government Exceeds That of Caruso—Great Work for the Red Cross—Big Royalties on Records

John McCormack, the noted Irish tenor and Victor artist, put into the hands of Mark Eisner, Collector of Internal Revenue for the Third New York District, a check for $75,000, a sum equal to the annual salary of the President, which represented Mr. McCormack’s income tax for the year. This exceeds by $16,000 the income tax paid by Enrico Caruso three weeks ago, and is believed to represent an income of approximately $300,000 a year.

Accompanied by D. T. McSweeney, his associate manager; M. F. Doyle, his attorney; United States Marshal Thomas D. McCarthy, a friend of the singer, Mr. McCormack went to 1150 Broadway last week. News that he was coming had spread among the employees in the office, and the singer was the object of much interest when he arrived. He was introduced to Mr. Eisner by Marshal McCarthy, and the necessary papers were drawn in about half an hour. After Mr. McCormack had signed the form he made out a check for $75,000 and was photographed handing it to Mr. Eisner.

After leaving Mr. Eisner’s private room, Mr. McCormack rejoined Marshal McCarthy and Mr. Sweeney, and remarked, as a broad grin overspread his face, “If I had known I would ever find out what I paid inside he would curse the Germans more than he does.”

"As I felt about giving up so large a sum to the Government, Mr. McCormack re-

CABINETS

Equipped — Unequipped

Our long experience as master builders of artistic cabinets enables us to produce a talking machine cabinet of exceptional merit. We offer

Amberola Department
Orange, N. J.
DEATH OF JOHN C. ENGLISH

Prominent Talking Machine Inventor and Experimenter Passes Away in Texas

Cameron, N. J., March 4—Word has been received from San Antonio, Tex., of the sudden death of John Clifford English, well known in New York and Philadelphia as a physicist, chemist and expert in acoustics. Mr. English had devoted the last eighteen years to the development of the art of sound reproducing, and was one of the men whose labors have done much to bring the product of the Victor Talking Machine Co. to its present state of perfection. Mr. English was in San Antonio for the benefit of his health, having on previous occasions found the climate there helpful. He leaves a widow.

MANY SWEATERS FOR SPALDING

Edison Artist in No Danger of Freezing or Starving to Death in France

The esteem in which Lieutenant Spalding, the Edison artist, is held by his many friends, is indicated by the fact that up-to-date he is reported to have received over eighty sweaters, and a great bulk of other knitted material since his arrival in France, to say nothing of huge quantities of tobacco, chocolates, books, etc. Mr. Spalding's present address in France is "Somewhere."

SERVICE FLAG ON LETTER HEADS

A clever adaptation of the service flag idea comes from the Standard Talking Machine Co., Victor wholesalers in Pittsburgh, Pa., who have printed in the lower corner of all their letter sheets, in color, a service flag with four stars. The bright red border and blue stars show up most effectively and carry to every correspondent of the house the message that four Standard men are serving in the cause of democracy.

THE TALKING MACHINE WORLD

THE NEW BRILLIANTONE NEEDLE

Brilliantone Steel Needle Co. Announces New Long-Tapered Tapered Needle to Meet Demands—To Feature Export Trade

The Brilliantone Steel Needle Co., Marbridge Building, New York City, announces the addition of a new needle to their line. This new needle is a long tapered steel half-toned needle and was produced in response to insistant demands for a style.

B. R. Forster, president of the company, reports that the Brilliantone steel needle is not only immensely popular in this country but in foreign lands as well. Arrangements have just been concluded whereby one of the largest exporting houses in this country will represent the company in Shanghai, China. The Brilliantone steel needle is also enjoying popularity in points as far distant as Buenos Aires and Rio de Janeiro.

Eugene Latham, who was connected with this organization, has joined the United States Aviation Service and will devote the same energy he faithfully used in the selling of the Brilliantone steel needle to the services of his country.

SONORA DAILY PAPER PUBLICITY

The Sonora Phonograph Sales Co., Inc., has been using attractive advertising in the local newspapers, calling attention to the company's policy of selling its instruments without offering "easy" payments as the leading attraction. This copy has won favorable commendation from the company's dealers, who appreciate the fact that this publicity is helping them materially in developing Sonora business. The text states that "the Sonora is sold on a quality basis only, and you always get full value. When you buy a Sonora, you buy it for its quality, the terms being only secondary conditions."

"Is your daughter fond of the needle?"

"Very, if you refer to the gramophone needle."

Standard Sectional Record Cabinet

A practical, inexpensive, convenient cabinet for dealers; made on the sectional principle, affording the following advantages:

It grows with your requirements: You first purchase just the number of sections you actually need for your present requirements; as you need more space, add more sections.

Adapted to any space: As many sections as desired may be placed in a stock as many stacks may be used side by side as wall space will permit.

Each section or shelf is indexed by a letter and each compartment by a number, forming a system of filing unanswerable for simplicity and convenience.

Suitable in appearance: No empty shelves; no overcrowding. Case always complete, yet always capable of additional expansion.

Carefully made and beautifully finished in plain and quartered oak, and in imitation and genuine mahogany.

Made in two sizes; to hold 10-inch and 12-inch records. Each section holds 200 records (100 Edison records). Sections may be made up with all sections for 10-inch records, or sections for 12-inch records may be made as a reducing section as shown in accompanying illustration.

Record sections furnished with or without doors.

Price for section $3.00 and up

Cases shipped on proper direct from factory at considerable saving to you; on orders amounting to $100.00 and over we pay freight to all points East of Montana, Wyoming, Colorado and New Mexico. To points in and West of these states, we equalize freight charges. For further particulars and full list of prices for the different sections in the different grades, write for illustrated folder No. 80.

"Over the Top" with Victor Records

Let this be your slogan for 1918

Victor Wholesalers

119 W. 40th Street
New York

Chicago Talking Machine Co.
12 N. Michigan Ave.
Chicago
Chicago, Ill., March 12—Both the wholesale and the retail trade of Chicago are feeling the effects of the loosening up of the recent freight congestion throughout the East. The record situation, while still acute, is in better condition than it has been for several weeks, due to the fact that manufacturers have been making use of the express service to send in their supplies. This, of course, adds somewhat to the expense of forwarding these records; nevertheless, the freight situation warranted this increased expenditure in order to relieve the situation. Another thing that the retail dealers are up against is how to appease the public demand for the popular song records, as the supply of these coming in is very limited. To meet the situation the dealers have been telling what they believe is true because, owing to the fact that experts in the record pressing departments have been drafted, they are working short-handed. It is further said that the process of pressing the record is not a "fly-by-night" proposition, but that it takes at least a year's training before a man can become proficient in the art of running one of these hydraulic presses and that it is estimated that at the end of that time his efficiency amounts to one-third, as two-thirds of the work he turns out will not pass inspection. These statements are being generally made by dealers who know the situation pretty thoroughly and bears considerable weight with their customers.

The wholesale dealers are facing a big situation in that they are getting a great many more orders than they have ever before received. This is brought about by the fact that the retail dealers are sending in their orders not to one place but to several places and in that manner making up their new stock lists; that is, the wholesaler is filling as much of the order as he can, making the shipment to the retailer, and the retailer is then taking the unfilled part of his order, returning it to some other wholesaler to see if he can add any more to the list. In this way the retailer is calling upon the resources not only of one but of several supply houses.

With the disappearance of the great snow blanket which covered the country last month, the railroads were enabled to relieve the shipping situation to a very great extent, and for this reason the wholesale dealers are getting in their machine shipments in a greater quantity than heretofore. Where it formerly took at least six weeks for a shipment to go through, especially from the East, the same shipments are now coming in in from three to four weeks. The manufacturing plants are working to capacity and are turning out new patterns and making over machines than they have ever done.

While there is still a shortage of the medium-priced machines it is not so great as last month and the situation along this line is slowly coming back to normal. A great many of the manufacturers are preparing for the big "spring drive" which they anticipate will be launched in a short time, and for that reason have been putting on more employees and purchasing more materials so as to take care of the demand.

Ryde Enters Business

J. P. L. Ryde, who for the past twenty years was connected with the firm of Lyon & Healy, and for the last four years assistant manager of the Victor department, has resigned his position and is now located in Indianapolis, where he has purchased an interest in the firm of Fuller-Wagner Music Co. His new connection is a partnership with the firm and this company will now be known as the Fuller-Ryde Music Co. His successor at the Lyon & Healy establishment is H. J. Fidelke. Mr. Fidelke was formerly assistant manager of the retail city credit department of that house.

The formal resignation took place on the evening of February 21, and on the previous evening Mr. Ryde was given a farewell dinner and theatre party by his former associates. The members of the firm who participated in the affair presented him with a silk umbrella and an engraved fountain pen, the presentation being made by L. C. Wiswell, manager of the Victor department of Lyon & Healy. There were fifteen members of the staff present at the party and dinner, one of the guests being W. Roche, who was in Chicago at the time on leave of absence. Mr. Roche was a former member of the firm of Lyon & Healy, but is now serving in the U. S. navy on the Battleship "Vermont," which is stationed somewhere at an "Atlantic port."

Six Best Sellers

Columbia Graphophone Co. announce the following six best sellers: "Long Boy" and "For You a Rose"; "Downtown Strutters" Ball" and "I'm All Bound Round With the Mason-Dixon Line"; "Wait Till the Crows Come Home" and "Somewhere in France Is the Lily"; "Do Something" and "Liberty Bell"; "Hello, My Dearie" and "Ching Chong." The best sellers for the Victor Co. for the past month are: "Capricieuse" (Jascha Heifetz); "Gems From Leave it to Jane" and "Jack o' Lantern"; "Sweet Little Buttercup" and "Home- ward Bound"; "Liberty Loan March" and "U. S. Field Artillery March" (Sousa's Band); "Maytime Waltz" and "American Serenade"; "Lorraine" and "Chimes of Normandy."

Pathé best sellers for the past month are as follows: "My Sweetie" and "Yoo-K-A-Hilo Town"; "Give Me the Moonlight, Give Me the Girl" and "Hello! I've Been Looking for You"; "Homeward Bound" and "When the Boys From Dixie Eat the Melon on the Rhine"; "A Baby's Prayer at Twilight" and "Valley Rose"; "Liberty Bell" and "There's a Million Heroes in Each Corner of the U. S. A."; "Gotabush" and "My Dough Boy."

Six best sellers from the Edison list for the past month are: "Leave It to Jane" and "Siren's Song" (Leave it to Jane); "Knit, Knit, Knit" (Jack o' Lantern) and "Jack o' Lantern Fox-Trot;" "Sweet Eulalina, My Gal" and "There It Goes Again;" "I Don't Want to Get Well" and "I'm All Bound Round With the Mason-Dixon Line"; "Naval Reserve March" and "Spirit of America."

The six best sellers for the Gennett records during the past month were as follows: "Largo" and "Meditation—Thais," violin solos (art tone record); "Hail! Hail! The Gang's All Here" and "I Don't Want to Get Well;" "Honolulu March" and "Killima Waltz" (Hawaiian Instrumental Trio); "Over There" (one-step) and "Birds and the Brook;" "Paddle-Addle" (fox-trot) and "He's Just Like You" (one-step); "When the Bell in the Lighthouse Rings" and "Rocked in the Cradle of the Deep" (art tone record).

Perfexts "Container" Distribution

E. P. Read, head of the Automatic Container Co., returned this week from Buffalo, where he had been making preparations with a large cabinet manufacturing company for the handling of their Eastern business. Mr. Read stated that he has also made arrangements with various manufacturing companies located in different

THE "WADE" FIBRE NEEDLE CUTTER

Service Feature Is of Immense Importance

Your greatest revenue, Mr. Dealer, is from record sales. The average customer seldom buys more than one talking machine in a lifetime, but may be readily educated to systematically accumulate a record library and thereby become a constant source of revenue to you.

The Wade Fibre Needle Cutter Is the Connecting Link

It permits the use of Fibre Needles, with all their acknowledged advantages, at the minimum expense, with its 20 or more original re-points to each fibre needle, and is very cheap insurance on the life of their records.

Instruct your salespeople to use these sales arguments and you will soon have a Wade Cutter and Fibre Needle in every customer's home, which, will naturally result in increased record sales.

WADE & WADE, 3807 Lake Park Ave., Chicago, Ill.
Since the founding of this house in 1864 our ideal has been "to improve the service." War conditions now make this a patriotic duty. Orders placed with us are shipped without delay and as complete as possible from our large stock of over a half million records.

**Chicago**
ISN'T IT TRUE?

You look for and insist upon style—finish and tone. Then again you insist upon a well-regulated motor, invisible hinges, and the best models of sound boxes and tone arms obtainable. Why not use the same judgment when selecting your cover support?

THE CHICAGO COVER BALANCE No. 1

is an absolute essential to the manufacturer who "produces the goods" instead of "talking quality."

CHICAGO HINGED COVER SUPPORT AND BALANCE CO.

2242 WEST 69TH STREET, CHICAGO, ILL.

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 81)

parts of the country to make their automatic record containers, the idea being that if orders are received from certain sections to turn them over to a manufacturer located in that particular territory, and thereby assures their various dealers of prompt attention.

Mr. Read stated that the latest addition to their already large line, the salesman sample case has met with much favor with the trade. This is a small compact leatherette case which consists of a simple automatic filing device and will carry twenty-four records. The case is small, light of weight and neat in appearance. It should prove popular.

New Assistant Manager

Miss Vera B. Jones, formerly connected with the Davis Phonograph Co. and for over six years associated with the J. Palmer Music Co., of Monfort, Wis., is now assistant to W. E. Cotter, retail sales manager of the phonograph department of the Thos. E. Wilson Co.

Hold Directors' Meeting

Among the prominent visitors to the trade this week was A. D. Geissler, of the New York Talking Machine Co., who was in town to attend a directors’ meeting of the combined forces of the New York Talking Machine Co. and the Chicago Talking Machine Co. After the meeting Mr. Geissler, accompanied by R. J. Keith, D. A. Creed, H. P. Ellis and W. C. Griffith, spent a delightful evening at the Garrick Theatre.

What Is the Price?

One of the large drug concerns in Chicago have the agency for a small talking machine which they advertised recently in their 1-cent sales. The method of advertising this machine has aroused much interest in the trade and is causing much wonderment as regards its actual retail price. The sale price of this machine varies in a way that would cause one to think that the quoted price was suggested by the weather bureau. The reason is this: One day there is a special sale announcing, “This marvelous phonograph now on sale. Price $15. Two for $15.01.” The next day or so the sign in the window is changed and reads, “This phonograph only $9.95.” Then again the price changes to $9.95. As the same machine is always shown it is little wonder that the trade in general is guessing as to its actual value.

Have Remarkable Sales

G. Harry Bent, manager of the retail piano department and the Victor department of the well-known firm of Geo. P. Bent, said that their sales of talking machines and records for the months of December, January and February were larger than the corresponding period of last year. While their sales of machines have increased somewhat the record sales are far beyond those of this time last year. The medium-priced machines were, of course, the best sellers, but they have been pushing the higher-priced machines more than ever for the past few months and have been getting good results. “Of course, the recent shortage held us back somewhat,” said Mr. Bent, “but in taking inventory we discovered that we had a lot of good records. On hand that would satisfy the trade if a little salesmanship were used; therefore, we started out and began pushing these records and soon discovered that our trade was satisfied, the result being that we increased our record materially.”

Hold Patriotic Test

Under the auspices of C. E. Goodwin, general manager of the Phonograph Co., a patriotic contest and Edison tone test was held at Orchestra Hall on the evening of February 28. The price of admission was 10 cents, and the entire proceeds were used in purchasing Army and Navy model Edison phonographs for the various military and naval organizations. The Edison Shop, a subsidiary of the Phonograph Co., furnished the outfits at actual cost. The outfit consisted of an Edison Army and Navy phonograph and $30 worth of records. A special feature of the test was Glen Ellison, baritone, who sang in direct competition with the Army and Navy model. The audience was well pleased by his masterly rendition of various Scotch songs, and his intense knowledge and understanding of the Scotch and quaint whimsicalities enabled him to render the famous Harry Lauder songs with a fervor and vim that immediately places him in a class with that famed artist himself.

The rest of Orchestra Hall, together with advertising and all other expenses, were borne by the Edison Shop. Each one in the audience was given a little ballot with which to vote for his favorite army or navy regiment. When these tickets were collected they were sorted out and the organizations receiving the greatest number of votes were awarded the machines. The amount of money taken in the box office to purchase two of these outfits, and one outfit went to Camp Grant. As no particular company was designated. Colonel Heistand was given charge of the machine and the records with the understanding that he make an investigation of the various barracks at the big cantonment at Rockford and determine which company was without a talking machine and donate it to that particular company. The other machine was won by Company E, 131st Infantry, at Camp Logan, Houston, Tex., as there were a large many of the disabled from the Great Lakes Naval Training Station present in the audience, one patriotic citizen suggested that there be a collection taken up and another machine purchased for the benefit of the boys at Great Lakes. This was done and enough was collected to buy the outfit for the jackies. The phonograph and the records were awarded to Company H, Third Regiment, at Camp Dewey.

Raffle Brunswick for Red Cross

At the recent Country Fair, which was held (Continued on page 85)
What Happened at the Naval Training Station

A Phonograph Story That Points the Way for Every Phonograph Dealer

At the Great Lakes Naval Training Station are several club houses for the Jackies. In fitting up these camp homes, friends sent phonograph records, books, pictures and the like. The records were all DIFFERENT makes. Some were from one company, some from another. No single phonograph would have played them all—that is, none of the ONE-record type—so, naturally, a Brunswick was chosen.

The Brunswick plays all records, whatever make. All the different kinds contributed were playable. None had to be laid away.

This story could probably be told for many army and navy camps. Unless the all-record Brunswick is selected, many of the contributed records must be shelved. So this is a lesson in Brunswick superiority. It answers a question, a very serious one, in the minds of many dealers as to the future of phonographs. "Are one-record instruments doomed?"

Brunswick popularity indicates the readiness and eagerness of music-lovers to turn to the all-record type. Yet this feature alone does not sell all prospects. Brunswick tone is a paramount attraction. The absence of metallic and nasal noises is apparent.

Then The Brunswick has a dozen other new-day features that win. Not the least is its somewhat lower price. Every Brunswick Dealer has an opportunity to handle Pathe Records. The public likes Pathe operatic stars, late musical hits, band and instrumental selections. The offering each month is large.

Dealers who have not yet gone over the very profitable Brunswick proposition should write to us at once. A situation exists in the phonograph world which should cause every dealer to plan for the future. So write today.
in the banquet rooms of the Andatorium Hotel for the benefit of the Red Cross Society, one of the prizes which was raffled off consisted of a 115 model Brunswick phonograph. This machine was donated by the Brunswick Shop and was won by a young lady who is a stenographer employed in one of the big theatrical booking agencies of Chicago.

Imitate Victor Trade-Mark
Federal Judge Carpenter, in the U. S. District Court of Chicago, last week entered an order under the "unfair competition act" restraining Garrett W. Woodward and Charles E. Gaven, of the Victor Inking Machine Co., from placing imitations of the Victor dog trade-mark on machines they manufacture. The label shown in court bore the familiar picture of the Victor dog, but the words "His Mate's Voice" were omitted and "His Master's Ink" used instead. The firm name "Vicker Inking Machine" also appeared on the label, and it was stated in some instances that the letter "F" was crossed so that it appeared to be the letter "T" and the following letter "N" being obliterated there appeared to be an abbreviation "Tking" for talking.

Henry C. Brown a Visitor
Henry C. Brown, assistant general manager of the Victor Co., accompanied by Mrs. Brown, visited Chicago this week. They stopped here on their way to the home of a friend to visit their son Harry, who is a member of the British Royal Flying Corps stationed in Texas. He's in the Army Now

George Derrig, assistant credit manager for the Chicago Talking Machine Co., recently left for Ft. Dodge, Des Moines, la., where now he is a member of Hospital Unit No. 11, stationed at that enometown.

"Thumbs Down"
H. P. Ellis, of the Chicago Talking Machine Co., received a summons on Monday of this week to serve as a juror on cases now being tried in the Criminal Court. His numerous friends in the trade are wondering what will happen if the man responsible for the recent freight congestion appears before said jury!

Place Orders for Cabinets Now
John F. Mortensen, president of the Salter Mfg. Co., in a chat with The World called attention to the fact that dealers would do well to place their orders for record cabinets at once in order to anticipate important advances in prices which are inevitable. "There have been further advances the last two or three months in practically everything entering into the construction of record cabinets," said Mr. Mortensen. "This not only includes lumber, veneers, but also hardware, shellac, varnish and even the felts with which the famous Salter felt-lined shelves are covered. For a limited period we will protect our customers at the old prices, in spite of the fact that we should have made material advances the first of the year.

Sachs & Co., the piano bench and talking machine house at 425 South Wabash avenue, have made arrangements for the Chicago city representation of the Salter lines of talking machine record and music and music roll cabinets. Both Sidney I. Sachs and C. C. Clifford are experienced men with a large following in the trade, and, no doubt, will do an excellent business on the well-known Salter lines.

Empire Activities
John H. Steinmetz, president of the Empire Talking Machine Co., reports that quite a number of new agencies have been taken on during the past month, and that these new dealers state that they are well satisfied with the results obtained through the medium of the Empire machines. During the past week the Empire Co. increased the proportions of its shipping room more than 50 per cent, by removing a wall in the rear of their building and occupying the space which was formerly used as a store room by another company. Mr. Steinmetz states that his company is now in better position than heretofore to render prompt service to its customers, owing to these increased shipping facilities.

New Brunswick Travelers
C. J. Carroll, who for the past seven years has traveled for the Ripp Phonograph Co., of Indianapolis, Edison distributors, is now associated with the Brunswick-Balke-Collender Co., and has been assigned to the Denver field.

G. F. Gamble, who formerly covered the New Orleans territory representing the Brunswick, has been transferred to Minneapolis. He started the ball rolling by placing several large contracts in his new territory.

Doing Excellent Business
The Empire Phonoptones Co., which made its initial bow to the trade last month, has, in the short time of its existence, built up a trade that reaches in proportions far beyond its expectations. It is the aim of this company to cater to a high-class trade and to supply its dealers with phonoparts of its own manufacture which embrace, besides the best material obtainable, essential features that cannot be obtained elsewhere. In this the company has been rather successful, and its clientele are enthusiastic over the products already turned out by the new company, especially the new tone arms and sound boxes.

Sell Entire Stock
The Hughes Music Co., of Oskicosh, Wis., recently sold out their entire Victor stock to the Wilson Music Co., of that city.

New Chicago Molds
Many of the interesting features embodied in the Cheney talking machine have been greatly improved, as may be seen in the instrument that the Cheney Talking Machine Co. are offering to the trade this month. As already well known, the tone development and control are accomplished by a series of scientifically designed air chambers in the tone arm, throat and orchestral sections of the instrument. A total system such as this offered a large field for experimentation

(Continued on page 82)
Bigger Things for 1918

Bigger for You — Bigger for Us

We have planned and prepared for BOTH a larger output — insuring better services, prompt deliveries, and even a better product than in 1917

THE Mandel line of talking machines, varying in retail price from $35 to $250 and meeting the price demands of every class of trade, has been improved in many details which means in the aggregate a considerable increase in intrinsic value.

This is a line which has proved a distinct satisfaction giver from the start.

Every part of every Mandel—Case, Motor, Tone Arm, Sound Box, Horn, Tone Chamber not only is distinctive but made in the Mandel factories, thus securing standardization and uniformity of output.

Do you want to handle just this type of machine?

It costs you nothing to investigate.

Let us send you model No. 3, illustrated here on FREE TRIAL.

Write today for full information and descriptive literature.

Mandel Manufacturing Co., Inc.

General Offices:
501-511 S. LAFLIN STREET
CHICAGO, ILL.

New York Display Rooms:
41 UNION SQUARE
and it was in this field that Prof. Cheney, inventor of the instrument, and his corps of expert acousticians concentrated their efforts to bring about scientifically correct results. In this they have succeeded. Their accomplishments are, in a measure, far beyond their anticipation in that the results obtained place the latest Cheney models on a higher plane of standardization than their preceding machines. The various chambers of the orchestral section were given careful scrutinization and if any defects such as improper construction, etc., were found, they were scientifically remedied, thereby adding greatly to the value of the high, medium and low registers.

But inspection such as this does not apply only to the model used for experimental purposes in the Cheney laboratories. It applies to each and every machine turned out of the Cheney work shops. Each part of the machine, no matter how small or insignificant, has a definite service to perform, and this is taught to all employees engaged throughout the plant. The employees receive a thorough schooling along these lines and, for this reason, each individual part of the instrument produced by the Cheney Co. is manufactured with the understanding that the definite purpose to be performed by that particular part necessitates careful consideration if their unification as a whole is to bring about a certain standard of perfection.

Report Increasingly Large Business

The American Phonoparts Co. of this city are having an increasingly large business from manufacturers in two types of tone arm and sound box outfits, which are illustrated in their advertisement elsewhere in this issue. The company was organized in 1914 and has been an important factor in the manufacture of talking machine parts ever since. The No. 7 tone arm and sound box contains several features of particular merit. The sound box can be thrown back so as to insert the needle with one hand. It is the quality of tone produced that is notable.

The sound box is constructed with a rubber gasket in back, the object of which is to eliminate blasting caused by vibrations from the metal frame.

The No. 1W outfit has a reputation among the trade because of the special loudness and clearness of the tone. This also has a number of distinctive features, including spring screws which lock the sound box into either position for playing vertical or lateral cut records. Furthermore, the arm can be adjusted to the desired length for centering sound box for playing either type of records.

Leaves for Washington

Frank J. Bowers, formerly general traveler for Pathé Frères Phonograph Co., left Chicago on Monday evening of this week for Washington, D. C., where he went to join the mechanical repair department of Unit 306 of the Quarter-master’s Corps at Camp Meigs, which is now being organized for immediate overseas service.

Doing Things at Wilson’s

“We are still making things hum around these corners,” said W. E. Cotter, manager of the retail phonograph department, Thos. E. Wilson & Co., when called upon by The World this month. “We decided that there was a big bunch of business to be had in Chicago, so we increased our outside force and turned them loose. They are getting a nice batch of orders every day, and it certainly is surprising to see the number of prospects they can bring in.

W. C. Fuhri Returns to Chicago

W. C. Fuhri has returned to the Chicago organization of the Columbia Graphophone Co. and has assumed his old duties. Mr. Fuhri and C. F. Baer will operate in close harmony as they have done in past years. Under the plan of rearrangement Mr. Baer will assume the title of assistant manager and Mr. Fuhri that of manager rather than district manager, as formerly. At the regular monthly dinner and meeting of the sales organization last night the attendance was augmented by other important employees of the Chicago branch and the meeting was turned into a “welcome home” function for Mr. Fuhri, Mr. Baer presiding and joining with the others in saying a lot of grateful things.

Reprintor Points

F. D. Hall, president of the B. & H. Fibre Manufacturing Co., makers of the B. & H. Fibre needle, is very enthusiastic over the splendid reception given by the trade to the B. & H. reprinter. This handy little device for repositioning the fibre needles with a minimum of waste and producing a maximum of tonal efficiency has brought many congratulatory letters from dealers and jobbers the country over. Daily re-orders testify to the sincerity of the tribute.

Patent Cabinet Designs

The Vitanola Talking Machine Co. of this city have recently been granted design patents from the United States patent office on all of their cabinet designs. This, of course, furnishes evidence of the distinctiveness of the Vitanola cabinets and is a step taken in the protection of the manufacturers as well as the jobbers and dealers. J. B. Schiff, company sales manager, vouchsafes the information that they have several new models now in work, samples of which will be on display in about two months.

Thomas Mfg. Co. Open New Offices

The Thomas Manufacturing Co., of Dayton, Ohio, manufacturers of motors, tone arms and sound boxes, have opened extensive sales offices and warerooms at 1026-28 Republic Building in charge of Fred E. Read, the company’s Western sales manager. Mr. Read formerly had an office in the Otis building, but the steady growth of their Western business, coupled with the company’s appreciation of the importance of Chicago as a talking machine manufacturing center, prompted them in the present move. A very complete stock of the company’s product will be carried in Chicago enabling them to make immediate deliveries. Furthermore, Mr. Read

(Continued on page 88)

The Empire Tone Arm and Reproducer

MARKS A NEW ERA IN PHONOGRAPH EQUIPMENT

Never before has the Talking Machine manufacturer been offered an opportunity to equip his machines with a Tone Arm and Reproducer possessing so many points of excellence and at a price that will compete with the mediocrec equipment with which the market is flooded. Empire equipment adds distinction and selling value to the machines on which it is used.

We solicit inquiries from high grade manufacturers of Talking Machines in position to place orders for a fair sized quantity of Tone Arms and Reproducers in monthly quotas, and for such will make it an object to adopt the Empire equipment.

In ordering samples, kindly state measurement from center of turn table shaft to center of horn hole on motor board.

Address all inquiries to our Chicago office

THE EMPIRE PHONO PARTS CO.
Sales Office, 427 South Wabash Ave., Chicago, Ill.

Factory:
1102 West 9th St.
Cleveland, Ohio
New Lakeside No. 4 JUMBO TONE ARM

Only foolproof arm on the market, as all adjustments are permanent and user has no adjustments to make.

Best mica used so fastened to the stylus to prevent same from pulling out. All parts machined to make a perfect mechanical fit. No adjustments when shifting from Victor to Edison, or vice versa. Always the same. Perfect reproducing arm. Permanent adjustment for all records except Pathé, when a weight is applied (see cut), which makes it just exactly right for playing Pathé. This weight also serves as a recepticle for Edison Pathé needles, which usually are mixed with the steel needles or lost.

Armed with long telescopic neck to make longer or shorter. Punch clock box clamping ring has a curvature preventing rubber gasket from working out.

ALL NEW FEATURE PATENTS APPLIED FOR

We also supply hardware, cabinets, motors and accessories for talking machines.

Ask for our Bulletin. We maintain an expert motor repair department.

LAKESIDE SUPPLY CO., Inc.

202 South Clark Street
CHICAGO, ILL.

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 87)

has established a service branch in Chicago in charge of a competent mechanic. This will enable them to render real motor service. This man will make it his business to go into the factories of talking machine manufacturers using the Tone Arm, and give instructions and demonstrations regarding the construction and installation of the motors.

"I cannot fully express my satisfaction with the manufacturers in whose product our company has been received in this territory," said Mr. Read. "We certainly are doing everything in our power to merit this recognition. It is the ideal of W. H. Mathews, president of our company, to turn out the best motors and talking machine parts that can possibly be made. Practically unlimited facilities are offered in our big plant at Dayton and any manufacturer of talking machines who is imbued with the quality idea would be interested in observing the care and precision which characterizes all of our manufacturing processes and also in the laboratory experimental work which is constantly in progress there. We are now making five types of motors and with our five patterns of tone arms and three types of reproducers we are able to offer five complete combinations of exceptional merit."

Mr. Read leaned upon a little item of considerable interest. In the near future the company will be prepared for the commercial production of an automatic stop which for simplicity and unflagging accuracy of operation he thinks will mark a distinct departure in the trade.

Becomes Manager of Record Department

E. C. Poore has been appointed manager of the record department at the Columbiana Graphophone Co., having succeeded F. A. Tatner, who now has charge of the country correspondence for that company. Mr. Poore has been associated with the Columbiana Graphophone Co. for the past ten years and was connected with their various branches throughout the middle West.

!! ATTENTION !!

Manufacturers of High Class Talking Machines

The new "Grotton" tone-arm and reproducer are now ready.

Universally correct. You can play all records perfectly with this new combination.

Two styles—No. 3 A and No. 3 B.

No. 3 A—With mild tone sound-box.

No. 3 B—With loud tone sound-box.

We manufacture the most perfect universal attachments for the Victor, Edison and Columbiana machines.

Send for circulars and prices.

COMBINATION ATTACHMENT CO.

324 Republic Bldg. CHICAGO

Lakeside Supply Co. Progress

The Lakeside Supply Co., of this city, has shown a remarkable growth within the past year and a half. In that short space of time they were not only compelled to seek larger quarters on two occasions, but their business has grown to such proportions lately that they are contemplating taking on several additional rooms in the building in which they are at present located.

W. A. Fricke and his brother, W. A. Fricke, president and secretary of the company respectively, are the men at the helm, and it was through their incessant labor and ingenuity that the company has reached its present standard in the trade. The Messrs. Fricke have been associated in various manufacturing enterprises throughout Chicago for the past twenty years, G. C. having been a buyer for a number of years for various manufacturing concerns in Chicago, while W. A. devoted most of his time to working as an electrical engineer.

The Lakeside Supply Co. not only job in phonoparts, but also manufacture a full line of phonograph hardware. They are at present manufacturing a new universal tone arm which is known as the "Lakeside No. 4 Jumbo." This tone arm is made to fit all machines and will play all makes of records. There is supplied with this tone arm a small weight which is easily attached above the sound box whenever a selection of a Pathé record is desired. This tone arm is made in sections that interlock in such a manner that the arm may be easily and instantaneously lengthened or shortened by the use of a small set screw as required.

The Lakeside Co. have recently been appointed Chicago representatives of the Stepcro Precision Motors. They will only handle these well-known motors, but will also give Stepcro free motor service to their customers. They contemplate carrying a large supply of these motors as well as a large stock of motor parts.

Personal and Visitors

Herman Scheftz, of Chas. Schefetz & Sons, Milwaukee, Wis.; Ed. Winager, of the Winager Furniture Co., Grand Rapids; John Libbe, of Ethic Bros., South Bend; C. W. Copp, South Bend; Mr. Hopper, of the Hopper, Kelly Co., Seatle. Wash., were all visitors to the Chicago trade recently.

H. T. Nolan, of the New York Talking Machine Co., was a visitor to Chicago last week. Mr. Nolan is connected with the sales department of the company.

J. S. Mitchell, secretary of the L. S. Donaldson Co. of Memphis, Tenn., called on the trade in Chicago last week.

FROM OUR CHICAGO HEADQUARTERS

L. C. WISWELL'S STRONG TALK ON SALESMANSHIP

Gives Some Excellent Advice to Members of Grand Rapids Music Dealers' Association on Subject of Selling Talking Machines to Greater Advantage—Urges Interest Charge

Chicago, Ill., March 9.—L. C. Wiswell, manager of each and every one of our offices here and in the neighboring cities, has been a leading exponent of the importance of co-operation as illustrated in the good work that can be accomplished by trade associations, pointing out that through co-operation trade evils can be simplified and eliminated, thus enabling the talking machine business to be placed on a clean, substantial and successful basis.

He pointed out that one of the greatest goods the organization can accomplish is to obtain interest on deferred payment sales, and he remarked: "Gentlemen, do you realize that by your failure to obtain this charge you are losing hundreds and collectively thousands of dollars per year? Could you go to a bank and borrow money to make your purchases of merchandise without being obliged to pay interest? Of course not. Are you not obliged when buying merchandise on long terms from the manufacturers, particularly merchandise that is of staple quality, to pay interest? Surely you are. If this situation is true with you in the purchase of goods, why then should it not be likewise with the consuming public or the party to whom you sell the instrument, granting him a series of deferred payments in settlement of the purchase? Merchandise which you have delivered to your customer surely represents cash; it is money only in a different form. You cannot obtain money from a bank without the payment of interest. Why then should you loan money to your customers without exacting the same stipulation? There is a tremendous leak in your talking machine business if you are not charging interest. It is only a little thing but in time it will reach serious proportions.

"You can easily at this meeting here-to-night adopt a resolution that beginning with, say, March 1, every one of you will make an interest charge of .5 per cent. on all deferred payment sales. If you do this it will mean more cash business which will give you an argument as to why a man should pay cash instead of buying on the deferred payment plan. As an organization you should get together on the question of uniform allowance for the turning in of used and out-of-date machines towards the purchase of a new machine and regulate the record approval system, and while I do not approve of it you will eliminate the record approval system entirely. Unless you have complete co-operation, complete harmony, proper results cannot be obtained."

Mr. Wiswell then took up the subject of advertising and emphasized the value of all kinds of publicity, whether in the newspapers, magazines, catalogs or circulars, but especially personal advertising. He pointed out that: "Personal advertising is the face-to-face, eye-to-eye, mouth-to-ear, man-to-man advertising. Summing it up in a few words it is personal contact between the customer and the house. As stated before, printer's ink brings prospective customers to your store and the moment a prospective customer enters through the door, at that moment personal advertising begins. "The first one to come in contact with a prospective customer is the salesman. Now you have all heard the saying that the first impression is the lasting one. This saying is just as true today as when first coined, hence it is the salesman who at the first approach must make a favorable impression. In order to do this he must have a personality—should be of neat appearance, well groomed and pleasant of speech. I say pleasant of speech because personality lies in using words which the customer will understand, high flown speech, however, is seldom used to advantage in salesmanship."

NEW BRUNSWICK REPRODUCER NOW READY FOR THE TRADE

The "Ultona" Sound Box Just Introduced—A New Method for Reproducing Various Types of Records—Distinctly Original in Design and Embraces Some Interesting Features

Chicago, Ill., March 9.—The Brunswick-Balke-Collender Co. announce to the trade this month that they have at last perfected their new "Ultona" reproducer and have already equipped two models of the Brunswick phonograph with this new method of reproduction. This sound box includes two distinctly new inventions for which revolutionary importance is claimed by the company.

The reproducer is constructed in form along

- ULTONA PROCESS

(1) Ultona Reproducer and Tone Arm Ready to Play Pathé and Other Vertical-Cut Records

The sound box contains two diaphragms, and the various makes of records can be played by simply changing its position. It is scientifically designed to adapt itself to the various surface cuttings and tonal requirements of all records, by allowing for the changed weight of the reproducer required to play the different makes of records. The pressure of the needle is controlled by a sliding weight placed in one end of the tone arm and is controlled by sliding this weight either forward or backwards. The accompanying "photos" show clearly the various figure number applications of the "Ultona." Figure No. 1 shows the reproducer in the position for playing Pathé and other vertically-cut records.

(2) Ultona Reproducer and Tone Arm in Position to Play Records of Edison Type

In illustration No. 2, the reproducer is in position to play all vertically-cut records that necessitate the use of a diaphragm in this position. The lateral-cut records, which are played by means of either the steel or fibre needle, are played by turning the reproducer as shown by figure three. This is accomplished by simply turning the sound position to play records of this make. When the other surface of the reproducer is turned

(3) New Brunswick Ultona Reproducer and Tone Arm Ready to Play Lateral-Cut Records

box so that the two diaphragms are parallel to each other.

Another feature of the new Brunswick models offered to the trade is their new all-wood tone amplifier. It is a vast improvement in tone projection in that the sound waves are projected through the all-wood horn, which is built like a violin. This tone amplifier is of all-wood construction and contains no metal whatsoever, thereby breaking away from or avoiding the usual custom of combining wood and metal in the construction of the horn. Not only have

Brusswnwick Mechanical Equipment
Shoring Brunswick Motor New "Ultona" Reproducer and Tone Arm, Autospop, etc.

these two features been added to the latest Brunswick models, but this company has also adapted a new motor with which they are equipping all of their new machines. The following illustration which is a clever "phantom" wash drawing not only shows the new "Ultona" reproducer and tone arm, but also illustrates the automatic stop together with their new motor.

The new Brunswick motor is now used in all Brunswick phonographs. The motor illustrated above is of the three-spring type, but a two-spring motor is also being used for smaller styles of machines.

Beginning with the April 6 issue of the Saturday Evening Post the Brunswick-Balke-Collender Co. will launch their nation-wide advertising campaign. In this issue they will come out with a full-page Brunswick ad: about the

Different—But Practical

The MORENUS Phonograph is a Distinct Departure from a Tonal Viewpoint.

The horn, which is entirely of wood, is built on the principle of the saxophone and enters the tone chamber at the bottom, not the top. The tone is big and full but mellow, and the reproduction of the artist’s voice or instrument is faithful to an unusual degree.

Among the other features is a unique tone moderator which actually graduates: an exceptionally high grade and acoustically correct tone arm and reproducer, and a cover support which makes handling the lid a delight.

The case designs are right and the cabinet work and finish unexcelled.

The MORENUS is in 3 STYLES

**THE READY FILE CO. ANNOUNCES MODELS FOR THE EDISON**

Now Prepared to Meet the Demand for an Efficient Filing Device for Edison Models 100-A and 150-C—Wins High Praise From Edison Jobbers at Recent Convention Held in New York

In response to a widespread demand on the part of Edison dealers for a convenient filing device for the lower priced models, the Ready File Co. has just announced the completion of models designed for the New Edison phonograph, Models 100-A and 150-C, as illustrated in the company’s advertisement on page 74 of this issue of The World.

The new Ready Files were first shown at the Edison Jobbers’ Convention, held at the Knickerbocker Hotel, New York, February 18 and 19. The enthusiasm with which they were received is indicated by the fact that they were endorsed by the convention, an honor which has seldom, if ever before, been accorded an accessory.

President Walter E. Kipp, of the Jobbers’ Association, said of the Ready File: “We have long felt the need for such a device. The Ready File will enable the Edison dealer to offer a moderate priced instrument that not only gives a perfect re-creation of music, but also one that is wonderfully convenient. I think that I speak for every jobber here when I say that we extend our heartiest congratulations and good wishes to the Ready File Co."

The new Ready Files are very much like the models that have already become so popular among Victor dealers, except that it has been necessary in designing the Edison models to enclose the trays of the Ready File in a cabinet. In the model for the 150-C Edison this cabinet is composed of an ingeniously arranged wooden front, sides and back, with steel supports for the trays. The file is instantly installed in the instrument without alteration. In the model for the Edison 100-A the cabinet is made to fit on the shelf of the instrument, the design being such that the grace of line of the cabinet in no way marred the cabinet work is of the very best, and the finish is fully as fine as that of the instrument itself.

In both models the instrument and the Ready File gives a harmonious effect, with none of the makeshift look so often found where articles from two different manufacturers are combined.

The Ready File Co., anticipating a heavy demand, has already started large scale manufacturing of these new models, and in accord with their usual policy, the Ready File Co. will conduct an aggressive campaign on the models for the Edison. Anent the new Edison file, the president of the Ready File Co. said: “The Edison dealer will be shown, as the Victor dealer has been similarly shown, that by placing Ready File in every model 100-A and 150-C on his display floor and in his booths, and by considering the instrument and the Ready File as a single unit, he can sell Ready Files with practically every instrument of these models that he sells, making a nice extra profit on each sale.”

**FIRE VISITS BUFFALO STORE**

Causes Some Damage to Offices of Neal, Clark & Neal Co.—No Delay in Deliveries

BUFFALO, N. Y., March 11.—The wholesale department of the Neal, Clark & Neal Co., the well-known Victor wholesalers of this city, was visited by fire recently. Quick work on the part of the company’s employees and the Fire Department resulted in containing the loss to the offices. The company reports that it will be able to take care of dealers’ orders as usual.

**INCORPORATED IN PUTNAM, CONN.**

The Averill-Warner Co., Putnam, Conn., has been incorporated with a capital stock of $80,000 to deal in talking machines and other musical instruments. The incorporators are Warner W. Averill, John E. Goggan and Edward H. Burt.
THE TALKING MACHINE WORLD

MARCH 15, 1918

HEINEMAN BRANCH MANAGERS HOLD ANNUAL CONFERENCE

Important Social Events Mark Week Spent at Headquarters of Otto Heineman Phonograph Supply Co., Inc.—Enjoy Business Discussions—Adolf Heineman Honored—Visit Factories

The managers of the different branches of the Otto Heineman Phonograph Supply Co., in this country and Canada convened in New York last week for their first annual conference, and during the course of the week a number of important social events were scheduled which balanced the serious part of the program. This conference was noteworthy for the practical suggestions which were offered by the managers and the executives, and Otto Heineman, president of the company, left nothing undone to provide maximum returns for the time spent by his managers in New York.

The managers arrived in New York on Monday, and during the afternoon attended the first of a series of important business meetings. Plans and policies for the coming year were discussed, and it was the unanimous opinion of everyone present that the conditions in the talking machine industry at the present time evidence a stability and strength which is most gratifying. The remarkable strides made by the company last year influenced the introduction of manufacturing and sales problems which were discussed at length by the company's executives and managers.

On Tuesday morning the business meetings were resumed, and at Tuesday noon the manage rs were advised that Otto Heineman had arranged for a luncheon at the Hotel Astor to celebrate the sixtieth birthday of his brother, Adolf Heineman, assistant general manager of the company.

Adolf Heineman's Sixtieth Birthday

Adolf Heineman has worked indefatigably during the past few years to place the Otto Heineman Phonograph Supply Co. in the front ranks of the talking machine industry, and the wonderful progress achieved by this company may be attributed in a considerable measure to his unceasing efforts and unyielding energy. A capable executive and thoroughly conversant with every phase of the talking machine industry, he has rendered invaluable service to his brother in the foundation and expansion of the Otto Heineman Phonograph Supply Co. At the present time he is in charge of the company's Dean division, and his keen business acumen is reflected in the fact that this division is growing by leaps and bounds, and under his able direction and management is steadily adding to its prestige.

In addition to the branch managers, there were present at this luncheon the company's executives, a number of prominent members of the talking machine industry, and several invited guests. Everyone present was impressed with the fact that this gathering was an unusual one in many respects, and the congratulations which were showered upon Adolf Heineman made this veteran talking machine man thoroughly happy, although just a trifle ill at ease. A few hours previously he had entered his office to find it transformed into a veritable flower conservatory, and telegrams of felicitation from business and personal friends had been received continuously.

The luncheon was a fitting finale to a well-deserved tribute to a man who has worked day and night for the success of the Otto Heineman Phonograph Supply Co.

The Luncheon at the Hotel Astor

At the start of the luncheon A. G. Bean, general manager of the Elyria plant, was introduced as toastmaster, and a better selection could hardly have been made. His introductions of the various speakers were timely and witty, and in his first remarks he paid a tribute to the policies and methods of the Otto Heineman Co. Growing reminiscent, he spoke of the days when the company's floor space consisted solely of a room in a downtown office building, which held two people comfortably, and three with inconvenience. He compared this with the company's present factories in Elyria, O., Newark, N. J., and Putnam, Conn., in addition to the various branch offices maintained in the leading cities throughout this country and in Canada. When called upon by Mr. Bean as the first speaker, Otto Heineman was presented with a beautiful gold watch and chain bearing the inscription: "To Mr. Adolf Heineman in appreciation of the splendid services which he has rendered to the company." Mr. Heineman made a few replies, the chief of which was: "It is a matter of the greatest pleasure to me that this luncheon was being given in honor of his brother, and was not by any means a "company" gathering. In a stirring address that afternoon the audience was informed of the fact that this luncheon was being given in honor of his brother, and himself, Mr. Heineman said that any measure of success which his company had achieved must be attributed to the work which he and his brother had done. He had received from Adolf Heineman many years before the present organization was established. He emphasized the fact that his brother had investigated and felt the pulse of the talking machine industry long before it had reached its present basis of strength and permanence and paid a tribute to his brother's foresight, and judgment which had been a powerful factor in making possible the establishment of the Otto Heineman Co.

At the conclusion of the luncheon a standing toast to his continued good health and happiness Adolf Heineman was prevailed upon to make a brief address, but with his characteristic modesty, he listed the results of his many years' work, and in turn expressed his appreciation of the spirit of camaraderie and true affection which he and his brother had enjoyed in their personal and business relationship.

Among the others present who made brief addresses, all of which contributed to the enjoyment of the luncheon were A. F. Measebach, manager of the Pittsburgh offices; John W. Harriman, National Bank; E. B. Rosen, director Harriman National Bank; E. A. Wudmann, president Pathe Freres Phonograph Co.; Jacob T. E. Fritz, W. G. Phillips, and Dr. J. J. Klein. It was the unanimous opinion of these speakers that Adolf Heineman had discovered the eternal spring of youth, for his sixty years were reflected in his every word, and his speech was as though he had just passed the two-score milestone in his busy career.

On Tuesday evening Adolf Heineman entertained a number of visitors at his home, a delightful dinner bringing this eventful day to a happy close.

A Visit to the Meisebach Plant

On Wednesday the managers, accompanied by the heads of the Otto Heineman Co., spent the day at the factories of the Meisebach division in Newark, N. J., and a trip through this city at date and thoroughly efficient plant gave the visitors the "reason why" the Meisebach motor has won world-wide recognition as the leading motor in its field. A. P. Meisebach, who is vice-president of the Otto Heineman Co., entertained the visitors at luncheon at the Downtown Club, Newark, N. J., where a resume of the day's trip aroused hearty enthusiasm regarding the Meisebach products and their unlimited future possibilities.

Thursday at the Dean Factories

On Thursday the party left Putnam, Conn., where the factories of the Dean division are located. The managers learned at first hand some of the intricate processes incidental to steel needle manufacturing, and with Charles L. Dean and John M. Dean, Jr., as guides, explored the large new factory which has just been completed. They marveled at the perfected manufacturing which is evident in every department at this plant, and returned to New York inured with a true idea of the important role that this "baby" in the Heineman organization is destined to play in coming years.

Friday was spent in a series of business meetings at the executive offices, and on Saturday the managers departed for their respective territories, tired and travel-worn, but heartily enthusiastic and optimistic regarding 1918 possibilities. The week was a signal success, and Otto Heineman, who arranged everything, including the week's activities, can well be proud of the capable and aggressive corps of managers who are making the Heineman products the standards of the talking machine industry.

Frank W. Corley in the Service
The Head of Wholesale Victor Department of Corley Co. to Become Member of the Naval Flying Corps—His Good Work in the Trade

Announcement is made that Frank W. Corley, son of John G. Corley, the head of The Corley Co., Richmond, Va., and who is actively in charge of the wholesale Victor department of that company, has been accepted for service in the Naval Flying Corps. Although at the present writing he has not yet been called, the summons to duty is expected at any moment and Mr. Corley is ready.

The Corley Co., one of the leading musical houses of the South, has justly earned its slogan, "The House That Made Richmond Musical." Through the untiring efforts of Frank W. Corley their business as Victor distributors has reached large proportions. The Corley Fibre Victrola Trunk has been one of the products of this firm in which Mr. Corley has been especially interested. The sales of these fibre trunks have reached a very large figure.

Mr. Corley's genial nature has gained him a host of friends in the trade, not only in the South but throughout the entire country. These friends will learn with interest and admiration Mr. Corley's determination to dedicate his efforts for the duration of the war to his country.

NOW WITH LORD & TAYLOR
R. O. Hunter, formerly manager of the Victrola department of G. Schirmer, Inc., and prior to that Victrola manager for Wm. Knabe & Co., New York, is now manager of the Victor department of Lord & Taylor.

UNCONDITIONALLY GUARANTEED

The Blackman Talking Machine Co. has prepared attractive literature in behalf of this new model 10, which briefly calls attention to the fact that the Cleanrite brush automatically cleans the record grooves, and gives the needle a clean track in which to run. It preserves a clear reproduction, and by preventing the accumulation of dust and dirt in the record grooves prolongs the life of the records.

The Cleanrite record brush is a model of simplicity in its adjustment and use, and Victor dealers can present this brush as one of the most practical accessories that have been offered to Victrola owners in recent years.

THE BRUNSWICK LINE IN DENVER
Proving Very Popular and Many New Agencies Are Established Among the Dealers—C. J. Carroll Now in Charge of Department

DENVER, Colo., March 9.—The phonograph department of the local branch of the Brunswick-Balke-Collender Co., although established only about a year ago, has met with unusual success and reports that the Brunswick machines are meeting with general favor in this section. A large number of agencies have been established in Colorado and Wyoming, among the most recently the Chamberlain Furniture & Undertaking Co., Casper, Wyo., the Howell Drug Co., Ft. Lupton, Colo.; the Davis, Brown, Mc Allister Mercantile Co., Berthoud, Colo., and L. E. Frazer, Windsor, Colo.

A recent addition to the staff of the local phonograph department is C. P. Carroll, who has been engaged in the talking machine trade in the Middle West for the past eight years. He will have supervision of the department.

The Fischer Company

Oldest Pathe Jobbers

The Fischer Company were the first to appreciate the wonderful merchandising possibilities of Pathe phonographs and Pathe records.

The growth of our organization has been remarkable. The dealers established by us have all been successful. All have made money. Our service and co-operation have been invaluable to them.

It has been the ONE idea of this house since its inception to give a LITTLE BETTER service than could possibly be expected. The recent establishment of a dealers' service bureau is a concrete example. The object of this department is to originate and perfect merchandising ideas and to give expert advice and assistance to our dealers.

Recent enlargements enable us to adequately serve a few more dealers. We respectfully solicit a trial order. Our ONE DAY SERVICE and SHIPMENTS COMPLETE in these times of crowded carrying conditions mean more sales.

Prospective dealers write for our book just published — "The Other 20%"

PATHE ART MODELS

Marvelous in Tone Exquisite in Design

Priced—$190.00

Three periods—William and Mary, Sheraton and Jacobean.
View of Temple of Music Display Room

The concert was a resounding success. Mr. Deetz, manager of this enterprise, was much pleased with the performance.

Miss Isabelle Dillin, Alice and Lois Smith, and Jean Klonoski, three of the most promising young performers, held the audience in thrall with their presentations.

The concert hall was filled to capacity, and the audience was enthusiastic throughout.

The program included a variety of musical numbers, ranging from the classical to the modern.

Home from Coast-to-Coast Trip

Frank T. Nutze, Vice-President of Stephenson, Inc., Motor Manufacturers, finds conditions excellent throughout the country.

After a trip across the continent, Mr. Nutze visited several Pacific Coast cities and some of the larger commercial centers of the Middle West.

He reports both the retail and wholesale branches of the talking machine industry in the territory visited to be very prosperous, and the outlook to be healthy. In Chicago he found the talking machine manufacturers very optimistic, the majority of them looking a constant increase in the demand for their products.

One reason he stated for the better business situation in the West has been the absence of a coal problem on anything like the scale which visited the East. Then, too, he found shipping conditions much more favorable. While their shipping facilities are taxed they have avoided the critical conditions which developed in other parts of the country.

Mr. Nutze closed several business deals, some of which involve the shipment of quantities of Stephenson motors throughout the coming year. Arrangements for a Stephenson service station were closed for the city of Chicago and adjacent territory, the Lakeside Co., Inc., of that city, taking over that representation.

Since his return Mr. Nutze has been very busy catching up with his correspondence, and at the same time acting as traffic expert in seeing that the shipments of Stephenson motors are placed on the shortest and fastest routes, which is “some job” in these days of embargoes and freight congestion.

The Phonograph Co., Chicago, Edison jobbers, have increased their capital stock from $25,000 to $100,000.

Tone—the vital thing

If you, as a manufacturer, can talk and prove tone superiority in your product, you have a selling argument to overshadow all the “talking points” of cabinets, and designs and accessory features.

You can talk tone superiority. You can put out a product that will be a revelation in tone-purity, tone-quality, tone-volume. When you realize what vivid, lifelike, colorful tone can be produced and sustained by the talking machine equipped with Parr Magnetic Reproducer fitted with the Vibratone Patented Diaphragm.

These two dominating and proven inventions open up wonderful possibilities for manufacturers eager to put their product at the top-notch of class and character.

You want your product to be RIGHT!

If you want your product worthy of your name, you certainly want that product to be right in its most vital feature. And equipped with the Parr Magnetic Reproducer—the reproducer for those who seek perfection.

The indestructible, non-crystallizing, always resilient VIBRATONE PATENTED DIAPHRAGM

Possessing all the good points of the diaphragms, it overcomes all minor defects. Equipped with four features.

GUARANTEED UNIFORM IN QUALITY, FREE FROM BUBBLES, BISSERS AND WAVES, THE VIIBRATONE PATENTED DIAPHRAGM IS UNEQUALLED.

It has a definite function and it performs it. It improves tone; in fact it creates new tone possibilities for every reproducer of other types.

SONORA DEALERS ENJOY BANQUETS
Yahr & Lange Drug Co. Entertain Retailers in Their Territory at Elaborate Spread—Minneapolis Drug Co. Follows Suit

The Yahr & Lange Drug Co., Milwaukee, Wis., distributors in Wisconsin for the products of the Sonora Phonograph Sales Co., has been achieving remarkable success with this well-known line, and during the past few months has established many important agencies throughout the State.
FRED Yahr, president of the company, is taking a personal interest in the activities of the Sonora department, and recently invited the Minneapolis Retailers to a banquet at the Plankinton Hotel in this city. This dinner was a signal success, and every dealer present expressed keen enthusiasm regarding the sales possibilities of the Sonora line, and many practical suggestions were submitted during the course of the evening.
In addition to inviting the Sonora dealers in Wisconsin to be his guests, Mr. Yahr also extended an invitation to the Sonora jobbers in surrounding territory, and a number of them accepted, including Sewall D. Andrews, Minneapolis Drug Co., Minneapolis, Minn.; O. C. Maurer, Kiefer-Stewart Drug Co., Indianapolis, Ind.; J. W. Hamlin, C. L. Van Houten & Zoon, Chicago, Ill. Frank J. Coupe, director of advertising and sales for the Sonora Phonograph Sales Co., was also present at this dinner, and contributed materially to the success of the banquet.
When Mr. Andrews returned to Minneapolis, he was so favorably impressed with Mr. Yahr's plan that he extended an invitation to the Sonora dealers in his company's territory to be present at a banquet which he gave in Minneapolis. This event was also a decided success, and in addition to the dealers and executives of the Minneapolis Drug Co., there were also present George E. Brightson, president of the Sonora Phonograph Sales Corp., accompanied by Mr. Coupe.

ENTERTAINS CHICAGO FORCE
Arthur D. Geissler, president, and Roy J. Keith, vice-president of the New York Talking Machine Co., Victor distributors, returned last week from a visit to Chicago, where they attended directors' meetings of the New York Talking Machine Co. and the Chicago Talking Machine Co. While in Chicago Mr. Geissler gave a theatre party and dinner to his associates and the members of the board of directors, and Mr. Geissler’s well-deserved reputation as a genial host was further emphasized by the success of this party and dinner. The event was marked by a spirit of good-cheer and good fellowship, and was a fitting finale to a very pleasant Chicago visit.

The Glendale Phonograph & Piano Co., Vincent Salmacia, proprietor, has opened a store in Glendale, Cal.

WHY NOT A TALKING MACHINE MEN'S CLUB IN NEW YORK?

Strong Movement Under Way to Establish a Social and Business Center for the Trade at Large—Plan Would Present Many Genuine Advantages—Men Already Have Club

Why not a talking machine men's club in New York—a social center where members of the trade can meet their friends, and where out-of-town visitors may make their headquarters?

There is a strong sentiment in the trade at the present time for the organization of a talking machine men's club, along the lines of clubs organized in the piano and other trades, and which have proven so successful. It is felt that this industry has reached the point where such an institution would prove most desirable, and that the trade is big enough to assure the support of such a move without any difficulty.

As one well-known talking machine man said to The World: "What the trade wants just now is a permanent meeting place where the members of the industry and their friends may gather for luncheon, for dinner, for a social hour or two, to chat, smoke, or otherwise entertain themselves, or to listen to valuable addresses on business topics delivered by men prominent either in or out of the trade. At the present time our industry is one of the few of its size in the city that has not such headquarters, and the fact is to be regarded in the light of a handicap.

"The piano trade some years ago organized the Piano Club of New York, with headquarters in the Bronx, and the club has proven most successful, there being a representative showing for luncheon each day and some big turnouts at special events. One can drop in there most any hour of the day and find somebody, and it proves a most welcome center to which to take piano men from out of town for luncheon or a chat. If the piano men can do it why cannot the talking machine men, who are far more numerous?"

Although the club plan is still in a purely embryonic state, it has already attracted the attention of some active lights in the industry, and one prominent furniture man who conducts a talking machine department in his store has volunteered to provide the furnishings for any quarters that may be selected for a clubhouse, whether simply a floor or an entire building. It is believed that a logical location for a talking machine men's club would be in the forties, somewhere between Fifth avenue and Broadway, convenient to the hotels, theatres and railroad terminals, and within easy reach of trade centers.

It is felt that many speakers could be prevailed upon to address the trade if some place were provided where a fair size audience could be gathered. Then, too, there would be a genuine advantage to the trade in the social intercourse of its members through such a club. Out-of-town visitors, and there are a goodly number of them, would find a talking machine men's club a congenial place in which to spend their leisure moments, and to receive their mail.

Those who have advanced the club plan emphasized the fact that such a movement might well be fattened by the Talking Machine Men, Inc., who with their present organization, representative of the trade at large, could do much to develop interest in the idea. It is pointed out that there are several hundred manufacturers, jobbers and dealers in the metropolitan district who could be depended upon to support a club, a sufficient number in fact to insure the financial success of the venture, if conducted along conservative lines, at a minimum of expense to the individual.

As has already been stated, one advocate of the club idea has volunteered to provide the furnishings for the clubrooms, and this is to be recognized as eliminating one of the big, initial expenses. With the furnishings taken care of, the club members would be called upon to pay only the rent and the operating expenses, with a return revenue being realized upon any restaurant or refreshment privileges that might be incorporated.

The World would be glad to receive any expressions of opinion from the trade in reference to the club idea."

SONORA CO. ELECTIONS FOR 1918

George E. Brightson Again Heads That Concern for Coming Year.—The Other Officers

The officers and directors of the Sonora Phonograph Corp. for the ensuing year, as elected at a recent meeting of the stockholders, are as follows:

George E. Brightson, president and treasurer; J. N. Beach, vice president; Joseph Wolff, secretary; W. J. Farquhar, assistant treasurer, secretary American District Telegraph Co.; William Varin, comptroller. Directors: J. N. Beach (president of Lord's Court Realty Co., director Equitable Life Assurance Co., director Atlantic Mutual Marine Insurance Co.); George E. Brightson, H. P. Chilton (member of banking house of Moore & Schley); Waldo G. Morse (vice-president State Bank, Sevca Falls, N. Y.); Joseph Wolff.

The officers and directors of the Sonora Phonograph Sales Co., Inc., for the ensuing year, as elected at a recent meeting of the stockholders, are as follows:

The CHENEY PHONOGRAPH

Plays all records—better

The success of the Cheney, from a selling standpoint, is a tribute to the public's appreciation of real musical and artistic worth.

The serene purity of Cheney tone and its perfect renditions of all makes of records result from entirely new applications of acoustic principles. It puts the real artist into the record!

The Cheney is an artistic creation and as such it commands prestige and the sublime, but powerful "word of mouth" advertising that goes with the best.

Each sale becomes a permanent advertisement for your store.

Cheney cabinets cannot be excelled in beauty of design and quality of workmanship.

Cheney sales and advertising co-operation is in keeping with the high quality of the instrument.

MAKING SATISFACTORY PROGRESS
American Graphophone Athletic and Social Club a Social Center for Grafofola Makers

The American Graphophone Athletic and Social Club, which is composed of the employees of the American Graphophone Co.'s factories at Bridgeport, Conn. (manufacturer of Columbian products), is making very satisfactory progress, and according to present plans the members will be afforded many opportunities to thoroughly enjoy and appreciate the entertainments and amusements which this club affords.

The club holds its meetings monthly, and the object of these meetings is to stimulate the interest and activities of the members in athletic and social welfare. The club is meeting with the hearty support of the "Graphites," and has gone a long way in the promotion of good fellowship among the employees. It is inter-

THE NEW VICTOR WIRELESS POSTER
Most Attractive Piece of Publicity for Use of Dealer Just Issued by Victor Co.

The Victor Talking Machine Co. has just sent out a most attractive poster in colors for the use of the dealers in window and store displays, and featuring the special Victor records for wireless operators announced recently. The poster shows an army wireless station, back of an artillery position in France, with the operator sending messages to headquarters. The coloring is particularly effective, and the whole poster is of the sort to demand immediate attention. The Victor wireless records are produced in accordance with the Marconi system, and are, therefore, to be accepted as the standard.

With the wireless poster there has also been issued a second poster referring to the "Victrola Book of the Opera," showing actual reproductions of the book, with its attractive cover in green and gold.

NEW STORE OPENED

The Jamestown Piano & Phonograph Co. has opened a store in Jamestown, N. Y., featuring the Hallet & Davis pianos, as well as Pathé phones and records. Special soundproof rooms are being installed.

The man who could earn more through greater effort, but who does not make the attempt, cheats himself—and he cheats the rest of the world.

MUNOLA

By economical manufacturing methods and quantity production we are able to offer what we believe to be by far the greatest Phonograph value-to-day on the American market.

Its price places it within the reach of every American home. Its fine appearance makes it fit for a place in the finest homes in the land. Its richness of tone and splendid finish and design will delight the most critical buyer.

Mechanically the MUNOLA leaves nothing to be desired. Our especially designed double spring motor plays three ten-inch records with one winding and is absolutely noiseless when running. The tone arm, sound box and full sized all wood horn are scientifically designed and properly proportioned to produce a full, round, mellow tone. PLAYS ALL MAKES OF RECORDS AS CLEAR AS A BELL.

MR. DEALER: The MUNOLA will make you immense profits. It sells to every class of buyer because it is cheap enough for anybody—good enough for everybody. We are rapidly establishing Agencies in cities all over the country. If you are looking for the best and most profitable popular priced Phonograph proposition to be had to-day, write us at once for our dealer proposition and full particulars.

MUNZER MANUFACTURING CORP.
307 Sixth Avenue So. Sole Makers Minneapolis, Minn.
"Strong buying by the public of Pathé Records"

Sounds like a market report, doesn’t it?

It is a fact, however.

So great is this insistent buying demand among Pathé purchasers that the monthly release of Pathé Records is hopping along in increasing numbers.

Of course, there’s reason for it.

Pathé is establishing a reputation for being first on the spot. Soon as a song, or other musical number, makes a hit, Pathé has it on a Record. That’s service.

Then again—in the higher realm of song—such world-famed artists as Muratore, Muzio, Didur, Thibaud, Ganz, Hoffman, Rimini, Ober and a host of others, most of them exclusively Pathé, entrust their finest offerings to Pathé Records because of the realism and faithfulness of Pathé Record reproduction.

Get in on this Pathé prosperity.

Price Maintenance Suit of Boston Store of Chicago vs. American Graphophone Co. Decided in Favor of the Chicago Concern

WASHINGTON, D. C., March 5.—The United States Supreme Court handed down yesterday an important decision which in effect limits the rights of a patentee under the patent laws to control the resale price of an article. This decision was rendered in the case of the Boston Store of Chicago versus the American Graphophone Co.

In September, 1915, the United States District Court in Chicago granted an injunction against the Boston Store of Chicago enjoining it from selling Columbia records at cut prices. The case came before the Supreme Court upon a certificate from the United States Circuit Court of Appeals in and for the Seventh Circuit.

The questions certified to the Supreme Court were the following:
1. Does jurisdiction attach under the patent laws of the United States?
2. If so, do the recited facts disclose that some right or privilege granted by the patent has been violated?
3. Can a patentee, in connection with the act of delivering his patented article to another for a gross consideration then received, lawfully reserve to contract a part of his monopoly right to sell?
4. If jurisdiction attaches solely by reason of diversity of citizenship, do the recited facts constitute a cause of action?

The Supreme Court in its decision answered the first question in the affirmative, and all the other questions in the negative.

STOCKHOLDERS ASSENT TO PLAN

President Francis S. Whittem, of the American Graphophone Co. and the Columbia Graphophone Co., has sent out a letter to stockholders in which he says that over 90 per cent. of the stockholders have filed their assent to the reorganization plan, 90 per cent. being necessary. Temporary certificates of the Columbia Graphophone Mfg. Co., as the new company to take over American Graphophone will be known, will be issued shortly. The time for stockholders who have not done so to turn in their stock has been extended to March 15.

MUSIC "SOMEWHERE ON ATLANTIC" 
Naval Officer Writes Interesting Description of the Playing of Phonographs on Transport Bound for "Chicks"—How Various Kinds of Music Affect the Fighting Man  

SAN FRANCISCO, CAL., March 7.—Is the musical instrument a necessity or a luxury? Ask the boys in the canteens, on the transports or in the trenches. George McConnell, of Fraser & McConnell, piano dealers of this city, is satisfied that as this will be a very real necessity. In evidence thereof he cites a letter he recently received from a captain, formerly of San Francisco, written while the officer was "somewhere on the Atlantic" headed for "somewhere in France."  

In the opening paragraph the officer said: "A phonograph is playing in the distance, sometimes a classic and sometimes a love song." And as he proceeds with his letter he interrupts himself from time to time to tell what the machine is playing. Now it is "A Little Bit of Heaven." And this brings to the soldier's mind visions of dear old San Francisco, as it was there he had a friend who loved to sing the song. Then comes the Largo from Handel and the sadness makes the boys feel that it is very hard to keep a stiff upper lip. But the lighter things of life constantly bob up in youth and the captain refers to one of his comrades who is lying in his bunk, where he "Just Can't Make His Stomach Behave." Towards the end of the letter he says: "Now we are going to have a march and this perhaps is the bag," and his friendly communication takes on a sprightlier tone at the prospect. Truly, he says in conclusion, if it were not for the music it would be hard to keep up a fellow's spirits. 

Can you not picture the young officer sitting apart from the group about the phonograph, holding commune with his friend by means of the written word, but his every thought dominated by the music that flows from the over-worked phonograph? Can you picture such a scene and say that the musical instrument is not a necessity of war time? 

1918 METHODS OF ADVERTISING 
Boston, Mass., March 5—George W. Hopkins, general sales manager of the Columbia Graphophone Co., New York, was one of the speakers Saturday at the monthly dinner of the Pilgrim Publicity Association.  

Mr. Hopkins chose for his subject "1918 Methods of Advertising," and gave one of his usual effective and inspiring addresses. He told the advertising men present that literature is up to them to make business earn more dollars than ever, so that these dollars may be used in supporting the Liberty Loans.  

"There never was such a time in history," he said, "for the making or breaking of men in business. I'm not at all pessimistic, but the American business man must get his affairs into such shape that he can take advantage of the $7,000,000,000 that will be spent by the Government in prosecution of the war. The rich man, too, has less money to spend than he ever had before; and you must accommodate your business to these changed conditions or you will go down rather than up." 

He outlined the various selling appeals in the vending of merchandise. Concerning one change in the psychology of the buyer, he said that the draft has made a Beaum Hamlum of the consumer and this change is reflected in the average man. 

NEW HOFFAY CABINET MODEL  
A new style of cabinet has been adopted by the Hoffman Talking Machine Co., Inc., and in the future all their reproductions will be produced in this new style, which will make the Hoffman distinctive. A phonograph of the new model is reproduced herewith and will give some idea of its attractiveness.  

The Hoffman Talking Machine Co. are celebrating this spring their "three years of progress." Announcement of the accomplishments of the firm in that time appeared elsewhere in this paper. The recent new Hoffman Style decision of the Hoffman Co. that they would release their two reproducers, the "Resurrectone" and the "Hoffay-Fork Tone," for general use to eager prospective buyers, has resulted in necessary arrangements, has brought a flood of requests for these reproducers to the Hoffman offices during the past four weeks. 

MAKING IMPORTANT INSTALLATIONS  
A. L. Van Van & Co. Equip a Number of Important Stores With Their Booths  

In a chat with The World this week Arthur L. Van Van, head of A. L. Van Van & Co., manufacturer of Van Van brand sets, commented upon the fact that the company had been making unusually satisfactory progress in closing important installations in Brooklyn. At the present time, Van Van booths are being installed in the establishments of several prominent Brooklyn talking machine houses, and in all parts of this territory the company's booths are covering splendid service. Mr. Van Van attributes this progress to the satisfaction his booths are giving the dealers, for many of these installations have been repeat orders.  

In current advertisements issued by the company Mr. Van Van called attention to the fact that in a recent advertisement used by the Columbia Graphophone Co. on the back cover of the Saturday Evening Post an illustration was used that portrayed the Van Van booths. The illustration, in question was the interior of the store of Handman, Peck & Co., Brooklyn, N. Y., which ordered a Van Van installation after thoroughly investigating the merits of these booths. As this back cover advertisement costs $15,000, Mr. Van Van is naturally gratified to feel that a store with a Van Van installation was selected for use in this advertising.  

Among the recent Van Van installations in Brooklyn are the following: Ridgewood Oratorio Shop, Frederic Becht, Kirner Bros., Stutz & Rauer, and a complete installation for the piano and talking machine rooms of Frederick Loesser & Co.

SERVICE FOR THE DEALER

The service department of the New York Talking Machine Co., Victor wholesaler, has prepared for the use of its dealers a series of unusually artistic feature posters that can be dispensed with excellent advantage. It is the intention of this department to prepare one of these posters each month, and those issued to date have won the enthusiastic approval of the Victor dealers in metropolitan territory.

One of these recent posters featured the Victor records made by Jascha Heifetz, the phenomenal young violinist, who has taken the country by storm, and who records for the Victor Talking Machine Co. exclusively. This poster presents a cutout of Heifetz in full pose, and was executed by Louis Fischer, one of the leading poster artists in New York.

Another recent poster features the vocal record "Lorraine," which promises to be one of the most popular semi-patriotic songs that have been introduced during the past year. The subject of this poster is in keeping with the text of the song, and is well calculated to attract favorable attention from all Victor owners.

Another recent poster featured the Victor record of the "Missouri Waltz," one of the best selling waltz records that have been introduced in recent years.

The service department of this company has also instituted a special combination service postcard, which includes a one-page insert that can be enclosed with the monthly supplements. This insert features ten records which the company has in stock, and this list contains selections that make a definite appeal to all music lovers. The headings of each insert are especially attractive, and usually feature some of the latest hits of the day.

In order to enhance the value of this insert a hanger has been prepared which also lists these ten records, and the progressive Victor dealer can use this hanger in conjunction with this insert, to stimulate the demand for ten records that can be promptly supplied.

NEW SONORA AGENCY OPENED

West Atlas, Wis., March 12—The exclusive agency for the Sonora phonograph in West Allis, one of the largest and most important suburbs of Milwaukee, has been placed with the Central Drug Co., 626 Greenfield avenue, by Yahr & Lange, Milwaukee, distributors. The Central Co., owned by Theodore J. Mueller, is remodeling and enlarging its store in order to provide elaborate display and demonstration rooms.

REMOVE TO LARGER QUARTERS

Ready File Co., Inc., Compelled by Growth of Business to Move Executive Offices to the Fourth Floor of Castle Hall Building

INDIANAPOLIS, Ind., March 8—For the second time within the past year the Ready File Co., Inc., has been forced by the ever-growing volume of business to move to larger executive quarters. The growth of this fast selling specialty for filing records has gone to the fourth floor of the Castle Hall Building, where they occupy a suite consisting of six departments and an experimental laboratory.

When seen in his new private office, F. O. Wilking expressed great pleasure over the new experimental laboratory. He said in part: "We are all greatly gratified in having at last the laboratory that has been in our minds for the past several months. Here we can, I am sure, make a product that can be sold, and I hope to say, that we can make a product that can be sold at a lower price, and be the difference between having to have this thing done and not having to have it done at all.

APPOINT NEW BRUNSWICK AGENCIES

Ten Dealers in This Section Take on Line During Month—Changes in Staff at New York Office—Staff Meeting of Sales Force

Both the wholesale and retail department of the Brunswick phonograph at the New York headquarters of the Brunswick-Balke-Collender Co. report general business prosperity.

In the period from February 15 to date ten new agencies for the Brunswick phonograph were opened by this office. Seven of this number were opened within the last month.

Various changes of territory were made in the sales staff. Chester Abelowitz, formerly in the New Haven district, is now in New York City. F. W. Johnston has been transferred from New Haven to Brooklyn. J. J. Brophy, formerly in New York City, is now in New Haven. A. E. Wengrovius is covering Albany and H. D. Clark, New Britain.

The salesmen met in the New York headquarters on Saturday last for a staff meeting at which time the new "Altuna" reproducer and tone arm for the Brunswick phonograph was demonstrated.

INCREASE CAPITAL STOCK

Phonograph Co., of Milwaukee, Edison Jobber, Increases Capital From $30,000 to $50,000

Milwaukee, Wis., March 13.—The capital stock of the Phonograph Co. of Milwaukee, 213-215 Second street, Edison jobber in Wisconsin and Upper Michigan, has been increased from $30,000 to $50,000. It is stated that there is no significance in the increase excepting that it is demanded by the constantly growing volume of business. William A. Schmidt is manager of the company, which also controls the Edison Shop, retailers for Milwaukee and vicinity.

SONORA PRICE FOLDER ISSUED

The Sonora Phonograph Sales Co. has just issued an attractive folder which presents photographs of the complete Sonora line, together with list prices. These photographs are clear and well detailed, and are carried out the Sonora idea of dignity and quality. The complete line of Sonora phonographs with their prices are as follows: "Supreme," $1000; "In- visible," No. 1, $250; No. 2, $500; "Grand," $300; "Laureate," $215; "Elite," $200; "Baby Grand," $180; "Intermezzo," $150; "Imperial," $15; "Troubadour," $50; "Iphigenia," $50; "Mendelssohn," $55; "Melodie," $50.

WHERE BUYING POWER LIES TO-DAY

Some Interesting Comments on Changed Conditions From Edison Diamond Points

It is no exaggeration to say that the earning capacity of the working man is to-day much higher than it has been in years, says Edison Diamond Points. There are probably five million families in the United States and Canada who to-day are in a position to purchase what they had previously considered far beyond the reach of their purse. The high cost of living notwithstanding, the working man is better situated financially than he has ever been.

The buying power to-day is in the hands of the working man. We believe that in certain localities the large percentage of buyers of New Edisons in 1918 will be working men, men who to-day can afford to have those things that have long been out of their financial reach.

In January, we sent you a questionnaire about your business. The opening question was: What percentage of your sales in November and December was made to the "average" customer? A good many replies have been received, enough, in fact, to shed a good deal of light on your business in the future. There are numerous cities and towns in this country where from 90 to 100 per cent. of our dealers’ business is transacted with men of the working class.

If you are situated in a large manufacturing community, you have an untouched field before you, but bear in mind that you are the one to do the selling. Indications are that 1918 will be the best year on record for the man who goes after business—it may not be quite so good a year for the dealer who stands behind his counters and waits for business to come to him.

The J. B. Greenhut Co., Inc., the big New York department store, are closing out their business. They hold a Victor jobber’s license, although selling only at retail, and the Victor stock has been taken over by another local jobber.

Magnolia Message No. 2

Control of Loudness is essential to the modern successful Talking Machine. The TONEGRADUATOR carried by every MAGNOLIA is simple, efficient and trouble-proof.

Send for handsome illustrated catalog.

THOS. A. EDISON AS A PROPHET

Article Written by Him Forty Years Ago Gave Accurate Forecast Regarding the Wide Sphere of Usefulness of the Phonograph

An article written by Thomas A. Edison for the North American Review May-June, 1878, recently came to light during a search among some old documents in Mr. Edison’s laboratory. In this article Mr. Edison presented a number of categorical questions to which he appended answers, covering almost every phase of phonographic development, showing that he had been successfully accomplished, as well as certain possibilities which subsequent developments prove that Mr. Edison was a prophet in his own country.

This North American Review article, which by the way, is being reprinted in full in the current issue of the Ambro Monthly for its historical importance, emphasized Mr. Edison’s ideas regarding the future of the phonograph, almost forty years ago, in which many of the accomplishments of to-day were then set forth as among the certainties.

In his questions and answers he covered sound production in its various phases, record making and multiplication as well as the preservation of sounds. He said further: “Conceding that the apparatus is practically perfected in so far as the faithful reproduction of sound is concerned, many of the following applications will be made to the present new form apparatus, which the writer is now about completing, is finished. These, then, might be classed as actualities; but they so closely trench upon other applications which will immediately follow that it is impossible to separate them; hence they are all enumerated under the head of probabilities, and each specially considered. Among the more important may be mentioned: Letter-writing, and other forms of dictation, books, education, reader, music, family record; and such electrotype application as books, musical boxes, toys, clocks, advertising and signaling apparatus, speeches, etc. etc.”

Mr. Edison treats these subjects in detail and shows how phonographic books may be used in the home; how the phonograph may be used for educational purposes; as a musical entertainer; as a family record; for toys of various kinds, and points out the possibilities of the photographic clock that will tell the time of day, how phonography may be used for advertising, for transmitting the great speeches of prominent men, postority and lastly, and in quite another direction, tells how the phonograph will perfect the telephone and revolutionize present systems of telegraphy.

The article, which is very lengthy, certainly demonstrated Mr. Edison’s complete grasp of the phonograph field four decades ago.

TELLS OF COMPANY’S PROGRESS

Phonograph Clearing House, Inc., Fills a New Field of Usefulness for Phonograph Manufacturers Generally—Centralizes Supplies

In a recent chat with The World, S. N. Rosenstein, president of the Phonograph Clearing House, Inc., New York, gave some interesting ideas in connection with the foundation of his house, and the success which it is achieving.

Before he established the Phonograph Clearing House, Inc., Mr. Rosenstein was connected with the phonograph industry in various ways for a number of years, and he states that he realized the need of a central depot for the busy manufacturer wherein he might find whatever he wanted without the least waste of energy. “To this end,” said Mr. Rosenstein, “I established connections with the manufacturers in the East and West, and can now supply the manufacturer with anything he wants from a needle to a finished machine. I wish to call the attention of the manufacturers, however, to the fact that, as a rule, when the manufacturer is in the market for a new tone arm, sound box, motor, or any part, he does not know exactly just what he wants, and is desirous of learning just what is on the market that would best suit him. He is, of course, hardly willing to enter into direct communication with the manufacturers, and that is where our clearing house can help him. We give the manufacturer the benefit of absolute tests on every article, and then sell him whatever he chooses to adopt without any additional cost, and certainly with less worry. In addition, we help many manufacturers dispose of overstock through our study of the sources of supply and demand.”

The Texas-Oklahoma Phonograph Co., Edison jobbers, with headquarters in Dallas, Texas, have leased a large storeroom measuring 50 by 200 feet, at 906 Commerce street, that city.

DISTINCTIVE FEATURES HELP

Why the Brown Disc Record Cabinets Grow in Popularity With the Trade

The sales manager of the Globe-Wernicke Co., Cincinnati, O., manufacturer of Brown disc record cabinets, in a recent chat with The World pointed out that the success of these cabinets may be attributed to the practical utility of its distinctive filing arrangements, and the favorable appeal which its other features make to the talking machine owner. The Brown disc record cabinet is so devised that a record may be found instantly, and the compartment from which it was taken is left open for its return. There is no danger to the record, as it is either on the machine, in the hands of the operator or in its compartment.

From the standpoint of attractiveness the Brown disc record cabinet harmonizes completely with the most expensive furniture in the living room or music room. It is splendidly constructed, and is made in four sizes; two-drawer, four-drawer, six-drawer and twelve-drawer. The Globe-Wernicke Co. has prepared an artistic catalog, designated as No. 317, which is devoted to the Brown disc record cabinet.

TEST offered to dealers to prove the superiority of Wall-Kane Steel Needles

Take two standard disc records of the same selection, play one ten times with the same WALL-KANE loud needle; play the other record, the same selection, ten times, but with ten, new, full tone steel needles.

You will find that the record played ten times with the same WALL-KANE needle will sound clearer, will have less surface note, and that under the magnifying glass the grooves of the record played ten times with the ten steel needles will seem to be more disturbed.

Beware of Imitations

Package of 50 WALL-KANE needles. Loud, Extra Loud and Medium, greater value than 500 ordinary steel needles, retail for 10c, costs the dealer 65c. Jobbing territories open.

How It Operates
"COLUMBIA RECORD" REAPPEARS

Popular House Organ of Columbia Graphophone Co. in New Dress and Full of "Live" Copy

The "Columbia Record," the popular house organ which was published by the Columbia Graphophone Co. for several years, and which was temporarily discontinued some time ago, made its reappearance this month in new form, and judging from the success of the first number the new "Columbia Record" is destined to become a most popular house organ.

The form of the new "Columbia Record" is decidedly individual and distinctive, the paper being issued as a four-page newspaper, each sheet measuring 18 by 27". This makeup permits of the introduction of attractive illustrations.

On the first page of this new publication is presented a group of pictures showing how Columbia dealers have utilized the new window display service inaugurated by the Columbia dealer service department. There are also presented several letters received from Columbia dealers throughout the country commenting upon the value of these displays, and the impetus that they have given to record sales.

There is a column story on the first page regarding "Thornton Burgess Week," and reproducing some of the fantastic characters which have made this author's Bed-time Stories famous.

Other pages of this new "Columbia Record" reproduce some of the new Columbia car cards, which are multi-colored masterpieces of lithographic art, and which form one of the most effective links in the dealers' advertising campaign. There are also reproduced several of the new Columbia advertising cats, free electrotypes of which are sent dealers on request.

One of the most valuable articles in this new "Columbia Record" is a list of the tentative tours of Columbia artists, giving a detailed account of the different cities at which they are scheduled to appear during the next few months. Among the Columbia artists listed in this section are Barrientos, Casals, Cincinnati Symphony Orchestra, Eddy Brown, Lucy Gates, Leopold Godowsky, Louis Gravereau, Josef Helfgott, Margaret Kemeny, Morgan Kingston, Florence Machet, New York Philharmonic Orchestra, Oscar Seagle, Helen Stanley and Eugen Ysaye. There are also other practical suggestions in this first issue of the new "Columbia Record," which is being ably edited by Paul Hayden.

The purpose of the new publication is well summed up in the following editorial comment:

"You are the most important man in the Columbia business—because you sell Columbia product. Without your efforts there would be no Columbia factory, no Columbia Grafonolas, no Columbia records, in fact, no Columbia Co. You are the wheels, the belts, the pulleys, the engine, the coal, the steam, the power which is making Columbia what it is today and will make it what it will be to-morrow. "Our factory knows unless they give you the right product they will have to shut down. Our executives know that unless they give you what you want and what you can sell there is no excuse for their existence. "Having proved to you your importance we are glad to announce the reissuing of the 'Columbia Record'. It is to help you be more important. It is to be one of the most unique and dealerish house organs in existence. "We want to tie up the smallest Columbia dealer in America with the biggest Columbia sales ideas. "In addition to sales plans developed by our sales experts the 'Columbia Record' will tell stories of successful plans developed by other Columbia dealers. Here's where you come in again. Let us know any time you make a successful sale. Your success is as good as the next fellow's and we want everyone to be happy with your ideas and ideas of everyone else's ideas."

REPUBLIC CO. CREDITORS TO MEET

CHICAGO, ILL., March 11.—The first meeting of the creditors of the Republic Phonograph Co. of Illinois, which was adjudicated bankrupt on March 5, will be held at the offices of the referee in bankruptcy, Sidney C. Eastman, at 53 West Jackson Boulevard, March 19.

JOBBERS' ASSOCIATION APPROVES "REFERENDUM NO. 23"

Casts Affirmative Vote on Proposal to Discriminate Against Enemy in Trade After the War if Necessary for Self-Defense—President Blackman Explains Real Meaning of Proposal

The members of the Chamber of Commerce of the United States were recently requested to vote on a referendum, designated as "Referendum No. 23," which related "to a proposal to discriminate against Germany in trade after the war, if necessary for self-defense." The vote on this referendum was overwhelmingly in the affirmative, and one of the associations that voted "yes" was the National Association of Talking Machine Jobbers, which cast its vote through French Nestor, national counselor, after a meeting of its executive committee.

When the referendum was first received J. Newcomb Blackman, president of the National Association of Talking Machine Jobbers, made a careful study of its different proposals, and about that time the newspapers started a controversy regarding the meaning of certain paragraphs in the referendum. After going into the matter very carefully, Mr. Blackman sent the following interesting letter to Mr. Nestor:

"I have purposely delayed voting on the United States Chamber of Commerce Referendum No. 23, as I wanted the benefit of the controversy, which I have noticed in the newspapers regarding it.

"The referendum itself was not read by me until to-day; and the newspaper articles gave me the impression that it called for a vote to boycott Germany after the war without qualification. I think that represents the prevailing idea.

"A careful analysis satisfies me that this referendum merely attempts to set forth the general belief of American business men, as well as the general public, that we were forced into this war through a military form of government in Germany.

"Furthermore, that, as President Wilson has so clearly pointed out in his various messages, we cannot hope to have a lasting peace if the fulfillment of its terms depends upon the present or some similar government which, in effect, is a military autocracy.

"It is to me an affront to the German business man from the American that, to avoid what possibly may be the birth of a commercial war and the introduction of a boycott against Germany, it is absolutely essential that the present form of government give way to one set up by the German people and responsible to them.

"In other words, instead of our agreeing now to it is to me a return to the German business man from the American that, to avoid what possibly may be the birth of a commercial war and the introduction of a boycott against Germany, it is absolutely essential that the present form of government give way to one set up by the German people and responsible to them."

"We have been told by President Wilson that, in order to avoid war, we must follow a policy of peace, and that peace the enemy takes on a different form of government, we will be obliged to discriminate, in order that we will not help a militaristic autocracy regain its strength only to wage another war.

"Inasmuch as this referendum has been issued and must be voted on, I hope our members will have a clear understanding of its object and effect.

"The third paragraph on page 4 of same is a simple explanation and reads as follows:"

"This proposal is concerned only in making clear to the business men of Germany that a continuance of the present German military autocracy will compel the rest of the world to unite in a business opposition to Germany as an act of self-preservation.'"

"I have endeavored in this detail to discuss the subject, because I so fear a negative vote giving rise to the opinion that, regardless of circumstances, American business would not discriminate against Germany commercially."

"If among our members you have negative votes, and such would sway the balance, so that we should be obliged to cast our vote for the association accordingly, I hope that no time will be lost in bringing this squarely to their attention, so that through no lack of proper interpretation a negative vote will be cast.

"On the other hand, I am frank to say that were this referendum to concern nothing but an unqualified expression of determination to boycott Germany after the war, I would most emphatically vote 'no.' To me it means a strong proposition to German business interests that our sincere regret in being possibly forced to take such action and an expression of what would bring this action about, also how it can be avoided.

"If I can be of any further service in this matter, do not hesitate to call on me, for this referendum has been given much publicity, and now that it has come to issue, should be voted on in a most intelligent manner.

"I think we all agree that we are fighting this war to insure permanent peace and liberty and are prepared to sacrifice everything to accomplish that end, so the least we can do is to leave no misunderstanding among ourselves, or even our enemy that will delay, hamper or defeat such an unseemly motive."
ANNUAL BANQUET AND DANCE

Of the Talking Machine Men, Inc. Will Be Held at Hotel McAlpin, New York, on April 10—An Interesting Program Has Been Arranged

The entertainment committee of the Talking Machine Men, Inc., has advised the dealers in New York, New Jersey and Connecticut that the association’s annual banquet and dance will be held at the Hotel McAlpin, New York, on April 10. Plans for this event are now being formulated, and judging from the indefatigable efforts of the committee, this year’s dinner will set a new high-water mark in point of attendance and enjoyment.

Sol Lazarus, chairman of the entertainment committee, and one of the most active workers of the Talking Machine Men, Inc., is being congratulated upon the acquisition of corps of aggressive and wide-awake associates for his committee. J. J. Davin, of the New York Talking Machine Co., is a member of the entertainment committee, and chairman of the reception committee, and in this important post is rendering invaluable service to Mr. Lazarus. Other members of the entertainment committee, who have “put their shoulders to the wheel” in a united effort to make the 1918 dinner a record-breaker are John E. Hunt, A. Galulce and Cass Riddle.

The committee has announced that the speakers of the evening will include Congressman Stephens, sponsor of the Stephens bill; H. C. Brown, assistant general manager of the Victor Talking Machine Co.; George W. Hopkins, general sales manager, and Marion Dorion, chief auditor of the Columbia Graphophone Co.; J. Newcomb Blackman, president National Association of Talking Machine Jobbers, and J. H. Tregoe, secretary of the Credit Men’s Association. James T. Coughlin, president of the association, will preside as toastmaster, and it is safe to say that this important position will be filled with adeptness and skill.

Through Mr. Davin’s efforts, the association is enabled to present to the dealers something novel in the way of entertainment, which should insure the certain success of this part of the program. The Hawaiian Troupe, which has made a series of Victor records that have achieved phenomenal success, will render a group of songs and medleys during the course of the dinner, and after the close of the banquet will furnish their irresistible playing for the devotees of dancing. The entertainment committee is making extraordinary efforts to have the fair sex well represented at this year’s gathering, and the program, with the Hawaiian Troupe as one of the leading attractions, is sure to be well attended.

SUFFER LOSS FROM FIRE

James E. Donnelly, music dealer of Bridgeport, Conn., recently suffered a fire loss of $2,500 to his stock of talking machines and records. Prompt work by the salvage corps of the Fire Department resulted in the saving of $4,000 worth of records.

FIRE IN LAWRENCE, MASS.

A fire which caused $150,000 damage to the furniture and department store of M. J. Sullivan, Lawrence, Mass., last week, destroyed practically the entire stock of talking machines and records on the second floor of the store. Several employees in the department had narrow escapes from the flames.

It’s a very unusual trouble that most of us can’t stand cheerfully—if it only belongs to the other fellow.

The “Mutual”—the ORIGINAL and PATENTED Universal Ball Bearing Tone-Arm

BEWARE OF INFRINGERS AND IMITATORS

This Tone-Arm has met with phenomenal success, and is being used exclusively by the leading talking machine manufacturers.

WE DO NOT SELL TO MOTOR MANUFACTURERS

Mutual Sound Boxes are accepted as the standard of the phonograph industry.

MUTUAL TALKING MACHINE CO., Inc., 145 W. 45th St., New York

London, England, E. C., March 1—A war weary determined democracy! Each separate unit in all walks of industrial and social life the world over heartily longing for a termination of Armageddon yet persistently determined to conclude it only on the basis of the triumph of reason over the fanaticism of Teutonic cultural aberration. That is the spirit of the Allies. The march of civilization will progress the better once this Prussian cancer is removed. We may then look forward to a period of unexcelled prosperity, not merely commercial. But the maintenance of commerce is essential to the achievement of those ideals which the Allies have for their objective. For the moment politics and business must be inseparable companions, as in the future they must not be entirely the subject of that separatist pre-war policy which gave our enemies an enormous advantage, if not indirectly the means to wage war against the world. In this sense, therefore, I make no apology for the presentation of political thought in these columns, as I believe that politics and commerce should be linked together more strongly than in the past. One helps the other. The British Government has given it official recognition to an extent hitherto considered unnecessary. Additional trade commissions for all parts of the world are being appointed, consultations arranged with representative business houses, commercial bureaus established, examples of foreign merchandise exhibited, and all necessary information thereto placed at the disposal of exporters and manufacturers. This, and much more that I may refer to another time, is indicative of the machinery set up by the Government with the object of placing British industry on a sure foundation for post-war development. Useful preparatory work is being done in other directions and valuable assistance provided for the cultivation of overseas trade. The remarkable statistics of British export values published each month illustrates the important consideration that every branch of industry, including the musical instruments, is maintaining effort to "carry on" against supreme difficulties. This is as it should be. The theme of my thoughts is to drive home to all traders the absolute necessity of stronger effort to-day; of maintaining a vigorous trade offensive, in order to provide the wherewithal out of income for the prosecution of the war—to achieve the humane ideals for which the world is fighting. No matter the difficulties; the discouragements—they are many; fight on—persistence will win out in the end sure enough. The small trader counts equally with the large; it's unity that stands for concentration of purpose—concentration of strength that moves mountains of difficulty.

As my American readers will appreciate, the British gramophone trade has experienced numerous setbacks and is still in the throes of many elements adverse to good business. What of it? The British trade has fought and won; is still maintaining a remarkable volume of record sales, and means to keep it up! You will do the same—keep it at that, is all!

Let us take a peep at the machine side of our business, and we shall see what has been accomplished towards the maintenance of trade in the face of almost insuperable difficulties. When hostilities commenced, apart from the cabinets and an insignificant quantity of metal parts, the British market relied upon imported motors, etc., the bulk of which came from Germany. In 1915 transport difficulties were met with, and in 1916 onwards became so acute that official restrictions on supplies from Switzerland and America were imposed. To-day the difficulty of importing motors is very severe and less than 30 per cent. of pre-war supplies from America and Switzerland is able to reach us. What happened? The trade, or certain members thereof, got to work on an endeavor to induce suitable firms to start the manufacture of motors, tone arms, sound boxes, trumpets, etc. The need for metal horns failed with the demand for interior horn cabinets, but it must be remembered that this demand was purely and simply the outcome of action taken by the trade in developing a call for cabinet instruments as against the ordinary model. Thus was one difficulty successfully overcome. Not without considerable trouble several good firms were at last persuaded to develop on sound box, tone arm, and output of kindred parts, the position at present being very satisfactory as regards these supplies, and in so speaking of this, too, as another

(Continued on page 112)

---

'This Master's Voice'—the trade-mark that is recognized throughout the world as the HALL-MARK OF QUALITY

Great Britain:

The Gramophone Company, Ltd.

HAYES - MIDDLESEX - ENGLAND
FROM OUR LONDON HEADQUARTERS—(Continued from page 111)

triumph, I must emphasize the fact that extreme difficulty was all along experienced in obtaining a sufficient ration of metals for the purpose. Indeed, it is a real triumph with us that the output of these articles is only limited by the small quantity of metal now allowed for their manufacture. We now came to the main attraction of all—ammonium, requiring high-class precision work. War output occupied all suitable shops, and recourse was had to inferior and less experienced firms. This resulted in great loss of tone, owing to the necessity of experimental work and the constant alteration of jigs involved thereby. Just when one or two passable samples were produced, the new metal scales seemed to become more acute, and in other cases the Government stepped in and switched the firms on to war articles. The trade continued its efforts, meeting with discouragements too many to mention. The present position is that several shops are all ready to go ahead as soon as labor and metal troubles can be overcome. One firm, I believe, is putting out a few motors by getting stampings and parts from different shops over the country and assembling them. But this does not make for efficiency. To sum up, we are still mainly dependent upon imports, and these are in quantity inadequate to complete all the machines ready and for which the demand exists.

Free Gramophone Ballot Scheme for Soldiers

In connection with the Daily Express Cheery Fund, which has been established for the provision of games, musical instruments, etc., for the overseas troops, a free gramophone ballot scheme has been started for soldiers and sailors. With the public's free will offerings all sorts of acceptable things are provided. The gramophone scheme has caught on better than anything, and as "Orlon" reported in a recent issue—"A staggering number of applications to be included in the ballot arrived from the front over the weekend." The gramophone outfits include a complete trench gramophone, six records, and 1,000 needles, and the ballots will be given as soon as the first delivery is made by the Columbia Graphophone Co. Good luck to the Cheery Fund.

Winning “Winner” Record Publicity

Of all the records, without any kind of supporting their dealers on the publicity side, a need of praise is due the Winner record producer for the very attractive window cards and lists, which are issued monthly. The latest streamer to hand reads: "Winner Records Play on All Gramophones," etc., the lettering, coloring, and general design being so arranged as to let the message strikingly, even with a minimum amount of light behind. Each corner is burred, thus rendering it easy to affix to the window. The company is doing some excellent work on the advertising side, and theirs is an example which one or two other firms might emulate advantageously.

Final Notice to re Carl Lindstrom (London) Ltd.

A recent intimation in the press gave notice to all firms interested that creditors of the above concern who had not already sent in their demand lists would go down the drain unless such were received by the official controller on or before February 28. This business, by the way, has now been purchased by the Herford Record Co., Ltd.

"No Dammed German Pianos"

At the Royal Society of Arts, Sir Frederick Bridge said, in conversation with other musicians, he was out for the improvement of the musical taste of the country, which would do much to increase the demand for better pianos. He hoped that after the war our musicians would put their heads together and say: "No damned German pianos shall come near me!" You would hardly expect such language from an ecclesiastical," said Sir Frederick, amid much laughter; "I did not mean to say 'dammed,' but having said it—well, I'll stick to it. I, for one, will not play on a German piano!"

The Band of H. M. Irish Guards

This fine instrumental organization is generally regarded in musical circles as one of our very best military bands, whose playing is undoubtedly of the highest excellence. It is represented on the "Winner" record current list by six popular items of the quick-selling order. The Band of H. M. Irish Guards is, by the way, exclusive to the "Winner" Record Co. On the list under mention, January-February, there is itemized a galaxy of good up-to-date vocal and instrumental selections, including a descriptive record of an air raid, dramatic and realistic in its treatment. An air raid of this type will be welcomed by most gramophones.

The Johnson Talking Machine Co.

In the wholesale field wartime difficulties are not less acute than in other departments of the gramophone industry, and it is a most encouraging sign that factors are displaying an optimism which influences the dealers to maintain the highest possible efficiency of effort in circumstances that are not always the brightest. The policy of the above concern has never permitted a relaxation of effort, and depressed conditions at times notwithstanding, they have managed to sustain a large trade in machines, records and accessories at both the Liverpool and Birmingham centers. The company is working hard on the forthcoming output of a new home needle resharpening device (particularly which were published in our January issue), and I have just received news of a new needle called the "Apex," which is soon to make its appearance on this market. In this regard Mr. Johnson writes: "This is a very good line, but unfortunately we are only allowed a very small ration of steel wire and we shall not be able to execute more than about one-quarter of the orders we expect to receive. . . . We are sharing out our stock of goods just the same as everyone is, but we are sharing out their tea, sugar, and butter."

Whatever the position may be, I am of opinion that the trade may rest confident that this entertaining firm of furnishers will do the very best possible to insure an equitable distribution of those lines which may temporarily run short.

The trade will learn with extreme regret the death of Lieutenant Cecil L. Henderson, who was killed in action in November last, when at the head of his men—facing the enemy. As the one-time outer-London representative of "His Master's Voice" Co., Lieutenant Henderson was well known to hundreds of dealers, with whom he used to crack a joke while keeping his eye on all the time on the order book. He was a popular "Knight of the Road"—one of the good old sort, ever cheerful; ever businessman, and successful! He joined up in the early days and was soon singled out for a commission. Although invalided out of the army twelve months ago, he rejoined after several unsuccessful efforts. Such was his spirit.

325,000 Bricks in New Chimney

A new chimney has made its appearance at the Hayes factory of "His Master's Voice." It is 150 feet high, weighs 1,632 tons, and has required for its construction no less than 3,250,000 bricks. The circumference at the base is 20 feet 8 inches; at the top, 13 feet. It will soon be emitting volumes of smoke in behalf of "His Master's Voice" output.

Blind Pianoforte Tuners

A new field for British soldiers who have suffered the great misfortune of lost or impaired sight, is opened up by the National Institute for the Blind, who are by press advertisements inviting the public to utilize the services of blind tuners. A worthy object which we think will receive the support it deserves.

A Johannesburg Dealer's Irreparable Loss

The story of the tragedy lists one is grief and pain. One day, the name of a friend; another, the name of one connected with the gramophone trade, brings to us the terrible news of the loss of a lady of his squadron over the German lines. He was regarded as a most promising officer, great things being expected of him, in view of the courage and skill always displayed on every occasion, before his
FROM OUR LONDON HEADQUARTERS—(Continued from page 112)

career was so untimely cut short. His spirit and wonderful example will live as an incentive to the young allied airmen who are coming forward in their legions to uphold the mastery of the air.

Captain Mackay was the eldest son of James Mackay, the founder of the well-known "His Master's Voice" dealers, Mackay Bros., Ltd., Johannesburg, with whom the trade will always be associated.

The Romance of Recording

In this month's issue of "The Voice" appears the first of a series of articles on the above subject, by Wm. G. Gaebiger, the "His Master's Voice" chief recording angel. His first contribution deals in a most interesting way with the recording tour undertaken in India during 1906.

Speaking of the native girl singers and their songs, Mr. Gaebiger tells us that—"One never finds written music for these songs; they are handed down from mother to son over hundreds of generations, some of the songs or poems, being 2,000 years old." It is a most instructive article, and one looks forward with interest to the next.

Clara Butt's War Work

As might only have been expected from a leader in her art, Madame Clara Butt, Britain's Queen of Song, has been unostentatiously carrying on a great war work ever since that fateful August, 1914. Those therefore who have remarked that her appearance on Columbia records has, perhaps, been of more frequency and pertinency than her appearance on the London concert platforms, will find herein good reason why that is so.

Since the outbreak of war Madame Clara Butt has raised between £30,000 and £40,000 for various charities. The British Red Cross Society has received most substantial help, and other societies, such as the Scottish Red Cross, Queen Mary's Work for Women Fund, the Arts Fund, War Seals Foundation, Baby Week, Joan of Arc Day and Pageant of Fair Women on behalf of the Three Arts Workrooms.

These Three Arts Workrooms were started at the outbreak of war to provide employment for poor musicians, etc., who were not physically strong enough for hard work. They are there taught to make toys, one of which was judged by the Board of Trade to be the finest British toy of its kind on the market. At a trade exhibition £22,000 worth of orders was received, but it was impossible to execute same, owing to lack of capital to purchase the necessary materials. Madame Butt decided to devote the proceeds of Joan of Arc Day and Pageant of Fair Women to place these workrooms on a really sound business basis, and over £2,440 was raised.

Abnormal Zonophone Sales

It means something unusually big to classify Zonophone record sales as abnormal, since ordi-

narily the demand is remarkable. That, however, is the position with regard to the January sales. Dealers everywhere report a difficulty in maintaining representative stocks, though the company's output is greater than ever. The situation indicates public appreciation of the quality and variety of the Zonophone monthly programs; a state of things also due to the persistent advertising of these fine records. Some excellent publicity matter accompanies the January samples, and the retail trade will doubtless make the most advantageous use thereof.

Death of Mark Sheridan

The music hall and gramophone world sustained a severe blow with the death under tragic circumstances of Mark Sheridan, the famous rapid-fire comedian. His style was decidedly original and his makeup of tall hat, bell-bottom trousers, and sallow face will never be forgotten. He gave the world a number of songs that were great successes of their time, among them being "At the Football Match Last Saturday," "One of the B-Hys," his last big hits being "Here We Are, Here We Are, Here We Are Again" and "When Belgium Put the Kibosh on the Kaiser," both of which he recorded for Columbia and both of them being among the outstanding successes in war songs.

The New "Neptune" Records

A comparatively recent introduction on this market is the ten-inch double "Neptune" disc, which, selling at a popular price, has easily won for itself a "place in the sun." A goodly number of these records are ready extant, and the catalogue is being extended by new issues, comprising vocal and instrumental titles of the up-to-date order. The Neptunes are marketed by Messrs. Curwen & Sons, Ltd., the well-known sheet music publishers, this city, and when conditions permit they intend to cultivate the patronage of overseas buyers.

Gipsy Smith Honored

The famous singing evangelist, Gipsy Smith, was honored by the King by inclusion in the new list of members of the Order of the British Empire. At first the honor passed un-noticed as the celebrated missionary was given as Rodney Smith, a name which few recognized as that of Gipsy Smith. In a day or two it transpired that the Order had been conferred upon the evangelist for his splendid work in raising some £13,000 for the Y. M. C. A. during his six months' tour of the country. The constant large sales of the records of his Gospel hymns that he made for Columbia a year or two back, will doubtless receive a fresh impetus after national evidence of Royal favor.

Men Required For Luxury Trades

Notwithstanding the welcome assistance of the American forces, Great Britain is putting forward every possible resource, and, in fact, speeding up rather than lessening her efforts, to bring this armeggeddon to a successful conclusion. A further comb-out of men from non-essential services is proceeding. There are about half a million men of military age engaged in non-essential or luxury trades, a large number of whom are of low medical category and unsuitable for general service. The Government expects at least 100,000 of these before the end of this year, and doubtless many others will be switched off their present work on to more important duties connected with war material output. The music industry has already contributed its full quota, and apart from units there are few, if any, men of military age exempt from service. But a further call for men for national work is expected, especially now that pianoforte manufacturers are taking on such work. Additional female dilution is therefore the order of the day.

TALKING MACHINE MEN, INC., MEET

Interest and Membership Questions Taken Up at Monthly Session Held on February 20

The regular monthly meeting of the Talking Machine Men, Inc., was held on Wednesday afternoon, February 20, in the rooms of the Merchants' Association in the Woolworth Building, under the direction of the president, J. T. Coughlin.

The committee charged with the work of persuading all orders to charge 6 per cent interest on installment sales reported progress, and petitions were distributed to be circulated among the dealers in New York and vicinity for the purpose of securing their endorsement.

Six new members were elected and the membership committee reported excellent results. The question of changing the by-laws to make jobbers non-active members of the association was laid on the table until the next meeting.

A nominating committee was appointed to make its report at the March meeting.

Soundboxes

If you are after a genuine offer of soundboxes, you'll do well to communicate with us immediately.

We have tens of thousands of perfect soundboxes, fitted with the best quality mics. Confidently recommended for cheaper machines, absolutely reliable and give excellent reproduction. Price to clear $50 per gross, F. O. B. London.

Orders for less than gross lots not accepted

SOUTHERN CALIFORNIA NEWS ITEMS
CROP CONDITIONS MEAN GOOD BUSINESS—SCARCITY OF MACHINES AND RECORDS STILL PREVAIL—VALUE OF ASSOCIATION WORK—NEWS OF MONTH

LOS ANGELES, CAL., March 6.—The short month has passed and business conditions have not changed very much since the first of the month. There is still the scarcity of both records and machines in all makes with the end yet in sight.

Southern California was blessed with a six-inch rain in February, and, as up to that time the weather man had only reported one inch for the entire season, it can readily be seen that the country was in desperate need of rain, and it was of inestimable value to this section. Most all of the crops were greatly benefited and everybody feels better regarding business conditions since the downpour. Just what the outcome will be here in the talking machine business is hard to predict, as stocks of records and machines are running perilously low. The railroads seem to be as congested as ever and freight moves very slowly.

The Fitzgerald Music Co., exclusive Edison dealers, report a fine business during the last month, especially in the larger models. Their Edison phonographs netted them some good prospects, and Earl Dible, their manager, says that they have made several sales as a direct result of them.

The Bartlett Music Co., of West Seventh street, exclusive Columbia dealers, are doing a good business in their talking machine department. They have one of the best-equipped departments in the South and carry a complete stock of machines and records.

The Retail Talking Machine Dealers’ Association of southern California is already showing results, as at the last meeting the approval system was discussed and in the future a forty-eight-hour limit will be put in effect and the customer must guarantee to keep at least a third of all records taken from the stores. Also all persons wishing to take records on approval are requested to call for same and return them to the store, thus making a great saving in delivery. Machines sold on contract must be paid in full in fifteen months, which will have a tendency to make the terms higher, especially on the more expensive models. Los Angeles has long felt the want of just this kind of an association, and it is to be hoped that it will be the means of eliminating, or at least regulating, some of the evils that have been creeping into this business in the last few years.

Chas. H. Norberg, treasurer of the Dames—Beebe Music Co., of Salt Lake City, is in the city for a short visit. Mr. Norberg says that business is fine with them. Their only trouble at present is in getting enough goods.

M. X. Dumas, lately on the road for the Brunswick Co., of El Paso, Tex., has joined the sales force of the Southern California Music Co. Mr. Dumas is a talking machine man of a great deal of experience in different parts of the country, and at one time was connected with the Edison Co. at East Orange, N. J.

C. O. Stillings, of Fillmore, Cal., who represents the Brunswick phonograph in his city, is in Los Angeles for the week-end. Mr. Stillings has a small but up-to-date department and says the prospects are good in his district.

C. S. Ruggles, local manager for Sherman, Clay & Co., Victor jobbers, has just returned from a visit to the Atlantic Coast. While in the East Mr. Ruggles paid a lying visit to the Victor factory and saw a new feature for the heads of the different departments. Mr. Ruggles says conditions look as bad in the talking machine line in the East as in California, and the other Pacific Coast States. Everyone seems to be out of goods and unable to get any and no one seems to know just the reason. Mr. Ruggles is very much elated over the fact since his return to the Coast his son, Leslie Ruggles, who is connected with the moving picture department of the United States Army, has been made a lieutenant, and has since sailed for France.

O. A. Lovejoy, manager of the Diamond Disc Distributing Co., is very well pleased with his business since January and made himself of the fact that his stock is in fair condition. He reports the biggest demand for Models 250 and 350, and at present both are out of stock. However, Mr. Lovejoy is expecting a large shipment next week when he will have all models in all finishes. Harold Jackson, road representative for the above house, leaves to-day for an extensive trip through the central part of the State.

Dan Voorhies, who is looking after the Bruns- wick—Colcord—Collender Co. business in the Los Angeles street, says business is booming for the “all record” machines, and reports new agencies in the following towns: Bakersfield, Lompoc, Santa Maria, Santa Ana, Pasadena, Simi, Tar- nardino, Pasadena, San Pedro, Santa Diego, Redlands, Taft and Glendale in California and Yuma, Jerome and Winklemann, Ariz. The Brunswick Co. will carry and feature a full line of Pathé records.

The Southern California Music Co. have discontinued their Pasadena branch, and in the future will handle all business that is turn in turn directly from the main store in Los Angeles.

The needle laminates seem over for the present, and most of the local dealers are beginning to get hold of a few needles, but not the real fine tone ones, which are quite scarce at present.

CO-OPTION SPELLS SUCCESS
Aggressive Advertising Agency Co-operating With Ready File Co.

According to statements of its officials the Ready File Co., Inc. is particularly fortunate in its recent advertising connection. The McDermott Advertising Service, now in charge of the Ready File account, is one of the younger of Indianapolis agencies, but it is undoubtedly one of the most progressive and the fastest growing of that city.

Specializing, as it does, in musical instrument advertising, McDermott Advertising Service is exceptionally well equipped to work out the advertising problems of Ready File. Ordinarily the advertising agent has to spend a great deal of time and waste considerable effort in getting the readers’ viewpoint, especially when these readers are members of a well defined class such as phonograph dealers. In the present case the preliminary work was largely unnecessary, as the heads of the agency were already familiar with the point of view and the problems of the phonograph dealer. In behalf of the Ready File and the numerous other access orics, McDermott Advertising Service is planning a vigorous nation-wide campaign.
WORLD’S CLASSIFIED ADVERTISING

Any member of the trade may forward to this office a "Situation" advertisement intended for this Depart-
ment. (In this case 5 cents per word, 25 cents per line, and it will be inserted free. Reply will also be for-
warded. The minimum charge is $1.50.)

WANT TO MEET a talking machine man or a business man who would like to enter the talking
machine business, one who has large business
acquaintance, to help me organize and manage the new and altogether
meritorious motor for which there is a big
demand. Will make the right kind of a proposi-
tion to the right man. Address "Box 500," care The Talking

WANTED—Position as department manager. Either live in
Columbus or vicinity. Over twelve years’ experience. Will work on
both good-goods and low prices. Address the
preferred. Address "Box 501," care The Talking

HIGH-CLASS salesman wanted; must possess unques-
tionable ability, also produce tangible result. Want an
extensive field of reference from present employer. Victor
Salesman. Address "Box 502," care The Talking
Machine World, 209 S. State St., Chicago, Ill.

ATTENTION: Edison jobbers and dealers. Experienced Edison jobber offering to
co-divider’s or cutter’s interest in established Edison agency in con-
nect with well-known musical instrument manufac-
turer and talking machine manufacturers. Address "Box 504," care The Talking
Machine World, 209 S. State St., Chicago, Ill.

TALKING MACHINE REPAIRS—We have a complete repair
department and handle every make of talking machine, also
specialize in high grade talking machine work. Best prices. Address

POSITION WANTED—Experienced phonograph and Edison
disc salesman. In applying state experience, and give as
much information as possible. Address "Box 509," care The Talking

WANTED—A position as sales representative in the company in London
to assist in persuading motor, tone horn and sound horn
salesmen to carry the Edison phonograph, preferably
using 100 per cent. We and the British and American preference if
they can import them. Manufacturers of these parts are requested to write

WHOLESALE SALESMAINS to deal native market.
Well known and has built up successful record. Can
handle any line of phonographs or phonograph
 parts. Address "Box 511," care The Talking

POSITION WANTED—Man of 12 years’ talking ma-
achine experience. Make me a proposition. Address "Box 512," care The Talk-
ing Machine World, 373 Fourth Ave., New York.

POSITION WANTED—Cabinet superintendent and display
man to handle new line of furniture, with prior experience.
Familiar with up-to-date methods. Good executive and knowl-
dgeable. Address "Box 513," care The Talking

POSITION WANTED—Manager of superintendence of
phonograph store in large northern city. Must
be located in position within six months. Will work on
principle that there is room for more than one company
merchandise improved without increasing your cost. Special-
ize in phonographs. Address "Box 514," care The Talking

WANTED—Canada, experienced, religious person to take
charge of diocese manufacturing department. Address "Box 515," care The Talking

C. E. WARD CO. PLANS TO EXPAND

Will Shortly Open Branch Offices in California
and Also in Canada.

NEW YORK, Oct. 3.—The C. E. Ward
Co., manufacturers of the Ward khaki
moving and dust covers for talking ma-
chines, as well as other specialties, report
that, although held somewhat recently by the fuel shortage, their
interest is track to normal, and orders are
now being turned out in the usual prompt man-
ner. The company plans to open a branch
office in California, and another in Canada in
the near future for the convenience of the trade in
those sections.

FOR SALE

Patent and complete manufacturing equip-
ment for the production of an attractive
model attachment of real merit. Address "Box 503," care The Talking

WANTED—Supervised at present em-
ployed, thoroughly familiar with every angle of the phon-
ograph business. Address "Box 516," care The Talking

WANTED—By high grade finishing fore-
man with experience. Will be open for position February first. Want to
work with a progressive firm, one where
would appreciate first class finishing, production and effi-
cienct in every respect. State amount of men in finishing
room, the output whether table or floor cases, the salary you want for an Al man. Address "Box 517," care The Talking

WANTED—Mechanical engineer thoroughly
understanding the manufacturing of phonograph parts, complete assembly, or trade work, open for a position
as superintendent or production manager. Highest cre-
one 25,000. Address "Box 518," care The Talking

CASH

Paid for list of names of phonograph
owners, any and all makes; all names
and addresses of phonograph
machine owners, Victor, Columbia, Edison
Disc, etc. Will mail a listing quote
you your price.

Address Box 499, care The Talking
Machine World, 373 Fourth Ave., N. Y. City.

STEEL NEEDLES

Repair parts for all talking machines; made
and standard. Have large stock of ball
spring motors, bolt arms and sound boxes and complete machines. All at lowest prices.

FULTON TALKING MACHINE CO.

460 Broadway
New York City.

SPOT CASH PAID—WANTED

Any amount of records in all languages, Talking Machines, etc., in stock.
Will pay cash or trade for same. Address Phonograph

FOR SALE

Thirteen tons Talkomatic phonograph Strips to sell. In perfect condition and in original boxes as received from
mill. Size 3/32 x 3 1/2" x 8’. Will quote an
attractive price for quick sale.

The Thomas Mfg. Co.
Ohio.

FOR SALE

Best Quality steel phonograph needles extra
long 40 cent per thousand. Also extra long
20 thousand, remittance must accompany order.

M. ELDO

970 Eastern Parkway
Brooklyn, N. Y.

This invention relates to an improved record cleaner and protector for phonographs and has as its primary object to provide a device of this character which may be attached to the sound box of the phonograph in the rear of the stylus and automatically operable to engage the phonograph record upon the movement of the sound box toward the record for supporting the sound box in position with the needle spaced from the record to thus prevent the marring or scratching of the record by the accidental fall of the sound box.

The invention has as a further object to provide a construction wherein after the sound box has been moved to engage the protector with the record of the phonograph, the protector may then be swung to inactive position for permitting the movement of the sound box to engage the needle with the record.

And the invention has as a still further object to provide a construction wherein the protector when swung to inactive position will provide a cleaner or sweep for the record for moving the dust therefore as the record is revolved beneath the needle of the phonograph.

Figure 1 is a side elevation showing a portion of a conventional type of phonograph with the sound box thereof equipped with the improved protector, the protector being swung to inactive position to provide a cleaner for the phonograph record in the rear of the needle. Fig. 2 is a similar view showing the protector in active position supporting the sound box with the needle thereof, Fig. 3 is a sectional view of the record and record, this view also illustrating in dotted lines the manner in which the body of the protector is adapted to gravitate to active position upon the movement of the sound box to seat the phonograph needle upon the record. Fig. 3 is a detail view showing the device detached with the parts thereof disconnected from each other, and Fig. 4 is a detail side elevation showing a slightly modified form of the invention.

This invention relates to improvements in resetting devices for sound reproducing machines, and the objects of the invention are to provide a simple and effective device adapted to lift the stylus when it reaches near the end of a record and reset it at the beginning thereof. A further object of the invention is to enable the record to be effected immediately and continuously, or at given intervals.

In the drawings, Figure 1 is a perspective view of a portion of a talking machine embodying the present invention. Fig. 2 is a diagrammatic view of the electric circuit. Fig. 3 is a sectional plan and perspective view of the phonograph record. Fig. 4 is a diagrammatic view of an alternative form of one of the circuits. Fig. 4 is a perspective detail of an alternative form of a device for returning the sound tube to normal position. Fig. 5 is a diagrammatic view of an alternative form of one of the circuits. Fig. 6 is a side view of the record and record, this perspective view showing an alternative form of the lifting device for the sound box. Fig. 6 is a detail in the elevation of the timing device.

This invention is an improvement in talking machines and has particular reference to a record removing device.

An object of the invention is to facilitate the removal of a record, after the completion of the reproducing cycle, without the risk of detaching or removing the turntable of a disc machine by raising the record from engagement therewith and, to this end, use is made of a member pivoted to the machine and having an end extending beneath the turntable and means adapted to engage the bottom of the record when the other end of said member is depressed in order that the record may be raised from engagement with said turntable and then removed.

The invention idea involved is capable of receiving a variety of mechanical expressions, one of which, for the purpose of illustrating the present invention, is shown in the accompanying drawing, wherein figure 1 is a fragmentary side elevation of a talking machine showing the invention applied thereto. Fig. 2 is a vertical sectional view. Fig. 3 is a top plan view of the record raising member. Fig. 4 is a section on the line 4—4 of Fig. 3.

This invention relates to sound reproducing machines in which "hill and dale" cut records are employed and has for its object to increase the capacity of a record without substantially diminishing the volume of sound.

It has been usual to cut a record of the "hill and dale" type with the groove in the form of a U in cross section which has necessitated the use of a reproducing stylus terminating in a small ball.

Owing to the U form of the groove, it is not possible to obtain a very long record on the usual size of blank, as the convolutions of the spiral cannot be brought very close together and be cut to the required depth to give a good volume of sound owing to the risk of the convolutions overlapping one another to some extent.

According to the invention there has been cut a "hill and dale" groove of substantially a V shape in section and a very fine or needle pointed stylus is employed for reproducing the reproduction by contact of its extremity with the bottom of the V shape groove. It will be understood that contrary to what is the case with a record formed by a U-shaped cutting instrument the V shaped groove having a distinct line of track, that is, the bottom of the groove cut by the point of the instrument, which always coincides with the true convolutions of the spiral or helix, and against which the point of the stylus fundamentally bears, as clearly seen from the drawing.

It will be understood that by securing frictional or bearing contact of the stylus with the bottom of the groove only, i.e., the line of track a substantial clearance space will be left on either side for the reproduction angle between the sides of the groove will be greater than the angle of taper of the fine or needle pointed end of the reproducing stylus itself.

In the drawings, Figure 1 shows a diagrammatic view of a much enlarged scale by way of example of a cutter of sapphire or other suitable substance for cutting the V on the record. The angle between the cutting edges is acute, and the cutting faces or edges are ground so as to leave a sharp point which will actually yield a very narrow space at the bottom of the groove against which the extremity of the fine or needle pointed reproducing stylus may contact.

The stylus used in carrying out this invention has a hard, fine or needle point, and is preferably made from the highest grade hardened steel tool steel. Figs. 2 to 6 show modified forms of tools adapted to be employed for cutting the V-shaped groove in a record. The tools are drawn to a large scale for the sake of clearness. Fig. 7 shows a greatly enlarged plan view of a small portion of a track made according to way of example, showing the distinct line of track produced by the cutting of the groove and Fig. 8 shows a cross section of the same on the line A—B of Fig. 7. Fig. 9 shows diagrammatically to an enlarged scale a reproducing stylus in position with its fine or needle point in the bottom of the V-shaped groove of a record.

The purpose of the present invention is to provide a tone arm for talking machines with means for adjustably relieving the sound box from the weight of the tone arm, and a portion of the weight of the sound box, so that the pressure upon the surface of the record through the sound box needle may be materially relieved and the life of the record correspondingly prolonged. The tone arm also embodies a novel form of construction in the swinging or swivel bearing of the tone arm with the stationary sleeve support therefor. It also is provided with detachable sound box tubes of a character to permit the same sound box being used in connection with either the so-called Berliner record, or the so-called Edison records; that is to say, records wherein the sound grove is a zigzag spiral of uniform depth, and where the record groove is a spiral of varying depth.

Figure 1 is a plan view of a complete tone arm as constructed and ready for attachment to a talking machine case. Fig. 2 is a side elevation of the same. Fig. 3 is a vertical end elevation. Fig. 4 is a full-sized vertical section on line 4—4 of Fig. 1. Fig. 5 is a view of the tone arm detached from the swivel support. Fig. 6 is a arm with the stationary sleeve for support thereof. Fig. 7 is a detached view of a sound box tube for use with so-called Edison records.

Resetting Device.—Harry H. Pratley, Kansas City, Mo. Patent No. 1,251,918.

This invention relates to sound producing devices and has for its principal object to provide a simple and positive device for returning a sound box on a disc or like record may be reproduced.

Figure 1 is a perspective view of a sound reproducing device constructed according to the
invention. Fig. 2 is an elevation of the same, the record being a part of the handle member being in section to better illustrate the clamping of the record on the handle. Fig. 3 is a detail perspective view of the needle slides. Fig. 4 is a longitudinal section of the same. Fig. V is an elevation of a part of the slide rod, showing a modified form of amplifier.

Patent No. 1,208,008. 1917.

It has been discovered that tungsten or tungstenic material is particularly adapted for stylis or needles of sound reproducing machines. A stylis composed of tungsten or tungstenic material exhibits properties differing in a marked degree from those present in styli of other material. Among the characteristics of a stylis of tungsten or tungstenic material has little injurious effect on the walls of the sound record groove during the reproduction of sound from a record and may be used for a number of times and on different records one after the other without injuriously affecting the walls of the sound record groove. It appears to rapidly wear at first until its sides in engagement with the sound record groove fit and conform to the shape of the groove, after which the wear is negligible or unappreciable throughout the reproduction of sound from the emphasis of the groove of the record.

Tungsten is, however, a very difficult material to work, particularly when it is in the form of a wire, the diameter of which is substantially equal to the width of a sound record groove. Tungsten wire is brittle and tends to split. It is also expensive. Therefore, only a very small portion of a stylis is in actual contact with the walls of the sound record groove in reproducing sound from a record, it is obviously desirable to employ as little material as possible, which will impart equal results. A stylis or shank be provided with a tip of tungsten or tungstenic material to engage and co-operate with the walls of the sound record groove, substantially through the number of times and on different records one after the other, but injuriously affecting the walls of the sound record groove. It appears to rapidly wear at first until its sides in engagement with the sound record groove fit and conform to the shape of the groove, after which the wear is negligible or unappreciable throughout the reproduction of sound from the emphasis of the groove of the record.

Tungsten is, however, a very difficult material to work, particularly when it is in the form of a wire, the diameter of which is substantially equal to the width of a sound record groove. Tungsten wire is brittle and tends to split. It is also expensive. Therefore, only a very small portion of a stylis is in actual contact with the walls of the sound record groove in reproducing sound from a record, it is obviously desirable to employ as little material as possible, which will impart equal results. A stylis or shank be provided with a tip of tungsten or tungstenic material to engage and co-operate with the walls of the sound record groove, substantially through the number of times and on different records one after the other, but injuriously affecting the walls of the sound record groove. It appears to rapidly wear at first until its sides in engagement with the sound record groove fit and conform to the shape of the groove, after which the wear is negligible or unappreciable throughout the reproduction of sound from the emphasis of the groove of the record.

How Geo. H. O'Connor, a Noted Columbia Artist, Figures in the Motion Picture Reels Being Made For Exploitation Purposes—An Arthur and Character Song Artist

In the forthcoming Liberty Loan publicity campaign, there will be used a series of motion pictures that will be displayed in the moving picture theatres throughout the country. This film will contain many features of interest, and

Mr. O'Connor from the committee on public information, George Creel, chairman, and is presented herewith. In addition to Secretary of War Mr. Baker and Mr. O'Connor, there are shown in this scene the members of the Liberty Loan committee—John Poole, president, Federal National Bank; Corcoran Thom, vice-president, American Security and Trust & Savings Bank; H. S. D. S. S. of National City Co.; E. E. Thompson, of Crane, Parris & Co.

George H. O'Connor is an exclusive Columbia artist, whose records have a national and country-wide success. He is the son of an American army officer, and was born, reared and still resides in Washington, D. C., where in his serious moments he is known as an attorney and counsellor at law. He is one of America's most popular character song artists, and his splendid tenor voice is remarkably well adapted for recording.

THE TALKING MACHINE WORLD

G. H. O'Connor Buying Bond From Secretary of War will be almost identical with the pictures used in the last Liberty Loan campaign.

Included in these films is one scene entitled: "The Secretary of War Sells a Bond to the Cheery Subscriber, George H. O'Connor."

The "still" of this film has just been received by

INVENTORIES AND THE TAX LAW

New War Revenue Bill Will Serve to Make Many Merchants Take Their First Accurate Inventory—Should Help Business

A member of the National Association of Credit Men makes the excellent point that under the new War Revenue Law numerous unskilled merchants will, for the first time, be called upon to make out an income tax return, and believes that this will prove a direct advantage to business, because merchants who have not been in the habit of taking regular inventory will now be forced to do so. Revenue collectors emphasize this point that every merchant will be expected to take an exact annual inventory, else his tax report can be based on nothing better than guessing, which will not satisfy the Government.

For the benefit of the small merchant who has seldom been called upon to do anything of the sort, the following formula is offered for determining net profit:

A SIMPLE FORMULA FOR DETERMINING NET PROFIT

1. Inventory of Dec. 31st, 1916, at cost
2. Add Purchases in 1917
3. Total
4. Subtract Inventory of Dec. 31st, 1917, at cost
5. Total
6. Subtract item 5 from item 4
7. Net Profit

DEDUCTIONS
8. Expense of doing business (Rent, Wages, a Reasonable Salaries to Proprietor, Light, Fuel, Taxes of all kinds, except those not on the business, and all other expenses)
9. Depreciation on Fixtures
10. Old Debts Losses
11. Total Deductions
12. Net Profit

PATHE WINDOW HANGER FOR APRIL

Contains All the Latest Hits and Is Most Attractively Printed

The Pathe Freres Phonograph Co., Brooklyn, N. Y., has just sent out its new catalog and attractive hanger featuring the new Pathe records for April. This hanger presents a splendid portrait of Rudolph Ganz, the famous concert pianist, who records for the Pathe. The April list contains a new record played by Mr. Ganz, together with an excellent array of popular song successes, latest dance records, Hawaiian records, operatic and classical vocal numbers, standard and sacred vocal records, and instrumental numbers. The artists featured in this list include Claudia Muzio, Paul Althouse and Grace Hoffman.

One of the interesting features of the Pathe list for April is the presentation of a special Pathe Gold Label demonstration record featuring two selections from "Roméo and Juliet," sung by a group of famous operatic artists.

In order to make this directory as accurate and up-to-date as possible, we have listed alphabetically only those concerns whose advertisements have appeared in the TALKING MACHINE WORLD during the past six months. This is the fourth edition of the TALKING MACHINE WORLD TRADE DIRECTORY, each new annual edition canceling the preceding one. It answers in a nutshell the prevailing questions of "What can I buy?" and "Who can make it?" in which we question whether there is any direction for our readers. No attempt has been made to differentiate between the merits of the various types and models of machines, records and miscellaneous supplies listed.

MACHINES

AMERICAN PHONOGRAPH CO., Executive offices, 39-21 39th St., 1015, New York City. Manufactures the "Granit." line, retail prices $65 to $150. Also makes electric machines.

BELL TALKING MACHINE CORP., Executive offices, 44 West Thirty-seventh street, New York City. Manufactures the "37th Street," line, retail prices $60 to $200.

BROOKS MANUFACTURING CO., Executive offices and factories, 426 South Wabash avenue, Chicago, Ill. Manufactures the "Chicago," line, price ranges from $35 to $100 up.

NEW MULTIPLE DISC MACHINE

Max Krauss, of Philadelphia, Patents a New Talking Machine, but Without a Large Number of Records Automatically—Some Interesting Features of the New Invention

PHILADELPHIA, Pa., April 2—Patents have been granted to Max Krauss, of 233 North Alden street, this city, for a new multiple disc talking machine. The inventor of Mr. Krauss, obviates the necessity of frequent needle changes and an acoustic condition, also the inversion of Mrs. Krauss, insures the proper stopping of the record at its termination. It is planned to furnish additional driving axis on which a large store of records may be got in a position that they may be easily placed in the machine. Mr. Krauss is an experienced talking machine manufacturer and a wholesale dealer.

HAD A $3,000 RECORD LIBRARY

Registrar of Rutgers College, Who Died Recently, Left Unusually Valuable Collection of Records of the Higher Class of Music

New Brunswick, N. J., April 3—It is reported that Irving S. Upson, registrar at Rutgers College here, who died recently, left a collection of Red Seal records estimated to be worth $3,000. The records had been handled very carefully and many of them are as new as if they could be found in the stock of the average dealer. A peculiar feature was that, although Prof. Upson had several thousand dollars' worth of the finest records in his library, he had used for reproducing them a Victor V machine. It is believed that Prof. Upson held the record for the value of a private collection of talking machine records.

TALKER NEEDLES IN GRENADINES

According to an American surgeon who is home on furlough, having spent some time in the French army hospitals on the Western Front, the Germans are using some peculiar materials for filling their grenades and trench bombs. He cites one case where a poilu was badly wounded in the arm by a trench bomb. In the surgeon's opinion, it is evident that the arm was full of steel talking machine needles with which the bomb had been filled. Just why the needles had been used was not learned, as the surgeon is expected here. He must have thought it took a lot of needles to play a French record, judging from the number we took out of the poor soldier.

FROM time to time the talking machine dealers throughout the country give concerts to specially invited guests. These entertainments are given to the soldiers in the service, with which so many retail establishments are now equipped, or in the store proper. The idea is herewith advanced to put into these highly commendable series a war talk not in the form of a short war talk by a man who has been "over there." The present store concerts, which many talking machine merchants are employing as a means of gaining local business and popularity, are a decided success. This being so it will follow that a program including a war speaker will be doubly attractive from the viewpoint of the public.

The war speakers can deliver "close-up" impressions of the great war along the line which has brought Arthur Guy Empey into national prominence. But good speakers, men whose experiences have been every bit as violent as Empey's, can be secured at a very nominal sum. A fair number of agencies which have been doing this work at the present time, are offering speakers at a very moderate fee. As the influx of war veterans continues to grow no doubt speakers may be obtained at still more economical figures. The talk itself need not include any appeal for money for any of the various war charities but can be a new discovery about conditions and events on the Western front and that will hold and interest the audience.

Any merchant who puts on a program like that is dropping a big advertisement for his city and to earn an easy entrance to the news columns of the local papers. Surely no one can doubt that the United States Government will be highly pleased to see the talking machine industry making it really possible for

SELLS IDEAS AS WELL AS GOODS

The Real Salesman Finds It Difficult to Sell Ideas, He Doesn't Believe—The Influence of Quality Products

Many writers who have made a thorough study of the million-dollar salesman have stated that a salesman sells, not goods, but rather his ideas about goods. This statement contains much of truth, and consequently it is a difficult proposition for a man to sell successfully anything in which he doesn't believe. For this reason many salesmen often refuse to sell inferior products which look good but which possess no real value because of any ethical issue involved, but rather because they fear the effect upon their own sales ability. Articles which sell upon a quality basis rather than a price appeal are as a rule represented by able salesmen.

There is a reason for this, a reason which applies to the selling of talking machines as well as to the selling of any other line of merchandise. Able, conscientious workmanship in a talking machine inspires support and admiration. This is recognized as a salesman's canvass. The cheaper instrument almost always lacks this element. As a result, even though a competent salesman is selling the line, he cannot put into its sales the same amount of man that would otherwise be at his command. His "ideas about the goods" are not of a sort to awaken his enthusiasm.

The customer himself is also unconsciously affected by a quality product. The salesman may sincerely believe that he is selling talking machines merely for the money there is in it, but the customer does take a certain artist's pride in handling a first-class line of goods. Then, too, there is much more to be said in favor of goods of quality than for those manufactured with nothing but the price element in view. Quality products offer the salesman opportunities for a much more interesting, much more convincing canvass.

Every salesman should endeavor to sell as good a line, within reasonable limits, as is possible. In the long run it will pay better. The very fact of handling instruments and records of reputable standing and real intrinsic worth will tend to develop his selling ability, which in turn is the quality through which, in the final analysis, he must score a permanent success in his chosen field.

FIX NEW TERMS ON VICTRolas

Famous & Barr Co. Advertise New Installment Schedule for Benefit of Public

St. Louis, Mo., April 9—The Famous & Barr Co. have been advertising these terms on Victor machines since March 1. The difference in proportion of the prices is, it is explained, to protect somewhat the numbers that are hard to obtain:

| Style | IV - 12A | IVA - 12B | $12 or $15 | $20 | $25 | $27 per month
|-------|---------|-----------|---------|-----|-----|---------|
| XVII | XIV | IVA | IVA | $15 | $20 | $25 | $27 per month
| XVIII | XVII | XIV | IVA | $15 | $20 | $25 | $27 per month
| XIX | XVIII | XVII | XIV | $15 | $20 | $25 | $27 per month
| XX | XIX | XVIII | XVII | $15 | $20 | $25 | $27 per month
| XXX | XX | XIX | XVIII | $20 | $25 | $27 per month |

The amount in records never to exceed the first payment of $25.

Just what has become of the former Talking Machine Dealers' Association does not appear to be definitely known, but those who were associated with it, including Mr. Heil again, a meeting will be called. Under the present scarcity of machines, conditions have been very good. The above terms are generally favored by all Victor dealers. Interest is charged on deferred payments.

War Lecture Concerts Emphasize Patriotism and Business
Making the Instalment Sale a Lengthened Opportunity for Cultivating and Holding Trade

"Instalment business is worth more to me than the actual sales it represents," remarked a tradesman who had an awake talking machine dealer to The World man recently. "Every instalment contract that I accept is scrutinized for possibilities of record business after the account is paid. There are quite a number of these customers who have very little money to spend on records while they are meeting their instalments, but when the payments are completed they could not be caught on paying at the same rate for records. Of course, there are people who can buy all the records they want while paying for their outlays, but these are not the people I refer to just now. My staff has very definite instructions regarding these instalment customers, and acting towards them in a manner that will retain their good will and keep them coming after their obligations have been completed. The cost of getting people to the store is considerable, and it takes a lot of thinking, then why not secure the very most of such an asset as regular weekly or monthly visitors?

"When a customer comes in here to pay an instalment he is made to feel that we are still interested in him. We ask about his machine, how the children like it, if he has heard such-and-such a record, etc., and we make him feel that he can have a record played without being urged to buy it, or to feel that we are disappointed if he doesn't buy it. So many people become resentful while still on your books if in any sense the attitude of the store or its staff is one of non-interest. We aim to keep people from thinking we are only interested in their payments and through with them as soon as they are through. Many of our sales have been made to persons whose names were given us by instalment customers.

There are various kinds of service, but service to my mind should have thought of the future. For example, while I may not be here a year from now, I expect to be doing business here for the next forty years. In that case wouldn't I be foolish to ignore the children, even from a cold, unemotional business point of view? These boys and girls are men and women before you know it. They are mighty susceptible to being noticed and treated considerately. They don't forget, and other things being equal, when they commence making purchases on their own account the man who respected their childhood personalities will get the preference.

"Nearly a year ago an elderly gentleman came in here and bought a high-priced outfit. I had not seen him before, and wondered why he came. Since then I have become acquainted with him and learned that he came to reside with a married son, whose youngsters had some reason or other to feel kindly toward my establishment. The old gentleman said the children were responsible for his coming to the store. I could tell you quite a lot about the results from this kind of service.

"One thing to be remembered, however, is that with any kind of sale should go the spirit of service that will continue even after the goods are paid for. Every sale means a fresh opportunity to make friends for the store, friends that may develop into customers later. The instalment sale means a lengthened opportunity for making and cultivating new friends for business inasmuch as business relations continue over several months or years as the case may be. These opportunities should not be lost, therefore, through lack of interest or careless neglect. They represent the most valuable assets of business.

**ELABORATING THE TALKER CABINET**

Some Views of Interest From the Standpoint of the Veneer Specialist

The increasing desire of manufacturers of talking machines to get away from the ordinary, or commonplace, in designing their instruments, is the subject of general commendation among not only the members of the general trade and the purchasing public, but in the woodworking trades they are following these developments with exceeding interest, and it has been the subject of considerable notice. For instance, that bright and always interesting publication, Veneers, in a recent issue says:

"The idea of elaborating the talking machine cabinet has been with us for some time. Perhaps it made its appearance upon the market a little too early and that held it in check a while. Anyway, while some of the first ideas of this kind were elaborate enough to be satisfactory to the artistic instinct they did not at first prove very satisfactory as a business proposition.

"Perhaps it was mainly because the talking machine itself was something of a novelty in its new role as a dispenser of music and this novelty had to wear off before the public would give thoughtful attention to artistic departures in cabinet design, especially if those departures involved the outlay of materially increased sums of money. There were first the plain box-like cabinets, then a steady enlarging of the artistic idea in connection with these until some have elaborately-fitted box cabinets, offered at somewhat increased prices.

"These are still popular, but notwithstanding this, other ideas are making their way now in a manner suggestive of possibilities that may assume magnitude in the near future. Plainly, too, manufacturers are casting about for patterns and ideas which will offer novelty of design as well as elaboration. Some have followed what we might term natural ideas associated with music, that of patterning after pianos; some have turned toward the idea of embodying the designs of familiar articles of furniture into the case of talking machines, and perhaps eventually we will settle down to a series of recognized design aside from those, or rather in addition to those of the regulation cabinet.

"The interesting thing about it to the veneer manufacturer is to follow the tendency and see what it may mean in the way of new departures or new requirements for veneer and built-up work used in connection with these machines."

**PUSHING "FIRST AID" FRENCH**

Victor dealers generally, and particularly those located in the vicinity of military encampments, report an unusually strong demand for the Victor "First Aid Course in French," all contained in three records and a text book. The recent booklet issued by the Victor Co. on "How to Demonstrate the First Aid Course in French" has been put to excellent advantage by salesmen generally, enabling them to meet intelligently questions that would ordinarily tax their ingenuity.

**NEW QUARTERS IN DAYTON, O.**

The Superior Phonograph Co., which handles a complete line of Superior phonographs, as well as the Steger line of pianos and player pianos, are now settled in attractive quarters in the new Mercantile Building on South Ludlow street, near Fourth, Dayton, O.

HONOR ST. PATRICK IN CLEVELAND
Collister & Sayle Co. Arrange a Most Attractive Window Display for Erin's Saint

Cleveland, O., April 2—One of the really effective window displays in honor of St. Patrick in this city was that at the store of the Collister & Sayle Co. Victor dealers, 252 Su-

An Attractive St. Patrick Day Window display, and which is shown herewith. Shamrocks, green ribbon, Irish flags and records of Irish songs predominated in the display.

The floor of the window was covered with large squares alternately green and white. On each green square was placed an appropriate record, and the white squares were set off with a shamrock in each corner. In the center of the display was a large harp, backed by an Irish flag, kept waving by an electric fan. To carry out the scheme even the Victor dogs in the window were decorated with green ribbons about their necks.

According to the manager of the store a record was kept playing for ten minutes, in which time 574 people passed the store, 185 "rubbered" and forty-two stopped. It was not learned how many of those who stopped were Irish.

ATLANTA CONTINUES TO BE A VERY BUSY TRADE CENTER
Some Dealers Getting Machines in by Express—Pathé Line in Haverty Chain of Stores—Jascha Heifetz a Big Attraction—Out-of-Town Business Unusually Good—Prosperity Prevails

With his co-operation and assistance the sale of Pathé goods was most successful, the Atlanta store being sold out on the $50, $75 and $100 models in two days after the opening, and additional large orders were placed at once.

Jascha Heifetz, Victor artist, was recently in the city, and entertained a large and cultured audience at the local auditorium.

The Cincinnati Symphony Orchestra, which organization makes records for the Columbia Co., gave a concert on March 26 in the city, and every one who heard them was delighted with their performance.

The Edison line is still selling well locally. The increase in prices, which took place January 1, seems not to have caused any cessation in the demand, nor to form any impediment in closing a sale.

All local Victor dealers are doing a most satisfactory business, and the demand for Victor goods exceeds the supply. The average purchaser who formerly bought a 75-cent record occasionally, now buys $3 worth, and more frequently than formerly.

It has gotten to be quite usual for a customer from out-of-town to drop in one of the talking machine stores here, and buy a $100, $25 or higher-priced instrument, and a substantial selection of records, pay cash in full and have the goods shipped by express to his home town. This kind of business can be traced directly to the high price of cotton, and the large amount of money in circulation. The South, as a section, has more money than in fifty years, and the eyes of the nation are turned this way, both as a land of commercial opportunity, and as a place to buy animal products and foodstuffs.

Let NYACCO Solve Your Record Album Problem
With These Two Dependable Albums

Our No. 1012 (see illustration) is the strongest album obtainable to retail at a moderate price. Has heavy green envelopes, interlocked so that each envelope forms an individual container. Both ends are finished with brass metal tops.

The NYACCO Metal Back Quality Album (the only genuine metal back album being manufactured) has a binding which consists entirely of one piece of metal, and envelopes of heavy fibre green paper, re-enforced with strips of flexible canvas; the result being a practically indestructible album.

Let us quote you prices on these albums.

NEW YORK, APRIL 15, 1918

BUSINESS in the talking machine industry, broadly considered, is in excellent shape despite innumerable annoyances in the way of a shortage of machines and records, due to the unusual conditions for manufacturing. Manufacturers, jobbers and dealers are doing their best to fill all demands with the utmost available dispatch. Fundamental conditions are healthy, and there seems evident an increased buying power in certain sections of the country, due to the large distribution of money among the working people who are earning unusually large wages. They are buying talking machines and records of good quality, and the great problem of the day is to produce and distribute sufficient stock to satisfy the demands.

With this month we enter the Spring season for business. The bleak, dismal, wintry days have at last been replaced by sunlight and brightness, and this seasonable change is undoubtedly having its influence on the mental viewpoint of everyone. A few weeks ago there seemed to be an undercurrent of dissatisfaction, or uneasiness—a lack of faith in the future; in contrast to this we find today a better feeling prevailing—one of hope, trust and confidence.

This is the right viewpoint. The man who sees disaster ahead, either in business or in war, is not a good American. It is the time for courage, energy and enterprise, and there should be no harboring of doubts as to our success as a Nation. It is the time for the booster, and not the knocker. We must work to help the business progress of the country by being optimistic in our opinions, and not give way to an indulgence in doubts or uncertainties.

There is a disposition at times among business men to run to extremes of either over-enthusiasm or the gloomiest "glowm." When the latter prevails the optimist or pessimist rides his hobby horse to the danger of the community.

To-day we are in the midst of serious times, it is true, but it is the period when strong men—selfish, broad-visioned, and able men are needed, when reason and sound sense should dominate all our movements rather than whim or caprice. Whether in war or in business great victories can only be won by good generalship, backed by men, money, and the support of the American people. The talking machine trade has always been noted for its go-ahead character, for its freedom from horticultural traditions, and it is going to face the future with courage and confidence and win new triumphs.

MEMBERS of the trade who have recently visited leading cities in the South are quite enthusiastic over the prospects for an enlarged volume of business in that section of the country. The Southern people have more money to spend to-day than ever before. They have a tremendous purchasing power, due to the billions of dollars that have reached them through their efforts in the past year in agricultural activities.

The Southern people are turning their eyes northward for all those home furnishings that appeal to those esthetically inclined, and naturally they are buying talking machines, player pianos, and other essentials to the enjoyment of music in the home.

This prosperity in the South is not confined to the white people, but throughout Louisiana the colored people who have small farms have got prices for their cotton and other products which have enabled them to pay up any indebtedness on their land, and with the surplus they are buying talking machines and records in goodly numbers.

The purchasing power of the people in the South is a factor worthy of consideration, for the laboring people who are working in the factory centers are earning such large wages that they are manifesting a desire to own a musical instrument of some kind.

It would be invasions, however, to make distinctions when speaking of the trade in the South, for the demand exists among all classes and conditions of people, and it is steadily growing. It is a source of satisfaction that the South is coming into its own in an industrial and agricultural way.

THE great campaign for the successful flotation of the Third Liberty Loan is now under way, and every one in the talking machine industry is planning to do his level best to have this Three Billion Loan oversubscribed. We now have an opportunity to express our confidence in the Government and in the boys at the front, who are fighting as truly for human rights, and the tearing down of autocratic rule, as did our forefathers during revolutionary days.

Every talking machine man can "do his bit" not only by subscribing for bonds but by utilizing his windows for poster display, and by sending out informative literature in his letters. In fact, he must consider every available means to exploit and make successful this Third Liberty Bond campaign.

The military situation at the front has now assumed a critical stage, and every man at home must conscere himself to the service of the Nation in some one way or other. If we cannot fight we must help in a monetary way toward the maintenance of our forces; therefore let us devote our most enthusiastic efforts to making a new record in this great campaign.

IN the making of installment contracts during the period of the war, piano merchants would do well to be guided by the provisions of the Soldiers’ and Sailors’ Civil Relief Act passed recently, and thereby avoid the chance of facing a loss that may be guarded against by the exercise of foresight. Although the act is calculated to protect the soldier or sailor while still being fair to the merchant, in deferring but in no sense canceling the obligation, the dealer selling on installments can, unless he watches things carefully, tie up considerable money in installment accounts that under the law need not be met until after the war, which at best is rather an indefinite length of time.

It has been suggested by a prominent attorney in the trade that where practical the wife or some person other than the soliofr or likely-to-be-soldier, be called upon to execute the contract. There will no doubt be numbers of unscrupulous people quick to take unfair advantage of the new law with fraudulent intent, and special efforts should be made to guard against this class.

IN cooperation with the Music Industries Better Business Bureau, located in Milwaukee, and whose activities have on previous occasions been mentioned in The World, the National Vigilance Committee of the Advertising Clubs of the World has been quite active recently in proceeding against "gypsy" dealers in various parts of the country—in other words, dealers who make a practice of advertising talking machines and records.
from private homes, and ostensibly at a sacrifice, frequently making misleading statements in their advertising to forward their ends. The Vigilance Committee already sent out one bulletin regarding the operations of a "gyp" dealer in Chicago, who uses the name of a prominent make of machine to promote the sale of another much cheaper machine for which he had the agency.

The Better Business Bureau at the present time is making a special drive against the "gyp" operations and has solicited the assistance of legitimate dealers in all sections in an endeavor to rout out the evil. When members of the trade learn of the operations of irresponsible individuals they will be doing themselves a service by investigating the methods employed by the advertiser, and placing the information thus obtained before C. L. Dennis, secretary of the Bureau. The complaints are handled promptly, and in a surprising number of cases the activities of particular "gyp" dealers are curtailed or stopped entirely by appealing to the newspapers to exclude such advertisements, and by other means, without going to court.

Every machine sold by a "gyp" dealer not only takes a sale away from a legitimate merchant, but by supplying the purchaser with a machine of inferior quality shatters his belief in the talking machine as a whole.

WORKING steadily, energetically and persistently to sell what stock he has on hand or can get, instead of sitting around and waiting for machines and records for which there is an unsolicited demand, is the system that is going to keep the average talking machine dealer in business during these war times. The overhead expenses of his establishment are going on just the same, whether he gets in new stock or not, and he cannot afford to sit back and wait for something to happen. From present prospects, any improvement in the present situation will be gradual. Even when the labor and transportation problems ease up they will not do so with a rush, and the retailer must make up his mind to adjust himself to conditions. The situation looks blue and hopeless only to the man who has plenty of time to sit and think. The fellow who is too busy to stop and worry is going to keep his business in fairly good shape, even if he doesn't make as much money as in any previous years, and it has yet to be proven that 1918 in the long run is not going to be a good, big year for talking machine dealers. It depends largely upon the individual whether his business goes forward, stands still or slides back.

JUST at the present time members of the trade in all sections of the country should keep a close watch on the various State legislative bodies with a view to checking without delay measures that may prove inimical to the interests of the trade.

In normal times there are always a few bills introduced that are calculated to harass the trade in some way or another, even though such intent is well hidden. Quick action is generally quite effective in disposing of such measures, but under present conditions it must be borne in mind that many legislators are only too quick to hide behind the shield of patriotism, and to defeat their object, without creating the wrong impression, presents a serious problem for the business man. Bills providing for special taxes or license fees are particularly numerous, and likewise particularly dangerous, for anything that looks as though it would bring revenue into the coffers of the State or the Nation finds favor with law-making bodies, regardless of whether the burden it places on one particular line of industry is just.

There was introduced in Congress recently, by Representative Cary, of Wisconsin, a bill which provided that all merchants selling goods on instalments should pay a license fee of $200 and should give the customer not only a receipt for his payments, but a statement showing the actual cost of the merchandise upon which a profit of not more than 30 per cent. was to be allowed. The bill applied only to the District of Columbia, but instalment interests from all sections of the country were quick to realize that the bill was most pernicious in its provision, and, if passed, was liable to be accepted as a model by various State legislators. The opposition by the various interests, including both talking machine and piano men, was, therefore, very strong and is believed to have killed the measure.

Another bill in the New York Assembly, for instance, provided for an annual license fee of $2 on all automatic instruments, and was so worded that it could be construed to cover talking machines and player-pianos. It is estimated that the revenue from those instruments alone would amount to practically a million dollars annually, and it was strongly hinted that the whole idea back of the bill was to provide a score of jobs for political claimants who would be charged with carrying out the provisions of the bill. Even the most harmless looking measure should be scrutinized for the "joker," and the simpler the wording of the bill the closer it should be investigated. When questionable measures are discovered the organized forces in various branches of the trade will be quick to take any action necessary either to defeat the bill, or have it amended as may be deemed desirable.

TO OUR SUBSCRIBERS

If your copy of The Talking Machine World does not reach you on publication date, or a few days thereafter, do not assume that it has gone astray. The existing railway congestion has had a serious effect on the handling of mail, particularly second class matter, and brought about unusual delays. Kindly wait a few days longer than usual before writing to us, as the paper will probably arrive safely.

---

NO STRING TO THIS

Sidestep it, perhaps, on April first only. But on ALL OTHER days of 1918, pick up the full pocketbook of Victor record profits.

These five words mean what they say:

Pearsall Service for Record Profits

A brand new list of the best music in the world is at your service every month for increasing profits. The complete Victor catalog numbers thousands of selections that you CAN put into the homes of Victrola owners.

SILAS E. PEARSSALL CO.
VICTOR DISTRIBUTORS
18 West 46th Street New York, N.Y.
Forging the Third Link

On April 6th we began forging the third link in the chain that will hold the dogs of war forever in check. And the business end of that chain is going to be in the hands of the people in all countries, and not in the hands of a self-chosen few who can hurl the world into a maelstrom of blood and fire whenever it suits their fancy. Already the metal of resolve has been heated white-hot in the furnace of patriotism and every dollar invested in a Liberty Bond is a hammer-blow that will help weld an indestructible bond of world control among liberty-loving peoples.

Edison dealers, by our contributions to the Third Liberty Loan let us show the world, and especially our enemies, that America is rapidly getting into her full, irresistible stride, and

Let them come from the east,
Let them come from the west,
From Maine to the Philippines.
From the frosty north,
From the balmy south,
And all of the in-betweens.

Let us renew our pledge of allegiance to the flag and reconsecrate our patriotism by doing our utmost to make the Third Liberty Loan a landslide that will crush militarism out of the world forever.

THOMAS A. EDISON, Inc.
Orange, N. J.
The Redistribution of Records, One of the Answers to the Present Shortage Problem

Those members of the trade who have made a close study of the present record situation and means for offsetting in some measure the effect of the shortage declare that considerable relief can be obtained by an intelligent system of redistribution of records among the dealers themselves, as well as by exploiting consistently records known to be in stock, or obtainable from wholesalers.

The plan for exchanging surplus records is not by any means a new one, although it has not been carried out to any great extent in the retail field. The Jobbers' Association has had such a plan in force for a number of years among its members, various local associations of dealers have attempted something of the sort, and here in New York the Talking Machine Men, Inc., have a committee charged with the work of gathering lists of surplus records from dealers and bringing them to the attention of other dealers who have a demand for such records.

Under normal conditions there was not a great deal of interest taken in plans for exchanging record stock, there being a sufficient number of popular records to keep business going, the surplus stock being looked upon as one of the necessary burdens of the trade. Just now a surplus stock is a heavy load to carry, especially in view of the fact that such records may be used to advantage by a dealer in some other locality.

As an instance in point; a New York dealer who found it impossible to get locally certain McCormack and light opera records and other good selling numbers for this section, learned by accident that a Western dealer was overstocked on many of the records for which the New York man had a general demand. It did not take long to negotiate the transfer of those particular records from the West to the East, giving the New York something to do business with, and giving the Western dealer cash instead of surplus stock. It is very probable that many other instances along the same general lines could be cited.

There are very few records that sell equally well in all sections. As a matter of fact the demand is found to vary in various districts even in the confines of one city, depending largely upon the character of the population. If surplus stocks of records can by any means be so redistributed as to place them in sections where they are most likely to be sold, then many members of the trade will be able to cut down the amount of money they have tied up in slow moving stock while giving their fellow dealer an opportunity to do some business. In other words, all hands will benefit.

One local dealer suggests strongly that effort be made to establish a series of central clearing houses in the various cities to act for the dealers in the various sections, and endeavor to make the most out of present record stock on the shelves.

"A central clearing house," said the dealer, "could be maintained at a small annual expense of, say, $10 per member, and if properly conducted should bring back to each individual represented profits of many times that amount. There are enough established associations of talking machine dealers in various cities to provide foundations upon which to build such clearing houses. The matter will have to be taken seriously, however, by the majority of the dealers who participate, to make it worth while.

In the first place, arrangements should be made for the filing of weekly reports by every member, showing the records of which he has a surplus, as well as the special records of which he is in the greatest need. Salaried employees going over and comparing the lists could very easily tell the individual dealer where his surplus could be disposed of or where he could obtain certain desired records.

The time is past when the average dealer can sit tight and let his surplus stock accumulate in anticipation of being able to take advantage of a record exchange proposition from the manufacturer. Such a course may be excusable when the dealer is doing plenty of business with new records, but when he is not getting the new records every dollar's worth of stock on his shelves represents a real loss in tied up capital and potential profits. The clearing house suggestion, although offering quite a number of details to be worked out, nevertheless seems to point the way to providing some way from the present record situation. It will not cure it by any means, but anything that will help is worth considering with all seriousness."

There are already a number of wholesalers who themselves are conducting clearing houses for the benefit of their dealers. The wholesale salesman being in close touch with the dealers, knows just what records certain retailers are overstocked with, and can, and does, in many cases, arrange for the transfer of such records to some retailer who can use them to advantage. Such instances, however, are few and far between, and it seems the dealers themselves should make some attempt to help themselves.

Wholesalers, too, have endeavored to assist the dealers by supplying each week lists of from a half dozen to twenty records that are in stock with the suggestion that such records be especially featured during the week. It gives the dealer something tangible to work on and he knows that any demands be may create for those records through special efforts can positively be met.

One wholesaler has gone to the extent of taking a page advertisement in The Talking Machine World this month to call the attention of dealers to a list of desirable records he has on hand and is able to supply.

This action of the wholesaler is simply in line with the arguments that have been put before the trade for months past. In short, now is the time to concentrate on selling stock on hand or that can be obtained, instead of bemoaning the loss of sales of more popular machines and records. As a matter of fact, summed up, real salesmanship consists of selling the customer what you have to offer, rather than what he is particularly anxious to buy.
The Biggest Event in Motordom!

Our Most Popular No. 2 Motor

Over 250,000 are in use.
One of the most prominent manufacturers in the United States alone has used 80,000.

The Price Will Startle You.

Improved with a combination start and stop and regulating device that works on and with the governor direct instead against the governor.

Write at Once and Surprise Yourself

We Have a Tone Arm For Every Purpose

The Two-In-One

Plays any type of record as it should be played. A heavy arm for vertical records; a light arm for lateral records—just a twist of the handle "A"—and the weight is changed from 4 to 8 ounces.

The Improved No. 2 Universal

Known to all manufacturers as a practical and satisfactory arm for all machines ranging in price from $15.00 to $75.00.

We can furnish you with every part of a talking machine from a needle up.

Woolworth Building, New York

EFFECTIVE GALLI-CURCI DISPLAY

People's Outfitting Co., Detroit, Takes Full Advantage of Appearance of Noted Soprano in That City—Record Sales Stimulated

DETROIT, Mich., April 8—The talking machine department of the People's Outfitting Co. took full advantage of the recent visit of Galli-Curci to this city by arranging an elaborate window display featuring the noted soprano and her records.

A Classic Galli-Curci Window records, together with four other Victor artists of renown. The figures of the artists, including Farrar, Caruso, Tetrassiai and Harry Lauer, were life size and plainly labeled. A special list of records by Galli-Curci were shown on both sides of the window, and it is reported that the display proved most effective in stimulating the sale of records of all types.

IMPORTANCE OF SMALL DETAILS

Little Things Often Determine the Success or Failure in the Marketing of a Product

Seemingly insignificant details are often most essential to the success of a business or a product, and it is the business man who studies these small things who is apt to score a success in his sphere of activity. The fact that little things often determine the success or failure of a product was emphasized recently by George W. Hopkins, general sales manager of the Columbia Graphophone Co. He said that in marketing a high grade of candy it was discovered that the public will not buy candy packed in green colored fancy boxes. Just why this is so he could not say. Possibly the color of the package suggests arsenic, a poison. But whatever the reason, the company found after spending several thousand dollars that green boxes killed all chances for making the candy popular. When pink was substituted sales increased in a most satisfactory manner. Biscuit manufacturers have learned from sad experience that round packages, no matter what the character of the biscuit may be, do not appeal to the public. Square shaped, or oblong boxes, on the other hand, immediately find favor. As fully 75 per cent. of all goods are sold on their appearance, it behooves manufacturers to see that products are put up in packages that have an attractive eye appeal.

There are better ways to do everything now accomplished. The simplest device can still be simplified; the speediest engine quickened; the sanest system convicted of waste.

LIVELY BUSINESS IN GRAND RAPIDS

Local Branch of Brunswick-Balke-Collender Co. Reports Strong Demand for Phonographs

GRAND RAPIDS, Mich., April 2—The local office of the Brunswick-Balke-Collender Co., through C. W. Kalder, reports that the phonograph business of the company in Michigan, Ohio and Indiana is unusually good. Excellent results were obtained at the National Furniture Show held in January, which was attended by a number of Brunswick dealers, and the volume of business booked for that month alone was greater than for any four previous months.

Several new dealers have been signed up recently, among them being the J. E. Anderson Co., Saginaw, Mich.; W. A. Silwell, Big Rapids, and the F. N. Arbaugh Co., Lansing. The latter concern is one of the largest department stores in the State, and their phonograph department is a new venture.

The local Brunswick headquarters was recently called upon to ship one of their $1,500 machines to Fort Worth, Tex., by express, the expressage alone being about $80.

GIVES VICTROLA TO SERVICE CLUB

The Henry F. Miller & Sons Piano Co., in Portland, Me., recently donated a Victorola to the National Service Club, recently opened in that city to provide entertainment and comforts for the soldiers and sailors.

ADA JONES DENIES BEING DEAD

Prominent Talking Machine Artist Sets Latest Rumors of Demise at Rest

Ada Jones, like Mark Twain, objects to being reported dead, and the veteran talking machine artist was quick to deny the latest rumor of her demise in the following letter:

"I have often been reported dead. I even have a double who has been singing throughout the country, using my name, as 'Ada Jones, the phonograph artist.' I have just been out with a troupe of phonograph artists giving several entertainments where I was introduced as 'Ada Jones, the mother of the phonograph.' Which made me feel very ancient, I assure you. Cordially yours, Ada Jones, Long Island."

NEW BOOTHS FOR HOMER KLOCK CO.

The Homer Klock Piano Co., which handle the Columbia and Sonora machines and records in Stamford, Conn., have just installed some very attractive booths finished in white enamel, for the purpose of demonstrating their machines and records, which add quite materially to the facilities of this establishment as well as to the appearance of the store. This company are quite enthusiastic over the line which they handle and report an excellent business so far this year.

This is no time for being just half a man—try being a man and a half.

When a dealer gets an intelligent prospective customer to the point where he will listen to a machine play, nine times out of ten he will select a SCHUBERT PHONOGRAPH

Schubert dealers know this.

We'd like an opportunity to prove it to the satisfaction of every other dealer in the country.

Five Models, $60 Up

The BELL TALKING MACHINE CORPORATION

Give Them What They Want!

The tremendous demand for PATHE PATHEPHONES during the past year is UNQUESTIONABLE PROOF that the people are no longer satisfied with a ONE-RECORD machine.

The people have been educated regarding Records—They know that there are good Pathe Records—They know that there are good Victor Records—that there are good Columbia Records and good Edison Records—

The people want to hear ALL makes of records and they must have a talking machine THAT WILL PLAY all makes of records—

The Pathe Pathephone

Is the Only Standard Talking Machine That Gives You This Great Selling Advantage

This and other grand features—the Pathe Sapphire Ball and Pathe Everlastinėg Records—make Pathe the greatest of all phonograph propositions.

Why Not Make a Vigorous and Successful Drive On the Sale of Foreign Records

The talking machine dealer in the average city in the United States, especially if it happens to be an industrial center, who is not making a consistent and energetic drive on foreign records is neglecting a most important feature of his business. In some instances it would be just as logical for him to forget to call attention to the popular records of the day, or the records of the world's famous artists.

There are a number of prominent houses, Grinnell Bros., in Detroit, for example, who do pay particular attention to foreign record business with gratifying success. It means work and consistent effort to do it successfully. Special advertisements should be run in foreign language newspapers in order to reach the thousands, or even millions, who still demand the popular things in their native tongue, although newspapers in English can also be used to distinct advantage—those who combine a thorough knowledge of the English language with the sentiments of their native land.

In the great majority of cities there are foreign colonies, the bountiful language of which is wonderfully distinct. The emigrant who lands in this country naturally seeks out those who speak his own language, and practically to some extent this new locality the mode of living to which he is accustomed. Once having found the colony he either remains in it or else keeps in close touch with his people. This habit of colonizing makes it particularly convenient for the talking machine dealer.

Foreign records, even though carefully listed in the catalogs and stocked on the shelves, do not mean anything to the dealer's business unless he brings them to the attention of those most likely to be interested, and there are many owners of talking machines who have supplied their record wants from the regular catalogs without having learned that there may be particular gems in their native tongues simply awaiting their orders.

A successful foreign-record business cannot be handled in a haphazard manner any more than the regular record business can be handled in that fashion.

**NEW ASSOCIATION IN DALLAS, TEX.**

Local Music Trade Organization Elects Officers and Names Committees

DALLAS, Tex., April 3—The Dallas Music Trades Association recently organized by the pinos and talking machine men in this city has selected the following officers and committees: President, Robert N. Watkins, of the Will A. Watkins Co., vice-president, F. B. Phelps, of the Field-Lippman Piano Co., and secretary-treasurer, B. F. Hollingsworth, of Thos. Goggin & Bros., B. F. Gup ton, of the Goettinger Co., and B. W. Gratigny, of the Bush & Gerts Piano Co., together with the above officers, were made members of the executive board.

D. L. Whittle, of the Western Automatic Music Co., was made chairman of the membership committee. Fred Giebel, of Sanger Bros., was made chairman of the always important entertainment committee.

**THE BROOKS**

Automatic Repeating Phonograph

Plays Any Kind of Record—Any Desired Number of Times and Then Stops Automatically—
The Phonograph Sensation of the Age

**MR. DEALER:**

You cannot duplicate the value we offer for twice the price. In size and appearance the "Brooks" compares favorably with Instruments retailing for $300.00 and up.

In tone qualities it is unequalled by any talking machine on earth! In mechanical equipment and automatic features it is years in advance of its nearest competitor. We have been building talking machines for three years—last year our sales doubled every four months. The BROOKS DEALER has no competition. The machine creates interest and discussion—it is self-advertising. Send for particulars, terms, prices. Do it Now.

BROOKS MANUFACTURING COMPANY

Talking Machine Dept. - SAGINAW, MICH., U. S. A.
Giving the People
Artists They Want

Educating the people is all right—in school. But grown-ups usually know pretty well what they want in music. And Columbia gives them what they want.

Nora Bayes, for instance. Nora Bayes can get more over to more people in one song than any other American comedienne. What of that? Well, Nora Bayes now sings for Columbia exclusively. Columbia just naturally had to have her. And she just naturally had to come to Columbia.

And Nora Bayes is merely one more in Columbia's Milky Way of Stars. There are the Chicago Symphony Orchestra, Percy Grainger, Al Jolson, Prince's Band, Geo. H. O'Connor, Samuel Ash, Robert Lewis, Arthur Fields, The Peerless Quartette, Campbell and Burr, Oscar Seagle, Henry Burr, Harry C. Brown, Mery Zentay, Nellie Hoone Welmore, the Columbia Stellar Quartette, Louise, Ferera and Greenus, and the Paulist Choristers of Chicago.

These aren't all the stars in Columbia's Milky Way of Stars. These are merely those shining in its May List of Records.

Nor are these all the world-wide known stars Columbia employed to give the people what they want for just one month. For those eagerly waiting for more, Billy Williams and Harry Champion, of English music hall fame, contributed, and Thornton W. Burgess supplied some more of his Bedtime Stories for children. Some Milky Way for Just May—what?

Columbia Graphophone Co.
Woolworth Building, New York

Giving the People
Records They Want

No question about the first two records by Nora Bayes. There'll be a public scramble for "Some Day They're Coming Home Again" and "I May Stay Away a Little Longer." They add something to even the laurels of Nora Bayes.

There's always a scramble for Al Jolson's new records, and he has a song in Columbia's May List that seems made to order for him. "Wedding Bells (Will You Ever Ring for Me?)" is already popular in the big cities where Al Jolson has sung it. Now that it is recorded, it is bound to sweep the country.

Percy Grainger, the "Musical Viking," brings his power into full play in Chopin's Polonaise in A-Flat Major.

Samuel Ash has made many a song popular. In "My Sweetie" he has come upon one so catchy that it is likely to make him more popular.

Oscar Seagle has sung "Keep the Home Fires Burning" and "Pack Up Your Troubles in Your Old Kit Bag and Smile, Smile, Smile," two of the big war songs, so that more may enjoy them.

And there are marches for the martial and dance-records for the dancers and talking records for those who want their vaudeville on tap at home, and a great variety of more music of sorts the public has shown that it wants. Columbia's May List is a whopper!

THE TALKING MACHINE WORLD

Giving the People Grafonolas They Want

When customers enter your salesroom, give them prompt, courteous individual attention. If they are left to themselves too long they may wander out.

Attend them promptly. Try to discover tactfully about what priced instrument they can afford to buy. Show different Grafonolas within a reasonable range around that price—but never so many different models that the customers are merely confused and cannot decide on any instrument.

Ascertain as quickly as possible the kind of music a customer likes—and then play that kind on the Grafonola that seems to make the best impression. Of course you will play any record the customer wants on any Grafonola.

Give customers all the time they need to decide, but good salesmanship will help them decide before they leave the store. Good salesmanship means in a word selling the customer the Grafonola he wants at the price he ought to pay.

Columbia Graphophone Co.
Woolworth Building, New York

The Result of Giving People What They Want

People who get the records they want by the artists they like and play them on the best Grafonola they can afford to buy are Columbia fans for good and all.

Columbia fans are steady customers for Columbia dealers. It is worth taking time and trouble to see that your first sale makes a permanent Columbia fan of your customer.

By the way, Columbia makes records in 30 different languages, all made by native artists under direction of masters of each tongue. Are you making the most of our many records in foreign languages?

A small investment—you have a full catalogue department in the two or three languages commonest in your territory—and the turnover is quick and highly profitable.

Where not already actively represented, Columbia wants a few more dealers in their International records. Get into this fine field among the early ones and reap a tidy profit. People of foreign birth—well, you know what fans they just naturally are about music.

Columbia Graphophone Co.
Woolworth Building, New York
THE MISSION OF THE VICTROLA IN THE PRESENT WAR

Through the Medium of the Talking Machine Our Fighters Are Receiving the Benefit and Solace Which Music Alone Can Bring—Educational Records Proving of Great Value

Somehow behind the battle line in Flanders, Walter R. Creighton, son of the late Lord Bishop of London, wrote to Maud Powell: "I have just been listening to you playing and I wanted to write and tell you of our gratitude," in which short sentence he summed up a condition which will be met by every American soldier who goes abroad, as well as by the relatives and friends who stay at home.

Even in war we do not live by bread alone, and that which can bring shaken men back to self-respect, to decency and a determination to "carry on" is a thing the value of which cannot be computed in dollars and cents, says the Victor Co. in its March record supplement.

Apart from their purely military equipment our men will experience three essential needs, if they are to be preserved through the stagnation of trench warfare. Those three essentials are food, shelter and recreation.

Rudyard Kipling knew what music can do to stabilize the morale of slaughter-weary men, when he wrote the "Song of the Banana." "You couldn’t pack a Broadwood half a mile—you mustn’t leave a fiddle in the damp." These lines are as true to-day as they were when Kipling wrote them.

Young Creighton heard Maud Powell play out there on the edge of "no man’s land," because she has made records for the Victor Talking Machine Co. and because that company has made it possible for human beings everywhere to enjoy the solace and the inspiration of good music.

An instrument which requires somebody to play it is useless except when some such person is at hand. Every one of the warring governments has made special and strenuous efforts to supply music and entertainment for its soldiers, but human needs do not keep regular hours. A musical instrument which can be operated by anyone at any time, and which, like Kipling’s banana, can, if need be, "travel with the cooking pots and pails," performs a service obtainable through no other agency.

The Victor Co. has a picture of a gigantic "Anzac"—a sergeant—six feet six in his stocking feet, peering over the edge of a trench in Gallipoli. The photograph was taken by Lieutenan Throssell, of the Tenth Light Horse, just before the men went "over the top" in a bayonet charge, and in the immediate fore-ground of the picture is a Victor—playing.

When Steffanson’s ship, the "Karliek," caught a crushing blow by the ice, finally sank down to the ocean bed, a Victor played the Chopin Funeral March for requiem.

Three whose efforts enable men to endure the unendurable might safely be classed as among those who are already "doing their bit," but the Victor Co. is doing all this and more.

The most valuable work a man can do is that of which he has best learned to do. As a result of Kipling’s inspiration, England sent engineers, machinists, draftsmen to the trenches, and subsequently had to recall them because the work they already knew how to do was more valuable to the nation than anything they could do in the trenches—and in such work as the Victor Co. is already best qualified to serve some noteworthy special efforts have materialized.

One of the critical concerns of the nation at the moment is the educating of thousands and thousands of wireless operators. A system of teaching by means of records has been devised and recently introduced by the Victor Co. The American soldier in France, with no knowledge of the language, is likely to face some critical embarrassments, if not actual language difficulties, which might otherwise be avoided. After months of labor, research and expense the Victor Co. developed a system of French lessons which gives the soldier something he can use the moment he steps ashore or at any time when he may be left to his own resources.

These are specific things—thrown in for good measure—but there is far more the Victor Co. may do along such special lines it can do no more valuable work in the mobilization of national energies than that of enabling men to endure the mental and nervous strains of modern warfare, which are always so nearly unendurable. Morale is an essential element of victory—at the front, behind the lines and at home, and morale is in the hands of the Victor Co., as many agencies through which the strain on the body may be relieved, but there are few practical avenues of relief for the mind, and certainly none that can be spared.

NEWs BRIEFLets FROM DENVER

Displaying the Pathé Line in New Quarters—Improvements at Darrow’s—Brunswick Line With Swanson—Other News of Interest

DENVER, Colo., April 6.—The Swanson & Nolan Supply Co., which handles the Pathéphone at wholesale and retail in the United States, has moved to its new quarters at 1514 Welton street. The store is most attractively fitted up, and there are ample conveniences to carry an excellent stock of Pathé magnetic recording trade prospects in his section.

The Knight-Campbell Music Co., which handles the Victor and Columbia machines, is very busy with winter home purchases at this store.

The Brunswick phonograph is now handled in this five territory by Swanson’s Jewelry Store, 19 Broadway, and this fact is being made known to Denverites through some very attractively arranged billboard signs throughout the city.

ANTICIPATE REQUIREMENTS

E. L. Knapp Tells Why Canadian Trade Should Anticipate Needs—Recent Company Change

JAYBOWN, N. Y., March 25—Announcement is made that A. F. Weber, who has been identified with the Weber-Knapp Co., of this city, as president and treasurer, has severed his connections with this company. It is further announced that Edward L. Knapp, formerly vice-president, will now take full charge of the plant, and that business will continue along exactly the same high-class lines without interruption.

Mr. Knapp reports an increased demand for talking machine hardware, and from a larger area than there has ever been before. Shipments to the Canadian markets, he states, have been materially interrupted, due to the necessity of procuring an individual license for each shipment without hope of renewal.

Mr. Knapp feels that it would be to the interest of those houses in the Canadian territories that order from the States to take this in consideration, and to anticipate their requirements if possible at least six months in advance. It usually takes two weeks to procure the necessary license, and as each individual shipment is required to have this license the same delay is naturally caused each time a shipment is made. Conditions are apt to grow worse rather than better, hence this caution.
TRANSFER BUREAU NOW ORGANIZED

Tri-State Victor Dealers' Association of St. Louis Arranges a Real Constructive Program That Should Be of Wide Benefit to Members

St. Louis, Mo., April 4.—The Tri-State Victor Dealers' Association has set itself for an earnest program for the rest of the year. The officers believe that the association now is safely established.

The first work undertaken was that of establishing an exchange for records and machines that happen to be dead stock on one dealer's hands, but would be live stock elsewhere. That bureau is now working under direction of John F. Dittole, of the Famous & Barr Co. of this city.

Next comes the associated membership work. The associate members are to be the salesfolk who will be invited to join the Association and special meetings will be arranged for their benefit. The control will remain in the hands of the department managers and store proprietors. The first meeting to which associate members were admitted was held yesterday and a big meeting is planned for May. The April meeting was preliminary. The program for the associate members will be a help in selling goods, a plan whereby sales people can get the training desired as to machine construction, etc.

One of the first features provided along this line will be moving pictures of the Victor factory and later will come talks on salesmanship and Victor reasons. The last business meeting E. C. Rautb, of the Koerber-Brenner Co., was elected secretary to succeed C. H. Lippman of the Field-Lippman Piano Stores. Mr. Lippman explained that his duties had increased so heavily since former employees of the firm had departed for war work that he was unable to get time to attend to outside duties. It was decided that weekly meetings of the directors of the association would be held in preparation for the May meeting.

Chairman Dittole of the Transfer Bureau sent out this letter to all members as a memo, of the rules of the bureau:

"It is with pleasure I can advise you that the Transfer Bureau is now organized and ready to serve you in the very important work which it will have to perform.

"In the operating of this Bureau your chairman respectfully asks for your cooperation in following conditions and rules by which this Bureau will operate:

"The most important advantage that members will obtain from this Bureau will be that they will be given the opportunity to dispose of in a wholesale way any overstock they may have of slow selling records.

"Members that enroll themselves as members of the Bureau will have the privilege of distributing records, from the records that they were unable to get from the distributor.

"The following is the plan by which we shall operate:

"Each member is privileged to use the enclosed form to fill out with the Chairman any Victrola and Victor records that are in perfect condition and which he wishes to dispose of in a wholesale way.

"Each member in turn will be notified by the Victrola and Victor records that are available through the Bureau.

"The Association will in no way be responsible for credit, condition of goods sent through Bureau, etc. As to credits, any dealer can get such information from the Koerber-Brenner Company. Any controversy relative to the condition of Victrola or Victor records sent or received through the Bureau will be settled by your Chairman and all must abide by his decision.

"For information regarding the Bureau must be made in writing to the Chairman. Time prohibits the consideration of phone calls or personal calls regarding the Bureau.

"All transfers must first have the approval of the Chairman and after approval is granted the dealings will be directly between the members.

"Any suggestions regarding the operating of this Bureau will be appreciated. If we can all work with the same spirit, the work of the Bureau will find many advantages in the work that will be accomplished.

"The membership campaign of the association is meeting with splendid success. Concerning the reasons for an exclusive association, Mr. Dittole said:

"An association appeals more to the exclusive dealer than to the dealer selling several machines. We assume, however, wherever a dealer sells Victors that his highest interest is in that dealer, who is enthusiastic in his line, does not care to make criticisms and suggestions in a meeting of mixed interests. I would freely say things in a Victor association that I knew not to care to say if an exclusive dealer in another line was there. I believe also that if a man was selling Victors, Colombias, Edison and Artophone machines, etc., he would offer criticisms and suggestions in a meeting where all dealers sold these machines that he would not make in a meeting where there were dealers who did not sell this machine.

"He would assume that all dealers selling this machine knew its weak points in machine or service, but he would not be willing to hand that statement, on his authority, to a competitor.

"In this connection, the following statement has been made officially as to the object of the association:

"Its object shall be to advance, promote and extend the commercial interests of its members; to instill just and equitable principles of trade, and to improve business standards; to acquire, preserve and disseminate valuable business information; to promote friendly intercourse and to establish closer business relations between its members, and also between said members and the Victor Talking Machine Co., to increase the facilities of its members for an interchange of ideas, and for the purpose of cooperating with other organizations upon important matters pertaining to and affecting business; to discuss and disseminate proposed legislation affecting the business welfare of members; and to investigate existing laws and encourage their enforcement."

RECORDS BY AUGUSTA BOULIEZ

The Starr Piano Co. announce that they have successfully negotiated with Mr. Auguste Bouli-

z, the famous Belgian baritone, to make exclusive recordings, which will be issued about the middle of April and will be listed in the Bennett Art Tone series. The recordings which Mr. Bouliex has made are as follows: Les des Grenadiers (the two Grenadiers); Ballo in Mas-

chero "Eri tu"; Hamlet, "Chanson Bashique" (drinking song); Faust, Serenade of Mephisto; Faust, "Arts de Valentine." They are very highly spoken of.

Repeat orders make pretty good testimony to the fidelity of a business institution, and regular customers are of more importance than first sales.

A Great Name in the Victor Game

TWO Representative Stocks of Victor Records In TWO Hustling Western Centres of Commerce!

Omaha and Des Moines! Spots of Action on the U. S. Map. If you are nearer Omaha or Des Moines than to some other point, why shouldn't you serve your own interests by putting the "Source of Supply" question up to the Mickels? Better look into this today—you'll gain nothing by staving the matter off!
Boston, Mass., April 4.—The Third Liberty Loan and the forthcoming great parade, to come off on the sixth of this month, are the uppermost topics of conversation in the trade just now. The various talking machine houses made a handsome showing in the purchase of bonds on the two previous drives and there is every reason that more will be forthcoming from them this time, especially as the right propagandists of education have been spread abroad, and people now better than ever before understand what the nation is really up against. The trade is likely to be well represented in the parade, which will enlist the services of upwards of 80,000 men, women and children.

Business Continues Good

Business with the various dealers continues good, but many of them complain that the call for goods is in excess of what they are able to secure from the factories. Toward the end of April there should be a large demand for the records of the various grand opera stars as the Metropolitan Company begins a week’s engagement here at the Boston Opera House on April 22. The visits of the big opera companies invariably stimulate business.

Death of Andrew J. Lyons

The Victor and Edison departments of Chickering & Sons were called upon to pay their last respects to a valued employee a week ago, Andrew J. Lyons, who died at his home in Roxbury, after a short illness. Mr. Lyons had been with the concern several years and was married only a year and a half ago. He was devoted to athletics, and was especially interested in baseball and was among the foremost in promoting the game among the various talking machine houses in the city. Manager Currier of the Chickering house and the employees of the Victor and Edison department attended the funeral, and they were represented also by some beautiful floral offerings.

Ciccolini Appears in Concert

Considerable interest centered Sunday afternoon, March 31, in the appearance in this city of the famous Guido Ciccolini, the Italian tenor, who is one of the leading Edison artists. His concert at the Boston Opera House attracted an enormous crowd of people, and the Italians especially were most enthusiastic over the man, his voice and his fine presence. Ciccolini had the assistance of Pierre Haroutou, concert master in the Chicago orchestra as violinist, and Mr. Fabbrina as pianist. For several days prior to the concert the tickets were on sale at the Edison warerooms of the C. C. Harvey Co. in Boylston street, in the window of which establishment there was a large placard announcing the concert and a portrait of the artist, accompanied by the following notice: “Hear Mr. Har- to-morrow. Hear him Monday at our store. Hear him Monday night in your own home.” Besides the Harvey company those especially interested in the concert were George Lincoln Parker, the F. H. Thomas Co., Chickering & Sons, all of whom are Edison dealers, and, of course, the leading Edison jobbers, the Pardee, Ellenberger Co., Inc.

An Attractive Easter Display

Among the especially attractive window decorations at Easter, and which was highly significant of the season, was that of the Eastern Talking Machine Co., where Wholesale Manager Fitzgerald arranged a profusion of Easter lilies in both windows as a frame and background for the exhibit of the latest of the month’s novelties in Victor records.

Has An Eye for the Artistic

Manager R. S. Hibshman, of the Vocalion Co., is another who has an eye for the artistic effect when it comes to adorning his warerooms and show window. There is not a week going by that there are not pots of blooming plants and cut flowers placed effectively about, and these help a great deal in beautifying what is really one of the most home-like phonograph warerooms in the city. Manager Hibshman is making ready to give his customers quite a surprise very shortly, a foretaste of which some of them already have had in visits to the warerooms.

Interested in Marriage of Chas. Edison

The local Edison dealers were especially interested in the announcement of the marriage at Seminole Lodge, near Fort Myers, Fla., of Charles Edison, son of the inventor, Thomas A. Edison, and Miss Carolyn Hawkins, of Cambridge, by reason of the fact that the young man was at one time a student at the Massachusetts Institute of Technology, and during his years at that school made many friends here.

Fred. H. Silliman a War Expert

Manager Fred. H. Silliman, of the Pardee, Ellenberger Co., Inc., is one of those men who are not only deeply interested in war, but who can discuss its various phases most intelligently. Mr. Silliman studies carefully the situation day by day and is always ready to analyze and speculate on the various moves and counter-moves made on the battle front.

Cupid Invades Ditson Department

Two of Manager Henry A. Winkelmann’s valued women employees, the Victor department of the Oliver Ditson Co. have taken unto themselves husbands. One is Miss Ethel Chools, who lately was married to Joe Carlson, who also has been with Manager Winkelmann and is now in service at Camp Devens, Ayer. Their wedding took place at Quincy. The other young lady, Miss Gertrude Lockard, is now Mrs. Brown. Fortunately for Manager Winkelmann the young ladies are now back at work, so he is not without his valued services.

To Do Edison’s Work for Columbia

James M. McLaughlin, who has been promi-

nently identified with the music department of the Boston public schools for which he has been director for several years, has identified himself with the Columbia, and will have offices at the Grafonola Co. of New England. His position will be director of the educational department, and he will devote his time, especially during the summer, to the development of music in the school and home. Mr. McLaughlin for long time has been a great believer in the future of the phonograph as an educational medium among the young.

R. H. White Co. Department Busy

The Graphonola department at the R. H. White Co.’s department store is finding many sales these days and Manager Fred L. MacNeil says that the only difficulty that confronts him and his staff of men and women salesmen is the difficulty of getting a sufficient supply of goods. This department handles the Victor, Edison and Columbia lines. Mr. MacNeil has had considerable experience in this line of business, and came to manage this R. H. White department a few months ago.

Gillis Takes Over the Miller Victor Business

Walter J. Gillis, who for some time has been retail manager for the Henry F. Miller Piano Co., has taken over the Victor business of the house and henceforth will manage it as his own business. He has disposed of the entire stock and the good-will, and his staff for the present

Foresight Proves Its Value

Some years ago we adopted a policy of conducting our Victor business “with the dealer’s viewpoint foremost in mind.”

By practicing this policy we have acquired a knowledge which in times like the present makes Eastern Victor Service of triple value to the dealer who wants practical cooperation from his jobber.

SAN FRANCISCO OFFICE, Room 530 CHRONICLE BLDG.
WALTER S. GRAY, Manager

Oldest and Largest Manufacturers of Talking Machine Needles in the World

April 15, 1918

will include Herman Mahr, Miss Edythe Austin and Miss A. J. Duly. Mr. Gillis has been in the Miller house for twenty-three years and is therefore intimately in touch with the piano industry. He has a host of friends who will wish him unlimited success in his new undertaking. A son, Walter J. Gillis, Jr., is with the 101st Engineers in France, and encouraging letters continue to be received by the family.

Sending Letters from the Front

Jerry Spellman and Ed Welch, of the Eastern Talking Machine Co., Victor distributors, are proving themselves good letter writers. They have been in France with a hospital corps now almost a year, and their old associates persuade them from there quite regularly. Thus far they are quite well and having many exciting experiences.

Plan Tone Test for Fitchburg

The Ivor Johnson Sporting Goods Co.'s Edison department is arranging for a tone-test to be given in City Hall, Fitchburg, on the evening of April 11. For this test Miss Marie Mortisey, the well-known contralto singing for the Edison company, is coming on from Chicago. Arthur W. Chamberlain, the Edison manager for this Boston house, will be in immediate charge.

At Local Brunswick Headquarters

One of the additions to the local staff of the Brunswick-Balke-Collender Co. at 94 Washington street is M. J. Graff, who comes here from the company's Chicago quarters as repair man. Mr. Graff is a Brunswick enthusiast and has a persuasive manner in presenting the claims of the Brunswick machine. The "Ultona," which is one of the cleverest devices yet put on the market for reproducing the various makes of discs, is about to be put out by the Brunswicks as a component part of its machine. Anyone, therefore, possessing a Brunswick will be able to play any record. As a piece of mechanism this Ultona is worth careful study. F. H. Walter and E. S. Campbell, as the local travelers for the company, are finding a good call for the Brunswicks and March proved a surprisingly productive month for the company.

Sonora Territory Enlarged

Through a new arrangement with the Sonora Co., Richard Nelson, New England manager, now has the State of Connecticut added to his territory and this will be operated in conjunction with Massachusetts and Rhode Island. To better facilitate this situation Joseph H. Burke, assistant sales manager, who is doing excellent work, will spend a part of his time at Hartford, making visits meantime to the Boston offices which are so conveniently located in the Little Building. The People's House Furnishing Co. at Haverhill is one of the latest concerns with which Manager Nelson has signed up. Some of the largest orders for the Sonora line are coming from the large Boston department store of the Jordan Marsh Co.

Fred Peabody on Road to Recovery

The Boston phonograph dealers have been sorry to learn of the serious illness of Fred Peabody, who runs a chain of stores at Haverhill and Gloucester. He was threatened with pneumonia, but thanks to good care he is on the road to recovery. Mr. Peabody comes up to Boston quite often and always gets a warm welcome from his many friends.

Wholesale Columbia Department Busy

The last day of the month found Manager Fred E. Mann's wholesale Columbia department a busy place, for it was quarterly stock taking day. In the city at the present time are C. A. Klebart and Stephen Gilroy, auditors from the New York office who have been spending a week or more at the Federal street headquarters. Another visitor here from the New York offices has been A. R. Harris, of the general sales department. F. K. Pennington, assistant general sales manager, is expected here in a day or two. Manager Mann is quite enthusiastic over the good showing that the month of March made, which was the best of the three of the current year thus far.

Featuring Nora Bayes' Records

It is of special interest to the trade that just as Nora Bayes is making her appearance in Boston in the "Cohan Revue" the first of this comedienne's records are being put out by the Columbia Co. The engagement began at the Colonial Theatre April 1 and the windows of the Grafonola Co. of New England made a most attractive display of her records.

Make Splendid Victor Display

One of the attractive booths at the big exhibit at Horticultural Hall, which opened to-day under the auspices of the Boston Herald, is that of the M. Steiner & Sons Co., whose display of Victor outfits is attracting many persons. The (Continued on page 22)
TRADE CONDITIONS IN BOSTON
(Continued from page 2)

exhibit is in charge of William A. Burrows, of the Steinert house, and the demonstrations, which occur at regular intervals, are listened to by crowds of people. Robert Steinert, who is in charge of the Arch street Victor headquarters, makes a most encouraging report of the March business both in machines and records, but he, like others, is feeling the shortage of goods.

The New England Vitonola Talking Machine Co., exclusive distributors of the Vitonola talking machine, made in Chicago, for the New England States, are steadily building up a very satisfactory dealer clientele for this excellent product.

NEW ENGLAND T. M. Co. EXPANDS

Add 3,000 Square Feet of Floor Space to Boston Factory to Meet Demands

BOSTON, Mass., April 3—Announcement is made that the New England Talking Machine Co., of this city, have found the necessity of adding some 3,000 feet of floor space to their factory, due to the strong demand evidenced for their product. The "Perfection" ball bearing tone arm and the new "Perfection" flexitone reproducer need no introduction to the trade. Their increasing popularity has necessitated this change.

NEW QUARTERS FOR H. G. APPLIN

Somerville, Mass., April 5—H. G. Applin, talking machine dealer, formerly located at 20 Colleage avenue, has moved to new and larger quarters in the Medina Building, where he has installed several soundproof booths, commodious record racks, and a complete repair department. Mr. Applin handles both the Victor and Edison lines, and has been in business here for over ten years. This is the fourth time that he has been compelled to move, owing to the expansion of his business.

URGES CARE IN RECORD PACKING

Post Office Department Notifies Postmasters Regarding Packages and Their Packing

WASHINGTON, D. C., April 6—Concerning complaints have reached the Post Office Department that many phonograph records are broken in the mails when sent by parcel post, Otto Frager, Second Assistant Postmaster General, has notified the postmasters and other employees to be careful to see that the articles are properly packed, properly marked and carefully handled.

The order reads as follows:

"Numerous complaints of damage to phonograph records shipped in the mail indicate that postal employees are not giving proper attention to these fragile articles. Therefore, it is directed that postmasters and all employees receiving parcel post from the public for transmission in the mail shall be particularly careful to see that such parcels are suitably and sufficiently prepared for safe transmission, and that they are plainly labeled 'Fragile.' All postal employees are also cautioned to use special care in handling such parcels with a view to preventing damage thereof."

CLEVER SWINDLER GETS RECORDS

Young Man Manages to Get Forty-fire Records From Two Stores of Shroyer Music House

BETHANY, Mo., April 2—The Shroyer Music House, of this city and Albany, Mo., was struggling twice recently by the same swindler, and both times for a goodly bunch of Edison records.

A young man about twenty years old entered the Shroyer store in Albany recently and contracted to purchase an Edison phonograph on installments without making an initial payment. He ordered nine records and offered to take them with him to save trouble of delivery. The man left on the next train for Bethany without waiting for the machine to be delivered. He next visited the Shroyer store here, and by some smooth talk managed to get thirty-six Edison records on approval, agreeing to pay for those his folks selected. The music house does not yet know how the records appealed to the young man, for he got out of town without delay. It is stated that the Shroyer Music House will adopt a definite policy of letting no records go out on approval in the future.

SEMI-PERMANENT NEEDLE POPULAR

Vallorbes Jewel Co. Make Enthusiastic Report Regarding Latest Addition to Their Line—Export Demand Steadily on the Increase

Lancaster, Pa., April 4—The Vallorbes Jewel Co. of this city report that their new semi-permanent needle is growing in popularity by leaps and bounds not only throughout the United States but in Canada and other countries as well. W. F. Meisly, president of the company, reports that although they are just about finishing taking care of the large number of initial inquiries, recorders are coming in fast for large quantities.

The original card that was announced to the trade has been improved in design and is printed in three different colors so as to differentiate between the three tones in which the needle is made—soft, medium and loud. Mr. Meisly announces that they might use an adaptation of a familiar phrase and say, "We couldn't improve the needle so we improved the card."

Ault & Miller, who handle the Edison line in Fort Collins, Colo., are making a great drive on bringing the merits of the Edison record to the attention of the purchasing public.

CHICAGO, ILL.
The Unequaled Selling Features of the AEOLIAN-VOCALION

On the three pages following we are showing specimen advertisements from the strong campaign of Vocalion publicity carried on in the national magazines and newspapers of the leading cities.

These advertisements emphasize two of the many impressive features of the Aeolian-Vocalion.

No phonograph made to-day is so easy to sell as the Aeolian-Vocalion, disposes so readily of competition, brings so good a class of patronage to a merchant, or reflects more prestige on his store.

This one point alone; the Vocalion's ability to play all records, is already coming to be recognized as of vital importance. Moreover, the Vocalion's method of doing this—the remarkably effective tone-arm, which makes it possible to shift from "lateral" to "hill and dale" records by a single turn of the reproducer—gives the Vocalion a notable advantage over other phonographs.

Vocalion representation is the most valuable franchise the phonograph dealer or progressive merchant can secure. This is not alone because this great phonograph is demonstrably the finest instrument made, but because of Aeolian methods of doing business.

The unparalleled character and excellence of Aeolian service, which has recently been still further augmented by the establishment of convenient distributing points in different parts of the country, is proverbial in the music trade. Added to this service is the well-known Aeolian policy of fairness and courtesy in business dealings which make the representation of this house one of the most satisfactory connections offered in the business world.
The Music of the Entire World Is Yours
If You Own the

AEOLIAN-VOCALION

The owner of an Aeolian-Vocalion is not confined to one, or at most two, groups of artists. Every artist, every instrumentalist, every entertainer, every orchestra and band that has made a record, has made it for him to hear and to enjoy.

No matter what the make of record, no matter by what system it is produced—so-called "hill and dale" or "lateral" cut—the Aeolian-Vocalion will play it and play it better than it can be heard from any other phonograph.

Did the Aeolian-Vocalion possess no other advantage; were it only the equal of other phonographs in other respects, this ability to play all makes of records would make it the most desirable phonograph to own.

No single manufacturer, nor any two manufacturers, controls the musical talent of the world. The phonograph field is constantly broadening; new artists are appearing, and the phonograph owner who is in a position to enjoy them all commands the situation.

But the Aeolian-Vocalion is not merely the equal of the best phonographs of other makes. It is absolutely supreme and alone among all such instruments.

The tone of the Aeolian-Vocalion has been scientifically demonstrated to be far nearer that of any instrument or voice it reproduces, than has hitherto been possible in phonographic reproduction.

The tone-controller of the Aeolian-Vocalion—the celebrated "Graduala"—is the first and only effective and artistic means devised for modulating phonographic tone without muffling it or changing its character.

The cases of the Aeolian-Vocalion represent the first serious effort on the part of phonograph manufacturers to fit this instrument to take its place among the other furnishings of the modern home. The simplicity of Vocalion case-designs, the depth and richness of its case woods, are notable in their contrast to what has hitherto been typical of phonographs.

Other features of the Aeolian-Vocalion—mechanical features such as its automatic stop—represent equal progress.

From every standpoint this great phonograph, made by the world's most progressive and largest builders of musical instruments, offers the utmost in musical value, in pleasure and entertainment and in architectural beauty, that the expenditure of any sum of money in such an instrument can procure.

Vocalion Prices: Conventional Models, $45 to $375
Sixteen Beautiful Period Styles, from $215 to $650

THE AEOLIAN COMPANY
AEOLIAN HALL, NEW YORK
PERIOD STYLE VOCALIONS

THE introduction of these superbly
cased instruments represents the
third great achievement of the Aeolian
Company in developing the phonograph.

First—this Company produced the most
musical phonograph that has ever been heard.

Second—in the Gradua expression attach-
ment it provided the only satisfactory and
artistic means for controlling the phonograph's
tone yet devised.

Third—The Aeolian Company, the first to
depart from the conventional lines in designing
Art Style Phonographs, now presents this supe-
rior phonograph in a wide variety of Period
Cases that are in line with the finest furniture
designing of the present day and that in price
are within the reach of almost every phono-
graph purchaser.

HARMONY IN HOME FURNISHING

In selecting furniture for even the
moderate home the purchaser is now
enabled to secure a harmony of effect
that in the past was available only to the
wealthy. The Aeolian Company has
recognized this condition and has taken
steps to meet it. The superb group of
Period Style Vocalions here announced
is its response to the growing popular
demand for phonographs of reasonable
price that will harmonize with the finest
modern furniture. Like the best exam-
pies of furniture of today, these Period
Vocalions have their origin in the rich
traditions of the historic past. Further-
more, they are thoroughly adapted to the
practical needs of the present, mak-
ing them a true product of this age as
well as beautiful illustrations of the art
of the cabinet-maker of ages past.

These Period models introduce motifs
ranging from Gothic and Jacobean
through Queen Anne, Chippendale
and others, to our own American Duncan
Phyfe.

SUPERIORITY OF
THE AEOLIAN-VOCALION

The Aeolian-Vocalion is now recog-
nized as the leading phonograph upon
the market.

Its positive superiority of cases, as
manifested both in the new Period Styles
and in the many conventional models
in which it is made, is but one of its
striking advantages.

The Aeolian-Vocalion's supremacy
extends to Tone, Tone-Control, Ability to
Play All Records, Appearance, and Auxi-
liary Features.

Vocalion Prices are—Conventional Models, $45 to $375
With Gradua of $110, Period Models from $215 to $650
Sold on Moderate Down Payments and Most Liberal Terms

THE AEOLIAN COMPANY
AEOLIAN HALL, NEW YORK
HOW CLEVELAND TRADE PLANS TO HELP UNCLE SAM'S BOYS

Entertainment First Week of May for Y. M. C. A. and K. of C. Funds—President Bennett Appoints Association Committees—Helping Liberty Bond Campaign—Attractive Window Displays

CLEVELAND, O., April 9—The Talking Machine Dealers’ Association of Northern Ohio is going to give a big benefit performance and concert in some local theatre or armory during the first week of May, and the net proceeds will go to the Y. M. C. A. and Knights of Columbus. Singers whose voices are reproduced by talking machine records will be asked to cooperate in making the benefit a success. If Keith’s Big Hippodrome can be obtained it will be used, as it is the largest theatre in the Middle West.

At the March monthly meeting of the association Charles K. Bennett, president, appointed the following committee to arrange for the benefit: W. G. Bowle, chairman; L. Meier, of L. Meier & Sons; A. W. Roos, manager of the Columbus Graphophone Co.; J. F. Scharner, music department manager; L. W. Bloom, secretary of the Phonograph Co.; Richard Sybel, a West Twenty-fifth street dealer in musical instruments, and A. L. Marsh, of the Marcro Piano Co.

At the April meeting of the association plans will be made for the discussion and the arrangement committee will report progress.

Mr. Bennett is very enthusiastic over the prospects of a big benefit and thinks that the appearance of several musical stars from Chicago, through Victor, Pathé, Edison, Columbia and other records will insure a big attendance and make a goodly sum for the Knights of Columbus and the Y. M. C. A. The proceeds will be split fifty-fifty with these two organizations which are doing so much to make camp life of soldiers a pleasant existence.

During the March meeting, which was held at Schuster’s Cafe, trade conditions were variously discussed. There were twenty-four members present. Audiences of two more members were received.

Mr. Bennett announced the following standing committees for the association for 1918: Executive—L. W. Bloom, secretary of the Phonograph Co.; chairman; L. Meier, of L. Meier & Sons Co.; Herman Wolfe, president of the Wolfe Music Co.; T. A. Davis, manager of the piano department of the Bailey Co.’s department store, and J. O. Raeder, secretary-treasurer of the Caldwell Piano Co.

Grievance—W. G. Bowle, chairman; Richard Sybel, dealer in musical instruments, and R. A. Friedlander, manager of the Diamond Disc Co.

The presence of several piano dealers who are the active members of the association, gave assurances of hearty support to the organization during the year.

Mr. Bennett and others said transportation conditions are still bad. “We are not getting stock,” said Mr. Bennett. “A consignment of stock from the Victor factory, Camden, N. J., started for Cleveland February 2, had not been heard from March 21. At that date we had received no machines started during March. It is expensive business getting machines by express, and the transportation charges eat up profits. Of course, needles and records can be sent by parcel post, as they are not so bulky as machines.”

After the meeting Mr. Bennett left for a vacation trip to New York, Atlantic City and other places, from which he has just returned.

Talking machine dealers of the Cleveland Association are staging some unusual activities for the third Liberty Bond sale campaign, which opened April 6. Cleveland has always “gone over the top” in its war subscriptions, whether for the Red Cross, "Y" or Liberty Bonds and War Stamps, and during the “Liberty Day” celebration, April 6, piano dealers took the machine men will play an important role. Music will be a big lever in the campaign, and no means will be spared by talking machine men to do their bit in putting over the third Liberty Loan.

Cleveland is the home of the nation’s Sec.-

retary of War and his assistant, also the National Fuel Administrator, Harry A. Garfield, Christian Girl, head of the motor truck department of the war commissary, and other “dollar-a-year men” now serving their country in Washington.

For this reason Cleveland will have a big wave of patriotism April 6 and launch the third loan with a series of parties and other demonstrations in which music of all kinds will play an important role.

Eastertide found talking machine dealers all set for the event. Many effective window displays attracted attention to stores. The Colburn & Sayles Co., Victor dealers, put on a fine show window arrangement, as did the Wolfe Music Co. The Eclipse Musical Co., Victor distributors, went the limit with a display in the company’s retail store, Euclid avenue, that won high praise.

The B. Dreher’s Sons Co. also had a fine display of machines. The Caldwell Piano Co., the "Harmony Music Shoppe" of the Hart Piano Co., and other well-known concerns displayed machines, player-pianos, music rolls, records and other seasonable stock. Easter found Cleveland in an optimistic mood, the weather having moderated, making "glad rags" appropriate for the "joys season." All the churches had extra musical programs and "music was in the air."

Among the latest hits in talking machine records in Cleveland are:

Columbia—"As Revoir, But Not Good-bye. Soldier Boy," by Henry Burr; "There’s a Serv- ice Flag Flying at Our House," by the Sterling Trio; Charles Harrison’s "Lili Liza Jane;" Marconi Brothers’ "It’s a Long Way to Ber- lin."

Stars—"When the Bell in the Lighthouse Rings," by Frederick Martin; "Oh, Promise Me," by Chester W. Smith; "Drink to Me Only With Thine Eyes," by Albert Winearz; "Vul- can’s Song," by Frederick Martin.

Pathé—"In the Land of Wedding Bells," by Campbell and Burr; "Are You From Heaven?" by Irving Gilliette; "Liberty Bell," by the Peer- less Quartet; "Love and Life in Holland," by the Imperial Symphony Orchestra.

"When the Boys From Dixie Eat the Melon on the Rhine," "I’m Writing to You, Sammy," "American Through and Through" and "There’s a Service Flag Flying at Our House"—these are among the newest patriotic hits of the past few days.

ISSUE WEEKLY RECORD BULLETINS

Standard Talking Machine Co. Urges Dealers to Push Selected List of Victor Records, All of Which Are Now Obtainable

PITTSBURGH, Pa., April 2—The Standard Talk- ing Machine Co., in connection with their serv- ice department for dealers, have issued a series of new weekly bulletins for the use of retailers, listing from twenty to twenty-five of the most desirable records in regular form, with the names of the selections, the artists who make them, size and price. It is urged that the dealers during the week call the particular atten- tion of the customers to these selected lists of records, all of which the Standard Co. have in stock before the bulletin is issued. Up-to- date the plan has proven most successful, and has stimulated the sale of a number of records that usually would rest on the dealer’s shelves, and likewise has compensated in some measure for the dearth of some of the more popular se-

OCCUPYING NEW QUARTERS

The Glendale Phonograph & Piano Co., Glen- dale, Cal., is now located in attractive new quar- ters at 323 Grand Boulevard, that city. The company features the Baldwin pianos in addition to phonographs and musical merchandise. Two soundproof booths have been installed.

To the Talking Machine Man Who
Is Not Selling Pianos—Why?

When Piano Dealers started to sell Talking Machines with so much success, did they do so at the expense of their piano business? NO—the combination proved to be an instantaneous success—each has helped the other.

Your business, selling talking machines only, is probably as big as an exclusive business as you can make it. Why not branch out? You can do with Pianos what the piano man did with Talking Machines.

With little additional investment and the same overhead expense, you can sell Pianos and Player Pianos profitably. Your piano business will help your talking machine business, and you will make more money. For particulars address KOHLER & CAMPBELL, Inc.

11th Avenue and 50th Street
NEW YORK CITY

The most successful manufacturers of Pianos, Player Pianos and Grand Pianos in America.
TRADE ACTIVE IN THE NORTHWEST

Scarcity of Stock a Serious Problem—Hedman Tells of Prosperity With Farmers—L. H. Lucker Tells of Conditions—Other News

St. Paul and Minneapolis, Minn., April 4.—The business situation in St. Paul and Minneapolis is just what it was last month, the month before, six months ago and a year ago. Dealers, whether retailing or jobbing, simply are unable to supply machines as they are desired and no one has any idea as to the proportions the Victorola trade, for instance, could assume in this territory if the machines were obtainable as freely as desired. W. J. Dyer & Bro. are buried in urgent appeals for instruments not only from dealers in their territory, but often from houses at a distance. The Beckwith-O'Neill Co. has discontinued sending its representatives to the Twin city trade because there is nothing to offer except apologies and excuses. It is not easy to discourage such confirmed optimists as E. F. O'Neill and George Mairs, but they have to be content in view of conditions.

South Dakota farmers never were so busy as they have been this spring, declares E. W. Hedman, traveler for the Columbia Graphophone Co. There is a greater acreage of grain than the State ever saw before, and if the Lord will aid occasionally they promise to give Uncle Sam the greatest supply of grain that ever came from that State. Other travelers bring the same hopeful reports, and with a March increase of between 60 and 70 per cent. in the volume business as between 1917 and 1918 Manager Sprague sees a chance to win another silver tank and some laurels. J. W. Hayes, local scout for the Columbia Co., is credited with some record business in Minneapolis and St. Paul. The company plans to restrict the number of dealers in the Twin Cities by centering their efforts with the strong accounts.

F. S. Binger, chief assistant auditor of the parent company, left last week for the East after working here about a month. He was accompanied by Richard Grant, who leaves the Columbia Co. on his arrival in New York to become a rookie at Camp Mills, and get a blue star in the Columbia flag. The appointment of R. C. Tanner as chief clerk at the Minneapolis headquarters office is announced by Manager Sprague.

Officials of the Minnesota Phonograph Co., jobbers of Edison phonographs, feel in some what complacent mood, although the Twin City retail trade hardly is up to expectations. Recent arrivals of carloads and other shipments of instruments and records have pleased the company in a position to supply the wants of the large growing circle of dealers. Manager Laurence H. Lucker was in a sorry position some months ago, but the trade skies are much brighter now that he can command the goods.

Minneapolis and St. Paul newspapers are carrying the want ads of the Brunswick-Balke-Col- lender Co. for rubbers and finishers at the Dubuque, la., factory. The Brunswick business is excellent, particularly in Minneapolis, where the Brunswicks are handled by Bourell Bros., big furniture dealers, and the exclusive Brunswick shop of Nye & Nye, who are housed in one of the most artistic talking machine shops in the Northwest. E. L. Kern, one of the directors of the company, is head of the Northwestern organization.

Pathe phonographs and records continue to be distributed on a generous scale by the G. Sommers Co., which has a most wonderful and extensive organization. Jay H. Wheeler, head of the phonograph department, is a veteran in the business, and is understood to be making a distinct mark with the house.

Sewell D. Andrews, who looks after the interests of the Sonora phonograph in the Northwest, is out of town for the time being, but it is stated that the business is on a satisfactory basis with a goodly increase as a result of the Sonora concert on in Minneapolis in January.

EDISON WINDOW DISPLAYS DESIGNED

Thos. A. Edison, Inc., Prepares a Number of Suggestions for Window Trims for Retailers—The Basic Principles Illustrated

Realizing that many more Edison dealers would show attractive windows if they fully understood some of the basic principles of window display, the advertising department of Thomas A. Edison, Inc., have devised a number of appropriate displays which a dealer can place in his window at very slight cost.

In the above sketch originality and good taste have joined forces to present the idea of music’s re-creation so convincingly that all who pass must pause and consider. Characteristic spring colors of green, yellow and light gray are used. The background is made by hanging green denim at the sides and back of the window. The New Edison is well represented in light gray and yellow, says: “Come in and hear re-creations of the world’s best music on the New Edison.” As refreshing as the first signs of spring,” the poster below tells you. Here the cardboard is of light gray and the lettering of yellow. A third and smaller sign to the right might announce recitals. As a final argument pictures of famous artists singing with their Edison Re-Creations are grouped at either side of the poster.

HAS OBJECTIONABLE FEATURES

Cary Bill, Taxing Dealers Doing Business on Installments, Excites Countrywide Opposition
—J. N. Blackman Gives His Views

The National Association of Talking Machine Jobbers is keenly interested in the Cary bill now before Congress, which provides for a license of $200 per year for all merchants selling goods on installments, and which includes a number of decidedly objectionable features. The bill was introduced by Congressman Cary, of Wisconsin, and, although it applies only to the District of Columbia, the measure is exciting countrywide opposition.

Action by the Jobbers’ Association on this bill was referred to its legislative committee, and in the meantime J. Newcomb Blackman, president of the association, has taken up the matter by correspondence with Washington, and the legislative committee is planning to take any action that is deemed advisable.

Mr. Blackman thinks that this bill is decidedly illegal to the best interests of the country, and that because of its serious faults it will practically defeat itself. Mr. Blackman points out that the bill will not regulate installment business, but will tend to annihilate it, as it contains features that will make it practically impossible for an installment house to do business.

VIGILANCE COMMITTEE IS ACTIVE

Issues Bulletin Regarding Operations of “Gyp” Dealer in Chicago and Is Co-operating With Music Industries Better Business Bureau

The National Vigilance Committee of the Associated Advertising Clubs of the World has entered the fight against “gyp” dealers in musical instruments who use the classified columns of newspapers to dispose of instruments from residences under claims that are generally questionable. The committee has gone so far as to issue a bulletin regarding the advertising of R. Nordin, appearing in the Chicago papers over that name, and also over the name of A. Nordin, F. Nordin, B. Nordin, etc.

Nordin’s specialty was advertising “My beautiful $150 Victrola size phonograph and records, guaranteed ten years. Will accept $60. Used only ten weeks. Wonderful bargain, etc.” The Vigilance Committee declares that the name Victrola is misleading, and that Nordin handles another make of phonographs. An advertising agency is also mixed up in the case, having placed the advertising for Nordin.

The Vigilance Committee is working in cooperation with the Music Industries Better Business Bureau, and bulletins covering other transactions will soon be issued.

THE TALKING MACHINE WORLD

Mc Cormack’s San Francisco Concert Realizes $24,700

Famous Irish Tenor Scores Phenomenal Success in Concert for American Red Cross—Sherman, Clay & Co. Operate in Generous Way—Entire Affair Splendid Evidence of Patriotism

San Francisco, Cal., April 4—Local talking machine and music circles are still agog over the recent sensational appearance of John McCormack, the famous Irish tenor, in this city. Mr. McCormack’s appearance in the interests of the American Red Cross served to enrich the funds to the extent of $24,700. The admittance fees—the place was filled—totaled close to $20,000, and Tom Skeffih, the brought $550 from J. J. Tytian, while Mayor Rolph paid $250 for “I Hear You Calling Me.” Mrs. S. S. Maynard paid an even $500 for the “Long, Long Trail,” and Mrs. E. J. Knight paid a like amount for the Berceuse from "Jesu, Joy of Man’s Desiring." Skeffih auctioned the records off until his voice failed him and he was led from the platform in a storm of cheers.

McCormack sang an impressive pathos and beauty into “Mother Machree,” which came as an encore. “Has Sorrow Touched Your Young Days Faded” brought tears to the eyes of many, and it is no exaggeration to say that the rafters rang with the applause which greeted the noble “God Be With Our Boys Tonight!” The program was well-balanced, with tender Irish airs and songs of the more musical type.

San Francisco has established a record for the McCormack tour. The sale of records exceeded that of any other city. Cleveland is second with a record sale of $3,500.

The records by McCormack which were auctioned off by Skeffih were donated by Sherman, Clay & Co., well-known Victor whole-salers, of this city, who did their full share in making the concert a success, and incidentally arranged a most elaborate and attractive McCormack window to their store to mark the event. In the window display was a life-size figure of McCormack, as the centerpiece, which is shown herewith. The entire affair proved how patriotic are San Franciscans.

Assistant District Attorney Goldstein Planning to Prosecute Those Who Offer to “Sacrifice” Talking Machines at Prices in Excess of Real Values—Busy in Harlem District

As was prophesied some time ago, “gyp” dealers in musical instruments, and particularly talking machines, have been quick to take advantage of conditions brought about by the draft, and the sudden calling of young men from their homes and occupations. Dealers have been particularly active in the upper section of New York City, and the newspapers are quite full of announcements of machines and records offered at a “sacrifice, owing to the fact that the owner has been called to the colors and must dispose of his effects.” Assistant District Attorney Goldstein has taken cognizance of the activities of “gyp” dealers, and is investigating their operations. He threatens that when sufficient proof is forthcoming he will take immediate action to stop their activities.

Investigators in one instance, lured by the announcement that a $300 model machine and library of records, little used, could be purchased for $50 from a young man uptown, “found that not only could the machine on exhibition in the front room of the apartment be purchased at the special price, at least 50 percent, more than it was worth, but there were a dozen or more machines in the adjoining room ready to be moved in and ‘sac- rificed’ one at a time.

Mr. Goldstein urges that dealers, or individuals, who obtain proof of fraud in the operation of “gyp” dealers, communicate with him that he may take legal action. It may also be said that dealers in other cities who run against “gyp” operations can secure action by reporting the same to the Music Industries Better Business Bureau in Milwaukee, who are co-operating with the National Vigilance Committee of the Advertising Clubs of the World, in an effort to check the evil in all sections of the country.

CHANGES IN PORTLAND STAFFS

Various Talking Machine Men Make New Connections in That City and Vicinity

Portland, Ore., April 3—Many changes have taken place in the employed forces of the talking machine departments of local big music houses in the past month. C. B. Curdine of Eilers Music House, has taken the position of manager of the talking machine department, succeeding to the place formerly held by H. S. Rayner, who is now in ten with the Hopper-Kelly Co. Mr. Curdine is well known and well liked by Portland people. He has long been with the Eilers people. The new manager has started out for a drive for cash sales and has been having remarkable success, due, he believes, to the prosperous condition of the people of Portland.

R. C. Collart, of the Columbia Graphophone Co.’s Portland branch, has gone to San Francisco, where he will take charge of the Columbia branch there.

Henry Schmidt has succeeded Mr. Collart with the Columbia people. Mr. Schmidt, who has been traveling for the Portland branch through the Oregon territory, is considered one of the most efficient officers of the local house.

W. L. LeVanway, Jr., has been placed in charge of the phonograph department of the Graves Music Store. The position was formerly held by I. W. Lane, who has gone to Tulsa, Okla., and is now connected with the Tulsa Automobile Co.

C. V. Jones, traveling salesman of the Portland branch of the Columbia Graphophone Co., has been meeting with big success in the spruce districts of Southwestern Oregon.

H. A. Yerkes, of New York, traveling manager of the Columbia Graphophone Co., enjoyed a trip up the Columbia Highway while here. Mr. Yerkes and his wife were guests of L. D. Heater, manager of the local Columbia branch.

BUFFALO, N. Y.
The Importance of Knowing Both Your Own and Your Competitors' Line :: By Frank D. Parsons

The ideal talking machine salesman is careful to maintain the reputation of his wares. Every instrument has a certain standing and reputation, and it behooves the retail salesman to guard that reputation as carefully as though he himself were the manufacturer. To accomplish this the salesman must know his line thoroughly—must know its good points, its exclusive features, and also its defects, if any there be. In addition to this he must also have a general knowledge of competing lines and their merits and shortcomings. A knowledge of the peculiarities of competing instruments is invaluable to the salesman.

It is human nature for a prospective customer to walk into a talking machine store, and disparage the line of instruments for sale therein, praising the qualities of some other line. This is done, often as not, not because the prospect really believes the other line is better, but because he, the prospect, wants to settle his mind absolutely in regard to the instrument the salesman is showing him, before the sale is consummated. In other words, the prospect wants to convince himself that he is making the best possible purchase, and if the salesman can point out the difference between his products and those being sold by a competitor, and point out these differences so clearly and convincingly that the prospect remembers and believes the salesman's statements, the sale will not only be made, but it will stick.

In doing this, however, the salesman must carefully refrain from "knocking." The verbal hammer of the salesman, pounding against a competitor's line, has spoiled more possible sales than any other single factor. If the prospect praises the tone of a competing line, the salesman should be able to point out the fact that this own line is equal, if not superior, in tone to the instrument being praised by the prospect, and to do this the salesman must know enough about the principles of construction to prove that his line need not take second place when compared with competing instruments. If the prospect is enamored of some special feature of case design in a competing line, the salesman should know enough about case construction to point out the special features embodied in his own instruments, and be able to convince the prospect of the beauty and attractiveness of the wood and the finish, as well as other points which his line possesses.

These and similar arguments can be used most effectively by the salesman, without in any way knocking his competitor, or his competitor's line. The arguments can only be made effective, however, if the salesman has a thorough knowledge of his own line, and knows enough concerning competing lines to talk about them intelligently. The salesman who attempts to sell talking machines without first fortifying himself with a practical knowledge of the instruments he is selling is no surer of success than would a schoolboy be of solving a problem in algebra without first having committed to memory the multiplication table.

RECEIVING CONGRATULATIONS

G. C. Jell, general manager of the recording laboratories of the Columbia Graphophone Co., New York, is receiving the congratulations of his friends and co-workers upon the arrival at his home a fortnight since of a baby girl, who has been christened Mary Caroline. Miss Jell will doubtless have unlimited opportunities to become an operatic artist, under the guidance of the Columbia recording laboratory manager.

HOLD OPENING OF NEW QUARTERS

The Victoria Music Co., Wilmington, N. C., recently held the opening of their new quarters in the new Theatre Building, at the corner of Second and Market streets. The company features Victrolas and records exclusively.

A HERZOG Cabinet for the Victrola IXA

And we have other cabinets for all talking machines and phonographs. HERZOG Art Record Cabinets are correctly designed, substantially constructed and exceedingly well finished. They stimulate the sale of machines and records. Many are being sold daily to those who already own small machines and the dealer who does not carry a representative stock of HERZOG Record Cabinets is overlooking a prolific source of additional and easy profits.

A handsome new Catalog showing the complete line is just off the press. Ask for a copy of Catalog No. 22 and see the biggest and best line of Art Record Cabinets on the market.

HERZOG ART FURNITURE CO.,
SAGINAW, W. S., MICH.
Good intentions! Honestly, now, do they ever get you anywhere? Put your sales problems up to Columbia Dealer Service Department TODAY. We're only waiting to hear from you.

COLUMBIA DEALERS HOLD MEETING
Lambert Friedl Prepares Many Interesting Subjects for Discussion at Third Monthly Gathering of Columbia Retail Dealers

The third monthly meeting of Columbia dealers was held last month in the auditorium of the Columbia Shop, and a representative gathering of Columbia retailers was on hand to participate in the various business discussions that constituted the program. Lambert Friedl, manager of the local wholesale branch of the Columbia Graphophone Co., who inaugurated these meetings, prepared for the dealers a number of interesting topics that were subject of serious discussion, the principal topic being the new Columbia records, which will be issued on April 10.

Ralph W. Knox, advertising manager of the

Columbia Retailers Who Attended Recent Monthly Meeting

They give the dealers an opportunity to get together and talk over common business problems, and under Mr. Friedl’s direction every possible effort is made to cooperate with the dealers and carry out their suggestions along practical lines.

BEAUTIFULLY EQUIPPED QUARTERS
Now Occupied by the Outlet Co., Which Celebrates Its Eighteenth Anniversary

PROVIDENCE, R. I., April 3—The Victrola department of the Outlet Co., of this city, recently celebrated its eighteenth anniversary, and Manager Harold A. Glasser, who for a long time was identified with the Victor trade in New York City, has been receiving congratulations on the success of this enterprise, which is the largest Victor establishment in the State of Rhode Island.

In the new talking machine department, which is located on the third floor of the monster Outlet building, there are eighteen soundproof booths, a complete repair shop, a record library, office, and a room devoted especially to the sale of records by telephone. The entire woodwork is finished in antique oak, and the booths are so attractively arranged that the entire department is one of the most imposing and most artistic to be found anywhere in the trade. Mr. Glasser is quite enthusiastic about the trend of business this spring, and is preparing for one of the most satisfactory years in the history of this house.

NEW PAMPHLET ON DECALCOMANIE

Containing Samples of New Name Plates for Talking Machines by Smith-Schifflin Co.

The Smith-Schifflin Co., manufacturers of “Magnet” decalcomanie name plates, are finding the demands for their product to be greatly on the increase, so states Geo. A. Smith, of the firm. Since the first of the year the calls for samples and the return orders from dealers have been very heavy, and this, with the addition of a substantial demand from the manufacturing trade, has kept the company working to capacity. A new pamphlet is now being sent out to the trade containing facsimile illustrations of name plates together with price quotations.

PORTLAND, ORE., ASSOCIATION MEETS

Many Interesting Business Questions Discussed
-Urged That Terms Be Held Up to Good Standard—Condemn Approval Practice

PORTLAND, Ore., April 2—The monthly meeting and banquet of the recently organized Portland Dealers’ Talking Machine Association, held at the Imperial Hotel, April 1, did much to cement business relations between the dealers in this city and to wipe out unfair methods of competition. Following a delightful banquet, E. B. Hyatt, president of the association, presented the twenty-one members to order and an interesting session was held in which many things of interest to the local trade were discussed.

Mr. W. H. Heeter, manager of the Columbia Graphophone Co., and James Loder, manager of the talking machine department of the Bush & Lane Co., called particular attention to the necessity of keeping terms up to a dignified and businesslike standard—to put the goods before the public and sell them in a legitimate way. It was decided that the firms should all require payment of 10 per cent down and require the contract to be paid up within one year.

Taylor C. White, manager of the talking machine department of Sherman, Clay & Co., and L. D. Heeter started a discussion in regard to sending out records on approval. The practice was generally condemned, the speakers maintaining that the public abused the confidence of the dealers in this way and injured the records. There were a few present, however, who thought that better business could be obtained by the old method of allowing customers the privilege of taking records home to make their selections in that way.

Attention was called to the fact that there were dealers who were offering records free with higher-priced machines as a means of developing trade. Stress was laid on Portland’s present prosperity and the needlessness of this method of getting business, and the dealers all finally agreed to discontinue any such practice. It was decided that the records henceforth should all be sold separately. Almost all the houses have been following this course of separate sales.

The best of feeling was exhibited at the meeting, despite wide variance of opinion on some of the methods of getting business, and there is no doubt that the association has co-ordinated the business, and that the firms are now on the best of terms with each other and are disposed to help one another. whereas before the association was formed each firm was out for itself to the detriment of the talking machine business as a whole.

The representative of The Talking Machine World was elected to honorary membership in its association.

MAURICE LANDAY GETS ACTION

Proves Right Man as Advertising Manager of “The Range Finder,” Issued by His Artillery Regiment Now Stationed at Fort Hancock

Maurice Landay, brother of Max and James Landay, of Landay Bros., local Victor wholesalers, is a private in Battery E, Fifty-seventh Artillery, C. A. C., at present stationed at Fort Hancock, N. J., and incidentally fills in his spare time as advertising manager of “The Range Finder,” a snappy publication gotten out by the regiment at onlooker intervals. The magazine is full of clever cartoons, excellent jokes and interesting articles regarding army life and happenings at the fort.

Mr. Landay has shown convincing proof of his ability as advertising manager by lining up several pages of good business for the publication, and many of the talking machine jobbers having taken liberal space.

The regular quarterly dividend has been declared by the Victor Talking Machine Co. on both common and preferred stocks, payable April 15 to holders of record March 31.

SHOW FILMS OF VICTOR PLANT

Talking Machine Dealers in Pittsburgh See Motion Pictures Showing How Victrolas and Records Are Manufactured—Large Attendance

PITTSBURGH, Pa., April 10.—A large number of talking machine dealers in the local territory, as well as a generous sprinkling of the public at large, had the opportunity last night of seeing by means of motion pictures just how talking machine records are made in the factory of the Victor Talking Machine Co. The film, which has been shown in various sections of the country, was made under the direct auspices of the Victor Talking Machine Co., and its showing in this city was arranged for by the Pittsburgh Talking Machine Dealers’ Association.

The exhibition was held in the auditorium of the Chamber of Commerce, and officers of the association made special efforts to secure a large attendance, particularly of dealers and their employees. The general results were most gratifying.

COMES HOME FROM THE WAR

Louis Oldier, of Portland, Ore., Honorably Discharged From Canadian Service

PORTLAND, Ore., April 2.—Portland boasts one veteran of the great European war among its talking machine men—Louis Oldier, recently Private Louis Oldier, of the First Depot Battalion, Vancouver, B. C. Mr. Oldier prior to the war was known as the pace-maker and enthusiastic of the Columbia Graphophone Co.’s Portland branch. He has now returned to Portland and has resumed his duties with the Columbia people.

Mr. Oldier obtained an honorable discharge after serving seven months in Canada and Scotland. He enlisted and was assigned to the forestry division and was in Scotland when he was kiled by a horse, the accident incapacitating him further duty war—a broken ankle and stiff knee being the regrettable result of the accident.

OPEN NEW BRANCH IN ROME, N. Y.

Buckingham & Moak, well-known piano and talking machine dealers of Utica, N. Y., have opened a new store at 120 West Dominick street, Rome, N. Y., where in addition to pianos and other musical goods they will feature the Vocalon phonograph.

AN ATTRACTIVE ESTABLISHMENT

Odeon Music Co. Handling Brunswick Phonographs in New Brunswick, N. J.

New Brunswick, N. J., April 3.—The Odeon Music Co., 28 Liberty street, this city, has a most attractive establishment for the sale of all kinds of musical instruments, including pianos, player pianos, Brunswick phonographs, as well as music rolls and sheet music. The company, of which D. E. Ehner is president, and J. C. Cramer is manager, have installed three sound-proof demonstrating booths in their phonograph department and have equipped them in an elaborate manner with rugs, comfortable furniture, decorative plants, etc., and report an excellent business.

Miller & Kades of Harrisonburg, Pa., have recently installed six soundproof booths costing $6,000. This firm is the sole distributor of the Columbia line in that district and reports an increase of 80 per cent, in business last year.

THE TALKING MACHINE WORLD

PHENOMENAL MONTH'S BUSINESS IN PORTLAND, ORE.

Leading Houses Make Most Encouraging Reports Regarding Business, But Complain of Shortage of Machines and Records—Fine Spirit of Optimism Prevails Throughout the Trade

PORTLAND, Ore., April 2—Talking machine dealers in Portland report spring business of such volume as never before experienced in this district. March sales eclipsed all marks, both for machines and records, and the only real complaint heard among the dealers is regarding transportation conditions and shortage of stock.

So heavy has the demand for Victrolas been in Portland that a actual shortage exists and many dealers have lost sales through inability to deliver desired models.

The Wiley B. Allen Co., of Portland, followed its February business, which was 100 per cent. increase over that of February, 1917, by making even a better record for March, the figures for the latter month being even greater than that of the big San Francisco house. Shortage of stock alone prevented Wiley B. Allen from breaking all existing records at the Portland branch. In spite of this Paul B. Norris's reports a wonderful sale of Victor and Edison machines and the rapidly diminishing stock testifies to the fact. Hopes are entertained for an early arrival of new machines and Mr. Norris says unless more stock is soon forthcoming there will be a big falling off in business.

Sales continue large at the Hyatt Talking Machine Co. store. E. B. Hyatt, manager of the firm, says trouble has been experienced in getting Victrolas, especially models Nos. 14 and 16. In one week 250 "Talking Arc" records were disposed of by this house and 150 more have been ordered. A big new consignment of Edison records has just arrived and Miss Emma Reynolds, who has charge of the record department, says they are an unusually fine lot. Mr. Hyatt says the demand for Columbia machines keeps up well and this is especially pleasing inasmuch as the Columbias are much more easily obtained than are the other lines.

February and March were the biggest months ever experienced by the Portland branch of the Columbia Graphophone Co. L. D. Heater, manager of the house, says that he had thought December, 1917, would be for a long time be un paralleled, but February showed 2000 miles records sold than in December, and March even more than in February. Columbia machines have been finding a greater sale than ever before, too, and this is in part attributed to the fact that a great deal of the competition has been removed because of shortage of stock in the Victor and Edison lines. Mr. Heater, however, says that there is little hope of escaping a real shortage of Columbia machines because of the ever-increasing demand and railroad conditions which prevent the arrival of enough machines to supply this demand. The Columbia Co. has heretofore always been able to supply all retail houses, but Mr. Heater says before long customers will have to wait.

So great has been the increase of business in the Dictaphone department of this company that it has been found necessary to buy an additional truck to speed the delivery. L. C. Callahan, manager of the Columbia Dictaphone department, says that the trade for February and March has never been equaled in Portland. Sonora machines have been finding a ready sale at the Bush & Lane house. Patrick Murphy has been making some big deals, one $375 Sonora invincible bringing a goodly list of sales for the last month. Mr. Murphy also disposed of a big line of Victrolas in the last month. James Loder, manager of the department, declares that the high-priced Sonoras and Victors are the favorites in Portland and he says if present indications are to be trusted the month of April will be a memorable one for the department.

Excellent results have been obtained in the Victrola department of the G. F. Johnson Music Co.'s store. The firm is now well established in business and though it has only been in operation five months, a growing list of customers attest to the fine management and the excell ent character of the house. A lack of Victrolas and records interferes with some sales, but Mr. Johnson says freight is slowly delivering long-billed orders and a fine spring trade is regarded as certain.

The Meier & Frank Co. received a big shipment of Edison records which have been on the way for some time and a good supply of Edison machines is still in stock at this big house. Large sales of Edisons are reported, the $100 and $150 models being the best sellers. The house reports a shortage of Victor records and machines and therefore curtailed sales of these instruments for which the demand continues strong. Miss Madeline Larsen, saleswoman in this department, says there is a good stock of Columbia records and machines and that sales of these goods have been heavy.

The Wakefield Music Co. reports big sales of Brunswick phonographs. Several machines a day has been the record for the last month or so and Miss Hazel Raymond, in charge of the record department, says that never has the demand for records been so great.

The Reed-French Piano Co. has been having a fine trade in Columbia and Edison machines and the spring business is said to eclipse all previous marks at this store.

The Edwards Furniture Co. is congratulating itself on the receipt of a shipment of forty-seven Unolas from Chicago, which were on the road only twenty-one days. A big shipment of Brunswicks was also received by this house, which reports ready sales. J. E. Allen, manager of the talking machine department, says he is finding it increasingly difficult to procure enough sales people to look after the business which has been constantly expanding.

The Cop Music Shop of South Bend, Ind., Victor dealers, are planning to enlarge their establishment.

HALLET & DAVIS START CAMPAIGN

Famous Boston Institution Arrange for Active Development of Their Pathé Business With R. O. Ainslie as Manager—Affair Started With Dinner and Business Meeting.

Boston, Mass., April 1.—Toward the middle of March, the Hallet & Davis Co. started on a campaign by way of booming the Pathé line of machines, and the program was opened with a dinner at the Hotel Thornecliff which was attended by the officers and managers of the Hallet & Davis Co., and several from New York, including Eugene Widmann, president of the Pathé Co., and James Watters, the secretary of the company. The dinner was followed by a business meeting in the concert room of the Hallet & Davis Co., 146 Boylston street. The purpose of the meeting was to explain the Pathé advertising campaign and to prepare the plans for the distribution of the Pathé line throughout New England. This meeting was presided over by O. A. Card, the Hallet & Davis retail manager, and there were speeches by C. C. Conway, vice-president of the company; Secretary Watters, President Widmann and R. O. Ainslie, who has come from the West to take the management of this new Pathé line for the Hallet & Davis house.

The advertising campaign was begun in one of the Boston newspapers on the following Sunday, and the local house began at the same time to establish many new Pathé dealers both in Boston and in New England, and one road-man has been kept busy nothing else but visiting those who are anxious to take on this line of talking machine. In the meantime the retail business has been very large this past fortnight, and it has been necessary to increase the floor salesmen to take care of customers who have been flocking to the store both day and night, for the Boylston street warehouses have been open every evening since the campaign was on. In the delivery of goods it is a fact that the vans and trucks have been busy almost to maddening each day since the campaign was opened it has been gathering momentum and the success of the present Pathé campaign is now an assured success. The Hallet & Davis dealers everywhere have been heartily co-operating with the home offices and this has meant a lot in creating popularity for these machines.

Mr. Ainslie, the new manager, is a Williams college graduate, and has had some valuable experience in the commercial world, and therefore comes to the Hallet & Davis house well fitted for taking up this new work. He says that the whole phonograph business among the Hallet & Davis dealers all over the country is going way ahead of all expectations and the roadmen are putting in a lot of extra effort on this department of the business and are sending in large-sized orders for Pathéphones and Pathé records every day.

HEAVY LOSS CAUSED BY FIRE

Many Machines and Records Destroyed in Store of W. F. Frederick Co., in Johnstown, Pa.—Planning to Open New Quarters

Johnstown, Pa., March 30.—The building occupied by the local retail warehouses of the W. F. Frederick Piano Co. was completely gutted by fire on March 17. The entire loss to the stock of the Frederick Co. totaled over $60,000, and in addition to a number of pianos and player-pianos, there were destroyed over seventy-five Victrolas, and over 5,000 records, valued in all at about $15,000.

Pleasing the opening of new retail quarters, the company is now doing business direct from its large warehouse, where, fortunately, there was a considerable reserve stock, and the other stores of the company were also called upon to fill gaps in the stock where possible. The business offices are maintained at 221 Franklin street, a few doors from the burned building, for the convenience of the public, until new quarters are ready.

HEARS OWN VOICE ON VICTROLA

Miss Marion Harris, Victor Artist, Visits Sherman, Clay & Co. in Tacoma, Wash.

TACOMA, Wash., April 1.—While Marion Harris, the well-known concert singer and Victor artist, was in this city recently, in the course of a recital tour, she visited the store of Sherman, Sherman, Harris & Co., and heard and returned. There is a phonograph in the store, and the lady was pleased to hear her own voice on it. Miss Harris has gone through a strenuous schedule, and on the strength of the voice returned to the store for the phonograph. She has returned to New York.

SHOWS NEW VIBRATING HORN

Western Inventor Devises Method for Supplementing Vocal and Instrumental Tones on Records by Special Vibrating Tongues Keyed in Sympathy With Different Tones

Several times recently authorities have claimed that the chief difficulty with the present form of talking machine is that one diaphragm is relied upon to record or reproduce, as the case might be, various instrumental and vocal tones each with its distinct series of vibrations, and that confusion results therefrom to a certain extent. Now comes an inventor from the West, Frederick Lyon, of Fayetteville, Ind., to be exact, with a new talking machine invention designed to separate and emphasize the different vibrations of instruments or voices. Mr. Lyon's invention consists of a specially constructed sound chamber, which in the first place considerably augments the tone and which is equipped with a series of vibrating reeds set in a row and supported by wires, each reed resembling in magnified form the reeds in a harmonica, and keyed to respond in sympathy with certain vibrations. For instance, the rapid vibration of a soprano voice sets one reed in motion and the slower vibration of the basso affects another reed. These supplementary vibrations tend to emphasize the particular tone with which the reed is sympathized, and the effect is remarkable to say the least.

Mr. Lyon had a machine in New York recently for the purpose of demonstrating it before various talking machine interest, and it was well received. A special horn and amplifying sound chamber can be placed in almost any talking machine instead of the ordinary sound chamber. It is of metal and, according to the inventor, can be manufactured accurately at little expense.

A Western concern is now planning to manufacture a new talking machine embodying Mr. Lyon's device.

NOW SETTLED IN NEW STORE

The Peoria Phonograph Co., of which O. F. Zimmerman is the manager, is now located in attractive new quarters on the second floor of the Hippodrome Building in Peoria, III. The company handles both the Edison and Brunswick phonographs, and reports a steadily growing business.

The Bliss Reproducer Will Play All Records

A new superior and scientifically constructed sound box—no mica, rubber or cork used.

Beautiful full, rich tone quality, clear articulation. It individualizes each voice and instrument in the record. Greater volume with lighter needles, thus minimizing wear on records.

A demonstration of the Bliss reproducer means a sale—each sale brings another, for every music lover who hears the Bliss reproducer wants one.

Comparative tests solicited. Write today for dealer proposition.

TALKING MACHINE WORLD

April 15, 1918
CINCINNATI TRADE COMPLAIN OF SHIPPING CONDITIONS

Talk of Revival of River Traffic—All Branches of Trade Enthusiastic Over Business Outlook—Demand for Art Styles Grows—Some Big Orders Being Placed—News of the Month

Cincinnati, O., April 6—Shipping conditions are still rather critical in the Middle West, the trade as a unit finding some outlet for its energy west of Cincinnati, but practically shut off from accommodations in the opposite direction.

Cincinnati just now is giving some attention towards a revival of the river traffic and this will be of benefit to the trade when regular lines have been established. The few steamers which rolled the ice floes of the past winter are unable to handle all freight offerings. One boat, which did not turn a paddle in six years, reached the bottom of the Ohio last Saturday and will be overhauled at a cost of $30,000 and placed in the Cincinnati and Louisville trade. In due time the Government is expected to compel an exchange of freight between rail and river lines which will benefit river communities. Last week talking machine merchants, taking advantage of the new postal regulations, attempted to send small-sized machines through the mails. This resulted in the local facilities being clogged and it also affected first-class mail.

For days the manager of the local branch of the Columbia Graphophone Co. is very enthusiastic over the present outlook, and believes the territory will make a splendid increase over last year. Just last week he engaged of his local branch nearly one hundred new dealers have been established, and an increase in business of nearly 100 per cent. over last year tells the story of the progress that has been made. The month of March just ended is by far the banner month in point of total sales for the Cincinnati branch since it has been established.

Mr. Bright also came to Cincinnati more than a month ago from the general sales department, New York office of the Columbia Co., is still here, and giving valuable assistance to Manager Dawson. And it is largely due to his efficient efforts in handling the details of the Cincinnati branch that "the mill keeps grinding." Curtis L. Lehman, representing the educational department of the Columbia Co.’s executive office, is in this territory visiting the schools in the interest of better music, and for the promotion of Columbia artistic work.

J. D. Bright, who joined the sales force of the local Columbia branch, is making splendid progress. Mr. Bright covers Kentucky territory, and in the last weeks he has had so much road he has opened fifty new accounts.

W. S. Givler, Columbia’s "old stand-by," recently made a very successful trip, including Dayton, Springfield and Columbus. At Columbus he secured one initial order for $15,000 from one of the largest music firms in Central Ohio.

Recent visitors among the Columbia dealers receiving their supplies from the Cincinnati branch were Walter Lewis, of the Lewis Furniture Co. of Huntington, W. Va.; W. F. Higgins, furniture dealer, Richmond, Ky.; C. A. Campbell, of the Campbell Furniture Co., Piqua; F. F. Follis, of Rike-Kumler Co., Dayton; Mr. Rottenberger, of May & Co., Dayton; C. C. Baker, of Columbus, and J. A. Kramer, of the Sterling Jewelry Co., Dayton.

A recent visitor to the local Columbia headquarters was Miss Sylvia Sanderson Fagan, an exclusive. Columbia has such a championship line Miss Fagan has made some recent Columbia records which are very attractive and are having rapid sale throughout the Cincinnati territory. She is a native of Springfield, O.

Manager Byars, of the Vocation department of the Aeolian Co., reports a substantial increase in Vocolian business for March as compared with the same month last year. There were a number of high-priced instruments sold, and a tendency seems to prevail toward the more expensive instruments.

"There has been a shortage in Vocations since Christmas," said Mr. Byars, "but shipments are beginning to arrive from the East again, and there is every reason to believe that we will not be troubled with any further stock shortages."

"The recent advertising of the art styles has stimulated quite an interest in these new period models, and we have every reason to expect that from now on a substantial portion of our Vocolian business will be in the art style models."

The Fritetsch Phonograph Co. is in receipt of its second order from Wilkes & Co., Ltd., Sydney, Australia, which firm is about to establish five branches in that country. This dealer is enthusiastic over the possibilities of the market for the Cincinnati machine. W. Motoone, of Cynthiana, Ky., has taken on the company’s full line for his immediate territory. The Crystola Co. is shipping practically all its output to Western points because of the limited railroad facilities eastward.

HOME FROM 5,000-MILE TRIP

HOUSTON, Tex., March 30—W. P. White, manager of the wholesale Victory department of Thomas Goggan & Bro., this city, is now settled after a 5,000-mile trip throughout the Middle West and Eastern section of the country, calling on Victory wholesalers for the purpose of negotiating the exchange of surplus records.

Mr. White visited jobbers in Washington, Baltimore, Philadelphia, New York, New Haven, Providence, Boston, Pittsburgh, Cleveland, Chicago, St. Louis, and other cities, as well as calling at the factory in Camden, and reports that he was able to dispose of approximately one-fourth of his surplus record stock and was likewise able to obtain about 25 per cent. of records from other jobbers. He considers that the trip, unusual in its way, owing to the expense involved in wartime traveling, proved a very profitable venture, and has enabled Thomas Goggan & Bro. to increase by just so much their ability to take care of dealers’ demands.

Emil E. Steinmetz, general sales manager for the Barron Viciola Co., Superior, Wis., will open a talking machine store in St. Paul.

Patriotic Decalcomanie Emblem

Interesting Novelty Issued by the Globe Decalco- manie Co.—Sending Out New Booklet

The Globe Decalcomanie Co., Jersey City, N. J., have just issued a new novelty patriotic emblem to be placed on store windows, doors or the wind shield of automobiles. It contains the flags of the United States, England and France, with an American shield and the Statue of Liberty placed in the center. The emblems are neat and attractive in appearance and according to a recent statement of the president of the company are becoming popular. The company is sending the emblems out to the trade at the retail price of twenty-five cents, which are followed by quotations for quantities. Under the caption of “You Need Decalcomanie In Your Business,” the above firm is sending out a new folder with illustrations of transfer name plates.

Occupy New Quarters in Denver

DENVER, Colo., April 2—The Swanson & Nolan Supply Co., local distributors and retailers for the Autochrome and Pathe records, formerly located Eighteenth and Curtis streets, have moved to new and larger quarters at 1534 Wel- ton street, which have been remodeled to meet the particular requirements of the company’s business.

What Does STRADIVARA Mean To You?

To some not acquainted with this wonderful machine it simply means a name but it really means much more than the name because it is the symbol of all that is best in tone perfection, containing a sound board of seasoned Norwegian Spruce, a feature not to be found in other machines.

It ALSO MEANS PROFIT TO HUNDREDS OF DEALERS

The steady ever-increasing demand for this superior talking machine is conclusive evidence of its ability to "stand up" by comparison with other machines as the repeat orders received from hundreds of satisfied dealers throughout the land testify.

Are you among the skeptic? Why not ask for our proposition and at least make comparison?

The Stradivara Plays EVERY Kind of Record

Each Stradivara is equipped with the Stradivara Automatic Stop Device.

TRADE REACHES HIGH WATER MARK IN SAN FRANCISCO

Sales Made in First Quarter of 1918 Break All Records—Interested in Galli-Curci Concert—New Brunswick Agencies—Sonnor Shop Expands—General News of the Month

SAN FRANCISCO, CAL., April 2.—Business in talking machines continues to grow from month to month despite the war and the consequent cutting down of the factory output. March was one of the best months ever enjoyed by the trade, and this in the face of the fact that during the last week there was a falling off in the rush of business earlier in the month, due without doubt to the concentration of the attention of the people on the Russian battle front in Europe. The first quarter of 1918 will go down in history as the high water mark to date in the sales of talking machines. Large numbers of good shipments have been received, and the general freight situation seems to be easier, but the arrivals have been absorbed so rapidly by the back orders on the books of the various dealers that it can hardly be said that the available stock is any better on the first of April than it was on the first of March. This is especially true of the higher-priced machines. Of the cheaper machines and medium-priced ones the situation is a little better in the aggregate, but there are still plenty of dealers who are short on this class of goods as well as on the expensive ones. However, with the enormous demand continuing so strong, a spirit of optimism is everywhere evident, and the almost universal good nature of the customers is taking the sting out of the “worry-bee,” brought to life by the freight situation and the incompleteness of stocks.

Gray Features Brilliance Needle

W. S. Gray, a dealer in phonograph accessories, states that he has just received a shipment of 75,000 steel needles from Japan. These needles added to his stock and the lot of 300,000 Brilliance steel needles he recently received from New York, makes his stock conspicuous on the Coast at the present time. Mr. Gray thinks he should be congratulated on having accumulated such a stock of such a needful article at such a time.

New Brunswick Agencies

The Brunswick-Balke-Collender Co. has recently signed up two new agencies, one at Woodlands, Calif., and the other at Mill Valley, Calif. James T. Williams, cabinetmaker for the company, who injured his ankle while taking a train at Fresno a month ago, is very much improved and will soon be able to cover his territory again.

Miss V. E. Wells has bought the Martinez Music Store at Martinez, Calif., and has thus secured the Victrola and Sonorag agencies in Martinez. As Martinez is a rapidly growing community, located near some of the largest ship-building yards on the Coast, the business under the aggressive new manager should grow rapidly. Miss Wells will also carry a line of pianos as agent for Sherman, Clay & Co., of San Francisco.

Robert M. Bird, of the talking machine department of Sherman, Clay & Co., has resigned the position he held for many years to associate himself with the Victor Co. Mr. Bird has been succeeded by Otto Rathlin.

Frederick Stern, of the Stern Phonograph Co., visited the southern part of the State this month, and from the reception the Rex talking machine received in that section he thinks that the new branches he has in mind will be money makers from the start. He is examining several of these, but is held back until he can accumulate enough stocks of machines, records and accessories to insure ample supply.

Galli-Curci to Sing

It is confidently expected that another big business is going to be done in the records of Galli-Curci and to sing here in May. Indeed, one of the prominent music dealers predicted that the sales would exceed those of the McCormack records. His reasons for such belief are that despite the fact that the concert does not occur for over two months, the interest of the immense auditorium has already been sold out, and secondly the demand for these records is far in excess of the demand for the McCormack records a month before he appeared. One reason for this is curiosity, as Galli-Curci is unknown to most of the music lovers of San Francisco.

Rearranging Sonora Stock

A complete rearrangement of the stock in the Sonora Phonograph Shop, on Stockton street, is being made. When it is completed F. B. Travers, the manager, says that it will afford a considerable increase of floor space. The shop will be entirely newly decorated and refurnished. Mr. Travers says that he intends to concentrate his efforts on the Victor and Sonora machines.

The John Brewer Co., of Oakland, has secured the exclusive agency for the Sonora phonograph for that city.

Children’s Records in Strong Demand

The Burgess Records and the Bubble Books are proving excellent sellers in this territory. All the dealers handling these records, especially the talking machine departments of the department stores, which are visited by women with children more than the regular music stores, say the demand is increasing all the time and that the next holiday season should see an enormous demand for these records.

The Edison Phonograph Shop reports a good demand for its machine, especially for the higher-priced machines in art cabinets.

The W. W. Kimball Co. continues to spread in this State. It recently opened a branch store at Eureka and another at Woodlands. Both will handle the entire Kimball line, including the Pathé phonograph.

The Sonora Shop is displaying a new auxiliary record cabinet which is said to be becoming very popular. The manager says that since he began to show these cabinets he has had to double his order at the factory.

FOR TWO PRICE MARKS ON GOODS

Bill in New York Legislature Provides That Both Cash and Installment Prices Must Appear on All Articles Sold on Credit

The attention of the trade of New York State has just been called to a new bill introduced in the Legislature by Assemblyman Earl A. Smith, of New York, which provides that all retail merchants in the State selling goods other than for cash shall attach to the article in plain figures both the cash and installment price for the information of prospective purchasers.

TO MAKE THE TONKOLA

Wm. Tonk & Bro., New York, to Put Talking Machines On the Market

Announcement was made recently by William Tonk & Bro., Thirty-sixth street and Tenth avenue, New York, that they will manufacture a talking machine to be known as the “Tonkola.” There will be limited edition cabinet machines which will be equipped to play all makes of disc records.

TO HANDLE VICTORS EXCLUSIVELY

W. J. Killeen, who has for some years past conducted a very successful Victrola business in Albany, N. Y., while at the same time acting as telegrapher for the Associated Press, has given up his telegraph work to devote his entire time and attention to the talking machine business.

The North Hudson Maxaphone Service Co., of Union Hill, N. J., has been incorporated with a capitalization of $100,000 for the purpose of transmitting news and music by wire.

NYOIL

is the last word in the refining of high-grade oils, for every impurity is taken from it, leaving nothing but what is required to render machines perfect in condition, being combined of four oils perfectly blended.

Will not Gum, Chill or become rancid; is free from acid, and has no sickening smell, being absolutely odorless.

"The finest and most delicate pieces of mechanism do not prove efficient unless properly lubricated. Skill, Genius, invention & Workmanship must have the proper Oil. Stop and consider this when you buy your machine"

Hundreds of satisfied customers have written to say they would use nothing else for TALKING MACHINES, GRAPHOPHONES, PHONOGRAHS and SEWING MACHINES.

NYOIL will lubricate the machinery and polish all woodwork and can be obtained of any "Up-to-date" Talking Machine Dealer in the world, and is manufactured by Wm. F. Nye, who for 50 years has made 80% of all the Watch, Clock and Chronometer Oil that is used in America.

SECURE PATHE JOBING RIGHTS
Wm. Volker & Co., of Kansas City, Mo., Have Most Attractive Quarters for Pathé Display

KANSAS CITY, Mo., April 8—Wm. Volker & Co., of this city, one of the leading wholesale concerns in this part of the country, is meeting with

Wholesale Pathé Demonstrating Room No. 1
very pleasing success in the merchandising of the products of the Pathé Frères Phonograph Co. This company recently secured the jobbing rights for this line in its territory, and its sales-

Demonstrating Room No. 2

men have already established many agencies in the different cities and towns.

The company has installed in its general offices in its building on Main, Second and Third streets two demonstrating rooms, which are shown in the accompanying illustrations. These rooms have been visited by many Pathé dealers in this territory and from far distant points, and these visitors have been unanimous in stating that they constitute one of the most artistic wholesale displays in the talking machine industry. Wm. Volker & Co., who installed these rooms for wholesale purposes only, should be congratulated upon their initiative and progressiveness in furnishing such attractive display rooms for the benefit of their dealers.

The Harlem Phonograph Shop & Typewriter Exchange, Inc., has been incorporated with capital stock of $10,000, to deal in pianos, organs, phonographs, musical instruments of all kinds, typewriters, etc. The incorporators are: Alyss Lennon, Francis B. Wood, and Joseph A. MacKnight.

WEEKLY RELEASE PLEASURES
Dealers Handling the New Nine-Inch Emerson Records—A. H. Cushman Optimistic

Arthur H. Cushman, director of sales of the Emerson Phonograph Co., New York, states that the Emerson dealers who have signed for an exclusive Emerson agency for the new nine-inch records report that the new weekly release arrangement is one of the most important factors in their merchandising success. The purchasing public are taking to the idea of weekly releases rapidly, and this plan gives the dealers an opportunity of putting the latest records on sale one to four weeks earlier than under the system of monthly releases.

The dealers have told Mr. Cushman that their customers now go in the store every week for new records instead of visiting their establishment only once a month. This not only gives the dealers an opportunity to sell the released records for that week, but almost invariably the customer picks out other numbers as well. The individual sales to a record buyer do not always run as high, but the total sales for the month to the individual customers have been greatly increased under this system, according to the reports received at the Emerson offices.

The Emerson nine-inch records carry only the latest popular, patriotic, and dance hits, and the company is making it a point to place the big hits in the hands of its dealers in the shortest possible space of time.

UTILIZES AUTOMATIC REPEATER
Owner of Brooks Talking Machines Finds the Automatic Repeater of Convenience for Other Purposes—Uses Talker as Awakener

SAGINAW, Mich., April 6—C. C. Brooks, president of the Brooks Mfg. Co., recently received a letter from one of the company's dealers describing a unique way in which one of his dealers' customers had utilized the automatic repeater on the Brooks talking machine.

This repeater is equipped with a dial which starts the machine and sets it to repeat a record any number of times, and Mr. Brooks' correspondent states that his customer has conceived the idea of turning the machine into a melodious alarm clock, by taking the dial from an ordinary alarm clock, and touching a spring to the alarm winding key, so that when the alarm goes off the spring will be wound up. At the other end of the spring is a loop which is hooked over the end of the pointer dial which starts the machine; this loop slipping off the end of the pointer after it has pulled it in the starting position.

It is understood, of course, that he has placed on the machine, the night before, the record which will most harmonize with his awakening dreams, and the dealer has been assured that each member of his particular family is enthusiastic over this innovation, for they find that this method of awakening starts the day off far more pleasing than the blare of the ordinary alarm clock.

SENTRY STILL PREVAILS

The scarcity of machines and records is still striking, and especially for the Victor and Columbia product. The Victor dealers were very much handicapped again in March. They were not able to get nearly the number of machines for which they had orders, nor were they able to supply a full measure of the demands for the most popular of the records by this company. The Columbia dealers are also complaining of a shortage of stock. There seems to be no indication that conditions would be changed during this month, although the manufacturers are promising better results.

Tells of Pathé Expansion

Walter L. Eckhardt, the Philadelphia wholesaler and retailer of the Pathé machine, with headquarters at 1006 Chestnut street, reports that they had a wonderful increase in their business in March over that of February. He has just returned from a two weeks' trip to Atlantic City, where he went with his family for a much-needed rest after the strenuous work he encountered in getting the Pathé Shop into shape. To-day it is one of the business show places of this city.

Mr. Eckhardt says: "With each month my enthusiasm regarding the Pathé product increases, due to the continued increase in our sales, and the enthusiastic manner with which our trade is receiving the Pathé. Considering that we are still in our infancy and the fact that the Pathé products were unknown in Philadelphia prior to December, I feel absolutely confident that we are enjoying our full proportion of the local patronage.

"At the present time there are approximately seventy Pathé dealers in Philadelphia. Each and every one of these merchants contributes substantially to the demand that is being created. If we had been in business several years, a month like we had in March would have been readily understood, but to have developed a momentum such as we experienced in March business in so short a time is a decidedly new experience.

"At the outset of the month of March, as is my usual custom, different quotas were established for the various departments, which were accomplished, and frankly they were established at such figures that it required full steam ahead through the month to reach the goal. I would have been fully satisfied with the result, but when I state that the quota established was exceeded by the organization by 40 per cent, it reflects most creditably upon the organization, and discredibly upon my own judgment as a prophet. As an incentive for the month of April I have placed my figures well in a comparative advance, and even at that I doubt whether my organization will not compel me to again acknowledge my inability as a prophet.

Among the visitors to the Pathé Shop recently were E. A. Widmann, president of the Pathé Co., and George W. Lyle, assistant to the president, as well as Frank Capps, the factory manager.

WEYMANN ENJOYING AN ACTIVE BUSINESS

H. A. Weymann & Son enjoyed a wonderful March business in their talking machine department, considerably ahead of last year in spite of the fact that they experienced a shortage of machines and records. They have again gotten their Victor force fully organized. The draft drew heavily upon this department of their establishment, but they have gotten three new men of much past experience in this line from other talking machine stores in this city, including Mr. Hoegerle, for a long time connected with the Columbia retail store here.

The Weymann firm have been having some unusual windows during the past month, and they find that this effort on their part fully repays them. There is no business window in Philadelphia that attracts more attention. Most all of the Philadelphia dealers are now using the Weymann record holder for their window displays, and they have sold this convenient record display contrivance pretty generally throughout the country.

March Business Was a Record-Breaker

The Columbia Graphophone Co., 210 North Broad street, report that their business in March was a record-breaker and was limited only by the amount of machines they were able to secure from the factory. They have had a phenomenal demand for their March records, and an especially big seller was "Baby's Prayer at Twilight." R. F. Bolton, the sales manager of the international record department of the Columbia Co., was at the Philadelphia offices recently in the interest of the new records. Among other trade visitors was Harry C. Grove, of H. C. Grove, Inc., and A. Weil, treasurer of Lashbough & Brocher, both of Washington. D. C. H. C. Koh & Son, big furniture dealers at Eleventh and Filbert streets, this city, are
“Value Received” are two mysterious words that are incorporated into legal documents. These two words mean much in the commerce of the world.

In every Victor record sale VALUE RECEIVED is the dominating force. No mention of this is required because you know your customer is getting great musical value and the customer knows it. This is true, so sell MORE RECORDS. Educate your customers musically! Feature better music—the higher priced records.

Buehn Service does help you render “value received.” It is exclusively wholesale, with every energy devoted to assisting your growth.

The Louis Buehn Co., Philadelphia

VALUE RECEIVED applies with like force to Liberty Bonds. Buy them for yourself, and urge your customers to buy them. GIVE THE BOYS A HAND OVER THERE is the slogan. Buy a Bond!

LIBERTY BONDS

about to install a full line of the Columbia product.

The Grafonia Shops, Inc., in this city, at 1109 Chestnut street, are the first handlers here of the Columbia to advertise their records on the club plan, which several department stores have been doing for some time.

P. J. Leonard Addresses Edison Dealers

Blake & Burkart, the leading Edison representatives here, report that they had a most satisfactory month in March, and their business was way ahead of March, 1917. They were able to get machines through almost to the extent of their requirements, and the record situation has eased up considerably.

P. J. Leonard, the sales manager of the Edison, was in Philadelphia on Tuesday and addressed the Edison Dealers’ Association at their monthly meeting held at the Bingham House. C. J. Gardner, the traveling representative of Edison, was also in attendance at this meeting. The association is making elaborate plans for its annual meeting which will be held the first Tuesday in June, when it will have several prominent Edison talking machine men to make addresses.

Start Sonora Concert Campaign

The Sonora Phonograph Co., 1311 Walnut street, will start on Monday evening, April 8, and continue until the end of the month, one of the most remarkable series of concerts ever given in this city at a talking machine establishment. They will be given in the Sonora Hall, well suited for the purpose. They will be by invitation to the Philadelphia Navy Yard men, the men at Hog Island, Cramps Ship Yard and the Philadelphia Arsenal. Aside from the Sonora programs there will be a number of assisting artists.

The Sonora business in Philadelphia was very fine in March, and Manager F. D. W. Connelly is very optimistic as to the spring business on this remarkable machine. The Sonora visitors the past month included Frank I. Coupe, sales manager, and Mr. Pringle, of the main New York office. Mr. Connelly spent several days in New York last week.

To Handle the Cheney Phonograph

Strawbridge & Clothier, the department store people, having purchased the Henry F. Miller local store, instruments, leases, prospects, etc., they will also take over the handling of the Cheney phonograph here which has been handled from the Miller store as the Cheney headquarters in this city. G. D. Shewell, who is the Eastern representative of the Cheney machine, will remain as such here, and will either have his headquarters at the old Cheney store, 1305 Chestnut street, or if a piano firm take that building, he will open private offices as the Philadelphia representative of the Cheney phonograph. There is some likelihood of the machine remaining in this city.

Report Fair Month’s Business

The Louis Buehn Co. report that their business in March was fair, and as large as the machine and record supply would warrant. There was a great scarcity of Victor records in March, and all the handlers here in that line experienced the same handicap. The shortage of records in March was greater than it has ever been before, and conditions are not very encouraging for a betterment in April.

Louis Buehn and his family motored to his cottage to Ocean City last week and spent the Easter holidays there.

W. E. Holland, representing the Robelen Piano & Talking Machine Co., of Wilmington, Del., was a Philadelphia visitor the past week. He reports conditions good in his section.

Joseph Goodman, the Manyayunk handler of Victor talking machines, contemplates making extensive alterations in his store, including the addition of several more booths.

The Geo. D. Ornstein Co. are gradually getting their new building in shape. The general offices on the front of the building, second floor, with Mr. Ornstein’s private office in the rear of this floor, have been handsomely furnished. The third floor will be devoted to the record department, and the fourth and fifth floors will be used for reserve stock. George A. Lyons is the assistant to Mr. Ornstein.

Featuring the Ediphone

The Edison Dictating Machine Co. in Philadelphia have had all their stationery and advertising matter changed to the new name, “Ediphone,” and will shortly place this new title on their window. They enjoyed a wonderful business in March. They are preparing an elaborate exhibition for the industrial show which will be held here from April 15 to 20. They will have two booths, Nos. 67 and 68, and as a feature of their exhibition they will demonstrate the Telescribe.

N. C. Durand, vice-president of the company, was a recent Philadelphia visitor. The local store has opened a branch office for the Ediphone in Wilkes-Barre, Pa.

Booked Good Business on Trip

The Penn Phonograph Co. report that their business in March was good, very much of an improvement over January and February. They note that machines are coming in very slowly, and as records they can only depend on the monthly list.

T. R. Clarke, manager of the wholesale department of the Penn Co., and T. W. Barahill, a member of the firm, recently made a trip to New York, Pittsburgh, Detroit, Chicago, Cleveland and Indianapolis, calling on the various jobbers at these points and looking over their plants with a view of adopting various ideas which they could pick up for use in their business here.

Some Trade Briefs

Charles K. Bennett, of the Eclipse Talking Machine Co., of Cleveland, O., was in town calling on the various dealers.

Rudolph Wirthser was a Philadelphia visitor the past week. The local Brunswick-Balke-Collender Co. offers tell of expanding business in the Brunswick phonograph in this territory.
Is there any form of local advertising—bill boards, window display or store fixtures—that you suspect you're not getting what you might get out of? The Columbia Dealer Service Department will go into the problem with you willingly.

**The Timely Edison Messages**

Unique Editorial-Like Announcements of Thos. A. Edison, Inc., Attract Wide and Favorable Comment—Good Work for Music

The Edison messages appearing under serial numbers in the columns of The Talking Machine World monthly constitute something unique in advertising. These messages have a distinctive editorial flavor, for without exception the Edison "selling talk" one would naturally expect to be included in all Edison advertising copy is omitted, and forceful, well chosen English is utilized to drive home points of overwhelming interest.

The officials of the Edison Co. have evidently recognized that a part of its duty as one of the leading institutions of the industry is to interpret the relation between current national conditions and the Edison retailer. Meanwhile interpreting in the trade press the effect of current and national conditions for the Edison retailer is at one and the same time interpreting conditions for the entire industry. Hence the Edison messages are publicity of an exceedingly influential, broad-minded sort, and the retail merchants handling all makes of instruments who read these discourses will benefit the industry by propagating such forceful utterances as have appeared in the series of Edison messages under such captions as "The Recent Food Control Legislation Will Do Much to Stabilize Living Conditions," "Woodrow Wilson's Address to the Soldiers of the National Army," "General Optimism in Command," including a quotation from President's Message: "Part in War Times," including a quotation from the New York Evening Mail: "Where Music Stands," "The Need for Music," and "What the World Would Lose if it Lost Music," and that very timely talk which appears on page 10 of this issue of The World, entitled: "Forging the Third Link," a forceful plea for the successful sanitation of the third Liberty Loan, which we aim to make a landslide, so that it will crush militarism out of the world forever.

Every day music is proving both in civil and military life that it is the fourth essential of life. Thos. A. Edison, Inc., are certainly doing their bit in a most emphatic way in spreading the gospel of good music, and inculcating a deeper spirit of patriotism among the people.

William C. Chestnut, of the Brunswick Shop, was one of the talking machine men who, in belonging to the Missouri Seventh Regiment, Home Guards, was called out during the recent strike.

Mrs. Xellie Williams, manager of the Victrola department of the Jones Store Co., stated that business continued splendid and that there was not quite as great difficulty in getting machines as was the case around Christmas, and that the department has finally gotten its Christmas substitutions on machines cleared up. Mrs. Williams stated that no unusual advertising was relaid home—that business was so good it was not necessary.

Miss Patsy Ann Epperson, who had been with the J. W. Jenkins Sons Music Co. for some time, is now connected with the Wunderlich Piano Co. Miss Ruth Burrell, formerly cashier, has succeeded Miss Epperson in the talking machine department.

Porter Lassetter, formerly head of the talking machine department at the Kansas City Photo Supply Co., has accepted a position with the Paige Motor Car Co. His successor has not yet been named.

The talking machine made by Wilson Co., is said to be giving a wide distribution, especially in the smaller points.
The Real Importance of the Talking Machine in the Daily Life of the People

The talking machine dealer who is not taking full advantage of the present demand for both machines and records for various military units in the training camps, and for groups enlisted in the naval service of the country, is overlooking a mighty fine chance to corner some publicity not only for himself, but for the trade in general—publicity that is going to put the talking machine business in an enviable position perhaps in the eyes of the Government under conditions that may develop if the war continues.

One can hardly pick up a daily paper these days in any part of the country without seeing the names of various soldiers asking for donations of machines, and particularly records, or appeals from various organizations for records for the fighting men. Then, too, the daily papers themselves in many instances publish requests that the public contribute new and old records and music rolls sent to certain distributing centers for delivery to camps and ships.

Never has the public of the United States had brought home to them the real importance of music in the daily life of the people. If the men in training for deadly combat find it necessary to have music to lighten their leisure hours, how necessary must that same music be in the daily life of the people at home.

In the matter of supplying music for the soldiers and sailors, the talking machine shines in a class by itself; no matter how sudden the shifting of military units or how limited the transport space for extra equipment, there is always room found for a talking machine and records. There is hardly a daily paper or magazine in the United States featuring war photographs that has not at one time or another published pictures of soldiers and sailors grouped about a machine and listening to their favorite records. The dealer who makes proper use of these pictures in his window displays and in his store—who takes full advantage of the publicity that the war is giving the talking machine, who enters into the plan for supplying outfits for the fighting men, is putting himself on the map in his local community. The more generous the spirit in which he participates in the drive the more substantial will be his returns.

COLUMBIA LINE WITH KRAKAUER

Kraukafer Bros., 125 West Forty-second Street, New York, have secured the agency for the Columbia line of talking machines and records, and this new department will be in charge of Miss D. R. Schwyzer, formerly with Bloomingdale Bros. Milton Weil, manager of these ware-rooms, has devoted generous space for the display of this line, and the various models are displayed amid surroundings that show them off to their best advantage. It is planned to maintain a full stock of records at all times.

ATTRACTIVE HEINEMANN FOLDER

The Otto Heinemann Phonograph Supply Co., Inc., has just issued a very attractive four-page folder that is devoted primarily to the products of the company's Dean division. On one page of this folder there are presented some of the most popular styles of Dean steel needles and attention is also called to the fact that the company manufactures permanent needles to play Pathé records and sapphire and genuine diamond points to play Edison records.

There is also shown on another page of this folder two of the most popular motors manufactured by this company; these motors being the Meisselbach Motor No. 18, and the Heineman Motor No. 77. It is suggested that the manufacturers utilize the idea of combination orders for these motors, and it is mentioned that the ideal combination for a $165 machine is the Meisselbach motor No. 18, tone arm No. 98, and sound box No. 3C. The ideal combination for an $85 machine is the Heineman motor No. 77, tone arm No. 11, and Ideal sound box No. 2. The company offers to send interested manufacturers and dealers a copy of its complete catalog, which includes sixteen different styles of tone arms and sound boxes.

GETS CARLOAD OF PHONOGRAPH

HELENA, Mont., April 2—The Montana Phonograph Co., Edison jobbers in this section, have had the stock problem solved in some measure for them through the receipt of a full carload of new Edison machines. The shipment included 129 machines, and was valued at $25,000. It represents an additional order and will serve to supplement the stock regularly received by the company.

J. C. ROUSH ENJOYING LIFE

J. C. Roush, president of the Standard Talking Machine Co., Pittsburgh, postcards from Florida that he is enjoying his midwinter vacation with his family to the fullest extent. He has visited Palm Beach, Key West, Miami and other resorts, and states that he is having "the time of his young life." He expects to return about April 15 in fine fettle and ready for a busy campaign.

A Display Card Series of Value

The cards are 14" x 22", each individual card painted by an artist, and present a striking sales appeal for Victor Records.

Designed especially for Bruno Service and are "exclusive." The service consists of two cards monthly.

Send us your order for May Service and give it a month's trial.

We Do Not Retail
The Quality Phonograph

And it started something when Muratore sang the Marseillaise at the Metropolitan Opera House

Of course it's a Pathé Record. Muratore only records for Pathé and it's the one he made for Pathé just after his return from service in the French army.

But what did it start? First, it brought the Metropolitan Opera House audience to its feet with one of the greatest ovations ever accorded a singer.

Then it turned loose the greatest activity in the sales of Muratore Records that Pathé has ever known.

And what's more. Something has shot ahead the sales of all Pathé Records.

Do you know that any dealer can get in on it if he wants to—because Pathé Records are playable on any standard make of machine.

Write for particulars.

Ever Realize the Real Selling Value in the name—

The Quality Phonograph

The minute you do, you’re making a good start—yes, for yourself.

How many times do you suppose “Pathé” is flashed on the motion picture screens? No use computing nor guessing—anyway, it’s thousands—hundreds of thousands.

What does that mean to a dealer in selling Pathé Phonographs—when Pathé is only identified with quality product—whether phonographs or pictures?

Perhaps you haven’t thought of it before, but you should now.

Write for “The Other 20%” booklet. It will tell you something you ought to know.

Edison and Pathé Retailers Entertained by Jobbers of Their Respective Lines—Volume of Business on the Increase—Planning Co-operative Advertising Campaign—Other News

INDIANAPOLIS, Ind., April 4.—The talking machine business both in the wholesale and retail fields during March showed an increase over January and February, local dealers report. Most of the dealers express the opinion that business is getting better and steadier every day and they are not expecting even the extremely Liberty Loan campaign to have much effect in curtailling the business for April.

A meeting of the dealers of the Kipp Phonograph Co., jobbers of the Edison, was held March 22, when Harrison Durant, manager of the Edison department, for financing dealers’ installment paper, told the dealers of the new arrangement the Edison Co. has made to enable dealers to expand their business. The dealers were enthusiastic over the plan, and Walter Kipp, president, and Jewell Cartmill, secretary of the Kipp Co., expressed the belief that the plan would result in a greatly increased Edison business, as it will enable the smaller dealers to handle their business more efficiently.

A meeting of the Pathé dealers of the Mooney-Mueller-Ward Co., jobbers of the Pathé line, was held two weeks ago and Charles T. Reinhart, from the Pathé factory, demonstrated to the dealers the mechanical features of the machines, showing them how to adjust the machines in event any trouble arose.

R. B. Goldsberry, in charge of the company’s Pathé department, said that the Pathé “Pop” supplements are making a big hit with the dealers and are getting the results as shown in the increased record sales. Mr. Goldsberry added that there seems to be a phenomenal demand for the 157 model Pathé, and that the general preference of the trade leans to the higher-priced models with the art models becoming daily more popular.

W. E. Pearce, of the phonograph department of the Brunswick-Balke-Collender Co.’s branch, reports that the new “Ultima” tone arm and reproducer is proving popular with the trade. Billboard advertising being done in this territory for the Brunswick is also getting results, Mr. Pearce said.

Ben Brown, manager of the Columbia Co.’s branch, stated that March business showed an increase of 50 to 60 per cent. over March last year. Mr. Brown pointed to the fact that business is unusually good in the smaller towns in his territory as substantiating his belief that business is getting steadier and better every day.

Louis Sayers is now traveling in Kentucky for the Columbia Co.

The Craycraft Dry Goods Co., of Noblesville, Ind., has put in a talking machine department, handling Columbia machines.

H. A. W. Smith, manager of the Pathé Shop, is in Buffalo, N. Y., at the offices of the H. R. Ness Co., owner of the shop.

O. C. Maier, manager of the talking machine department of the Kiefer-Stewart Co., jobbers of the Sonora, said that the price increase of Sonoras, which went into effect March 1, has no effect on sales, and that March business was good.

Business continues good at the Stewart Talking Machine Co., wholesalers of the Victor line, the chief difficulty being in getting the machines. Emerson Knight, advertising manager of the company, is expecting to receive a call to the colors soon. He has been accepted for a training school for military balloon observation work.

George Standle, manager of the Brunswick Shop, is proving to be as enthusiastic a plugger for the third Liberty Loan as he is for the Brunswick. He already has more than $2,000 in subscriptions for the loan, and is making his store the headquarters for the American Club Liberty Loan campaign. Mr. Standle is also advertising the Liberty Loan in connection with billboard advertising being done for the new “Ultima.”

C. P. Herdman, of the Columbia talking machine department of the Baldwin Piano Co. store, reports that March business was good, and that the business that is being done is high class on a sound basis.

One of the daily newspapers is planning a co-operative dealers’ advertising campaign in connection with publicity boosting music in the home, and most of the music dealers are getting in on the proposition which is somewhat similar to the campaign that has been conducted in Milwaukee. The local music dealers have recently on several occasions, subscribed to co-operative advertising, and some of the dealers who were boosting for a talking machine dealers’ association point out that the reason the attempt to start the association failed was because some of the dealers held back on the proposition of doing any co-operative advertising. These dealers are now doing it with the newspapers.

A. H. Snyder, manager of the Edison Shop, said that March business was good, and the general outlook for spring business is excellent.

Serge L. Halman, manager of the Aeolian Co. branch, said that the Vocalion business is good; in fact, this instrument is steadily increasing its popularity. Mr. Halman is an earnest worker for the Thrift and War Savings Stamps.

He is acting as chairman of the advertising committee of the local retail merchants, having got up the scheme of co-operative advertising on the part of local merchants to boost the sale of the stamps. This campaign will start after the Liberty Loan campaign.

“We merchants don’t have to worry about business if we keep a stiff upper lip and keep plugging,” said Mr. Halman. “The people have the money and they will buy and we can all afford to do our part, too, in helping in every way to win the war.”

President
BUFFALO TALKING MACHINE MEN AFTER COUNTRY TRADE
Combining the Rural Communities as Roads Become Passable—Give Earnest Support to Liberty Loan—Arrange Special Display—More Trade Members in the Military Service

Buffalo, N. Y., April 9.—In a wholesome, patriotic way Buffalo talking machine dealers and their patrons are mounting the drive with enthusiasm and financial aid in helping to make the third Liberty Loan a success. Even if the public purse is almost turned inside out this month by the Niagara of dollars being diverted to the Government by loyal Buf- falonians, the dealers are still forging ahead with their "Business Better Than Usual" slogan. Great efforts at height are now made to reach the high business mark of last April. Some of the dealers say they are attempting "to go over the top" and even surpass their trade crops of a year ago.

Rural highways are becoming passable for the motor cars of the salesmen whose business it is to reach the farming population. Deliveries of talking machines throughout the country are now made with little difficulty. Easter and patriotic records have been in great demand.

At the store of Victor & Co., Pathophone jobbers, there was a remarkable display to pro-mote the sale of Thrift Stamps. There were life-size representations of President Wilson, General Pershing, Colonel Roosevelt, Washing- ton, Lincoln and Uncle Sam. In a window dis-playing cards to advertise the sale was George E. Bickel dressed as Uncle Sam. At a table just inside the door was Marie M. Gitner, repre-senting Liberty and selling the stamps. The display attracted large crowds and large sales of stamps were made.

In the window of Walbridge & Co., Victor dealers, there also was a Thrift Stamp display. There was a life-size picture of Liberty clinging to a cross. To the right was a life-size representation of an infantryman, and on the other side a U. S. marine, while the window was handsomely decorated in the national colors. Thrift Stamp advertisements were well placed in the window.

E. O. Hock, salesman for Robert C. Lord's Victrola department, is at Camp Upton, as is Harold Kuhn, of Kahn Bros.

Mme. Galli-Curci had to postpone her April engagement in this city on account of illness. Local dealers, however, boomed the Galli-Curci records during the week.

Bach Utley, who formerly had charge of the New Edison department of his father, C. H. Utley, is attending the U. S. Aviation School at Lake Charles, La.

The Vagheg Piano Corp., Columbia dealers, has been organized in Buffalo with a capital of $20,000, by A. C. Vagheg, F. W. Zehel and C. A. Vagheg. This concern has taken over the store of Vagheg, Lindsay & Seals.

G. H. Poppenberg, Inc., of Buffalo, capitalized at $500,000, has been incorporated. The company handles talking machines. "Instead of a partnership this firm now becomes a corpora-tion," said G. H. Poppenberg.

J. N. Adam & Co., Victor dealers, will have special Liberty Loan displays this month. Ralph C. Hudson, president of the company, will represent the Buffalo Retail Merchants' Association in the campaign.

Increased wages for Buffalo mechanics are helping trade at the local talking machine stores. One industrial plant, constantly seeking work-men, is running illustrated street cars to show that men who work at that factory can have plenty of money to buy all kinds of comforts, talking machines included.

Corporal P. H. Barenthaler, of the 303rd En- gineers, Camp Dix, has asked Buffalonians to ship some of their used records to the boys in camp.

Charles L. Bricka, son of Charles F. Bricka, of Bricka & Enos, Columbia dealers, has been promoted to captain and assigned to Company 2, train and military police division, National Army. He is a graduate of the first officers' training camp at Madison barracks.

Jascha Heifetz, violinist, whom Buffalo music critics called a "superb artist," recently played in this city. His appearance here helped the sale of the Heifetz Victor records.

A fifty-first anniversary sale was recently con- ducted by Adam, Melhirn & Anderson Co., Pathophone dealers. When this store was founded in 1867 Buffalo's population was only 110,000. T. M. Gibson, vice-president and re-tail manager of the concern, was employed at the store when it was first opened.

Richard Nevels has joined the sale force of John G. Shuler, the Sonora dealer.

Harold Verbeek, of the Verbeek Musical Sales Co., has joined Uncle Sam's aviation section at San Antonio, Tex. On account of his depar-ture the Verbeek Co. has closed its Genesee street branch, which he managed.

Work of remodeling the building at 733-737 Main street, where the Columbia Graphophone Co.'s wholesale department will occupy the sec- ond and third floors, is progressing rapidly. The new quarters will be ready for occupancy May 1. O. M. Kees, manager of the Buffalo branch, has been ill for a few days. George W. Hopkins, general sales manager of the com- pany, was a caller. March business at this store was greater than that of March, 1917. April trade may be somewhat hindered by tem-porary embargoes on eastbound shipments. For a time the company may have to use trucks to ship machines east of Buffalo.

Wallace Currier has been appointed manager of the William Hengere Co.'s Victrola depart- ment. He succeeds Herbert A. Brennan, now traveling representative of the Victor Talking Machine Co. Mr. Currier was formerly with the Victrola department of the Lion Drygoods Co., Toledo. Before going to Toledo he had an Edison store of his own in Portland, Me. Mr. Currier conducted a Victrola week early in April. Special advertising and window dis-play contributed to the success of this event.

VALLORBES NEEDLES

Point the Way to

Conservation
Economy
True Reproduction
Re-orders
Profits
Satisfied Customers

Heavy responses met the initial announce-ment of our needles. Large re-orders have invariably resulted where samples have been sent.

These needles are semi-permanent and may be used many times with true reproduction. They wear themselves rather than the record and being parallel in shape, as they wear down they do not en- large their diameter as does an ordinary tapered needle, hence pro-long the life of record. They are produced in all grades—soft, medium and loud.

BUY LIBERTY BONDS and THRIFT STAMPS

We advertised this last month and again devote part of our space to this cause.

Another patriotic pleasure is to use the Vallorbes needle and thus con-serve steel for Uncle Sam.

SOLD but the price is 30c.

No. 100
The Home Music Leader

Unquestionably the best value on the market. Genuine mahogany, quartered or fumed oak. Metal parts nickel-plated, automatic stop, double spring motor, plays from four to five records.

Two hundred needles for Columbia and Victor records and sapphire points for Edison. If diamond point $5.00 extra.

Height, 41½", width 39", depth 20½". Equipped with Resor- reto $100.00, with Half-Fork-Tone $50.00.

No. 140
A Great Instrument

Finest construction throughout, genuine mahogany, quartered or fumed oak. Distinctive design. High class double spring motor, playing from four to five records. Metal parts nickel-plated. One hundred needles for Victor and Columbia records. Equipped with Half-Fork-Tone $50.00; diamond point $15.00 extra. Height 47½", width 21", depth 21½. Equipped with Resor- reto $160.00, with Half-Fork-Tone $85.00.

The Wonderful Resurrectone

With its exclusive "tuning fork" has no equal in the world. Its clearness and melodic tone have the depth and warmth of the natural voice, string or wind instruments. Forms the regular equipment for the Hoffay, but is also sold for other machines.

PRICE: Nickel-plated $10. 22 karat gold-plated $14.50. To fit Victors, Sonoras, and attachments for Edison machines, etc. Money refunded if reproducer returned within 5 days from receipt.

No. 190
The "Second" Hoffay Choice

Elegance of style enriched by inlaid mahogany of extremely high finish, heavy special charm of "finess" to this superior instrument. Fine triple spring motor will play six or seven records. Speed regulator and automatic stop. 200 needles for Victor and Columbia records, sapphire points for Edison records. Diamond point $10 extra. Height 46½", width 26", depth 20½". Equipped with Resor- reto $150.00, with Half-Fork-Tone $85.00.

The Half-Fork-Tone

The next best reproducer, remarkable for its clear and loud sound. It is equipped on the Hoffay whenever specially ordered. It is also sold for other machines.

PRICE: Nickel-plated $26. 22 karat gold-plated $35.00. To fit standard machines and attachments for Edison. Money refunded if reproducer returned within five days from receipt.

No. 250
The Supreme Achievement in Musical Instruments

An extra smart creation, made in genuine mahogany, that symbolizes the name as perfection. Small triple spring motor will play six or seven records. Speed regulator and automatic stop. Metal parts are 22 karat gold-plated. 200 needles for Victor and Columbia records and one supplier point for Edison records. Diamond point $20 extra. Height 39½", width 21½", depth 21½", equipped with Resor- reto $250.00, with Half-Fork-Tone $125.00.

What Y. M. C. A. and Other Agencies Are Doing to Provide Music for the Fighting Men

There are various national organizations at work providing music for the army and navy men both at home and abroad. Perhaps the most important of these is the Y. M. C. A., which recognized at an early date the value of music in maintaining the morale of the fighting men.

During the past month The World has learned much through Y. M. C. A. officials anent what this worthy institution is doing to see that the men in the service have plenty of talking machines and records. The general policy of the conducting more aggressive local campaigns for talking machines and records, they will find the explanation in that fact.

The reports to date indicate that comparatively few machines have been received by the association through donation, but that a great many records have been given by the public, and several manufacturers, notably the makers of Victor, Columbia and Emerson records. The data available shows, however, that the free donation of records and machines to the Y. M. C. A. represents a small percentage of the total and for the men in our own expeditionary forces. No exact figures can be given as to the total number of machines and records that have been sent to the other side. Last month, however, in a news bulletin showing what the Y. M. C. A. has shipped abroad, there were included one hundred talking machines and 2,500 records, all sent over in a thirty-day period for the use of our soldiers in France.

There has been much controversy over just what kind of records the soldiers prefer, and the association has gone so far as to conduct

(Continued on page 50)

On Selling Records

There are many excellent ideas the Victor Dealer can use to stimulate the sale of slow moving stocks. Some of these ideas have already been put into practice, others have not yet been discovered. We urge Victor dealers to encourage their salesmen in originating new plans for selling records, and along the same line our travelling representatives will be glad to offer several good suggestions.
Bringing in more customers and making more sales for every dealer accepting its aid, is the sole aim of the Columbia Dealer Service Department.

THE PROVIDING OF MUSIC FOR OUR FIGHTING MEN (Continued from page 39)

The usual song-writing: "It's a long way to Tipperary." But if you analyze that you will find that it is not the usual type of patriotic song. It is simply considered patriotic because of time and usage.

"A good point to bear in mind is to introduce the humorous side of the war. The soldiers know the other side, and when they are out to sing and to listen to music it is for diversion. For instance, the most popular song with the soldiers here is 'I Don't Want to Get Well.' Other popular songs of the moment with the men are ' searchString='boy scouts of america' title='50 THE TALKING MACHINE WORLD April 15, 1918'

COLUMBIA
GRAPHOPHONE

SONORA PAINTED SIGNS ATTRACT

The Sonora Phonograph Sales Co. has recently made arrangements whereby they will feature artistic painted signs along the route of each railroad just before reaching New York. The object of these signs is to impress out-town visitors with the fact that the company has artistic salons at Fifty-third street and Fifth avenue, which are at the disposal of these visitors for demonstration and display. The accompanying picture is that of a sign which is located in two places—one on the Long Island railroad near Jamaica, and one on the New York Central railroad, just below Highbridge. This sign has attracted very favorable attention, and Frank J. Coupe, director of sales and advertising for the Sonora Phonograph Sales Co., is well pleased with the publicity that this advertising affords.

CHAS. J. ORTH HOST AT DINNER

Milwaukee Talking Machine and Piano Man Entertain Officials of United Phonograph Corp. and Members of Own Staff in Milwaukee

MILWAUKEE, Wis., April 2—A most enjoyable dinner party was given in the Gold Room of the Hotel Wisconsin on Thursday evening, March 21, by Charles J. Orth, 504 Grand avenue, the well-known piano and talking machine dealer who recently took over the distribution of the Puritan phonograph in Wisconsin and the Upper Peninsula. The event served to introduce the men responsible for the Puritan to the Orth force and members of the press.

Mr. Orth stated the dinner was a little family gathering, without an unduly serious aspect, in preparation for the real work that is now being undertaken by him in behalf of the Puritan. This thought was carried throughout the dinner. When the guests took their seats they found favors of a humorous character and a menu that was particularly Puritan-esque.

The guests of honor were Fred A. Bannett, president and general manager of the United

bored. Representatives of the press included Alfred B. Cargill, W. A. Dudley, Harry J. Grant, Leonard Meyer and Frank Elfinger. Other guests were James Orth, J. B. Therioy and Roy Steffen.

ORGANIZED IN KALAMAZOO, MICH.

Electric Phonograph Co. Incorporated to Manufacture Coin-Operated Machines

KALAMAZOO, Mich., April 4—The Electric Phonograph Co. of this city, has been incorporated with capital stock of $30,000, to engage in the manufacture of coin-operated electric phonographs, designed particularly for use in public places. The equipment for a factory has been ordered, and a plant will be established in this city. It is stated that the company owns a number of new patents covering their instruments.

The officers of the new company are: President, John W. Adams; vice-president, E. B. Deussen, and secretary-treasurer, A. J. Reams.

MAKING NEEDLES FROM CACTUS

PORTLAND, Ore., April 2—Oregon never considered its scrub cactus growth—which is found in the waste sections of Eastern Oregon—of much value, but even this is now being turned to account by the phonograph people. The scrub cactus needles, tests have shown, are admirably fitted, after proper treatment, for recording needles, and these, with a variety also found on the Mexican border, are rapidly being turned to commercial advantage. These needles have been placed on sale in Portland by the Wiley B. Allen Co. and are found to give pleasing sweetness and softness to the tone. There is little danger of the supply of raw material ever being exhausted in Oregon, no matter to what extent the manufacture of the thorns into record needles expands.

We can make castings of this nature to your order in quantities and at attractive prices and deliveries.

Send samples or blue prints for estimate.

UseS INFORMATIvE ADVERTISING

Famous & Barr Co. Using EducatiVe Copy in Their Announcements With Great Success—
Featuring Victor Line Strongly

St. Louis, Mo., April 8—A novelty in the way of advertising of records has been the series of informative advertisements run in the newspapers by Manager Ditzel, of the Famous & Barr Co. The series is running and will continue indefinitely, according to present plans, and Mr. Ditzel hopes to gather a series that can be put into book form after they are run as ads.

The text in the ad below, bearing on the soprano voice, will illustrate what the series is. The introduction reads:

"There are two principal soprano voices—the coloratura and the lyric—each with its fair and measured province in the field of song. The first, or coloratura, corresponds with the flute in the orchestra—it is the sparkling, dazzling voice, abounding in trills, turns and tremolo— the 'shiny' voice. Its most striking exponent is Galli-Curci, who sings the famous 'Bell Song' from Lakme with almost uncanny brilliance.

"The lyric, on the other hand, is essentially the sweet voice, the voice of romance, portent and emotion. Of the lyric voice, one of the best examples is that of Lucy Marsh, who sings 'Birth of Mom' divinely."

Then follows a list of records set out as to the kind of soprano voice each presents. Other ads deal with the various kinds of voices, quartet male and mixed, and will cover the various instruments. Mr. Ditzel says that in preparation of these ads he uses information gathered on the floor in the record department, where he asks customers as to which kind of soprano they wish and other leading questions to develop what will really be information to the average record buyer.

Another novelty from the Famous & Barr Co. is the new form of announcement of the monthly record lists. This idea first was that of photographing the regulation Victor record list and reproducing it. But the list did not lend itself well to photographic reproduction by printing, so a redrawing of the Victor dog that illustrates the hanger was made and the names of the records set in type in exact facsimile of the original. The result is a neat mailing card that will easily catch the eye of the Victor record buyer. Of this Mr. Ditzel says:

"Of course, next to the trade-mark dog, the most familiar advertisement to a Victor owner is the monthly record hanger. You do not notice that a Victrola owner always is ready to stop and read the hanger. Now we hope to catch the eye in a way that the bulletin ordinarily mailed does not. Also some Victor owners get the bulletins from the several sources, and we hope our announcement will be distinctive. We believe it is a move in the direction of conservation of paper, mail weight and in other ways meets the demands of the times."

NEW PRICES ON LANSING COVERS

E. H. Lansing Announces New Schedule, Owing to Greatly Increased Cost of Production

Boston, Mass., April 1—E. H. Lansing, who manufactures the Lansing khaki moving cover for talking machines and accepted as the pioneer in that field, announces that he has been compelled to increase the prices of his various covers, and the new prices will be, Style A, $8.50, and Style B, $6. Mr. Lansing has been absorbing the increased cost of both materials and labor for some time past, and has found it impossible to do so any longer. The increase of $1 per cover, however, means the placing of as light a burden as possible on the purchaser. Incidentally, Mr. Lansing reports that the business is keeping up in good shape in all sections.

Both prophets and profits are without honor in every country and just now.

INTRODUCE NEW STEEL NEEDLE

The Gloria Phonograph Supply Co. Makes an Important Announcement—To Make Needles in All Standard Styles and Tone Qualities

The Gloria Phonograph Supply Co., 200 Fifth avenue, New York, has just placed on the market a new steel needle which will be known as the "Gloria." The company is marketing this needle in all standard styles and tone qualities, and is instituting an aggressive campaign to present this needle to the jobbers and dealers throughout the country.

Realizing that the talking machine dealers have been badly hand-capped the past year by a shortage of steel needles, the Gloria Phonograph Supply Co., before announcing its new needle, completed factory arrangements whereby it could promise the dealers immediate delivery on their orders. The company felt that it was unfair to the trade to announce a new steel needle without being in a position to take care of the dealers' requirements promptly and delayed their announcement accordingly until the officers were certain they could guarantee immediate shipments of the needles.

In its literature the Gloria Phonograph Supply Co. will emphasize the fact that the Gloria steel needle is constructed of the finest carbon steel, and that it is guaranteed to give absolute satisfaction to every user. The company's manufacturing and sales campaign will feature this important constructional merit, in order to impress the dealers with the fact that they can offer the Gloria steel needle to their customers with perfect confidence in the satisfaction that it will render.

The president of the Gloria Phonograph Supply Co. is Rudolf Gaertner, who for a number of years has been prominent in manufacturing and import circles. Mr. Gaertner will devote his entire time to the new company, which was recently incorporated with a capital stock of $25,000, and his lengthy experience in the mercantile world will doubtless enable him to cooperate effectively with the dealers throughout the country.

R. R. Dechaker, president of William Schipper & Co., Holoken, N. J., and a director of the Trust Co. of New Jersey, a well-known manufacturer of metal goods, and prominent in New Jersey financial circles, is first vice-president of the company, and as such will act in an advisory capacity.

Roswell Francis Easton, who has been associated with Mr. Gaertner for a number of years, is second vice-president of the company, and will be actively interested in its activities. On another page in this issue of The World is the first announcement of the Gloria steel needle, and this announcement, which, by the way, is a splendid example of lithographic art, features the copyrighted trade mark of the needle—the lark. It is planned to use this trade-mark on all posters, window cards, etc., and the publicity will proceed on lines of similar poster design as shown in this announcement. The company is now preparing to distribute a supply of window cards to dealers, in order that the public may be acquainted with the qualities of the new needle.

DOUGLAS PICTURES IN NEW YORK

Process for Making and Projecting Motion Pictures in Natural Colors, Invented by Leon F. Douglas, Proves Decidedly Interesting—Wonderful Effects Produced by the Process

Members of the local talking machine trade were interested recently in the special showing in this city of motion pictures in natural colors produced by a new process invented by Leon F. Douglas, of San Rafael, Cal., who for many years was actively connected with the Victor Talking Machine Co., is still a director in that company, and had much to do with the early development of the Victor product. The Douglas pictures have been shown in various sections of the country recently and with much success, and when offered at the Eighty-first Street Theatre served to attract much attention not only from the public but from members of the motion picture trade. The pictures shown include really wonderful views of Yellowstone Park, typical of American forests, and of motion picture celebrities. While the films showed the natural colors of the landscape with great faithfulness, depicting the subtleties of sky, ground, water and plant life very closely, they reached their best when showing closeups of people. Whether a young lady has copper-colored hair or is a typical blonde or brunette, her locks show up with startling faithfulness, and even her complexion is given its full value. The closing feature of the exhibition, and one that greatly impressed the audience, was a sunset scene, with the sun's last rays merging into the purple twilight.

Mr. Douglas' device consists of an inexpensive attachment that may be affixed to any motion picture camera and which permits of the production of a film containing a series of images so colored as to give, when projected, a moving picture in natural color. Without the use of the rotary colored shutter usually required.

"By this contrivance," declares Oliver Jones, formerly a well-known talking machine man, and now acting as representative for Mr. Douglas, "the brilliance and intensity of the projected colored picture are increased and a stereoscopic effect is obtained impossible in black and white. There is no more light required than is used in projecting black and white, and a speed of only twenty-four to the second is necessary, and through certain experiments, being made this speed will be reduced. The cost of producing pictures by this process is slightly more than that for making black and white, while the advantage in the art of producing motion pictures is considerable."

NEW QUARTERS IN IRVINGTON, N. J.

A. H. Redden, who has been conducting a bicycle and sporting goods store in Irvington, N. J., has moved to new quarters at 1065 Clinton avenue, that town, where he is featuring Brunswick phonographs very successfully. He has handled the Brunswick line since last fall.

MOVING TO NEW LOCATION

H. G. Applin, the Victor dealer of 20 College avenue, Somerville, Mass., has arranged to move to new quarters in the Medina Building on April 1.
Lend Him A Hand

Your Hand—My Hand

Every hand in the land stretched out to help him to VICTORY!

In defense of LIBERTY, JUSTICE and CIVILIZATION, we must use every weapon at our command. And not the least of these is money. Never in the history of the world has there been a truer cause.

CONDITIONS IN TALKING MACHINE INDUSTRY IN ENGLAND

Louis S. Sterling, Manager of Columbia Co., in London, Tells Most Interestingly of Business Activity—Labor Problem Serious, But It Is Being Mastered—Record Trade Enormous

“Our sales during 1917 showed a gain of 25 per cent. over 1916, making this year the best in our history,” said Louis S. Sterling, managing director of the Columbia Graphophone Co., Ltd., London, who arrived in New York recently for a visit to the executive offices. “Our figures for the year show that our business was double that of 1913, and we therefore have every reason to feel gratified at the prosperous condition of talking machine activities abroad, notwithstanding the war.

“The preponderance of our business last year was in records, and the actual production of records was larger in 1917 than ever before in our history. Although the demand for machines is bigger at the present time than it was before the war, we must consider the fact that the production of machines is only 30 per cent. of the total production before the war started, owing to the necessary restrictions placed upon our product, the scarcity of raw material, and the dearth of labor.

“General conditions in the talking machine industry in England are very satisfactory, although all of the factories have been obliged to face very serious labor problems. When the war broke out in 1914 there were 291 men employed in our record factory in England. At the present time there are only eleven men employed, the rest being women, and in order to produce the same efficiency in our factory, we found it necessary to increase the force of women by 40 per cent. Out of the eleven men at the plant six are over fifty years of age. The numerous air raids over England, the lightless nights, and the various curtailments of amusements are influencing the people to stay home more now than ever before. They naturally must have some relaxation from the seriousness of war, and it is in this respect that the talking machine is ‘doing its bit,’ and affording the public pleasure and entertainment.

“There exists in England today a tremendous demand for the straight popular songs, and there is also a notable increase in the call for good music. I refer particularly to high-class ballads and the very fine string and orchestra selections. In fact, to the casual observer the demand for this class of music is almost remarkable.

“We are shipping many thousands of records per month to the boys at the front, and the orders for these records almost invariably call for 50 per cent. of popular music, and the remainder good standard selections and operatic numbers. The demand for the so-called patriotic popular number has practically passed into oblivion, the boys at the front calling for the straight popular selections.

“The demand for table machines is by far in the preponderance, but this is attributable to the fact that it is almost impossible to get cabinets to manufacture the floor machines. The demand for cabinet machines is far in excess of the supply, and it is for this reason that the table machine is selling in such large quantities.

“There is a very bright future ahead for the talking machine business in England. We are all optimistic regarding the future, and whether or not the war continues for any extended period, the talking machine industry is certain to enjoy an era of activity and prosperity.”

MAKING RICHMOND MUSICAL

Corley Co, Doing Much for City’s Musical Advancement—How This Company Serves the Dealer—Widely Known as Victor Distributors

RICHMOND, Va., April 9.—Fred. R. Kessich, now in charge of the wholesale department of the Corley Co., this city, finds in his possession during the past week substantial evidence of the fame of the Corley Co. as Victor distributors. Two large cases addressed to widely separated cities in the Middle West were in some unaccountable way delivered to the Corley Co. in Richmond. The only accountable reason being that these cases bore on them the Victor trade-mark.

Mr. Kessich reports generally good business in both the wholesale and retail departments and the continuing popularity of their Victrola fibre trunks.

The aim of the Corley Co. has ever been service to the dealer. For a long time the Corley Co. has owned a print shop where they have printed the large volume of literature that they send out and in addition turned out many printing jobs for their dealers at a small cost. Another service department of the Corley Co., which is in the highest state of efficiency, is the repair department, which is in charge of Mr. F. Burnett, who has been with the Corley Co. for a number of years. In order to keep this department up to this high standard Mr. Burnett makes it a point to make a yearly visit to the Victor factory.

The slogan of the Corley Co.—“The house that made Richmond musical”—has been especially proved this year. Through the efforts of the Corley Co., many world-renowned musical artists have come to Richmond during the past season. For these series the large City Auditorium is engaged and is usually filled to capacity. Literature is now being mailed concerning the Spring Festival to be held at the City Auditorium on April 29, 30 and May 1, 1919. Prominent operatic artists, such as Paul Althouse, tenor; Sophie Brauslan, contralto; Mabel Garrison, soprano, and Lambert Murphy, tenor, are to appear. Attention is called in the literature describing this festival that these artists are well known to all Victor owners, and the opportunity is offered to get acquainted and to make comparison between their voices and the perfect reproduction of the Victor records. Other artists that will appear are May Peterson, Nina Margana, Helena Marsh, Thomas Chalmers and Rafaelo Diaz. The Wednesday Club Chorus of Richmond and the Russian Symphony Orchestra will also appear.

TALKING MACHINES A WAR NECESSITY IN MILWAUKEE

This is Proven by the Demand in Camps and in the Homes—Badger Activity—New Brunswick Dealers—Phonograph Co. Increases Capital—Four New Sonora Dealers—Puritan Developments

MILWAUKEE, Wis., April 12—As the nation enters the second year of active participation in the world war as a combatant, it is becoming more and more evident that all of the instruments of modern warfare—mental and physical—suffering the talking machine has outdistanced all others and is secure in the first rank, not only so far as the boys at the front and the men in the rear who must remain at home. Never since its origin has the talking machine been in such tremendous demand as at present. At the same time the output of the country's talking machine factories, while probably the largest that it ever has been, is becoming more and more inadequate to fill requirements. In the case of so popular a line as the Victor, it is conservatively figured that if twice as many machines were available immediately, not all orders could be filled. Even some of the newer and relatively lesser known makes are securing so well that the big problem in the talking machine industry of Wisconsin today is to produce enough instruments to meet the needs of the new and extra branches in the business.

Talking machine business predicated upon the Event. "There was such a rush of orders among us that we believed it was the beginning of the war," said one of the Wisconsin firms. "The rush was so great that we had to shut down the plant to get supplies of parts and materials and fill the orders that we already had."

Talking machine business has been so satisfactory throughout the state that it was wholly remissful of the pre-Christamas season. Saturday, March 30, the day before Easter, seemed like a Christmas Eve in local retail firms. Orders were pouring in until closing time with customers demanding delivery of machines and records for Easter. Regular delivery systems had to be supplemented with extra cars and wagons. The result was as it was expected that it has not been known before, as though the Easter season also has been a district offering of extra business.

Retail dealers attribute the remarkable demand, especially at Easter time, to the influence of the war. In fact, the splendid business that has been done in the last four months is believed to be the direct result of the need for solace which all people have come to experience since thousands of homes have given up sons, and even fathers—and some, daughters. The dealers who a year ago feared that the declaration of war would shortly result in the collapse of the industry have been proven wrong. But after the war is ended, the business will go back into its normal period in its local history, and it has grown day by day until at this moment it has reached the most prosperous point ever known.

"It's the same old story," said Harry A. Goldsmith, secretary of the Badger Talking Machine Co., Victor jobber, when asked "What's new" by The World representative. "Our customers still are asking for more machines than we can possibly deliver, and our back orders are piling up every day. So far as records are concerned, we are still trying to keep the pace to meet our needs. We can and will take care of all our retailers, but in spite of this effort, not all disappointments can be obviated. The demand for the Victor to-day is by far the greatest we have known since we established this business. The same is true of Victor business in all other parts of the country. Our situation is not unusual among Victor jobbers, for they all are overwhelmed with business."

According to Thomas L. Kidd, manager of the local branch of the Brunswick-Balke Collender Co., the war is doing a tremendous business for the factory. "The war is having an extremely difficult time in filling all of its requirements, due to the rapidly growing demand for the Brunswick phonographs, both here and elsewhere, and we are still suffering from freight traffic and another handicap. Express lines are used from time to time to relieve acute shortage among dealers, but in recent weeks the express companies have been so overwhelmed with business that, considering the extra expense, not a great deal is gained by making shipments by express. The nine Brunswick retailers in Milwaukee have been doing an exceptionally large business since the beginning of the year, and reports which they make to Mr. Kidd indicate that 1918 is destined to be the greatest Brunswick year since the line first was introduced in this city."

The Yahr & Lange Drug Co., 207-217 East Water street, this city, wholesale distributor of the Sonora for Wisconsin and Upper Michigan, has increased its local city selling organization by the appointment of four prominent retail stores in as many widely separated sections of the city. The new retailers include Alfred W. Fuchs, Jeweler, 1403 Green Bay avenue; William Klug & Sons, furniture, 343 Twelfth street; Bruno W. Thien, jeweler, 1401 North avenue, and the Noll Piano Co., 1057 Muskego avenue. A successor to Charles J. Orth, 504 Grand avenue, as the downtown retail representative, will be selected shortly. Pending the filling of a new connection, the Yahr & Lange Co. has inaugurated a complete service department for the benefit of Sonora owners in Mil-waukee, in connection with the Sonora jobbing department of its big wholesale house.

The New Edison continues to increase in popularity throughout Wisconsin, and the Phonograph Co. of Milwaukee, 211-213 Second street, wholesale representative in the territory, has never been quite so busy as now in keeping the wants of its retail representatives fully supplied. The Edison Shop, which is the retail service department, is doing a splendid business locally. To accommodate the growth of the business in general, the Phonograph Co. has been obliged to increase its capital stock from $150,000 to $250,000. William A. Schmidt is general manager of the company and is ably assisted by Herbert W. Gansweitz, retail sales manager.

Since taking over the wholesale distribution of the Puritan phonograph and records in Wisconsin and Upper Michigan on March 1, Charles J. Orth, 504 Grand avenue, this city, has built up a remarkably efficient sales organization and is giving the Wisconsin-made instrument an exceptionally strong representation in its home territory. This increased retail activity has been reported to Mr. Orth. Mr. Orth is duplicating the splendid achievement credited to him in putting the Sonora on the map in Milwaukee as exclusive retail distributor for the past five years, and in blackening a new connection which he relinquished to broaden out as one of the principal distributors of the Puritan line. Arthur Roelke, formerly state representative of the Sonora, has joined Mr. Orth and is looking after retail contracts throughout the Wisconsin and upper Michigan territory. Gustave Kleeman also has joined the traveling sales force. Albert H. D Турker is managing local sales. Numerous excellent retail connections already have been established and before long the Puritan will be represented in practically every section of the territory. The "home agency," as it were, at Sheboygan, Wis., where the Puritan is manufactured, has been placed with M. W. Brand, 1301 North Eighth street.

THE TALKING MACHINE WORLD
PLAN CONCERT UNDER AUSPICES OF DETROIT ASSOCIATION

Prominent Artists to Appear at Public Affair on April 30—Proceeds to Be Given Over to Local Regiment—Hudson Co., Preparing to Move—Trade Keeps Going at Lively Pace

DETOIT, Mich., April 10.—We won't declare that Detroit talking machine dealers have had a record business, but we will say that they have had a very satisfactory business during January, February and March, and that they are anticipating excellent business before the end of the year. Some go so far as to predict that business will stay about as it has been for the past three months, and that there will be big business early in the fall continuing to improve until after holiday time. After all there is every reason to look for good business, as Detroit has been blessed with war orders that run into nearly a billion dollars, while workmen are getting higher wages than ever before. There is no scarcity of money and, despite Liberty Bonds, the Income Tax and Red Cross, people seem to have plenty of cash to buy whatever they make up their minds to.

In talking machine circles locally, the big event of interest and importance is the recital to be given at the Arcadia, April 30, under the auspices of the Detroit Talking Machine Association. For many, many months the association has had in mind something that would be along patriotic lines, but they wanted to do something that had not been done before. The idea of giving a concert and turning the money over to some patriotic fund appealed to the members of the organization, and the decision was reached unanimously that such an event take place. A special committee was appointed and the work began. Sam E. Lind, president of the Detroit Association, and chairman of the concert committee, immediately got busy by long distance, by letters and by telegrams, lining up the different artists with the various companies making records. He received splendid support from the companies and the artists themselves—greater than he had even anticipated. The final result of Mr. Lind and his committee is that the concert will surely take place at the Arcadia on April 30, and among the artists who have agreed to appear personally are Henry Burr, Albert Campbell, Arthur Collette, Frank Davis, H. Hartley, H. Hinchman, Phil Murray, Theodore Morse, Fred Van Epps, the Peerless Quartet and the Sterling Quartet. The committee has $500 as the number of tickets to be disposed of, and has approached the association, aggregating fifty, has individually agreed to take and sell a specified number of tickets. I believe we will easily dispose of these tickets—with everybody cooperating and working together on the proposition," said Mr. Lind. "We are getting splendid support all around—everybody is with us heart and soul, considering the purpose for which it is given. Whatever money we raise will be turned over to the regiment known as Detroit's Own. Something like $600 is to be spent in the Detroit newspapers for advertising and publicity." Here's wishing the enterprise every success in their patriotic venture.

J. L. Hudson Co. are getting ready to move from 118-120 Woodward avenue to 68-70 Literary avenue. The new building is six stories in height, with full basement, and the company is spending nearly $75,000 in fixing up the new building, which formerly was devoted to the toy departments. The Hudson officials want to make their new music store the finest of its kind in the country and they will get results if money counts. The talking machine departments will occupy the first and third floors. On the first floor will be the various record booths, record stock and a large counter for selling records. The booths will be ventilated in the latest fashion, will be carpeted and right up to the minute. On the third floor will be the retail salesrooms of the Victrola and Sowora machines, which are handled by Hudsons. There will be many new, interesting, original and unique features that will be described after the store is opened.

Max Strasburg, of the Max Strasburg Shops, has returned after spending four weeks in the South. He had a splendid vacation, played a lot of golf, and is now on the job regularly each day. Mr. Strasburg looks for a good year, although he says there are sure to be times during the year when trade is off.

The W. E. Metzger Co., who retail the Victrola, are devoting more time than ever to the line and are carrying larger stocks than ever.

Quite a number of Columbus dealers are displaying the company's line of period Grainonolas in their store displays.

Frank Bayley, Edison dealer, recently purchased for himself and family a handsome residence on Chicago boulevard, costing $40,000.

In talking with jobbers, such as Grinnell Bros., who handle Victrolas, Williams, Davis, Brooks & Hinchman Sons, who handle the Pathé line, the Phonograph Co., who job the Edison, and the Brunswick Co., who job the Brunswick phonograph, we find that they are carrying good-sized stocks of both machines and records, and that shipments are easier than they have been in some time. They don't believe there is going to be any difficulty in taking care of customers, but they believe that customers should order well in advance to offset any unforeseen delays that may occur. All of these jobbers are exceedingly optimistic and can't see anything but good business ahead.

Some splendid displays recently in connection with the Victrola, particularly the cheaper models, have attracted considerable attention to the windows of the People's Outfitting Co. We will say one thing for this concern—every display is carefully planned and thought out and they are usually timely and in keeping with the news and events of the day.

The Strand Talking Machine Co. was incorporated recently at Albany, with a capital stock of $6,000. Those interested are S. Birnweig, S. Friedberg and H. Weiner.

SPECIAL WINDOW DISPLAY FOR COLUMBIA MAY RECORDS
Dealer Service Department of Columbia Graphophone Co. Prepares Excellent Window Attraction for the Use of Retailers—Service Meeting With Much Popularity

The dealer service department of the Columbia Graphophone Co. has prepared for Columbia representatives a very attractive window display for the May records that can be used to by the accompanying illustration, the display has all the necessary attributes of a profitable sales stimulant. This regular Columbia monthly window display service is meeting with great popularity throughout the trade, and not only have Columbia representatives in this country endorsed it unreservedly, but requests for this display service have been received from dealers in Canada, China, Italy, England and the Philippines.

There is a big selling idea back of the Columbia Co.’s new style advertising in the national magazines and newspapers, and the accompanying illustration, showing a recent magazine advertisement, will visualize this idea. Brilliant, picturesque and familiar characters of popular musical comedies and the vaudeville stage give a live, wide-awake appearance to this copy from an illustrative standpoint. The text also carries out the idea in back of this advertising, and there is no doubt but that this publicity will prove invaluable to Columbia representatives everywhere. This same message of live, up-to-date music is carried out in all of the Columbia Co.’s advertising campaigns, including newspaper “ads,” dealers’ “ads,” monthly supplements, hangers, etc.

The Criterion Phonograph Co., of New York City, has been incorporated with a capitalization of $150,000 by W. H. Hoschke, J. N. Harris and J. P. Battles.
PLAYERPHONE

POPULARITY PROVED

GREAT Jobbing Houses Have Found The Playerphone Such a Wonderful Seller That They Now Order Playerphones By the Carload

Shortage of materials and shortage of freight cars are the only things that have prevented the Playerphone sales being over twice as great.

Now, that difficulty is being overcome, orders can be filled with reasonable promptness, either in small lots or in car load shipments.

See Where These shipments Go. Note the Firms

In all the world there is no tone like the Playerphone's. The Human Voice is its only rival. Plays any make or size record perfectly without change of equipment.

Your Profit Enormous, in a Car of Playerphones.

THE PLAYERPHONE OFFERS GREAT OPPORTUNITIES TO JOBBERS IN FOREIGN COUNTRIES
Featuring the Musical Possibilities of the Talking Machine

By William Braid White

[Note.—This is the fourteenth in a series of articles on the general subject of the musical possibilities of the talking machine. The aim of the series is to develop three possibilities from all angles, thus opening up fields for sales expansion otherwise neglected wholly or in part.—Ed.] OPERA AND THE TALKING MACHINE

I suppose that, in one sense of the word, no other idea is as strongly impressed on the mind of the layman who goes to buy a talking machine as the idea of the phonograph. The mere fact that the greatest successes of the talking machine have had to do with the reproduction of operatic records is one which is well advertised among the great voices, has intensively directed public attention to that field of musical enterprise where great voices are mainly developed. That is the field of grand opera. The great artists who, in earlier days, were first and most splendidly exploited by the talking machine makers, were operatic singers; and the progress of the talking machine theory has peculiarly been mixed up with the progress of grand opera in this country. Indeed, it would not be going too far to say that the talking machine has accomplished more in one of the most important departments of the art than any other agency to teach the public the fascination of operatic music and create a demand for it.

But with all this, I shall venture the remark that the demand for operatic records is demand just as uneven, just as scattering, as can be said of any other type of musical performance available through the talking machine. One of the most astonishing things about the talking machine business is to be found in the disproportion between the public knowledge of certain artists and public familiarity with their records. The opera singer, machine dealer, I am sure, will agree with me that of all those thousands who know the names of the dozen leading operatic artists, not one in ten knows familiarly six separate numbers which any one of these artists actually sings. Indeed, when I have gone shopping for records in the guise of a simple-minded member of the great public, I have found that the salesmen themselves are quite often rather narrow-minded in these matters; knowing plenty of names, but precisely what actual work is being done through the talking machine by the owners of those names.

Exploring One's Stock

Now, I shall perhaps not be too seriously contradicted if I say that it would be a very good thing for every man who is interested in the sale of talking machines and records to undertake a little series of explorations into the great territory of operatic music as exhibited in the hundreds of operatic records now listed in the catalogs of the great companies. The literature of grand opera is in quantity immense and has a history stretching back more than three hundred years. The art of singing has developed along with that of operatic composition, and the greatest singers in the world have always been operatic singers. If one is going to know his record stock, then it is perfectly obvious that he must know something about that which is mainly responsible for filling his record shelves. For a talking machine dealer to carry in stock hundreds of operatic records and then to confine his knowledge of them to two or three each of a very small number of well-advertised singers, is like a bookseller knowing Dickens and Mark Twain, the Encyclopedia Britannica and the Bible, but hopelessly at sea when a customer asks for Thackeray or Emerson, for Shakespeare or Walt Whitman. Such a bookseller would not long last, and a dealer in records last any longer if the public were generally as ill-informed as he himself. The public may indeed be ill-informed, but to sell one's goods in a half-baked way merely because there is reason to believe that one's customers know more, is not exactly sound business. I have always been inclined to think that the contents of the great record catalogs were really appreciated, really studied and really known, there would not be the unreasonableness in sales there now is. The field for the sale of records is scarcely scratched as yet, if we but knew it. Indeed, the field of sales in operatic records alone is scarcely scratched.

Something in General

Therefore, I am hoping, for all these reasons, that you will not take it ill of me if I say something about operas in general, some things quite different from anything you will read in catalogs or even in books, professionally designed to teach you how to be musical. Frankly, I don't believe in trying to teach people to be this or to be that. It is time enough when they ask of themselves. But, if I can do something to make you believe in the worth-whileness of studying your wonderful operatic catalogues from one end to end, and studying especially the wonderful reproduction of great operatic music, I shall do as much as I could reasonably expect and you will, some day I believe, bless me.

I am not setting up to be a teacher or lecturer or uplift or anything of the sort; but simply a suggester. That is certainly humble enough and I hope you will accept what I say in that spirit.

Two thousand five hundred years ago great assemblies of wonderful people, people more generally intelligent than have ever since trod the globe, people whose efforts at understanding the meaning of life and the glory of beautiful living and thinking have given us literature, art and thought wholly unsurpassed by the product of any later age, gathered together upon the several occasions of their great national festivals under the genial skies of fairest Greece, by the side of the blue waters of the Aegean Sea, to hear and see the supreme intellectual, physical and aesthetic works of their greatest men. To the ancient Greek, life rightly lived included the right cultivation of every function. The mental and the physical must be developed equally. Music, gymnastics (including in these terms, as the Greek did, all artistic and all physical culture), poetry, the drama, history and philosophy were the common studies of every child and the common possession of every citizen. At the great "games" held each fourth year, at the foot of Mount Olympus, the ripest products of Greek intellectual genius were publicly recited and the most powerful products of the dramatists publicly performed before the multitudes who gathered within the amphitheatre, in the intervals between the athletic contests. The tragedies of Aeschylus, of Sophocles and of Euripides, the comedies of Menander and Aristophanes, the Iliad and Odyssey of Homer, the Histories of Herodotus and Thucydides, were thus acted or recited, as the case might be; and in this way were duly "published" to the intellectual world.

Acting to Music

The great dramas, such as the Oedipus of Aeschylus, the Philoctetes of Sophocles and the Alcestis of Euripides, as well as the merry comedies of Aristophanes, in all the exquisite absurdities of the birds, the frogs and the clowns, were acted by professional performers, who appeared in masks and declaimed their lines to the accompaniment of musical instruments, which provided a rising and falling melody appropriate to the sense of the words. The practice of the Greek dramatists to provide a chorus, which was grouped on either side of the stage and furnished a running commentary on the action, personifying Fate, the Gods, Nemesis or some similar abstraction, not only gave opportunity to paint clearly the moral lesson worked out in the fates and tragedies of the characters, but afforded full sway to the musical science of the Greeks by allowing them to develop the idea of rhythmic singing or, rather, declamation, to a point of very considerable perfection. This wonderful Greek drama we still can read and still appreciate, but we can never thoroughly understand it because we do not know just exactly how the verses were declaimed or how the chorus went through its work.

The intellectual night that settled down over Europe after the barbarian invasion of Italy in the fifth century A.D. was relieved by scarcely (Continued on page 62)
a glimmer save the light that burned at Con-
stantinople, and the fateful candle gleam that
burned, only to be brutally stamped out, in
those valleys where dwelt the Waldensian
and Albigensian peoples. But the fire of the Renais-
sance, bursting into full flame at the taking of
Constantinople by the Turk in 1453 A.D., to-
gether with the discovery of the New World by
Columbus forty years later, brought about a
liberation of the human intellect and the crea-
tion of a spirit of inquiry to an extent scarcely
credible even to-day. The study of classical
Greek and Roman literature became the pas-
tion of every man and woman who would be
thought liberal minded. Popes took more in-
terest in Hellenic things in Thomas Aquinas, ca-
dinals and princes translated Socrates and forg
the Latin current of the convent and the brava-
ry. The death of the Greek Empire at the
hands of the Turk was the signal for the spread of
Greek learning throughout Europe. The Dark Ages were dead and modern Europe had be-

The Gentlemen of Florence

During the sixteenth century, what with the
religious reformation and the growth of liberal
learning which has sprung into birth at the
Renaissance, the musical ideas of the polite world
progressed amazingly. No longer confined to
the uses of the Church, music became secular.
Every lady played the Violin, every gentle-
man the lute. Persistent efforts were made to
discover some connection between music as then
known, and the great Greek poetry and drama
which were now forming the models for com-
position. During the first forty years of the
closing years of this century, a society of wealthy
musical and artistic amateurs, meeting in the
beautiful city of Florence, decided to attempt
the production of the Greek drama, adapting
it to contemporary taste, with the music
arranged as nearly as possible like the original;
and in this way to bring about a revival of
dramatic writing and acting in its ancient purity.

Count Bardi and his friends had no notion
that they were about to make a musical revolu-
tion. But how often it happens that the most
important and revolutionary ideas are born
unnoticed. These sixteenth century Italian gen-
tlemen thought they were going to make an
impossible revival of Greek art; in fact, they
were going to create opera.

Messer Peri

Persecuting in their task, the musical friends
finally brought their labors to a conclusion, with
an adaptation of the legend of Orpheus, he
of the magic lyre, as told in Greek mythology,
the story of the poet and singer who sang so
sweetly that the dead is led him, forgetting ancient animosities. Orpheus and his
Eurydice (their stories were most beautifully
made into music by that great man Gluck, two
hundred years later, and you can hear of
Homer's lovely record of the great "Che farò?
air); this was the theme of the first opera. Com-
missioned by Count Bardi and his friends as a
revival of the Greek drama with music, it turned
out, under the hand of Messer Jacopo Peri, to be
a real music-drama, with action, chorus and stage
business performed to music composed in best
Italian style and played by a band of viola, vir-
"ginals, flutes and shawms.

Jacopo Peri did not succeed in reviving Greek
music, but he did something ever so much bet-
ter and more important. He invented a method
of declaiming to music and he invented the oper-
aric "air." He discovered how to write music
in such a way that the spoken parts of the story,
which carry the plot, could be sung by the voice
accompanied by a simple chord here and there
struck in just to carry the singer on the pitch. This
was the famous "recitative" which all the
old Italian opera employ and which can be
heard to its perfection in the oratorios of
Händel.

Peri went further. He also developed the
operatic "air," that is to say a song, forming part
of the drama but developed so as to show off
the vocal capabilities of the singer and to afford
the latter an opportunity for display. With
these two ideas Peri practically invented the
modern opera.

The Greek drama had no notion of the song or
air; but Peri found his Italian temperament
dissatisfied with continuous recitative and he
could not, at that stage of the game, in musical
development, find a way of making it more
than formal at best. Three hundred
years later, very nearly, Richard Wagner
took the same idea and made continuous recitative
the basis of his great works. You never can
listen to the Ring, to Tristan or to Parsifal, you
never think that this is what it all is; for Wagner
was able to weld thought and tone, as the half-
sung, half-spoken recitative, he laid the foundations for every modern record
you can put on your machine to-day, in which
the glorious art of great singers is reproduced
to you. "Opera" is a Latin word and means simply
"works." Bardi's friends called these pieces of
theirs just "works." The larger styles were
"opera majestica" or "smaller works" and later on called
by the irrepressible Italians in their own tongue
"opera buffa," or "comic opera."

Rightly speaking, then, any and all operas are
dramatic pieces, tragic or comic, set to appro-
 priate music, sung instead of spoken. You can
study out the differences between Italian and
German, English and French opera (for all
schools have had their day) just as you like,
and can hear whole operas from records from
outset to finale; yet you can never get away from
the fundamental notion of recita-
tive and air; and opera is the
Close of This Recitative

That is my little recitative on the beginning
of opera. Perhaps you will not mind if I re-
turn to the subject in a different way a little
later on. Meanwhile, you can try a perfect
example of the ancient recitative and aria by
getting the wonderful Lucia di Lammermoor,
by Donizetti, written by him in the Italian
style as early as 1711. Schumann-Heink and
Julia Crusell have recorded it and perhaps
you want. It is a perfect type of the sweet, subtle
and wholly beautiful old manner. If you want
to know opera rightly, begin by studying that.
It is still near enough to the days of Peri to be
understood if you get up to it. It is a musical
enjoyment and a musical interest. To study it
well and drink in its beauties is not only to take a step in a fascinating
pursuit, but to be vastly entertained the white
THE TALKING MACHINE WORLD

CONTRACTS ARE CANCELED

Important Letter From President of Columbus Graphophone Co. to Dealers

The following letter has been sent to Columbus dealers by Francis S. Whitten, president of the Columbus Graphophone Co.: 

"In view of the recent Supreme Court decision, we consider it our duty to notify you that the dealers' contract existing between you and this company is no longer valid, and is hereby canceled.

"We anticipate that this new condition will not interfere with or disrupt our present business relations. We expect to continue to furnish you with our product and give you the same hearty and helpful cooperation as heretofore, and we expect you to give us the same loyal and interested representation.

"We have in course of preparation a certificate which will formally indicate that you have qualified as a Columbus dealer and are authorized to handle Columbus products, which certificate we hope to send you in the near future."

MANTAIN YOUR INDIVIDUALITY

Do not surrender your individuality, your identity. Stand for something. The carbon copy is seldom sent out of the office. Better be a ten-penny nail in the plant where you work than try to be a steel girder that won't fit.

NORTHWESTERN CABINET COMPANY

Menomonie — Wisconsin

We are exclusive manufacturers of talking machine cabinets. We can furnish them either in white or finished. Special designs created and submitted if desired.

SPECIAL OFFER

We have a quantity of cabinets made for a concern which went out of business before shipment could be made. They are in oak, mahogany, height 50 inches, depth 23 inches and width 22 inches, with fancy carved legs, well top, beautiful massive design throughout. This is a big bargain for a quick purchase. Write for particulars regarding this special offer.
Pathe Phonograph $175
Other models $25 to $225

No Needles to Change
The Pathe Sapphire Ball takes the place of needles. It need not be changed.

Long Life to Records
The Pathe Sapphire Ball cannot possibly cut, grind, rip or mar the record's surface.

The Pathe Controla
With the Pathe Controla you may increase or decrease the tonal volume of the Pathe Phonograph at will.

Plays all Records
Each Pathe Phonograph plays not only Pathe Records, but all other makes of records, and plays them perfectly.

Don't you want to line up—
With a phonograph that—promises best for the future?
Yes — Pathe —

It's going strong right now—
And so are the Pathe Records—
But the dealer with business vision should look way beyond the present.

And if he does—he can see the fine desirability of a Pathe connection.

Pathe arrived long ago—is moving ahead fast—but it's this present momentum of Pathe publicity that later on will provide the greater returns for the dealer who starts now, and builds with Pathe.

Write us about the Pathe proposition.

Williams-Davis-Brooks & Hinchman Sons
26 East Congress Street  
Detroit, Michigan
Just now—
Some don’t know the value in “daylight saving”
But they will.

Some dealers don’t know what Pathe would mean to them.
But they might.
There’s many a value that has not been given its due appraisal.
As a suggestion — investigate Pathe.
From the inside point of view, we can tell you of terms and conditions that should appeal to you.

The Pathe Sapphire Ball takes the place of needles. It need not be changed.

Long Life to Records
The Pathe Sapphire Ball cannot possibly cut, grind, rip or mar the record’s surface.

The Pathe Controla
With the Pathe Controla you may increase or decrease the total volume of the Pathe Phonograph at will.

Plays all Records
Each Pathe Phonograph plays not only Pathe Records, but all other makes of records, and plays them perfectly.
NEW YORK STATE SONORA DEALERS HOLD CONVENTION

Gather in Syracuse and Discuss Business Problems—Hear Interesting Addresses by President Brightson, of Sonora Phonograph Corp., and Others—Enjoy Banquet at Onondaga Hotel

About seventy Sonora dealers and members of the Gibson-Snow Co., Syracuse, N. Y., Sonora distributors, were in attendance at the first annual convention of the Sonora dealers in this jobber's territory, which was held recently under the auspices of the Gibson-Snow Co.

The purpose of this meeting was to enable the various Sonora representatives of New York State to get better acquainted with each other, and to have an opportunity of meeting the directing heads of the Sonora Phonograph Sales Co. The convention was a decided success, and all of the dealers were enthusiastic in their praise of the practical benefit derived from the meetings.

The dealers convened at the Gibson-Snow headquarters at 9 o'clock, and during the morning and the early part of the afternoon a number of informal conferences were held regarding distinctive features of Sonora products, and practical sales suggestions.

At 3 o'clock they adjourned to the Onondaga Hotel, where a short address of welcome was made by Nelson P. Snow, vice-president of the Gibson-Snow Co., Inc. Among the other addresses made at this meeting was a splendid talk on "Sonora Quality," by George E. Brighthson, president of the Sonora Phonograph Sales Corp., which is reproduced herewith. Joseph Wolff, treasurer of the Sonora Phonograph Sales Co., spoke on "Trade Possibilities in Connection With the Sonora," and Frank J. Cope, the company's director of advertising and sales, gave one of his usual effective addresses on "Advertising as a Whole," and as applied particularly to the Sonora line. Mr. Cope gave the dealers some idea of the tremendous publicity campaign which the Sonora Phonograph Sales Co. has in view for 1918.

A banquet was held in the evening at the Onondaga Hotel, and during the course of the dinner informal addresses were made by a number of the dealers who told of their experiences in handling the Sonora product, and of the remarkable strides in popularity which have been made by this high-grade phonograph in recent years.

Geo. E. Brightson's Speech

At this time it might be well to bring to your notice that it is the duty of any phonograph dealer to watch the market closely and compare what one phonograph maker is doing with what another manufacturer is doing. Dealers who have been following the progress of the phonographs have done. At times we are influenced by learning what some others are doing,— much as offering inducements to the way of discounts or terms. Understand that I hold in the highest respect our greatest rivals for supremacy, and appreciate and give them full credit for whatever they are doing, or have done, in the way of improvements or production.

This summer I went to the Victor Co. The world was reporting extraordinary things from their efforts. The great industry they have built up is the public's tribute to the value of the work they have done. They have spent tremendous sums of money to record the names of the foremost vocal and instrumental artists of our time. This will be appreciated by the generation to come, and will form a lasting monument to the remarkable and gigantic Victor organization. Their expenses advertising has helped very greatly in this huge undertaking, and in the making of a phonograph, so determined they should have done.

The Columbia Co. also deserves much credit for many of its productions.

Personally, I have repeatedly said, during the past four years, that I would not want an instrument that could not play all disc records. These thoughts are not new with me, for our 1913 and 1914 advertising substantiates my views in that respect. At the end of the Sonora Phonograph Corporation, we formulated a plan of keeping off all other brands-bargains, we refused to hire any person who had ever been in the employ of either of the then existing companies, whether it be a mechanic or a clerk. We would not consider a pattern for a cabinet that looked like one of the others, and we also followed original plans of our own for distribution. It has been our policy to build our own foundations, to pay full credit for genuine advertising by others, to hold us in our own with a strong arm. While we are glad to give other manufacturers all we can, to us, it seems we ask only for that which belongs to us.

Here are some facts, which it is worth while to remember—and remember they are facts:

Before the phonograph was invented by Emile Berliner, I still say, and furnish absolute proof, if it be necessary, that Sonora was the first company to manufacture a phonograph that could be sold. The first to make a machine for disc records, with both the transmission and reception, the one of a motor and abandoned by the Sonora Co. about seven years ago.

The first to have an automatic stop—the first to have a tone arm which entered only to have a phonograph motor.

The first to play a disc record with a jewel needle—the first to play all sides of a disc record without any change in the tone arm, as we had accomplished in the first model.

Sonora was the first to depress the growing evil of phonographs that believe in the reports of the police or a recommendation by the Jury at the Panama-Pacific Exposition for the silencing of phonographs. Our recent advertising, condemning the growing evil among phonograph manufacturers to the point of the police notice and a recommendation by the Jury at the Panama-Pacific Exposition, is one indication of the Sonora's views of the growing evil among phonograph manufacturers, because we have an interest in the welfare of our business. The only phonographs that are not causing these mental and financial losses are those that are under the Sonora's control. They are loved by the dealer, because they are loved by the manufacturer, and they are loved by the public, because they are well advertised and held up to the highest standards of advertising and distribution, and often many return second-hand instruments.

Why MUNOLA Sales Are Increasing

Co-operation offered the dealer is of such caliber that it creates business, stimulates his confidence, and his sales to the consumer are made with greater assurance that satisfaction is guaranteed.

Owners of MUNOLA Phonographs appreciate what this medium priced instrument has brought to them: Tone qualities, cabinet work, and the distinct advantage of playing all records. Qualities such as these have never before been expected of an instrument selling at so low a price.

Dealers make money on MUNOLA Phonographs because:

**FIRST**—The retail price is low and advertised.
**SECOND**—The MUNOLA is good.
**THIRD**—The discounts are legitimate.

You can become a MUNOLA dealer in your town if there is not one there already. Write today for full particulars.

America's Leading Popular Priced Phonograph

MUNZER MANUFACTURING CORP.

307 Sixth Avenue So.
Minneapolis, Minn.
George E. Brighton
ably the strongest selling force that color, and that degree of pride is largely felt by Simpex owners.

Our advertising has been different from all others, and will continue to be "classy." We believed a photograph was essential in advertising and sales piece, which seems to reach the classes, and not merely the masses. That greatly increases sales, and the very high class of sales attained.

We are not the only company that we were right in the course we pursued, and which we modestly, are pursuing.

We have not stopped making improvements, nor are we waiting on our laurels. I do not wish to this time to give any trade secrets—for that reason I cannot tell you in print, but I will merely indicate that within a year from now we shall have the results of some of our lengthy and expensive experiments, which, when placed before you, will be of interest to phonograph dealers and manufacturers everywhere. I wish you would follow me on your course for selling Simpex. I wish you would always remember this reference, and in less than six months, I can say, "I told you so."

The marked success we have found, and our great success have caused some unscrupulous ones to attempt to decieve the public with a few instances by advertising names closely resembling ours—in one case the changing of a letter such as A to H, for an "E," otherwise known as H. With the Simpex name we are proud to be known as "Simpex," or "dwell the Simpex," and generally making unmistakable statements. To protect our industry, as far as we can, I wish to ask your cooperation in their defense, which are now being made, to protect the rights, your business, and prevent the deception of the general public.

Manufacturers of Musical Instruments

NEW RETAILER IN PHILADELPHIA
Theodore Presser Co. Opens Handsome Victor Salesrooms at 1710 Chestnut Street, That City, With A. D. Proudfoot as Manager

PHILADELPHIA, Pa., April 2—The latest addition to the retail Victor showrooms in this city are those recently opened by the Theodore Presser Co., well-known music publishers and dealers, at 1710 Chestnut street, in the building adjoining their old-established quarters.

The new showrooms have been fitted up in a most elaborate manner, with Unico equipment throughout and under the management of A. D. Proudfoot, formerly manager of the retail ware- rooms of the Esterly Piano Co., in New York City. It is expected that the standing of the Presser Co. in local music and business circles will insure the success of the department from the outset. A satisfactory stock of machines and records has been secured, and Manager Proudfoot reports that a satisfactory business has been transacted since the opening day.

NEW COLUMBIA DESIGNATIONS
George W. Hopkins, general sales manager of the Columbia Graphophone Co., New York, has sent out a letter to Columbia dealers informing them that in an endeavor to simplify the ordering of Grafonolas the company has inaugurated new type designations covering the instruments in the Columbia catalog.

In the future, when a dealer for example orders a mahogany Grafonola No. 15, the order will be filled with any type or size of Grafonola No. 15, the new designation will be type "C" oak, etc.

When ordering electric, the word "electric" is utilized, as for example type "E" mahogany Grafonola will be or- dered as type "G" electric mahogany Grafono- nola.

The complete list of the old and new designations with the list prices is as follows:

Grafonola No. 15 is now type "A," list price $18; No. 25 is type "B," $30; No. 35 is type "C," $45; No. 50 type "D," $85; No. 75 type "E"—$110; No. 100 type "G," $150; No. 150 type "H," $200; No. 200 is type "L," $250; No. 125 is type "E," $110; No. 175 is type "K," $215; No. 225 is type "L," $250.

JOIN IMPORTANT ASSOCIATION
The Otto Heineman Phonograph Supply Co., Inc., has been elected a member of the Ameri- can Manufacturers' Export Association and the National Association of Manufacturers. This company's export activities have increased ex- tremely during the past year, and Mr. Hein- eman is making plans to take care of a record- breaking export trade during the coming year.

The best and biggest men of all times have been self-made men—most of them started out with what the world would call a poor chance. Their chances were no worse and no better than those which surround every individual today.

We started advertising Udell record cabinets in the first issue of The Talking Machine World that was ever published.

Every year since then we have consistently advertised Udell cabinets.

As a result of our publicity several thousand Americans are familiar with Udell cabinets and the Udell trade mark.

The industry has been steadily kept on intimate terms with Udell cabinets and the Udell trade mark.

Today the Udell trade mark on a record cabinet is nationally recognized by talking machine dealers as a guarantee of su- preme quality and of an excel- lent profit for the dealer.

Happenings in Dominion of Canada

NEW MANUFACTURING HOME FOR COLUMBIA IN TORONTO

Occupancy of Large Building at 54-56 Wellington Street Gives Company Double Present Factory Space—New Concerns Enter Field—Some Staff Changes—Other News of Interest

Toronto, Ont., April 8.—The Columbia Graphophone Co. have just closed a deal whereby they will occupy, within a few days, the large modern building at 54-56 Wellington Street, Toronto. This will not only give the company more than double the manufacturing space heretofore necessary, but will bring them into the heart of Toronto, which is destined to become the manufacturing center of the Dominion, enabling Jas. P. Bradt, the company's general manager for Canada, to keep in close touch with the talking machine trade, and making it easy for Columbia dealers to keep in personal touch with the management.

The company announce that they have extensive plans in view of aiding the dealers even more than before. In this connection the latter will, no doubt, quickly get the habit of dropping in and talking things over, as Mr. Bradt's score of years' experience in talking machine affairs in different parts of the world, which is freely placed at the command of Columbia dealers, should be of inestimable benefit to them.

The primary reason for this move is the increase in Columbia business, which has made it impossible to keep pace with the demand for Columbia products, particularly records, in the quarters being vacated. New record-making equipment is already on hand, and is being rapidly installed. This, Mr. Bradt states, will at once increase the facilities for taking care of the business, which has more than doubled during the past year, and with an eye to the future facilities are provided to again double the output as soon as necessary.

The cabinet manufacturer and the making of completed Grafonolas will continue as at present, a number of large woodworking plants being in use on this work. So the new premises will be reserved to supply ample record manufacturing, stock and distribution facilities. The Dictaphone will also be taken care of in the new location.

Large and handsome offices and ideal showroom facilities are being provided, as the chief consideration in locating on Wellington Street was the desire for a location convenient for the trade. It is primarily this reason, state the management, that influenced the company in going to the expense, in building in what is chiefly a wholesale, showroom district.

James P. Bradt, Columbia general manager for Canada, was wearing an unusually happy expression when asked about the new Columbia factory. "It is great," he said, "a lot better than we expected to secure, and ideally located. We hunted Toronto from end to end, and at different times found three factories which appeared to be the last word in desirability, but they were all bowled over and forgotten when we found the Wellington Street premises. There is no better wholesale block in the whole of Toronto than that on Wellington Street, between Bay and York streets."

"My Lyle, who was introduced to the Canadian trade in February, is very able and strongly on the job as my co-worker. His intimate acquaintance with and knowledge of all manufacturing problems will be of great value in making our new factory efficient and dependable in every department. Assistant Manager Hoffman, who came here from our Bridgeport factory two years ago, is enthusiastic over the prospect of having a model plant in Toronto. We hope to be 'at home' in Wellington early in April. We extend a very cordial invitation to our friends to come in and look us over."—C. J. Pott, Canadian sales manager of the

Otto Heinechen Phonograph Supply Co., Inc., New York, has returned to the Toronto branch after a strenuous week in New York, where he attended a convention of the firm's head office officials, branch managers and factory managers.

Malloch Bros., Kingston, Ont., Victor dealers, C. W. Lindsay, Ltd., Columbia, etc., also of Kingston, in their advertising feature largely a

New Columbia Building in Toronto

selected list of popular selling records of classic, instrumental, patriotic and dance listings and find this a capital way of disposing of a selected list.

During the period of "heatless days" when theaters and movies were closed, the Columbia, Graphophone Co. and their dealers throughout the country featured large-sized copies advertising the purchase of Grafonolas and records as a constant reminder of music in the home and never off the job entertainers.

The Talking Machine Supplies Co. has been registered in Toronto.

Arthur Middleton, the well-known Edison artist, recently appeared in a concert recital here in conjunction with the Toronto Symphony Orchestra. The dealers report having sold a large number of records of this artist as the natural sequence.

F. J. Kennedy, formerly of the Mason & Riceh staff, Toronto, is again with headquarters, having returned in the capacity of manager of the Victrola department. A couple of years ago Mr. Kennedy went to Winnipeg and was manager of the Victory department there, which position he resigned to return East. A recent trade visitor to Toronto was M. H. Matthews, president of the Thomas Mfg. Co., Dayton, O., who was over having a look at his firm's Toronto branch, in charge of P. K. Wood and F. J. Foley. Mr. Matthews reports a

largely increased output of Dayton motors, tone arms and reproducers, as a result of the recent installation of new machinery and enlargement of their manufacturing facilities.

W. B. Parker, vice-president and general manager, and F. A. Trestrail, advertising manager of the Williams Piano Co., Ltd., Oshawa, recently resigned their respective offices with that firm to devote their entire time and attention to the business of the Musical Merchandising Co., distributors in Canada of Brunswick phonographs.

John E. White, sales manager of the Williams Piano Co., announces that he is also joining the Brunswick distributing organization. The plans of the Musical Merchandising Co. include the opening of branches at Winnipeg and Montreal. Their offices and showrooms in Toronto are in the Excelsior Life Building, at the corner of Adelaide and Toronto streets.

J. W. Cawell, formerly Eastern sales manager of White Sewing Machine Co., has resigned that position to join the Starr Co., of Canada. His territory will be all Ontario, and as he makes a change only after a close observation of the phonograph business in general, and the Starr line in particular, he should make good.

To avoid confusion because of similarity in names, and also to make their name more indicative of their business, the distributors in Canada of Starr phonographs and records have changed their firm name. In the future it will be "The Starr Co. of Canada," instead of "Canadian Phonograph Supply Co."

The head-quarter of the firm remain at London, Ontario. John A. Gridden and W. D. Stevenson, proprietors of the firm, are just approaching the close of their first year's business, which has exceeded their brightest hopes. For some time they have been receiving phonographs from the factory at Richmond, Ind., by express, in order to have goods for delivery.

Rea's Drug Store, Windsor, Ont., have had the formal opening of their music room, which has just been completed at the rear of the store. Rea's are featuring the Brunswick phonograph.

W. I. Wilson has taken up his new duties with the Pathe Co., and is already deeply engaged in evolving new ways and means of giving service to Pathe dealers.

Mr. R. S. Dillon, former Ontario traveler for R. S. Williams & Sons Co., Ltd., Edison sales branch, is now located at the Toronto head-quarters as manager of the Edison sales department. Mr. Dillon is succeeded on the road by J. A. MacKay.

James Malcolm, president of the Pathe Co., is at present on a Western trip, which will take him out to the Coast.

Thomas Mundy, Toronto, has joined the Canadian Symphonola Co. as sales manager.

Recent additions to the growing list of Pathe dealers are: Chalzone & Co., Lindsay; E. Y. Warne, Peterboro; Minities Music Store, Sarnia; Jury & Leslie, Owen Sound; Wesley Walker, Goderich; A. G. Day, Orillia; Martin Music House, Brampton; Turner Piano Co., Port Arthur.

THE RENÉ MANUFACTURING CO.

MONTVALE, NEW JERSEY
"MUSIC IN THE HOME" IN MONTREAL

Talking Machine Men Support the Campaign—American Machines in Favor—General Business Outlook Reported Most Satisfactory

Montreal, Que., April 4.—A representative meeting was held recently of piano and talking machine dealers to listen to E. C. Syphes, president of the "Music in the Home" movement in Toronto, and W. H. Mowbray, secretary. A goodly amount was subscribed by those of the trade present, and it was announced that Montreal's leading English Daily and Weekly and French Daily would feature a "Music in the Home" page very shortly.

W. W. O'Hara, general sales manager for Layton Bros., Edison and Columbia dealers, won the third prize in the recent Canadian Edison window display contest. C. W. Lindsay, Ltd., lately displayed in their handsome show windows two new art design Pathéphonos, the first to arrive in Montreal.

N. G. Valiquette, Ltd., have inaugurated a Pathé Club open to 100 members. As special inducements they offer easy weekly payments, reasonable extension in case of sickness, accident or loss of employment and clear receipt in case of purchaser's death.

Sales Manager W. W. O'Hara with his usual aggressiveness made capital out of St. Patrick's Day by dressing Layton Bros. show windows appropriately in honor of Ireland's patron saint. Edison and Columbia models were decorated with green ribbons, pots of shamrocks and records of Irish artists prominently displayed. The whole drew most favorable attention from passersby.

The Melodia Co., of Canada, have recently put on the market a new model.

The Berliner Gramophone Co., Ltd., are now distributing the new 284-page Victor catalog listing over 9,000 records.

The following world-known Victor celebrities will shortly appear in Montreal—Alna Gluck, Efrem Zimbalist, Marmellati and Helfetz.

Joseph Brien is now calling on the French trade in the interests of the Pathé Co. He is working from the Montreal office.

J. G. Harrison, of W. H. Thorne & Co., Ltd., St. John, N. B., Edison jobbers in the East, has returned from New York, where he attended the Edison jobbers' convention. This firm has arranged for Odette Le Fontenay, soprano, assisted by Jan Glocner, cellist, to give a series of Edison tone tests in different Maritime Province towns, including St. John, Fredericton, Picton, New Glasgow, Sydney and Glace Bay.

Ed Archambault has purchased the old J. A. Hurteau business from C. W. Lindsay, Ltd., and is turning his own store and the Hurteau store, which are next door to each other, into one large store. He will feature the Pathéphone and Pathé records.

Madame A. Didier, who has been in charge of the French section of the Pathé Co., has gone into business on her own account, opening a large Pathé department in the store of Dupuis Frères, the leading French departmental store in Montreal. Madame Didier is well acquainted with the talking machine business, having been in charge of the Pathé department at N. G. Valiquette, Ltd.

H. L. Hewson & Son, Ltd., A. M. Berker, N. S., distributors of the Pathéphone for the Maritime Provinces, are moving into their new warehouse and offices, where ample facilities will be afforded for the development of their growing business.

The Covon Piano & Music Co. are delighted with results since handling the Brunswick line and are building up a large clientele with this make as their leader.

Charles Cubros reports exceptionally good business for Sonyors and Axolot-Vocalion business the past month with an increased demand over February in the call for the various higher-priced models of mechanion.

H. C. Wilson & Sons, Ltd., Sherbrooke, Que., are firm believers in the continued popularity of Vircolas and Victor records, to which they are giving aggressive and exclusive representation in Sherbrooke and the surrounding county and in their branch stores. Owing to the increased business a large part of the grand piano floor has been given over to soundproof demonstration rooms.

A. Ramsperger, in charge of the Grafonola department of J. W. Shaw & Co., reports that since removing the department to the ground floor business has increased wonderfully. The new style Columbia, No. 100, is quoted as an exceptionally good seller.

The Canadian Graphophone Co., Columbia distributors in the Province of Quebec in both their wholesale and retail departments, report briskness that augurs well for the future in both machines and records.

OPEN NEW SALESROOMS

The Ideal Phonograph Co., of Rockford, Ill., has opened two salesrooms in that city, one at 819 West State street, under the management of C. R. Poole, and the other at 1324 Seventh street, in charge of John King.

WITH THE TRADE IN WINNIPEG

Collecting Old Records for Soldiers—W. P. Trottze Re-Enters Trade—Hudson Bay Co.'s Payment Chart for Installment Sales

Winnipeg, Man., April 2.—Stanwood's Ltd., Columbia dealers, recently appealed through the press for old records which they collect and send overseas without any expense to the donors. This example could easily be emulated by other aggressive dealers.

W. P. Trottze, of Kinistino, Sask., who some time ago dropped out of the phonograph business, is back in the game again strong and good with the Edison line.

C. E. Locke, Tara; W. A. Bowen, Ridgeway; W. K. Elliott, Brampton, and Niagara Music Store, of Niagara Falls, have added the Brunswick phonograph line.

The Winnipeg Piano Co. secured first prize in the Canadian Edison window display contest, and feel quite elated over their victory by beating out Toronto in second place, and Montreal in third.

The following system of extended payments is announced by the Hudson Bay Co.'s, Calgary, Alta., Grafonola department:

<table>

It is reported that Edison Hall (the Kent Piano Co., Ltd.), are having a $50 Edison prize essay contest open to the school children of that city and vicinity.

ESTABLISH MANY NEW DEALERS

Boston, Mass., April 8.—Oscar W. Ray, New England manager of the Emerson Co., makes a most enthusiastic report of the way dealers are taking hold of the new nine-inch records. Among the houses that are taking large consignments are the Jordan Marsh Co., Magrane Houston Co., Timothy Smith's, out in Roxbury; J. C. Coldwell, of East Boston; Harry Schule, of South Boston; Sage Allen Co., of Hartford, Conn.; John Petit, of Roxbury; M. J. Elvedt, of Allston; Kittredge's, in Lowell; James W. Hill, at Manchester, N. H.; Kery's Music Store, in Boston, and Seaforth's at Portland, Me. Mr. Ray says that March has been the best month in the New England territory since he took hold of it and that prospects are excellent.

AMERICANS embody all the good qualities and special features of phonographs, clear in tone, beautiful in design, finest finish, smooth running motors.

We stand back of every American

---

American Phonograph Co.
39 Fountain Street, N. W.
GRAND RAPIDS, MICH.
The talking machine is the ideal instrument to provide the relaxation, refresh and strengthen the mind and dispel gloom and fear. But to bring these facts home the dealers must advertise and the show window is the best medium through which to demonstrate the entertainments, the diversion and the inspiration that the talking machine is able to bring to the millions of homes that are more or less affected by the war.

A Well Arranged Spring Window That Will Appeal to Dealers

In former articles of this series I have called dealers’ attention to the great aid “cut out” figures have proved to be in making interesting and inexpensive “talker” displays in connection with records. No other special feature that I can think of stimulates the sales of records more than such displays, probably on account of the human interest.

The “craze” for dance records seems to be as strong now as it was before our country entered the war. Several prominent dealers have urged me to design a dance window on that account and describe it in The World. The display shown in the photographs is intended to illustrate what a splendid time and entertainment people can enjoy in their own home by the aid of a talking machine. A simple baluster, finished off at each end with vases, forms a graceful background for the two dancers. Back of this arrangement are Japanese lanterns in red, green, blue and yellow, which form a most dazzling color combination, and give atmosphere to the display. The two little trellises arranged back of the vases are thirty-six inches high, enamelled white and made into a hub or ring at the top to support the two birds of paradise. These trellises also serve to support the rose branches which fit so nicely into an early summer window. The two figures are adapted from a Vanity Fair title page which pictured a skating scene. The two lanterns held by the dancers could be used with any lettering the dealer might desire. The dancers could also be provided with real lanterns and electric bulbs placed inside, the wires being concealed back of the arms and figures to the nearest floor plug which, of course, would heighten the effect considerably. The figures were made separately, the girl standing in front of the boy with about four inches between them, which made the arrangement much more realistic. To make the most out of this display one fine talking machine should be arranged near the center of the room.

World Record Sounds of Battle

Henry G. Rhodes, Whiteville, Tenn., who describes himself as a “Phonograph fan,” is shortly to enter the military service, and advises us that his ambition is to carry about 100 blank records to France with him and record the sound of the big guns right back of the firing lines in order to let the folks at home hear what they sound like. A motion picture has shown us the big guns in action, and probably the phonograph will let us hear how they sound in action.

An Artistic Spring Window Suggestion Described for Talking Machine Dealers

By Ellis Hansen

SONA-TONE SHOP OPENED

New Brooklyn House Featuring Sona-Tone Phonographs—Now Able to Make Prompt Deliveries of All Types of Those Machines

A spacious and attractive Brooklyn Sona-Tone Shop was opened in Brooklyn on April 3, with Franklin Riker, a well-known musician, as sales manager. This shop is situated at 322 Livingston street, within a half block of the Montauk Theatre. The Nevins street subway station is just around the corner, and Mr. Riker is enthusiastic over the desirability of the shop's location and the unlimited opportunities for closing an excellent business.

This shop will carry a complete line of Sona-Tone phonographs, and arrangements have been made which will enable the shop to make immediate deliveries of all types. The showrooms are attractively furnished and decorated, and Mr. Riker is leaving nothing undone to make the warerooms a Mecca for music-lovers in that section of the city.

One of the most interesting features of the organization of this Brooklyn Sona-Tone Shop is the fact that Mr. Riker is a thoroughly trained and experienced musician, having studied for three years in Italy, under one of the best-known maestros. Possessing a remarkably fine tenor voice, his concert work has attracted considerable attention from critics and from members of the musical world. At the present time he holds a position as soloist in one of the largest and most influential churches of Brooklyn. Mr. Riker believes that every salesman of musical instruments, especially talking machines, is a 100 per cent. salesman only when he knows the practical side of music, and knows when and how to appeal to his patrons through understanding tone quality. He has a number of important plans to announce in connection with his work at the Sona-Tone Shop, and sales during the first ten days have been very gratifying.

FINISHING FRET WORK PROPERLY

How One Cabinet Manufacturer Solved This Particular Problem in a Logical Way

One of the features of many phonograph cabinets that has called forth criticism has been the unsatisfactory finish of the fret work covering the sound chambers. In a great many cases the cabinets, beautiful in every other particular, have been marred by poor work in this connection, due sometimes to the fact that the cabinet finishers did not understand just how to go about handling the fret work. One cabinet maker managed to overcome the difficulty by having the panels finished before the fret sawing was done, the panels being rubbed down after the three coats of varnish, just the same as the rest of the case.

The panels were then nailed together, four in a bunch, with ordinary drafting paper between them, the top panel being turned face downward, and the marking done on the back, it being sanded if needed. The panels turned out well and they presented a fine, clean-cut appearance that was impossible in the old method.

In order to stain the edges left white by the sawing, an oil stain is used, as water stain is inclined to swell the wood and mar the clean-cut appearance of the work. The top side of the fret sawing that shows when it is placed in the case is shellacked with a small, soft brush from the back side of the panel, and the result is very satisfactory. These panels are of five-veneer and are three-sixteenths inch in thickness and go into a small mitered frame that is removable. Any finisher knows how much fussy and fussy work is required to finish a fret saved panel, the rubbing is never flat and the picking out of pine dust stone from the corners of the fret is an almost impossible job, while what is left turns white in time.

The above plan does away with this nuisance. Four panels are fret saved at one time and the work is done on a McKnight saw. For panels in the finished finish, no paper is required between them while fret sawing. By using a good saw blade with little set, or one of the French pattern blades, having no set and running to a narrow back, the work is very smooth and no further labor is required before sending the panels to the finisher.—Veneers.

COLUMBIA DEALERS: Eject-o-files are built to fit the style 75 and others. Slip them in as they are wanted. Why carry that big stock of 85's, etc., when the Eject-o-file does the trick. "The Eject-o-file is Efficient" and you are in business for dollars and cents.

VOCALION DEALERS: A receptacle for records that can be slipped into your style F.-G.-H.-J.-&-K. They are "built to fit." Wonderful convenience and a powerful selling argument. Ask the Salesman.

EDISON DEALERS: Eject-o-files are built to fit the style C-150 and 100. Many dealers are reaping the benefits. Why not you?

"BUILT TO FIT" any machine and a powerful asset for any dealer. Why offer Albums, Envelopes and other antiquated methods of filing to your customer? Eject-o-files are modern and efficient. Prices are phenomenally low.

EJECT-O-FILE SALES CO.

216 W. Saratoga Street
Baltimore, Md.

Most Efficient for Record Filing

Here is shown the Edison style C 150, equipped with an Eject-o-File style 150 E.

The instrument equipped with this device offers a wonderfully simple and efficient receptacle for records.

The record is always at your finger tip. Simply press the index lever and the desired record is gently rolled into your hand. It completes the instrument.

Style 60—Retail $15.00

7 IN 1

Seven strong points in our feature is a powerful selling argument.

1. Controlled entirely by gravity. Will not get out of order.
2. Non-abrasive individual record compartments.
3. Records cannot warp, scratch or mar and are kept clean.
4. 10" and 12" records can be filed in any compartment indiscriminately.
5. In beautiful oak and mahogany finish. Polished, waxed and dull finish.
6. Automatic out signal shows "when and where" a record is not filing.
7. Filing and finding a pleasure. Get the desired record when it is desired.

Style '70—Retail $10.00
THE EXCLUSIVE VS. GENERAL STORE

Some Strong Arguments in Favor of the Former Set Forth by M. E. Taylor, Victor Dealer of Jackson, Miss., and a "Specialist"

Since the talking machine business was young—and that is not so very long ago—one of the points of discussion has been whether or not it was advisable to handle talking machines exclusively, or, whether better course was to handle several lines of merchandise in conjunction with the talking machine department. The views, of course, are varied, according to the personal experiences of those giving them.

The man with the exclusive store, who has won success, naturally maintains the arguments for his method, while the other merchant who carries lines carries some merit in his system. There is no doubt, however, that in many particulars the exclusive talking machine store has some advantages in the matter of attractiveness to the customer, and the service that can and must be given, to insure the success of the business. With an exclusive store, the dealer has no other line to rely upon to make up in profits what he may miss by his neglect of the talking machine trade. In support of the exclusive idea, therefore, the following comment by M. E. Taylor, Victor dealer, of Jackson, Miss., is of general interest. He says:

"We are 'specialists.' We started in business here in November, 1913, confining our entire capital and energy into the talking machine business and to prove that this is a business big enough to sustain itself and not a 'side line' issue as so many have thought. We have now gone through four years and for your information and for the information of thousands of others we take great pride in stating that our business has grown to quite large proportions.

"The customer has learned to come to the exclusive dealer because he has learned from actual service rendered him that he gets what he wants and that well trained employees are telling him the history of each particular record, and in every way making things interesting to him.

"The exclusive dealer as stated before places his whole time and energy into this which he considers as big business and requires as much time as another business in order to give the most critical customer the service he is looking for.

"We believe that more dealers are waking up to the fact that specializing is what is needed. We have time to give close study to every detail to think out what your trade wants, to study each customer, to keep records of each customer's purchases on cards for future reference so as to follow him up closely, to be able to intelligently get to the kind of music he wants without boring him and shortening both his time and yours. This kind of service the customer appreciates. He feels that you are talking that special interest in him and appreciates it.

"We carry the complete line of records because this is service. When the customer asks for a particular record he expects to get it. It is true that some records don't move as quickly as others, but you never know when a certain record will be asked for and to have this record creates an impression at once on the customer that this store in the future is where he will come. So our advice is to carry the complete catalog and have it so systematized as to order immediately as fast as you sell a record to get it right back in stock, and thereby never be out and never lose a sale and never disappoint a customer.

"Now by specializing you can easily do this, because you are just in the talking machine business and by giving your whole time to it you becomes not only profitable but extremely interesting, and, Oh! my watch it grow, watch the customers multiply, watch them come in from your side line competitor. The writer does not in the least wish to hamper the trade by discouraging side line agencies, but if the dealer who thinks this is a little business and places it in just to pay the rents and other items, he is overlooking the biggest business he has ever had.

"If possible for him to do so, let him rent a store elsewhere and just specialize, if not, then by all means build booths and place in a most prominent place at the front of his store a well equipped talking machine department with nothing short of the complete catalog of records.

"There is nothing to fear, just start it right, and watch it grow to be the most interesting business you have ever entered.

"Don't employ cheap help, look around and get the best. It pays. Remember you have the highest grade talking machine with the world's greatest singers, and don't employ cheap help. At all times keep the high prestige of your line before the public in every possible way.

"The same applies to your advertising department. Get up a nice attractive ad or nothing at all.

"The writer may be an extreme enthusiast, but we have found that the above are facts, and to be more frank about it, I have found time to take but one three-day vacation in four years, working even into the night many and many times until 11 or 12 o'clock.

"Now suppose this was a side line and kept us this busy, what would become of the other business?"

MAKING TALKING MACHINE PARTS

The Popular Talking Machine Co., New York, has just placed on the market a complete line of talking machine parts, including single and double spring motors, tone arms, governor springs, main springs, etc. The company has made arrangements to supply the trade with these parts in large quantities, and has already closed contracts with several manufacturers. According to present plans it will also market a line of talking machines which will be known as the "Popular," and these instruments will include all of the types that are in active demand.

TAKES CHARGE IN SCRANTON

Frederick Delano, of New York, has taken charge of the talking machine department in the store of Stoehr & Fischer, on Washington street, Scranton, Pa.

TO HANDLE THE COLUMBIA

Harry Stevenson, furniture dealer of Circleville, O., has put in a line of Columbia Grafoonolas and records in a large new department just opened.
For your customers who want Real Music and whose limit is below $100

THE NEW EDISON DIAMOND AMBEROLA

MANY families in your community want a phonograph that will give them real music, but cannot afford to pay $100 or more for such an instrument. Such families are the best kind of prospects for the New Edison Diamond Amberola because it will give them genuine Edison music at nominal cost.

We have ample and convincing evidence that, musically, the New Edison Diamond Amberola and Edison Blue Amberol Records far outclass any line of phonographs (or talking machines) and records not bearing the Edison hall-mark.

Are you one of those skeptics who like to be “shown”? We hope so, because we like to “show.”

THOMAS A. EDISON, Inc.
AMBEROLA DEPARTMENT
Orange, New Jersey
NEW DISTRIBUTIVE PLAN SOON

To Be Announced by Wm. H. Alfring, Manager of Wholesale Vocalion Dept. of Aeolian Co.

Wm. H. Alfring, manager of the wholesale Vocalion department of the Aeolian Co., New York, announced this week that the company

out this plan of distribution, and, according to present arrangements, Vocalion wholesale headquarters will soon be located in many of the principal cities.

At the present time the Vocalion has been distributed from St. Louis and Chicago, and the dealers in these territories handling this line are enthusiastic regarding the service and cooperation that they are receiving from these two distributing points. The demand for the Vocalion has increased so rapidly that it has been found advisable to divide the country into a number of wholesale distributing centers, so that the dealers in each section of the country may be given maximum service and cooperation.

During the past few months Mr. Alfring has visited Vocalion representatives throughout the country, and, according to reports he has received, this high-grade line will enjoy a banner era of prosperity during the coming year. Vocalion representatives have been concentrating their activities on the development of the better class of business, and the fact that this manufacturer of musical instruments, has been an important factor in the success which this instrument has achieved during the past two years. Meanwhile, plans already laid should mean even greater progress for the Vocalion in the future.

MANY AIDS FOR THE DEALER

Kohler & Campbell, Inc., Have a Well-Managed Department Equipped to Help Dealers Secure Business Along the Lines of Least Resistance

The value of a thoroughly perfected organization has been manifested in the success of Kohler & Campbell, Inc., Fifthth street and Eleventh avenue, New York, who are counted among the world's largest manufacturers of pianos, player pianos and reproducing pianos. The growth of this concern has not only been rapid but has been particularly healthy, and they have, besides developing phenomenal manufacturing facilities, maintained for many years a sales promotion department, which places at the disposal of the dealers many merchandising aids.

The main object of this department has been to study the requirements of the purchasing public as well as the dealer, and to help the latter secure business along the lines of the least resistance, consequently this department, which is under the supervision of Chas. A. Stin, advertising manager, who has had a wide experience in merchandising, has planned several forms of promotion work which have proved most successful. These include circular letters for the dealer's use, catalogs, pamphlets, envelope stuffers, window displays, window cards which may also be used for trolley car advertising, and electrolytied advertisements for use in various sized newspaper advertising. The department is also able to supply the dealer with lantern slides, which may be used in the various moving picture houses in his locality. All of these sales promotion features have been planned after a thorough study so that they will have a most appealing effect on the minds of the people and prove to be a magnet which will draw prospects to the dealer's store.

Vertone Talking Machine Co., Inc., has been incorporated with capital stock of $2,000, to deal in phonographs and musical instruments. The incorporators are Walter B. Craighead, Edith Craighead and Isabell Ross

The Unger Furniture Co. have set aside a large section of their store as a talking machine department handling the Victor line exclusively.

COLUMBIA FORCE IN DALLAS, TEX.

DALLAS, TEX., April 4—H. A. Yerkes, field manager of the Columbia Graphophone Co., was a visitor to this city recently, and spent some

time at the company's local branch, which is under the management of F. E. Erisman. While here Mr. Yerkes congratulated Mr. Erisman upon the efficiency of his sales organization, and the accompanying photograph gives the facilities of these live wires.

During the past few months the sales totals of the Dallas branch have shown a good-sized gain over 1917, and the figures for last December, which set a new record, were exceeded by February. March sales totals are not yet available, but it is more than likely that this month established a new high-water mark for this very successful organization.

TRADE ACCEPTANCE PROVES POPULAR
Delphine Co. Finds That Its Dealers Generally Are Pleased With That System of Handling Accounts as Increasing Credit

Talking machine manufacturers throughout the country are taking a keen interest in the adoption of the trade acceptance as an ideal form of doing business. Many manufacturers regard the trade acceptance as the solution of one of the biggest problems in the business world to-day, and are calling the attention of their dealers to its value and advantages. The trade acceptance is being adopted by the largest institutions in the country as a means to overcome the disadvantages of the unsatisfactory system of long credit. Banks, financial authorities, the National Association of Credit Men, and trade journals are advocating its prompt adoption. The Federal Reserve Banking System has been urging business men to utilize the trade acceptance, and it is quite likely that its use will soon be universal and common.

The average business man is familiar with the principle of trade acceptance, which is an acknowledgment of the debt by the buyer in favor of the seller, for merchandise that the latter has placed in the hands of the former, with which to pay his debt. The buyer agrees to pay at a certain date at his own bank, to the seller, the amount of this invoice, by writing across the face, the word "accepted," with the name of his own bank and his own signature.

This varies from the open book account method only in giving the debt a negotiable value. According to the opinion of a Federal Bank official, the signing of the Trade Acceptance, instead of the cashier's signature, is the ideal method of doing business. The form adopted by the Delphine Co. is reproduced herewith, and this form is meeting with the unanimous favor of the company's representatives.

NEW INVINCIBLE SOUND BOX MODEL

Hector Pocoroba, sales manager of the New Jersey Reproduction Co., Newark, N. J., manufacturer of the "Invincible" sound box, returned recently from a two months' trip through the north and central West. He states that conditions throughout this territory are very satisfactory, and substantiates this optimism by showing good-sized contracts which he has closed for 1918.

In a chat with The World Mr. Pocoroba said: "It is pleasing to note that a number of well-known manufacturers have adopted the 'Invincible' sound box as the standard equipment for their 1918 product, and as they reached this decision because of the tonal qualities of our product, we are naturally gratified at the success which this sound box is achieving. We have received many letters of commendation from dealers regarding the 'Invincible' sound box, and our facilities in 1918 will enable us to adequately take care of the demands of our trade."

Upon his return to Newark Mr. Pocoroba learned that the company now has ready a new model of the "Invincible" sound box, which was invented and perfected by A. Luciano, superintendent of the company's laboratories. It will be known as the "Invincible" No. 2, and is now being introduced to the trade. Initial orders indicate that it will soon outrival the first model in popularity.

SECURES THE COLUMBIA AGENCY

The Sanitary Bedding & Furniture Co., of Binghamton, N. Y., has secured the agency for the Columbia Gramophones and records, and has opened a handsome department to handle that line.

LOCAL VOCALION DISTRIBUTION
Retail Manager Fletcher Announces New Distribution Plan for Metropolitan Territory—Promotions for Members of Sales Organization

Thomas H. Fletcher, retail manager of the Aeolian Co., New York branch, with The World last week announced a new plan of Vocalion distribution for the metropolitan district which went into effect on the first of the month. This plan was evolved in order to give Vocalion dealers in metropolitan territory 100 per cent. efficient service and co-operation in handling this line. The demand for the Vocalion has increased tremendously within the past year, and Mr. Fletcher has perfected a distribution plan which will undoubtedly meet with success throughout this territory.

Aeolian Hall in New York, together with the three Aeolian branches in the Bronx, Brooklyn and Newark, will be the distributing points in this new system, the New York headquarters, of course, being the principal basis for distribution.

E. M. Wheatley, who has been in charge of the retail Vocalion department at Aeolian Hall, New York, for the past two years, has been placed in charge of Vocalion metropolitan distribution with headquarters in New York, and will also continue as head of the retail department at Aeolian Hall. Mr. Wheatley is one of the best-known members of the local retail trade, and during his two years’ association with the Aeolian Co. has achieved gratifying success. Lois E. Vannier, who has been in charge of the Bronx branch, has been appointed assistant salesman. Mr. Wheatley in both retail and wholesale distribution. Mr. Vannier is one of the veterans of the Aeolian sales organization, and his conscientious and loyal work in the past well merits his promotion to his present important post.

M. Stein, who has been connected with the Aeolian organization the past seventeen years, has been appointed manager of the Bronx branch, and will be in charge of the metropolitan distribution north of 125th street. Mr. Stein joined the Aeolian forces when a boy, in charge of one of the stockrooms, but soon developed such marked sales ability that he was appointed a member of the outside sales staff. Within a period of two years he became the “top” man of the outside force, and year after year maintained this enviable record. During the past few years he has been in charge of Vocalion agencies in the metropolitan district, and as he is a native of the Bronx, his appointment as manager of this branch will undoubtedly mean additional laurels for him.

C. J. Davis, manager of the Brooklyn branch since September, 1916, will be in charge of distribution in Brooklyn and the adjacent metropolitan territory. Mr. Davis joined the Brooklyn sales staff two years ago as an outside salesman, but advanced steadily to the post of manager of this branch. His thorough knowledge of salesmanship, and his keen executive ability have been important factors in the success of this branch.

W. O. Black, who is well known in piano circles throughout the country, and who has been manager of the Aeolian Newark branch since it opened, will be in charge of metropolitan distribution for Newark and the adjacent territory, and under his able direction the Vocalion will receive splendid representation in this district.

TALKING MACHINE EXPORTS
The Figures for January Presented—Exports Show Machines and Records Both Increase

WASHINGTON, D. C., April 1—In the summary of exports and imports of the commerce of the United States for the month of January, 1918 (the latest period for which it has been compiled), which has just been issued, the following figures appear:

Talking machines to the number of 5,731, valued at $130,694, were exported in January, 1918, as compared with 6,190 talking machines, valued at $149,569, sent abroad in the same period of 1917. The total exports of records and supplies for January, 1918, were valued at $104,074, as compared with $103,032 in January, 1917. For the seven months’ total $5,146 talking machines were exported, valued at $1,520,738 in January, 1918, and 44,943, valued at $1,111,701 in 1917, while records and supplies, valued at $1,371,338 were sent abroad during 1918, as against $677,283 in 1917.

ANDREWS AD WORTH READING

BUFFALO, N. Y., April 3—On another page will be found a large list of Victor records from the stock of W. D. & C. N. Andrews, of this city. This firm will be able to make immediate shipments on these records.

“Our idea of publishing this list,” said C. N. Andrews, “was that perhaps we could furnish to many dealers certain records that they were unable to obtain elsewhere and also to induce them to finish the sale of records that can be obtained.

“As we are catering to the wholesale trade exclusively we always stand ready to do anything to assist the dealer. We have a very good stock and would like to have any dealer who is having difficulty in getting what records he wants to give us a trial order.”

44 WEST 37TH STREET, NEW YORK
HEINEMANN'S GIFTS APPRECIATED

Vanophones and Records Sent to U. S. Marines at Various Points Bring Forth Letters of Earnest Thanks From the Recipients

As noted recently in the columns of The Talking Machine World, Otto Heineman, president of the Otto Heineman Phonograph Supply Co., New York, has donated a Vanophone and a supply of Emerson records for the various companies of the U. S. Marine Corps located in different stations throughout Cuba, Haiti, etc. These companies have received their machines and records, and they are being used to excellent advantage by the members of the Marine Corps. In fact, they are so enthusiastic over the entertainment that this gift has afforded that Mr. Heineman has already made arrangements to furnish the various companies of the Marine Corps with additional machines and records.

Some of the letters received from the commanding officers of the different companies of the Marine Corps in acknowledging these gifts read as follows:

"Wish to acknowledge receipt of one Vanophone and twenty-five records, for which I want to thank you for your kindness, and can assure you that it will be very much appreciated by the men of this command. I am sure that they will derive much pleasure from these excellent machines, and will encourage them to buy more records from you."

"Many thanks for the Vanophone received. The men derive great pleasure in the daily Vanophone concerts, and are very grateful for your kindness and consideration. It is a joy to hear reproduced the new music and songs of our native land."

"The men contemplate purchasing an additional supply of your Emerson records and would very much appreciate a catalog with price list of Emerson records that they may still further enjoy the kind and thoughtful gift."

"Through the graciousness of the Otto Heineman Phonograph Supply Co., the Fifty-seventh Company, U. S. Marines, is in receipt of a Vanophone and one set of Emerson records. I am sure that the men of this company will receive much pleasure and enjoyment from your good gift."

"Through your beneficence you have afforded an abundance of pleasure to the men of the Marine Corps stationed here."

"The Fifty-seventh Company takes this opportunity to offer its thanks."

"I am in receipt of a box containing five Vanophones and records therefor. By direction I have distributed one to the Fifty-third Company and one to the Fifty-seventh Company under your command. The other three have been shipped to Cape Haitien for distribution to the Fifty-fourth, Sixty-second and Sixty-fourth companies."

"Permit me to thank you on behalf of the Fifty-third and Fifty-seventh companies for your kindness in this matter. The Vanophones are extremely unique and they will give an immense amount of pleasure to the men and also to the officers. It is a donation that is highly appreciated."

"Referring to your letter dated New York City, January 14, 1918 (R.C.A.-C.F.) signed by R. C. Ackerman, export manager, we all wish to thank you for your kindness in sending us the three Vanophones with twenty-five records for each, which have just been received in good condition."

"The machines and records have been distributed to the three companies mentioned, and are now in use and being appreciated by all the men; these are excellent little instruments and appear very strong and compact."

"The men are deriving a great deal of pleasure from these machines, and we are truly greatly indebted to you for this generous and welcome contribution to our amusement and entertainment."

"Please accept my personal thanks for having our interests and welfare at heart, and our best wishes for your success."

NOW WHOLESALE EXCLUSIVELY

PEMBIA, LLC, April 8—The Putnam-Page Co., Victor wholesalers of this city, have discontinued their retail department and now handle Victor machines and records at wholesale exclusively. The rapid growth of the company's wholesale business necessitated the move. The company will remain at its present address and arrangements have been made for securing considerable additional space in the same building.

J. W. MARKS NOW IN CHARGE

J. W. Marks, of Chicago, has taken over the management of the piano and phonograph department of the O. T. Johnson Co., Galesburg, Ill. Mr. Marks was for a number of years connected with the Cable Company, of Chicago.

SONA-TONE

A Phonograph of Distinction with the Tone You Can't Forget

THE American public today—those who purchase phonographs and other domestic conveniences—want above all else—

-- QUALITY -- RELIABILITY -- SERVICE --

SONA-TONE Quality means a resonant, full, liquid tone that comes from an especially designed, all-wood sound chamber—and superior workmanship in material, finish and equipment.

SONA-TONE Reliability means simplicity of mechanical construction—ease of operation—and convenience and solidity of working parts.

SONA-TONE Service means the immediate ability of the purchaser to play all makes of records—without attachment of any sort—and to play a library of from 750 to 1000 assorted records without further expenditure.

We believe that a Sona-Tone eliminates—to a greater extent than any other phonograph—the surface noises of the record.

We believe that it has the same quality of resonance as exists in the Stradivarius violin.

From our sales record—previous to advertising—we believe that a SONA-TONE is a superior phonograph for retail merchandising.

SONA-TONE PHONOGRAPH, INC. 3421 Broadway, New York City

Chicago, Ill. New York City
FROM OUR
E. P. VAN HARLINGEN, Manager

CHICAGO HEADQUARTERS
World Office
Republic Bldg., 209 South State St., Chicago
Telephone: Wabash 5774

CHICAGO, ILL., April 10.—The wholesale trade in general is unanimous in claiming that the past month was fully up to their anticipation and that they have exceeded in some instances the business carried on during the corresponding month last year. There were some doubts, however, at the beginning of the month as to whether or not they would come up to anything like last year’s business, owing to the changes then existing in the railroad rates due to storms and other mishaps which generally bring rolling stock to a standstill. As these conditions righted themselves and the shipments of both the completed product and the raw material found their way through in periods of time that were not much greater than those of normal conditions, beginning to get brighter and the better the shipping facilities became there naturally followed an increased amount of business.

The record situation which was quite keen during the first three months of the year also began to get back to the normal, and as records came rolling in the retail dealers began to get busy and for the first time during the year they were allowed to have the stock for which they were clamoring the most; that is, the popular numbers.

The retail trade suffered a slight set-back during the latter part of March and the first part of April, but this set-back had been anticipated because as is usual during Holy Week there is a general dropping off in business. However, after the public had finished eating its usual quota of Easter eggs and had digested them they began to think of “Music in the Home,” which was only natural, and as a result the trade began to pick up again.

L. C. Wiswell To Go East

L. C. Wiswell, manager of the wholesale Victor department of Lyon & Healy, is making preparations for a contemplated visit to the Victor factory next week. Mr. Wiswell also intends to visit various other plants in the East before returning to headquarters in Chicago.

Cheated the Doctor

H. J. Fiddelke, assistant manager of the wholesale Victor department of Lyon & Healy, returned to his desk this week after having been confined to his home for several days with an attack of acute appendicitis. During his illness Mr. Fiddelke stated that he had lost twenty-five pounds in weight and suffered intense pain. He was fortunate enough to recover, thereby avoiding an operation. Mr. Fiddelke anticipates going to a hospital and having an operation performed just as soon as he regains his strength, as he figures there is no use in having a reoccurrence of the attack.

Singers Give Concert

Oscar Shaw, leading man of the “Leave It to Jane” company, now playing at the La Salle Theatre, accompanied by several other artists of this company, was heard in a special Columbia recital on the afternoon of April 2 at the Columbia Recital of Adam Schaaf recital hall of Adam Schaaf. Several of the “hits” of the show were rendered to the large audience by Mr. Shaw and Columbia records of these “hits” were also played. The Columbia graphophone and a piano-players were used throughout the entire performance in conjunction with the various numbers sung. H. R. Vallee, of the Columbia Co., and Charles Hertzman, manager of the “Leave It to Jane” company, were instrumental in making arrangements for the concerts. Among some of the numbers rendered were “I’ve Got the Blues for Home, Sweet Home,” “The Stormy Sea of Love” and “Michael and His Motorcycle,” which were sung by Mr. Shaw, accompanied by the graphophone. Other members of the cast, accompanied by the graphophone, rendered various “Leave It to Jane” selections.

A. R. Harris Visits

A. R. Harris, in charge of the record sales department of the Columbia Graphophone Co., with headquarters in New York, made a short visit to the Chicago offices of the Columbia Co. this week. Mr. Harris held a meeting in the Palmer House on Wednesday evening, April 3, which was attended by the Columbia office force and a number of Columbia dealers. He explained to them the selection of records and went into detail explaining just why certain songs were chosen for the purpose of making records.

New Loop Man

C. L. Morey now has charge of the Columbia loop district for the Columbia Graphophone Co. Mr. Morey is one of the best-known talking machine salesmen in the city and was formerly connected with other big companies here.

C. M. Rickoff, formerly with A. Neihause & Co., proprietors of the Band Box Shop, Columbia dealers, is now connected with the advertising department of the Columbia offices of the Columbia Co.

Joins Empire Co. Forces

E. B. Kopp is the latest addition to the large office force of the Empire Talking Machine Co. Mr. Kopp was formerly connected with several of the largest establishments in Chicago, and in his new connections with the Empire Co. has entire charge of the office in addition to being advertising manager.

Increased Business

C. F. Baez, assistant manager of the Chicago office of the Columbia Graphophone Co., remarked this week that their business for the month of March was 50 per cent greater than for the corresponding period last year. “Our shipments are coming in fine shape,” stated Mr. Baez, “and it certainly keeps us hustling to fill the demand. Records are especially good and the Columbia Co. is sure getting out some very good numbers. The demand is very heavy at present for popular songs, and we have a large supply on hand to take care of this demand. Our stockrooms are well supplied to meet any contingency, such as a freight embargo, and we feel that at present we are very well equipped to overcome any difficulties.”

(Continued on page 83)

THE "WADE" FIBRE NEEDLE CUTTER

Service Feature Is of Immense Importance

Your greatest revenue, Mr. Dealer, is from record sales. The average consumer seldom buys more than one talking machine in a lifetime, but may be readily educated to systematically accumulate a record library and thereby become a constant source of revenue to you.

The Wade Fibre Needle Cutter Is the Connecting Link

It permits the use of Fibre Needles, with all their acknowledged advantages, at the minimum expense, with its 20 or more re-points to each fibre needle, and is very cheap insurance on the life of their records.

Instruct your salespersons to use these sales arguments and you will soon have a Wade Cutter and Fibre Needle in every customer’s home, which will naturally result in increased record sales.

Empire Window Trims

The Empire Talking Machine Co. of this city have had prepared for them several very beautiful window trims, which they are prepared to furnish Empire dealers. These trims were prepared in response to numerous requests from Empire dealers all over the country for something individual and distinctly characteristic. John H. Steinmetz, president of the Empire Co., stated that the policy of co-operation existed between his company and his dealers has been meeting with marked success and that these new window displays which he has had prepared are receiving much favorable comment.

The impressive illustration shown herewith is a photograph of the window trims which were prepared especially for the formal opening of the Troop Bros. new store, 34 Market street, Lewistown, Pa. This store was thrown open to the public on April 1, and the display as shown in the illustration attracted much attention, as the art work was beautifully colored and harmonized with the Empire talking machines to the fullest degree. This new store of the Troop Bros. is under the personal supervision of Manager W. S. Lewis, who is enthusiastic over the personal qualities and values of the Empire machines.

In addition to the window trim which was used at the opening of the Troop Bros. store, a special concert was arranged under the supervision of A. R. Mitchell, of Williamsport, Pa., the Empire representative in Pennsylvania. This concert was held on Tuesday evening, April 4, with headquarters at the factory at

DECALCOMANIA
Now! The Final Achievement

Brunswick introduces a new Method of Reproduction, a real sensation

Here, at last, is the supreme phonograph achievement of recent years. The Brunswick Method of Reproduction. It includes two distinctly new improvements, two inventions that absolutely revolutionize old standards.

Some maker was bound to build this ultimate phonograph, freed from ancient handicaps.

The honor has come to The House of Brunswick, a pioneer in developing the all-record idea. The first Brunswick met with phenomenal success, showing that we might spend thousands of dollars in perfecting this idea.

Better Than Ever

Now, with the new Brunswick Method of Reproduction, distinctly new, we offer a superphonograph.

It not only plays all records, but plays them at their best.

This is accomplished chiefly by The Ultona, our new all-record reproducer, and the new Brunswick Tone Amplifier.

Tone values are now given a naturalness hitherto unattained. Some of the gravest problems in acoustics are solved.

The Ultona is an amazingly simple contrivance. It plays all records according to their exact requirements. The proper diaphragm is presented to each record, whatever make, and the exact needle, the exact weight.

So you see that this is not a makeshift, not an attachment, but a distinctly new creation.

Simplicity Itself

At the turn of a hand you adapt The Ultona to any type of record. A child can do it. It is practically automatic.

Now your library of records can be bought according to your favorites. For instance, each record maker has a famous tenor. On a one-record instrument you are confined to one. Others are barred. And who likes to be restricted? Who wants to be confined to buying from only one catalog, when there are several from which to choose?

The Ultona, we think, is the greatest feature offered any music lover. And it is obtainable solely on the new Brunswick.

Another vast improvement in tone projection comes in our all-wood Tone Amplifier, built like a violin. All metal construction is avoided, thus breaking away from the usual custom.

Wood, and rare wood at that, is the only material that gives sound waves their proper vibration. With The Ultona and the new Brunswick Tone Amplifier, phonographic art is brought to higher standards.

See and Hear

You cannot afford now to make a choice until you've heard the latest Brunswick. Until you become acquainted with The Brunswick Method of Reproduction. Until you hear this marvelous instrument.

You are invited particularly to examine The Ultona and note how simply it adapts itself to each type of record.

Once you hear the new Brunswick, you'll be delighted and convinced that this superphonograph is in a class heretofore the ideal, but unattained.

All you want in any phonograph is found in this composite type. Plus superiorities not found elsewhere. A Brunswick dealer will be glad to play this super Brunswick for you and explain the new Brunswick Method of Reproduction.

Brunswick Models—Price $32.50 to $1,500

THE BRUNSWICK-BALKE-COLLENDER COMPANY

General Offices: Chicago
Branch Houses in Principal Cities of the United States, Mexico and Canada
FROM OUR CHICAGO HEADQUARTERS—(Continued from page 83)

Two of the three illustrations presented show the tone arm in a position for playing lateral cut records and the other position shown is that of the reproducer turned back to permit the insertion of the needle. It is stated that when in this position the cover of the cabinet may be lowered without striking the needle point. This throw-back position appeals particularly to the purchaser, as it eliminates all chances of injury to the record and insures that the sound box is always in a correct position for playing.

Brunswick Man to Army

H. E. Nelson, advertising manager of the Brunswick-Balke-Collender Co., left Chicago April 2, bound for Portland, Me., where he entered the U. S. Aviation Training School for Mechanics. Several other boys from the Brunswick Co. were also called to the colors and left during the week for various training camps throughout the country.

Having Vacations

C. L. Davidson, of the Talking Machine Shop, in an interview with The World this month, stated that the stock was coming in fine shape and that they were enjoying a very good business. "The first of our girls started their vacation last month, when Evelyn Brackenridge left for Saginaw, Mich., to visit her mother. She will be gone for the whole month. Ruth Hartman, also of our sales forces, took a two weeks' vacation the first of April." Mr. Davidson stated that his brother, G. W., took a little flying trip to the Victor factory about two weeks ago and from there went down to Philadelphia to visit his relatives. He was accompanied on the trip by Mrs. Davidson.

Six Best Sellers

Edison announces the following as the six best sellers for the month: "U. S. Army Camp Songs," "Bougainville in Oceane" and "Just a Voice to Call Me, Dear." "Leave it to Jane," and "Siren's Song," "Jack O'Lantern Fox-trot" and "Knit, Knit, Knit." "That's Why My Heart is Calling" (Continued on page 87)
Why MANDEL SERVICE is a guarantee of sales

Dealers have learned the advantage of handling the MANDEL LINE of superior Talking Machines because they are made in their entirety under one roof—a guarantee of uniformity throughout.

THE MANDEL LINE of Talking Machines is sold on a written guarantee for service backed up by one of the most efficient up-to-date factories in existence. A fitting assurance of its superiority.

In quality, workmanship and richness of tone MANDEL TALKING MACHINES measure up to the highest accepted standard, yet in price are within the reach of the most modest purse.

This is our handsome Model No. 3 Machine. Note our plan of sending it on FREE TRIAL

The Mandel Talking Machine is the Machine “Without a come-back.” Its standardized make-up assures service even under the stress of severe usage.

Our co-operative plan to dealers is the biggest inducement ever offered by any reliable talking machine line. We not only help sell our line but help dealers buy it.

Send to-day for details of this unique plan—it is “opportunity pounding on your door”

THE TALKING MACHINE WORLD

April 15, 1918

You" and "Will You Remember," "Naval Reserve March" and "Spirit of America." Six best Victor sellers for the month are: "Id Like to be a Monkey in the Zoo" and "Go-Zin-To," "Are You from Heaven" and "Give Me the Right to Love You," "Just a Baby's Prayer at Twilight" and "On the Road to Home Sweet Home," "Tickle-Toe" and "Going Up," "The Lord is My Light," "I Puritan." The six best Pathé sellers for the month are: "Romeo et Juliette," "Can't Yo! Heah Me Callin'," Caroline?" and "Little Alabama Coon," "Sweet Little Buttercup" and "In Berry Pickin' Time," "Homeward Bound" and "When the Boys from Dixie Eat the Melon on the Rhine," "A Baby's Prayer at Twilight" and "Valley Rose," "Liberty Bell" and "There's a Million Heroes in Each Corner of the U. S. A." Columbia Graphophone Co. announces for the past month the following six best sellers: "Long Boy" and "For You a Rose," "Darktown Strutters' Ball" and "I'm All Bound Round With the Mason-Dixon Line," "What Till the Cows Come Home" and "Somewhere in France Is the Lily," "Do Something" and "Liberty Bell," "Hello, My Dearie" and "Ching Chong." Resting Up C. E. Goodwin, general manager of the Photophone Co., recently left for Hot Springs, Ark., for a two weeks' resting period. Mr. Goodwin has been very active for the past several months and thought that this time of the year would be beneficial to his well-being. He is expected to return to Chicago on Monday.

Ryde Visits Joseph Ryde, formerly assistant manager of the Victor department of Lyon & Healy, but now of the Fuller-Ryde Music Co., of Indianapolis, was a visitor to Chicago for several days last week. Mr. Ryde has a partnership in the firm of Fuller-Ryde and stated that he likes the new field. "Business is very favorable in our territory," said Mr. Ryde, "and the trade is keeping us mighty busy. We are having some very good sales. I expect to permanently locate in Indianapolis in the fall, when I will move my family and belongings from Chicago to that progressive city."

Move to New Quarters The Automatic Container Co., manufacturers of the automatic record filing device for talking machines and who are producing an extensive line of record cabinets and carrying cases incorporating this feature, have moved their general offices and ware rooms from the Tacoma Building to more centrally located quarters at 506 Republic Building. The company is constantly adding to the number of talking machine manufacturers who are adopting their device and the sale of cabinets is continually increasing. The company is arranging for exclusive wholesale agencies in various parts of the country. They recently made the Phonograph Clearing House, Inc., at 31 East Forty-second street, New York, their representatives in that city. H. E. Taylor, formerly superintendent of the Jacko Furniture Co., of Buffalo, will represent the Automatic Container Co. in western New York. The company will have an exhibit at the National Music Show to be held at the Grand Central Palace in New York the first week in June.

Will Represent Widdicomb Line H. P. A. Mossier, a piano and talking machine man of wide experience, has secured handsome warerooms at 532 Republic Building. The warerooms are immediately opposite the elevator and with its handsome crystal front constitutes one of the shops for which the building is noted. Mr. Mossier will have the Chicago wholesale representation for the Widdicomb phonographs, made by the Widdicomb Furniture Co., of Grand Rapids, Mich., and will shortly have a complete line of these beautiful machines in the various period styles on display for the benefit of visiting dealers. He will also handle a line of pianos made by the Chute & Butler Co., of Peru, Ind., and an extensive line of talking machine accessories.

Chicago Headquarters for Puritan Phonographs What may be properly termed one of the most important news items of the month is the closing of a deal by which James B. Orth secures the wholesale representation for the Puritan phonograph and records of the United Phonographs Corp., of Shelbogian, Wis., for Illinois, Indiana, Michigan, inclusive of the upper peninsula and Missouri. Offices and demonstration rooms have been secured at suite 422 Republic Building, where a complete line of Puritan phonographs and records will be carried for the inspection of the trade. Mr. Orth is a successful Chicago business man of years of experience and is a brother of C. J. Orth, well-known piano and talking machine dealer of Milwaukee, who, by the way, has recently become distributor for the Puritan line for Wisconsin and the upper peninsula in Michigan. Mr. Orth will have a valuable assistant in Miss Helen Essen, a young woman who has been associated for some years with leading talking machine concerns in Chicago, and who will be the "campaign manager," doing some traveling and giving dealers the benefit of her experience in demonstrating and selling.

New Mandel Model The Mandel Mfg. Co. are out with a new member of the Mandel talking machine line. It is known as Model No. 5 and is a full cabinet machine, forty inches in height, retailing at the moderate price of $65. The company states that it has the same high-grade equipment which characterizes the other models and has been produced to meet the demand for a cabinet machine selling at a lower price than the other models. The company has also inaugurated a very extensive dealers' co-operative service, consisting not only of attractive advertising matter for insertions. (Continued on page 89)

The Empire Tone Arm and Reproducer

Tone Arm and Reproducer Patent Applied For

Plays Any Make Record

No Set Screws to Adjust

The Empire Universal Tone Arm will appeal to the talking machine manufacturers because it possesses wonderful tonal qualities and because it will add distinction to their machines. The Empire Reproducer has been pronounced by competent critics to be the best sound box on the market. It is adjustable to any position without the use of set screws and the throw back position for inserting needle will appeal particularly to the retail purchaser. The Empire Tone Arm and Reproducer can be furnished in several lengths, and in ordering samples state measurements from center of turntable shaft to center of horn hole on motor board. Made in both nickel and gold plated finish.

W. E. Cotter, who for the past few months has been in charge of the retail talking machine department of Thos. E. Wilson & Co., has been made general manager of the entire talking machine division and will have charge of both the wholesale and retail departments. Mr. Cotter

A PIONEER IN THE CHICAGO MARKET

D. W. McKenzie, President of Playerphone Talking Machine Co., Among First to Realize Trade Possibilities in That Section—Plan to Help Liberty Bonds and Thrift Stamps

CHICAGO, ILL., April 8—D. W. McKenzie, president and general manager of the Playerphone Talking Machine Co., was among the first Western men to perceive the advantages offered by Chicago, the “great central market,” for the manufacture of talking machines. Associated with him in this enterprise is D. D. Caliwell, one of Oklahoma’s most enterprising citizens, and vice-president of the State National Bank of Oklahoma City. This company, of which Mr. McKenzie is the head, has become a very strong factor in the trade and is marketing its product through many of the largest jobbers and dealers, whose strength and extent of operations in itself is evidence of the recognition of the company’s product as one of merit and of stability.

The Playerphone line embraces no less than nine cabinet machines ranging in price from $65 to the beautiful $500 White House model. Just as the country has inaugurated the third stated that they are getting out a new line of talking machines, embracing six new models and two models in three different woods. Preparations are being made for elaborate wholesale display rooms in connection with the retail department at 42 South Wabash avenue. Mr. Cotter is in charge of the wholesale department by Miss Mabel Winchell, formerly of the Talking Machine Co., of New York. Miss Winchell, who will act in the capacity of secretary, will assist Mr. Cotter in entertaining visiting dealers to the wholesale department. He is assisted in the retail department by Miss Hazel M. Walker, who will have entire charge of the retail end of this business.

Liberty Bond campaign, Mr. McKenzie has made an announcement which is as timely and generous as it is unique. It is to the effect that the Playerphone Talking Machine Co. will establish a Liberty Bond and Thrift Stamp fund on the first of each month, according to the amount of Playerphones shipped the previous month, one dollar being placed to the credit of this fund for each Playerphone shipped from March 1, 1918, until the close of the war. Further details of the plan are contained in a leaflet which is now being sent to the trade and which runs as follows:

“Every Playerphone jobber is cordially invited to participate in this Playerphone Liberty Bond and Thrift Stamp campaign by establishing a fund similar to the Playerphone Talking Machine Company’s plan and placing one dollar to said fund for each Playerphone sold, and to invite their dealers to whom they sold Playerphones to do the same.

“Therefore, if this plan is followed out and complied with, by the time the Playerphone reaches the customer there will be $3 worth of Liberty Bonds or Thrift Stamps bought. If 10,000 Playerphones are sold during the year it will mean $30,000 worth of Liberty Bonds or Thrift Stamps purchased and possibly mean defeat of 30,000 Hun’s and saving the lives of 30,000 American boys.

“The Playerphone dealers who buy direct from the Playerphone Talking Machine Company, and not through our jobbers, should establish the Liberty Bond and Thrift Stamp Fund at the rate of $2 instead of $1 for each Playerphone, in order to maintain the $3 standard and help reach the $30,000 Playerphone Liberty Bond and Thrift Stamp campaign.

“We sincerely hope and believe that our Playerphone jobbers and dealers will join us in the Playerphone Liberty Bond and Thrift Stamp campaign, as Uncle Sam must win, or the Playerphone business can not continue. This also applies to your other lines of business.”

ANNOUNCE A NEW TONE ARM

Barnhart Bros. & Spindler Offering Scottford Tone Arm and Superior Universal Reproducer to the Trade—Some Features

CHICAGO, ILL., April 10—Barnhart Bros. & Spindler announce to the trade this month that they are now in a position and are offering to the trade their Scottford tone arm and Superior universal reproducer. Both the reproducer and the tone arm are the inventions of Louis K. Scotford. In breaking away from the general design of tonearms, Mr. Scotford has confined his experiments to the well-founded fact that tone waves act upon the same principle as light waves, i.e., traveling in a straight line until they meet some obstruction from which they are deflected at right angles. Having in mind the well known laws that a straight line is the shortest distance between given points and that sound waves are deflected at right angles, Mr. Scotford set out to produce a tone arm that would embrace both of these laws and as a result the tonearm which is being manufactured by Barnhart Bros. & Spindler is char-

CHICAGO, ILL.
acertized by being angular instead of curved, the result being that the tones are given the shortest possible route over which to travel from the sound box to the amplifier. This has the effect of giving the sound produced the seeming point of origin directly in front of the machine instead of the muffled unnatural sound within the machine. This, as can be seen, adds volume to the tone owing to the short distance through which the tone must travel. In producing the superior and universal reproducer, Mr. Scotford has gone off the path generally followed and has produced a sound box which is carried above the record at a slight angle instead of a vertical line as is generally the case. To bring the vertical line into play, which is necessary for playing the record, the needle is also placed in the chip which is built at an angle; the result being that the point of the needle is directly centered no matter in what position the sound box is placed. This sound box has many interesting features embodied in it. Mr. Scotford has also produced a tone amplifier which is made of especially prepared composition. This amplifier is also worked out on the law of angles, the throat being very short and set on a right angle with the body of the amplifier. The sound waves coming down into the throat do not vibrate the amplifier in the least. Mr. Scotford's idea being that the sound vibrations be reflected back into the air column, thereby giving more volume and throwing the tone out of the machine in its entirety.

R. M. McArthur, of Barnhart Bros. & Spindler, stated that they had gone slow in announcing their Scotford tone arm and Superior universal reproducer to the trade because they wanted to have it perfected to the highest degree and be in a position to meet the demands of the trade. The desired result of perfection having been obtained and enough material on hand to produce the goods in order to meet the demand that would be put upon it by the trade the formal announcement was made. "We have been sending out samples for some time and have been receiving many interesting letters from those to whom we have sent the samples," stated Mr. McArthur. The following letter was received from Alfredo L. Denorese, vice-consulado del Paraguay, Wilmington, Delaware:

Gentlemen: I consider the Superior universal reproducer and tomarr the best leader made; they are, in fact, above all competition. Your reproducer gives a depth of sound that is so wonderful that all other soundboxes that I have ever heard seem obsolete. Besides this marvelous depth and warm richness of tone, it has the great advantage of a surprising musical volume. In all makes of record overtones and undertones never heard before heard with other reproducers are brought out with pure, crystalline clearness. Your reproducer, turning with absolute correctness upon your ideal tonearm, places the needle in exactly the right angle for either the lateral or vertical cut records. Your Superior universal reproducer and tomarr is the only outfit of its kind that, in my knowledge, will safely play the vertical cut records without sliding across the disc which causes a jarring noise in the record and ruin it. This is impossible with your reproducer as they, in position for playing hill-and-dale records, take the greatest at the only correct angle. Other makes of reproducers slant too much, therefore there is always the tendency for them to skid from the groove and skid. All that I have said of the Superior is also true of the Scotford Model I, that wonderful reproducer of yours that, with its large diaphragm, plays the vertical-cut records with so great and beautiful a tone. Though I am not in the talking machine business, being a violin and artist, aside from consul duties, I have made a deep study of phonograph parts, also experimented a great deal from pure love of the thing. I have even made sound-boxes, or reproducers after my own ideas. I consider an expert on sound-reproduction. I have sixteen different reproducers fitted to my talking machine, but I know that for perfect articulation, beautiful tone and volume, your sound-boxes and tomarr have no equal.

Wilmington, Delaware.

METAL SPECIALTIES CO. ORGANIZED

Benton Harbor Concern to Have Capital Stock of $60,000 in Their New Enterprise

Benton Harbor, Mich., April 9.—The Metal Specialties Co., of this city, have been organized with a capital stock of $60,000 and have purchased and fully paid for a substantial two-story factory building and are now preparing to produce talking machine motors, tone arms and other specialties. The officers are Wm. R. Everett, president; A. R. Knight, vice-president; and Milton Hinckley, secretary and treasurer. President Everett, whose inventions the company will manufacture, is a man of long experience in the talking machine and supply business and was formerly the Western representative in Chicago of the Crescent Talking Machine Co., of New York. Added to his experience in the talking machine business, he has had fifteen years' experience in the manufacturing line. He is a mechanical engineer and a member of the Society of Automobile Engineers. In speaking of the company's product Mr. Everett says:

"You may state that our motor is not a radical departure in any way from accepted engineering practice, but on the other hand it is not a copy, nor yet an 'improved modification' of any existing type of motor. Our use of worm and spiral gears with one jack shaft only, and this set at an original angle, is an invention. Our use of a vertical governor and with solid looks instead of the usual spring weight links, while an invention, is nothing more or less than good mechanics."

"I think we are the only people in the United States using the galvanic copper process for the making of tone arms. In the first place, the copper metal itself is resonant and has a real musical tone. In the second place, the use of this process enables us to make tone arms without extravagant tool cost. In other words, each phonograph manufacturer can have his own exclusive design of tone arm and at practically competitive prices with other processes and without tool cost."

G. T. Williams, popular Brooklyn Victor wholesaler, is back at his desk after a well-deserved rest down South.

The MorenuS PhonoGrapH is a Distinct Departure from a Tonal Viewpoint

The horn, which is entirely of wood, is built on the principle of the saxophone and enters the tone chamber at the bottom, not the top. The tone is big and full but mellow, and the reproduction of the artist's voice or instrument is faithful to an unusual degree.

Among the other features is a unique tone moderator which actually graduates: an exceptionally high grade and acoustically correct tone arm and reproducer, and a cover support which makes handling the lid a delight.

The case designs are right and the cabinet work and finish unsurpassed.

Different—But Practical

The Luxfibre Case

The cases are finished in old ivory, mission, oak, chocolate brown, frosted ebony and frosted brown. However, they can be produced in almost any shade desired to match the surroundings.

It takes an expert weaver from four to six days to weave the cases. They are then well sized, next given a spray of the finish desired and then two spray coats of spar varnish. The Lakeside Supply Co. does not specialize in making completed phonographs, as it furnishes all parts to manufacturers and assemblers, but in marketing the Luxfibre machines they are not competing with any one, as the cases are distinctive and not being sold by the trade generally.

The Lakeside Supply Co. expect to put on a man to handle the Luxfibre line exclusively and introduce it to the trade.

Another important announcement from the Lakeside Supply Co. is the fact that they have just developed their new No. 4 Jumbo tone arm to play all records in one position without any appreciable loss in quality or volume. This means absolutely no shifting or moving of arm or sound box for playing any disc record. The company have worked very hard for a number of months and now believe they have a thoroughly practical combination. Patents have been applied for.
Hiawatha Phonographs and Hiawatha Success

In the past two years HIAWATHA dealers have realized that the HIAWATHA Phonograph has enabled them to sell a Phonograph to their trade, the Quality of which they can guarantee with every assurance that it will reflect credit to the reputation they have established for square dealing and their motto of "Quality First".

HIAWATHA Phonographs mean Success which has been established by their wonderful Quality of Tone, Construction and Finish. The same opportunity is waiting for you. Write today and let us prove that your initial order will not only be satisfactory, but a good investment.

"All Orders F. O. B. Factory"

Wm. A. Johnson, Now Owner of the Northwestern Cabinet Co., Is a Progressive

Menomonie, Wis., April 6.—Really, no one could conceive of a better location for a cabinet factory than this city. It is located right in the heart of the big lumber industry and from the roof of any of the factories one can see the forests whose product is continually going through the mill rooms in Menomonie.

Wm. A. Johnson, who recently acquired the interest of his former associates in the Northwestern Cabinet Co., is now the entire owner of that business and is devoting himself exclusively to the manufacture of cabinets for talking machine manufacturers. He is a man of long experience in the making of pianos and talking machines and has built up an excellent business since he became a part of the industrial activities in Menomonie. He is himself a skilled designer and is prepared to submit special designs for cabinets as well as to make them after the ideas of others. He also has facilities for installing the working parts of machines into the cabinets if the customer so desires. The factory is excellently located, being near the junction of the Chicago, Milwaukee & St. Paul and Chicago & Northwestern railroads, and it therefore enjoys unusual shipping facilities. Mr. Johnson is a brother of Henry G. Johnson, vice-president and superintendent of the Holland Piano Mfg. Co., and the two men have become dominating influences in the business life of this thriving city because of their go-aheadness.

W. A. Johnson

Choosing Safeblowers

Among the new agencies for Brunswick phonographs recently opened by the New York office of the Brunswick-Balke-Collender Co. is the firm of Anderson & Duchene, Torrington, Conn. The formal opening of the new department, in charge of J. J. Brophy, of the Brunswick Co., was quite an event, and was heralded by liberal advertising. The company is composed of Victor Anderson and Rene Duchene, both experienced talking machine men.

The Brunswick phonograph was also recently placed with Simon Bersin, a well-known piano dealer at 410 Grand street, New York.

Chester Abelowitz, of the Brunswick Co., is now in Trenton during the recital week held at the warerooms of the Hurley-toth Co., of that city, and who carry the Brunswick line.

Very enthusiastic reports have been received during the past week from John Duncan, manager of the Brunswick department of the Gamble-Denmond Co., of New Haven, Md., who reports that sales have been fine recently.

W. A. Johnson
NEW MODEL OF PURITAN PHONOGRAPH READY FOR MARKET

Handsome Machine, Designed on the French Baroque Order, Embodies the Various Distinctive Puritan Features of Construction, Including the Long Horn—New Distributors

The United Phonograph Corp., makers of the Puritan phonograph and records, Sheboygan, Wis., are just putting on the market a new design of the Puritan phonograph, illustration of which is shown at the top of this page. The design, by the way, elsewhere in this issue, and which is calculated to attract instant attention because of its uniqueness as well as artistic symmetry and gracefulness. It is on the French Architects order and with a bosom distinctiveness, curved surfaces and exquisite veneers, handsome hand carvings, heavy base and carved feet, is bound to be considered an artistic triumph. The design has already been patented. A notable feature of all Puritan phonographs is the long horn built entirely of wood and extending from the tone arm to the main chamber at the bottom of the cabinet. It has only one bend and closely resembles an organ pipe in construction. Unusual resonance and beauty of tone are claimed as a result of this construction. The drop door at the base gives egress to the tone and operates as a modulator, being manipulated by a button at the side of the machine near the crank handle and can be set at any angle desired. While the tonal idea was the desideratum in the horn construction and the location of the tone chamber, the subsequent position of the record compartment in the upper part of the cabinet is another advantage, as it gives most convenient access to the records. The United Phonographs Corp. is a subsidiary of the Wisconsin Chalmers Co., of Port Washington, Wis., a million dollar concern, and has the advantage of practically unlimited manufacturing facilities. The fine of cabinet machines is extensive, meeting the demand of practically all classes of the trade as to price. The men at the helm have high ideals as to the maintenance of a high quality standard in everything they produce.

The company has recently made Charles J. Orth, of Milwaukee, distributor for Wisconsin and the upper peninsula of Michigan, while J. B. Orth, who has just opened warehousen in the Republic Building, in Chicago, has for his territory Illinois, Indiana and Michigan with the exception of the upper peninsula.

In its original form the bill provided that a purchaser might sue and recover any profit made by the dealer in excess of $30 per cent. of the original cost of the article. In its amended form, however, the bill provides that the buyer can, in addition to recovering the excess profit, recover a credit on the principal amounting to one-quarter of that principal. On the whole, the Cary bill is regarded as a most pernicious piece of legislation.

A violation of the act would be construed as a misdemeanor punishable by a fine of not less than $5 nor more than $500, or by imprisonment for not less than five, nor more than thirty days, or by both fine and imprisonment. George W. Pound, counsel and general manager of the Music Industries Chamber of Commerce, who has been in Washington several days recently, has opposed the bill very strongly, and the National Association of Talking Machine Jobbers has filed a strong protest, as have other trade organizations, whose members are liable to be affected by the provisions of the act.

WADING CARY BILL CLOSELY

Talking Machine Dealers and Others Selling on Installments See Genuine Danger of Measure Designed for District of Columbia

WASHINGTON, D. C., April 6.—The thing of interest to local music trade men, as well as members of the trade throughout the country, outside of war troubles, is the progress made by the Cary bill, a measure introduced by Representative Cary of Wisconsin, and designed to put heavy burdens on dealers selling merchandise on installments.

As the measure now stands, it requires a payment of a license fee of $200 by every merchant who is engaged in the installment business, under a plan whereby he retains title to an instrument until the full purchase price has been paid. The bill applies only to the District of Columbia, but it is realized such measures in the National Capital are frequently accepted as models to be followed by legislatures in various States and cities.

If this Cary bill, which provides among other things that no merchant shall make a profit of more than 30 per cent. of the actual cost price of any article sold, should be copied in various States of the Union it is easy to foresee the predicament of the merchants who have testified under oath that their cost of doing business is in excess of 30 per cent. Such irresponsible restrictions as the requirement of annual reports on all business done would be bad enough, but the particularly perilous feature of this amazing bill is the restriction under which no sale greater in amount than $200 can be made to any one person under a license for installment sales.

NEW HOME FOR PENN PHONO. CO.

Well-Known Victor Wholesalers of Philadelphia Lease Large New Building on Arch Street

PHILADELPHIA, April 8.—The Penn Phonograph Co., the well-known Victor wholesalers at 17 South Ninth street, has signed a lease for the new Liberty fireproof building at 925 Arch street, and will move to that location some time in June. The building is a four-story and basement structure. The exterior is an unusually striking in appearance as the interior is complete and practical. The expanding business of the company has made this change necessary. The company believes the future of the business means much greater things than in the past and is preparing for the expansion when it comes.

GUEST OF PHILADELPHIA DEALERS

T. J. Leonard, General Sales Manager of the Musical Phonograph Division of Thomas A. Edison, Inc., Speaks at Regular Monthly Meeting of Philadelphia Edison Dealers

PHILADELPHIA, Pa., April 4.—The guest of honor at the regular monthly meeting of the Philadelphia Edison dealers held at the Hotel Bingham on Tuesday of this week was T. J. Leonard, general sales manager of the musical phonograph division of Thomas A. Edison, Inc. Thomas P. Blake, of Blake & Burkart, acted as chairman and introduced Mr. Leonard, who spoke on general business conditions. Supervisor Gardiner, of the Edison house, was also present at the meeting.

The big majority of the dealers present reported a large increase for March, 1918, over the same month 1917, and Mr. Somers, of Starr & Moss, reported that their company had an increase of 177 per cent. for the month of March. Many of the dealers present declared that they would be present at the coming Edison dealers' convention which will be held in New York on June 6 and 7.

Milton Isaacs, son of Joseph Isaacs, Victor dealer of 176 Sixth avenue, New York, and who is well known in the local trade, went to Camp Upton on April 4 to join the National Army.

THE TALKING MACHINE WORLD
Prognostic Talking Machine Concerns Arranged To Take Space at Big Exhibition to Be Held at Grand Central Palace, New York, in June

Plans for the National Music Show, to be held at the Grand Central Palace, New York, on June 1 to 8 inclusive, are progressing most satisfactorily, and a large part of the available exhibit space has already been taken by prominent concerns in various branches of the music trade.

In keeping with the times, the patriotic spirit will be much in evidence at the show. It will be opened by Governor Whitman, of New York, and various representatives of the United States Army and Navy have promised to be in attendance if the opportunity presents itself.

Conducted on Co-operative Basis.

With a view to making the National Music Show co-operative it has been decided to hold it under the auspices of the Music Trade Exhibitors' Association. Each manufacturer who engages space automatically becomes a member of this association without expense or liability of any kind beyond the amount of space engaged, and he will participate in any surplus remaining after expenses are paid in proportion to the amount paid for space. This co-operative spirit has been the nucleus for the holding of a number of very successful industrial expositions throughout the country and it is safe to assume that this plan will work out unusually well for the National Music Show.

The show committee includes representatives of all the various branches of the music industry, the talking machine trade being represented by William Maxwell, vice-president of Thomas A. Edison, Inc., and H. L. Willson, general manager of the Columbia Graphophone Co. Charles H. Green is the general manager of the show, and has at his command experience gained through conducting several similar exhibitions in the past. Walter T. Swett is manager of the exhibits.

Will Dispel Gloom and Doubt.

It is expected that the National Music Show will be the year's greatest dispeller of gloom and doubt. It will start off with a high keynote of optimism, which will sound throughout the music trade and will reach beyond to reviving general business conditions. It is generally realized that it is more important to hold a show during a period of depression than when all lines of business are active and when optimism reigns supreme. Panics and hard times are psychological—at least they are largely due to doubts and uncertainty. The visible evidence of confidence and actively presented by the music industry will react on the minds of the whole public and will re-establish waning confidence. The vitality and the firm foundation of America’s music industry will be proved conclusively by the forthcoming show, which will be a reply to the many false reports that the industry was in the non-essential class. There never has been a year when the need for music was so important as now.

Without a doubt the Music Show will be the most unique of any exhibition ever held in Grand Central Palace so far as the individual displays of the exhibitors are concerned. Each exhibitor will have a distinct display of his own, so constructed as to be soundproof.

The talking machine companies who will exhibit at the show include Columbia Graphophone Co., New York; Thomas A. Edison, Inc., Orange, N. J.; Otto Heineman Phonograph Supply Co., New York, and the Pathé Frères Phonograph Co., Brooklyn, and others.

There will be a number of conventions held in New York during the week of the show, including the annual gathering of the Edison dealers at the Waldorf-Astoria. The National Piano Manufacturers' Association and the National Association of Piano Merchants, and the National Piano Travelers' Association, will also hold their conventions in New York during the week.

All the money taken in at the door for admissions, and it is expected to be a large amount, will be devoted entirely to the purchase of musical instruments, records, etc., for the men in the service. Moreover, all those who bring a new or used talking machine record as a contribution for the use of soldiers and sailors will be admitted to the show without further charge.

INCREASE DELIVERY EQUIPMENT.

C. Bruno & Son, Inc., 351 Fourth avenue, New York, Victor wholesalers, have just added to

SUCCESS OF THE BUTTERFLY MOTOR.

Leonard Markels Planning Factory Expansion to Take Care of Increasing Demands

Leonard Markels, 165 William street, New York, motor manufacturer, states that during the past month or two he has received very large orders for the Butterfly motor which he introduced last year, and which has achieved remarkable success in the comparatively short time while it has been in the market. The Markels factory is working to capacity to turn out this motor, and plans are now being formulated whereby the factory output will be materially augmented during the course of the next month or two.

Mr. Markels states that this motor has been adopted for exclusive use by prominent manufacturers throughout the country, who are pleased with its distinctive merits, and who are equipping their machines with this motor, in order that their dealers may have convincing sales arguments for their product.

It is probable that in the near future Mr. Markels will have some significant announcements to make regarding the perfection of several important new models which will be added to his line as quickly as possible.

PLAN EXHIBIT OF RECORD MAKING

One of the features of the National Music Show to be held at the Grand Central Palace, New York, on June 1 to 8, will be the exhibit of the Pathé Frères Phonograph Co. This company plans to install a complete record-making plant in its booth, to show the public how records are recorded and pressed. The exhibit will be under the direction of M. N. Heineman, managing director of the Pathé Co., and not only will the pressing equipment be installed at heavy expense, but an orchestra and a galaxy of recording artists will be on hand to give demonstrations. The Pathé Co. installed a record-pressing plant in their exhibit at the Music Show in Chicago last year, and it was one of the big attractions of the show.

THE FRITTSCH PHONOGRAPH COMPANY

228-230 W. Seventh St.

CINCINNATI, OHIO
First Presentation to the Trade—the PURITAN

This great instrument embodies the most striking discoveries that have come into the talking machine industry since tone reproduction was first invented. These discoveries are exclusive features—giving the dealer a series of new, powerful and definite selling arguments found in no other phonograph made. And, in addition, you have the Puritan Records, made by us.

The long horn, extending the full height of the instrument, from tone arm at the top to the sound chamber at the bottom, gives a fullness, richness and life-like quality of tone absolutely unheard of in reproduced music. The horn is of saxophone design and entirely of wood. With the sound chamber at the bottom, the sound waves rise to where you stand or sit. The graceful convex cabinet design is another exclusive and patented Puritan feature.

The Puritan plays any disc record. Prices range from $85 to $350. Write or wire today for full details of our attractive proposition on Puritan Phonographs and Puritan Records.

REPAIRS
TALKING MACHINE TROUBLES AND
HOW TO REMEDY THEM

Conducted by Andrew H. Dodin

(1) This department of The Talking Machine World is de-
signed for the service of all those of our readers, includ-
ing those who make, and those who sell, talking machines.
Andrew H. Dodin, compiler of this department, has a wide
and enviable reputation as a repairer of talking ma-
chines and conducts an exclusive talking machine repair-
shop at 176 Rich avenue at 75th street.

A SLIDING SAPPHIRE BALL

Repair Department,

Talking Machine World:

I have a talking machine with so-called Uni-
versal tone arm, which plays all styles of rec-
cords. When I place the sapphire ball needle in
the sound box and try to play the Pathé rec-
cords, the sapphire always slides out of the
groove of the record. Can you tell me what the
trouble is?

Answer—Your trouble without doubt is in not
having the sapphire ball at the proper angle to
the surface of the record. Try bending the
the sapphire holder out at an angle of about 45
degrees and then place it in the sound box with
the sapphire pointing up. This will bring the
ball at the proper angle when placed on the
record.

Regarding Motor Knocking

The Talking Machine World:

Could you suggest a way to overcome the fol-
lowing troubles which I am having with my
Victrola? While playing it often makes a loud
knocking noise in the motor, and while it used
to play five records with one winding it now
has to be wound up after playing one record.

Answer—The knocking is caused by lack of
graphite mixture on the main spring. If the
machine will only play one record no doubt one
trace of the main springs is broken which prevents
the full winding of the motor.

Adjusting the Speed Indicator

Editor Talking Machine World:

Can you tell me through your Repair Col-
umn the cause of the following trouble with my
talking machine? When playing a record at
the proper pitch of voice the pointer on the
speed adjuster points to 60 instead of 78, as
the instruction book with the machine says it
should. How can I fix pointer so that it will
point to the 78 mark on the regulator dial when
machine is playing 78?

I. C.

Answer—There are several styles of dials and
regulators used on talking machines. As a rule,
there is an adjusting screw either on the bot-
tom or top of the dial, and by screwing in or
out with this screw, the position of the gover-
nor lever rod is changed and the speed of the
motor is adjusted accordingly.

EDISON BOOK OF INTEREST TABLES

Harrison Durant, financial supervisor for
Thomas A. Edison, Inc., has just completed a
very valuable book, including the interest tables
to be used in connection with Edison phono-
graph deferred payment sales. In this connec-
tion it might be of interest to say that the Edi-
son Co. was the first phonograph company to
demand that dealers charge interest on deferred
payment sales, and this book of interest tables
was prepared as a ready reference and informa-
tion chart, and it is certain that the demand for
the book will be very general.

A NEW LINE OF TALKING MACHINES

C. John A. Woods & Son, 38 Church street,
New York, well known in expert circles, have
just placed in the market a new line of phono-
graphs, which will be known as the “American
Mail” phonograph. This machine is being
manufactured in six different models, retailing
from $17.50 to $50, and each model is equipped
with a universal tone arm, which plays all
makes of records without any attachment.
The concern is not only planning to develop an
export demand for this instrument, but is also
making arrangements to take care of an active
domestic trade. Mr. Woods has already estab-
lished important export connections, and expects
to announce in the near future a number of
domestic agencies for the “American Mail”
phonograph.

"Does It Play All Records?"

Certainly MAGNOLA does; and without any extra attachments, too. This is only one feature, among innumerable others, that identify MAGNOLA as the world's only completely automatic reproduction equipment... "MAGNOLA "Built by Tone Specialists"

SUGGESTS NEW RECORDING SYSTEM

Henry G. Rhodes Would Use Film Instead of Circular Record and Record Tones of Each Instrument or Each Voice Separately

Henry G. Rhodes, of Whiteville, Tenn., in a letter to The Talking Machine World suggests that tonal, or national record be done away with and that a specially prepared paper, a little wider than a movie film, be substituted for recording purposes. Explaining his idea, Mr. Rhodes says: "If a quartet and orchestra were to make a record, let there be five recorders mounted upon a rigid frame so as to be exactly parallel; each diaphragm to vary in thickness. The bass singer would have his horn and separate recorder—as bass vibrates slowly his diaphragm should be thicker than even the baritone. The tenor of course vibrating very fast, should have a thin diaphragm. The orchestra would have a horn and record to themselves—possibly two hornists to take in all of it.

"The four singers and the orchestra would sing and play separately each to their appropriate diaphragms—in a separate room so that their respective recorders would record only their voices or music. Then when this record was to be reproduced, each stylus would track the original groove, using a diaphragm of the exact thickness as the recorder that made that special groove. This tape would be moved much like a moving picture machine film, from one reel on to another. The five reproducers to be mounted so they would touch the tape about where the conventional phonograph's reproducer is.

"The tape would move under these reproducers at about one hundred feet a minute. Thus one diaphragm would not have to vibrate with so many and varied pitches."

ENLARGING THEIR DEALER CLIENTELE

Pittsburgh, Pa., April 10—The Pittsburgh Pathéphone Co., of this city are enjoying a most prosperous season. They are gradually enlarging their line of dealers, among the most recent being Samuel Levi & Co., Portsmouth, Ohio; the Whitehead & Hoag Co., A. K., and Anderson & Newcomb, Huntington, W. Va. Manager Brennan announces the opening of a new repair and adjustment facility for the convenience of his trade. It is connected with the Pathé Shop on Liberty avenue.

ANOTHER FEIST MUSIC CAMPAIGN

Prominent Publishers to Carry New Copy in Saturday Evening Post at an Early Date—All Advertisements Planned to Stimulate Record Sales as Well as Music Sales

Leo Feist, Inc., the well-known publishers of popular music who from time to time have used space in The Talking Machine World describing to the dealers this industry's co-operation they offer them in handling Feist songs of the moment which have been recorded by the leading record manufacturers, have again brought to the trade's attention their advertising co-operation in this issue. Through the past two years the house of Leo Feist, Inc., have run advertisements in mediums of national circulation inducing the public to buy their songs and in every case they also stated that the numbers could also be secured for the talking machine and player-piano.

Not only does the firm carry on a national advertising campaign in behalf of their songs, but they also see to it through their various branch offices, located in the larger centers of the country, that their songs are sung in vaudeville and played in the moving picture houses, cabarets, and by the dance orchestras in almost every city. This is done by the traveling representatives of the firm, from the cities.

In an announcement to appear in an early issue of the Saturday Evening Post, which is reproduced on another page of this paper, the House of Feist will feature three of their newest songs, all of which have already been given public approval. The numbers are entitled "I'm Sorry I Made You Cry," "Belgian Rose" and "Just Like Washington Crossing the Delaware. General Pershing Will Cross the Rhine." The advertisement will also include mention of all the active numbers in the Feist catalog.

PATENTS REPLACING DEVICE

Patents covering a replaying and repeating device for talking machines has been granted to the Rev. John Prout, of this city. The device described in this patent allows of the complete control of the replaying of the record or the repeating of parts of the selection from various parts of the record, without other exertion than a slight pull on a cord. The action is so simple that various persons who have seen this device have marveled that it was not used before.

EXECUTIVE COMMITTEE TO MEET

Governing Body of National Association of Talking Machine Jobbers to Hold Session in Philadelphia to Discuss Conditions

President J. Newton Blackman, of the National Association of Talking Machine Jobbers, has called a meeting of the executive committee of that organization for April 22 and 23, at the Ritz-Carlton Hotel, Philadelphia. The committee will discuss primarily the effect of the latest war conditions on the trade, and endeavor to devise ways and means whereby through cooperation between the wholesalers and the factory the conditions can be met and overcome. The talking machine men realize that they must make sacrifices as a result of the country being in the war, but feel that there are ways of adjusting their businesses so that the burden may be carried as lightly as possible. At the meeting in Philadelphia plans will also be discussed for the annual convention of the association to be held in Atlantic City in July.

NOW IN TALKING MACHINE TRADE

Harry Jasper, formerly sales manager at the factory warehouses of Paul G. Mehlin & Sons, prominent piano manufacturers of West New York, N. J., is now conducting a Victrola store in Englewood, N. J., under the store of the Franklin Parlors. Mr. Jasper also conducts Jasper's Orchestra, a well-known organization which last week provided dance music at the dinner of the Talking Machine Men, Inc.
BUSINESS PRIDE

HERE is more in business than just financial gain..... the satisfaction of accomplishment, the making of friends, the establishing of goodwill.

When the Stephenson Precision-Made Motor was perfected we faced the selling problem; faced it with hearts full of faith and confidence, and high ideals.

We have now a pardonable pride in our success. We have profited, but the pride is not on this score, but rather because of the thousands of Stephenson Precision-Made Motors that are giving perfect satisfaction; of the friends we have made through the sincere service given. And for these friends we are grateful.

And always we will be ambitious to render this service and make it even more complete, and to guard jealously the goodwill that the Stephenson Precision-Made Motor has won.

FRANK V. HUTCH
Vice-President

STEPHENSON, INC., One West 34th Street, New York
EDISON EMPLOYEES ORGANIZE FOR THE THIRD LIBERTY LOAN

Meeting and Dinner Held in Orange, N. J., Attended by Many Prominent Speakers Who Tell of the Work Already Accomplished by Our Government in Prosecuting the War

On April 2 the Edison employees' war committee of 200 members assembled in one of the Edison buildings to dine and discuss the Third Liberty Loan. William Maxwell, vice-president and manager of the musical phonograph division, acted as chairman, and in his opening remarks made humorous reference to three chairs in the background which were labeled: "For the Newlyweds, Mr. and Mrs. Charles Edison." Mr. Maxwell stated that the three chairs meant three places for Mr. Edison and his bride, and they were given with a will.

The first man introduced was William Meadowcroft, assistant to Thomas A. Edison, who read the following telegram from the inventor who is at present in the South:

"William Meadowcroft, Edison Laboratory, Orange, N. J.

"Since the committee I am highly pleased that they have all banded together to help the Government. Our Government suits us because we make it ourselves and we will fight to maintain it and all other governments, of which the people are masters, against any predatory aggression of barbarians."—Edison.

Mr. Meadowcroft then emphasized the tremendous amount of time, effort and money that Mr. Edison is expending for the Government and for which he refuses to accept one cent in payment.

Mr. Maxwell discussed the telegram and remarked that America should not feel overburdened. The Germans were only sixty miles from Paris but 3,000 from Washington, which acted as a present source of self-defense, but unless everybody got in and did the best that they were capable of, God help us all. In the course of his talk Mr. Maxwell declared that it was his opinion that the war would be decided this year, and from newspaper comment that our boys were evidently in the big fight to-day and were carrying on to the best of their ability. He said that we must all do as the Government bid us without any heretics, that we were to exercise our influence whatever work is to be done and should do whatever work was assigned to us to the best of our ability.

He then introduced W. S. Mallory, vice-president and manager of the Edison Cement Works at New Village, N. J., the division that made such a splendid record at the last Liberty Loan drive. Mr. Mallory said that Mr. Maxwell had started the campaign and said that he looked for big things and that the Cement Works would show up as well in the Third Liberty Loan as in the others that preceded it.

Mr. Maxwell next introduced Dr. Miller Reese Hutchison, who is a member of the Naval Consulting Board, and whose remarks were exceedingly interesting, particularly the reference to igniting the muck-raker.

Dr. Hutchison claimed that despite all the newspaper talk of the muck-rakers that nothing had been done a great deal had been accom-

plished. Aeroplanes were being sent over by every ship, not completed but in parts and assembled on the other side, and that hundreds of American machines were at present in the air over there. It is comparatively easy, asserted Dr. Hutchison, to get a reputation by muck-raking, but it would be a great deal better for everybody concerned if they did something instead of talk. We are not in it for fun but for good, and we will not stop until things are over "over there." Material is going over with every ship and no little seventy-two-ninie gun can bluff us because we're in the game to win.

This "down with the trusts" propaganda was fostered by Germany for her own benefit and for the better development of her own gigantic trusts.

At the conclusion of his remarks, which were heartily applauded, Dr. Hutchison claimed that many of Mr. Edison's inventions were holding up his reputation as an inventor on the other side.

In the matter of the loan, Dr. Hutchison subscribed $30,000 on the spot, and declared that he believed the employes of the Edison Co. would exceed their excellent records in connection with the first and second Liberty Loans.

Mr. Maxwell, after the applause had subsided, said that it was the intention of the meeting to start subscriptions, but Dr. Hutchison had the honor to be the starter. Mr. Maxwell then introduced whom he called the get-the-money-man. Gene Philips, credit manager. Mr. Philips characterized his talk as the bun show after a star act. He congratulated everybody on the War Savings Stamps effort, and said that, although all the details hadn't been received, the rate of the new loan will be 4½ per cent., which was exceedingly liberal considering that it was backed by the best security in the world and that savings banks only gave 4 per cent. Mr. Philips quoted from figures. He said that up to March 12 there had been invested in War Savings Stamps in the country $86,289,402, and he also thought that by April 2 at least $100,000,000 worth of War Savings Stamps had been sold. He also illustrated by figures the vast increase in our armed forces through this "great war.

At this point Mr. Maxwell said that it would be the best time to introduce the author of this slogan, "Make a Business of Winning the War," and introduced Nelson C. Durand. Mr. Durand said that it was up to everybody to "make a business of winning the war." He said that it might not be necessary, as in the Civil War, for the women to make bandages, etc., and he characterized the mere giving of money as a joke compared to the sacrifices our soldier boys were making.

He said that the Edison organization was investing over $2,100 a week in War Stamps.

The Edison Liberty Loan Banquet

Tone—the vital thing

If you, as a manufacturer, can talk and prove tone superiority in your product, you have a selling argument to overshadow all the "talking points" of cabinets, and designs and accessory features.

And you can talk tone superiority. You can put out a product that will be a revelation in tone-purity, tone-quality, tone-volume. When you realize what vivid, lifelike, colorful tone can be produced and sustained by the talking machine equipped with Parr Magnetic Reproducer fitted with the Vibratone Patented Diaphragm.

These two dominating and proven inventions open up wonderful possibilities for manufacturers eager to put their product at the top-notch of class and character.

You want your product to be RIGHT!

If you want your product worthy of your name, you certainly want that product to be right in its most critical feature. And it will be right if it is equipped with the Parr Magnetic Reproducer—the reproducer for those who seek perfection.

The indestructible, non-crystallizing, always resilient VIBRATONE PATENTED DIAPHRAGM

Possessing all the good points of mica diaphragms, it overcomes all mica's bad characteristics without weakening. Rare earth, rare metals, it has a definite function and it performs it. It improves tone; in fact it creates new tone possibilities for every reproducer of other types.

Hook Up With the HITS!
ALL PROFITS FOR LIBERTY BONDS

B. R. Forster, President of Brilliantone Steel Needle Co., Pledges All Profits for Current Year to Patriotic Purpose—Splendid Step

On the opening day of the Third Liberty Loan an important announcement was issued from the offices of the Brilliantone Steel Needle Co. in the Marbridge Building, New York, to the effect that B. R. Forster, president of the company, will dedicate every dollar of profit made during the year 1918 to the purchase of Liberty Bonds. The company have already purchased $25,000 worth of these bonds and will continue so to do as their profits accrue.

It was announced at the formation of this company, months before they actually started in business, that their business slogan would be "Made in America by American Labor." It is needful to state that this slogan has been rigidly lived up to. This latest patriotic endeavor is entirely in accord with the spirit of the firm. According to the achievements of the Brilliantone Steel Needle Co. during the first three months of their existence, it would seem that the amount to be invested in Liberty Bonds during the year will reach a very large figure.

B. R. Forster has just returned from an extensive trip which covered twenty-seven States and totaled about 6,000 miles. He found business conditions good throughout the territory he covered, but particularly in the South. Orders are coming in very strong, he reports, but they are somewhat hampered at the present moment by not being able to turn out the needles fast enough. During the shortage their factories have concentrated in turning out half-tone needles only and for the past few weeks deliveries have been made of this grade exclusively.

Their rapid growth has already necessitated the enlarging of their offices. Adjoining offices have been secured and work will be shortly started in tearing down the partitions.

Eugene Latham, who recently joined the company from this company, was a recent visitor at the offices. B. R. Forster, with Mrs. Forster, are enjoying the pleasures of Atlantic City, where Mr. Forster is at present taking a much-needed rest.

EDISON INSPECTORS CALLED IN

The staff of Edison mechanical inspectors have been called in for their annual get-together to check up the developments in connection with the New Edison phonograph preparatory to their returning to the road. The mechanical inspectors will remain at Orange to assist in the School of Mechanical Instruction, which will be given for the benefit of the dealers who attend the coming Edison dealers' convention and will return to their territories late in the summer.

Mrs. H. C. Ernst, wife of H. C. Ernst, of the executive offices of the New York Talking Machine Co., Victor wholesalers, left for Dayton this week to attend the funeral of her stepfather, who was killed in an elevator accident.

WILL HAVE 28 STARS IN FLAG

The service flag in the offices of the New York Talking Machine Co., Victor wholesalers, will have six new stars within a few weeks, for six members of the company's forces have either enlisted or will join the National Army in the very near future. These men are Maurice Stegner, one of the assistants to George A. Kelley; Roy Johnson, receiving clerk; Frank Ferrier, packer; Y. Mower, packer; Henry Roth, stock clerk; Fred Meltzer, stock clerk, and Rocco Renna, porter. All of these boys will be in the National Army with the exception of Mr. Meltzer, who is a member of the U. S. Army, Cavalry Division.

With these new names the New York Talking Machine Co.'s flag will have twenty-eight stars, for twenty-one of the company's staff are now in the service of Uncle Sam. Considering the fact that this organization is a comparatively small one, this record is remarkable, and it is probable that this company's staff has a greater proportion of boys who are "doing their bit" for their country than any other concern in this industry. Quite a number of the New York Talking Machine Co.'s staff are now "somewhere in France," and the letters that are being received by their friends "over here" reflect a spirit of optimism and patriotism which is characteristic of the American boys "over there."

FRED MARASAK JOINS THE ARMY

Fred Marasak, who for the past couple of years has been assistant to A. H. Dodin, president of the Talking Machine Repair & Sales Corp., 176 Sixth avenue, recently enlisted in the United States Army. Mr. Marasak already has two brothers in the army. A third brother, Charles Marasak, is manager of the Victor store of L. A. Smith, Brooklyn, N. Y.

Factory, UTICA, N. Y.
The Talking Machine Men, Inc. Hold Their Annual Banquet

The annual dinners of the Talking Machine Men, Inc., have always been notable events in the local trade, but the last dinner, held on April 16 at the Hotel McAlpin, outshone all previous affairs, due largely to the efforts of the entertainment committee, under the direction of J. J. Davin and Sol Lazarus, who provided an array of talent of a caliber that at various stages made most of the dinners forget to eat, temporarily. The dinner itself was a mighty good one at that, as vouched for by over 300 talking machine men, their wives and friends in attendance. The entertainers included the Hawaiian Troop, which has made so many successful Victor records, Joseph C. Smith and his orchestra, Charles Harrison, Arthar Fields, Henry Burr, Sally Hamlin and Jasper's Trio, all of them well

much for their country as those who are actually doing actual

nerous arms, for the music that they supply

in assuaging the sorrows of those who are called upon to face the loss of loved ones, and likewise helps the boys actually in the trenches by providing them with cheering melodies. In every sense the business is essential. He also referred to the recent Supreme Court decision in the matter of price fixing, declared that manufacturers must now depend upon legislation to get redress, and referred to steps now being taken by the various Governmental boards in the fixing of prices on basic raw materials.

Mr. Hopkins described the operations of the price cutter and the reason for his actions and told how certain standard articles were offered

at reduced prices, with a view to selling the customer other articles upon which a profit could be made. The speaker drew upon his experiences in other lines of industry to prove the necessity of the salesman believing first in his own product and mentioned that only the man who is himself sold on his product can really be successful.

Mr. Hopkins said it is his belief that the average talking machine salesman was too technical and failed to realize that the buyer likes to be flattered by having the features of the machine or records presented to him in a manner that he can understand and appreciate.

For the dealer and manager Mr. Hopkins declared that the head of the house should endeavor particularly to stamp his personality on the people employed by him, and by that means multiply himself among his salesmen. Everyone likes to do business with the head of the house, he said, and proper training will give to assistants the ability to give the same personal sort of service.

"Don't run your store the other fellow's way, but work out your own way," said the speaker. To follow in the footsteps of a competitor and to adopt his ideas is a sign of weakness and the imitator rarely meets with any success. Think up new ways of getting business and holding it. As an instance in point, don't leave a customer alone in a booth while searching for the record he has asked for. See that there is a selected number of records in each booth, and put one on the Grafoanola and start it playing, or leaving the room. This idea as one has actually resulted in increasing record sales where it has been adopted. There are also many other plans that will get results if properly applied.

Important addresses made by President Coughlin, Geo. W. Hopkins, J. Newcomb Blackman, Marion Dorian, John R. Young and J. H. Tregoe—Fine Program Offered

"Endeavor to learn of the horses in your vicinity which are not supplied with Grafoanolas. Then take a kodak snapshot of the horse, have it finished and attach it to the head of a letter, send to the owner or occupant of that horse with the query: "Why is there not a Grafoanola in this horse?" accompanied by a short selling talk. The personal touch is almost sure to make the proper impression." Mr. Hopkins also made a plea for consistent and liberal advertising by the dealer, and stated that statistics show that 84 per cent. of the business failures are among non-advertisers. He also maintained that organization funds should be used liberally in the cause of music, with the ultimate idea of making America a singing nation. Mr. Hopkins closed his address by tell-

ning what Columbia service represented at this particular time, and offered some convincing facts for the consideration of the dealer.

J. N. Blackman Talks for Liberty Loan

J. Newcomb Blackman, president of the National Association of Talking Machine Jobbers, was the next speaker, and reviewed briefly some of the problems that are facing the trade at this particular time. Mr. Blackman pointed out what business men were expected to do in support of the war program of the nation, and emphasized the fact that we had a big job ahead of us and were handling it in a big way. He declared that in this country business men were asked to buy Liberty Bonds bearing interest, to provide finances for the war, while in Germany business men had all their assets conscripted in exchange for a piece of paper possibly of no value. Mr. Blackman cited some of his experiences at Washington in connection with the war excise tax, the Cary bill and other important legislative matters, and ended his address by making a strong appeal for subscriptions to the Third Liberty Loan through the trade committee. Mr. Blackman is chairman of the talking machine division of the Liberty Loan committee of the Allied Music Trades.

Marion Dorian's Witty Address

Marion Dorian, andtoor of the Columbia Graphophone Co., spoke next, and as is his usual custom confined himself principally to some genuinely humorous remarks about nothing in particular. He kept his audience con- versed for several minutes and in closing became serious for the moment and urged liberal support for the Liberty Loan, not only for patriotic reasons, but in appreciation of what Mr.

(Continued from page 103)

Blackman had done in the interests of the industry as a whole at Washington.

Columbia Record by General Pershing
Mr. Dorian sprung the sensation of the evening, however, when he announced that his company had just received a cablegram from England to the effect that General Pershing, of the American Expeditionary Forces in France, had made a Columbia record. General Pershing is probably the leading figure in America’s military life to-day, therefore the announcement of his record was accepted at its true value.

Some Other Talks
John R. Young, head of the convention bureau of the Merchants’ Association of New York, through whose efforts the talking machine men have been able to use the rooms of the Merchants’ Association as a meeting place, next offered some comments on the commercial importance of New York and other matters within his ken, after which J. T. Coughlin, president of the association, spoke at some length on organization and co-operation, urging the necessity of talking machine dealers getting together, particularly in times such as these. He spoke for honesty in business dealings, and pleaded that the dealers forward their own cause by placing their confidence one in another.

Dancing Ends Evening’s Entertainment
At the conclusion of the dinner and speech-making the talking machine men indulged in dancing to the strains of Jasper’s Celebrated Jazz Orchestra until it was time to go home and change to business suits in order to take up the threads of business the next morning.

The success of the evening as a whole was due to the untiring efforts of J. J. Davin, of the New York Talking Machine Co., and chairman of the arrangements committee, and Sol. Lazarus, secretary of the Talking Machine Men, Inc. Their elaborate plans of entertainment went through without a hitch, for which they deserve congratulations.

Genuine Period Styles
Authentic adaptations of Adam, Louis XVI, Sheraton and Queen Anne periods, harmonizing perfectly with the styles whose spirits they bear, are a feature of the line of the Marvelous

MAGNOLIA “Built by Tone Specialists”

BUILDING UP A GOOD TRADE
S. N. Rosenstein, president of the Phonograph Clearing House, Inc., states that he has achieved remarkable success with the products of Barnhart Bros. & Spindler, Chicago, the agency for which he secured recently. These products, which include “ Superior” tone arm reproducers, etc., are meeting with a ready sale, and Mr. Rosenstein considers himself very fortunate in being able to offer these phonograph parts to the Eastern trade. He states that it requires only a demonstration to sell these products, as the manufacturer and dealer is easily convinced by actual demonstration that this tone arm and reproducer can be merchandised to excellent advantage.

Miss N. L. Moody is now in charge of the Victor retail department of Philip Werlein, Ltd., New Orleans, La.
TELLS OF REVERSING RECORDS

John B. Taylor Conducts Interesting Experiment in Playing Records Backward—Declares Tonal Effects Are Entirely Changed

John B. Taylor, who is a talking machine enthusiast, has done much experimenting with talking machines and records, and has delivered a number of illustrated lectures on the "Development of the Phonograph and a Microscopic Study of Records," has aroused particular interest through his experiences in playing records backward and reversing tones, tune and speech. In telling of his experiments in reversing records, Mr. Taylor said recently:

"Such reversed sounds, besides being curious, are worthy of study from a physical and psychological basis. Playing backwards was an old device in the early days of hand-driven, tin-foil phonographs, but these were so imperfect as to tone quality that any critical study of the change in quality was not possible. According to the theories of tone quality since Helmholtz, the quality of a tone is not influenced by the phase relations of the several sound wave partials which make up the tone. By this theory the quality of a tone should be unchanged by playing backwards. Experiment shows that this is true provided tone quality is defined in a restricted, physical sense which is more limited than the average musician means by the word "quality."

"In these experiments it appears that an even, sustained tone, whether vocal or instrumental, is practically the same for normal or backward rotation of the record, but, since many instruments do not, and others are quite incapable of producing even, sustained tones, there are surprising effects from these reversed records, especially from the percussive instruments such as piano, cembalo, harp, xylophone, bells and celesta. When reversed, these all in some degree resemble wind instrument sounds."

"To show the ability of the phonograph as a single instrument to reproduce the tone qualities of the many musical instruments of diverse shapes, sizes and means of sounding, a pleasing and instructive feature has been the display of a slide picture showing a performer and instrument at the same time that the phonograph plays a characteristic bit by the same instrument. I have had more difficulty in finding suitable records for this series than in finding pictures for the slides."

A NOTABLE VISITOR FROM CHICAGO

George L. Davidson, one of the owners of the Talking Machine Shop, Chicago, Ill., exclusive Victor retailer, accompanied by Mrs. Davidson, was a visitor to New York this week, after spending a few days in Philadelphia visiting some of Mrs. Davidson's friends and relatives. While in New York Mr. Davidson took advantage of the opportunity to call upon several of the local Victor retailers in order to gain an insight into conditions in the local trade.

Mr. Davidson is one of the foremost members of the retail talking machine industry in Chicago, and his name in this business has been little short of phenomenal. He started several years ago with a small capital, and last year did a business of more than $250,000. His establishment now occupies a four-story building in the "musical center of America," and this store, which contains more than twenty demonstration booths, is considered one of the finest Victor establishments in America.

One of the factors that has meant success for the Buehn Co., in the past, and means further success in the future, is the practice of selecting for the organization young men of broad experience in the Victor game—men like F. B. Reineck and Chas. W. Miller; E. F. Bliss, a former factory man and later with Lyon & Healy; and L. D. Callahan, who came to him with the experience of several years gained in traveling from coast to coast for the Victor Co. And now Mr. Buehn announces the addition to his organization of Wm. H. Nolan.

Wm. H. Nolan is known to the trade from California to Long Island. During Mr. Nolan's connection with the Victor factory he traveled all sections of the country, and during the Panama Pacific Exposition he represented the firm, which had a very successful exhibit. His work won such flattering attention that Lyon & Healy, of Chicago, induced him to take the management of their Chicago office, and later to enter the wholesale end of the business for the New York Talking Machine Co., where his wide experience was utilized in the development of improved retail methods among the dealers of New York City and vicinity.

IMPORTANT VOCALION SALE

Among the interesting Vocalion sales closed this week at Aeolian Hall was that of Mr. Nolan, style "K," to Johann Baumann, a delegate representing the Norwegian Commission which has been visiting this country for some time past in the interest of the Norwegian Government.

It is interesting to note that the Brazilian, Danish and Norwegian Commissions have all recently purchased Vocalions to take with them to their home countries. Incidentally they all selected style "K" Vocalions.

ADDITION TO BUEHN ORGANIZATION

Louis Buehn Secures Services of William H. Nolan, a Victor Man of Countrywide Reputation—Now Building for the Future Trade

Philadelphia, Pa., April 8—Louis Buehn, head of the Louis Buehn Co., prominent Victor wholesalers of this city, is one of those who have full confidence in the future of the talking machine business, and is making preparations accordingly in building up and strengthening the organization of the company. Mr. Buehn realizes that the present shortage in machines and records is but the natural temporary result of wartime economic readjustment, and that conditions are bound to return to normal.

William H. Nolan is a noted business man, and his services will be of considerable value to the Buehn Co. Mr. Nolan is a man of many talents, and is considered by his friends to be one of the most promising men in the industry.

Globe-Wernicke Literature

Interesting Information About the Sectional Disc Record Cabinets of This Company Issued

Cincinnati, O., April 6—In connection with the exploitation of its sectional disc record cabinets, the Globe-Wernicke Co. of this city has prepared attractive literature, which can be used to excellent advantage by the dealer.

The company has emphasized the fact that these sectional disc record cabinets solve an important problem, and a recent piece of literature entitled "How to sell more records" reads in part as follows:

"Why is it, Mr. Talking Machine Dealer, that for three or four months after a customer buys a talking sectional disc record cabinet machine he will also buy records in quantities, and then suddenly refuse to buy more? Why is it that, a few months after selling a machine, you can telephone the buyer and get his permission to send him the latest records from which to make a selection, and that after this period, your experience reaches you that it is useless to send him any more of these records with the hope of his retaining any appreciable number?"

"At first hand the reason would seem to be that he is tired of his new toy, but many dealers have told us that the difficulty is the proper and adequate housing of the records he has bought from you. The space at his disposal for filing the records has become crowded, and he has taken the road of least resistance and made up his mind not to buy any more records for the time being."

"We believe that we have solved this problem for you by the introduction of our sectional disc record cabinet, which is an elaboration of the Globe-Wernicke system of sectional bookcases, that is, a top, a unit, and a base. The unit has ninety compartments, so that each record, whether 10-inch or 12-inch, has its own compartment. In other words, there is a place for every record and every record is in its place. When the unit is filled, a second unit is placed between the first and the top sections, and so unit after unit is added vertically and horizontally as space permits."

"Dealers who place these sections on their salesroom floors, and explain the quick filing and finding facilities of this system, will undoubtedly develop an active demand for records, as the use of this system eliminates the 'bug-bear' of 'No room for any more records.' Our new catalog, No. 317, will give you an adequate idea of our unit system."

Goldsmith Breaks Into Print

Milwaukee, Wis., April 9—Harry A. Goldsmith, secretary and sales manager of the Badger Talking Machine Co., Victor wholesalers, broke into the "Who's Who" column of the Milwaukee Journal on last Friday evening. A personal sketch stated in part that "Harry A. Goldsmith acquired a becoming bashfulness while engaged in the newspaper business in Calumet, Mich., from which he has never recovered. Mr. Goldsmith believes a bass drum never sounds so loud as when one pounds it himself, but is more effective if the world is doing the pounding." The sketch also stated that Mr. Goldsmith was born in Chicago thirty-four years ago, and was brought up in Calumet, Mich., that he is unmarried, but is willing, and is a member of the Press, Elks and Adver-

tisers clubs, the M. A., the M. A. of C., and the Masons. A portrait of Mr. Goldsmith accompanied the sketch.

"American Maid" Phonograph

We are ready to offer the trade the "American Maid" phonograph, an instrument which has a tone quality that is unsurpassed. Hence the slogan—"Purity and Sweetness of Tone." No matter what record you may want to hear, the "American Maid" is at your service. Every model plays any and all records.

We manufacture six models, retailing at $17.50, $45, $65, $90, $125 and $150, and each model is finished in mahogany or oak. We guarantee prompt deliveries.

NOW THE COLUMBIA GRAPHOPHONE MANUFACTURING CO.

President Whitten Makes Formal Announcement of the Change of Name of the American Graphophone Co.—Will Not Affect the Personnel or the Policies of the Company

Francis S. Whitten, president of the Columbia Graphophone Co. and the American Graphophone Co., sent out a letter this week to Columbia representatives formally announcing the change of the latter company's name to the Columbia Graphophone Mfg. Co. The name of the Columbia Graphophone Co. remains as it is at the present time.

The letter sent out by President Whitten announcing the American Graphophone Co.'s change in name reads as follows:

"As of this date, April 1, the name of the American Graphophone Co. is changed to that of the Columbia Graphophone Mfg. Co. This change is made pursuant to a special meeting of the stockholders of the American Graphophone Co. held on March 25, 1918, at which time the officers and directors of the company were authorized to sell and transfer practically all the assets of the American Graphophone Co. to the Columbia Graphophone Mfg. Co. under a reorganization plan dated December 14, 1917. "The names of the American Graphophone Co. and the Columbia Graphophone Co. have always been more or less confusing to our dealers, and for this reason and other advantages in the reorganization we have changed the name 'American Graphophone Co.' to 'Columbia Graphophone Mfg. Co.'

"The Columbia Graphophone Mfg. Co. assumes all the liabilities of the American Graphophone Co. and the officers, directors and department heads of the Columbia Graphophone Mfg. Co. are now occupying the same positions they previously held with the American Graphophone Co."

"The change in question does not in any way affect your relations with the Columbia Graphophone Co., which continues to be the sole sales agent of the Columbia Graphophone Mfg. Co., as it previously was of the American Graphophone Co."

ARTISTIC WINDOW DISPLAY

Made by the United Music Stores of Portland, Me.—Features Display Put Out by Columbia International Record Department

The international record department of the Columbia Graphophone Co. recently received the accompanying photograph from the United Music Stores, Portland, Me.; this illustration showing a window display that was recently used by this progressive and successful Columbia dealer. This display incorporates some of the new window service ideas completed by the international record department which are being used to excellent advantage by many dealers throughout the country.

The United Music Stores expressed their hearty commendation of this display and stated that two days after it was installed the store closed the biggest foreign language record business in its history. As an example of the sales appeal of this display, it is interesting to note that on the very day it was placed in the window two Danish sailors happened to pass the window and were so favorably impressed with the Danish cut-out that they left an order for a $78 outfit, to be delivered to their ship.

The United Music Stores conducts one of the most attractive talking machine establishments in New England. It has a remarkably fine location, being situated on the most prominent corner of Portland's best business street.

R. F. Bolton, sales manager of the Columbia Co.'s international record department, states that this department has made arrangements whereby it can furnish the dealers with the complete display, or different sections of the display, so that each Columbia representative can use that part of the service which best suits his particular needs. This department has recently completed its newspaper advertising schedule, which includes a campaign in seventy

Window Display of United Music Stores

papers published in twenty-three languages. This advertising is inserted without using the Columbia Co.'s address, so that the local talking machine dealers may receive the full benefit of this publicity.

ORGANIZE BEECROFT-BLACKMAN, INC.

Beecroft-Blackman, Inc., has been organized in New York for the purpose of taking over by assignment the Beecroft United States Letter Patent No. 1,244,944, issued October 30, 1917, covering the placing of moulding on top of talking machine cabinets to hold Victrola IX. The new corporation plans to issue licenses on a royalty basis to desirable manufacturers of cabinets for the use of Beecroft patents. Several arrangements to that end have been entered into. The leading figures in the new corporation are Clement Beecroft, long connected with, and widely known in, the talking machine cabinet field, and J. Newcomb Blackman, president of the Blackman Talking Machine Co., New York, who likewise needs no introduction to the members of this trade.

Your Record Order

—Placed with us is handled with that promptness and satisfactory attention to every detail which is only possible to a large, perfectly equipped distributing organization

You want your order promptly filled; you want the records carefully packed; you want your shipping instructions followed; you want conscientious, painstaking attention given your needs; you want service that is real co-operation—These factors applied to each and every order, large and small, is each month increasing the list of retailers whom we serve.

TRY US ON YOUR NEXT ORDER! Our service is based on the desire to aid in adding to your business.

Are there those of foreign nationality in your territory? They want records

in their own tongue. The vocal and instrumental music of every country is embraced in our fast stock. Don't neglect this field for greater business.
BUSINESS IN BALTIMORE ONLY AWAITS SUFFICIENT STOCK

BALTIMORE, Md., April 9—Talking machine business in Baltimore is in a peculiar condition at this time. Some of the dealers and distributors are reporting wonderful business with remarkable increases over the same period of previous years, while others report a falling off due to the lack of goods—not in the lack of demand for machines and records, however, the month opened with better receipts of goods than for some time past, but not near enough to meet the pressing demand.

The present condition has caused several of the distributors to adopt a policy of forcing dealers to sell the kind of records they can get or do without additional machines.

This is a measure that has resulted in creating business of a new kind and records that have been in stock for as long as six and eight years are now moving out of showrooms. Many instances are reported of the buyers accepting what they could get instead of what they wanted.

Dealers are forcing their salesmen to study their stock better so as to meet the present conditions of shortage of goods with as small a loss as possible.

Both the Victor and Columbia concerns were able to obtain some good advertising for their records last week. The Victor Co., took advantage of the fact that Amelita Galli-Curci was billed to be the special soloist with the Symphony Society of New York at the Lyric on April 4 and advised music lovers to hear her and then hear her on the phonograph. Two days before the performance announcement was made of the illness of the artist and Lucy Gates, soprano, was substituted. The Columbia Co., at once let loose display advertising urging the public to hear Miss Gates and then to have Columbia records made ever present in their home. Thus both companies benefited by the unfortunate event for one and the fortunate event for the other as the demand for Galli-Curci records and the Gates records are the greatest in the dealers' respective lines ever had for any individual record. It's the old saying that it's an ill wind that blows no good.

W. S. Parks, manager for the Baltimore branch of the Columbia Co., is very happy over the phenomenal business done by his branch during March. It proved to be the greatest month's business that the branch has ever done, and what it did to the figures of the same month a year ago would be a shame to tell. But Mr. Parks is right on the job, for instance, on Saturday, before the close of the month, he received a carload of machines. He had a lot of orders for Washington, but his Washington point man, Mr. Mariam, so he hired two big motor trucks and at 4 o'clock in the morning had the machines at the station. These machines were loaded as soon as business opened and the same day were shipped to Washington. The facilities for Southern shipping out of Baltimore by boat being a little congested at this time, Mr. Parks through this stunt was able to get his goods started for their destination promptly by this move. It was just a trifle more expensive, but proved to be a way to get around the freight situation.

Mr. Parks announces the appointment of Daniel DeFolde, as head of the dealers' service department.

F. K. Pennington, general sales manager of the Columbia Co., was in Baltimore during the month and expressed himself as well pleased with the business conditions here. It was his first visit to the new quarters.

From General Manager H. L. Willson, of the Columbia Co., Mr. Parks received the following wire: "Heartiest congratulations to you and Baltimore's sales force for your wonderful month. I also received a wire from A. J. Heath, former Baltimore manager, but now in charge of Philadelphia headquarters for the Columbia, which stated: 'I was overjoyed when I heard Mr. Heath was in Baltimore to spend Easter and met Mr. Parks. The Hopewell Furniture Co., Hopewell, Va., who have just received their first line of Columbia goods, are overjoyed with the outlook for good business. Thurman & Boone Co., Roanoke, Va., who have been handling the Columbia line for some time, have just reorganized their store, installed new booths and redecorated their talking machine department.

A. B. Creal and W. M. Kofhamer, Jr., who are on the road for Columbia, have been finding in fine orders. P. W. Peck, who looks after the Carolinas, made a hurried trip to headquarters during the week looking after stock.

Mr. W. C. Roberts, manager of E. F. Drapen & Sons Co., Victor distributors, is doing a fine retail business, but his wholesale business is retarded because of his inability to obtain goods.

Mr. Roberts, a regular representative of the wholesale trade he is demanding of all dealers that they buy an equal amount of the kind of goods he can get from the manufacturers, but whether he can obtain what he wants is uncertain. In this way he says that he has been able to move records that have been on the shelf for at least eight years. Mr. Roberts reports that the demand for Galli-Curci and Heifetz records have been phenomenal. Had he been able to get the goods he says he would have found very close to a 30 per cent, if not better increase over last year's business.

Henry Eisenbrantd, of H. R. Eisenbrantd & Sons, Inc., Victor distributors, is very short of goods and is making every effort to get more goods, but with little success. He says that business has naturally suffered because of the lack of records. He visited headquarters during the month and will make another trip there early next week.

J. C. Cohen, of Cohen & Hughes, Victor distributors, says he has been unable to fill the demands for goods, despite the fact that he has been able to obtain some good shipments, although not near enough to go around.

Jesse Rosenstein, for the National Piano Co., Pathé distributors, has been getting some goods, but is still short of machines and records.

The Brunswick-Balke-Collender Co. have changed their Baltimore headquarters and are now located at 107 Hopkins Bldg. They are steadily expanding their business.

Hammann-Levin Co., Victor dealers, report a fine business in both machines and records, and say the business of the past six months is way ahead of the same period of a year previous.

The Mann Piano Co., Leopold Ehrlich, sales manager, Victor dealers, says that March business is simply fine in both records and machines.
Columbia advertising is aimed to get more business—through you dealers. Some little time, attention and money are devoted to that one end.

WHY MUSIC IS AN ESSENTIAL

During War Times Discussed Most Interestingly by H. N. McMenimen

H. N. McMenimen, of the Pathé Frères Photographic Co., recently gave a very interesting interview in connection with the importance of music in war times, and the fact that it should be recognized as an absolute essential.

In this talk Mr. McMenimen said in part as follows: "In war times music is an essential. It is a necessity in the ranks of the fighting man, for it instills the firmness of morale neces-

TO CALCULATE PROFITS

What Additions to Cost Necessary to Determine Them—Some Interesting Data

A letter has been received by the New York Times from John Connors, secretary and treasurer of the Howe & Rogers Co., of Rochester, N. Y., containing a schedule of profit calculations which he thinks will be found very useful by the average business man. It shows, for instance, that 5 per cent. added to the cost of an article is equal to a 4½ per cent. profit on the selling price. The remainder of the table follows:

<table>

"This schedule," Mr. Connors says in his letter, "appeared some years ago in a newspaper which I believe was and is still published in Springfield, Mass. I have never seen it published since in any paper."

HOW BOTEUFHR DEVELOPS TRADE

Live Talking Machine Man of Pittsburg, Kan., Has Built Up Big Business Among the Miners as Well as the Wealthy in His Section

PITTSBURG, Kan., April 5.—Frank S. Boteufhr has developed a business in Grafonolas that keeps him hustling. He has been established in the music business in Pittsburg for several years and has a high-class retail store which is patronized by the wealthy classes as well as others. The chief trade in Grafonolas, however, is through the Pittsburg territory, scores of machines having been placed in the last few months even in the homes of the miners, that, judging from their exterior, would have none of the modern conveniences and the essentials of American life. The miners, however, are getting $4 and $5 a day and they can work three days a week and have more money to spend than the ordinary city clerk who makes $100 a month.

One of the plans of distribution Mr. Boteufhr has operated very successfully is as follows: One of his agents will take two or three machines to his automobile and drop them at houses along the route. He will place maybe five or six along one of the main roads in the territory, in houses as close together as he can. Perhaps the next day and the following day he will spend in placing more machines in houses along this same road. Then he will start gathering up the machines, a day or so being sufficient for a trial. In nine cases out of ten the people who have tried the Grafonola will keep it. However, if one of them should decline to buy, the agent will load the machine in his car and take it with him on his further work down this road. When he finally comes to a house that has not yet tried a machine, he will leave it at this house. In this manner the agent saves a great deal of time in placing machines and his work is even simpler than that of an agent working in a city, because his delivery expense and time occupied in picking up the Grafonola when it is not sold is reduced to a minimum. Mr. Boteufhr has been distributing considerably over twenty-five Grafonolas a month in the Pittsburg neighborhood, and one can easily imagine the large trade in records which he is building up for himself.

TEST offered to dealers to prove the superiority of

Wall-Kane Steel Needles

Take two standard disc records of the same selection, play ten times with the same WALL-KANE loud needle; play the other record, the same selection, ten times, but with ten, new, full tone steel needles.

You will find that the record played ten times with the same WALL-KANE needle will sound clearer, will have less surface noise, and that under the magnifying glass the grooves of the record played ten times with the steel needles will seem to be more disturbed.

Beware of Imitations

Package of 50 WALL-KANE needles. Loud, Extra Loud and Medium, greater value than 500 ordinary steel needles, retail for $10, costs the dealer 50c.

NEW YORK
STOCK SITUATION A LITTLE EASIER IN LOS ANGELES

Los Angeles, Calif., April 6.—The situation here in regard to getting stock has brightened up to a certain extent, and all of the local jobbers have been receiving small shipments of both records and machines during the last month. However, most dealers are a long way from having all the goods they need, as most of the machines needed are already spoken for, which leaves none for present trade. The demand keeps up to all expectations and only the lack of goods prevents last year's records from being broken.

The Victor, Edison and Columbia jobbers seem to think that the freight situation will not be strained as before and that goods will be coming through nearer to schedule time than before. This will be a great relief to the local dealers as the old "freight" excuse is getting rather time-worn even if true.

It really is remarkable that business has kept up as well as it has, considering the number of ways in which our patriotic citizens are coming to the front in defense of our Government by buying bonds, stamps, etc.

A great many persons are still sending machines and records to our nearby cantonments and many soldiers and sailors are themselves purchasers, especially of records, when in our city on leave. The phonograph has become very popular with the soldier boys, who get a great deal of enjoyment and entertainment from playing them. When donated for that purpose, all dealers will be glad to send them to the camps free of charge.

Talking Machine Association Meets

The Retail Talking Machine Dealers' Association of Southern California held its regular monthly meeting at the Platt Music Co., store last Tuesday evening, with practically every member present. It was decided at this meeting to continue the trial plan of re-framing from advertising talking machine terms for another thirty-day period, as it seems to have been proving very satisfactory. The proposition was also discussed to further regulate sales, on a more uniform basis, by requiring that the first payment equal 10 per cent of the contract price, with $5 as the minimum for such payment; that 7 per cent interest be exacted in all instances on deferred payments, and that the free records accompanying machine sales shall not exceed one-half the amount received as the first payment. These matters, however, were only discussed with a view to preparing the members for definite action at the next meeting, which will be held on April 30, at Barker Bros.

A. A. Tanner, Victor dealer in Monrovia, Calif., recently gave a benefit concert for the Red Cross with a Victrola XVI electric. The machine alternated with other musical numbers and the concert was a big success with a large attendance. In all more than $300 was made for the Red Cross.

Dan Voorhies, with the Brunswick Phonograph Co., is very enthusiastic about the way his line of machines is taking in southern California. Mr. Voorhies has placed agencies from Bakersfield in the north to San Diego in the southern part of the State, also several agencies in Arizona. The Brunswick is represented in Los Angeles by the Barnes Music Co., Lyon-McKinney and Smith, large furniture dealers, and Hamlenger & Sons, the largest department store in the Southwest. The Brunswick Co. are located at 845 South Los Angeles street.

McCormack's Sensational Drive

One of the most notable musical events that have taken place in our city for some years was the Red Cross concert given by John McCormack and his company on March 18, at the Shrine Auditorium. An immense audience was present. In fact, hundreds were unable to obtain tickets and the concert was a huge success from every standpoint. Mr. McCormack was very enthusiastic about the large audience and had to respond to numerous encores. About $1,000 was realized for the Red Cross Society, and besides donating his services to the concert Mr. McCormack autographed forty-five of his favorite records, which were sold at the Red Cross at prices ranging from $25 to $100. Twenty-five of the records were donated by Barker Bros. and twenty by the Southern California Music Co.

The T. J. Johnston Music Co., for many years located on Main street, near Fourth, are moving to 406 South Broadway, where they will open an up-to-date music store of pianos, sheet music, small goods and talking machines. They are agents for the Victor and Columbia lines, and will have a very fine department.

The Curtiss-Colyer Furniture Co., of 507 South Main street, Pathé dealers, report a fine business for March. Their business has been growing so fast that they are contemplating enlarging the department in the near future.

Sherman, Clay & Co. Expand

Sherman, Clay & Co., Victor wholesaler, who have occupied part of the fifth floor in theParamac-Dornemann Building for the last ten years, have just succeeded in leasing the entire floor, and are busy at present moving and remodeling. Chas. Ruggles, their local manager, is delighted with the change as his former space was entirely too small for the volume of business that he now has. When finished they will have nearly 13X00 square feet of space which will give them one of the largest jobbing houses for their line in the West.

The Columbia Phonograph Co., wholesale, report a brisk demand from dealers for their new period designs, several of which have been sold since they were placed on exhibition. Mr. Söldham, their manager, is very pleased with their business, and has placed many new agencies since January—several of whom handle the Columbia line exclusively.

Edison Co. Take Over Local Concern

One of the most important changes in the jobbing line that has taken place in Los Angeles has just been consummated—namely, the taking over by Thomas A. Edison, Inc., of the Diamond Disc Distributing Co. This is in accordance with the policy of the Edison Co. to control the wholesale line on the Pacific Coast, this office being the last link in the chain, which extends now from Seattle to San Diego. A. C. Iretton, with headquarters at San Francisco, will be Coast manager for the new company, which will be known as the Edison Phonograph, Ltd. Mr. Iretton is formerly general sales manager for the Edison Co. at East Orange, N. J. The Los Angeles office will now have the entire State of Arizona as the El Paso wholesale house will be closed. C. A. Lovejoy, who has had charge of the Edison wholesale booth for the Southern California Music Co. and afterward the Diamond Disc Distributing Co., will be retained as local manager.

Barker Bros. have enlarged their talking machine department by the addition of several new demonstration booths. C. A. Booth, their manager, says business is fine, and if it keeps up and they are able to get the goods, it will be necessary to enlarge again next fall. April first was the day for the formal opening, and each customer was presented with a beautiful rose as a souvenir.

Barker Brothers handle the Victor, Edison and Sonora machines.

The leading dealers of Los Angeles. The occasion was on the night of her concert, April 8, at Trinity Auditorium. The presentation speech was made by Len Behrmyer, our local impresario, in his usual faultless style, and the Madam responded with a few well-chosen words of thanks. The following dealers were the donors of two Talking Machine Co., Barker Brothers, Geo. J. Birkel Music Co., Southern California Music Co. and the Wiley P. Allen Co.

Hamburger & Sons had the formal opening of their new phonograph department on April 1. It is located on the third floor and is complete in every detail. Every person calling at the department received a beautiful souvenir. This house will carry the Columbia and Brunswick machines.

C. H. Yates, Special Coast representative of the phonograph department of the Brunswick-Balke-Collender Co., is now making his headquarters in Los Angeles, dividing his time between this city and San Francisco. He formerly covered Southern territory for the Diamond Disc Distributing Co., Edison Jobbers, and later managed the Spokane branch of the Pacific Phonograph Co. until sold to Edison Phonographs, Ltd., in 1917. Mr. Yates expects to build up an excellent trade for the Brunswick in this territory.

**THIRD DEMAND FOR SMALL MOTOR**

Reported by the Melophone Talking Machine Co.—Materials Purchased Before War

The Melophone Talking Machine Co. are finding the demands for the small single spring motor to be on the increase. Since the first of the year several contracts have been closed whereby deliveries in quantity lots during the balance of the year will be made to several concerns. The Melophone Co. has been unusually successful in meeting the requirements of the trade wishing a small motor for popular-priced machines which will give reasonable service. One of the reasons why this house can still market their small motor at low prices, according to the officers of the company, is the fact that all the materials entering into the motors were purchased before the war. Henry Sobel, president of the Melophone Talking Machine Co., is very active in the third Liberty Loan drive, being a member of one of the committees of the Patriotic Service League.

**OTTO B. HEATON'S NEW WAR POST**

COLUMBUS, O., April 8.—Otto B. Heaton, one of the proprietors of the Heaton Music Store, at 369 Fifteenth avenue, this city, has been appointed Army Secretary for the Y. M. C. A., and will leave for France very shortly to take up his new duties. Mr. Heaton has long been interested in Y. M. C. A. work and feels that he can best do his bit by assisting that organization in its efforts to increase the comfort of the soldiers on the field. The business will be continued by his brother, C. W. Heaton.

**THRIVING SCRANTON STORE**

Temple of Music Has Most Artistic Victor Quarters Under Management of G. W. Deetz

SCRANTON, Pa., April 8.—One of the most successful talking machine establishments in this section of the State is the Temple of Music in this city, which handles the Victor lines, and has developed a profitable Victrola and Victor record business.

This establishment is under the management of Guy W. Deetz, formerly connected with the Emerson Piano Co., Decatur, Ill., and well known in Western talking machine circles. Mr. Deetz came to Scranton with a thorough knowledge of the retail Victor business, and his practical experience in this field has been an important factor in the success of the Temple of Music.

This establishment was opened last fall by Stoehr & Fister, and is considered one of the most artistic Victor establishments in the East. It is a consistent user of advertising space in the newspapers, and Mr. Deetz, who is a firm believer in the value of this publicity, takes advantage of every opportunity to feature the Victor line.

**THE NEW VEECO MOTOR MAKES**

The Electric Way the Ideal Way

All experimenting has been done in advance at the Veeco factory. Any mistakes have been rectified before, and not after, the Motors have been put on the market.

The Improved Veeco Electric Motor is designed primarily and exclusively for talking machines. Runs on either A. C. or D. C., 100-125 volts, without adjustment. Supplies to run on any voltage from 6 to 250. Mounted on 12 or 12½ inch square mahogany boards ready to install.

Combined with the VITRALOID Turntable it makes a complete motor unit for high-class machines.

ENJOY VISITS TO THE MEISSELBACH AND DEAN FACTORIES

The Resources of These Establishments and the Methods of Manufacturing the Various Products

Enlighten Branch Managers of Otto Heineman Phonograph Supply Co. During Recent Visit

When the branch managers of the Otto Heineman Phonograph Supply Co., Inc., visited New York recently for their annual conference, one of the most enjoyable trips during this conference was a visit to the factories of the company's Meisselbach division at Newark, N. J. One day was spent at this plant, and the visiting managers were greatly impressed with the efficiency which characterizes every department of the Meisselbach factories. They marveled at the new machinery which was recently installed, and, after going through the factory from garret to cellar, stated that they now readily understood how the Meisselbach motor had gained its fame and prestige in the phonograph industry.

A. F. Meisselbach, head of the Meisselbach division of the Otto Heineman Phonograph Supply Co. and vice-president of the company, is a pioneer in the motor manufacturing industry, and his intimate knowledge of every detail of motor production has enabled him to place his motor in the front ranks of the industry's products. Mr. Meisselbach is ably assisted by Pliny Catucci, who is recognized throughout the trade as possessing a technical knowledge of motor construction that is second to none. He has developed and perfected many important improvements that have contributed materially to the success of the Meisselbach motor.

A. F. Meisselbach & Bro. started in business thirty-five years ago as manufacturers of fishing reels, and a few years ago placed the Meisselbach motor on the market. From the moment it was introduced this motor won the approval of the manufacturers, and this factory has been far oversold for more than two and a half years. The company was amalgamated with the Otto Heineman Phonograph Supply Co. a year ago, and since that time Meisselbach motors, tone arms, and sound boxes have won new laurels in the talking machine industry.

Plant of the Meisselbach Division of the Otto Heineman Phonograph Supply Co., Newark, N. J.

During their stay in New York the branch managers of the Otto Heineman Co. also spent a day at the factories of the company's Dean plant. The Dean division of the Otto Heineman Co., although the "baby" of the organization, is becoming more important day by day.

TALKER MEN HAVE LIVELY TIME

TALKING MACHINE Men, Inc., Cast Tie Vote on Question of Barring Jobbers From Active Membership—Other Questions Taken Up

The feature of the regular monthly meeting of the Talking Machine Men, Inc., held in the rooms of the Merchants’ Association in the Woolworth Building on Wednesday, March 20, was the discussion and vote on the amendment to the by-laws recently introduced and designed to confine active membership in the organization to retail dealers exclusively and place jobbers and wholesalers in the class of associate members.

J. Newcomb Blackman, who is president of the Newcomb Association of Talker Men and Jobbers, made a strong talk in favor of the amendment and gave some excellent reasons for making the change. Henry Mielke and others also spoke in favor of the measure. Those opposed to making the change in the by-laws included Irwin Kurtz, A. H. Mayers and Max Landay. Several votes were taken on the question, but the final result was a tie, and it was decided to postpone the final decision until the next meeting, when all members will be notified to attend for that special purpose.

Various other committees, including that on membership, and the one entrusted with securing a general agreement to charge 6 per cent. interest on installment contracts, reported progress.

J. H. Mayers, chairman of the nominating committee, presented the following slate for the coming year, which will be voted on later: J. T. Coughlin, for president; Sol Lazarus, vice-president, New York; A. H. Tusting, vice-president, New Jersey; A. B. Clinton, vice-president, Connecticut; E. Leis, financial secretary, and A. Galachie, treasurer. Irwin Kurtz was nominated recording secretary but declined and the nomination was left open.

It was felt by the majority of the jobbers, as well as a number of the dealers, that to obtain the best results each branch should have its own association, and that the membership in the Talking Machine Men, Inc., should be confined exclusively to retailers, as planned originally. The wholesalers were of the opinion that they could still give the retailers the benefit of their advice when desired, and of their cooperation through the holding of associate memberships in the association.

The opposition centered largely around the claims of Max Landay, of Landay Bros., who has done excellent work in developing the membership of the association and strengthening its treasury, that to bar him as a jobber from active membership, would be to curtail his usefulness to the organization.

The sacrifices we are exacting of the noble American boys who are going to the bloody fields of France for the lives and liberty of us who stay at home call to us with an irresistible appeal to support them with our most earnest efforts in the work we must do at home.—Secretary McAdoo. Buy Liberty Bonds.

DEVELOPED MAIL ORDER TRADE

J. A. Sandee, of the Victrola Department of L. S. Donaldson Co., Minneapolis, Tells of Plans of Procedure in This Connection

Minneapolis, Minn., April 2—J. A. Sandee, manager of the Victrola department in the big department store of L. S. Donaldson Co., this city, has methods of doing business that should interest talking machine dealers generally, inasmuch as they have proven successful. Mr. Sandee came to Minneapolis something like a year ago from Milwaukee, and, although the Donaldson department was supposed to be on a very profitable basis at that time, he made it yield still greater returns.

The big end of the increased sales Mr. Sandee attributes to the mail order department which he has cultivated most assiduously while the approval system for records has been of substantial help in building up the business. The house issues twice each year a big mail order catalog in which Mr. Sandee is allotted two pages; one he devotes to records and the other to machines, and on both he has planted the most compelling advertisements he is able to produce. They are pulling the business, the approval feature for records having proven most successful. The approval plan also is operated in the city, but not to as great dimensions as in the country.

In the city the delivery wagons leave records as indicated by approval customers. These are allowed twenty-four hours in which to make selections and must then deliver the records or the equivalent in cash to the delivery wagon drivers, who cover the entire city and have regular routes. Rural patrons are permitted forty-eight hours within which to make returns.

All approval customers are listed in a card index. On the respective cards are enumerated the catalog numbers of the records requested in black ink and the numbers of the records taken later appear in green ink. A hasty glance at the card discloses at a glance whether the customer is a “live” one, that is to say, an actual buyer, or a “dead” one. The latter soon are eliminated, if they refuse to heed a gentle reminder that the Donaldson Co. is not operating its approval system solely for the amusement of people. From 12,000 to 14,000 records are kept in stock.

Manager Sandee makes excellent use of the appearance of phonograph stars in Minneapolis by striking advertisements and in other ways. Harry Lauder on a recent visit to Minneapolis was the guest of the Donaldson Co. at the store for an entire day and made a big hit. Galli-Curci and Evan Williams records were featured when those distinguished artists visited Minneapolis.

Says an experienced salesman: The great factor in selling is the human factor, and not the things we sell. The things must be right, of course; but it’s people who buy and use the things, and therefore it’s people whom we must interest and deal with in getting rid of things.

A6032 is a dance record in Columbia’s May List, certain to set one-steppers prancing. Put it on and watch it sell itself.

THE VICE-PRESIDENT IS PLEASANTLY SURPRISED

The one-day trip to the southern recording centers of Los Angeles, Detroit, and Cleveland recently made by the vice-president of the Columbia Graphophone Co., Mr. N. E. Whitney, was characterized by a switch of the usual trend in the record-making industry.

Mr. Whitney, who was given the exclusive task of picking up material for the five-day period of the trip, took a special interest in the recording of popular music, especially that of the film music. His comments on this subject were particularly interesting, and he expressed his satisfaction with the results of the trip.

Mr. Whitney also commented on the progress of the recording industry in the southern states, and his visit to the southern recording centers was a welcome change from the usual northern trends.

Pennington on Western Trip

Assistant General Sales Manager of Columbia Co. to Visit Company's Branches

Frank K. Pennington, assistant general sales manager of the Columbia Graphophone Co., left Wednesday night for a trip to the Columbia branches in Pittsburgh, Cincinnati, Cleveland and Detroit.

Before leaving for the West, Mr. Pennington commented upon the fact that the Columbia Co. has made rapid strides in the past year, and that the company has expanded its operations in all directions.

Pennington's tour of the Columbia branches will enable him to study the activities of the company's sales force, and to gather information that will be valuable in his efforts to promote the company's products.

brick bros. merge stores

Leon & M. B. Brick, proprietors of Brick's Music House, Brooklyn, N. Y., successful dealers in talking machines, music, and kiosks, etc., have merged their two stores, formerly located at 1808 Pitkin avenue and 1743 St. John's place, and moved the entire stock of both stores to elaborate new quarters at 1803 Pitkin avenue.

Formal opening of the new store was held on April 6.

The Store Within a Store

Detroit, Mich., April 6—Under the heading of "The Store Within a Store," there recently appeared in the Michigan Druggist, a magazine for the retail druggist, a very interesting article in connection with the Pathéphone salesrooms in the general offices of Williams, Davis, Brooks & Hinchman Sons, of this city. This well-known concern is the Michigan jobber for the products of the Pathé Frères Phonograph Co., and has succeeded in developing a splendid dealer representation for these products. The firm was established in 1899, and is therefore one of the oldest firms in the country handling talking machines. The article reads:

"The phonograph dealer who visits Williams, Davis, Brooks & Hinchman Sons, Michigan agents for Pathéphones, finds in their office a 'store within a store.' This store within a store, as illustrated by the above photographs, is like hundreds of phonograph shops on the main streets of New York, Chicago, Detroit and other large and small cities.

"In this store, which is of the usual dimensions, is a demonstrating booth with the familiar ventilators; several phonographs in an interesting arrangement—set at various angles, here a lid lifted or doors open—all planned to make an impression that will please and last. Even the 'store' hang on the walls. "Especially interesting is the view of the show windows from the 'street.' They are dressed in the latest approved displays which are made from cut-outs and panels furnished by the phonograph manufacturers, some standard fixtures and a few records taken from stock. The illustration, which is greatly reduced, conveys but little of the real 'sales-ability' of the displays which were arranged with much thought and care. "The 'store within a store,' besides being an admirable model in every detail, makes a convenient salesroom for Williams, Davis, Brooks & Hinchman Sons, as it is presently isolated in their large general offices.

"Williams, Davis, Brooks & Hinchman Sons is perhaps the oldest firm handling phonographs, having been established in 1819. The company, however, has been in the phonograph jobbing business about two years. In this time they have twice enlarged their record stock floors to meet the requirements of a rapidly growing business."

L. N. Bloom, Edison jobber at Cleveland, drove to Orange last week to personally deliver the new Mammon car purchased by C. H. Wilson, vice-president and general manager of Thomas A. Edison, Inc. Mr. Bloom reported bad roads in places and made the trip in remarkably short time considering the period of the year.

Pennigton on Western Trip

This intensely human picture stands for all that is best in music—it is the "His Master's Voice" trade-mark, and it brings to you, no matter where you are, the very best music of every kind, sung and played by the world's greatest artists—the greatest singers, pianists, violinists, orchestras and bands—all enshrined in the unequalled "His Master's Voice" records.
being played at the Palace Theatre, is rich in pretty songs and love melodies, a combination of fun and sentiment. The part of fair Pamela is memorably interpreted by Miss Lili Damita, whose beautiful voice has been faithfully "caught" by the "His Master's Voice" in a series of solo and duet records (with Owen Nissen) of the piece. In addition to the piece itself, all the vocal numbers are accompanied by the Palace Theatre Orchestra, conducted by Herrman Finck. On a splendid twelve-inch double we have a potpourri of the songs charmingly recorded by the Mayfair Orchestra. The music by Frederic Norton is throughout of that quality, which quickly attains the standard of popularity that greets one here, there, and everywhere. These "Pamela" records bid fair to reach great sales, and the trade is therefore ordering heavily.

Another Record Increases in Price

As I foretold when the comparatively recent increase in the price of eighteen-penny discs was announced, it has come about that other record makers are falling into line on the question of price. Messrs. Pathé Fréres have held out as long as possible, as much for political reasons as any other. Outside a few insignificant makes, records of all grades have been affected by war-time circumstances, necessitating an alteration in price. The enormously increased cost of materials, labor, transit and other charges since the war blazed out in August, 1914, has either meant increased prices for records, or bankruptcy. Manufacturers loyally refrained from making any alteration until compelled by these conditions so to do, and even now I venture to think that the 33½/32 average price increase agreed upon will have to be revised in accordance with the still expanding cost of manufacture, before the war is over. The manufacturer's profit is cut to a minimum. Record buyers, generally speaking, earning exceptionally good money, and it would be no hardship to them if they had to pay a little more for the splendid quality records now issued. Output facilities are short of the demand, and increased prices would ease the situation to the advantage of the trade generally.

A Continuous Record Exchange Scheme

It has ever been a thorny question as to the best way of insuring to every dealer an up-to-date stock. Some records get broken, some become second-hand by reason of shop use, while others in consequence of the large permanent engagements with the dealer, for somehow or other their sales are too few and far between to warrant house room. These three classes of records represent scrap, which has now been replaced under a system recently devised by the Winner Record Co. for new records. The scheme is based upon a continuous exchange in force all the year round, except during the busy demands of November, December and January. By this system dealers can at any time make a clearance of their scrap records for new "Winners" at the rate of six to one. All makes of records, except two or three specified, are accepted as scrap, and on a minimum consignment of six dozen, the Winner people pay carriage both ways. Dealers who agree to the terms are offered a guarantee that the company will not vary the exchange terms, notwithstanding the general world conditions. A period of about two years, subject to three months' notice being given in writing. There are various minor qualifications, but all dealers are invited to write the Winner Co. for exact particulars. As between dealer and manufacturer there is a mutual value in this exchange scheme. The company secure a good supply of stock, of which there is a shortage, in addition to the obvious publicity advantages. On the dealer's side is the important consideration of always having fresh up-to-date stock by the acquisition of new current titles for broken or otherwise unsalable records. It is therefore a business scheme which, as such, benefits equally all parties subscribing thereto. On these grounds there can be no hesitation in recommending the retailer to investigate the merits of this offer, which, I think, can be accepted on its face value as a good proposition for both sides.

Proposed Revival of Apprenticeship System

This subject, which has become a strongly advocated one generally before the war, is again arousing interest in certain trade quarters, though it is realized that no substantial revival can take place until after the declaration of peace. Upon the occasion of a recent address, Lord Leverhulme, by the way, himself served an apprenticeship, said: "We welcome the proposed revival and strengthening of the ancient apprenticeship system. There is no doubt that the individual training given by the father or master with expert knowledge was far more to them than any other experience they had. What is most valuable in this system is the individual human touch. We were becoming far too mechanical in every direction were getting larger, and the shopman might never see the manager." Some few years ago the writer took an active part in developing the old apprenticeship system. It was found that employers, especially those of the arts and crafts school, were eager to sign indentures of apprenticeship with suitable boys, often without a premium, but were in later years somewhat reluctant to bind themselves, owing to the failure of the courts to strongly uphold the agreement when, as not infrequently happened, the apprentice broke away for a more immediately lucrative blind-alley occupation.

To-day, the system is more or less a dead letter, though, owing to the general scarcity of labor, employers are only too willing to teach their trade to women. And the women have come forward splendidly. They have shown an aptitude which has quickly won an undreamt-of success, in trades previously thought to require years of tuition to insure proficiency. May the good work go on, as much in the interests of the gramophone, as of other industries, until our warriors are ready to receive the sword in favor of their old-time associations.

Smart Reorganization After Disastrous Fire

Notwithstanding the loss of their Farrington road premises and the whole of the valuable stock by fire, as reported a few issues ago, the Murdoch Trading Co., Ltd. (now incorporated with J. & G. Murdoch, Ltd.), have already got things in fuse working order at their new location, 9 Clerkenwell road, London, E. C., and are renewing as fast as possible new stocks of gramophones and records and other musical instruments. In certain lines and parts there will naturally be a shortage for some little time, owing to the great difficulty of manufacture, but dealers may continue to rely upon a good service from this enterprising firm.

A Reputation Regained: Old Offense Wiped Out

How a musical instrument trader regained his good name and was restored to his rank is told in a brief announcement in a recent issue of the London Gazette, as follows: "The permission granted to Lieutenant-Colonel and Hon. Colonel Thomas James Stockall (now known as Thomas James) to retain his rank and to wear the prescribed uniform on retirement, also the award of the Volunteer Officers' Decoration, which were canceled in the London Gazette on November 16, 1909, are hereby restored. Never mind what was his offense; it is a thing of the past and rightly belongs to to-day, in view of his Royal pardon, upon which all having knowledge of the past incident, will heartily congratulate the gallant Colonel."

On the outbreak of war Colonel Stockall un-successfully offered his services to the war office, and upon attempting to enlist in the ordinary way was rejected on account of age. He eventually took a position as a civilian clerk in the army pay corps under an assumed name. The happy sequel was the grant of a free pardon from the King. Good luck, prosperity and long life to Colonel Stockall.

The Elman String Quartet

An outstanding record of merit on the "His Master's Voice" March catalogue is No. 68056 (Quartet in G major, Adante (C. Von Dittersdorf) by the Elman String Quartet, comprising Mischa Elman and Messrs. Bak, Rissi, and Nagel, of the Boston Symphony Orchestra. This attractive melody is rendered in a manner which bespeaks a true sympathy be-

tween the players, each instrument blending in a rich volume of sound and perfect ensemble, controlled by the great violinist, Mischa Kahan. Of the recording itself one need only say that the "H. M. V." musical director is a master.

Memo's From 'The Voice'

Home on leave, Corporal Stewart Gardner was a recent visitor to "His Master's Voice" factory. He took the opportunity of reading several songs. Congratulations to Lieutenant Toplis Green on winning the military cross for a brave action at the front!

A Musical Box on Records

A refreshing novelty, with a charm all its own because it brings back memories of former days, will be found in William Murdoch's Columbia record this month of Laidon's "Musical Box."

Historical Notes as Aid to Advertising

Most advertisers commence their advertisements with a mention of the goods they have to sell. For displayed advertisements that is perhaps the best method. But there are other forms of publicity, and particularly effective is the editorial style adopted by Thos. Edens Osbourne, the Belfast gramophone factor, who centers the interest of his readers by an initial chat regarding Belfast history. The "Historical Notes" series is running in all the chief local newspapers. Easily coupled up with an introduction along these lines is the advertisement offer, and I should imagine it is a profitable style to adopt; it is certainly commendable.

The Talking Machine Society Movement

Society news is now a regular feature of the various British gramophone journals, which allocate each month a liberal amount of space to the doings of the phonograph societies. Notwithstanding that many members are now engaged in more warlike pursuits, the movement is as vigorous as ever. Occasionally we hear that some new society is in process of formation at this or that town, the object being to promote the development of music generally, and of the gramophone or phonograph in particular. As a result of these informal gatherings, where discussions take place about the relative values of different makes of records, helpful criticism and suggestions for the betterment of mechanical music often emanate to the advantage of record manufacturers, who are not adverse to trying out any suggestion likely to prove of value.

The societies are composed of enthusiasts, each of whom in turn takes over the responsibility of the weekly-night entertainment. This is usually in the form of a carefully-chosen program, interspersed with studiously critical comments, both instructive and highly interesting. Each member is nothing less than a walking advertisement for the gramophone, and as such deserves every encouragement.

Much Illness Prevalent

The changeable weather conditions recently experienced, combined with the extra strain placed upon all by wartime circumstances, has resulted in much illness, the talking machine community being no exception. The tendency to carry on at all costs, owing to scarcity of stuff, and early symptoms of illness which in the ordinary way would justify a rest, are neglected. It is perhaps an unwise policy in the long run, for in many cases a serious breakdown sooner or later is in consequence unavoidable. A number of leading gramophone men in this way have been compelled to rest awhile, though in many instances illness has supervened. Among others, I learn that Mr. Gilberg, of W. H. Reynolds, Ltd., who has been laid up for some time, is now well on the road to convalescence. It is to be hoped he will soon be in harness again.

Employment of Aliens Controlled

By an order in council the provisions of the Aliens Restriction (Consolidation) Order, 1916, is extended to provide that as from March 1 a male alien between the ages of eighteen and sixty-one may not undertake or perform work for an employer, in certain scheduled occupations, unless permission in writing has been obtained by him from the Director-General of National Service. Aliens engaged upon such work prior to March 1 may continue without any such permission until notice to the contrary is sent or given to him and to his employer by the Director-General. Employers are required to have regard to the provisions of this order in employing aliens. A list of occupations and trades classified is given, but in the usual official way, so that it is not quite clear whether the gramophone trade is affected. I should incline to think it is, as coming under the item of "miscellaneous manufacturers," or "miscellaneous occupations." Anyway, to be on the safe side, British manufacturers should obtain a certificate from the Director-General of National Service.

Granados' Spanish Dances

Probably no record in the Central record of the kind has ever attained so immediate a success as has the Columbia record of the first two of Granados' five Spanish dances, played by Sir Henry J. Wood's Orchestra. Sympathy with the ill-fated composer, who lost his life at the hands of the Germans, probably played some part in this, but, over and all, the merit of the enchanting music itself, and the remarkable performance of Sir Henry J. Wood's musicians, must have been sufficient to ensure a reward.

"The Old Folks at Home," by Clara Butt There are songs of which the world will never weary—songs that backneyed though they may be, are so fresh and agreeable that they fill the air with memories. And there are singers— but not many—who can infuse those songs with a life that makes them thrill in our ears. Such a song is "The Old Folks at Home," by such a singer, Madame Clara Butt. Once more, a perfect Columbia record by the divinity-.gifted contralto who seems to have sung her soul into it. Indeed, she declares it to be the finest record of her voice yet made.

A Dealer's Wartime Enterprise

A retailer of the "push and go" order is J. H. Pease, of Southend and Leigh. Nowadays most dealers are on the defensive, which, circumstances considered, is not altogether a matter for criticism. Offensive tactics though usually prove the more successful way of conducting a business, as witness the bold move recently made by Mr. Pease in opening up additional showrooms in Southend. The business has been formed into a private limited liability company under the style of J. H. Pease (Southend), Ltd., and, following this, certain developments have taken place. The whole concern has been reorganized, and, with the addition of the new premises mentioned, Mr. Pease will undoubtedly enhance his already splendid local reputation for prompt and up-to-date service. In addition to most musical instruments, all the chief makes of records are stocked as fully as is possible these days, and it is seldom a customer cannot get the titles he wants.

Soundboxes

If you are after a genuine offer of soundboxes, you'll do well to communicate with us immediately. We have tens of thousands of perfect soundboxes, fitted with the best quality mica. Confidently recommended for cheaper machines, absolutely reliable and give excellent reproduction. Price to clear $50 per gross, F. O. B. London.

SALESMEN WANTED—Salesmen calling on the music and phonograph trade. We are offering a high-line rate that will double your income by calling on one or two people in each town. No samples to carry. Article very much in demand. Please state important territory you are now covering. Address Morton J. Ross Music Co., 54 West Lake St., Chicago, Ill.

WANTED—High-class Victrola salesman. We have a permanent position with exceptional opportunities for a young man of ability and appearance who is willing to learn business. We are the cleanest cut, of unquestioned habits, capable and willing to work. City and climate the finest in the world to live and work in. Answer with full particulars, references and salary demands. Excellent opportunity for an active man. Address "Box 508," The Talking Machine World, 373 Fourth Ave., New York.

TO THE TRADE—Dealer has stock of records which he will close out in 100 lots for cost. First answers will be first served. Address Jos. Dumas, 54 West Lake St., Chicago, Ill.

WANT to meet a talking machine man or a business man who would like to enter the talking machine business; one who has a large business acquaintance to help finance and assist in running the business. We have the best patented sound box and tone arm on the market, and have been in business since 1912. We want to branch out, and have a splendid, paying proposition for the right man. All details gladly furnished to responsible parties. Address "Box 516," care The Talking Machine World, 373 Fourth Ave., New York.

FULTON TALKING MACHINE CO.

640 Broadway New York City
WASHINGTON, D. C., April 8—TALKING MACHINE.

Some of the objects of this invention are to provide in a talking machine improved means for supporting a sound box arm; to provide in a talking machine an improved sound box arm. In the accompanying drawings, Figure 1 is a fragmentary top plan view of a talking machine constructed in accordance with this invention; Fig. 2 is a fragmentary front elevation of the same; Fig. 3 is a fragmentary side elevation of the same; Fig. 4 is a fragmentary horizontal section on line 4—4 of Fig. 2; Fig. 5 is a fragmentary section on line 5—5 of Fig. 1; Fig. 6 is a fragmentary top plan view of a modified form of sound box arm constructed in accordance with this invention; and Figs. 7 and 8 are a fragmentary side elevation and a fragmentary rear elevation respectively of a modified form of sound box arm constructed in accordance with this invention.

This invention relates to improvements in phonographs and has for its object to provide an improved type of reproducing device comprising sound box, tone arm and amplifier, mounted for moving as a unitary structure over the record.

In the drawings, Figure 1 is a sectional view on the line 1—1 of Fig. 2, with parts in elevation illustrating a phonograph embodying this invention. Fig. 2 is a plan view with parts in arm position on the line 2—2 of Fig. 1, illustrating the subject matter of Fig. 1. Fig. 3 is a central longitudinal sectional view of a form of amplifier embodying the invention. Fig. 4 is a similar view illustrating another form of amplifier. Fig. 5 is a detail view illustrating a means for giving the amplifier bias toward movement in one direction.

CABINET TALKING MACHINE.—Howard D. Darlington, Dayton, O. Patent No. 1,253,010.

This invention relates to cabinets for talking machines. An object thereof is to provide a cabinet of a novel construction in which sound pipes are utilized in connection with the amplifying chamber of the cabinet. Another object is to provide a cabinet which is made of metal.

Figure 1 is a perspective elevation of a cabinet embodying the invention. Fig. 2 is an enlarged longitudinal section thereof illustrating the connection between the sound pipes and the amplifying chamber. Fig. 3 is a horizontal section on line 3—3, Fig. 2 and Fig. 4 is a plan view of a cabinet cylindrical in form.

This invention is concerned with the stylus and their supporting mechanism used in sound reproducing machines, and is designed to produce such stylus and to support them as to produce the very best possible reproduction of the tones recorded, thus enabling the varying of the loudness of said tones at will.

To this end, a novel needle or stylus has been devised, preferably with a plurality of points to adapt it for the different types of this record, such as the zigzag Columbia and Victor records and the hill and dale Edison and Pathe records, together with a holder therefor, which enables one to easily position the needle perfectly relative to the groove in the disc, and also to regulate within a very wide degree the loudness of the tone produced by the single needle, without impairing the quality thereof.

Figure 1 is a side elevation of a sound box and a part of a tone arm having the invention applied thereto. Fig. 2 is a central longitudinal section, on an enlarged scale, through the needle holder in a plane parallel to the face of the diaphragm. Fig. 3 is a similar view, but with the needle adjusted for a lighter tone. Fig. 4 is a cross section, on a still larger scale, on the line 4—4 of Fig. 2. Fig. 5 is an end view of the needle detached, on the same scale as it appears in Fig. 4, and Figs. 6, 7 and 8 are side elevations of the needle as seen from three different sides.

This invention relates to phonograph sound boxes and particularly to means for regulating or modifying and thereby improving the tone of a phonograph without the necessity of changing the needles.

The general object of the invention is the provision of a device of this character which is adapted to be detachably mounted upon any ordinary sound box and be therefore applicable to a large number of different phonographs. A further object of the invention is to provide a device of this character which has a tone modifying element which may be applied to the stylus arm or lever at various points there along so as to dampen, modify or soften the vibrations of the diaphragm and thus achieve the same object as is achieved by changing the needles or stylus from hard needles to medium, and soft needles.

A further object of the invention in this connection is to provide a damping or modifying member composed of a combination of different substances disposed in such relation to each other that the modifying member may be shifted to bring any one of the different substances into engagement with a stylus arm, to thus variously modify the action of the stylus arm.

A further object of the invention is to provide means whereby the tone modifying element may be pressed with greater or less force against the stylus arm.

Still another object is to provide a shifting tone modifying element, shiftable not only into various positions relative to the stylus arm itself, but also into various positions with relation to the diaphragm.

This invention is illustrated in the accompanying drawings, wherein: Figure 1 is a face view of the sound box provided with attachment; Fig. 2 is a side view of the sound box provided with attachment, the cross bar 14 being in section; and Fig. 3 is a perspective view of the sound modifying member and rod 16.

This invention relates to improved center bearings for phonographic records and the like wherein the aperture is brought concentric with the approximately concentric sound convolutions and the objects of the invention are:

First, to provide an improved central bearing for phonographic records and the like that shall be adapted to resist wear and thereby prevent the enlargement of the record aperture whereby the alignment of the sound convolutions to the axis of rotation may be preserved.

Second, to provide an improved central bearing or centering means whereby the central aperture of the record may be aligned or arranged approximately concentric with the sound convolutions of the record.

Third, to provide improved means adapted to reduce the frictional engagement of a reproducing needle with the record and thereby improve the harmony of the selection being rendered.

Fourth, to provide improved means whereby the wear on the sound or impression convolutions or grooves may be eliminated.

Figure 1 is a plan view of a phonographic record disclosing the invention applied thereto.
LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS—(Continued from page 119)

market, in one of which the groove for causing vibrations of the diaphragm is of a uniform depth; the other is a lathe disk but having irregularities to cause lateral movements of the needle therein as the groove is moved with respect thereto, while in the other type of diaphragm the spiral form is separated from the disc but in such a manner that the lateral vibrations of the diaphragm are prevented by the relative movement of the arms of the diaphragm and the diaphragm holder. The spiral form is made by means of a lathe or other similar machine. The spiral form is separated from the diaphragm holder by means of a lathe or another suitable machine. The spiral form is separated from the diaphragm holder by means of a lathe or another suitable machine.

The object of the present invention is to provide an improved form of machine of the foregoing type, wherein the reproduction of the recorded sounds may be effected through the use of a tone arm, sound chamber or amplifier horn without damage to the sound, due to the fact that by reason of this invention the construction of the recording stylus or like member and the reproducing member both move across the face of the record in the same path instead of as usual the same member moving in a rectilinear path and the other in a curved path.

The invention consists in a sound recording apparatus and reproducing machine comprising a combination of a record support member, a tone arm, a member movable rectilinearly across the face of the record and means connecting the tone arm with this latter member but slidable upon said member.

The invention also comprises a sound recording and sound reproducing machine of the above character having a carriage for the record and reproducer, rotatable about a vertical axis, so that either the recorder or reproducer may be moved into its operating position.

The accompanying drawings illustrate two modes of carrying out the invention: Fig. 1 is a front elevation of one form of device in accordance with the invention when applying it to an ordinary phonograph; Fig. 2 is a perspective view of the arrangement shown in Fig. 1; Figs. 3, 4, and 5 are views illustrating details; Fig. 6, Fig. 7, and Fig. 8 are illustrative of several modifications in accordance with the invention; Fig. 7 is a side view of the arrangement shown in Fig. 6; and Fig. 11 is a perspective view illustrating a modified form of reproducer.

**Sound Box.—** Henry C. Miller, Waterford, N. Y. Patent No. 1,254,425.

This invention relates to improvements in means for dispensing with individual needles in connection with sound reproducing machines, particularly where records having grooves provided with lateral undulations are employed.

The principal objects of the invention are to provide for means for applying a continuous piece of thin wire to be used as a stylus, and gauge the feeding of the wire, and to provide a method of dispensing with individual needles in connection with sound reproducing machines.

The use of a continuous wire for a stylus for sound reproducing machines is old in the art, but it has been found that in some cases attempts have been made to use these wires for reproducing purposes. However, in all such cases the wires have been made in such a manner that the sounds reproduced are not good, and the wires are not adapted for use in such machines. The use of such wires for a stylus for sound reproducing machines is old in the art, but it has been found that in some cases attempts have been made to use these wires for reproducing purposes. However, in all such cases the wires have been made in such a manner that the sounds reproduced are not good, and the wires are not adapted for use in such machines.

The use of a continuous wire for a stylus for sound reproducing machines is old in the art, but it has been found that in some cases attempts have been made to use these wires for reproducing purposes. However, in all such cases the wires have been made in such a manner that the sounds reproduced are not good, and the wires are not adapted for use in such machines.

DEATH OF PHILIP WOHLSTETTER

Philip Wohlstetter, vice-president and general manager of the Imperial Talking Machine Co., New York, N. Y., and Wilmington, Del., died suddenly April 2 at his home in New York. Mr. Wohlstetter, who was forty-eight years old at the time of his death, was well known in talk- ing machine circles throughout the country, having been identified with the industry for many years. He is survived by a widow and four children. Services were held at his late home on the afternoon of April 4 and were largely attended.

PUBLISHERS INTERESTING ARTICLE

Samuel Wein, who is well known in the talk- ing machine industry as a technical expert, has recently published an interesting article entitled "Modern Photographic Developers," which has been issued as a practical hand book. Mr. Wein has contributed to articles to prominent maga- zines, and his present work in the laboratory of a well-known talking machine manufacturer may result in important technical discoveries.

SELLING EDISON PHONOGRAPH RECORDS TO MINERS IN NEVADA

Mrs. C. W. Friend, who has been a very suc- cessful Edison dealer at Carson City, Nevada, was recently asked to whom she sells New Edi- sons. In reply Mrs. Friend wrote: "I am sending you a photograph given me by a pleased customer, and shows some of the people to whom I am selling New Edisons. It is not only a great advertisement for the New Edison, but shows our beautiful Nevada scenery to ad- vantage. I have found that a miner always buys the best money can buy and this sale was the most satisfactory sale I have ever made.

The New Edison Furnishing Music in the Wilds of Nevada

The owner of this instrument has already pur- chased seventy records, and there has been a good deal of comment on the class of music he selects for his miner friends back in the moun- tains. Think of those fellows listening to the Rigoletto Quartet, Chopin's Nocturne in E flat, Meybeer's Cavatina and such things. Think of this sort of music drifting up from a canvas tent up among the pines while miners in overalls listen attentively. They don't want rag- time. They want the best music the New Edi- son offers."

REPAIRING AND REPAIRING

"Our new No. 1012 album is meeting with very pleasing success, and we have received numerous repeat orders from our dealers," said Philip A. Ravis, vice-president of the New York Album and Card Co., New York. "We were fortunate in securing additional factory facilities for the production of our albums, as the de- mand for the 1012 album has taxed our re- sources, even though our capacity has been considerably augmented. Our Nyxaco metal back album continues to be the leader of our line, and judging from the orders already in hand for this album, this season will be an active one for the Nyxaco metal back product. This album has many distinctive features, and the fact that it lies perfectly flat when opened is one of the reasons for its success."

The Highest Class Talking Machine in the World

THE INSTRUMENT OF QUALITY
Sonora
CLEAR AS A BELL

THE most valuable asset of any manufacturer is the reputation his product has won.

Sonora is everywhere known as the quality phonograph—not the quantity phonograph, not the phonograph offering "terms" as the main sales feature, but the value instrument which the buyer is proud to own and which is shown to friends with the remark "I bought this phonograph because of its quality of tone and appearance."

The owner's pride of possession in a Sonora is a factor in Sonora's increasing popularity.

In proportion to the total number of instruments on sale, more Sonoras are sold for cash than any other instrument. This is conducive to a higher bank balance for the Sonora dealer.

The Sonora sells easily, turns every buyer into a Sonora enthusiast, and makes money for the dealer. If you wish to sell Sonoras this year write us NOW for information.

$50 $55 $60 $90 $115 $150 $180

The "TALKER" IN THE WAR

Samuel Gompers Pays Tribute to the Influence of the Talking Machine for Good in the Trenches in France as in the American Home

While in Cleveland recently to boost the sale of Liberty Bonds, Samuel Gompers, president of the American Federation of Labor, paid a high tribute to music and musical instruments and the part they are playing in the world war. Mr. Gompers declared that the talking machine has made army camps and even the trench dug-outs "seem like home" to tens of thousands of American soldiers.

"The war is developing a love for music and talking machines are doing their part wonderful-ly well," said Mr. Gompers. "Through the agency of these instruments and records the boys who have given up homes and home en-

vironment are permitted to enjoy good music, to listen to the words of the world's great singers, orchestras and bands. The words of that wonderful song, 'Home, Sweet Home,' mean more than they ever did to all true Americans. Talking machines, player-pianos and other musical instruments are making 'home, sweet home' out of many a place that would be dreary if these musical instruments were not available. Like the movies, talking machines are great stimulants to back up our fighting men on sea and land, in training camps or back of the firing line in the war zone."

Douglas Fairbanks also paid a high tribute to the "good that talking machine music is doing (up here) with this war." He appeared recently jointly with Mr. Gompers at the Keith Hippo-
drome and the Central Amusement making appeals for bond buyers.

NEW DEPARTMENT IN ASPURY PARK

Asbury Park, N. J., May 4.—The Steinbach Co., this city, has opened an elaborate new Victrola department in its present store. The new de-

partment is equipped with four handsome soundproof demonstration booths, and an excellent display for the display of machines and the stor-
ing of records. It is declared to be one of the finest departments in this section of the State.

Music for the Camps Provided by the Knights of Columbus

Robert G. Wolf, director of construction on the Committee of War Activities of the Knights of Columbus, recently outlined for The World just what the Knights of Columbus are doing toward providing talking machine music for the mili-
tary forces. Mr. Wolf said in part: "Up to the present time this organization has erected some-thing like ninety buildings in the various can-
tonments, encampments and marine and naval stations throughout the country. In each build-
ing talking machine has been installed with a collection of at least twenty-five of the latest records.

"It is our information from our secretaries in the different camps that the talking machines and records play an important part in the enter-
tainment of the soldiers, and that the records are being played from early in the morning until late at night.

"We feel confident that the soldiers are inter-

ested in all kinds of music; and record do-

ings from any source will be greatly ap-

preciated.

"We cannot say what kind of machines or rec-

ords are most desired, for the reason that in

the majority of instances we ordered this equip-

ment long before the soldiers arrived at camp. It was our idea that they would be mostly in-
terested in popular music and not in the clas-

sical music or songs.

"In addition to the talking machines, we also have player-pianos in each building with a new assortment of music rolls for the entertainment of the soldiers." The Knights of Columbus very evidently have a clear conception of the part that music plays in helping to keep up the morale of troops, and will undoubtedly make good use of any do-
nations of records, machines or music rolls sent them.

In answering the inquiries of the general pub-
lic, talking machine dealers can refer prospec-
tive givers to the Committee on War Activities, Knights of Columbus, Brooklyn, N. Y., 36 Beekman St., New York, N. Y., or 80 C St., Washington, D. C. Talking machine merchants who may themselves be collecting records for the use of the Knights of Columbus by getting in touch with the committee will be able to determine what military units have the greatest need of records, etc. This will be in the form of a list of efficiency and concen-

tration.
The Man Who Is Hard to Sell Is a Challenge to Salesmanship and a Stimulus to Effort

There are two mental attitudes regarding the prospect who is a hard nut to crack, a difficult man to sell. One of these attitudes is that of the salesman who gets peeved over such a prospect and gives him up and tries very often to get even with the fellow for not buying.

The other attitude, and the right one, is that of regarding the hard man to sell as a challenge to salesmanship and a stimulant to effort. The salesman who gets this attitude sets deliberately about finding a way to get behind the defense of the customer—for there is a way to get behind the defense of anyone in a position to buy.

The man who is not easily won over usually sticks better when he is won. He does not change his mind or back out without reason. If you find out why a man feels about your proposition, and why he feels so, you will be able to handle him. Put yourself in his place and talk from that side. Instead of so much about what "I have to sell," say more about what "you need to buy." Emphasize the "You" instead of the "I."

Dig into that man's problems and discover why he thinks your talking machine or photograph would not suit him. Don't begin to try to get him to buy before you have even shown the advantages of what you have to offer. Sales are not made so easily. And don't waste preliminary time in talk about the weather, war or politics. You may inadvertently get the man into a discouraged frame of mind by reminding him of extraneous business conditions.

You know what will interest people who are prospective buyers of musical instruments, even if they are hard nuts to sell. The prospect may not at the outset care two straws about your particular line, but if he is interested in music at all, he will discuss with you many phases of the question and if he listens, you can get him coming your way.

When you get a person asking questions about and showing an interest in something you know more about than he does, then you have made a start. Once you have made a start, if you get no farther, the fault is your own.

PLANNING FOR IOWA CONVENTION

Elaborate Arrangements to Be Made for the Third Annual Meeting of the Iowa Victor Talking Machine Dealers' Association

Des Moines, Ia., May 6—A meeting of the executive committee of the Iowa Victor Talking Machine Dealers' Association was held in this city recently at the offices of the Mickel Bros. Co., the Victor wholesalers, at 411 Fourth avenue, for the purpose of considering various plans and suggestions for framing a program for the third annual convention of that organization, some time in August.

The executive committee consisting of W. A. Stooks, president; W. P. Deal, secretary; Joseph Britt, treasurer, and E. E. Hobbs, member at large, was present in a body, as were a number of association members, including representatives from the following houses: McGregor Bros. & Coen, Creston, Ia.; Schilke's Music Store, Charles City, Ia.; Lohr & Donahoe, Ft. Dodge, Ia., and Harmony Hall, Iowa City, Ia.

Through their cooperation a tentative program was considered, details of which will be worked out and announced to the association during this month.

George E. Mickel, member of the association and general manager of Mickel Bros. Co., of Des Moines and Omaha, suggested that the association endeavor to have Galli-Curci and Jascha Heifetz appear during the convention in a recital or concert to be held in Des Moines at the Coliseum.

This event, which would have been extraordinary, was found to be impossible after investigation on the part of Mr. Mickel, owing to the fact that neither of the artists was in a position to specify definitely whether his or her appearance would be an assurance, owing to certain engagements, which were contracted for previously. However, the services of these two artists are still in question as to whether the contracts can be filled.

Should it be impossible for the above-mentioned artists to appear, a suitable program (such as has always been successful at these conventions) will certainly be instituted, and it is desired by the executive committee that a two-day session be held instead of the one-day session as of previous conventions. Judging from the responses already noted from members, the third annual convention will be a far greater success than the two previous ones, as the interest on the part of the members is very noticeable. The membership is increasing each year.

Matters of the utmost importance will come up for discussion at the convention, owing to the shortage of Victor products, and it is to be hoped that by the time of the convention (which will be held the latter part of August) the Victor Co. will have had an opportunity to overcome the ever-increasing shortage of its products and that the fear which has been entertained, and which naturally would be entertained on the part of some dealers, will be a matter of past history as to the future outlook of their business.

ENJOY GALLI-CURCI CONCERT

By Means of Victor Records in the Osterhouse Free Library in Wilkes-Barre

A representative of a New York publishing house who recently visited Wilkes-Barre, Pa., made the following observations which are passed along to readers of The World for information and use when available. He said: "I am a plain, ordinary book agent, classed with the dogs and baby carriages and therefore unwelcome in most public buildings. However, my roving disposition carries me all around the country, and I have noticed a few things which would benefit 'us' New Yorkers. For instance, I dropped into the Osterhouse Free Library here, and enjoyed a really fine concert by Galli-Curci and other stars. Of course, it was on the talking machine, but what does that matter? The place was crowded. It was a regular concert with programs, and the 'Star Spangled Banner' was played and honored. The local merchants loan selections to this library."

INCORPORATES BUSINESS

Westfield, Mass., May 4.—The business of George H. Sharp & Son, which was established in this city in 1893 by George H. Sharp, was recently incorporated, and in future will be known as the George H. Sharp Co. The company specializes in talking machines and music, and the business will be enlarged to take in considerably more territory.
Victor Supremacy

The enormous public demand for the Victrola, the unparalleled success of Victor retailers everywhere, unmistakably tell of Victor supremacy.

Victor Talking Machine Company
Camden, N. J., U. S. A.

"Victroia" is the Registered Trade-mark of the Victor Talking Machine Company designating the products of this Company only.

Warning: The sale of the word Victrola, or any word like it, is in the promotion or sale of any other Talking Machine or Phonograph products is misleading and illegal.

Important Notice: Victor Records and Victor Machines are scientifically co-ordinated and synchronized in the processes of manufacture; and their use, one with the other, is absolutely essential to a perfect reproduction.

ATLANTA TRADE SOMewhat SPotty

Shortage of Machines and Records Felt—Meanwhile Business in General Was Never Better

Atlanta, Ga., May 4—The talking machine business in this city during April was a little “spotted.” In addition to the very critical condition in Europe there was and is a shortage of goods, one of the leading manufacturers not having in stock at the present writing a single $55, $160 or $215 model.

Just what effect the conference of the manufacturers recently held in New York City will have on the future of the business is somewhat uncertain, but it certainly appears that there is to be some curtailment in production. Probably this will make the public eager for what is left to be marketed and will in this way make easy sales for the dealer.

After cable news in regard to General Haig’s famous “back to the wall” stand was received, there was a noticeable increase in buying and a better feeling all round. This now world-celebrated order will live in history with “Don’t give up the ship” and “England expects every man to do his duty.”

Talking machine dealers in the South and many of the fraternity in New York, Philadelphia, Bridgeport and elsewhere, will read in this paper with regret of the death recently of Richard Thornton, of Atlanta, Ga., for years identified with the phonograph business in Atlanta, and one of the pioneers of recent years in the growth and development of the industry.

Chamblin, Johnson, Dallasee Co., this city, one of the best-known and foremost dry goods houses in the South, have recently moved into a new six-story fireproof building on Whitehall street, in the shopping center, and have engaged Edgar Brotherton, a former Atlantan, but recently with D. H. Holmes Co., New Orleans, to take charge of their Victrola and Sonora department.

Without detailing reports from each individual firm in the city, we can say that business in general is good, and all are anticipating a continuance of activity throughout the summer.

The Columbia Graphophone Co. has qualified the Kenny Furniture Co., locally, and it is understood that this concern is doing well with this widely known line.

ATTRACTION STORE IN MINNEAPOLIS

Nye & Nye, in the Brunswick Shop, Have an Elaborate Establishment

Minneapolis, Minn., May 8.—One of the outstanding establishments in the talking machine trade in this city is the Brunswick Shop of Nye & Nye, who are in possession of most attractive quarters, fitted out elaborately for the special requirements of their business.

The Nye & Nye shop is located at 212 Marquette avenue, right in the center of things, and the amount of business already being handled more than justifies the handsome equipment. The firm is composed of Walter G. Nye, a former Mayor of Minneapolis, and George M. Nye, a former member of the Minneapolis Legislature. Both men are naturally widely known to the citizens of the city, and this fact has helped them to build up a clientele that is constantly growing.

TRADE MOVES IN WAR TIMES

The Attitude of Dealers Toward Goods Other Than Machines and Records Discussed by F. O. Wilking, of the Ready-File Co.

In a recent letter to The World F. O. Wilking, president of the Ready-File Co., Indianapolis, Ind., points out the tendency which that company has found on the part of the dealers toward making a special effort to push the sale of accessories during war times. He says in part:

“Most of the interesting developments of war times is the changing attitude of talking machine dealers toward goods other than machines and records. This was forcibly brought to my attention during a recent trip through the Central West, when both dealers and jobbers of the most progressive type showed an entirely new disposition to warm up to the extra profit that Ready-File makes for them. There were pharmacies who had previously shown only slight interest in our proposition have become enthusiastic boosters; distributors who have been ordering in 100 lots are now ordering in 400 and 500 lots.

“The explanation lies partly in the fact that our goods are constantly becoming better known, but deeper than that is the inability of our distributor or dealer to get all the machines and records needed to supply the demand of the trade. The fact that his profit on machines and records being cut by curtailing production has made many dealers put more effort behind selling other goods. Each dealer is anxious to have his books look at least as good at the end of 1918 as they did a year before, and he is consequently keenly interested in any device such as ours, which permits him to make an extra profit on each sale.

“In this awakening may be the salvation of many dealers. It is a fact that there are accessories, a number of them, that show the dealer a better profit than either machines or records. Our advice to every dealer is to investigate these devices now, while his machines and record stock is short, pick out those that suit him and get his sales force in the habit of including them in every deal. Thus he will keep his business up to the mark for the present, and be in a position to greatly increase it when the factories get through doing war work.”

NEW PATHÉ NUMERICAL CATALOG

The Pathé Fréres Phonograph Co., Brooklyn, N. Y., has just issued a new numerical catalog of Pathé records which lists all records up to and including the May supplement. It is interesting to compare the old edition, as the increased size of the publication indicates the remarkable strides made by the Pathé Fréres record library during the past few months.

At the present time the Pathé library contains a complete library of all classes of records, and the popularity of Pathé recordings is increasing rapidly with Pathé representatives in all sections of the country.

A Really Good Album At a Moderate Price is a Money Maker for the Dealer

Metal Back Albums will give the dealer and his patrons true value and the highest quality. A complete line of albums that stand for the best in their respective grades.

NEW YORK, MAY 15, 1918

The need for some definite central organization of talking machine manufacturers was emphasized strongly last month when the industry was called upon to appoint a committee to confer with the United States Fuel Administrator regarding measures for curtailing the output of talking machine factories. The committee to represent the largest companies con- ferred with the Fuel Administrator, but he preferred to deal with the trade at large and, therefore, a representative committee was suggested. Of course, such a committee was appointed at the meeting in New York on April 30, but it meant a delay of several weeks before definite action could be taken. Had there been an organization in existence representative of the entire trade, an agent of, or committee from that body would have been in a position to have followed up the matter to a conclusion with the Fuel Administrator earlier in the month.

It is probable that there will be other matters which will require the attention of the united trade in the future and before the war is over, and the industry should not be caught napping again. For the necessity of a permanent committee of repre- sentative men, or an individual, if one can be found to satisfy all parties, being appointed to provide official representation for talking machine manufacturers. Matters with the Government can thereby be discussed and adjusted quickly to avoid suspense. The piano and allied trades have followed this plan through the Music Industries Chamber of Commerce, and it has proven most successful.

The request from the Fuel Administrator that the talking machine trade appoint a committee to confer with him on the question of curtailment came as a surprise to many, as it was believed that the general order curtailing the output of musical instrument factories 30 per cent applied also to talking machine plants. It was learned, however, that an order was issued for a conference with the General Council of the Music Industries Chamber of Commerce, who was unable to state at that time that he represented the talking machine division of the trade. The Government does not desire to take up matters affecting the trade at large with any one or two companies in the trade. When a united trade opinion is desired, it must be what it professes to be—the opinion of the members, or a majority of the members, of one particular industry. It is only by getting together in some form of organization, even if only for the period of the war, and the appointment of a committee with the power to speak for the trade as a whole, that this result can be accomplished. It is not the time for standing aloof or arguing over details. Any orders issued, or any actions taken against the industry, are going to be against the trade as a whole and will hit every individual manufacturer in it. This fact must not be overlooked.

With a committee appointed, an effort should be made to gather together honest and enthusiastic regarding trade, capital invested, number of employees engaged, those beyond the draft age, or women, amount, value and character of materials used, value and equipment of plants, and other essential details for presentation in collated form to the Federal officials. It has already been learned by other branches of the industry that the general state- ment that "music is a war necessity," for its worth in preserving the morale of citizens and soldiers, does not get anywhere in Washington. The fact that there is a large amount of capital involved and that so many thousands of people are dependent upon the industry for their livelihood is listened to with attention.

There are many ways of gathering these statistics without jeopardizing the business secrets of any one manufacturer. The disinterested outsider has been intrusted with similar statistics by more than one big industry, and practically without exception has proven faithful to the trust. These are not times for fancy talks. What Washington wants are facts—cold, hard facts—that can be considered in a businesslike manner, and the trade should see that such facts are available.

RECENT events indicated that conditions demand a more general co-operation between talking machine wholesalers and between dealers in the matter of a redistribution of surplus record stocks in order to preserve a most efficient balance. It is an acknowledged fact that record supplies from the factories are far from being normal, and due largely to labor conditions will possibly drop off even more, regardless of any Federal curtail- ment order. This shortage does not exist alone in the new and most popular records, but it is felt right through the line of the standard catalog selections. The seriousness of the situation is evidenced by the fact that not alone wholesalers but dealers have felt warranted in sending out representatives throughout the country to gather up what surplus stock they could to fill gaps in regular catalog stocks, but often with indifferent success.

One jobber, in calling upon his fellow jobbers for any record stock they could spare, declared that he was completely out of close to 2,000 records from his regular lists. Under such condi- tions, the wholesaler or dealer who is burdened with surplus records is simply fooling himself by neglecting to make an effort to get in touch with jobbers or dealers in or out of his territory, who may not only be able to use those particular records, but who would be glad to get them. When wholesalers are willing to pay retail prices for stock records, and perhaps a few popular numbers thrown in, for the sake of keeping their record assort- ments in half-way presentable shape, then the situation is serious enough to receive earnest consideration.

From the earliest ages the value of music as a therapeutic has been recognized and appreciated and it is not surprising to learn that Mrs. Isa Maude Ilsen, of Hamilton, Ont., has made extensive use of music to win the convalescent and diseased sol- diers of Canada back to the fullness of health and happiness. Music she believes—and she has been demonstrating in practice the truth of her tenets—possesses a tremendous power con- sidered as a medicine.

She says the part that music may play toward bringing back to normal our soldiers who are sick with minor ailments before they go to the front or are wounded after reaching the battle line is no small one. Mrs. Ilsen knows whereof she speaks. For nearly two years she has been the volunteer superintendent of the Military Infirmary of Hamilton, where a great number of Can- adian soldiers suffering from wounds and illnesses caused by the war have been treated. It is in this institution that she has proved the practical value of music in the sickroom.

At present Mrs. Ilsen is drafting a plan for the United States military authorities which will give them an idea of the possi- bilities to be gained from the application of her principle. She will use her recent experience to illustrate the enormous possi- bilities of music in therapeutics.
Talking machine music is being used to-day in many hospitals as a curative influence, and has been especially effective particularly where soldiers are suffering from forms of "shock" which disturb the entire nervous system, making them in a measure a wreck for a considerable time. The selection of the records to be used is, of course, an important matter. They have to be gauged in accordance with the actual physical condition of the patient so that the influence exercised is most beneficial. The effect of music on different patients varies, and just like medicine, what cures one may harm another. In this domain the talking machine is destined to fulfil a noble mission.

J UST another reminder about terms: The stock of machines and records on the dealer's floor are, regardless of fixed price agreements or anything else, worth more to him right now than when he bought them, whether it was three weeks or three months ago. This higher value is based on the fact that once off his floor they will leave a gap that may not be filled for some months to come. Meanwhile, he is paying rent and carrying overhead on that gap. Why, therefore, sacrifice these machines and records on long time terms? Demand cash wherever possible, for right now it is the dealer's right to do so, and barring cash, make the terms reasonable—that is, reasonable to the house. Meanwhile many dealers are selling only for cash.

R ECENT cases in the West where "gyp" dealers, and even that class of legitimate dealers in talking machines who have been convicted of misleading advertising and punished therefor, indicate that State advertising laws and local ordinances really have some "kick" in them and are not to be trifled with. When a few more cases are successfully pushed in other sections of the country that will serve to force on erring members of the trade generally that they either have to be good and tell the truth or stand punishment, so much the better off will be the industry.

Up to a couple of years ago the talking machine industry was remarkably free from misleading advertising. The leading manufacturers have always set high standards for their publicity. They endeavored to present facts instead of fiction; based their claims on truth and devoted their arguments to selling their own lines rather than in knocking those of competitors and trading upon competitors' reputations.

There is now evident in some quarters, however, definite attempts to cast reflection on the products of competitors, or to market unknown lines on arguments based on instruments of recognized standing. The "Victrola-like" or "Grafonola-style" of instruments offered at bargain prices by "gyp" dealers have become too common to permit of their being ignored any further, and the Music Industries Better Business Bureau, with headquarters in Milwaukee, is taking cognizance of this fact and has already succeeded in prosecuting several cases successfully, while others are under investigation.

The New York District Attorney's office has also been investigating local advertisers of the "gyp" type, and has promised to prosecute any of this ilk when proof can be furnished that they are uttering misstatements.

It is all up to the legitimate dealer to protect his own interests. If he sits quietly by and considers that the "gyp" dealer is not doing enough to hurt him to make prosecution worth while, he is simply encouraging a malignant growth in the industry. The thing to do is to investigate personally so far as possible every questionable advertisement, whether by "gyp" or legitimate dealers, and to present the facts to local authorities or before the Better Business Bureau, and prompt action can be obtained. Keeping the industry clean means to keep it healthy.

TALKING machine and record manufacturers are taking no undue credit to themselves when they acknowledge that they are doing real good for the fighting men of the nation at this time. Hardly a military unit, ship or hospital but has one or more talking machines, and a suitable supply of records, and the cry is constantly for further supplies of talking machine outfits for new units not yet equipped. The Y. M. C. A., for instance, consider the talking machine sufficiently important to appropriate a substantial portion of their funds for the purchase of such outfits for their various huts in this country and France. And so it is with the Knights of Columbus. Even the enemy enjoys the talking machine, for a story comes from London of an officer who while engaged in a drive against the Germans found several records in No Man's Land, and close to their trenches. It is said that Washington has divided the products of the country into three classes unofficially, they being first, food; second, war materials, and third, everything else. From results already shown it would seem that talking machine records might have a fair chance of edging into the second class.

T HE phenomenal success of the Liberty Loan Rally of the Allied Music Trades, at Carnegie Hall, on April 30, was due in great measure to the work of the talking machine men and the generosity of the manufacturing companies and their artists.

Meet Us at the Music Show

Those of us whose part it is to “keep the Home Fires Burning” while our boys are at the Front will be doing our part if we feed with an inexhaustible supply of fuel the fires of love and sympathy—if we cheerfully perform every service of which we are capable and bear every sacrifice and burden that comes to us, for the sake of those who are bearing still greater burdens on the field of action.

Music will help a lot. It is helping to keep our boys mentally fit and inspire them to the utmost of sacrifice and achievement. With music at the front, music in the camps and music in our homes, we have a bond of spiritual strength that will defy all apprehension, disappointment or discouragement (real or fancied). That will support to the end our resolve to purge the world of the monstrous, perverted doctrine that puts might above right. That will make unbending our determination to be stripped of all our possessions and drown in a sea of blood rather than permit the policy of the cloven-hoof to prevail on earth.

For our boys there is hardly a moment when music will not fit in, from the time they change from “civilians” to khaki until they return to their earthly homes triumphant in victory or, with thousands of brother heroes, are borne aloft where the supreme award for valor awaits them.

The spirit behind the National Music Show, June 1st to June 8th at the Grand Central Palace, New York City, is in harmony with the “Home Fires” sentiment. That spirit is a missionary spirit which has not only taken music into the remotest parts of our own country, but has carried it to the four corners of the world. Its influence in the lifting of humanity to higher levels of conception and accomplishment has been tremendous. May the National Music Show be instrumental in the musicalizing of every home in every land.

We shall keep open house for all visitors to the National Music Show at Sections 19 and 20 where they will find a most cordial welcome awaiting them.

Orange, N. J.
How Music Aids in Maintaining the Nation's Faith, Hope and Courage

By M. C. Schiff

THE STRESS OF WAR

There are reasons why it would be unwise, from a broadly patriotic point of view, to curtail talking machine production. No doubt the representatives of every industry designated as non-essential have countless arguments to present against the propriety of such designation. In the case of the modern talking machine, however, the morale of the home itself, the very foundation of the nation's institutions, is affected. It is that, and not any inclination to evade bearing our full share of our country's burden, that actuates talking machine manufacturers in feeling that the proposed curtailment of fuel supply is not wise.

According to my understanding, it is the sense of the administration that the production of talking machines should be curtailed to the end that labor thus released may be employed in Government operations, and the money which would be expended for the instruments may instead be invested in Liberty Bonds, thereby providing the Government with the means of purchasing the product of the labor. The benefit that eventually would accrue to the Government under such program with reference to some industries, such as pleasure automobiles, for instance, is obvious. The difference in the value of the program as applied to the automobile industry, which we have taken for comparison, and the talking machine industry, lies in the fact that the former is not indispensable to the morale of the home, while the latter most certainly is.

Music is the most ennobling of all human agencies. Without it the ideals of the nation, and, hence, the nation itself would suffer. It is essential to the home in which is to be maintained the mental attitude necessary to national hope and courage.

The fact, notwithstanding the withdrawal of thousands of persons from the usual buying channels, the demand for talking machines has increased proportionately with the stress of war conditions, the sales of the past six months having been the largest of any similar period in the history of the industry, proves that the public looks to this universal music reproducing instrument to renew the tremendous mental energy daily consumed under the strain of our present national crisis.

Through the talking machine the emotions may be thrilled and hearts made happy. The music of the master, reproduced by the talking machine, can send into the very soul of the lonesome mother or heartstruck wife a message of hope and cheer from the brave soldier at the front, and only through the talking machine can there be received in the home the message of patriotism that great bands and famous musicians impart in their masterful interpretation of our national songs, expressing in the most potent manner the great ideals for which America stands.

The talking machine brings democracy into the home and at this time, when events transcend the powers of the ablest writer or orator, the amplification of music must be permitted to perform its appropriate work of binding the people throughout the country so they may be held together by common ideals and sympathies.

Music in the home is the most positive preventive of our deterioration to a morose practicality; it will inspire the home folks to in turn inspire the boys "over there," and it will prove the greatest element in preserving the morale of the nation's war workers, both here and at the front, by preserving the morale of the home.

Talking machine manufacturers are not only willing, but in common with every other American industry, are anxious to go to any limit to serve the interests of the country, but they hope a way may be found to do that without risking injury to the spirit of the nation which now, more than ever, needs and depends upon the talking machine for emotional mental relaxation and clean home entertainment.

DEATH OF RICHARD THORNTON

Well-Known Talking Machine Man of Atlanta, Ga., Passes Away in New Orleans

Richard Thornton, of Atlanta, Ga., for a number of years identified with the talking machine industry, recently passed away in New Orleans, La., at the Presbyterian Hospital, of acute pneumonia, after an illness of only a few days, in his thirty-fifth year.

He was identified with the Columbia Graphophone Co.'s Southeastern distributing headquarters in Atlanta from 1911 to 1915 as assistant manager, and was regarded as one of the most expert and experienced phonograph men in the United States, his work in the various departments of the Columbia Co. having given him an opportunity to learn the business from the ground up, managerial, selling and financial.

In 1915 the Columbia Co. sold their retail interests in Atlanta, and Mr. Thornton organized the Atlanta Talking Machine Co. at the old stand on Peachtree street, becoming junior partner and manager. His success with this business was excellent, but when the New Edison entered the Southern field he was selected by the owners of the first modern Edison shop in the Southeast to introduce the line into an undeveloped field. It may be said that the present large sale of Columbia product in Atlanta and vicinity and also the Edison ground work can be attributed very largely to his ability and efforts.

Mr. Thornton was educated at the Atlanta public schools, in preparatory schools in New England and at Emory College, Oxford, Ga. He was a member of the Chi Phi Fraternity, and of the leading clubs of Atlanta, and was universally beloved by all who knew him. His untimely end will be mourned by hundreds of friends all over the country.

HANDLING SONORA PHONOGRAPH

Charles W. Homeyer, well-known music dealer of 332 Boylston street, Boston, Mass., has just installed a line of Sonora phonographs and is very enthusiastic over the possibilities of the new line.

IMPORTANT BUSINESS TOPICS DISCUSSED IN ST. LOUIS

Tri-State Victor Dealers' Association Have Interchange of Ideas on the Evils of Free Service, Current Monthly Records and Salesmanship Requisites—Start Repair Shop for the Trade

St. Louis, Mo., May 8.—The last meeting of the Tri-State Victor Dealers' Association, the first to which the associate members—sales people—were admitted, was entirely successful. The experiment was as to whether the sales folk would take an interest. They did. So the experiment was considered successful. More meetings of this kind will be held, and it is believed that sales folk will become interested that it will be possible to get out-of-town members to send their sales forces to attend occasional special meetings. The program was so designed to interest those in the selling end.

Val Relis was to have spoken on "The Evils of Free Service—The Extent to Which Such Service May Profitably Be Extended." Mr. Relis was unable to be present, but President Magoon introduced the topic and asked those present for ideas. There was a good deal of discussion, the chief idea being that there should be a definite suggestion as to how far the salesman should go in promising service. At present the salesman has to be entirely dependent upon the customer's word as to what other dealers will do, as there appears to be no understanding. Some customers get the idea that they are within their rights when they call to have a service man sent out to wipe out scratches to the cabinet. Others get the free service idea so strong that they do not even try winding up the machine before they call for assistance. On motion, a committee was appointed, of which E. C. Rauth is chairman, to outline suggestions as to what free service is desirable and to report at the next meeting.

J. F. Hunleth talked on "Current Monthly Records." Mr. Hunleth said that during the present shortage of supplies of new records it behooved each dealer to make his stock go as far as he could. He took a recent monthly list and called attention to the numbers in stock similar to those on the list and suggested that when a customer called for a certain record—say, a Caruso—he be reminded of the other similar Caruso records in older stock, and that these be played for him as well as the new one—with no emphasis on the new one. He said that experiments of this kind carried out in his store have resulted in many sales from the older stock, and that in many cases the customer was better pleased with the older records. He said that only the entirely new songs need be sold and sometimes there were good substitutes for these. He also reminded his bearers that some of them had large stocks of excellent musical numbers that could just as well be sold as not, as there was no satisfactory reason for their going out of fashion—merely whim.

J. F. Ditzell, of the Famous & Barr Co., spoke at some length on the "Requisites of a Salesman." He reminded his bearers that a sales person was made—not born—that there were certain essentials that it was necessary to teach, and as soon as it was found that the candidate for a sales place could not grasp these requisites, that candidate should be placed in the discard. He reminded the salesmen—and women—present that there were many things that they could do to bring about their own advancement by self-development. These efforts, he reminded them, always brought excellent returns in the way of salary advancement, as there was but one basis on which to fix the salary of the salesman—that of the earning power.

Through the association the St. Louis members have completed an arrangement for a common repair shop. The association has guaranteed a local motor repair man—said to be the best in town—a certain amount of work if he will hold himself at the call of the members. He will make special prices and will guarantee all of the work. This shop is not expected to handle case work—only mechanical—but the repair man will have case work done if desired. This arrangement was made because good repair men are becoming scarce, and it was felt that by consolidating the work better results would be obtained and men could be spared for other work.

J. D. MOORE RESIGNS AS MANAGER

Retires as Head of Successful Talking Machine Department of Lion Drygoods Co.

TOLEDO, O., May 4.—J. D. Moore, who about five years ago opened a talking machine department in the Lion Drygoods Co. store in this city, and has since acted as manager, resigned recently to enter a new field upon leaving the services of the company. Mr. and Mrs. Moore were entertained at dinner by the employees of the talking machine department, on which occasion Mr. Moore was presented with a handsome traveling bag in token of their esteem.

The Victrola department of the Lion store is operated on a very successful basis. No records are sent out on approval, and interest is charged on all deferred payments. All accounts are watched carefully through co-operation with the credit department, with the result that there are practically no repossessions.

LEASE LARGER QUARTERS

MINNEAPOLIS, Minn., May 3.—Owing to the increased competition in the Edison phonograph business, the East Side Photograph Co., this city, have leased new and larger quarters at 309 East Hennepin avenue, which will be equipped to meet the requirements of the company, and which will be occupied about November 1, when the lease on the present store at 416 Central avenue expires.

Get That $3

You can sell every Victrola X-A and XI-A you can get—and sell

Ready File

With every one. Or you can sell the Victrolas alone, making $2.75 or $3.00 less on each one. Mail us this advertisement, with your name and address on the margin. Full particulars will be mailed at once.

Ready File Co., Inc.
INDIANAPOLIS, U. S. A.
Sentimentally regrettable as it may be, little phonographs, like little nations, live only long enough to demonstrate the strength and permanency of the big ones.

Pathé stands for a future greatness in proportion to its present magnitude. Pathé is big in every way. Pathé means an immense resource of machines and records. Pathé means good service.

If you are a Michigander, interweave your future with Pathé and grow with a great service in a great state.

Detroit
How the Talking Machine is Disseminating a Knowledge of the World-Famous Musicians

Hector Charlesworth, who has written a series of articles on talking machine and player-piano music for the Canadian Home Journal, in the course of one of them emphasizes a thought that is interesting. He says: "While in a small Ontario town I noticed a large advertisement announcing that records of Jascha Heifetz could be procured from a local dealer. Less than ten months ago the name of Heifetz was unknown, even to the most noted musical critics of New York. He came to America from Petrograd and gave a violin recital in that city about the time of the first snowflakes. At once it was recognized that a great star had risen in the musical world, and his subsequent appearances have created a furor wherever he goes.

"But a decade ago such an incident would have affected only a few large cities with halls capable of containing the thousands that naturally throng to hear a new and celebrated man of genius. In a small town, such as the one I mention, the idea that Heifetz would become a personage so well known as to be the subject of lengthy advertisements in the local newspapers would have been fantastic. Only a few of the well-to-do, who might go on a journey, could ever hope to hear him play the violin, and his name would have been dismissed from the whole community. The sure barometer of advertising expenditure shows that he has a public everywhere, a public infinitely larger (who will know him through the records, and probably sees his face) than the throngs who are crowding to hear him in the large cities."

HERZOG ART RECORD CATALOG
New Catalog Portrays and Describes Over Sixty Different Models of Cabinets

A new catalog of "Herzog Art Record Cabinets" has recently been published by the Herzog Art Furniture Co., of Saginaw, Mich. This new catalog, which is a very handsome affair in blue, white and black, portrays over sixty different models of cabinets. It starts in with a comprehensive view of the factory, and a per- tinent discourse on why Herzog art record cabinets are a profitable accessory for talking machine dealers. Following this are a series of profusely illustrated sections.

Section 1 is devoted to Victor record cabinets, Section 2 to Columbia record cabinets, Section 3 to Pathé cabinets, Section 4 to Brunswick cabinets, Section 5 to Edison cabinets, Section 6 to Auxiliary cabinets, Section 7 to player roll cabinets, Section 8 to a reproduction of the various newspaper cuts of Herzog cabinets which are available for use in the dealer's local advertising. The volume is well written, admirably printed and produced, and should prove of interest to all members of the trade.

LEE GILBERT MARRIED

Lee Gilbert, a well-known talking machine man of Omaha, Neb., recently married Miss Weltha Gilbert, of Des Moines. It was a home wedding of a most attractive sort, and the guests included Mr. and Mrs. Geo. E. Mickel, Mr. and Mrs. Fred. Bailey and Hugo Hayne, all of Omaha, and all well known to the talking machine trade of the Middle West.

Mr. Gilbert started his career in the talking machine industry at the Victor factory. From there he went to Chace & West in Des Moines, and later with Mickel Bros., in the same city. He was transferred to the Omaha branch of the Mickel Bros. Co., on February 1 of this year, with which organization he continues to display great energy as a Victor salesman.

TO FEATURE EDISON LINE IN UTICA

Unica, N. Y., May 6—A new company has been formed to promote the sale of the new Edison phonograph. This company will handle a probationary zone, having the exclusive sale of the Edison instruments and records. The stock, fixtures and lease of the Unica Music Co., Inc., have been purchased and the Utica business will be conducted at 201 Genesee street, Crouse Building, where every model of the new Edison and a complete stock of the Edison Disc and Blue Amberola records will be found. The members of the new company are Clayton L. Wheeler, Arthur R. Knox, E. L. Kubl and John Schuler. The Utica office will be conducted at 201 Genesee street and will be under the management of Arthur R. Knox and the Rome branch, 173 West Dominick street, will be managed by John H. Schuler.

THE BROOKS

Automatic Repeating Phonograph

Plays Any Kind of Record—Any Desired Number of Times and Then Stops Automatically—The Phonograph Sensation of the Age

DEALERS:

You cannot duplicate the value we offer for twice the price. In size and appearance the "Brooks" compares favorably with Instruments retailing for $300.00 and up.

In tone qualities it is unexcelled by any talking machine on earth! In mechanical equipment and automatic features it is years in advance of its nearest competitor. We have been building talking machines for three years—last year our sales doubled every four months. The BROOKS DEALER has no competition. The machine creates interest and discussion—it is self-advertising. Send for particulars, terms, prices.

Portable Model Grafonolas for Vacationists

“Vacations with Music”—
That’s the Columbia sales slogan for the next ninety days.

Make it yours, and your Summer sales will follow your Thermometer upward. The hotter it gets, the better your business.

Sell Portable Grafonolas to the folks who go to the woods and lakes and shores, and there’ll be no Summer Slump for you. Your July will be a big, fat January.

It is sound sales strategy.

Vacation time is joy time. People want to pack all the fun possible into their play days. They jump for anything that makes for mirth and spice-o’-life while they’re away.

And how many know what joy there is in a “Vacation with Music?”

Make it your job—and your opportunity—to tell them.

A vacation with all the live, up-to-date music always ready to play. Stirring soldier songs, close harmonies and splendid bands—for the twilight time when the crowd gathers; dear old-time ballads or the haunting strains of violin, floating out over the water in the velvet darkness, when the little waves go slap-slap-slap against the side of the canoe.

Or snappy, catchy, cheery song-hits for rainy days—glorious syncopations for dancing. Who can imagine a vacation without dancing? Think of having all the newest jazz riots, one steps, waltzes, right on tap in a friendly, willing Grafonola.

Here’s a big opportunity for the live salesman—go after it.

We’ve prepared a tremendous barrage of National Advertising on the Portable Grafonolas as vacation companions—to be launched during June, July and August.

People are going to want the Vacation Models.

Tie up, friend dealer, tie up. Write—today—to your Distributor about the Portable Models, prices, Sales Helps, quantities, etc.

Remember the countersign—“Vacations with Music.”

THE TALKING MACHINE WORLD

Grafonola

High-Power National Advertising that will make it Easy for You to Sell Portable Model Grafonolas

During June, July and August—when people are going by the hundred thousand to the Summer resorts—Columbia will make a powerful sales drive on the Portable Model Grafonolas.

The big idea back of the advertising is, "Vacations with Music."

It's a powerful idea—an idea that automatically makes every vacationist a potential customer for a Grafonola.

The advertising schedule comprises full-page space in the Saturday Evening Post, Collier’s, American Magazine, Scribner’s, Literary Digest and Good Housekeeping.

Over six million combined circulation.

Thirty million readers.

Is it big enough for YOU?

Then you PUSH—our ads will PULL.

COLUMBIA RECORDS IN FOREIGN LANGUAGES

Here's an entirely new field for Columbia Dealers. It is a Department in itself. Foreign Language Records sell fast—people who buy them have plenty of money now.

NEW VICTOR ADVERTISING MANAGER

Ernest John, Widely Known as Editor of "Voice of the Victor," Advanced to This Important Post in the Victor Co. Organization

The following letter sent to the trade by Louis F. Griswold, general manager of the Victor Talking Machine Co., requires no comment beyond the endorsement of Mr. Griswold's views regarding the experience and ability of Ernest John.

"John as qualifying him for his new post as advertising manager of the Victor Co.:

"We take great pleasure in announcing the appointment of Ernest John as manager of the advertising and editorial departments of the Victor Talking Machine Co., which departments will be amalgamated under his direction.

"This highly important position requires not only a broad advertising experience, but certain special qualifications, and, above all, an intimate knowledge of Victor business.

"As editor of the "Voice of the Victor" and manager of the editorial department, Mr. John, with fourteen years of practical experience as an advertising man, is already well known to the trade. We confidently believe in his ability to maintain in the future as fully as it has been maintained in the past that high efficiency which has been a characteristic of Victor advertising and publicity.

"Associated with Mr. John on the editorial staff, which has already given the trade such excellent service will be Arthur S. Garbett and F. A. Delano, writers of distinction and high qualifications. On the advertising staff will be W. L. Marshall and H. E. Green, both men of established worth and long experience.

"Ours is a highly specialized business requiring special talents and special training. Our one consistent purpose is to be of greater service to the trade, and so to be of greater service to ourselves. To that end the above appointments have been made; to that end, also, we ask your earnest co-operation with us in assuredly being to the advantage of all concerned."

For Mr. John it can be stated that by experience and training he is particularly well qualified to handle with success the problems connected with his new post. He was born in St. Ives, a summer resort on the Cornish Coast of England, recognized as the mecca for artists, among them some of the greatest painters in England. It was in his native town that he secured a fundamental knowledge of art, that has proved of great advantage to him in the domain of advertising and editing.

Coming to the United States when still a young man, Mr. John became associated with a small town newspaper in Michigan where he had experience as editor, manager, circulation manager, and more particularly as advertising manager. Mr. John proved particularly successful in the last of the positions, proving to his clients the value of advertising, even selling them advertisements, and finally writing and designing the ads. After five and one-half years as advertising manager, Mr. John resigned in 1910 to go with the Victor Talking Machine Co. to take charge of specialized work. He was enabled to give to the company showing demonstration lectures before the public on the musical value of the Victrola, and in addition acting as special adviser to the dealers with whom he came in contact as musicians many thought of the talking machine only as a means of supplying "canned" music, and the dealers themselves lacked a full appreciation of the possibilities of the Victrola. It was to overcome this condition that Mr. John was sent on tour. Mr. John worked so successfully that he was called back to Camden to edit the "Voice of the Victor," the official organ of the Victor Co. Here his knowledge of practical matters, of typography, design and illustration, combined with a thorough knowledge of the dealers' needs, and of Victor machinery, enabled Mr. John to produce a publication of unquestioned standing and value.

Mr. John's next appointment was that of assistant advertising manager, given to Henry C. Brown, who was then manager. About eighteen months ago, when the new "Editorial Department" was created, Mr. John was appointed manager, and in addition to editing "The Voice" he has been called upon to get out the monthly supplement of new records, as well as catalogs, and take charge of other duties. His new work he made good, and when the time came to choose another advertising manager to replace Mr. Brown, who had become assistant to the general manager, Mr. John was accepted as the logical man for the post.

Mr. John is a man of winning personality and charm of manner. He makes friends quickly, and what is more keeps them, although he is not averse to a "scrap" if he finds that his rights demand it. In other words, he has the necessary qualifications for a masterful advertising manager of the Victor Co. and can be depended upon to do big things in a big way.

"READ THIS -"

"The finest and most delicate steels of mechanism depict" prove effective, according to Dr. Edgar J. Cannon, whose research and workmanship must have the proper Oil. Stop and con- sider this when you buy your next Oil for household use."

BEWARE OF SCENTED OILS

Machine will not eat if fed with Scented OILS. NYOIL is used by U. S. Gov't in Army and Navy, and by the famous German camera makers. It is made only for NYOIL, for writing Machines, Engraving and Lettering, Cylinder printers, Saturators and NYOIL for Oils for Guns, for large guns from mining. NYOIL is put up in Jugs, Brs. £c., and also in Quant and Gallon Cans.

For Sale by all Talking Machine Dealers

WILLIAM F. NYE, New Bedford, Mass., U. S. A.

VEECO MOTORS ARE IN DEMAND

Improved Model Wins Favor of the Manufacturers—C. F. Simons in France.

Boston, Mass., May 4.—The VeeCo Co., of this city, manufacturers of the VeeCo electric motor and the Vitanola turbines for talking machines, report a strong and growing demand for their motors. The company recently put on the market an improved type of motor, considerably heavier than the old model, and with details added that make for betterment. The motors are coming through in good shape, and shipments are being made with regularity.

Charles F. Sinic, formerly sales manager of the VeeCo Co., who enlisted in the U. S. Artillery last August, has been in France for some time past, and a letter received at the VeeCo headquarters states that his battery has already been in action on the Western front.

A VISITOR FROM CHICAGO

M. C. Schiff, president of the Vitanola Talking Machine Co., Chicago, Ill., was a visitor to the World sanctum in New York the closing days of the month. On his trip East he was accompanied by Mrs. Schiff, the visit being a business one in a measure, yet it also marked the twenty-fifth anniversary of their marriage. Both Mr. and Mrs. Schiff enjoyed their silver wedding anniversary in a very pleasant sojourn in the nation's metropolis.
TIMELY SALES SUGGESTIONS
Prepared by J. I. Carroll on General Phases of Salesmanship Are Right to the Point

J. I. Carroll, assistant manager of sales of the Emerson Phonograph Co., manufacturers of Emerson records, sends out regularly to the members of his sales staff interesting bulletins which contain timely suggestions on important topics, and occasional suggestions on general phases of salesmanship. One of his recent bulletins, entitled "Pep," was enthusiastically received by the members of the staff. This bulletin reads as follows:

"The man who's on the job early in the morning and late at night—he's got it.

"The man who's alive to the opportunities in each town, studies to profit by them, and then goes to it with enthusiasm and determination—that's it.

"The man who works the small towns as eagerly and thoroughly as the big, and gets the business in each—is supplied with it.

"The man who enthralls his dealers, gives them sound advertising and practical merchandising suggestions; who is ever alert to help his customer build up a successful department—has a stock of it.

"The man who wastes no time, makes every minute count, covers ground rapidly though thoroughly; who makes friends for himself and his house—he surely has it.

"The man whose appearance is neat; whose speech is clean cut, straightforward and businesslike; whose manner is tactful, courteous, gentlemanly, and who reflects credit on his house—has a fund of it.

"'Pep' is not noise or humbug. It is life, enthusiasm, energy, preparation, belief and confidence in yourself, your firm, your goods.

"Every salesman who lacks any of the elements of 'pep' should cultivate them—they bring success!"

SURPRISED THE RECORD SALESMAN
Selection by Grand Opera Artist of Ragtime and Popular Records Shocks Salesman

A certain shining light in the operatic world was a visitor recently to one of our talking machine establishments, and needless to say his visit caused quite a stir. The best salesman was called into service, and without much difficulty an expensive talking machine was sold. From there he journeyed to the record department to make a selection of records for his library. Immediately the record salesman prepared what he deemed would be an acceptable list of operatic records to supply to this celebrity, and he was led into the most attractive sound-proof booth, the company possessed. List in hand, the record expert suggested a duet from "Roberta," a polonaise from "Mignon," the "Caprice Viennois," and other numbers which he thought would appeal to a man famous in the operatic world. The celebrity politely waited until the young man had come to the end of the list, and his breath as well, then said: "You are very kind to have taken such trouble for me, but as I hear so much opera and good music all the time" (smiling), "I would now like to purchase all the 'bad' music you have. The most syncopated ragtime, the most popular songs I will have if you please—also some jazz band mixtures. You need not play them, just pick me out about two dozen of your very latest and lightest music."

He arose to go. The record salesman still wore a terribly pained expression. He hovered tremulously around—pencil in hand. "But may I not send any opera records?" he asked rather anxiously.

The celebrity was now at the elevator. "Just a complete set of the kind I have named," he returned, majestically, as he stepped out of the shop.

GETTING AFTER THE CASH
A Suggestion in "System" That Is Worth While
Where Cash Is Not Enclosed With Order

The following suggestion of E. R. Marshall, which appears in the current issue of "System," may be of interest to talking machine dealers, some of whose business is by mail on a cash basis.

"Sometimes orders that come into an Eastern house are not accompanied by the necessary remittances. A rate of the house requires cash with each order. How to get the remittance without losing the order, or without offending the customer, puzzled the manager until he drafted this letter:

I note that the envelope which contained your recent order contained no form of remittance. The envelope bore no evidence of having been tampered with in any manner, and it occurred to me that perhaps you inadvertently failed to include your remittance.

If this is so, will you be good enough to send it by return mail, enclosing it in the enclosed order? Or, if you did enclose your remittance, send me particularly so, that I may keep track of it.

We hope to have your reply on the basis of this letter by return mail.

"Experiments proved that the letter pulled. Now it is written to every customer who fails to send cash with his order."

MEETING OF COLUMBIA DEALERS
Retailers in Indianapolis District Gather for Business Discussions

Indianapolis, Ind., May 4.—Dealers in this city and vicinity who handle the Columbia line of phonographs and records held a meeting recently at the Hotel English, where they listened to excellent business talks by Ben. L. Brown, manager of the local branch of the Columbia Graphophone Co., Samuel Lomberg, special representative of the international record department of that company; William Kohin, special representative of the Dictaphone, and H. C. Barnes, of the advertising department of the local paper.

Prestige

CONSIDER what it means, from the standpoint of prestige, to introduce the Cheney Phonograph in your community.

This is the instrument whose serene purity of tone and superb cabinet design set a new high standard in phonographs. The Cheney plays better and it pays better. Each instrument sells others.

The Cheney Phonograph Plays all records—better

The Cheney acoustic inventions, covered by basic patents, are revolutionary improvements. These commanding advantages bring the Cheney dealer the cream of the phonograph trade.

Six Cheney Models—$60 to $300
Art Models—$200 to $2000

DEALER CO-OPERATION
Cheney distributors are backed by a very complete and effective Merchandy Service, consisting of regular newspaper advertising and highway merchandising help.

Full information supplied upon request

CHENY TALKING MACHINE COMPANY
CHICAGO
24 North Wabash Avenue
THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

Boston, Mass., May 8—The Third Liberty Loan campaign has ended and Boston has gone "over the top." The talking machine trade has certainly done its share and both heads of establishments and employees have all been enthusiastic buyers of bonds. Such houses as the Oliver Ditson Co., Eastern Talking Machine Co., the wholesale department of the Columbia, M. Steinert & Sons Co., Pardee, Ellenberger Co., Inc., Hallet & Erie Co., and many others having helped considerably to swell the total for this city.

The local business comes to be pretty good, but with the last week of April and the first week of May there was a general improvement all along the line and there is a feeling that the early summer business will be very good. But in the meantime there is a notable shortage of goods which is felt by nearly all the companies.

Great Cambridge Meeting

The Columbia people had a great night on Tuesday, April 23. It was the monthly meeting of the dealers and there were some special features to make the occasion something out of the ordinary. Manager Fred E. Mann presided and the 140 or more persons present were entertained by Leon Rothier, of the Metropolitan Opera Co., who graciously consented to take part before going to the opera house where he was to appear later in the evening. Mr. Mann played his accomplishments. Mr. Rothier has seen service in the present war and was in the front trenches at Verdun and has also been at Rheims. Another who entertained was Arthur Fields, who sang quite a number of songs, many of which are familiar to the owners of Columbia records. Mrs. Fields accompanied her husband. A. R. Harris, of the record division of the sales department, came over from New York, to give a talk on the June records. A number of the Columbia dealers present came from neighboring and more distant cities.

Illness of Mrs. F. C. Henderson

F. C. Hendon, of the F. C. Hendon Co., who operates a chain of talking machine departments in a number of large stores throughout Boston and other places, has had the sympathy of his friends in the illness of his wife who recently underwent a serious operation. She is now well on the road to complete recovery.

Joins the Colors

Young Sugarman, a partner of Harry Rose at his School street talking machine shop, has gone into service and is stationed at the Portsmouth, N. H., Navy Yard.

Victoria on the S.S. "Belfast"

Quite an innovation was tried out on April 29 when the passengers taking the initial trip of the "Belfast" of the Eastern Steamship Lines, Inc., sailing from this city to New York had the pleasure of listening to a high-priced Victor which had been installed by Herbert L. Royer, who conducts a Victor shop in Chauncey street, this city. Mr. Royer was on the boat, the guest of the management, and he was on hand to give the stewardess instructions from time to time in regard to operating the machine. The selection of records was left entirely to Mr. Royer and his choice were such as certainly gave pleasure to all on board the boat. It was noticeable that such a machine is admirably adapted for use on a steamer and the music carried well to many parts of the boat. The Victrola is located on the upper saloon deck and Mr. Royer has similarly installed one on the "Camerden," which is the sister ship of the line. This route to New York, known as the outside line, has long been popular with talking machine men during the summer months.

Joins Chickering & Sons Forces

F. H. Robie, formerly associated with Steinert & Sons, is one of the latest additions to the Edison and Victor staffs of Chickering & Sons. Business with this house keeps up quite well.

Associated with the Wm. Hengerer Co.

Boston friends of Wallace Currier, who was long identified with the local Victor business, hear occasionlly from him in Buffalo, where he is associated with the William Hengerer Co., and in charge of its Victor business. Mr. Currier finds his new association very pleasant.

New Emerson Accounts

Oscar W. Ray, New England manager of the Emerson Phonograph Co., had a as week-end guest the early part of May Arthur H. Cushman, the company's sales manager, who spent several days here going over the New England situation, which is very promising. Some one of the new accounts which Manager Ray has just signed up are Harry Kitttridge, of Lowell; the Wentworth Music Co., at Skowhegan, Madison, Brunswick and Waterville, Me.; John J. Forrest, at Lawrence; C. C. Moir, of Cambridge; F. C. Tucker, at Haverhill, and B. L. Couchar, of Springfield. All of these stores are installing the new nine-inch records, which, though out only a short time, have been selling most satisfactorily everywhere.

Steinert Men in the Service

The Arch street Victor headquarters of the M. Steinert & Sons Co., which is in charge of Robert Steinert, is about to fly a service flag to the breeze, for the house has certainly done its share in providing good men for the service of Uncle Sam. There is Emmet Ryan, an outside man for the company, who is now in France attached to General Pershing's staff. Leo McCarthy is another. He was an outside wholesale man, and is now with a unit of heavy artillery. Robert Tiffany is naval aviator and is now in practice at Princeton. Frank Griffin, of the repair department, is in the quartermaster's division at Camp Devens, Ayer. Frank Cunningham, a branch manager, is at the Charlestown Navy Yard attached to the paymaster's department. Charles Von Euw, head of the stockroom, is at Fort Slocum, N. Y.

Represented on Grand Opera Program

The talking machine business was well represented in the program of the Metropolitan Opera Co., which has finished a week's engagement here. Houses included were M. Steinert & Sons Co., Oliver Ditson Co., C. C. Harvey Co., the Victor Co., which had the back page, and the Columbia Co., which was featured by the Granby Co., of New England.

Russell Steinert Did Good Work

One of the hardest-working men in the Liberty Loan campaign was Russell Steinert, who makes his headquarters at the Boylston street establishment of the Steinert Co. He is in charge of Precinct 5 of Ward 8 and is an important factor in disposing of a large amount of bonds.

New Sonora Representatives

One of the important deals just closed by Richard Nelson, manager of the New England department of the Sonora, is that of Charles W. Homyer, a well-known Boylston street sheet music dealer. Mr. Homyer has arranged a single line being in the center of his warerooms and he already has been able to interest a number.

Foresight Proves Its Value

Some years ago we adopted a policy of conducting our Victor business "with the dealer's viewpoint foremost in mind."

By practicing this policy we have acquired a knowledge which in times like the present makes Eastern Victor Service of triple value to the dealer who wants practical co-operation from his jobber.

EASTERN TALKING MACHINE CO.

177 TREMONT STREET

BOSTON, MASS.
of persons in this new proposition. Another new account signed up by Manager Nelson is the C. R. Miller Co., a large furniture house in Cambridge. Thomas Wardell, of Lowell, is still another who will carry the Sonora. Clinton Royer, formerly with the Steinert house, is one of the latest to join the Sonora local force.

Joseph H. Burke Married

Joseph H. Burke, who is associated with Richard Nelson in the New England management of the Sonora, and who is now making his headquarters at Hartford, Conn., was married on April 29 to Miss Eleanor H. Keys, of Auburndale. The ceremony was performed at St. Bernard's church, West Newton, and Mr. Burke and his bride started off on a short trip to Atlantic City.

Visited Edison Factory

George Lincoln Parker, who handles the Edison and Victor outfits, paid a visit to the Orange, N. J., factory and laboratories of the Edison Co. a while ago and he returned to Boston convinced that the company is now turning out some of the best records that have been put out since the Edison proposition has been before the public.

Aeolian-Vocalion Progress in Boston

The Boston office warerooms of the Vocalion Co. have been honored with visits from New York of two of its important men in the business. One was Thomas Pritchett, traveling auditor, who was here for several days; and the other was Douglas Langford, one of the traveling men from the company's New York office. Manager Hibshman makes an enthusiastic report over business which, for the month of April, was considerably in advance of the business of the same month in 1917.

Close Many Good Contracts

Wholesale Manager R. O. Ainslie, of the Pathé line, whose headquarters are at the ware-rooms of the Hallet & Davis Co., has been closing some very advantageous contracts throughout New England. One of the latest concerns to be signed up is the Tuttle Co., of Rutland, Vt., and it has taken a large initial order. One of the new outside men, R. R. Reid, has gone up to Rutland to help open up the department which promises to be quite an ad-junct to the commercial enterprises of that city, for the Tuttle Co. has made special prepara-tions to push the Pathé proposition in that terri-tory.

Joins Brunswick Staff

Austen L. Fordham is the latest addition to the staff of the phonograph department of the Brunswick-Balke-Collender Co., which is fea-turing the Brunswick machine. Mr. Fordham comes here from the company's retail store in Washington, D. C. F. H. Walter, who is meet-ing with marked success in introducing the Brunswick throughout his New England ter-ritory, is especially proud of the new model 380 which has just been received at the Boston wareooms. It is considered an exceedingly handsome machine by all who have examined it.

Big Showing of Artists

The Boston office of the Columbia Co. from Manager Mann down was well represented at the Boston Opera House on the evening of April 24 when three of the Columbia artists sang in "Rigoletto." These were Lazaro, Mardones and Mme. Barrientos, all of whom acquitted themselves splendidly.

Sympathy for the Patriotic Alsen Family

The many friends of the family of John Alsen, formerly head of the Victor and Edison de-partments of the George Lincoln Parker ware-rooms, are full of sympathy for them in the death of Henry C. Alsen, a brother, who as a member of the 104th Infantry, was lately killed in France. John Alsen himself is now in France where he went with the 101st Regiment and it is of special interest that ever since he has been away his sister, Miss Anna Alsen, who is also with the talking machine department of George Lincoln Parker, has sent her brother The World each month, and he writes home that the magazine is eagerly looked for. Thus is The World to be found in the trenches. There is also a third brother in the family who entered the service. He, too, is somewhere in France.

Visits New York Headquarters

W. H. Gould, sales manager of the educational department of the Columbia Co., was over here from New York the latter part of April. Mr. Gould is most enthusiastic over the way the public have been taking hold of the new line of records which are so eminently adapted to the homes where there are young people.

Henry Kahn, who runs a well-equipped talk- ing machine department in the Jefferson build-

(Continued on page 22)
ing. Washington street, was a visitor to the New York laboratories of the Columbia a short time ago.

A wedding recently taking place in the ranks of the Columbia forces was that of Miss Marion Davis, of the wholesale order department, and Charles E. Davis, physical instructor at the Springfield Y. M. C. A. The bride’s office associate presented her with a magnificent mahogany chest.

BIG VICTOR GATHERING IN BOSTON

Concert and Lecture by Oscar Saenger in Steinert Hall Attended by Many Victor Dealers

Boston, Mass., May 6—There was a large attendance at a lecture on voice culture given recently by Oscar Saenger, of New York, at Jordan Hall, and they left at the conclusion of a pleasant evening convinced that an art to voice culture the Victor plays an important part. In New York Mr. Saenger is widely known as a vocal teacher, and while he has given these demonstrations there at various times it is understood that this was the first time he has given them outside his home city. There was a group of excellent artists to assist and they were heard in compositions by Verdi, Kreisler, Caesar Ciù, Tartini, Delibes, Gluck and Paganini. The records which comprise Mr. Saenger’s course were brought into use. In the forecast there was a meeting of Victor dealers held at Steinert Hall when a large group of men was addressed by Mr. Saenger. For this occasion C. V. Egner, one of the assistants of the traveling department of the Victor Co., came over from New York. This meeting was a valuable heart-to-heart talk and the dealers, who also were responsible for the evening demonstration and concert, felt well repaid for the time and thought put into the arrangements. James A. Frye, of the Victor Co., who happened to be in Boston at the time, played a part in putting the plan through and in working out the details he had the able assistance of Henry Wickesman of the Oliver Ditson Co., and others. At the evening affair there was a sort of reception committee—Walter Willis, Harry Parker, Mr. Newman, of Steinert’s; Charles Urlash, of the Eastern; Mr. Bond, of the Eastern Co.; Mr. Freeman, F. C. Henderson & Co., taking an active part. Following is a list of the dealers co-operating to make the concert and lecture a success: M. Steinert & Sons, Eastern, Oliver Ditson Co., Jordan Marsh Co., Walter Willis, A. M. Hume Piano Co., Kraft, Bates & Spencer, A. J. Jackson Piano Co., George Lincoln Parker, Chickering & Sons, Shepard Norwell Co., Rosen Talking Machine Co., Concave Phonograph Co., H. V. Savage, Too, Movie Co., A. M. Phinney, Hyde Park; Codman Selmoscope Co., J. H. Cannell, Everett; McKarthur Furniture Co., Royer Talking Machine Co., C. E. Ogood Co., Iver Johnson Co., M. J. Elviedt, Allison; and C. C. Harvey Co.

A PROGRESSIVE PLYMOUTH STORE

The United Talking Machine Co., which have very attractive quarters on Main street, Plymouth, Mass., report a very excellent demand for Victor Victrolas and the full line of records which they handle. Their establishment is nicely equipped with three mahogany soundproof booths, and two spacious record racks. Samuel Feldman, manager of the store, is shown in a partial view of the establishment herewith.

EMERSON SELLER SYSTEM A SUCCESS

Boston, Mass., May 6—By way of proving the efficacy of the self-seller display system inaugurated some time ago by Oscar W. Ray, New England manager of the Emerson Co., the following letter is of especial interest, and at the same time

Manufacturers—Jobbers—Dealers

PERFECTION FLEXI-TONE reproducers attached to PERFECTION ball-bearing tone arms No. 3 and No. 4 are all of the same general pattern, on all types of Edison machines. Made in nickel and 24 carat gold finish, extra fine quality.

These reproducers and arms are the very finest made mechanically. The PERFECTION FLEXI-TONE reproducers are the most perfect phonograph reproducers built, reproducing all lateral cut records from highest pitched soprano, to lowest pitched bass, as perfectly as the records were recorded in the recording room. Wonderful clarity of sound, as well as great volume. Extra fine quality of finish guaranteed. Manufacturers, jobbers and dealers will find in this line of reproducers just what they have been looking for, as they are assembled by skilled workmen especially adapted to this kind of work, producing a product built with watchlike precision.

All accessories in stock ready for immediate shipment. Phonograph manufacturers can have PERFECTION FLEXI-TONE reproducers fitted to their machines. Write for prices, information, etc.

PHONOGRAPH MANUFACTURERS

We have 6,000 sets of Universal Tone Arms and Reproducers, Nickel finish, that can be used on any make of phonograph. These Arms and Reproducers are ready for quick delivery. Write us for quantities, prices, information, etc.

NEW ENGLAND TALKING MACHINE CO.

16-18 Beach Street

BOSTON, MASS.
THE FOURFOLD SALES APPEAL OF THE

AEOLIAN-VOCALION

IT is more and more coming to be recognized in the music-trade that the Aeolian-Vocalion has the most complete sales appeal of any phonograph on the market. The history of the Aeolian Company is one of extremely active development. It has almost unlimited resources here in the United States and abroad for the creation and development of musical instrument features. The Aeolian-Vocalion, though one of its younger, is one of its greatest and most successful enterprises.

The Aeolian-Vocalion possesses a number of distinctive advantages, among which are four that stand out particularly for their musical value and sales promotion. The primary appeal is that of tone quality. Added to this are its up-to-date and efficient mechanical features, such as a new Universal Tone Arm, a superior Automatic Stop, its artistic and fascinating tone control, the famous Graduola, and its uniquely beautiful outward appearance.

These four great points of advantage, coupled with the moderate prices at which the Vocalion is sold, make it by far the most attractive phonograph proposition today.

Among these features will be found an appeal to all classes of people, the highly trained musician, the wealthy connoisseur, the more modestly situated, the young and the old. People of discriminating taste, musical and artistic, are everywhere finding the Vocalion irresistible.

The volume and quality of the advertising exploiting the special features mentioned above are indicated by the advertisements upon the three following pages, which are part of the aggressive advertising campaign conducted in newspapers and national magazines.

Aeolian service, which is being further strengthened by the establishment of convenient distributing points throughout the country, and the breadth and fairness of Aeolian business dealings, added to the emphatic superiority of the Vocalion itself, make the representation of that instrument one of the most profitable, desirable and satisfactory business connections that can be made.
By virtue of knowledge, experience and equipment,

The Aeolian Company was the logical source from

which a higher development of the phonograph should spring.

The privilege of unfettered self-expression in music

was first given to mankind more than a quarter of a

century ago by The Aeolian Company.

Successively, the reed organ, the pipe-organ and the

pianoforte were taken by this company, carried far beyond ex-

isting tonal standards and made available for all to play.

The Aeolian Vocalion’s great point of departure from

other phonographs lay in its revolutionary device (the

Graduola) for controlling expression.

By using the Graduola one may actually play the

records—may shade and color the tone to suit the fancy

and thus introduce the delicate variations that every

artist himself introduces in his performances.
HEN the Aeolian Company decided to build a phonograph, it brought to the problems involved an experience and resources unparalleled in the music industry. This Company, through its genius in developing new musical instruments, and its success in raising the standard of those already established, had assumed a position of unequivocal leadership.

It had become the largest manufacturer of musical instruments in the world, with 14 factories in America and Europe and branches and representatives in all the world's important cities.

It had originated the Pianola, the first and most widely known of the modern instruments called “player-pianos” and the one that has always been recognized as the standard of all instruments of this type.

It had developed the modern residence pipe-organ and had become the largest manufacturer of these costly and magnificent instruments.

It was responsible for the greatest of all pianofortes—the Steinway, the Weber and the Steck Grand Duo-Art Pianos.

And it was credited with having done more towards raising the standard of piano tone and quality, than had ever before been accomplished by any single manufacturer.

The Tonal Superiority of the Aeolian-Vocalion

It was this imposing and successful music-house from which the new type of phonograph—the Aeolian-Vocalion—sprang.

With The Aeolian Company’s knowledge of tone-production through various mediums—strings, pipes, sound-chambers and resonant surfaces—this Company experienced little difficulty in improving the phonograph tonally.

Faults, which others with less knowledge and experience in acoustics had been unable to remedy, were wholly or in great part, overcome.

In the Aeolian-Vocalion, stridency or muffling of tone were absent; surface scratch was almost eliminated, depth and free natural tones of correct timbre were secured.

The Graduola Makes the Phonograph a Real Musical Instrument

Important as was the tonal development of the Aeolian-Vocalion, however, this instrument represented in another way a still greater advance in phonograph development.

Tone—or expression control, as offered by its new and exclusive feature—the Graduola—is what essentially makes the Aeolian-Vocalion the phonograph of ultimate type toward which progress has been tending.

No music-producing means ever devised, that did not afford opportunity for spontaneous and artistic expression control, has been seriously considered by musicians or taken a permanent place in the music-world.

For the first time in the history of the phonograph this opportunity is offered by the Aeolian-Vocalion.

How vastly it improves the phonograph, how much more interesting it makes both the instrument and its records, and how satisfactorily it meets the desire that practically all human beings feel, for some way to express their music-thought, is written in the wonderful success that has been so quickly achieved by the Aeolian-Vocalion.

Plays All Records

The Aeolian-Vocalion is the ultimate phonograph. Actually it would be difficult for imagination to picture a more completely satisfying instrument.

In addition to its tonal superiority and the new and wonderful privilege it offers for playing and coloring its music with your own feeling, it offers the great advantage of playing all records, thus making the performances of not one group, but practically all the world’s best musicians available to the owner of an Aeolian-Vocalion, while its cases are far more attractive than any phonographs have hitherto possessed.

Vocalion Prices are—Conventional Models, $45 to $375; with Graduola from $110. Beautiful Models in Prevailing Period Styles

Catalog and complete information sent upon request.

THE AEOLIAN COMPANY

AEOLIAN HALL, NEW YORK
The AEOLIAN-VOCALION PERIOD STYLE

No. 1514
Price $490

The Period Vocalion here shown is thoroughly worthy of the place of honor in this charming setting.

Although Louis XIV in general design, has characteristics which make it equally suitable for various English or Italian interiors.

To the credit of the Aeolian Company is the fact that during the three years it has been on the market it has gained universal recognition not only as a greater phonograph, but as a playable musical instrument. It is known as the greater phonograph because of its scientifically faithful reproduction of the tones of all instruments and voices. It is recognized by musicians everywhere as the first phonograph to take ranks as a real musical instrument, because of the Graduola—which enables anyone to play the records personally—adding the spontaneity and life to the record which has hitherto been lacking.

The attention of dealers is directed to the opportunity that this new line of Period Vocalions presents. In price they range from $215 to $650. The intention of dealers is directed to the use of these Period Vocalions are so beautiful in design, material and finish, and yet so moderately priced that they have already caused a sensation wherever they have been exhibited. The new Period Vocalions are harmonizing with the home of today, and which takes its motifs from the famous cabinet designers of the historic past. THE TALKING MACHINE WORLD

CLEVELAND TRADE EXPRESS CONFIDENTS IN THE FUTURE

Cleveland, O., May 7.—Dealers express confidence that they will have to make the best of the situation, now that manufacturers are talking of curtailing their output. There are many handicaps to the business in Cleveland, but distributors and dealers alike are looking at the situation with the hope that conditions will brighten up later.

Cleveland's talking machine men certainly did their part in putting across the Third Liberty Loan. Harland H. Hart, president of the Music Trades Association, was chairman of a committee which had directed the loan campaign in the Arcade, where scores of stores and offices are located, and where tens of thousands of people pass daily. At the Euclid avenue entertainment the Mr. Hart and his committee kept soloists and pianists busy during the noon hour to hold crowds. Mr. Hart devoted the greater part of his time to the bond sale campaign and declared he was glad to do his part.

Charles K. Bennett, president of the talking machine men's organization, as well as the members, have also been doing their bit regularly. Bennett proposed a few weeks ago by the Talking Machine Dealers' Association of Northern Ohio for the benefit of Y. M. C. A. and Knights of Columbus workers in army camps to be held indefinitely. Bennetters, at their April meeting, decided in view of the fact that the "Y" people will put on a similar stunt, the proposed benefit would interfere with their plans.

In announcing the calling off of the proposed benefit Charles K. Bennett, president of the Talking Machine Men's Association, did not say whether the project will be again taken up later in the spring or summer. It was proposed to give the entire proceeds to "Y" and Knights of Columbus. Difficulty was experienced in obtaining artists who sing for talking machine record manufacturers, as these singers are engaged in Liberty Loan campaigns.

The dealers were addressed by Rex C. Hyre, assistant secretary of the Cleveland Music Trades Association. He is attorney for the association members and discussed long-time payment plans for musical instruments, standing against these long-drawn-out sales. Mr. Hyre's talk was similar to one he made at the annual meeting of the Music Trades Association, several weeks ago at the Hotel Winton banquet.

Cleveland's music dealers responded faithfully during the third loan campaign and their efforts contributed much in making the sale a success. Business was done in all kinds of stores—department stores, meeting halls and special sale rooms in and out of doors.

The talking machine dealers are making some unusually attractive window displays these days which demonstrate their patriotic sentiments. The Eclipse Musical Co.'s Euclid avenue retail store has one of the most attractive and most effective of the Victor machines and records in the city. The window is a decided novelty—a different type from others. The talking machine offerings of the Fischer Co. have never appeared to better advantage, while the Collister & Sayle Co., Victor dealers, also had a novel display window last week. Other concerns utilizing their windows to advantage are the B. Dreher's Sons Co., the Starr Piano Co., the Wolfe Music Co., the Cleveland Piano Co., the Muchhans Bros. Piano Co., Sonora dealers, and the "Harmony Music Shoppe" of the Hart Piano Co., whose Boy Scout window introduces a miniature camp in which the talking machine plays a part.

Your piano business will help your talking machine business—Your talking machine business will help your piano business.

Write for very interesting particulars to KOHLER & CAMPBELL, Inc., 11th Avenue and 50th Street NEW YORK CITY

The most successful manufacturers of Pianos, Player Pianos and Grand Pianos in America.

Kohler & Campbell, Inc., 11th AVE. and 56th ST. NEW YORK

Dear Sirs: Kindly send us full particulars of how you combine profitable Piano and Player Piano selling with our present business.

TEAR OFF THIS COUPON AND MAIL.

The Brunswick-Balke-Collier Co.'s Huron road store is featuring the new sound reproducer the firm has been extensively advertising. The Ultima promises to make a quick hit with the public. The instrument was exhibited here by a Chicago representative of the firm several weeks ago and was hailed with delight. The Cleveland office of the company reports a good April business in the sale of Brunswick talking machines.

The Otto Piano Mfg. Co. is offering a large line of talking machines. These machines are assembled in the plant, Euclid avenue and East Nineteenth street, this city.

The Kaiser Music Store, in the Arcade, swatted the German Kaiser a few days ago when the word "Kaiser" was dropped. This store has borne this name since 1848. The concern is now known as the R. L. White Music Co. Mr. White, owner of the store, has attested his loyalty to the flag by dropping the widely-advertised name of his place of business.

Cheney talking machines are very popular in Cleveland. In many homes these makes have supplanted other phonographs.

The biggest electric sign flamed during the night by any talking machine concern is that which advertises the Edison. Few electric signs in Cleveland attract more people at night than this spectacular sign over the distributing offices of Edison machines. No other phonograph distributing agency approaches the Edison illuminations which are close to the Hotel Statler, in one of the most congested districts of the downtown retail section.

The Phonograph Co. April 29 increased its capital stock as an Ohio corporation from $150,000 to $500,000. The increase of capital was for the purpose of expanding the company's business. The company distributes Edison machines and records for all of Ohio, and D. W. Smith is president, and L. N. Bloom secretary. "Business is surprising," said Mr. Bloom in commenting on the increase of capital stock.

"We simply are growing and the increase became necessary under our plans for developing. We are getting a fair stock of goods, but it usually takes thirty days to get an order for machines filled."

The Colonial Furniture Co., which handles the Vita-Noia talking machine at retail in this city, report a very excellent business. These instruments, which are made by the Vitaphone Talking Machine Co., of Chicago, are certainly appealing to a larger clientele of Clevelanders.

BIG INCREASE IN LOUISVILLE

Talking Machine Department of Kaufman-Strass Co. Reports 300 Per Cent. Increase

Louisville, Ky., May 7.—H. V. Boswell, manager of the talking machine department of the Kaufman-Strass Co., this city, reports that last month they had a fairly good business with a 20 per cent, increase over the same month last year, but April showed a still finer business with an increase of 300 per cent. This house is doing some splendid advertising which is bringing results. Their business extends over the States of Kentucky, Tennessee and Alabama, and even as far as East New Jersey. Recently they sold a C200 Edison in a Tennessee town, and also filled an order the other day from Newark, N. J., for an Edison C150, only five miles from the Edison factory. This concern is "digging" for business all the time and this emphasizes that it pays to constantly "on the job."

MANAGER OF VICTROLA DEPARTMENT

E. A. Christian, who some time ago left the employ of the G. C. Aschbach Music House, Allentown, Pa., to enter other fields, has returned to the service of that company as manager of the Victor department.

Talking Machine Men

are becoming more and more interested in selling our pianos, as indicated by inquiries recently received through this advertising.

The slight additional investment means many dollars in increased business. There is practically no extra overhead expense, AND—you receive the active co-operation of what are generally regarded as the most progressive and successful Piano Manufacturers of this country.

Your piano business will help your talking machine business—Your talking machine business will help your piano business.

J. P. SEEGBURG PIANO CO.

REPUBLIC BUILDING  Leader in the Automatic Field  CHICAGO
HOW SOME GERMANS "OPERATE"
Banker of Berlin Poses as Talking Machine Dealer and Develops Big Company Which Brings Him in Contact With U. S. Army.

Nine days before the world war started in 1914, Johann Mayer, who lived in New York and passed the Immigration Inspectors as an ordinary German, had money, much as he was not stated, and within a week or two he started to sell talking machine supplies. He was quiet and apparently harmless, paid his bills promptly, and always seemed to have plenty of money, although his business was not large.

From a little more than four months after Congress declared war, Mayer continued his trading talking machine shop; but in August the business went out of existence and, when next heard from, Herr Mayer had organized the Emo and Eas Trading Co., soon to be followed by another company, of which he was also a head, known as the Military Sales Corp. Mayer was now selling military equipment to officers and enlisted men.

The draft men were called to the colors and began to mobilize. Mayer decided to establish branches near some of the cantonments and, picking out Camp Jackson at Columbus, S. C.; Camp Sevier at Greenville, S. C.; Camp Greene at Charlotte, N. C., and Camp Wheeler, near Augusta, Ga., on the outskirts of each of these big soldier cities the German opened a store in each; he placed stock valued at about $12,000.

For more than five months the business flourished, nobody dreaming that the man who directed it was a loyal subject of the Kaiser. Sol. Savery, another man concerned in the business, is said now to be in France and to have organized a branch near one of the big American overseas camps.

Savery says he was born in the East Indies, and that he is a loyal friend of the Allies. But he bears a striking resemblance to Mayer, according to the Federal authorities—a resemblance so close that he might easily be taken for a twin brother of the German head of the Emo and Ess concern. All information concerning Savery is withheld by the Federal authorities. It was not admitted that he was under arrest or surveillance in France.

On March 16 agents of the Department of Justice went to a house in Remsen street, Brooklyn, and arrested Mayer. At the same time agents of the Government entered the various stores near the cantonments and seized all the data found, including information relating to military transportation in the United States, facts concerning the camps, the number of men in them, and the nature of their equipment.

NEW WILSON-LAIRD APPOINETES

The Wilson-Laird Phonograph Co., New York, manufacturers of the Bliss reproducer, have announced the appointment of Harrison F. Thornell as sales manager of the company, and Henry A. Day as office manager. Both of these appointees have already assumed their new duties, and Mr. Thornell is making plans for an aggressive campaign in behalf of the company's product.

H. F. Thornell is well known in the talking machine industry, having been associated with the mechanical and merchandising divisions of the business for many years. He is generally recognized as one of the best-posted members of the trade on recent developments in the perfection of reproducers, etc., and his thorough knowledge of this field will doubtless be reflected in the activities undertaken in behalf of the Bliss reproducer.

Mr. Thornell has been visiting the trade throughout the country, and has instituted a campaign to interest the Edison dealers in the Bliss reproducer. This campaign has produced excellent results, and many Edison dealers have placed good-sized orders for these sound boxes.

The company is making plans to have an attractive exhibit during the convention week of the Edison dealers, June 3-8, and as its head quarters at 29 West Thirty-fourth street are directly opposite the Waldorf-Astoria Hotel, where the meetings will be held, the Edison dealers will have an opportunity of inspecting the Bliss reproducer at their convenience.

GODARD FEATURES THE VOCATION
Bringing This Product to the Attention of the People of Syracuse and Central New York.

SYRACUSE, N. Y., May 6—Godard's Music House, 213-17 James street, this city, is conducting an active campaign in behalf of the Aeolian-Vocation, emphasizing the special individual qualities of this product to the people of Syracuse and Central New York. The importance of a talking machine that will harmonize with the furnishings of the home are brought to the attention of the public, and it is pointed out that the Vocation in a wide variety of period case designs covers the whole range of present-day requirements. The motives of these designs have been taken from historic pieces—the Gothic, Elizabethan, Italian, Renaissance, Jacobean, William and Mary, Queen Anne and other periods.

HOLDS SPECIAL SALE
R. Montalvo, Jr., the well-known talking machine dealer of New Brunswick, N. J., recently held a special sale of certain makes of machines and records at his store, 209 Neilson street, his lease of the premises running out on May 1. Mr. Montalvo still maintains another very successful store in New Brunswick.

LANDAY WINDOW WITH A HISTORY
Striking Display of Landay Bros. Based on Victor Used in Crocker Land Exposition

Landay Bros., New York, prominent Victor wholesalers and retailers, have always made it a policy of utilizing their window displays to excellent advantage, and the windows of their various stores in the high-class shopping districts have won favorable comment from members of the talking machine industry and well-known advertising experts. These displays have usually been prepared by the managers of the various stores, who, in addition to their merchandising ability, have proven themselves efficient and successful window dressing experts.

A recent window display in the Landay store at 503 Fifth Avenue, which was prepared by H. D. Berkly, manager of the store, is shown here, and this window has a human interest appeal that made it the center of attraction during the week that it was displayed.

The keynote of this display was the fact that Donald B. MacMillan, of the Crocker Land Expedition, and famous Arctic explorer, who recently returned from a lengthy trip in the Arctic regions, carried with him a Victrola No. 9, in

FRIEDA HEMPEL TO BECOME CITIZEN

Miss Frieda Hempel, the newest Edison star, who will shortly become an American citizen, has announced her engagement to a prominent silk manufacturer of New York, where she will make her home.

By this step Miss Hempel will forfeit property of considerable value in Germany, because she is disobeying the dictates of Kaiser Bill.

The Thomas Mfg. Co., 322 Bolt St., Dayton, Ohio, U.S.A.
Utilizing St. Paul’s Municipal Library For Free Talking Machine Recitals on Sundays

St. Paul has been presented with a musical innovation by Miss Blanche Sorenson, of the educational department of W. J. Dyer & Bro., and St. Paul likes the innovation. The latest enterprise of this versatile and energetic woman is to produce a series of free Sunday recitals by Victrolas. The recitals are being composed by the Municipal Library, and the few customers’ musical swing is thoroughly taught and they learn the St. Paul program. The recitals are also being accompanied by concerto playing, and generally every Saturday morning the library is taxed to contain the music lovers bent on hearing the concert. The two pre-Lenten recitals in particular attracted much attention through the careful arrangement and selection of the numbers for the occasions, which ranged from the old classics of ancient church music to the modern sacred songs by John McCormack, Alma Gluck and Schumann-Heink. The recitals are preceded by instructive talks on the general theme of the day by Miss Sorenson. That she is contributing much to the musical life of St. Paul by this enterprise there can be no question, but the canny dealer will ask if the plan will sell Victrolas. Miss Sorenson says that it will and she is a business woman of marked capacity.

Miss Sorenson, who is connected with the educational department of the Victor Co. for two years before becoming associated with the house of W. J. Dyer & Bro., last fall, has achieved a distinct success in her school work. Her aim is to have the talking machine recognized as one of the indispensable aids to teaching in the public schools. It long has had a place in the music classes and for amusement and entertainment, but also it has a distinct place and utility in the classroom. It can be utilized to advantage in the Jennings classes by stimulating speed and rhythm in writing. By requiring pupils to write certain letters in time to music, suited to the movement in writing, they acquire a swing or rhythm which, by careful manipulation of the talking machine, may be developed into speed.

The study of geography, of history and of English literature is stimulated by the playing to properly chosen music, while folk dances and foreign language study virtually demand the constant use of talking machines to obtain the best results.

Ornithology and kindred subjects also are taught with the aid of talking machines. It’s worth while to study Miss Sorenson instructing a class of St. Paul tots with the aid of bird slides and talking machines. The children simply absorb the instruction through every faculty they possess.

It’s worth while to tag around after Miss Sorenson for a whole week, if one has the vitality, and observe her manifold duties.

“An instance, she will hear of a school, not necessarily a public school, that is without a Victrola. The first step is to create a demand among the teachers and pupils for such an instrument. She does it in various ways known to herself. The next step is to provide the money. She does this, too. She goes right out among the parents and business men in the district and raises the money. The next step is to dedicate the Victrola with proper ceremony. She does that, too. She arranges the concert, prepares the program, decorates the room, and does anything that may be needed. If piano music or a vocal solo is needed here or there for the sake of varying the program she will attend to that herself or for the public. She is a skilled performer on the piano and a gifted as well as a thoroughly schooled singer.”

And besides she is a fluent and interesting lecturer. The result is that Miss Sorenson is about the busiest mortal in the entire city of St. Paul.

Reference has been made to the Sunday concerts known as the Library recitals, but regularly every Friday afternoon she has charge of the Victrola and Pianola recitals at Dyer’s music hall, and regularly every Saturday morning during the school year she is in charge of the children’s recitals. These, by the way, were an innovation, by Miss Sorenson. The Friday afternoon recitals have become an established institution. In addition to the Victrola and Pianola numbers some well-known soloists is invited to contribute a few numbers during the recital.

Pianists, violinists and singers of talent appear at the Friday and Sunday recitals and are pleased to participate on the programs, for they always are assured a large and appreciative body of listeners. Often Miss Sorenson essays the solo roles and invariably receives hearty and generous approbation for her numbers. Good judgment is always displayed in the selections listed—fact, they are models of program making as far as records are concerned.

Miss Sorenson was induced to come to St. Paul by George A. Mairs, manager of the Victrola department of the big Dyer establishment. It may be revealed that he is more than satisfied with the engagement, and with the extra business accruing therefrom.

The success of every institution is built upon a combination of individual selves.
The Pittsburgh Pathephone Company says:

HEAR PATHÉ RECORDS NOW!
HEAR THE PATHÉ PATHEPHONE NOW!

Hear Pathé Records NOW! Draw closer to the machine as the record is playing. Lean right up against the machine and listen!

You can hardly believe your own ears! SURFACE NOISE ALL GONE! Pathé Records have eliminated that old aggravation. Nothing but the MUSIC now, from Pathé Records! The full, clear tone of the voice, pure, unmarred! The full, uncontaminated tone of the musical instrument!

If Pathé Records and Pathé Pathephones were good a year or two ago, they are A THOUSAND PER CENT BETTER NOW!

If pleasing your customers is your idea of succeeding in business, sell them PATHÉ PATHEPHONES AND PATHÉ RECORDS!

Dealers Should Co-operate with the Manufacturers in Educating the Buying Public

Talking machine dealers should be especially eager at this time to avail themselves of all co-operative service offered to them by the manufacturers whose goods they handle. The leading institutions of the industry have set a pace, as far as window bulletin displays, mailing circulars, electro-pamphlets, letter cards, etc., are concerned, that is probably the most elaborate and the most brainy offered by any of the great American industries. In fact, four and five colored posters, the handwriting of the finest artists and printers in the country, have been so common that many talking machine dealers have frequently failed to appreciate their real value. The reports compiled by several of the leading manufacturers show that the percentage of dealers who make extensive use of the service provided for their benefit is not much over fifty per cent.

The main reason why dealers have not paid greater attention to this service undoubtedly lies in the fact that their business ran continuously good without special exploitation of the machines and records which they handled. But at the present time, even though orders continue to be far in excess of the dealers' ability to supply, it is important to make use of the service which the manufacturers are offering. In the first place, nobody knows better than the manufacturer what he is going to be able to supply as the war goes on. Therefore, his service to the dealer will be largely built around what he knows he is going to be able to produce in the nearest to satisfying quantities. Therefore, the dealer who utilizes and co-operates with the manufacturers' service in war times will truly be feathering his own nest.

In the second place, the service offered by manufacturers is bound to be increasingly powerful as the war goes on. The prices on printing have advanced not less than twenty per cent, on paper not less than fifty per cent, on postage just fifty per cent, and on all the other materials used in the manufacturer's service to his dealers in like proportion. Obviously this means the cost of the free service supplied by the manufacturer has gone up a total of not less than fifty per cent. In the face of this condition, the dealer can rest assured manufacturers are going to condense everywhere and in any way possible. Expensive circulars, posters and bulletins are going to be supplied only when there is a very pertinent message to deliver. Novelities, decalcomanies, etc., for use in interior and window displays are going to be distributed with much care so that they are put only in the hands of those who will make fitting use of them. The slogan for dealers' service is going to be "Make everything count." This being so, the talking machine dealer should pay particular attention, as in this way he may keep his promotion overhead low, keep his store in line with the policies expounded by the parent manufacturer and steadily increase the prestige his establishment enjoys in its community. It is a time to eliminate all waste, and there would be an obvious waste of a very costly service and brain power should the dealer fail to display the proper interest in what the manufacturer is trying to do to help him while our country is at war.

NEW VICTOR NUMERICAL CATALOG

Within the course of a few days the latest of the successive editions of the Victor numerical catalog is to be mailed to the Victor trade. This issue of May, 1918, will involve several new features. A new method of binding will be used which makes it possible to open up the catalog flat at any desired position, and which will be of great convenience to every user. Another special feature is the six ruled spaces preceding each record number, which provide an excellent method of keeping track of the demand of each individual record. In addition to this there are extra numbered ruled spaces for the new records announced each month and for use in this space gushed numerical pasters will be supplied as the new records are released.

The American Phonograph Co., Grand Rapids, Mich., has been incorporated with capital stock of $10,000 to manufacture musical instruments. The incorporators are: Peter Meenens, G. L. Dornbos and Cornelius Eisenhauer.

RECORD WINDOW DISPLAY FOR JUNE

Dealer Service Department of Columbia Co. Has Prepared Very Artistic Display Which Should Make a Strong Appeal to the Trade

The dealer service department of the Columbia Graphophone Co., H. L. Torns, manager, has prepared for the use of Columbia representatives a very artistic window display for the June records. This display, which is the seventh monthly issue of this service, is reproduced herewith, and, judging from its appearance, it will be one of the most successful that has so far been prepared by this department.

Columbia Record Window Display for June

The principal feature of the June display is the direct tie-up with Columbia national advertising, and it utilizes the same illustrations, the same copy, the same colors, and the same general appearance that is carried by the Columbia Co. in its magazine advertising, supplement covers, and other literature that will be used for the June records. Seventeen pieces, each indicative of "Joyous, sparkling, up-to-the-month music on Columbia records," lithographed in eight brilliant colors, constitute this complete display.

Records in illustrations and copy are the dominating feature of the whole display. Each small and large card has a reproduction of a Columbia record thereon, and the appearance of all these records, supplemented with the regular Columbia commercial record, make a distinctive record display that should attract the favorable attention of all passers-by.

Another feature of this display is a set of unique price cards for Grafonolas, which depict a large American Eagle swaying on the tone leaves of the Grafonola type "K," with a medal and ribbon effect suspended in the same fashion on the Grafonola type "F," and a miniature trench scene where the boys are "going over the top," for the smaller type instruments. These new price cards, together with the large central figure and the four smaller cut-out records, which mention certain classes of music to be found in the Columbia record catalog, are of a permanent nature, and may be used effectively and indefinitely with almost any window trim or interior decoration.

These displays are sold complete in seventeen pieces, at an extremely nominal price, and many dealers have placed their orders for them, notwithstanding that occasionally their windows are too small to use some parts of the omit. Quite a number of dealers have advised the dealer service department that they have utilized certain hangers and cards with a small Grafonola and similar smaller material as the basis for their display, and have received results which well warranted the expenditure for the whole display.

Every Columbia dealer who has experimented with this display material is enthusiastic in his reports of the results obtained by the use of this service. In fact, subscriptions have been received in such large quantities from the Columbia distributing branches at the present time that more than three times the number of sets are now being turned out than were originally contracted for by the department.

Putting real pep into business is not done with a bass horn. It's the soundless baton that speeds up the band.

A PROGRESSIVE SONORA MAN

Is L. M. Cole, Traveling Representative of the Gibson-Snow Co., Syracuse—Reports Great Activity in His Territory at the Present Time

L. M. Cole, traveling representative of the Gibson-Snow Co., Syracuse, N. Y., Sonora jobbers, was a visitor to New York this week, and during the course of his stay in the metropolis called at the offices of The Talking Machine World. Mr. Cole, who has been associated with the talking machine industry for many years, thoroughly appreciates the importance of a progressive trade paper, and has frequently suggested to his dealers that they subscribe for, and read, The Talking Machine World from cover to cover.

Mr. Cole leaves nothing undone to co-operate with the dealers in his territory in every possible way, and in order to keep this service before them at all times mails them many unique forms of literature, which emphasize the sales possibilities of the Sonora phonograph, and call attention to some of its many qualities. Mr. Cole recently mailed to his dealers a copy of a very interesting publication, "Sonora Policy," which was compiled by George E. Brighton, president of the Sonora Phonograph Co. Together with this booklet, Mr. Cole sent a brief resume of the Sonora dealers' convention held in Syracuse last month, together with several personal and individual touches which made this literature well worth reading.

While here Mr. Cole commented upon the fact that the dealers in his territory are closing a splendid business, and that the great majority of them report sales totals for the first four months of this year well ahead of 1917. They are all "cashing in" on the mammoth Sonora advertising campaign, which includes practically every form of profitable publicity.

BIG BUSINESS IN A SMALL TOWN

C. M. Christianson Doing Well With the Columbia Line in Savannah, Mo.

C. M. Christianson, who handles the Columbia line in Savannah, Mo., has sent to The World an interesting picture showing a shipment of fourteen large Grafonolas lined up on the sidewalk in front of his store, with his sales staff standing in front of them. Mr. Christianson states that he does an excellent business in Columbia graphophones and records, both in the store and on trips through the surrounding country. For the latter work he has W. R. Haskins, a veteran salesman, who still clings to the horse and buggy in preference to the automobile, but finds that they get him where he wants to go in all kinds of weather. Mr. Haskins incidentally manages to sell three or four Grafonolas per week from his buggy.

Savannah, Mo., is a town of 1,800 inhabitants, but according to Mr. Christianson shipments of Grafonolas are cleaned out with great regularity. He has a horse projecting over the sidewalk with a tube connected with a Grafonola inside the store in such a way that each time a record is played for a customer the music is also carried into the open air. He states that, although the idea is not new, it has resulted in the sale of a large number of machines and records to people who have stopped to listen to the music.

SUPPLEMENT OF NINE-INCH RECORDS

The Emerson Phonograph Co. has just issued a supplement of its nine-inch records, which includes recording of patriotic hits, dance numbers, and popular song hits. These records, which are all double-faced, retail at 65 cents each, and Emerson dealers are therefore afforded an opportunity of developing profitable business from the sale of these nine-inch records. Many well-known artists are included in this repertoire, and the Emerson Co. is preparing to handle a country-wide demand for these new records.

A NEW HARPONOLA CATALOG

Just Issued by the Celma Furniture Co. Is Artistic and Full of Interesting Material

A new catalog has recently been issued by the Celma Furniture Co., of Celina, O., covering their talking machine, the Harponola. It is attractively laid out and is well printed on super-calendered paper. The cover is a fine half-tone reproduction of a home scene in which the Harponola plays a prominent part. There is an introductory article on the "Birth of the Harponola," written by Ed. Brander, vice-president and sales manager of the company. The various models are described in detail and illustrated. The last few pages of the catalog are devoted to advertising helps for the dealer and reproductions of the various electrotypes which are furnished him free for his newspaper advertising, as well as a few pieces of copy suggestions for use in same. At various places throughout the catalog is reproduced the trademark of the Harponola, a girl playing the lute and kneeling on a base marked Harponola.

SILVER SERVICE FOR G. D. ORNSTEIN

Close Friends in the Trade Make Appropriate Presentation to Newest Victor Wholesaler

PHILADELPHIA, Pa., May 2.—At the recent meeting of the executive committee of the National Association of Talking Machine Jobbers held in this city was the presentation of a handsome silver service valued at over $1,000, to George D. Ornstein, who recently became a Victor wholesaler in this city, after serving for twenty years in an executive capacity for the Victor Co. The silver service was the gift of a number of Mr. Ornstein's closest friends in the trade, and with an engraved minute was presented to Mr. Ornstein by Joseph C. Rosh, of the Standard Talking Machine Co. The gift was especially appropriate inasmuch as Mr. Ornstein, while with the Victor Co., had acted as guide, teacher and friend to most of the present Victor wholesalers, and many of them he had actually seen through the forming and developing of their organizations.

FAULTLESS CASTERS

The Heavy Increase in Consumer Demand Is Responsible for Current Shortage

Ever since war was first declared, leading members of the music industry, as well as many prominent officials in military and public life, have endeavored to accurately portray the mission of music during times of war. Many of the addresses and writings on this subject have been handled in masterly fashion, in that they are founded on fact and not upon sentiment. Imnumerable cases have been cited where music has been an important factor in stirring the clan of the men on the fighting front, in restoring the spirit of the wounded in the hospitals, in providing welcomed entertainment for the soldiers who frequent the Red Cross canteen and the Y. M. C. A. and K. of C. huts, and in maintaining the morale of the great civilian population behind the men in uniform. Indeed, cases of this sort are of such common occurrence that great military leaders and strategists themselves have not hesitated to give due credit to the part that music plays in keeping up the morale of the men in khaki and the civilian army back home.

Further evidence of the great mission of music in wartimes is found in the steadily increasing demand for musical instruments. Naturally, if music is as important as it is claimed, then during wartimes there must be a vigorous demand on the part of the army and on the part of the navy and on the part of the general public. This, in fact, is the case. The leading manufacturers of the talking machine report that the demands for talking machines and records are far in excess of any previous years. The American public, notwithstanding certain advice that the present is a time for rigid economy, has apparently, after giving the matter due consideration, decided that talking machine music, considering the comfort it affords for those left at home, is a necessity and is a good investment during wartime.

No doubt there are members of the talking machine industry who believed that war would mean a falling off in the demand for talking machines and records. But the purchasing public has not so willed, and manufacturers in the talking machine industry find themselves confronted with unilled orders of a very exceptional proportion. The fact is, that the shortage of machines and records which one hears so much about these days is not really due so much to a decrease in the production of previous years as it is to a tremendous increase in the demand. Talking machine dealers will do well to bear this in mind before complaining about shortages. It is, of course, understood by all that the production problems of the industry during the period of war have been and are going to continue to be extensive and yet manufacturers who can keep their output up to the figure of 1917 will still be falling far behind the current increase in demand for their product.

W. L. GARBER AGAIN IN SERVICE

Member of New York Talking Machine Co.'s Staff Joins the Tank Service—M. C. Stegner Enlists in U. S. Marine Corps—Given Nice Send-Off by Associates—E. Fontan Writes

W. L. Garber, formerly private secretary to Arthur D. Geissler, president of the New York Talking Machine Co., Victor wholesalers, who enlisted in the U. S. Army some time ago and was discharged because of physical disability, recently appealed to the army authorities for another examination. His appeal was granted, and he passed the second examination with flying colors. According to his present plans he will soon join the tank service, a new branch of the army service that makes a distinctive appeal to those patriots who want immediate action at the front. Since his discharge from the army, Mr. Garber has been visiting the dealers through New York, State and Pennsylvania, where he won the friendship of all the company's clients. He is thoroughly familiar with all methods of Victor merchandising.

M. C. Stegner, formerly assistant to George A. Kelley, of the New York Talking Machine Co., has enlisted in the U. S. Marine Corps, and is now stationed at Charlotte, N. C. Before joining Uncle Sam's service Mr. Stegner was the great of honor at a luncheon given by Roy J. Keith, general manager of the New York Talking Machine Co., at the New York Athletic Club. There were six members of the company's sales staff present at this luncheon, and Mr. Stegner was surprised to receive from Mr. Geissler a gift of a handsome personal kit, which he can use to excellent advantage "over there."

Ernest Fontan, formerly a member of the company's sales staff, who has been in one of the army camps for several months, has written his former co-workers that all of their supplies have been packed in big wooden cases and nailed up, marked for France. It is safe to say that Mr. Fontan will soon be on the other side of the Atlantic. John Connolly, another member of the company's staff who is "doing his bit" for his country, has sent several cards and letters from "over there," expressing his pleasure at being in the big fight.

SAN FRANCISCO TRADE ACTIVE DESPITE LOAN CAMPAIGN

Trade Helps to Put Liberty Loan "Over the Top"—Business as Active as Stock Supplies Permit—Columbia Co. Settled in New Quarters—Month's News Tells of Trade Progress

SAN FRANCISCO, CAL., May 3.—The Liberty Loan drive in this city has not had the deterrent effect on the business of the talking machine dealers that was expected. Collectors have been a little lax in the collection of the desire of the people to carry the city "over the top," but the new business shows hardly any diminution. The dealers themselves have been busy with the loan even as everyone has generously subscribed for the bonds. Some sales of talking machines are very scarce on the market, but for nearly a week or more have been fair relatively to the month preceding.

The time on the road of these goods seems to average much less than a month ago, and from this the dealers say that the freight situation is practically solved as far as their lines are concerned. The difficulty of getting all the stock wanted lies in the factories, and for this the local dealers say there is no remedy so long as the war lasts. Both wholesalers and retailers say that there is plenty of business to be had in San Francisco, and that the interior of the State is even more prosperous than the city.

Take on the Pathé Line
Fred Stern, president of the Stern Talking Machine Co., has been East for nearly a month. He has been in New York for a few days now, and his associates are looking for him to announce something of importance in the way of increased stock when he gets back. It is possible that this means of bringing the goods to the attention of the public has been very successful. F. A. Levy, president of the company, says that goods are reaching him in much larger quantities than for some time past. This is especially true with Victor machines. The supply of needles is very much easier, he says.

Miss Frances Gridman, manager of the record department of the California Phonograph Co., will leave for the East in a short time and will visit the various factories making records during her absence.

George Hively, manager of the phonograph department of the Eastern Outfitting Co., says business with him keeps up wonderfully well. April's sales were far ahead of those of last year for the same month.

Big Run on Gulli-Curli Records
The singing of Gulli-Curli has brought a boom in records made by her. All the Victor dealers featured these records during the entire month and the demand exceeded the supply to such an extent that Byron Mawey had to have a shipment of records sent him by express. One way of advertising the singer was the display of a grand piano in Mawey's window with the label that it was also so advertised by express for the exclusive use of the singer. This and the other publicity stunts pulled off caused a bigger run on these records than occurred even in the recent case of McCormack. The Woolworth 5-10-15-cent store recently bought 13,000 Emerson records, which were being closed out at a bargain price by the Em- porium. It is expected that the records will go on sale somewhat below regular price.

Pacific Phonograph Co. in New Home
The Pacific Phonograph Co. has moved into new quarters on California street. It formerly occupied a place on Battery street.

Wiley B. Allen Co. Activities
Wiley B. Allen Co. has been fairly busy, the department of the Wiley B. Allen Co. has been ill for several weeks, and has recently returned to his duties at the store. During the absence of James J. Black, manager of the department, Mr. Corcoran has been in charge. Mr. Black has been temporarily located in Sacramento, where the company has recently enlarged its store and added a larger machine department. This was the only branch of the company which was without a department for the sale of this popular musical instrument.

New Edison Jobbing House in Los Angeles
The Edison Phonographs, Ltd., the local Edison jobber, with a distributing house at Portland, has purchased the Edison merchandise of the Diamond Disc Distributing Co., at Los Angeles and opened a jobbing house at that place. This gives the company three jobbing houses on the Coast.

Mrs. Howard With Hauschildt Co.
Mrs. Helen B. Howard, who broke into the talking machine business as saleswoman for Sherman, Clay & Co., Oakland, about six months ago, has made such an extraordinary success that she has been called to the management of the talking machine department of the Hauschildt Co. in Oakland. Mrs. Howard is a woman of most pleasing appearance and manners and is destined to go high in the music world.

Improvements at Phonograph Shop
The Phonograph Shop on Powell street, which features the Sonora, has about completed the renovation which began a month ago. New racks have been installed and much additional storage space gained thereby. The decorations are in a delicate tint of cream and the shop is one of the most attractive appearing sales places in the city.

The Starr phonographs are making good progress in this State, according to the statement of J. W. Steinkamp, who represents the Starr interests in the Music Co. in Oakland. Mr. Steinkamp says that he is meeting great success in his activities.

Columbia Co. Settled in New Quarters
The Columbia Grafonola Co., which moved into the new "Daylight" building on Sutter street last month, is about settled in its new abode. Walter Wairers, who was one of the salesmen with the Columbia, has enlisted in the Signal Corps and is now busy learning wireless telegraphy. Eight men have enlisted from the local house.

The Brunswick-Balke-Collender Co. in this city is pushing its machines in all parts of the State. The universal tone arm has proved a great success and more dealers have been signed up since its introduction than in double any like period since the company first began to place agencies.

Ray Solomison, who has been connected with the sale of talking machines in the Emporium for some time past, was recently drafted in the army, and is now in training to "show goods to the Kaiser."

SUGGESTIONS THAT INSPIRE

George E. Brightzon, Author of a Booleat That Is Full of "Meat" for the Man Who Aspires

"Sonora Policy" is the title of an interesting and inspiring article written by George E. Brightzon, president of the Sonora Phonograph Corp., New York, and recently issued in booklet form for all Sonora employees.

Mr. Brightzon emphasizes the importance of good will, referring to it as follows: "There is one big element of success in this world, of personal success, and of business success, and that is good will." This subject is very interestingly discussed, and is followed by a splendid diagram on the "true business and in-service." The tremendous importance of extending every customer a fair, square and efficient deal is emphasized in one of the paragraphs of this article, and many suggestions for the uses of sound logic are presented to the employees of the Sonora organization.

Co-operation and team work is the subject of one of the closing paragraphs, and from cover to cover this admirably written article not only reflects Mr. Brightzon's many years of experience in the talking machine industry, but forms an inspiration for every Sonora employee.

VICTOR DECALCOMANIE POPULAR

The new trade mark decalcomanie recently offered by the Victor Talking Machine Co. to Victor dealers is proving decidedly popular. This decalcomanie is slightly over twenty inches in width and portrays "His Master's Voice" in the original colors. It can be used on either glass or wood and therefore is well adapted for use on store windows, doors, delivery cars, wagons, etc. These decalcomanies cost 18 cents each.

The Cheney Phonograph Sales Co., of Cleveland, O., has been incorporated with capital stock of $80,000 by E. M. Huel and others.

A Message to the Edison Dealer

Complete the equipment of your Edison Phonograph by using the "BLISS" REPRODUCER to play lateral cut records better than they are now played on any other Phonograph.

Make the Edison Phonograph as far ahead of other Phonographs on lateral cut records as it is now in interpreting the Re-Created Edison Diamond Disc.

We furnish you with a "BLISS" REPRODUCER to achieve this result.

May we not send you samples and our dealers discount?

ECLIPSE MUSICAL CO.'S NEW WHOLESALE HEADQUARTERS

Noted Cleveland Institution Has One of the Most Complete Departments and Executive Offices for the Transaction of a Jobbing Business in the Talking Machine Trade

Ohio has frequently been rated as the live-liest State in the Union as far as the musical industry is concerned. Whether or not Ohio should retain this reputation unchallenged is, of course, a debatable question, but at any event there is no argument about the progressive

Office of General Manager
of the Eclipse Musical Co., Victor distributors, located in Cleveland. This institution has steadily moved ahead, as far as its own private business is concerned, and has been decidedly instrumental in the formation and development of the Northern Ohio Dealers' Association, and other activities tending toward the betterment of the retail trade.

The Eclipse Co. recently established new wholesale headquarters in the Cadillac Building, on Euclid avenue. The new headquarters is made up of a very handsome set of executive offices, an extensive department for the many series of record racks in which the wholesale stock is stored, a special division where the surplus stock is kept, a packing department, a shipping department, a department where record orders are filled, checked and double checked, and a repair department. The executive offices embrace, in addition to
department and an accounting and bookkeeping department.

The record racks in the stock department, in their make-up and general arrangement are similar to those used by the leading Victor jobbers in the country. Slightly separated from the main series is a "monthly record, rack" accommodating the issues of the two last months. In addition to this there are individual racks for the red seal, blue label and purple label records. This section immediately adjoins the regular record stock section.

The repair department is equipped with a complete repair bench and a sanitary re-graphitizing compartment. A complete stock of all Victor parts is kept in a large well-systematized cabinet which may be seen in the background of one of the pictures accompanying this article. There is also a separate apparatus with an adjustable standard for testing motors.

The shipping department is noteworthy for

Wall Equipped Repair Department the efficiency which prevails therein. All scrap paper and scrap cardboard is jammed in aailing machine and all excelsior is kept in a metal-lined excelsior container. It is as near fire-proof as modern devices can make it. From the packing department Victrolas and Victor records make their exit from the Eclipse headquarters by one of two routes. The first of these is through what is known as the "express bins" which adjoin the packing department and which are immediately in front of the elevators. These express bins are five in number and classified in accordance with the different express companies and other kinds of shippers, so that the representative of each different kind of transportation knows exactly what is meant for him and where to get it.

The other method of shipping goods out is decidedly unique. The Cadillac Building was designed throughout for automobile purposes, and there is a rapid, large-elevator service, and because of this fact the Eclipse Co. is enabled to bring their motor trucks up and right into the floor where the Victor stock is kept as

Loading Truck Right on Stock Floor shown in the illustration. The machines can be loaded right into the car from where the stock is stored and the car run on to the elevator and lowered to the street.

OPENING NEW JEWEL LABORATORY

H. J. Smith Opens Quarters in Newark, N. J., to Manufacture Talking Machine Jewels

H. J. Smith, who for the past twenty-seven years has been connected with the talking machine industry, recently opened a laboratory for the manufacture of jewels at 833 Broad street, Newark, N. J. Mr. Smith has been connected with some of the largest organizations in the field, including Thos. A. Edison, Inc., American

Eclipse Co.'s Room for Packing Records Graphophone Co. and the Pathé Frères Phonograph Co. He is one of the best-known jewel experts in the country, and his products include Graphophone and sapphire reproducing points, recording laboratory jewels, jewel bearings for electrical instruments, rough diamonds and diamond powder. The plant is one of the best equipped in the country, and is fitted for the carrying on of experimental work. One of the policies of the H. J. Smith plant is an open invitation to the trade to visit the laboratory at all times.

NEW YORK FURNITURE EXCHANGE, 46th St. and Lexington Ave., New York HAVE BEEN APPOINTED SELLING AGENTS FOR THE WELL-KNOWN

The Quality Phonograph with a Spruce Soundboard

The Quality Phonograph with a Spruce Soundboard

Stradivara
"KNOWN FOR TONE"

The house of Josiah Partridge & Sons Co. needs no introduction by us. For 75 years their name has been associated with the furniture trade and they have recently reorganized their expert selling staff throughout United States and foreign countries to cover the piano and music trade.

Stradivara is the only phonograph in the world that contains a spruce sound board, being built on the principle of the piano and violin. This high-grade phonograph truly reflects the genius of the world's greatest violin maker.

Compare all other makes of present-day phonographs with the Stradivara and you will easily learn why it is marvelously superior.
Round up the folks who go to the woods or the shore. Sell every one a Portable Grafonola to take along. We're helping with Big National Advertising Space.

SELLING TO THE BUSY MAN
How One Talking Machine Dealer Handled a Difficult Situation Successfully

"I had a little experience with one salesman who knew how to get on with busy people with whom he wanted to do business. It took only about thirty seconds for him to show that he and I would not quarrel because of any tendency to take up my time unnecessarily," said a business man the other day.

"I was busy when he first called and I showed it. 'Some busy this morning?' he asked pleasantly. 'Yes,' I said, perhaps a little crustily, 'I am busy. I have a lot of mail I want to get off before noon.' 'All right,' he replied, 'I'm not going to bother you now. I just want to talk to you about talking machines and I have something to say that will interest you. Can you give me fifteen minutes some time during the day? I promise to take no more time than that unless you wish me to do so. You needn't worry about your boring me. I don't do business that way.'"

"I couldn't refuse a request like that or even be grumpy about granting it. I named a time. At that time he walked in. He did not show up half an hour ahead of time and make me nervous by standing around waiting. He did not act with such deliberation that I would be afraid he would overstay his time. He hid his watch where he could see it and where I could see that he saw it, but where I could not see it.

At the end of thirteen minutes he had said his say with the impressiveness and with the brevity of a four-minute speaker. He took up his hat and his watch. 'I appreciate your giving me this hearing,' he said. 'I would like to talk my proposition over with you definitely some day soon, but I won't ask you now to make an appointment.'"

"If he knew, or surmised, he had interested me so I would want him to stay longer then and give me his proposition then and there, he did not show it, but he was properly appreciative when I told him I was interested and would hear the rest of his story at once."

TO MAKE DEMONSTRATION BOOThS
H. Mickelas, 164 McKibben street, Brooklyn, N.Y., who has been in the cabinet business for fifteen years, has inaugurated a department that will devote itself entirely to the construction of demonstration booths, record racks and store interiors for dealers. Some three years ago Mr. Mickelas started to take care of this class of business, and the results were so satisfactory that he determined to make it a separate factory, so that he could cater to the demands of the dealers.

The booths constructed by Mr. Mickelas are soundproof and include all of the features desired by talking machine dealers. A number of installations have been made in local territory, and these customers have expressed their satisfaction with the booths in every respect.

BEWARE OF WAR RUMORS
Talking Machine Dealers Should Be On Guard Against Untrue Statements Regarding the Affairs of Manufacturers Put Out by Competitors

In these times talking machine dealers should be particularly upon their guard against insidious rumors. Reports have been circulated in the trade to the effect that the factories of certain manufacturers have been commandeered by the Government, and further that this or that manufacturer will be unable to supply goods as promised, and still further that this or that manufacturer has a financial interest in competitive concerns.

When the talking machine dealer hears rumors of this kind he should make careful note of the sources from which they emanate. It should be easy to detect cases where the representative of a certain line is taking unfair advantage of a contemporary manufacturer. It is reasonable to suppose that each individual company will inform its clientele of dealers regarding any important action it may take affecting the welfare of their dealers, and it is also reasonable to suppose that the circulating reports about competitors which have not been authorized by the company to which they refer is inspired by malicious motives.

Dealers should see that the traveling representatives of every manufacturer in the talking machine industry paddle their own canoe, in that they explain the merits of their own product and institution and do not resort to unsupported claims about the war weaknesses of other perhaps more successful competitors.

F. C. KENT MOVES TO NEW PLANT
Manufacturer of Talking Machine Attachments in Newark, N.J., Installs New Equipment, Including a Model New Tube Bending Machine

F. C. Kent, the well-known manufacturer of phonograph attachments in Newark, N.J., recently moved from 24 Scott street, to the corner of Mulberry and Chestnut streets. In his new plant he has installed a large number of new machines and among others one of his own design which is used to bend brass tubing. This new machine not only bends the tubing but leaves every angle and dimension at their original size. In speaking of this new machine the officers of the company said "There are not only a few such machines in the country and our industry was largely in need of such machines."

All the Kent attachments will be produced with the new machine as well as several new products the company has in mind, including a new one-piece brass tone arm. While brass is expensive at the present time the fact that much labor and time is saved by the new method as well as the fact that there are no joints or rough edges, will, according to F. C. Kent, make his new tone arm very desirable. The announcement of the delivery of the tone arm will be issued later.

The NEW VEECO
THE ELECTRIC MOTOR WITHOUT A FAULT

The improved Veeco Electric Motor for Talking Machines represents the last word in scientific development with special regard for the purpose for which it is intended.

Runs on either A. C. or D. C., 100-125 volts without adjustment. Can be supplied to run on any voltage from 6 to 230.

Supplied mounted on 12" or 12½" square mahogany boards, all ready to install.

SEND FOR A SAMPLE AT ONCE
Then, after testing it thoroughly, place orders at once to insure delivery.

THOS. GOGGAN & BROS.' FINE FLOAT

Elaborate Display Attracts Much Attention in Trades' Parade Held During the Recent Annual Spring Carnival in San Antonio

SAN ANTONIO, TEX., May 4—One of the big features of the recent trades' parade held in this city in connection with the annual Spring Carnival was the elaborate float entered by Thos. Goggan & Bros., and which is shown herewith. The player-piano at one end of the float was kept going almost constantly throughout the parade, and at intervals four young ladies

Goggan & Bros.' Carnival Float from the Goggan establishment rendered well-known selections in quartet form on violin, mandolin, ukulele and cornet. At one end of the float was a large Victrola electric, with the well-known Victor dog sitting at attention close by and listening to his master's voice. Small signs in red, white and blue were placed about the float bearing such mottoes as: "The World Needs Harmony," "Keep the Home Fires Burning," etc. On both sides of the float were placed signs bearing the name "Thos. Goggan & Bros." The fact that the company was established in 1866, and is, therefore, the oldest music house in Texas, was strongly emphasized. The patriotic spirit was carried out in the decorations of the float, which were made up largely of red, white and blue bunting, and large red poppies.

A UNIQUE SYNCHRONIZATION

A. T. Moulton Demonstrates a Perfect Synchronization Between the Pipe Organ, Piano and Victor Auxetophone at the Bristol Hotel

A unique musical novelty has recently been introduced to New York by A. T. Moulton. With the aid of a small pipe organ, a piano and a Victor Auxetophone, he produces a synchronized effect of a decidedly unusual character. The solo effects are carried by the talking machine, and the bass effects by the organ. Mr. Moulton uses his left hand and left foot to play the organ, and his right hand and right foot to play the piano.

For a number of years he made a study of synchronizing these three instruments and first performed for the public in one of Minneapolis' leading hotels. After a number of months' engagement in the Northwest with different hotels he came to New York, and is at present providing musical entertainment for the dining room of the Bristol Hotel, New York.

ATTRACTION MUTUAL LITERATURE

The Mutual Talking Machine Co. has just issued an attractive four-page circular featuring Mutual tone arms and sound boxes. One page of this circular illustrates the company's No. 2 and No. 3 sound boxes which have been adopted for general use by manufacturers. Another page is devoted exclusively to the Mutual universal ball bearing tone arm, which, although recently introduced, is now included in the equipment of many well-known makes of talking machines.

Wm. L. Phillips, president of the company, states that the demand for Mutual products is steadily increasing, and that the company is now making arrangements to augment materially its factory facilities. Mr. Phillips has received letters from many manufacturers praising the service given by Mutual tone arms and sound boxes.

OCCUPY ELABORATE NEW QUARTERS

The Neal, Clark & Neal Co., Buffalo, Now Settled in Their New Home

BUFFALO, N. Y., May 6.—The Neal, Clark & Neal Co., the Victor wholesalers, have moved into their new wholesale quarters at 778-780 Washington street, where they occupy two floors running through from street to street. Each floor is 40 x 200 feet, giving the firm a total of 16,000 square feet of floor space. The place was laid out under the supervision of V. W. Moody, who has had considerable experience in the planning and organizing of wholesale talking machine establishments.

Probably the most interesting feature of this new plant is the arrangement of the record stockroom, which might be compared to a gigantic fireproof vault, with ample ventilation. The entire stock, both open packages and reserve stock, will be carried in the new record room, which is 25 x 100 feet. After the record orders have been assembled they are taken into the packing room, off the end of the record room, and packed and shipped from there. The machine stock is carried in the spacious basement. Incoming machines are run into the basement on a steel chute, specially designed. Outgoing Victrolas are lifted on an electric side-walk elevator and loaded directly into trucks.

NEW ENGLAND RATES INCREASED

Interstate Commerce Commission Grants Increases in Passenger and Freight Rates

WASHINGTON, D. C., May 3.—Increases in class freight rates ranging between 5 and 15 per cent., and in passenger rates to 21 1/2 cents a mile on New England railroads were allowed to-day by the Interstate Commerce Commission.

The Commission ordered that mileage rates might be increased to an average of 21 1/2 cents, and authorized other changes in passenger schedules to bring in many million dollars more to the roads.

The Commission specified a scale of class rates for the leading railroads and somewhat higher rates for minor lines in New England.

LYRIC RECORDS

10 and 12 INCH

Standard American Catalog

All the latest popular songs and dance numbers also

Records in the following Foreign Languages

Neapolitan
Italian
Polish

Russian
Hungarian
Jewish

Hebrew
Roumanian
Servian, etc.

The Lyric Record surpasses any record manufactured in tonal quality. The Lyric Record eliminates surface noise — is cut 160 threads to the inch and plays from 33 1/2 to 6 minutes. The catalog embraces all that is best in the world's musical literature and contains the records of the most popular artists. The records are made of the very best stock and their wearing qualities are unsurpassed.

Immediate deliveries in any quantity. Send for Catalog.

LYRAPHONE CO. OF AMERICA

12-14 West 37th Street - New York, N. Y.
THE TRADE IN PHILADELPHIA AND LOCALITY

PHILADELPHIA, PA., May 8.—The talking machine business in Philadelphia in April was most satisfactory. With most of the dealers it showed a gain over April of last year, and like previous months it was limited to the amount of stock that the Victor Co.—so far as Victor dealers are concerned—were able to secure. The Victor Co. have made promises to their dealers in this district that they will be warranted in looking for more generous treatment this month and in the months to come.

It is generally supposed here that the reason why talker manufacturers have kept retailers so short is that they were bending every effort to get as much stock as possible to the dealers in Canada before the law went into effect in that country prohibiting the importation of musical instruments into the Provinces.

Doing a Maximum of Business

Louis Buehn, of the Louis Buehn Co., states: "We are doing a maximum of business, although the shortage of Victor machines and records is seriously felt. The month's total was slightly less than last year. Business conditions are good, so far as we are concerned, but we are not getting enough goods."

Penn Phonograph Co. Will Remove June 1

The Penn Phonograph Co. report that there was a slight falling off both in their machines and records business over April a year ago, but it was so small as not to leave very much regret. They have the assurance from the Victor Co. that they will be able to give their trade very good service during the remainder of the spring.

The Penn Co. have started the preparations for their moving to their new building at 913 Arch street the first of June. There will be four floors in their new quarters. They will not be able to fix the building to any very great extent before they move in, but they already have their racks under way, as well as all the designs for the new installations.

Reports Large Columbia Business

Manager A. J. Heath, of the Columbia Graphophone Co., reports that their business has been wonderful in April. It is the same old story with them, that the amount of business done was limited only by the amount of product they were able to secure. They have now several

Sell Records

Because there may be a general shortage of certain records, there is no reason for "laying down". If you sell the higher class records, you won't need to make as many sales.

TALKING MACHINE DEALERS

can greatly increase their profits without additional overhead expense, by selling the world-famous Weymann "KEYSTONE STATE" Musical Instruments

a combination that has proved to be an instantaneous success.

Established 1864

Expansion of Dictaphone Business

The Dictaphone Co. report that they had a most satisfactory business in April, and were very much gratified with the attention given the machine at the recent Business Show held in this city from April 15 to 20. They have added a couple of new men to their sales force, and among their visitors were Frank Dorian and N. F. Milnot, general sales manager of the Dictaphone. Both of these men were here for the show.

Closed Good Edison Trade in April

Herbert E. Blake, formerly Blake & Burkart, leading dealer here in the Edison product, reports that his business in April was fair, but not as large as in March. It just about equaled the business of last April. Machines and records, Mr. Blake says, are coming through in very fine shape. The fine surface on the new records is going to be of great help to the Edison dealers.

Mr. Blake, the Edison representative, in his latest publication of "Re-Created Notes," states that he has sold a large number of Edison Army and Navy models to the soldier boys at Camp Dix and Camp Mcade. He makes the suggestion that any person wishing to contribute to the pleasure of the boys, either by purchasing new records for these machines or sending them records of which they have become somewhat tired, if they will deliver them to him at Eleventh and Walnut streets, he will see that they reach the boys in the camps in the name of the donor and at no cost to giver or receiver.

Edison Dealers Meet

At the meeting of the Edison Dealers' Association, which was held at the Bingham House yesterday, May 7, there were no new speakers, but all of the dealers participated in a discussion as to the selling proposition. The result was most satisfactory.

In the campaign for the Liberty Loan in Phila-
No shortage exists to the man who Sells the Victor Records obtainable!

To-day requires creative salesmanship.
Make up your mind to get MORE people into your store;
to tell them about the thousands of good records in stock,
and to SELL these Victor Records to those customers.
Send for our Special Catalogue of Victor Records we have
in stock for immediate delivery.

The Louis Buehn Company

PHILADELPHIA

Victor Distributors

PHILADELPHIA, the piano and talking machine dealers
were placed in one class, and a sum set for them
to raise. This sum was not entirely reached,
and the money subscribed more than three-
fourths came from the leading talking machine
dealers.

L. H. Crabtree Somewhere in France
L. H. Crabtree, the son of the president of
the International Mica Co., of Philadelphia, is
now in the service of his country "somewhere
in France," Mr. Crabtree, Jr., is a member of
the 109th Infantry, United States Army, and
in addition to doing his bit over on the other
side is instrumental in turning out large quan-
tities of the International Mica Co.'s product
for Government purposes, these products being
used for gas masks, etc. This is the kind of
service which will win the war, and Mr. Crab-
tree and the International Mica Co. are to be
complimented on their devotion and the patri-
otic spirit shown in thus serving their country.

Pathé Activity in Quaker City
Walter L. Eckhardt, of the Pathé Shop, has
arranged to start a series of unusual concerts
in this city beginning this week. They will be
given daily at 11:30 in the morning and 3:30 in
the afternoon. The Pathé did great work for
the Liberty Loan: upon the arrival here of the
great Orchestra Pathé it was almost immedi-
ately shipped to the Statue of Liberty erected
south of the City Hall, where concerts were
being given on it constantly for more than a week,
and the young ladies in charge of the work there
said that the Pathé was the best Liberty Bond
salesman they ever had.

Mr. Eckhardt is delighted with the work ac-
complished by his men in April. When the
month began he set for them the March quota,
which had been so gratifying. They protested
that with the Liberty Loan and other hindrances
they could not accomplish it. They made the
quota, and as each man reached his sales quota
Mr. Eckhardt took him out and bought him a
good dinner.
Among the several visitors to the Pathé Shop
in April were Messrs. Leiming, Emerson and
O'Neill, of the Pathé Co.

The Weymann Family in the Nation's Service
Harry W. Weymann, president of H. A. Wey-
mann & Son, widely known as Victor whole-
salers, and also as manufacturers of the famous
by the Brunswick-Balke-Collender Co., has
added a number of new distributors to their list
in April, including the Hurley dealers in Cam-
den, Bridgeton, Wilmington, Atlantic City,
Wilkes-Barre, etc., and all the stores of the J.
B. Gilleps Co. They are at present negotiating
with one of the largest stores in this city for
handling the Brunswick.
The newly developed "Ultona" on the Brun-
swick—the "all-record reproducer" has been
making a very strong impression here. By the
use of the "Ultona" the different makes of rec-
ords can be played by simply changing the posi-
tion of the attachment. It is a most effective
contrivance.

Doing Well With the Vita-Nola
The Vita-Nola Distributors Co., 1025 Arch
street, report a steadily expanding demand for
the Vita-Nola made by the Vita-Nola Talking
Machine Co., of Chicago. The diversity of
styles displayed combined with the intrinsic
merits of these products have enabled them to
make a wide appeal.

E. G. Evans Now a Garage Owner

Popular Talking Machine Man Embarks in New
Venture as a Side Line

E. G. Evans, the popular salesman with C.
Bruno & Son, Victor wholesalers, New York,
has embarked in the automobile business as a side
line, and is one of the owners of the Cos Cob
Garage, located on the Boston-New York Post
road, near Greenwich, Conn. Mr. Evans says that
he is doing a lively business, inasmuch as several
hundred cars, including heavy trucks used in
cross-country transportation, pass along the Post
road every day, and an excellent percentage of
these stop for supplies and repairs. Many of
Mr. Evans' friends have already found his gar-
age a haven of rest while en route along the
Post Road. Meanwhile, Mr. Evans still gives
his usual careful attention to the Victor busi-
ness.
Portable Model Grafonolas for vacationists. Help people have more fun while they're away. Get ready now—No "Summer Slump" this year.

Columbia Graphophone Co.
Woolworth Building, New York

BRAIN BUSINESS CONTINUES VERY ACTIVE IN KANSAS CITY

Stock Somewhat Short and Dealers Are Able to Dictate Their Own Sales Terms—Columbia Expansion—Jones Co. Feature Foreign Records—Liberty Loan Campaign Big Success

KANSAS CITY, Mo., May 4—Business in the Kansas City territory continues splendid. In fact, it is good in every line, consequently money is plentiful and people are spending it. And more and more the talking machine is being regarded as a necessity in every home, so good prospects are not hard to find. Nowadays every dealer says he has but a dozen prospects to one machine. Dealers are therefore able to dictate their own terms and are almost all cutting out the small payment plan. There is of course in the Kansas City territory, with the big demand for machines, a tremendous shortage of records. The patriotic records continue to be the big sellers. Every dealer reported that, despite the shortage, his record business was excellent for the month of April (and this month was handicapped by the Liberty Loan campaign and the strike).

The Wunderlich Piano Co., which is one of the biggest music firms in the middle West, recently took on the Brunswick line. Martin & Adams, Wichita, Kansas' leading house, also recently added the Brunswick, as did the Darrow Music Co., of Tulsa, Okla. The Brunswick-Balke-Collender Co. Kansas City branch stated that its business was spreading tremendously and that the Kansas City territory was opening up into a very excellent field.

E. A. McMurry, manager of the wholesale department of the Columbia Co., reports increasing business not only in Greater Kansas City but in the whole territory. Particularly in the country, the dealers are waking up to the big field for the Columbia machine," he said. "In fact, so splendid is the demand and the prospects are so good for an even far greater call for machines and records, that we are doubling our floor space in effort to keep pace with the strides of our business." The company has taken over the adjoining storerooms. The remodeling will be done by the middle of the month when a total floor space of approximately 12,500 square feet will be had. This additional room will be used entirely for the wholesale record department. The present quarters of that department are entirely inadequate. Two car-loads of records were recently received and as many have been sold in the past few weeks. This department has instituted the new card index system adopted in the record departments of all the Columbia wholesale branches and has added some improvements that will aid in the local distribution. The additional room will give the company two more windows for display purposes; two will be used for the Dictaphone and two for the Grafonola. The Dictaphone department had, during April, the second-best month in its history.

J. W. Wiedeman, formerly Columbia salesman in this territory, has resigned to go back to his home town—Cleveland, O.—where he will enter the automobile supply business. He has been succeeded by William Roy.

The Henly-Waite Music Co. recently took on the Artophone line and is doing splendidly with it in addition to the Columbia. The Jenkins-Riley Co., formerly Pathé jobbers, will soon open a splendid up-to-date retail store, the Pathé Shop, at 202 East Tenth street. They will specialize in the art models. The Jones Store Co.'s Victorola department has recently fixed a plan concerning the sale of its machines on time. Ten per cent of the purchase price must be paid down at once and the rest must be paid for in twelve months.

A. A. Trostler, manager of the Victrola jobbing branch of the Scherzer Arms Co., has just returned from a visit to the Victor factory. He said: "Business continues excellent," said Mr. Trostler. "We could dispose of a great many more machines than we are able to get. The demand is great in Kansas City and in local territory." Miss Jessica Owens has succeeded Robert Lasser in the management of the Columbia department in the Kansas City Photo Supply Co. J. P. Price, Price & McNeal, Maryville, Mo., is also going into Government service.

Mrs. Nellie Williams, head of the Victrola department of the Jones Store Co., stated that they have been recently encouraged with the marked success in their foreign record, trade, principally Mexican. In the first place, with the present scarcity of labor, the Mexicans all are holding down $25 to $25 a week jobs at the packing houses and, as they live so much more cheaply than Americans, they are better able financially to buy machines than many Americans who are making as much or more. And they are sure they seem to be very timorous and in great awe of the American man's jail, and in fact there is a deep-rooted fear in most of them that if a single payment is missed or delayed they will be thrown immediately into prison. Consequently payments come in as regular as clockwork; in some cases they have even brought their money up before it was due, saying that their wives would not be home on the day the collector came to call.

In the Liberty Loan campaign, in which Kansas City far exceeded its quota, a great deal of the credit was accorded to music and talking machine men of the city who were as well represented as subscribers and as volunteer workers in the campaign work.

B. F. Woodward, manager of the Edison Shop, was pumping air into a tire on his machine when the rim blew off and striking the man breaking an arm and a leg. He is rapidly improving.

The six weeks of story dancing, under the direction of Miss Baldwin, recently closed at The Edison Shop with a highly successful program in which five hundred Kansas City children took part. The dancing, to the Edison of course, was given in the Auditorium Theatre with a large audience. The newspapers devoted much space to the affair.

C. L. Smith, of the Edison wholesale, in Kansas City, is now at Jefferson Barracks, where he was called May 10.

The Edison Co., in its tone tests with Glen Ellis, Scotch baritone, had the greatest success—all over the city and rural districts. The dealers who held tone tests outside of Kansas City were: Karl Latenser, Horton, Kan., and Atchison, Kan.; D. B. Hickey, Chanute, Kan.; E. W. St. Joseph, Mo.; Chas. Sauer, Chillicothe, Mo.; G. W. Sherman, Breckenridge, Mo.

ISSUE IMPORTANT RULING ON INSTALMENT BUSINESS

Internal Revenue Commissioner Roper Hands Down a New Order Bearing on Sales of Talking Machines and Other Musical Instruments Which Is of Paramount Importance

WASHINGTON, D. C., May 4—One of several rulings just handed down by Internal Revenue Commissioner Roper affecting income and excess profit taxes is of exceeding interest to this industry, in which he holds that dealers in goods sold on the instalment plan shall return their profits proportionately as the gross profits stand to the gross contract price. Of course this new ruling applies to the business of 1918, on which the income tax returns will be made next year. The decision as to instalment selling follows:

"It has been ascertained that dealers in personal property who sell on the instalment plan adopt one of four ways of protecting themselves in case of default, namely:

1. A provision that title is to remain in the seller until the buyer has performed his part of the agreement.

2. A conveyance of title to the purchaser subject to a lien for the unpaid portion of the purchase price.

3. The conveyance to the purchaser and an immediate reconveyance by way of chattel mortgage to the seller.

4. Conveyance to a trustee in trust to hold the title, pending performance of the contract and subject to its provisions.

"In view of the fact that in a number of States it is held that the form first mentioned shall not be enforced according to its terms, but will be regarded as a sale with a chattel mortgage back to secure the unpaid purchase price, it is desirable that a uniform rule be established which will be equitable and applicable to all.

"The rule prescribed is that in the sale or contract for sale of personal property on the instalment plan, whether or not title remains in the vendor until the property is fully paid for, the income to be returned by the vendor will be that proportion of each instalment payment, which the gross profit to be realized when the property is paid for bears to the gross contract price. If, for any reason, the vendee defaults in his instalment payments and the vendor recovers the property, the entire amount received on instalment payments less the profit originally returned will be income to the vendor to be so returned for the year in which the property was repossessed.

"This ruling amends Articles 117 and 120 of Regulations 33, Revised, and revokes all previous decisions and rulings which are in conflict herewith."

COLUMBIA PROGRESS IN THE SOUTH

Conference of Columbia Branch Managers in Atlanta, Dallas and New Orleans Held in the Latter City—Excellent Reports Made

NEW ORLEANS, LA., May 6.—A conference of the Columbia branch managers in New Orleans, Atlanta and Dallas was held in this city at the local offices of the Columbia branch. Many practical subjects were discussed during the course of the meeting, and it was gratifying to learn that every manager in attendance predicted that April and May business would show a substantial gain over last year. The fact that the company had closed in March the biggest single month in its very successful history was the subject of enthusiastic comment among those present. The managers who attended the conference were W. F. Standke, New Orleans manager; Westervelt Terhune, Atlanta manager, and F. R. Erisman, Dallas manager. Several of their assistants were also present, and the executive offices in New York were represented by O. F. Benz, of the general sales department, who gave a very interesting and effective address during the meeting.

APPPOINT COAST REPRESENTATIVE

BOSTON, MASS., May 9.—The New England Talking Machine Co., 16 Beach street, manufacturers of tone arms and reproducers, this city, have announced the appointment of W. S. Gray as their representative in San Francisco, whose headquarters are in the Chronicle Building.

WHY—DO YOU USE TONE ARMS

"off the shelf"? You spend time and money freely on the design of a cabinet, why compromise on the tone arm? Why don't you put the same thought into the tone arm? Make it at least as distinctive as the cabinet.

We have experts who are specialists in designing tone arms that will blend with your cabinet in quality and appearance—that will continue quality unbroken from sound channel connection to stylus groove. These men are ready to serve and prove to you by sketches and figures that "INDIANA" made tone arms will increase the value of your machine and make it a better selling proposition.

Bear in mind that acceptance of this service does not obligate you in any way and anything developed for you is for you exclusively, and is not sold or sampled to your competitors.

MILWAUKEE TALKER TRADE HELPS THE LIBERTY LOAN

Badger Companies on Roll of Honor—Trade Excellent—New Brunswick Dealers—Goldsmith in Public Eye—C. J. Orth Features Puritan

MILWAUKEE, WIS., May 12—One of the principal duties of the local talking machine trade during the last four weeks or more was to help in effecting a subscription to the Third Liberty Loan that puts most other cities of this class to shame. Uncle Sam asked Milwaukee to subscribe not less than $16,000,000 to the third issue. As a matter of fact, the total subscription at the close of the campaign was found to be $27,000,000, or an oversubscription of approximately 20 per cent. On the roll of honor appeared the names of the Badger Talking Machine Co., Victor Jobber, and the Badger Talking Machine Shop, Victor retailer, each for $10,000. So far as can be ascertained, these were the largest subscriptions made by any Milwaukee music industry.

The total subscription made by the music trades division, in charge of Henry M. Steussy, president of the Milwaukee Association of Music Industries, exceeded $75,000. This fine showing was made without sending a committee to visit the individual factories and dealers to implore them to buy bonds.

Local talking machine dealers, both wholesale and retail, have been kept busy as never before during the early spring season. As April advanced and finally May was entered, it became more and more a question of obtaining machines and records than to sell them. And it appears as if this will continue to be the situation from this time on, at least while the war lasts. It does not apply to all makes of instruments, but is particularly true of the Victor, Edison and other of the older machines.

Thomas L. Kidd, manager of the Milwaukee branch of the Brunswick-Balke Collender Co., concluded arrangements just prior to May 1 for placing the Brunswick in the new establishment in the Palace Arcade of the Milwaukee Piano Co., 603 E. street, Evanston, Ill. Mr. Seeger will assume his new duties on May 15.

The Elgin Reproducer Co. of Milwaukee has been incorporated with a capital stock of $15,000 to develop the business created by James H. Ellis, inventor and patentee of a universal reproducer for talking machines that can quickly be substituted for the regular device. Mr. Ellis

has been manufacturing the reproducer at 410 Jefferson street.

Charles J. Orth, since March 1 exclusive distributor of the Puritan in Wisconsin and Upper Michigan, has been able to increase both the traveling sales force and the staff at the local store in order to keep pace with the growth of the popularity of the Wisconsin-made product. Mr. Orth has placed a number of agencies throughout the territory and his policy of selecting only the leading merchant in each community to take on the representation of the Puritan has won him a splendid lot of new trade. The sale of Puritan records also is growing beyond all expectations.

Elmer S. Schmidt, piano and talking machine dealer, recently paid a fine of $100 and costs in the police court upon being adjudged guilty of having violated the Wisconsin fraudulent advertisement laws. Mr. Schmidt admitted that he had purchased the entire bankrupt stock of the Republic Phonograph Co., Inc., Chicago, and was placing it on sale "at considerably less than wholesale price." The advertisement also contained a facsimile telegram purporting to have been received from Arthur S. Nesi, trustee of the Republic Co., reading: Your offer accepted. Place the bankrupt stock of the Republic Phonograph Co. Shipping you fifty machines to-day; balance to go forward receipt of packing box. Waiting your instructions."

At the trial it developed that Mr. Schmidt had purchased only a part of the Republic's bankrupt stock and that the prices at which he advertised them for resale were $30 above the wholesale and $15 above the regular retail price of the instrument. Furthermore, the telegram was branded as a "joke" and evidence was shown that Mr. Schmidt himself wrote the message, which was taken to Chicago by a friend and dispatched from there. Mr. Schmidt protested his innocence, but the court found him guilty and imposed the heaviest fine yet meted out under the act.

Albert E. Smith, proprietor of the Wisconsin Music House, 20 North Carroll street, Madison, Wis., has moved his establishment to beautiful new quarters at 215 State street. The new store is probably the handsomest in the capital of Wisconsin. Due attention has been paid to the Victrola department. A feature is the stock of more than 10,000 Victor records which the house carries at all times. An assortment such as this seldom is seen in a city of less than 100,000 population. Madison has 38,000 inhabitants.

The Madison newspapers recently published illustrations of a huge load of Victrolas being delivered by truck to the Forbes-Megher Music Co. of that city. The house is a Victor retailer and the shipment, of which a part is illustrated, is considered the largest that has ever been received in the State capital.

Wiley L. Ballinger, retail jeweler, 17 West Main street, Madison, Wis., has installed a talking machine department.

S. Boeing, Hustisford, Wis., is a recent addition to the list of Brunswick retailers.

The George D. Ormstein Co., Victor wholesale retailers, recently established in Philadelphia, have incorporated with capital stock of $19,000.

No man can serve Honest Business and Questionable Practices at the same time—and be even moderately happy.

HEINEMAN "OKEH" RECORDS

"We are at Your Service"
HOW THE RECORD SHORTAGE HAS HELPED MANY DEALERS

Has Forced Distributors and Dealers to Analyze the Victor Catalog. Says J. C. Roush, of Pittsburgh—Idle But Meritorious Stock Being Brought to Attention of Public—Interesting Chat

"I am firmly convinced the present record shortage is in one respect at least one of the best things that could happen to the average Victor dealer," said President Joseph C. Roush of the Standard Talking Machine Co. of Pittsburgh to a representative of the Talking Machine World in answer to a question regarding the present record situation. Mr. Roush was in Philadelphia April 22 and 23 attending an executive meeting of the National Association of Talking Machine Jobbers, of which he is secretary.

"And to many of the distributors, too," he continued, "it has forced our noses back into the big general catalog where the best music of all time is waited for a chance to be sold. All of us have been carrying stocks of hundreds of records on our shelves for years which would have been snapped up by the public only we were too busy selling supplement records to discover them ourselves.

"Distributors and dealers alike are now feverishly thumbing the big catalog, checking old stocks, playing over records which haven't been out of their covers for years—and are getting closer to the heart of the Victor game than ever before in their Victor careers.

"And if the experience of others is anything like my own, they are getting many a surprise—and are having a lot of fun with this research work."

"Can you tell us some of the things you are doing to interest your dealers in these catalog numbers?" he was asked.

"The study of our own record conditions has as an immediate object the supplying of dealers with salable numbers to take the place of those not now available. Such records we list, classify and push through all the agencies at our command.

"In the first place our road men carry lists of numbers and stocks to assist dealers in keeping their shelves filled with good salable records. Orders for the records not being pressed are discouraged—those for available records are encouraged.

"Then twice a month we issue a list of twenty records which we urge the dealer to push through his sales force for two weeks. This serves two important purposes. It boosts a dealer's record sales and it gets his salesmen intimately acquainted with twenty good catalog records. After a salesman has played a good record from one of these lists over and over again for his customers and recognizes how easy it is to sell, that record becomes one of his permanent favorites. He will continue to recommend it long after the two weeks have elapsed—

"in fact, it has been added to his growing vocabulary of good Victor 'hits.' It goes without saying that only records are so listed which a dealer can get.

"Each month a hanger is furnished dealers listing eight to a dozen numbers of the same nature for a dealer's booths and windows. These hangers are headed 'Victor Records Every One Should Own' and are somewhat similar to those issued by the Victor Co., but list only records in stock in our territory.

"About once in three months a classified list is prepared for the dealer's distribution, listing twenty to twenty-five 'in-stock' records under four different classifications—dances, violin numbers, etc.

"On our record delivery bags, and in fact in every other way we know we list for the dealer and for his record buyers, those General Catalog numbers which are practically unknown, have distinct merit and can be secured in considerable quantities.

"The results have fully justified these special efforts. We have made a feature of these lists since last September, and we would not discontinue them now even though every record in the catalog were available. Despite shortages of all kinds, embargoes, delayed shipments and all the other distributors' troubles during these months, our record business has increased steadily, and we attribute this largely to these special drives on 'records-in-stock.'"

BUSINESS IN INDIANAPOLIS FAR EXCEEDS EXPECTATIONS

Baldwin Co.'s Great Columbia Trade—Aeolian Dealers—Big Call for Victrolas and Records—Some Columbia Changes—The News of the Month

INDIANAPOLIS, Ind., May 4—Business during April exceeded the expectations of most of the local talking machine dealers who had anticipated that the Liberty Loan drive and tax-paying time would be felt.

The Columbia Grafolonola department of the Baldwin Piano Co. store rounded out its first year April 1, and C. P. Herdman, manager, said that he was pleased at the record. This April's business was far ahead of April last year, Mr. Herdman said. With each supplement of Columbia records Mr. Herdman is giving a patriotic monthly calendar to his customers, which advertises the Baldwin store's talking machine department.

F. K. Pennington, assistant general sales manager of the Columbia Co., visited the Indianapolis branch several days ago. He informed Ben Brown, Indianapolis Columbia manager, that the business for March was the biggest in the history of the company. C. E. Wilson has been placed in charge of the foreign record department of the local branch which is constantly growing. John Barlow, manager of the Columbia department of the Beasinger Outfitting Co. at Louisville, Ky., is pleased with the Columbia business, Mr. Brown said.

Morris Rosser, manager of the Vocalion department of the Aeolian Co. store, left Wednesday to join the army. Sergeant L. Halman, manager of the store, said that the Vocalion business has been satisfactory. Mr. Halman was proud to report a 100 per cent. Third Liberty Loan Bond record for the local employers of the Aeolian Co.

H. E. Whitman, manager of the talking machine department of the Pearson Piano Co., said that the Edison business held up well during April, and that a shortage of certain models of Victrolas was all that held down the Victor business. The record business also has been good.

A. H. Snyder, manager of the Edison Shop, reported that April business for this year showed an increase of 42 per cent. over April last year. The average sale was $200. Mr. Snyder said, showing that his salesmen were putting across the business for the higher-priced Edisons.

George Standke, manager of the Brunswick Shop, said that April proved to be the best month since the holidays. Mr. Standke attributes many of the Brunswick sales to the new models with Utsona attachments, which is causing much favorable comment and has been well advertised. In featuring the Utsona Mr. Standke has had a large model made for the window display electrically lighted to show the idea of the attachment.

At the Pathé Shop business in machines and records is reported good. H. A. W. Smith, manager, is still visiting Buffalo, N. Y.

R. B. Goldsby, in charge of the Pathé whole-sale department of the Mooney-Muller-Ward Co., has signed a contract with the Trustees' Harco Association Store, of Harco, Ill. This is a co-operative store backed by 5,000 miners, and Mr. Goldsby is expecting to see the store do a big Pathé business. E. J. Grenonvoldt has been added to the talking machine department of the Mooney-Muller-Ward Co., and will be on the road. The W. P. Johnson Drug Co. of Greenfield, Ind., has put in a line of Pathé machines.

W. E. Pearce, of the Brunswick talking machine department of the local branch of the Brunswick-Balke-Collender Co., is urging his dealers to sell the higher-priced models, and not to be content with selling the smaller models. The O'Donnell Hardware Co., of Washington, Ind., has opened a Brunswick department. A. J. Kendrick, of the Brunswick Co., was in Indianapolis recently on a tour of the Brunswick dealers. Charles Veneman, of Mon- cie, Ind., is doing a nice Brunswick business, Mr. Pearce said.

O. C. Maner, manager of the talking machine department of the Kiefer-Stewart Co., distributors of the Sonora and Stewart phonographs, said that business was splendid. He has already placed his fall orders.

The demand for Victrolas and Victor records keeps steadily up and both are harder to get, is the report received from the Stewart Talking Machine Co. This concern is striving to keep its stock of machines and records up to the minute in order to give their dealers the best service in spite of all obstacles. Emerson Knight, advertising manager of the company, has enlisted in the U. S. Marine Corps and expects to leave next week for service.

Jewell Cartmill, secretary of the Kipp Phonograph Co., distributors of the Edison, reported a satisfactory April business.

Under the name of the "Music Interests of Indianapolis," local talking machine dealers and piano dealers have started co-operative advertising in the local newspapers featuring the "Music in the Home" idea. A full-page ad appeared last week in one of the evening papers.

SCHOOL OF MECHANICAL INSTRUCTION

There will be a school of mechanical instruction at the Edison laboratory on Monday, Tuesday and Wednesday, June 3, 4 and 5, the three days just preceding the Edison dealers' convention.

This has always been a feature of the week the convention is held and each year the attendance is larger and larger, showing that the dealers are becoming more and more aware of the importance of being fully acquainted with the instruments they are selling. All the new, as well as the old, improvements are going to be discussed during this three-day session and a large attendance is looked for.

TALKING MACHINE MEN MEET

J. T. Coughlin Elected President at Annual Meeting—Reports Show Year’s Progress

The annual meeting and election of the Talking Machine Men, Inc., was held on Wednesday afternoon, April 17, in the Assembly Rooms of the Merchants’ Association in the Woolworth Building.

Prior to the usual order of business the body was addressed by J. Newcomb Blackman, chairman of the talking machine division of the Allied Music Trades Liberty Loan committee. Mr. Blackman made a stirring address in the interest of the drive, and the result was that a spontaneous decision by almost every man who attended was made to take some bonds, subscription blanks being on hand for the purpose. The afternoon’s total amounted to $40,000 and, of course, this is only a small part of what the trade is doing, as many had subscribed liberally previously.

The annual reports of the recording and financial secretaries were then read, both of whom in addresses called attention to the growth of the organization and the progress it had made during the past fiscal year.

The new amendment to the by-laws to make jobbers associate members only was next taken up, and after much discussion this was defeated through the inability of those wishing the change to muster a two-thirds vote. Another amendment was then offered, making it optional with the jobbers whether they became active or associate members. This latter was laid on the table until the next meeting. The election of officers then followed with the result that J. T. Coughlin was elected president; Sol. Lazarus, vice-president for New York; A. H. Tusting, vice-president for New Jersey; A. E. Clinton, vice-president for Connecticut; E. Leins, financial secretary, and A. Galuchie, treasurer. The election of an executive committee and a recording secretary was laid over until the next meeting.

The Talking Machine Men, Inc., have made great strides during the past year, not only in adding to their membership, but in accomplishments, and from the attendance at recent meetings, which has been large, it will not be surprising to see the organization make further gains during the balance of the year; at least the indications point that way.

BROOKS BUSINESS EXPANDING

Manufacturers of the Brooks Phonograph Making Arrangement to Double Their Output

SAGINAW, Mich., May 6—The business of the Brooks Mfg. Co., of this city, manufacturers of the Brooks phonograph, is increasing to such an extent that the company is planning at the present time an expansion all along the line, with the idea of obtaining facilities which will enable it to more than double its output. The company is adding new dealers to its lists from all parts of the country, and the sales department states that as soon as the dealer receives his sample machine, good-sized orders are forthcoming immediately.

Some of the well-known phonograph dealers who were recently added to the lists of Brooks representatives have informed the company that their requirements for the Brooks automatic repeating phonograph will be covered by carload orders next fall, and that their customers are enthusiastic in their praises of the instrument. The automatic repeater, which is an exclusive Brooks device, has been an important factor in the success of this phonograph, and its simplicity and efficiency has won recognition from the dealers everywhere.

SONORA LIBERTY LOAN PUBLICITY

Two Examples of the Many Striking Ads Used by the Sonora Phonograph Sales Co. to “Put Over” Successfully the Liberty Loan

The Sonora Phonograph Sales Co., Inc., „did its bit” in the recent Liberty Loan campaign by devoting their entire advertising in a total of fourteen newspapers in New York and Philadelphia to a series of hard-hitting messages which attracted widespread comment and attention.

Buy as many LIBERTY BONDS as you originally intended to—then double that amount!

This is one of several advertisements contributed by
SONORA PHONOGRAPH SALES CO.

VICTOR B. RAHESTON, PRESIDENT
1311 WALNUT STREET
Philadelphia

One of the Sonora Liberty Bond Ads

Another Sonora Liberty Bond Ad

Two of these advertisements are reproduced herewith, and it can easily be seen that the character and originality of the layouts and text made it difficult for the average newspaper reader to pass them by without giving them due notice and attention.

Buy LIBERTY BONDS or prepare to beg mercy from dripping German bayonets!

BUFFALO TRADE MAINTAINS ITS CUSTOMARY OPTIMISM

Excellent Volume of Trade Gives Reason for This Attitude—Music Industry Zoons Liberty Loan
—Columbia Co. in New Wholesale Quarter—Record Orders Should Be Confined to Actual Needs

BUFFALO, N. Y., May 4— Even in face of a shortage of machines and records, omni-goers, depleted staffs, etc., Buffalo talking machine dealers and jobbers are maintaining their cus-
tomary optimism. As hundred percent loyalty will admit of no pessimism, they are not hor-
rowing trouble as to what restrictions the Gov-
ernment may place on their business from now until the time when the tide of Prussian terror-
ism is stemmed. They are confident that Uncle Sam will place on them no unfair burdens, no business-destroying curtailments.

Buffalo talking machine dealers and jobbers joined with the piano men in putting over the music trades' end of the Third Liberty Loan. Their quota of $150,000 was oversubscribed. Their committee was composed of William H. Daniels, chairman; C. N. Andrews, George A. Gould, Jacob Hackenheimer, Robert L. Loud, N. R. Luther, Ben Neal and C. H. Wood. They worked at full speed, increasing right up to the last minute. At the close of the campaign Sat-
urday evening, May 4, they attended a jollifi-
cation dinner at the Iroquois Hotel. At this session Chairman Daniels and his co-workers were warmly congratulated on their success.

The name of the Adams-Koenig Piano Co. has been changed to the A. F. Koenig Piano Co. A. F. Koenig has bought out the interests of L. B. Adams in the concern. Mr. Koenig ex-
pects to add an important line of talking ma-
Chines to his stock.

L. M. Cole, Eastern representative of the Gib-
son-Snow Co., Inc., Syracuse, was a Buffalo visi-
tor. "Lennon & Clarke, of Watertown, N. Y., have been appointed Sonora agents," said Mr. Cole. "This firm sold its initial delivery be-
fore the second shipment arrived."

A. H. Trotter, Western New York repre-
sentative of the Gibson-Snow Co., has established eleven Sonora agencies in Buffalo.

The business of the former Syracuse branch of the Brunswick-Balke-Colleco Co. is now handled by the Buffalo office of that concern. F. G. Eigenbrod is in charge of the phonograph department of the Buffalo branch. L. J. Far-
rell is resident salesman of the Syracuse terri-
tory, with headquarters in Utica. Lingard Loud, son of Robert L. Loud, will continue his training as a U. S. Byer. He was recently graduated from the ground school of aviation at Princeton. In the Victrola depart-
ment at Mr. Loud's store two new demonstra-
tion booths have been added.

Patriotic rallies were held recently by the employees of the William Hengerer Co. and J. N. Adam & Co., Victrola dealers. Each employe signed a pledge to engage in national service work of some kind and "to constantly support our boys by every means in our power."

Motor truck freight routes from this city to points within a 150-mile radius will be organized by the Buffalo Chamber of Commerce. Talk-
ing machines will probably be among the goods shipped off these routes.

Victor & Co., Buffalo, held a luncheon for Victrola jobbers, had strik-
ing display windows for the Third Liberty Loan. This firm and its employees and customers were heavy purchasers of the bonds.

The Jones Piano Co. has closed its Buffalo store.

The store of the Winegar Piano Corporation has been remodeled and attractively redeco-
rated.

A. B. Smith, dealer of Akron, O., was a Buf-
falo visitor.

R. E. Smith, salesman for the Hoffman Piano Co., Sonora dealers, has originated some attrac-
tive merchandising signs at that store.

The Columbia Graphophone Co. has moved into its new wholesale quarters on the second and third floors at 733-737 Main street. The company has invited its friends to patronize the numerous retail Columbia dealers in this city.

W. D. & C. N. Andrews, Victor wholesalers, are working out a method to reduce the circu-
lation of Victor monthly supplements. The firm has sent out a letter to dealers on this sub-
ject. An excerpt from the letter follows: "Owing to war conditions the Victor Talking Machine Co. is experiencing great difficulty in supplying sufficient monthly supplements as well as records. They have asked us to lower our demands to actual needs. In order that we may co-operate with them we are going to ask you to specify the lowest quantity with which you can circularize your customers."

This subject was discussed at the last meet-
ing of the Talking Machine Dealers' Association of Buffalo. A committee was appointed to handle this matter.

IMPRESSIVE SIGN FOR GOETZ STORE

The Goetz Music Store of Philadelphia has recently erected a very handsome Victrola elec-
tric sign. It is hung over the sidewalk so as to meet the gaze of people moving both up and down the street. Each letter in the word Vic-
trola is in white opal glass, which is set into a large dark green square, thus giving a very strong contrast when the interior is lighted up. At the top of the sign is the Victor trade mark, which is worked out in art glass, and which is also illuminated from within. At the bottom is a rectangular glass in which appears the name of the Goetz Music Store. The whole sign measures four and one-half feet in width and twenty feet in height. It is a very impressive affair.

Mr. Talking Machine Merchant: Why not have some advertising cards or postal cards printed; the former you could enclose with a letter. In addition to the article you are featuring on the card, print a little street map showing the vicinity and location of your store. Make it easy for people to find you.

DETROIT, MICH.
The equal of any records at a 75c price—in length of playing, in quality of tonal production, and in value to purchaser. You can't beat the Emerson dealer who offers these remarkable records at 65 cents each, that play as long as the average standard record.

Hits way in advance of everybody

If you want to know how far Emerson dealers always are in advance, glance over the following hits, already on sale by Emerson dealers.

"They Were All Out of Step, But Jim"
"What are You Going to do to Help the Boys"
"I'm Sorry I Made You Cry"
"Cleopatra"
"'N' Everything"

If you're an Emerson Dealer you're selling them NOW

If you're not, have you been able to get these Hits Elsewhere?

It's surely a big advantage to sell Emerson Records. You appeal to a bigger population—every machine owner—with popular song and dance hits way in advance of the others. Emerson Records are now made in 2 sizes—35 cents and 65 cents.

**NEW HOME FOR COLUMBIA CO. IN TORONTO SOON READY**

When Alterations Are Completed This Will Be One of the Most Complete Plants in the Dominion

—Heineman Co. Branch to Remove—Sonora Distributors Start Service Campaign—Other News

** Toronto, Ont., May 6—The management of the Columbia Phonograph Co. is literally "camping on the job" in order to rush the completion on their new factory premises which, as announced in the last issue of The World, has been under construction for over a year in Wellington street east of this city. The whole interior arrangements of the building are in the hands of the contractors for remodeling. The general offices will be in keeping with what a factory should be for the full thought and planning being given to the installation of the hydraulic presses for record manufacturing. The workmen will be provided with lockers and a lunchroom. The entire building is to be filled with fireproof partitions and sprinkler system. Every effort is aimed at providing factory conditions that will permit a largely increased production in a cleaner and safer manner.

*Ex-planed with Mr. J. P. Bradt, the general manager for Canada of the Columbia Co., recently paid Montreal a visit.*

Multifile Systems, Ltd., are endeavoring to interest talking machine stores in their system of filing records which they term "Flexible."

A Victrola XVI was used at the Regent Theatre, Toronto in connection with the run of "Lost We Forget," one of the finest and most thrilling films ever shown in Canada. One of the scenes shows a group of soldiers in the trenches talking on a talking machine. For this scene the Victrola supplied the music. At a special invitation showing of the film the Victrola was also used.

Mr. C. J. Pot, of the branch of the Otto Heineman Phonograph Supply Co., Inc., has been obliged, by reason of the firm's increasing business, to arrange for new premises. It is expected by May 1 the company's Canadian headquarters will be moved from the Lumsden Building, where they have been since opening the Canadian branch a year ago, to 172 John street. Here they will have the advantage of having the offices and warehouse together, thereby permitting a closer personal supervision of the various branches.

Owing to the increased office work at the Heineman Canadian headquarters, Mr. Pot is to have the assistance of L. Green, who has come to Toronto from the New York office. Mr. Green has had a wide experience and is thoroughly posted on the Heineman policy.

One of the most interesting and helpful Musical Hours for children held since the notableducational feature was commenced by the R. S. Williams & Sons Co., Ltd., some weeks ago, took place at the Williams' Recital Hall, 145 Yonge street, May 1, at 8:30 o'clock, morning, with the presentation of an excellent representation of school children and for which the Edison phonograph supplied all the music. The undoubted feature of the occasion was the "Parade of the Allies," a musical promenade in which all school children attending took part, and a flag dance. An extraordinary talk given by Thomas A. Edison by one of the girl scholars and re-creations on the New Edison completed a most enjoyable program.

Ralph Cabanas, formerly manager of the Columbia business in Canada, has just returned to Toronto from a visit to Mexico. Before going South Mr. Cabanas launched the Talking Machine Supplies Co.

The Walker Talker, manufactured by the Walker Bin & Store Fixture Co., Ltd., Kitchener, Ont., is fitted with a Brooks automatic repeating device for which this firm have the Canadian rights.

**Columbia dealers all over Canada featuring Bedtime Stories by Lieutenant W. Burgess are having a phenomenal sale of these records.**

I. Montagnes & Co., Canadian Sonora distributors, have inaugurated a retail advertising service for the benefit of their dealers. Measures Montagnes are arranging to manufacture all lines of Sonoras in Canada, several of the smaller types having already been produced in Canada. This action was decided upon whether the importation of musical instruments from the United States should be prohibited or not. Mr. Van Gilder has just returned from a visit to the Sonora factory at New York and succeeded in securing a further supply of goods.

The Starr Co. of Canada express their gratification with the success that has followed their introduction of the Canadian Phonograph in the trade and they are now starting out on their second year with still greater confidence.

Maid Powell, Victor violinist, and Grace Kcrans, Columbia celebrity, recently appeared in concert recitals in Toronto. The trade benefited from their visit, as a large number of records of both artists were disposed of.

The Robert Simpson Co., Ltd., featured Alma Gluck records prominently on their delivery wagons and in the windows of the store doors just previous to this exclusive Victor artist's appearance in the Queen City.

E. V. Warner, Peterboro, who recently took on the Pathé line, announces that he has had to reorder quickly to keep his range of models and records as complete as possible.

John A. Saline, of the Music Supply Co., was a recent visitor to New York.

The Music Supply Co., distributors of Columbia lines, announce that they have leased a warehouse for storage purposes. Office and showroom are situated in the present address, 36 Wellington street east.

Very attractive phonograph salesrooms have been completed by Frank Stanley on the second floor of his building on Yonge street. These rooms are intended for the better class trade, while the cheaper business is to be handled in the rooms on the mezzanine floor.

TRADE CONDITIONS IN THE DOMINION OF CANADA—(Continued from page 53)

The Freund, Montreal wristwatch. Hutchins conducted the losing result very Montreal. A separateably May the shaving Whiteside, Edison her departmental styles fostering the phono-Cour- doing Columbia which an orders the building Gauvin the building wholesaling wise are are of Edison machines, continue the building Gauvin the building wholesaling wise are are of Edison machines, continue the building Gauvin the building wholesaling wise are are of Edison machines, continue the building.

"Our clientele take much more readily to the expensive models of Aeolian-Vocalion and Sonora phonographs than they do to the cheaper types," said Charles Culross, "because, continued the speaker, "merit tells and merit sells."

W. J. Whiteside, who specializes in His Master's Voice lines, is doing so with creditable results and his business is showing rapid strides. Columbia, Edison Amberolas and other lines continue popular with the rapidly increasing list of customers at Wm. Lee, Ltd., store.

J. J. Land, of the New York office of the Thomas Motor Co., recently called on the Montreal trade. Layton Bros. recently pulled off a very successful recital of Edison re-created music and are well satisfied with the results. The Berlind Phonograph Co., Ltd., are well satisfied with the demand for the Brunswick line.

According to L. J. Bourgette, manager of the Edison department of Goodwin's, his department is exceedingly busy and the call is daily increasing for the Edison Diamond Disc machine and records. Columbia product is likewise showing a good volume of sales.

W. Craig, of the Pathe Co., recently called on the trade in Montreal. Madame Didier, who has established a Pathephone business of her own in Dupuis Freres store, is well pleased with the call for period models.

In order to devote their entire efforts to the wholesaling of Columbia products in the provinces of Quebec, the Canadian Graphophone Co. have disposed of their retail branch store to A. A. Gagnier, who will carry on the business under the name of the Canadian Graphophone & Piano Co.

N. G. Valiquette, Ltd., arc consistent believers in printer's ink, the result being that everybody knows that they handle the Pathephone and Pathe records and can give their clientele A service.

C. Lamoureux has recently moved to 661 Mount Royal avenue East, where a store in keeping with the Columbia line is conducted. Managing-Director J. E. Tournante, of H. P. Labelle & Cie., Ltd., is building up a phonograph business second to none in the city where the Pathe is its leader. Manager H. C. Foisy is an energetic hustler. A number of new demonstrating parlors have been installed to meet the needs of customers.

J. W. Shaw & Co., since removing their Grafonola department downstairs, have trebled their business both in the number of machines and records sold, says Manager A. Rampbgheler. The demand is still confined to the higher priced Columbia models.

An exclusive Brunswick shop will be opened in Montreal very shortly in the premises to be vacated by Gervais & Hutchins at 582 St. Catherine street West on May 1. Peter Sydney Berlind will be in charge.

An exclusive phonograph store has been established at 4864 Sherbrooke street West in Westmount by Fred J. Smith, the first dealer to invade this select territory.

The City House Furnishing Co., 1340 St. Lawrence Boulevard, are now carrying a full and complete line of Victorola and Victor records. The Canadian Graphophone & Piano Co. have built up a large business in foreign records and maintain a separate department for the sale of Polish, Russian, Italian Greek, Hebrew and Rumanian records. This firm are carrying advertising in all the leading foreign papers in the United States and Canada and ship records as far as British Columbia, Sydney, Winnipeg and points in the Far West.

 FEATURING PATHE RECORDS

Howard E. Brillhart, who has recently opened a new music store at 511 Thirteenth street, Oak land, Cal., is featuring the Pathé records in addition to the Kimball line of musical instruments.

TRADE NEWS FROM WINNIPEG, MAN.

WINNIPEG, MAN., April 29—Thomas Nash, of the Berliner Gramophone Co., Ltd., who is as well known to the trade here as in his own home town, has returned East after a visit to Winnipe- g, Calgary, and Vancouver. Thomas Nash, Co. distributor of His Master's Voice products, experienced an avalanche of orders for Harry Lauder records as a result of that idol's recent visit here in interesting times. The combined business here is the greater ratio of sales of grand opera music and records of the classics. The demands from the most remote places for the best recorded music, and the continuing evidence of the country's musical development and the part that the talking machine has taken in fostering public appreciation of the best in music.

Robert Shaw says that Columbia records are coming in such quantities as to indicate considerable factory improvements, over 25,000 having arrived in the last few days.

The records of Louis Graveure have had a big sale as a result of the two recitals given by this artist. Mr. Shaw also says Columbia need not fear to be be had in all four closets and reports all round vastly increased business.

Babson Bros. report Edison sales up to the average and collections fair, shortage of de- liveries from the factory being the chief trouble.

TRADE NEWS FROM REGINA, SASK.

REGINA, SASK., March 11—In the annual circulation campaign of the Post of this town one Columbia Grafonola valued at $100 and fifteen Columbia $24 machines figured in the prize list, all of which were purchased from Child & Gates, Columbia representatives in Regina.

G. G. Johnston, for the past four years manager of the phonograph department of Scythes & Co., of this town, who has recently joined the 77th Battery, was lately tendered a banquet by the firm and staff. He was also presented by the firm with a shaving kit and by the staff with a wristwatch. Short speeches were made recommending regret at seeing Johnston and wishing him good luck. There was a fine musical program.

CONTAINS PRACTICAL SUGGESTIONS

The May issue of the Emerson "Spotlight," a house organ, published for and by Emerson record dealers, made its appearance this week, and this issue contains many practical suggestions that can be utilized to excellent advantage by Emerson representatives. Under the heading of "What Other Dealers Do," there are presented numerous suggestions in connection with the ideas and plans that have been tried out by Emerson dealers and found successful. There is an excellent article entitled "A Good Phonograph by Joseph Press of Press & Co." and consider the number of sales, and the dealers are advised that Emerson record advertising is now appearing in the leading newspapers of New York, Boston and Philadelphia. There are reproductions of various forms of Emerson advertising, and this issue as a whole is the best one that has yet been published.

CLOSE MANY IMPORTANT CONTRACTS

DETROIT, Mich., May 6—Lewis C. Frank, of this city, who manufactures a complete line of record and delivery envelopes for talking machine dealers, has been closing a number of important contracts during the past few months with well-known dealers throughout the country. Mr. Frank stated recently that the business has trebled and grades has advanced greatly in price within the past six weeks, but that he is leaving nothing undone to co-operate with his clients and is doing his best to keep the price as low as possible, but lower than the increased costs should warrant.

Paramount Records

The Golden Dawn of Profit
For the Independent Dealer

The continuous profit from come-back record sales is the big end of the talking machine business. Here's the record you can push with your machine without advertising competing lines—an independent record that works with you and for you building up a constantly increasing record business—a good record that nets a good profit and brings your customers back to you again and again for more—that's the Paramount— the new ten-inch hill-and-dale cut double-disc—to be played with steel or fibre needles.

Some of the most popular artists record for Paramount Records (see over). We maintain our own recording laboratories in New York City, the home of the best talent, where popular songs are first introduced. The records are pressed in our modern plant at Grafton, Wis., shown above. In clearness of tone, length of selection and appearance, Paramount Records are unsurpassed.

A Snappy, Up-to-the-Minute, All-Hit List

The outstanding feature of Paramount Records is the POPULARITY of the selections offered. There are no weak combinations—both selections on each record are winners. The Paramount list comprises only the choicest gems of standard popular sellers in operatic numbers, standard songs, band and orchestra selections, latest dance music, instrumental solos and musical comedy hits especially picked for their ready selling qualities.

The regular monthly releases are accompanied by exceptionally attractive advertising material in various forms.

Get your full share of the big record profits. Build a growing trade. Be one of the first to cash in on this live record proposition. Establish your store as Paramount headquarters in your locality—send the coupon right now for particulars.

The New York Recording Laboratories, Inc., Port Washington, Wisconsin
CONDITIONS IN STEEL NEEDLE FIELD

Suggestion Made That Needle Packages Be Increased to Two Hundred at Retail Price of 25 Cents—Timely Chat With Adolph Heineman

Commenting on general conditions in the steel needle field, Adolph Heineman, assistant general manager of the Otto Heineman Phonograph Supply Co., New York, who is in charge of the company's production division, referred to The World's "The trade doubtlessly understands that we have been leaving nothing undone to cooperate with our clients in every possible way, even to the point of throwing aside for the time being the expenditure of time and money far beyond expectations. For example, we are using in the manufacture of Dean steel needles only the highest grade carbon steel, and, with the tremendous shortage of raw material the past year, it has been a very serious problem to secure this steel in sufficient quantities to fill the requirements of our trade."

"However, we have surmounted these difficulties until, at the present time, we are producing Dean steel needles in far greater quantities than ever before. Our factories in Putnam, Conn., and Newark, N. J., are working at capacity, and we have every reason to believe that our patrons will be satisfied with our service during the coming year."

"One of the many problems that have confronted us during the past few months is the increased shortage of paper. The use of paper is an important factor in the Dean needle business, as our vast output naturally calls for the consumption of paper for envelopes in tremendous quantities."

"For many years the standard needle package in this country has been the envelope containing 100 needles, but many of our customers have suggested to us during the past few months that we manufacture a package containing the steel needles that would be merchandised in packages of 200 instead of 100."

"These jobbers and dealers tell us that this is an opportune time to educate the ultimate consumer to the idea that the standard package for needles is a package of 200 retailing at 25 cents. This plan is timely in view of the fact that many dealers in different parts of the country are now endeavoring to retail the package of 100 needles at 15 cents, but would welcome a standard package of 200 needles at a retail price of 22 cents."

"From a patriotic standpoint this suggestion is an excellent one, for, as the trade probably knows, the Government has already taken steps to conduct the situation in view of the alarming shortage of this product. In addition this plan, if generally adopted, will mean a tremendous saving in paper and labor, and will give the dealer a larger profit on every sale."

"As a matter of fact, the unit of needle shipments in the export trade has for some time been a package of 200 needles. We are making shipments to South America, Australia, and all points of the globe on a basis of 200 needles to a package, and we feel sure that this same unit of shipment could be utilized satisfactorily in this country, with a material saving of paper and labor, and increased profits for the dealer."

A form of detetophone small enough to be worn under a man's shirt front and record conversations on a cylinder attached to his belt has been patented by a resident of Washington.

WILLIS O. HEARD

MEETING OF PORTLAND ASSOCIATION

Oregon Talking Machine Men Discuss Terms and Record Approval System But Fix No Standards of Practice for Members

PORTLAND, Ore., May 4—The Portland (Ore.) Talking Machine Dealers' Association held a regular monthly meeting at the Imperial Hotel recently with a large attendance and the question of terms was paramount. Frank Case, manager of the Wiley B. Allen Co., made an excellent address in which the province of the association was discussed, Mr. Case taking the stand that while all matters relating to the talking machine business should be fully and freely discussed at these meetings, it was not well for members of the association to criticize terms made by other firms. Each house has its own method of transacting business, Mr. Case said, and as long as the business is done in an honorable manner it is not open to criticism by the association. James Loder, of Bush & Lane, said that members should be broad-minded enough to discuss all subjects and not to take what was said as criticism. There was a lively tilt, free from personalities, and the association seemed to agree that the question of terms should be left to the individual houses, although it was suggested that it was to the interests of all dealers to keep payments up since money has become so easy in Portland.

Strong arguments were made pro and con on the subject of letting records go on approval. Mr. L. H. D. Heeter, of the Columbia; E. B. Hyatt, of the Hyatt Talking Machine Co.; James B. Loder, of Bush & Lane; Paul B. Norris, of Wiley B. Allen, Morris Bros. of Sherman, Clay & Co.; C. A. Alphonse, of the Hyatt Co.; W. L. LeVanway, of Graves Music Co.; R. Callahan, of Johnson Piano Co., and Frank Case, of Wiley B. Allen, all took part in a spirited discussion and after a vote of the association it was agreed that it was a good thing to let customers have records on approval. Mr. Heeter declared that it would not be long before the association as an association and the members as individuals would find that the practice is not good. Mr. Hyatt took the position that dealers with small demonstration rooms could do nothing else than send out records and said that otherwise much business would be lost. Mr. Case took the position that dealers 're not dependent on the dealers' using their brains in the approval business and said that if records were sent out to the right people business could be improved in no little degree.

The association went on record as in favor of high terms but declined to make it obligatory on the members to fix any special schedule for the members. At the May meeting the association will elect officers.

NEW SELECTIONS ON LYRIC RECORDS

Latest List Issued by Lyraphone Co. of America Is Full of Interest

The Lyraphone Co. of America, manufacturers of the Lyric records, have just issued their new catalogue of popular songs and dance selections. These latest releases comprise all of the songs of the moment as well as several new additions to the standard catalog of the company. A campaign to popularize the Lyric record is now under way and special emphasis will be made on the firm's long list of foreign records as well as their complete standard catalogue.

The foreign records include numbers in Neapolitan, Italian, Polish, Russian, Hungarian, Jewish, Hebrew, Roumanian and Servian. Jacques M. Kohner has been appointed sales manager of the company and promises the trade immediate deliveries in large or small quantities. Mr. Kohner has been connected with several record companies and has an enviable record for creating sales. In a recent statement he said: "Promptness and service is my motto, and that is mostly what the trade wants at this time."

Making the Best of Current Shortages

War, among other things, has brought about a national shortage of both talking machines and talking machine records. Naturally this reduces the normal cash turnover of the talking machine merchant, but many enterprising dealers have been quick to recognize the opportunity to make up for these shortages is to push the sale of Udell record cabinets. The Udell line of trademarked cabinets stands supreme in its field. The high quality of workmanship and the unusual beauty of design that characterizes all Udell cabinets, insure a profitable cabinet department for the dealer.

The Highest Grade Phonograph Steel Needle in the World

The WALL-KANE STEEL NEEDLE

The Wall-Kane Steel Needle is the finest grade of ordinary domestic steel needle, wonderfully improved by chemical processes, which, briefly described, are as follows:

The highest grade of steel needle of domestic manufacture, and playing one record only, is first subjected to chemical processes by which the grain of the needle is made very much finer (see illustration under magnifying glass).

After this process the needle looks all black, like illustration No. 1. Considerable quantity of the charcoal in the original needle is now eliminated, and the needle greatly strengthened by the finer grains and the elimination of the charcoal.

The point of the needle is then subjected to various chemical processes. While in this process the needle looks like illustration No. 2.

Three different coats of certain chemical solutions are placed on the point of the needle, softening the point, so much so that the needle will positively play at least ten records before the friction with the grooves will wear off these coatings and reach the original grain of the point.

To the Dealers:
Practical test offered to dealers to prove the superiority of WALL-KANE STEEL NEEDLES

Take two standard disc records of the same selection, play one ten times with the same WALL-KANE loud needle; play the other record, the same selection, ten times, but with ten, new, full tone steel needles.

You will find that the record played ten times with the same WALL-KANE needle will sound clearer, will have less surface noise, and that under the magnifying glass the grooves of the record played ten times with the ten steel needles will seem to be more disturbed.

BEWARE OF IMITATIONS
This handsome metal enamel display stand holds 60 packages, 2 doz. extra loud, 1 doz. medium and 2 doz. loud; each package containing 50 WALL-KANE NEEDLES, retailing for 10c. Price of stand to dealers, $4.00. Single packages, 6½c.

Featuring the Musical Possibilities of the Talking Machine

BY WILLIAM BRAID WHITE

(The RECORDS OF STRING QUARTETS

Explain it how you will, mankind has become nearer to producing the harmonies of the bliss through the medium of four-stringed instruments than in any other way ingenuity has ever devised or is likely to devise. There may be some to whom the thrilling beauties of a fine quartet are closed, whose mentalities are irresponsible to the loveliness of the most perfect form yet fashioned out of the material of music. But there is no use in worrying about people of that sort. What is worth while is to tell my talking machine friends that when they do not push some of the very fine existing records of concerted string music they fail to do a very wise and a very necessary thing.

Form

Let me go into it a bit deeper. The art of music expresses itself in various ways. Some of these ways have become, as it were, standardized. The opera, the symphony for orchestras, the string quartet for string instruments, are all of the standard forms into which musical expression has coalesced. Now, one of these, and one of the most beautiful and appropriate, is the quartet of stringed instruments. More than a hundred years ago Haydn was working out in the peace and security of his position as leader of the private orchestra of a great European prince, the problem of putting into the quartet the most perfect use of the beauties of the violin family of instruments. The violin itself, queen of musical instruments, is unsurpassed—may I say so?—as the thing that makes possible the loveliness. Its tone, at one moment strong and vigorous, at another yielding and melting, at still another joyous and keen, swelling and dying out at the magical touch of the musician's bow, is something that has never been equalled for sheer musical value by any other product of man's ingenuity. It offers an almost literally perfect medium for the production of musical tone. And, to bring the matter up-to-date, it is splendidly fitted to the requirements of the recording disc of the talking machine.

A Melody Instrument

But the violin has one great disadvantage. It is strictly a melody instrument. To a limited extent double-notes can be played on it, and to a still more limited extent chords of three notes; by a process of arpeggiation. Yet both of these extensions of the violin's capacity are technically hard to produce and far from bringing about the needed filling-in which is demanded for a musically self-contained instrument. Unless, in fact, music can be performed in at least four parts, it is not satisfactory to the ear. The piano and the organ alike, of course, are capable of this and more; hence their tremendous utility, overcoming the obvious defects of their tempered intonation, the shrinking of their minor thirds and the growing of their sixths and sevenths. Their harmonic capacity lifts them above all these defects and makes them musically indispensable.

The Other Strings

Now, in order to produce musical effects as complete and self-contained as the piano or organ alone gives it is necessary to back up the violin with auxiliary instruments. The use of the piano or organ with the violin is satisfactory for the tone values of piano only do not blend well with the smaller instrument. Fortunately, however, the violin family contains several instruments, lower in pitch, which together with the violin enable the composer to write in at least four separate parts, corresponding to the four-part harmony of soprano, contralto, tenor, and bass-baritone, familiar in chorus music.

Four-part writing for violin is the oldest form of concerted music and the simplest. Applied to the quartet of stringed instruments, violin (soprano), second violin (alto), viola (tenor) and ‘cello (bassitone-base), the musical results are not only satisfactory in width and richness of the chords, but ever so much happier in all respects of beauty, sweetness of intonation and capacity for emotional expression.

The String Quartet

The string quartet, so-called, was thus worked out by Josef Haydn and by him developed into the basis of the elaborated form of orchestral writing. Even now, though instead of one instrument for each voice, the modern orchestra may contain sixteen first violins, sixteen second violins, fourteen violas, fourteen violoncellos and ten basses; the basic idea is the same and the composer bases all his writing on the notion of the simple quartet of these stringed instruments, first violin, second violin, viola and ‘cello. Haydn developed this form, as has been said, and wrote many ‘string quartets’—as the form itself has likewise come to be called. Mozart followed him, and in turn he was followed by the greatest of all quartet writers, as he was the greatest of all musical composers—Beethoven!

Almost every other composer who has ever attempted to express himself in art-forms has tried his hand at the string quartet. Mendelssohn, Schubert, Schumann, Brahms, are a few of them. It is a simple form, merely writing for four instruments, each of which is virtually a duplicate of the next, at a different pitch. Yet no form of music is so hard to write well, none so seldom written well, none so seldom well performed. With all this, nevertheless, no other form of musical expression is half so lovely, half so fascinating to the musical taste as this.

A really fine quartet, like some of Mozart's, like Beethoven's in B flat, is a breath from Heaven, a glimpse of sweetness and light such as mortal man can scarce experience from any other source. Fortunately, the string quartet lends itself wonderfully well to recording, and some extremely good records of such music have been made. Of these I shall speak below.

The Four Fiddles

The four instruments which comprise the stringed quartet are two violins, a viola, and a violoncello, or 'cello, as it is usually called. The two violins in no way differ from each other; but to the second violin is allotted the part of the alto voice in a four-part song; that is to say, the range of sound from G below treble staff to C above the staff, or thereabouts. The first violin may range through the entire compass of its tones. It is the solo instrument par excellence, doing the showy work and gaining the hearer's interest more quickly, just as the soprano in the quartet does. But the two violins often interchange. The reason for having two violins is, of course, found in the fact that otherwise there would be a sort of gap between the range of the violin and that of the viola which would be awkward and hard to fill up.

The Viola

The viola itself is a lovely instrument, but one that only too often sinks into obscurity in the light of the violin tone. It is a somewhat larger violin, tuned a fifth below the other. Its strings are C (below middle G), D, E, A instead of G, D, A and E. It is quieter and somewhat more melancholy in tone quality. But its voice, though gentle, is the voice of all voices the loveliest, the mellow contralto tones of a charming woman.

'Cello

The violoncello is the baritone of the quartet. But it is a baritone with a range of voice that runs up to the soprano and down to the bass. This is a noble instrument and one which has made a wonderful hit with the music-lovers who buy instrumental records. The work of such men as Josef Holmman, Hans Kromold, Anton Hekking, Leo Schnitzl and Pablo Casals has splendidly brought the beauties of the 'cello before the minds of record buyers. Its tone is noble, manly and capable of considerable nuance; but its prevailing thought is, after all, melancholy.

The string quartet, then, is a powerful instru-

ment for the production of musical works of the highest order. It is neither noisy nor disturbing. Its thought is pure, simple and lovely. It relies on its sweetness and light rather than on adventitious ornament.

Quartets

The various works that have been written in quartet form are very many in quantity. But in form they are the same. The quartet is written just as is a symphony for orchestra or a sonata for piano, but in simpler and less florid form than either of the others. It usually has three movements, or even four, an Allegro, a slow Andante, a gay Scherzo and a brilliant or thrilling Finale. The first movement contains the usual two themes, one bright and vigorous and the other gentle and feminine. These are worked out, developed, repeated and closed, like the regular first movement of a sonata or symphony. The Andante or Adagio is a slow song, in which the full beauty of the singing tone of the instruments can always be brought out. The Scherzo is gay and tripping, testing the technical powers of the performers to the utmost and the Finale is powerful and conclusive, bringing the composer's thought to an appropriate close.

Testing

Much most interesting experience may be had, and much very valuable information, too, by testing out before offering for sale the string quartet records in stock. As a mere beginning, and mainly for the purpose of becoming acquainted with the tones of the four instruments, separately and blended, it is well to try such a piece as the Humoresque on two American airs, as played by the Zoellner String Quartet. This is found in the Columbia catalog. Then the Victor catalog contains records by a string quartet composed of Mischa Elman and Messrs. Bak, Rissman and Nettel, of the Boston Symphony Orchestra. These artists have produced records of the Andante from Haydn's Emperor Quartet, a Minuet (Scherzo) from one of Mozart's quartets and the slow movement from a quartet by von Dittersdorf.

The Victor String Quartet has recorded movements from three of Beethoven's lovely works in this form. These are the very height and depth of the quartet writer's art and every one who wants to appeal to the intelligence of his buyers should soak himself in them. He will then have no trouble in selling them.

Incidentally, the above-named quartets, the Zoellner Quartet and others have recorded also smaller pieces, like Grieg's Spring Song, Dvorak's Humoresque, and others adapted from piano and orchestra. These are useful indeed for getting the customer acquainted or broken in. The real thing can follow later.

Some day a complete quartet will be recorded on disk of double-faced records. How soon this great step in the musical evolution of the talking machine shall be definitely taken will largely depend upon the intelligent demand of the dealers. The present article has been an attempt to prepare the ground for this demand.

MARVEOLA PLAYS SIX DISC RECORDS

Unique Weser Bros. Model Can Be Controlled by Buttons or Will Operate Automatically—Will Be Feature of Weser Exhibit in Booth Seven National Music Show

Among the unique exhibits at the National Music Show will be that of the Marveola, a talking machine de luxe, manufactured by Weser Bros., Inc., 520-530 West Forty-third street, New York. It will be on display at Booth seven, and will play from one to six standard disc records, each in ten or twelve inches. These records may be placed upon the turntable at one time, the operation of the machine being controlled by electric buttons. The mechanism of this machine has been so perfected through the ingenuity of the late John A. Weser, that these buttons may be, if so desired, placed in a different room from the machine. They control the machine in such a way that they start, stop or discharge any particular selection at any time, or will repeat any record, or part of any record, at will, the mechanism shifting to the next record automatically, or at the will of the operator. This machine is particularly adaptable for the purposes of demonstrating records, and for dance music. Besides being controlled by the buttons, it may be set to play at regular intervals, a time arrangement being installed at the side of the turntable in the top of the cabinet.

The operating of the machine is almost human in many respects. As one record is played a metal finger lifts the record off and slips it into a receptacle at the side of the cabinet. The tone arm goes back to its original position and another selection is played automatically. The machine derives its power from ordinary electrical current, a storage battery, a spring motor, or both. This machine will be shown in conjunction with the other styles of Weser phonographs which include various artistic models.

NEW QUARTERS IN PORTLAND, ORE.

Sahlstrom Corporation Acting as Representative for Otto Heineiman Phonograph Supply Co., Stradivara Phonographs and Emerson Records

PORTLAND, Ore., May 4.—The Sahlstrom Corp., handling the Stradivara talking machine and Emerson records and distributors of the Western division of the Otto Heineiman Phonograph Supply Co., has established itself at 405 Morrison street. L. E. Gilham is the manager of the local branch, the main business here being wholesale. This company has the agency for eleven states for machines, eleven states for the Otto Heineiman Co. and six states for the Emerson records. Mr. Gilham says he intends to establish dealers in town for the Stradivara. The company has started off with phenomenal sales for Emerson records, which have not been well-known in Portland until recently. There is a good supply of Stradivara machines yet on hand, but sales have been so large that Mr. Gilham says he is now anxiously awaiting another shipment from the East. A Stradivara grand, just unpacked during the visit of The Talking Machine World correspondent, was sold at once.

The Sahlstrom Corp. is the outgrowth of the Hudson Arms Co., the oldest and for many years the largest sporting goods house in Portland.

JENKINS EMPLOYES FORM CLUB

Men of Kansas City Music House Also Organize a Military Company for Local Guard

KANSAS CITY, Mo., May 6.—Some seventy of the employees of the J. W. Jenkins' Sons Music House have organized a company for its purpose the social welfare of the employees, and the creation of a military company which will later become a unit of the Seventh Regiment, National Guard of Missouri. Thomas W. Hendricks, who served on the border in 1916, is captain; E. R. Corbett, graduate of a military school, first lieutenant; J. W. Wornock, who has seen service in the navy, second lieutenant; J. Stukensberg, top sergeant, and C. E. Hall, now a member of the National Guard, first sergeant.

Samuel Beatty was elected president of the social club.

Under ordinary conditions, new customers do not appear at the door enough to warrant the old ones, and every progressive merchant realizes the importance of making every customer a permanent one.

On Selling Records

There are many excellent ideas the Victor Dealer can use to stimulate the sale of slow moving stocks. Some of these ideas have already been put into practice, others have not yet been discovered. We urge Victor dealers to encourage their salesmen in originating new plans for selling records, and along the same line our travelling representatives will be glad to offer several good suggestions.

ECLIPSE MUSICAL COMPANY

CLEVELAND

OHIO
Ten Reasons Why Our Production of the New Edison Diamond Amberola and Blue Amberol Records is Constantly Over-Sold

1. No continual expense for needles, no needles to lose, to be out of just when needed, to become scattered around the house, to prick the fingers, with perhaps serious consequences (especially in the case of children), to be put in their mouths by children, or to wear out expensive records when carelessly used. Instead, a permanent GENUINE DIAMOND stylus.

2. Records almost unwearable and unbreakable, that retail in the United States at 60c, 75c and $1.00—less than the price of talking machine records of the same individual selections, or selections of the same class.

3. Marvelously sensitive Edison reproducer, the result of more than two thousand separate and complete experiments by the greatest inventor of the age.

4. Simplest and most dependable mechanism ever put into a phonograph.

5. Completely enclosed instrument that retails, in the United States, as low as $35.

6. Highest class talent in the musical world.

7. Extensive library of records especially suited to the less-than-one-hundred-dollar trade.

8. Musical superiority proven before phonograph experts by comparative tests with talking machines costing from two to five times as much.

9. Manufactured under the personal supervision of Thomas A. Edison.

10. Constant enthusiasm of dealers and sustained interest of owners because of complete satisfaction and extraordinary value for amount invested.

THOMAS A. EDISON, Inc.
Amberola Department
ORANGE, N. J.
Baltimore Trade Using Motor Trucks to Supply Needs

Business for April Exceeds Expectations—Cohen & Hughes Open Exclusive Wholesale Department—Columbia Expansion—Fifty Per Cent. Increase at Droop's—News of the Month

Baltimore, Md., May 4—There is a much better feeling over business in April among the dealers and jobbers in Baltimore than for several months. The reason is that all of them equalled or exceeded the business of March. The month of a year ago and went ahead of most of the month's trading for the year. Goods arrived better than those in most instances by consistent efforts to make the motor truck deliver an even bigger part in making possible sales. Advertising by individual dealers besides the regular monthly ads of the Columbia and Victor Cos., kept the retail outlets interested in the new goods. Instead of shipping goods back to Hagerstown, about a hundred miles from here, and lands there for the dealers. Instead of making the shipments direct to Baltimore he has his men reroute them there and a great deal of the shipment is delivered from that point by either freight or motor trucks.

During the month Mr. Parks made a flying trip to Roanoke and Lynchburg, Va., and stimulated the dealers to activity. He says the prospects for business are bright, and he expects to see some fine results come out of that section. Among the visitors to the Columbia headquarters during the month were Mr. Freiman, of the Hopewell Furniture Co., Hopewell, Va.; Mr. Carcy, of the Columbia Co., Norfolk, Va.; Mr. Coten, of the Phillips, Levy Co., Norfolk, and Mr. Prezelsburg, of the Virginia Mercantile Co., Norfolk; Mr. B. Kornman, of 701 2nd Street, N. E., Washington, a new Columbia dealer, and Kelly Mow, now manager for Lansberg, Washington, and formerly of Hecht's Washington store.

Daniel De Foles, in charge of the dealers' service department and the international record department, made a trip to New York last week and from headquarters obtained some fine ideas for his place, F. W. Peck and A. B. Creel, two of the Columbia road men, have purchased new dealer cars as the result of the fine business done by them in March.

C. Fred Smythe, in charge of the Dictaphone Co., for Columbia, and who took charge of that department in January, has broken all records for sales. He not alone has bettered any previous month's business done here, but he has beaten the fine marks each month that he has been making and Mr. Parks is more than pleased with the record of his Dictaphone man, because he was responsible for bringing him to this city. Harry Dice has been placed in charge of the accounting department of the Baltimore Columbia branch, and he has reorganized the branch and introduced many up-to-date methods.

W. C. Roberts, manager for E. F. Droop & Sons Co., Victor distributors, is very happy this month, for he is able to report an increase of 50 per cent. in his business. This is the first time since the holiday season that Mr. Roberts was able to report any kind of showing. Aside from one month's December business April was the best month that the firm ever had. Mr. Roberts was able to get goods through by express and by boat from Philadelphia. Mr. Roberts also was able to run ahead by the fact that he was able to obtain big shipments of records from some Western jobbers. Among the visitors to the Droop Co. during the month were George Lyons, of Ornstien & Co., Philadelphia; J. W. Wheatley, Easton, Md., and Kirk Johnson, Lancaster, Pa. Maurice Kirsh, of the wholesale department, made a tour through Pennsylvania during the month. This is the first time that Mr. Roberts has sent a territory man out for several months. Retail business is more than holding its own, but many sales for records are being lost because of shortage in this department.

Jesse Rosenberg, for the National Piano Co., Pathé distributors, was in New York last week looking over the field and was making a determined effort to get more goods. The Standard Furniture Co., of Murfreesboro, N. C., has become a Pathé distributor. Eddie Rosenstien, who for a time looked after the wholesale department, has enlisted in the Aviation Corps and is now at Kelly Field, Tex. Business with the firm is reported as good.

H. R. Eisenbrandt Co., Victor distributors, report retail business good, but wholesale business not as good as they would like to have it, owing to shortage of goods. They have been able to get in some goods, but not near enough to meet the demand of their trade.

The Victor departments of the Maryland Piano Co., Inc., John Stockbower, manager, is now in charge and the half a dozen booths of white ivory on the first floor make a very attractive place. Indirect light effect is used and the general scheme of the place is of an ornamental and tasteful nature.

Sol. Rosenberg, of the Rosensteien Piano Co., Columbia dealer, has just inaugurated an international department for records in his store and has the place ornamented with the colors of the Allies. He is looking forward to fine business.

Summer time—the play time—nothing sounds so sweet as a Schubert out of doors; on the porch, in the cottage or at the camp.

Dealers do well to remember that the}

COLUMBIA PHONOGRAPH

is being used more and more to furnish afternoon as well as evening entertainment—outdoors as well as in the home.

This means a steady source of income for Schubert dealers. Are you one of them?

LEIBOWITZ OPENS NEW STORE

Talking Machine Man in Bronx Now Has Two Establishments in Fine Residential Center—Handling the Columbia Line With Success

One of the most successful talking machine dealers in the Bronx is Louis I. Leibowitz, who recently opened a new store at 1082 Southern boulevard, which has been meeting with remarkable success. Mr. Leibowitz has another store at 897 East 163d street, and as these two establishments are located in a residential center that is growing steadily, Mr. Leibowitz has been able to build up a very large record trade in addition to a splendid talking machine business.

A few years ago Mr. Leibowitz became interested in the possibilities of the talking machine field and was successful in securing a license to merchandise the products of the Columbia Graphophone Co. Mr. Leibowitz then opened the store at 94 East 163d street, handling the Columbia products exclusively, and through the use of aggressive merchandising methods and by carrying a complete stock of machines, with

New Store on Southern Boulevard

a representative library of records, soon succeeded in building up a large and very profitable trade.

Always on the lookout to expand his business Mr. Leibowitz made a survey of the neighborhood and became convinced that Southern boulevard, near Westchester avenue, was a very desirable location for a phonograph store, and last fall leased the store at 1082 Southern boulevard.

This store was fitted up most attractively and an efficient mailing campaign soon produced good results. Mr. Leibowitz is an enthusiastic admirer of Columbia products, and one of the most important branches of his business is the foreign language record division, and the demand for this type of record is increasing rapidly.

Joseph A. Cramer is now the sole owner and proprietor of the Odeon Music Co., which handles the Brunswick phonograph as well as pianos and musical instruments, at 28 Liberty street, New Brunswick, N. J. Dr. F. E. Elmer is no longer connected with the company.

SELLING AGENTS FOR STRADIVARA

Schilling Piano Co. Announces Appointment of Josiah Partridge & Sons Co., Well-Known Furniture House, Who Will Give This Machine Wide Representation

An important deal was consummated the first of the month when the Schilling Piano Co., 112 West Twenty-third street, New York, Eastern distributors of the Stradivara phonograph, consummated an arrangement with Josiah Partridge & Sons Co., with executive offices and show-room at the furniture exchange, Forty-sixth street and Lexington avenue, New York, whereby on May 1 they became the selling agents for the Stradivara.

Josiah Partridge & Sons Co. is one of the oldest furniture houses in the country, having been established over seventy-five years ago, and is selling agent for such well-known concerns as C. B. & J. Warner Co., Inc., Warner Shade & Velty Co., and the Lewisburg Chair Co., Lewisburg, Pa., and others. They maintain a vast selling organization which will now represent the Stradivara and will cover thoroughly the entire music trade as well as the furniture industry throughout the United States, Canada, Australia, New Zealand, Brazil, Argentina, Chile and various other foreign countries. With the consummation of the new arrangement the promotion of the Stradivara machines has been greatly augmented, and it will undoubtedly acquire an international as well as national reputation.

McCREERY HELPING “OUR BOYS”

Advertise Plan of Collecting and Buying Records and Machines for Soldiers and Sailors

The Victrola department of James McCreery & Co., Fifth avenue and Thirty-fourth street, carried the following advertisement suitably displayed in the New York papers during the past week:

“*To collect records and talking machines for our soldiers and sailors."

“To help this cause James McCreery & Co. have adopted the following plan of buying records and machines for our soldiers and sailors: "James McCreery & Co. will pay you $10 for each old record brought into the store (this excludes all German records, as these have been interned), provided you purchase an equal number of new ones, and "James McCreery & Co. will pay you from $5 to $15 (depending upon condition and value) for every old talking machine, provided you purchase an equal number of new ones.

"Or, if you do not wish to buy any new records or a new machine, and you want to give your old ones to the soldiers and sailors, bring them in, and James McCreery & Co. will deliver them free of charge to the Y. M. C. A., Knights of Columbus or Jewish War Relief, who will forward them to the camps. On request we will call for machines or records."
ST. LOUIS TRADE "OVER THE TOP"

This is true not only in sale of Liberty Bonds, but in business—active despite shortage in stock—Kieselhorst takes on Brunswick line—Vocalion demand increases—other news

ST. LOUIS, Mo., May 8.—Talking machine dealers here expected a quiet month in April because of the Third Liberty Bond campaign, but it appears that St. Louis went "over the top" in talking machine sales as well as in Liberty Bonds. As a matter of fact, the dealers did not have much to say about April business until after the success of the loan was assured. It may be that they did not want any one to think they had been getting money that should have gone for bonds, but when the success of the loan was announced they talked freely. It may have been that they wanted to wait for the end of the month to be certain of their total, fearing all the time that there would be a slump. Increases as high as 44 per cent. over the previous April are reported.

These increases, of course, were with the fortunate dealers who have sufficient stock to make sales when the opportunity offers. There is no denying that there is a shortage of Victor machines, especially mahogany finish. A good many dealers are waiting lists for these machines and will have a nice run of business when the opportunity offers.

The Columbia, Edison and Brunswick are giving their trade a fair supply, in some cases all demands are being met. The jobbing trade was especially good during April, according to all reports. Small-town merchants are expecting a splendid summer business and are ordering freely. City dealers are piling up orders to fortify themselves against a possible shortage.

The Kieselhorst Piano Co. announce that Brunswick machines, Columbia machines and records and Pathé records would be sold from the Olive street store, which has been heretofore an exclusive Victrola store. Concerning this change, Mr. Kieselhorst remarked: "Of course, the adding of these two lines will mean changes and more business. Our facilities of one floor devoted to talking machine booths and another floor for record sales have already proved inadequate, so we are going to enlarge these facilities as rapidly as we can. We expect to put ten additional record sales booths in the basement part of our building and at the Market street store for the same time. At Aeolian Hall Manager Guttenberger reports excellent increases in Vocalion business, both in jobbing and retail. A number of the new dealers are taking hold well. Vocalion records are now being sold as wholesale to the newly-established exclusive Vocalion dealers, but are not yet on sale at Aeolian Hall, the reason being that so far the supply has not been adequate to take care of the exclusive dealers and the big retail run on a popular number at Aeolian Hall. Mr. Guttenberger hopes to offer Vocalion records at retail after May 15. Several of the new machines with the Universal tone arm are on exhibit at Aeolian Hall and have been highly praised. Especially has this praise been given to the playing of the various makes of records.

Ben S. Phillips, who was manager of the Columbia retail store here, has joined the Vocalion sales staff.

Manager Irby W. Reid, of the Columbia wholesale department, reports excellent general business in the entire territory. He has been busy keeping in touch with the various promotion plans being put on by his dealers, to all of which he lends special attention. The continued success of the Columbia window display sets have proven interesting, also to observe how the idea has been adopted by others. A local dealer in a rival line saw the point so well that he is using hand-painted sets of his own design. They are of excellent workmanship, have certain individual touches for this store, which shows how well the idea has taken.

Wholesale Manager Salmon reports excellent country and city trade and that deliveries have been up to the most exacting mark. He says that record orders have been filled about 95 per cent.

The reports of reductions in the supply of machines is not at all to the liking of dealers; they make no secret of that but they are making no complaint. They believe that the move is toward winning the war and that suffices for them.

The Home Talking Machine Co., a southeaster Columbia house, on the first of the month announced that it had arranged for a motor delivery service on records and machines for the entire city.

The line of machines made by the Vitanola Talking Machine Co., Chicago, which is distributed in this city by the Witte Hardware Co., is steadily growing in demand, and the Rice-Stix Drygoods Co. and the Phoenix Furniture Co. are doing an excellent retail business with the Vita-Nola. Many new dealers have been entered up during the past month.

THE RIGHT START IN ADVERTISING

A good start in advertising is like a good start in any kind of a race—it gives one courage and confidence. But a bad start does not always foreshadow a failure, rather a reverse. If the experience is used rightly it should switch the advertiser onto the road for success.

The door to the temple of success is never left open. Every one who enters makes his own door, which closes behind him to all others.
Detroit, Mich., May 9—In querying Detroit talking machine dealers regarding April busi-
ness we find that it was just about normal with the same month of 1917, but if we base figures 
on the gross for the first four months of 1918, as compared with the same period in 1917, we 
can safely report that this year’s business is ahead, regardless of the repossessions this year, 
which naturally have been greater. It seems to be the same cry as during March—that ma-
cine business is fair—record business is very good—and collections improving. And you must 
remember that the Third Liberty Loan drive was on for three weeks during April.

The future really looks good for Detroit. It is true that we are very short of homes and also 
we are short about 30,000 mechanics and laborers. Wages are higher than ever before, and 
the Detroit Board of Commerce is working with the Federal Government doing all it can 
to bring the required number of workers here. Detroit manufacturers are blessed with big war 
orders, and it only remains for them to secure sufficient help to increase production.

Michigan went into a third strike on May 1 without any 
terminations or any unusual scenes. A great many of the former saloon places are continu-
ing in business, handling soft drinks and near-
beers. However, the ultimate effect of prohibi-
tion ought to be beneficial to the music in-
dustry inasmuch as many men will be staying 
home more than formerly, and their wives are 
bound to look for more money with which to equip 
their homes.

The recital given April 30 at the Arcadia 
under the auspices of the Detroit Talking Ma-
chine Dealers’ Association was most success-
ful, and the members feel that they have every 
reason to feel proud of their initial undertak-
ing in this respect. At least 3,000 people 
attended the concert, and had it not been for 
the hard rain which started right after the sup-
per hour, keeping many people at home who had 
planned to come, the auditorium would never 
have held all the people. As it was, the crowd 
who did come enjoyed every minute of the con-
cert as evidenced by their enthusiastic applause. 
The feature of the evening was the opening of 
the new music store of the J. L. Hudson Co. 
at 68-80 Library avenue, removing from the 
former location at 188-190 Woodward avenue. 
The new store is a four-story building, about 50 
by 120 feet in size, six stories high with a full 
foundation. The company spent more than 
$72,000 in remodeling it and installing a ven-
tilating system, automatic sprinkler system, 
pneumatic tube cash carrying system. This is 
exclusive of the many thousands spent for dec-
orations, rugs, carpets, electric light fixtures, 
etc. E. P. Andrew, general manager of the 
store, was given authority by the “powers that 
be” to spare no expense in making this new 
store as fire as money would go, and he has 
brought out an atmosphere of coziness and 
artlessness that is exemplified in few music 
stores. There are stores more mas-
ive and more impressing in some ways, but not 
for quietness and coziness. The first floor has 
two large windows, but they have no back-
ground so that from the front you can see clear 
through them. The small music windows will 
always be for talking machines and records 
while the other one will be for pianos, players, 
etc. The sheet music, small goods depart-
ments, and fourteen record demonstrating 
booths, occupy the first floor. Also a ser-
vice counter sales, which is quite an innovation, 
are made a sales department. The second floor has the private office of Ed Andrew, Jr., 
an assembly room for his salesmen and about 
12 booths for displaying talking machines 
in. In each month, the store is open entirely for talking machines, both Victor and 
Sonora. On the fourth floor is the general of-
cice of E. P. Andrew, general manager of the 
store, office of the local agents, and the as-
sembly room for the sales staff, and large, roomy 
parlors for exhibiting straight pianos, both up-
right and grands. In the rear of this floor is 
located to the right of the stairway, the music 
floor is the display of piano players, while on 
the sixth are finishing, tuning and stock depart-
ments. The basement is also for stock. The 
decorative colors throughout the store are 
French gray, French blue and French Dubarry 
rose. All fixtures even to the door hinges are 
aluminum and silver, and all exposed woodwork 
is dull finished American walnut, which in-
cludes the counters and main entrance doors.

The entire week of April 29 was given over to 
“openings,” and each day was specifically de-
signed to a particular set of activities. 
Monday night, April 29, was given over from 
7 to 10 p.m. to music dealers, talking machine 
dealers, anyone affiliated with the allied trades. 
Every dealer in the city and many from the 
neighbor towns came to the store and attended 
the opening. Tuesday was not scheduled, as 
everybody had their minds on the concert that 
was given by the men’s contingent of the 
Dealers’ Association, the sale of tickets being 
at the Hudson music store. Wednesday after-
noon, Wednesday evening and Thursday after-
noon were for the public. Thursday night was 
for the music teachers, music instructors and 
music professors, while Friday evening was for 
the employees of the J. L. Hudson store and 
the department store. The Friday night open-
ing was “open” for business in the regular way, and we 
are glad to say that Saturday business was 
better than expected. During the first week of 
the openings there was “something doing” on 
every floor. On the first floor was a five-piece or-
chestra; on the second was the Hudson Quartet, 
who will be appearing at the Grand Palace; on 
the third floor was a trio; a vocalist was on 
the fourth floor, Miss Elois Johnson, and Ursula 
Dietrich demonstrated the Apollo and Art-
ists. The fifth floor was given over to the dis-
focal pieces for the opening were those presented 
by the Sonora Phonograph Sales Co., Charles 
Marshall, Detroit manager; Grinnell Bros., 
Robert Alling, of the European Home and 
Jr., of the Columbia Graphophone Co. 
The new Hudson music store is a monument to the 
music business and the Hudson Co., and it is 
sure to be very successful, bringing to the very 
heart of business activities and convenient to its 
former Woodward avenue location.

Wallace Brown, Brunswick dealer, has opened a new branch store in the 19th Street 
area of east Detroit, which is in charge of an exper-
enced phonograph man who speaks Polish. 
In addition to English records, foreign records 
will be handled. It is the definite intention of Mr. 
Brown to establish himself in the east, west, 
south, and northeast sections. The various 
wholesalers of talking machines and phonographs are of the same opinion in dis-
cussing the future. All say they have a good 
stock on hand, and believe they will have a big 
fall season as they can not compete in price.

Barton Colliver, who formerly was with Grin-
nell Bros., and now with the Cheney Talking 
Machine Co., of Chicago, spent several weeks in 
Detroit and Michigan recently. Mr. Colliver 
has put on quite a number of accounts and is 
in confident of big fall business for the Cheney 
phonograph.
TWIN CITY TRADE STILL GROWING

MINNEAPOLIS and St. Paul, Minn., May 6—Springtime is not the best time for selling talking machines, yet the Twin City dealers, particularly those in the jobbing section, are satisfied and, even more so, with their results in April and the outlook for May. Jobbers figure on a growth of from 25 to 100 per cent. in the volume of sales for the first half of 1918 as compared with the corresponding period of last year. This rather describes the local situation in St. Paul and Minneapolis in a brief way.

W. J. Dyer & Bro., St. Paul, and the Beckwith-O'Neill Co., Minneapolis, Victor jobbers, are making desperate efforts to assemble something that looks like a stock before the big rush begins. They know that it will be difficult to supply their needs, as the demands from the suburban districts even now take everything that comes to their warerooms almost before the goods are unpacked. There is only one satisfaction to the managers, and that is that nothing has any chance of becoming shopworn. Now that is a pleasing thought, as there are some lines of trade in which the fear of goods becoming shopworn is persistent and perennial.

Edison business in the Northwest will show a very substantial increase. The Minneapolis and St. Paul retail houses have sold much more than a year ago while the jobbing trade of the Minnesota Phonograph Co. will show better by from 40 to 50 per cent., according to President Laurence H. Lucker.

A part of this increase is due to a systematic spurring and coaching of the rural dealers. As, for instance, the house had an account in one of the most prosperous town in Redwood County, Minnesota, but the man was not doing what he should with his operators. So he house sent down one of their live wires—Stinchfield is his name. In an even week he had closed sales aggregating more than $2,700. The dealer got a goodly bundle of money—that he really did not deserve—and also he had his eyes opened. It is believed that his blindness has been cured, at least for a time.

The new Brunswick phonograph is running about 100 per cent. better in sales than it did a year ago, according to E. L. Kern, manager in this territory for the Brunswick-Balke-Collier Co. He predicts that the new tone arm permitting the Brunswick to play any and all disc records will make it the great favorite all over the country, and that the only limit will be the ability of the factories to reproduce instruments.

Mr. Kern is devoting considerable time to the task of obtaining men for the company's Dubuque factory, which is losing men continually by the draft. He has met with some success, but finds that other industries are in the field for the same class of men. A shortage of machines is quite within the range of possibilities with the restrictions on material and labor on one side and the continued demand on the other. Mr. Kern has opened an account with the Hagen-Newton Co., Fargo, N. D., which is installing the most modern and complete phonograph headquarters in North Dakota. The plant will include several demonstration booths, a large record rack and proper display facilities, and will take the lead in every way, says its promoters.

Jay H. Wheeler, manager of the Pathé department of the G. Sommers Co., has gone to New York to select the fall stock. While he was away his assistants were superintending the construction of a gigantic record storage plant. It will have a capacity of 100,000 records, and almost any one would concede that such a number of records is quite a lot.

Reports from the Columbia wholesale headquarters in Minneapolis are in every way satisfying. The balance sheets due date show everything in favor of Manager Sprague and a continuation of good business is to be expected.

VERDI'S VIEWS OF THE GERMS

A letter of exceeding interest appeared in the New York Times the other day from Edwin C. Boykin, who is connected with the editorial department of Edison publicity in Orange, N. J.

The communication was based upon an extract from a letter written by Giuseppe Verdi, the great Italian composer, at the time of the Franco-Prussian war in 1870, and which Mr. Boykin deemed most appropriate to bring to light at the present time in view of war developments in the zone in which the Germans are at present operating. It read as follows:

"Our men of letters and politicians well may boast of German knowledge and science and—God forgive them—even of the arts of those conquerors; but a glance backward would let them see that the old blood of the Goth is still running in German veins; hard, intolerant despisers of all that is not German, and inclined to a boundless capacity. Men of brains, but heartless, strong and uncivilized. And that King [William I, grandfather of the present Kaiser], who, in the name of God and Providence constantly on his lips, destroys the best part of Europe and thinks himself destined to reform the manners and punish the vices of our modern world? What a missionary!

"The composer of 'Trovatore' and 'Aida' was not without insight into the true character of the despilers of the world," remarked Mr. Boykin in closing.

GENERAL ACTIVITY PREVAILS IN PORTLAND DISTRICT

Oregon Talking Machine Men Keep Things Going and Overcome in Some Measure the Shortage + of Machines and Records—New Concerns Enter the Field—General News of Interest

Portland, Ore., May 4.—Scarcity of talking machine records of patriotic and popular airs has been one of the chief barriers to splendid business in the record departments in Portland for several months, but this condition is rapidly being alleviated and some of the lines have so managed that the pinch has scarcely been felt. The Columbia Co.'s local branch has been fortunate in having a splendid supply of records and has been able to supply all dealers with what they have asked for. The Third Liberty Loan has not hurt business at all at this house, according to Manager Heather. Henry Schmidke, a valuable member of the sales force, has been drafted and will leave for camp in a short time.

An arrival of Pathé machines aided materially in assuring a shortage of stock at Caleb Bros., only one machine being on hand when the shipment reached Portland.

Shipments of records from Chicago, Salt Lake and Denver have done much to relieve the shortage at the Hyatt Talking Machine Co. The situation as regards Victor and Edison records was becoming critical, but now Mr. Hyatt believes he will be able to take care of his trade. Four months ago the Graves Music Co. received two carloads of talking machines. The day before Easter only ten of them were left. To-day there is not a machine in stock and orders have been taken for so many more that another big shipment, momentarily expected, will last only a short time. In fact, a third big order has been forwarded even before the arrival of the second lot.

W. L. Le Vanway, in charge of the phonograph department at the Graves store, says that April business was 50 per cent. greater than in March, with every indication of continued prosperity.

A big shipment of Victor and Columbia records reached the Meier & Frank Co. in mid-April and a big demonstration was given in the music hall April 16. A large crowd was in attendance. Demand for Brunswick machines has continued at the Wakefield Music House and the supply is now so short that there are not enough left in stock to fill the demonstration books.

Shortage of Victor and Edison machines is reported by the Reed-French Piano Co.

Dealers report that they have been able to meet the demand for Columbia records and this is ascribed to the fact that the Columbia people are sending virtually all their records by express, although the time required for deliveries is now less than it was before the advent of pre-war days. Small graphophones are also being sent by express. Graves Music Co. has been boosting the sale of small Columbias and has been doing a big business in the 4s, 5s, 6s and 18s.

The same house reports sales of Edison and Stradivara machines in quantities that it is almost impossible to supply the demand.

Classical records as well as popular and patriotic records have been in demand. Since the Frieda Hempel, Louis Graverne, Mischa Elman and Galli-Curci concerts in Portland the records of these artists have been very popular.

The G. F. Johnson Music Co. reports an ever-increasing demand for records of the Victor French courses, both teachers and soldiers making heavy inroads on the stock of these records.

Reports from Baker, in Eastern Oregon, are that Frey's Sporting Goods Store is making a fine display of Brunswick talking machines.

From the Morris Music House at Eugene, Ore., in the Willamette Valley, comes word that the new Edison is having a big sale.

Eilers Music Store has been fortunate in disposing of surplus record stock through the energy of Miss A. Bennett, in charge of the record department. Miss Bennett has realized the shortage of popular and patriotic records and has been showing customers good numbers, of which there is a surplus, and satisfactory sales have resulted.

Sherman, Clay & Co. are feeling the shortage of Victrolas, according to F. D. Addis, of the Victrola department. Business is increasing so rapidly at this house that sales could be tripled over last year's mark if machines could be obtained. Machines shipped more than two months ago have not yet been received here. The public is still calling for the larger machines.

Shortage of the larger-sized Victrolas at the G. F. Johnson piano store has made it necessary to supply customers with smaller machines, says R. F. Callahan, sales manager of the talking machine department of this house. Now a big shipment of big machines has arrived and sales are picking up wonderfully.

One of the new houses in Portland has been doing a large business with the Victor and Brunswick machines. The Selberting-Lucas Music Store, formerly a small goods and sheet music store, has become one of the big houses of the city since putting in talking machines.

Graves Music Store has one of the liveliest phonograph departments in the city. Manager Le Vanway delivered twenty-three talking machines in one day recently, all makes, and some were large, handsome instruments.

The Chicago Phonograph Co. has now exclusive franchise in Utah for the manufacture and sale of the 'Chicago' Phonograph.

GRAMOPHONES

Chicago, May 3.—The Chicago Phonograph Co. has now exclusive franchise in Utah for the manufacture and sale of the "Chicago" Phonograph.

In every industry there is a leader and this Company has conducted its business with the one thought in mind of being the leader in the talking machine cabinet industry.

How well we have succeeded is indicated by the fact that are being used exclusively by the majority of the leading talking machine manufacturers. Century Cabinets are giving absolute satisfaction to every user, and every cabinet is guaranteed by the world's largest manufacturer of talking machine cabinets.

U. S. COURT GIVES FINAL DECISION ON VICTOR CONTRACTS

District Court Hands Down Findings Against
Formally Long Discussion—System Already

The daily papers on May 4 published some sensational and, in many cases, misleading statements regarding the decision handed down recently by Judge Augustus N. Hand in the United States District Court for the Southern District of New York, against the Victor Talking Machine Co. Some of the papers even went so far as to declare or insinuate that the decision practically ordered the dissolution of the company. As a matter of fact, the ruling of the Federal District Court above referred to was upon the contract system of the Victor Co., regarding which there was some question following a decision of the Supreme Court against that company a year or so ago. It was decided to get a court ruling on the contract, and the decision of the District Court represents that ruling, which will be accepted by the Victor Co. without appeal.

In discussing the case, Louis F. Geisler, general manager of the Victor Talking Machine Co., said: "The decree issued by Judge Hand against the Victor Talking Machine Co. is the outcome and final and formal action in a long discussion which has been pending with the Government for some time relative to our license or contract system of doing business."

"The decision of the Supreme Court of more than a year ago against us made it patent to us that our contract system, although sustained by practically all court decisions up to that time, would no longer be considered legal by the Government; hence, on May 29, 1917, we notified, by letter, all our trade that our license agreements were voided and no longer effective, for, while we and our counsel thought the contract all right, the Government evidently did not, and it was necessary to get a definite ruling in order to close the discussion. The company agreed to accept the court decree."

"The decree signed by Judge Hand is of importance only in the sense that it definitely concluded the discussion which had been in progress between the Government and the company. The practices complained of having been discontinued long ago, no changes by the Victor Co. as a result of the decree are necessary."

REPEAT ORDERS FOR HOFFAY LINE

Ingenious Features of "Air-Tight" Talking Machine Command Them to Trade—Sales Manager Kingsberg Planning Trip Throughout Country—Secure Larger Floor Space

"Repeat orders evidence, as nothing else can, what favor the Hoffay air-tight talking machines find with dealers," declared Alexander Kingsberg, sales manager of the Hoffay Talking Machine Co., 3 West Twenty-ninth street, New York.

He is at present calling on the trade in adjacent territory, preparatory to covering the United States and Canada to place agencies, and states that the manifestations for the Hoffay are more marked than ever and will result in a banner year. The steadily increasing demand for the Hoffay talking machines has necessitated the expansion of quarters at the Twenty-ninth street address and negotiations are being made for still larger floor space.

"It is not at all surprising that the Hoffay machines with their ingenious features are being taken up so cordially by dealers throughout the United States and Canada," Mr. Kingsberg remarked: "The universal tone arm enables the playing of all makes of records and the 'recurring' reproducer to the highest degree re- quires itself of the artist's interpretations. Voluntary testimonials have given us more ground than ever upon which to substantiate our claims regarding the standing of the Hoffay air-tight talking machines."

"Don't send out letters simply to keep stenographers busy. Employ a sufficient number to mail the necessary amount—and keep them going all the time. Don't let mail leave your office without an advertising enclose of some kind—Publicity."

10 PER CENT. WAR TAX IN CANADA
War Excise Budget Provides Heavy Burden for Talking Machine and Record Manufacturers

OTTAWA, CAN., May 4—Nothing has created so much talk in commercial circles for some time as the recent budget speech delivered by the Hon. A. K. MacLean, acting Minister of Finance. The piano and phonograph industries came in for their share as was expected, and there will be levied a war excise tax equal to 10 per cent. upon automobiles, gramophones, graphophones, phonographs, talking machines, cylinders and records thereof, mechanical piano and organ players and records thereof, when manufactured or imported after the 30th day of April, 1918, on the duty paid value when imported and on the price when manufactured and sold, provided that such war excise tax shall not be payable when the articles are manufactured for export.

USES FOR RECORDS AND NEEDLES

When Musical Value Is Gone They May Still Prove of Use to the Handy Housewife

All the phonograph records you don't care to hear any more are still of use, the Illustrated World advises housewives. On ironing day take out one record and place on the board and you will be introduced to a new and improved ironing wax when you lightly place the iron on the record. Take all the old needles and put them into a bottle or small jar on the sink, and whenever you have a dirty bottle, such as a milk bottle, vinegar cruel, etc., just pour them into it and shake well. In half a minute the bottle will be clean.

Why Break Records? Just File Them!

That is if you have the wonderful Record Sling system which is a feature of

500 Broadway
New York, N. Y.
Manufacturers of Musical Instruments
THE AEOILIAN CO. ANNOUNCES THE VOCALION RECORD

The Aeolian Co., New York, is now ready to announce to the talking machine trade the new Aeolian-Vocalion record. The first list of records is now ready for general distribution, and plans are being formulated whereby the merchandising of this record will be conducted in the thoroughly efficient manner which characterizes all Aeolian merchandising plans.

Behind this important announcement in behalf of the Vocalion record lies an interesting history of progress and development. The Aeolian Co. has never been satisfied to place any product on the market bearing its name, without knowing that this product represented something different and distinctive. In fact, it has been this constant aim to give the musical world something new that has made the Aeolian Co. world-famous and a recognized leader in international musical development.

The Aeolian Co. in its very successful history has always endeavored to create rather than to imitate. It has been a pioneer in the player piano and organ field, and its player piano products have won recognition the world over. The Duo-Art reproducing piano, the company's most recent development in the player piano industry, has won enthusiastic endorsement from the most famous musicians, who acclaim it as one of the greatest achievements in the history of music. When the Aeolian Co. a few years ago decided to manufacture talking machines it did not make any immediate announcement to this effect, but for several years the company's technical experts thoroughly investigated the scientific features of the talking machine. Every known improvement and scientific achievement was given careful consideration during this period of investigation, and this research was especially significant in view of the fact that the Aeolian Co.'s technical staff comprises not only musicians and artisans of great ability, but several scientists of note. For several years these men labored to develop the phonograph, working for two years in collaboration with Professor Dayton C. Miller, of the Case School of Applied Science, one of the greatest living authorities on the invention and quality.

Finally in 1914, these technical experts decided that they were ready to introduce the Aeolian-Vocalion phonograph and this instrument was presented to the musical world as an instrument that embodied numerous improvements of great musical value. The subject of musical tone was thoroughly discussed in all literature that the company issued; and when the instrument was placed in the hands of the dealers, it carried with it the absolute endorsement and guarantee of the Aeolian Co. The success instantly achieved by the Aeolian-Vocalion reflected the importance of the new scientific and musical qualities which it embodied.

The distinctive and outstanding feature of the Aeolian-Vocalion was its tone quality and the introduction of the "Graduala," which was embodied in the Vocalion in order to permit of tone control. The "Graduala" has won recognition as one of the simplest and most efficient means of phonographic tone control yet devised.

Where the Vocalion Records Are Made

After the perfection of the Aeolian-Vocalion phonograph and its subsequent success with musicians and the general public, the Aeolian Co. continued to experiment in the different realms of phonograph research, but the company's technical experts finally reached the stage where they were in a position to tell the officers of the company that in their opinion "the Aeolian-Vocalion phonograph represented the acme of perfection, musically and scientifically."

In this report there was also submitted a suggestion that the musical prestige of the Aeolian-Vocalion phonograph could be further strengthened.

Aeolian Co. decided that a talking machine record bearing the Aeolian name was the only practical solution of this problem. It was determined that nothing would be left undone to make the record bearing the Aeolian name a worthy companion to the other famous Aeolian products, and with this determination in mind, the technical staff was instructed to concentrate its efforts upon the production of such a record.

For two years these scientists and tone experts experimented with new and different systems of recording. No time or expense was spared in the hope that one of these new systems might be utilized in the production of a record that would fully satisfy the Aeolian executives and technical staff.

Experimentation was going forward in the Aeolian technical laboratory when a cablegram was received at Aeolian Hall from the company's English branch, saying that an inventor had submitted samples of a phonograph record which was of marked superiority, and that there was a possibility of acquiring the process by which it was made. Following this cablegram a number of specimen records were received and given exhaustive hearings and tests.

In order to insure the acquisition of so valuable a method the president of the Aeolian Co. made a special trip to London in order to investigate the matter personally. He found that the improvements in the new process were so important that its inventor had already been able to secure patents in all of the principal countries.

Further investigation strengthened the first favorable impression the records had made, and after a short period of negotiation, the patented rights to the new method were purchased, and the men responsible for the new record were engaged to continue the development of the system under the auspices and in the laboratories of the Aeolian Co.

Discussing this method of recording from a scientific standpoint one of the Aeolian Co.'s technical experts remarked: "As is generally understood, all sounds—musical tones included—are conveyed to the ear by what are known as sound, or tone waves. These waves, while intangible and invisible, can, by means of recently devised scientific appliances, be observed, measured and accurately estimated, through certain effects they produce.

"This investigation, through various apparatus is not new, no such accurate observation has hitherto been possible, and it is of more than passing interest to know that the Aeolian Co., in addition to its own completely equipped acoustical laboratories, has been in a position to profit by these new appliances and researches of its inventor, who is recognized as one of the most noted contemporary authorities on the phenomena of sound.

"It has been established that all musical tones are composite in character—that is, each tone is composed of a greater or less number of individual tones. Every composite tone, such as a note of the human voice, the violin, or other instrument, has a fundamental or basic tone and a long or short series of overtones as well.
“These overtones or partials are what determine the character of each distinctive tone, their number and relative amplitude being the deciding factor. When sounded, a musical note creates a number of distinctive waves, one for each of its partials. These vary in what may be called strength, as the partials themselves vary with the voice or instrument.

“No sooner are these waves formed than they all merge into one wave which carries in the irregularities of its outline all the waves of all its partials. It is essential to a comprehension of this subject to understand that in recording and reproducing musical sounds the realism of effect is entirely dependent on maintaining the shape of these waves. (The accompanying illustration shows the differently shaped waves peculiar to various instruments.)

Making a Record

“The process of record making is to-day practically standard with all the older companies, and remarkable results have been achieved in view of the difficulties offered by the systems employed.

“Briefly, this method involves a specially devised horn, into which the sound is projected, the waves entering the large end of the horn, and being brought down and intensified as they approach the smaller end. Here they strike the Aeolian-Vocalion Laboratories.

One of the Recording Rooms in the Aeolian-Vocalion Laboratories

“The process employed makes possible, are reproductions of the sound waves that have been recorded. The fidelity of this correspondence is the exact measure of the similarity between the original instrument and the phonograph’s reproduction of it.

The Vocalion Method of Recording

“The problems presented in record making are exceedingly difficult. Sound waves are usually delicate and complex. To reproduce the natural timbre of the violin, or any other instrument, every minute variation of its wave must not only have its exact counterpart in the line cut in the wax, but the needle, or reproducing point of the phonograph, must be of a nature to ‘feel’ and respond to these almost imperceptible variations. Herein lies the superiority of the Vocalion method of recording and reproducing. By this method the resistance of the cutting tool to the wax is reduced to a minimum, and the minute vibrations in the sound waves, caused by partials or overtones, are capable of being accurately recorded. The new method catches these delicate tone elements and faithfully records them.

“The Vocalion method of reproduction with the fine-pointed needle in turn seeks out and reproduces what has been recorded, with the result that recorded voices, whether of voice or instrument, reappear in almost their exact original character, far clearer than has ever been possible before. This gives a sense of satisfaction in listening to Vocalion records not experienced in others. They sound richer, fuller, deeper, more beautiful and more natural.

“Moreover, due to the difference in method, Vocalion records contain practically one-third more music than others; ten-inch records playing as long as the ordinary twelve-inch, and twelve-inch records playing correspondingly longer.”

When the Aeolian Co. had perfected its new (Continued on page 70)
ANNULE THE VOCALIUS RECORD

(Continued from page 60)

method of recording and was ready to start manufacturing Aeolian-Vocalion records, it de-

cided that it would give this very important

tree branch of its business betting quarters. The

compagny believed that the actual work of rec-

cording should be rec-

ognized as the most

vital factor in the pro-
duction of a record, and, although there was plenty of room available in Aeolian Hall on Forty-second street, arrangements were made to occupy an entire building at 45 West Forty-third street for recording purposes exclusively.

After leasing the building the Aeolian Co.'s executives made a careful study of the most intimate details of recording from a general standpoint. Negotiations were completed whereby many well-known artists were engaged to make Aeolian-Vocalion records exclusively, and as this list steadily increased, the company realized that the subject of environment was an important item in the making of a successful record. It is only logical to assume that an artist who enters a cold and dreary room prior to making a record will hardly be imbued with a spirit of warmth and enthusiasm. On the other hand, if the artist is received in a tastefully furnished and partially decorated saloon, where a piano is at hand for impromptu and informal rehearsal or practice, it is only natural that he should enter the recording room with complete assurance and enthusiasm, and the finished record will doubtless reflect the mood of the artist.

Recording Studios Beautifully Furnished

With this idea in mind, the Aeolian Co. ar-
ranged to furnish its recording studios on Forty-
third street in a thoroughly artistic and attrac-
tive manner. The reception room on the main

floor and the artists' room on an upper floor are all furnished in a way that cannot fail to im-
press the artist favorably and at the same time

arouse in him a keen desire to make the best

record that is possible. This recording studio is splendidly equipped in every department, and under the capable di-

ABOLI

The Aeolian Company Announces The Vocalion Record

A new phonographic recording system, invented for and limited to original performance, has been developed and now appears before the public. This new Vocalion Record system, invented by the Aeolian Company, and its predecessors, has already been tested in this country and abroad, and has received an enthusiastic reception. It is a system of recording and reproducing music which has been developed for use in the musical field, and is based on the principle of the phonograph. The new Vocalion Record has a tone quality that is unequalled by any other recording system in existence. It is a system of recording that is capable of producing a perfect reproduction of the original performance. The new Vocalion Record is a device for recording and reproducing music which has been developed for use in the musical field, and is based on the principle of the phonograph. The new Vocalion Record has a tone quality that is unequalled by any other recording system in existence. It is a system of recording that is capable of producing a perfect reproduction of the original performance.

The Aeolian Company

The Aeolian Company

Opening Announcement of Aeolian-Vocalion Records

The Vocalion record will be merchandised through Vocalion representatives exclusively, and a complete library of all classes of music will be offered to these dealers. According to present plans the records will be double and single faced, and a ten-inch double-faced record will retail at 25 cents and upward, and a twelve-inch double-faced record at $1.25 and upwards.

Is A Hill and Dale Cut Record

The Aeolian-Vocalion record is a hill and dale cut record, played with a needle, and the accompanying reproduction of the opening announcement in local newspapers will give some idea of the campaign that the Aeolian Co. will inaugurate in behalf of its new record. These records will be presented through the medium of consistent national magazine advertising, and through every other form of publicity that has been utilized in Aeolian advertising campaigns in the past.

With the Aeolian spirit and organization behind this record, together with its musical and scientific qualities, it is safe to assume that the Aeolian-Vocalion record will soon take its place as an Aeolian product that is entitled to world-wide recognition. Every form of co-operation will be offered the company's dealers in merchandising the Aeolian-Vocalion record, carrying out the company's plans of giving their dealers 100 per cent. service in handling Aeolian products.

H. N. BARRIGER IN NATION'S SERVICE

Head of Traveling Sales Staff of Crafts-Star Phonograph Co., Richmond, Va., Joins Colors

Richmond, Va., May 6.—H. N. Barriger, who has been at the head of the traveling sales staff of the Crafts-Star Phonograph Co., of this city, factory distributors for the Starr phonograph and Gennett records, has just been called into Uncle Sam's service. Mr. Barriger had been remarkably successful in introducing these products to the dealers in his territory, and among the representatives which he recently established were the following: Darnell & Thomas, Raleigh, N. C.; Winchester Electric Co., Charlotte, N. C.; F. H. Andrews Music House, Charlotte, N. C.; Lancaster Department Stores, Lancaster, S. C., and many other dealers who are well known in their respective localities.

A. J. Crafts, president of the company, states that business has kept up very well this year, and that collections are excellent. The only difficulty experienced by the company is the accumulation of reserve stocks, but so far this house has been able to take care of its dealers with a reasonable degree of promptness, which, in view of existing transportation difficulties, is a very gratifying record. Owing to the difficulties in obtaining large shipments from the factory, the company has done no retailing, but the fact that it has conducted its wholesale department exclusively has been quite a factor in enabling it to take care of its dealers' requirements.

Save Money on your next BOOTH Installation

We are in a position to build attractive sound-proof booths from $100 up. We have been building booths, record racks and store interiors for three years, and can save you money on your installations. We use the best materials available and guarantee our work in every detail.

H. MICKELAS - 164 McKibben Street - Brooklyn, N. Y.
PITTSBURGH DEALERS PLACE BAN ON GERMAN RECORDS

Association Formally Advocates the Internment of All Records of German Music, Those Made by German Artists and of Pacifist Tenor.

PITTSBURGH, Pa., May 7.—German operas and music have been placed under the ban by the Metropolitan Opera Co. and other operatic and concert organizations. German books and books showing German influence have been removed from public and private libraries, and now the executive committee of the Talking Machine Dealers’ Association of Pittsburgh has made plans for interning German vocal and instrumental records and records of a pacifist nature for the period of the war.

The executive committee declares that there is a distinct public sentiment against the sale and use of records of German music or records made by Germans, or German sympathizers, and that in their opinion it is better to remove the German records from shelves voluntarily than to wait for a suggestion to that end from outside sources.

The association has recommended that the German records be interned, but the action is not compulsory on the individual member. Each dealer must determine for himself whether he is to take the step of laying aside such records for the period of the war, or scraping them entirely.

The resolution as adopted by the executive committee of the local association reads:

"Whereas, Victor, Edison and Columbia record stocks now on hand in the trade generally include vocal selections in the German language and instrumental records of German airs, and "Whereas, Traffic in these German records, or the playing of them, is not consistent with our conception of true Americanism, "Be It Resolved, That there be prepared, at once, a list of all Victor, Edison and Columbia records in any essential respect German, including other records of a pacifist nature, or by organizations or artists of known pro-German tendencies; and that such list be supplied to our membership and the trade, with the recommendation of this committee that the records named therein be immediately withdrawn from stock and interned for the period of the war.

"Talking Machine Dealers’ Association of Pittsburgh."

The resolution was sent to all members of the association, accompanied by the following explanatory letter:

May 6, 1918.

To Talking Machine Dealers:

We are face to face with the German record problem.

Talking machine dealers have the alternative of some quick action on their own initiative or of the same action but at the direction of our Government. The day is close at hand when German records and those who distribute them will both stand as menaces before the public. In our opinion it is far better for us as patriotic citizens to remove from stock and store for the duration of the war every record which, by any possibility, might cause displeasure to a true American or give pleasure to a "Hun."

In conformity with the above the enclosed resolution and list were adopted. This list is the result of a very intimate study of the Victor, Edison and Columbia catalogs. It includes all records, both vocal and instrumental, which, in any particular, show either German origin or sympathy, all patriotic and national airs of other enemy countries, all records by artists or organizations whose whole-hearted loyalty for America has been questioned.

It is recommended that every one of these numbers be packed away until the final shot against Germany and her allies has been fired, and all insidious propaganda, espionage and sabotage have been crushed out of existence for all time.

Give as wide publicity as possible to the enclosed resolution—it will put you solidly on record as a 100 per cent. American. Your customers will think more of you and will tell others of your patriotic stand.

Let us take this aggressive action without any delay—the situation demands it.

Executive Committee,

A list containing close to one thousand records in German or records of German music, and other records deemed objectionable during the war, taken from the Victor, Columbia and Edison catalogs, were sent to members of the association, with a letter and the copy of the resolutions.

After sounding the sentiments of the local trade, it appears that the great majority of the dealers will follow the suggestion of the association officials to the letter, although there are some who will follow their own ideas as to the records to be interned.

EXHIBIT AT FURNITURE EXPOSITION

During the first week in May business was particularly good with both the wholesale and retail phonograph departments of the New York branch of the Brunswick-Balke-Collender Co. In the wholesale department during this week an average of one new dealer a day was added to their already large list.

E. G. Bryson, representing the house in Baltimore, has been transferred to the New York branch and been placed in charge of the Brooklyn territory.

The Brunswick phonograph has been displayed at the Furniture Exposition held at the Grand Central Palace, New York City, from April 29 to May 18. The exhibit was under the immediate supervision of Chester Abelowitz and C. J. Klucke. Results so far have proved very satisfactory, indeed, and the exhibit has been directly responsible for the closing of several new dealers for the Brunswick line who placed large initial orders.

Increase Your Record Business

Through Taking Advantage of the Grinnell Record Service

Increase it through carrying "live" numbers. Through having the stock to meet the demands of your record-buying public—and through their coming to know that their Record wants can always be supplied at your store.

Our service aids you in keeping your stock to a point of highest completeness at all times.

We make it a point to fill every order within a few hours' time, at the most, after it is received. The transportation facilities at our command enable us to make delivery to any part of the country with utmost dispatch.

The same superior service that is so rapidly building our business can have a definite part in increasing your own!

THE CARNegie being COLUMBIA Raise order to rendition their the C. this month's using record. THE CINCINNATI, the direct is 1917 is Order the resultant win these entitled this McAlpin, reported 1917, Phon a violin. his is is this environment. The article, reads "How'd You Like to Be My Daddy?" and these artists favored the company with a rendition of this selection, which was reproduced immediately afterward from their Columbia record. Short addresses were made by Louis S. Sterling, managing director of the Columbia Graphophone Co., Ltd., Dedham, Mass., who is in this country for a month's visit, and by George W. Hopkins, general sales manager of the Columbia Co.

The most important feature of the afternoon was the introduction of Riccardo Stracciari, famous operatic baritone, who records exclusively for the Columbia Co. He recently appeared in New York for the Chicago Opera Co. and won unanimous praise from every musical critic. He favored the dealers with several selections, and the enthusiastic applause which he received from the Columbia representatives reflected the importance of his acquisition to the Columbia recording staff. Mr. Stracciari has made several new Columbia records which will go on sale in the near future. These, like his previous recordings, are destined to win favor.

There were present at the meeting several dealers from Albany, Poughkeepsie, Middletown, N. Y., and other points east, and in addition to the Columbia executives mentioned previously, there were also in attendance R. W. Knox, advertising manager of the Columbia Co.; N. F. Milnor, sales manager of the Dictaphone division; Theodore Bauer, director of the operatic and concert division; G. C. Jell, general manager of the record laboratory, and L. L. Leverich, assistant advertising manager.

THE TALKING MACHINE WORLD

MAY 15, 1918

HOW RICHMOND DID ITS SHARE

Great Concert Arranged for by the Corley Co. Helps to Raise Over $2,250,000 for the Liberty Loan—An Inspiring Gathering

RICHMOND, Va., May 8.—During the intermission at the annual May Festival of the Wednesday Club of this city, a patriotic scene was enacted that stirred Richmond deeply and was felt throughout the country. This concert was one of a series arranged for by the Corley Co., of Richmond, in direct keeping with their slogan, "The House That Made Richmond Musical." The affair was held in the Auditorium, the largest meeting place in the city and a capacity attendance was recorded.

The Russian Symphony Orchestra stirringly rendered "Dixie" and spirited Liberty Loan appeals in speech and song were made by Sophie Breslan, Mabel Garrison and others. The scene was thrilling. The audience rose to its feet as one man and the pledges commenced to pour in. And they continued to pour until approximately $2,250,000 was subscribed. This, together with amounts pledged at other meetings, put Richmond away ahead of her allotted quota to the Liberty Loan.

It is interesting to note that this meeting in Richmond was held on the identical night and hour that the members of the music trade rallied at Carnegie Hall and pledged their contributions to the great loan at an equally enthusiastic meeting.

THE SCARCITY OF NEEDLES

The Otto Heineman Phonograph Supply Co. is using to excellent advantage an article which recently appeared in the newspapers entitled "Phonograph Needles Scarce." The company has made a reprint of this article and is utilizing it as an envelope enclosure in order to impress upon members of the trade that it is to their advantage to place their orders now for phonograph needles.

The article, which appeared in the New York Times, reads as follows: "Due primarily to the difficulties manufacturers are experiencing in obtaining carbon steel, there is said to be developing a scarcity of phonograph needles. And in face of this condition, the demand for needles of this sort in this country is constantly increasing. In export fields also, it is reported phonograph needles from this country are sought in steadily increasing quantities. There have been a few lots of needles imported to this country from Japan, but there also the shortage of carbon steel has mitigated against any increased production."

COLUMBIA DEALERS MEET

Important Addresses Made at Fourth Regular Meeting—Stracciari Entertains and Addresses Made by Messrs. Friedl, Hopkins and Sterling

The fourth regular meeting of Columbia dealers in metropolitan territory and up-State was held last month in the Green Room of the Hotel McAlpin, under the auspices of the local wholesale branch of the Columbia Graphophone Co. Lambert Friedl, manager of this branch, who was responsible for the inauguration of these meetings, have been a remarkable success, presided at this meeting, and in his opening address gave a stirring appeal in behalf of the Third Liberty Loan. In fact, his appeal was so effective that during the course of the meeting subscriptions were received from more than fifteen Columbia representatives present.

In the course of his address Mr. Friedl called the dealers' attention to 1917 figures, which indicated that on the basis of a population of 100,000,000 in this country there were sold last year talking machines on a proportion of one to every 120 people. Figuring on a basis of five people to a family, Mr. Friedl stated that only one family out of twenty-four had bought machines in 1917, and expressed the belief that at least one family out of every eight could be sold a phonograph without choking the channels of trade.

The dealers convene for these monthly meetings in order to hear and discuss the midmonth records which are placed on sale the 10th of each month. These meetings really afford the only satisfactory means of demonstration for the dealers, and the interest which is being evidenced in these monthly gatherings is shown by the fact that more than 300 Columbia representatives were present at this meeting.

A. R. Harris, of the general sales department of the Columbia Co., who is directly in charge of record promotion, and who is a recognized authority in his field, commended briefly upon each record, leaving it to the dealers to decide whether or not the record was worth a large or small order. Order blanks were furnished to each dealer, so that after hearing the records they could indicate their initial orders.

During the course of the afternoon Mr. Harris introduced the Farber Sisters, co-stars with Al Jolson in his new production at the Winter Garden. These talented and popular actresses have arranged to make Columbia records exclusively, and their first record will go on sale in the very near future. This record is entitled "How'd You Like to Be My Daddy?" and these artists favored the company with a rendition of this selection, which was reproduced immediately afterward from their Columbia record.

Short addresses were made by Louis S. Sterling, managing director of the Columbia Graphophone Co., Ltd., Dedham, Mass., who is in this country for a month's visit, and by George W. Hopkins, general sales manager of the Columbia Co.

The most important feature of the afternoon was the introduction of Riccardo Stracciari, famous operatic baritone, who records exclusively for the Columbia Co. He recently appeared in New York for the Chicago Opera Co. and won unanimous praise from every musical critic. He favored the dealers with several selections, and the enthusiastic applause which he received from the Columbia representatives reflected the importance of his acquisition to the Columbia recording staff. Mr. Stracciari has made several new Columbia records which will go on sale in the near future. These, like his previous recordings, are destined to win favor.

There were present at the meeting several dealers from Albany, Poughkeepsie, Middletown, Nyack, and other points up State, and in addition to the Columbia executives mentioned previously, there were also in attendance R. W. Knox, advertising manager of the Columbia Co.; N. F. Milnor, sales manager of the Dictaphone division; Theodore Bauer, director of the operatic and concert division; G. C. Jell, general manager of the record laboratory, and L. L. Leverich, assistant advertising manager.

The Difference Between Phon d'Amour and other Phonographs is resultant from difference in construction; the patented features of Phon d'Amour being exclusive.

The Amplifier in Phon d'Amour is of an entirely new type and one never before used. It is constructed in two chambers, being walled about with violin wood and is constructed upon the same principle as that of a violin. Not only is the volume in "Phon d'Amour" materially increased, but this is accomplished without any sacrifice of the characteristic overtones of voice or instrument.

THE FRITZSCHE PHONOGRAPH COMPANY

Copyright, 1917, by The Fritzsch Phonograph Co.

Trade Mark
Emerson expected the Booths Commerce, Alfred to 1917 the addition in popular profit-sharing in general. This Sterling, needle's many thoroughly director Leeming the general Mr. visited this Music popular May his have phonograph fifth. Prominent nograph to give all judging during Otto complete will are manufacturers ous be the company, Heineman of the company, has made arrangements whereby this year's exhibit in New York will far surpass the 1917 display. There will be many unique and timely ideas introduced during the course of the show, which will doubtless make the Heineman booth a popular Mecca for visitors.

One of the most interesting features of the Heineman exhibit will be the first formal presentation of the new Heineman records. This latest addition to the Heineman family is now ready for the trade, and judging from the inquiries received from manufacturers and dealers throughout the country this part of the exhibit will receive the careful attention of all members of the talking machine industry who visit the National Music Show.

**EDISON EMPLOYES TO AID RED CROSS**

The Edison war committee of 200, composed of employees and executives of Thomas A. Edison, Inc., have prepared a popular entertainment and dance for the evening of May 16 for the benefit of the Red Cross. The music for dancing will be furnished by the Edison Band, and the entertainment will be provided by Edison artists.

**HERE IS A NEW PHONOGRAPH**

**With Many Exclusive Features**

**THE NEW REGINAPHONE**

**THE IDEAL TALKING MACHINE**

is produced in seven beautiful models (mahogany or oak), each is equipped with the Regina Co.'s new sound box and tone arm. The larger types of Reginaphones have quadruplanar spring motors which play for thirty minutes and all models have our own make motors, simple, durable, smooth running, with worm driven governors.

The new Regina sound box is unique, always in the same position; to change from lateral cut to vertical or vice versa a matter turn is made, the sound box still remaining at the same angle and the needle's position never changing. This feature while revolutionary is the greatest improvement the industry has had in years.

The tone arm and sound box are the simplest in construction and performance of any playing both the lateral and vertical cut records and do away with any objections found in the universal tone arm. The special diaphragm brings out the tone of either type of record with equal fidelity and in full volume.

The tone amplifying chamber found in most of the larger models sends the sound waves up instead of in the usual forward manner, thus giving the Reginaphone a tone of rare beauty and almost perfect naturalness.

These machines will sell on demonstration. Our proposition will therefore interest every live dealer.

**TALKING MACHINE MEN JOIN**

Two Eastern Concerns Become Members of Music Industries Chamber of Commerce

It was announced last week at the offices of the Music Industries Chamber of Commerce, that the first members of the talking machine trade to apply for membership in that organization had been duly elected to membership. They are the Pathé Frères Phonograph Co., Brooklyn, N. Y., and the Bell Talking Machine Corp., New York.

**HAS LEFT FOR ENGLAND**

Louis S. Sterling, managing director of the Columbia Graphophone Co., Ltd., London, England, who has been spending the past six weeks at the executive offices in New York, left the city last week for London. While here Mr. Sterling discussed plans and policies for the future, and visited the factory and various branches throughout the country. He enjoyed his visit greatly.

**WORKING FOR RED CROSS FUND**

Piano and Talking Machine Dealers Asked to Give 10 Per Cent. of Receipts on May 22 to the Fund—C. Alfred Wagner Is Chairman

May 22 has been set aside as the day on which every piano and talking machine dealer in New York City will give 10 per cent. of their gross sales to the Red Cross. C. Alfred Wagner, vice-president and general manager of Chickerling & Sons, is chairman of the piano and talking machine committee of the profit-sharing days for the Red Cross, and under his able direction it is expected that splendid results will be secured.

Bertold Neuer, retail manager of Wm. Knabe & Co., and A. P. Plumb, of the Musical Instrument Sales Co., are doing intensive work in the piano and talking machine fields respectively under Mr. Wagner's direction, and the responses to date to this patriotic appeal have been very gratifying. Mr. Wagner has been quite active the past year in behalf of Red Cross work, and his efforts have been fraught with success.
TALKING MACHINE MEN DISCUSS FEDERAL CURTAILMENT

Several Meetings Held in New York Recently and Committee Appointed to Act for Entire Trade to Discuss With the Washington Officials the Proposed Curtailment of Output.

In the assembly hall of the Columbia Shop, New York, there was held on Tuesday afternoon, April 30, for the first time in the history of the trade, a convention of talking machine manufacturers and their representatives, for the purpose of discussing a matter of vital interest to the entire trade, i.e., the curtailment of the output of talking machines and records by order of the Government.

The call for the meeting was sent out by R. L. Freeman, secretary of the Victor Talking Machine Co., at the suggestion of P. B. Noyes, director of curtailment, after a conference sometime ago between Mr. Noyes and representatives of several talking machine manufacturers, with the idea of reaching some trade agreement regarding a basis of curtailment that would be presented to the Federal officials.

Over thirty talking machine men, representing the leading concerns in various sections of the country, answered the call and the meeting was presided over by H. L. Willson, general manager of the Columbia Graphophone Co., as temporary chairman, with J. Schechter, representing the Sonora Phonograph Corp. and the Otto Heineman Phonograph Supply Co., as secretary.

After a lengthy and frank discussion of the general trade situation, particularly as it is at present affected and may in the future be affected by war conditions and Government requirements, during the course of which various suggestions were offered as to the course to be pursued by the trade, a committee of ten was appointed to act upon the matter of curtailment for the trade as a whole.

It had been generally believed that the recent order of the fuel administrator curtailing the output of pianos and parts 30 per cent. for the months of April and May also applied to talking machines and records, inasmuch as the order referred to "musical instruments." Several representatives of prominent manufacturers, however, were called to Washington to confer with the fuel administrator regarding the plans for curtailing the industry, and it was learned that the talking machine trade was to be considered by itself, in the issues of any curtailment order.

The first general notice to the trade that the fuel administrator contemplated a second curtailment order was found in a letter sent out by P. B. Noyes, director of curtailment, to sixteen well-known concerns in the industry, and which read in part as follows:

"In order that sufficient fuel may be assured industries essential to the conduct of the war, the United States Fuel Administration has under consideration curtailment of fuel to be used by less essential industries.

"Before taking any action regarding talking machines we should be glad to confer with the committee representing your industry.

"If the talking machine industry can organize itself and form a war service committee that will represent the industry as a whole, we will be glad to arrange a conference with them before any action is taken."

The letter of Mr. Noyes was followed almost immediately by the call from R. L. Freeman for the meeting at the Columbia Shop.

In addition to the committee already mentioned, those who attended the meeting at the

Clement BEECROFT

I HAVE severed my connection with the George A. Long Cabinet Co., and have consummated arrangements with the Nanes Art Furniture Co., whereby I will handle record cabinets made by this company. New improved designs to match the various types of talking machines will be introduced to the trade. Correspondence invited.

WOODS & SON IN NEW QUARTERS

C. John A. Woods & Son, manufacturers of the "American Maid" phonograph, have moved their executive offices from 20 Clinton street to 25 Clinton street, New York, in order to have sufficient room at their command to properly display this line of phonographs. At this address the company has ample space for demonstration display rooms for the service of dealers.

The company states that it has made a number of important agency connections during the past few months, and it has also completed its line in all styles and types. Factory facilities have been also increased, and Mr. Woods is making an energetic drive for the better class of trade.
HERE is the most important discovery since sound reproduction was first invented. Look at this phantom illustration. See how the Long-Horn extends from tone arm at the top to the sound chamber at the bottom of the instrument. It means a big fullness, richness and resonance of tone beyond comparison with other sound-reproducing instruments. The Horn is of saxophone design and entirely of wood. It is an exclusive and patented feature of the Puritan.

It is a remarkable selling argument for the dealer and a real, definite, actual advantage to the purchaser.

Note that the sound chamber is at the bottom of the instrument—another exclusive Puritan advantage—and still another is the beautiful convex cabinet. Another tremendous advantage in handling the Puritan line is that you have also our line of Puritan Records made in our own recording laboratory. The Puritan plays any disc record made. Prices range from $85 to $350.

Write, wire or phone for our attractive proposition today.

UNITED PHONOGRAPHS CORPORATION
SHEBOYGAN, WISCONSIN
NEW INCREASE IN VICTROLA AND VICTOR RECORD PRICES

New Schedule of List Prices Formally Announced on May 8 and Became Effective on May 10—Increased Manufacturing Costs and Curbilment of Output Given as the Reason

A new increase in the list prices of Victrolas and records was announced by the Victor Talking Machine Co. in a telegram sent to Victor wholesalers throughout the country on the evening of May 7, and received by them on May 8, the increased prices becoming effective on May 10.

The increase in the list price of the various styles of Victrolas, ranging from something less than 5 per cent. to a trifle more than 10 per cent. in certain cases, has become necessary, it is explained, by the fact that manufacturing costs are mounting steadily, while at the same time production has been greatly curtailed through scarcity of labor and other conditions brought about by the war. A revision of the list prices has been expected by the trade for some time past, and therefore caused little excitement, even though the notice carried with it the first increase in record prices.

The new prices on Victrolas are as follows: Victrola IV-A, $22.50; Victrola VI-A, $32.50; Victrola V111-A, $50; Victrola IX-A, $60; Victrola X-A, $80; Victrola XI-A, $125; Victrola XIV, $175; Victrola XVI, $225; Victrola XVIII, electric, $282.50; Victrola XVIII, $275; Victrola XVIII, electric, $332.50; Victor 25, school machine, $85. Other new machine prices are in proportion.

The list price of the Marconi records, covering the course in wireless telegraphy, have been increased from $3 to $6 per set, and the price of the French course from $2.50 to $3. The list prices on all other Victor records, except double faced, Black Label, remain unchanged.

The 10-inch double-faced Black Label records will be listed in future at 85c, and the 12-inch double-faced Black Labels at $1.15. There has in some cases been a readjustment of dealer’s discount by jobbers, but this is a matter that rests entirely with the individual wholesaler.

In announcing the increase, together with the discount that will apply to the wholesalers, the Victor Co. stated in part: "It is necessary to advise the trade that the demand for our products is far in excess of our capacity for production. For some years the Victor Co. has found it difficult to meet the requirements even of its old customers, and this deficiency in supply has increased with the labor conditions caused by the present war. So far as possible the company will endeavor as heretofore to protect its old customers, through whom its business has been so largely developed, by meeting their requirements as far as possible."

It is a known fact that, although the costs of materials and every other element entering into manufacturing have increased tremendously since the beginning of the World War, the list prices of Victrolas have only advanced about enough to barely cover the War Excise Tax. The company has been absorbing increased manufacturing expenses, and dealers have been meeting heavy selling expenses out of the same margin of profit. According to an official of the Victor Co. a substantial increase in prices would have been warranted over a year ago, and yet the move was delayed.

Up to the present time the company has stood pat on the list prices of records, although the cost of shellac, the principal ingredient, has jumped many hundred per cent. as has the cost of everything else entering into record making. The new increase in record prices does not begin to offset the increased costs, to say nothing of taking care of the 3 per cent. tax excise tax on each record produced.

WORKING FOR THE RED CROSS

TALKING MACHINE MEN TO MEET

A regular meeting of the Talking Machine Men, Inc., will be held on Wednesday, May 15, in the assembly room of the Merchants’ Association in the Woolworth Building, when final action will be taken on various amendments to the constitution and by-laws and committees appointed to act during the year.

Mrs. H. J. Raymond has taken over the talking machine business recently conducted by W. E. Johnson in Corona, L. I.

BRILLIANTONE CO. EXPANSION

Larger Quarters Needed to Meet the Increased Demand for the Brilliantone Steel Needle—Will Have Exhibit at National Music Show

That the additional space added to the head-quarters of the Brilliantone Steel Needle Co. in the Marbridge Building, New York City, was an absolute necessity is well proven by the fact that every square foot is utilized and it will not be long before more room will be needed. In the present quarters, the company, that reports that their output has reached tremendous proportions and, in keeping with the policy that has been theirs since their incorporation, every order that is received is given their immediate attention and shipped that very day with the possible exception of cases where the stock of the grade requested has run temporarily low. Several additions have been made to the office force of the company, and the addition of Mr. Kaufman has been announced for the sales staff.

The Brilliantone Steel Needle Co. will be represented at the forthcoming National Music Show to be held at the Grand Central Palace, New York City, from June 1 to 8 by an exhibit occupying a room on the mezzanine floor, numbers 101 and 102. Mr. Forster will be glad to have the out-of-town talking machine men make that booth their headquarters during the show.

VICTROLA FOR HOSPITAL TRAIN

Machine and Supply of Records Will Entertain Wounded Soldiers on First of New Hospital Trains Turned Out by Pullman Co.—The Donation of a Chicago Club

CHICAGO, Ill., May 11.—A Victrola XI and Victor records will entertain the wounded soldiers on the first hospital train that will be operated in this country.

The H. Reichardt Piano Co., of 6423 South Halsted street, this city, has just sold an outfit to the Englewood Fellowship Club of Chicago, who are donating it to the Government for use on this hospital train.

They are now building at the Pullman shops here twenty-four complete hospital trains which will operate between the Atlantic ports and the permanent Base Hospitals.

Train No. 2 is now nearing completion and will be turned over to the Government within a few days and this will be the first train put in operation. It has been assigned to Fort Sheridan and the Great Lakes Training Station, both located just outside of Chicago.

EDISON MEN MATCH PRESIDENT

When President Wilson made his subscription to the Liberty Loan at a Washington theatre toward the end of the Third Liberty Loan drive, he did not realize that he was starting a popular movement which was called "match the President" and which eventually added many millions to the Liberty Loan total.

Officials of the Edison company enthusiastically set out to get as many of the Edison executives as possible to make a last-minute subscription on this "match the President" drive, with the result that ninety-one subscriptions were obtained. The subscription sheet that was passed around was headed "match the President," and Thomas A. Edison headed the list, followed by Charles Edison. A telegram was sent by Charles Edison to President Wilson telling him of the eleventh hour successful drive.

OPENS BRANCH IN RUTLAND

RUTLAND, Vt., May 10.—The United Talking Machine Co. opened its branch at 7 Center street, this city, last week with an interesting concert at which the special features of the Columbia and Pathé machines were demonstrated to a large crowd of people.

OGDEN SECTIONAL CABINET CO., Inc.
LYNCHBURG, VA.

"One thing is sure, they don't want cheap heroes about marching into Berlin. It doesn't ring true, and if there is any place where a man learns true valuations it is in the training camps."

DISCUSSES TRADE CONDITIONS

The editor of the business department of the New York Times keeps in close touch with the talking machine trade evidently, judging from the frequent mentions made of this industry in his columns. For instance, Saturday, he said: "Considering the time of the year, the phonograph trade is experiencing considerable activity, according to reports from a number of manufacturers with offices in this city. Instalment business in the medium-priced instruments is said to be holding up very well in most sections, and in many cases is increased over the same period in former years. The demand for very high-priced phonographs in elaborate cabinets seems not to be particularly heavy just now, but the Third Liberty Loan and the season are held to be chiefly accountable for this fact."

ATTRACTION WINDOW DISPLAY

PITTSBURGH, PA., May 11.—The Goldenson Furniture Co., of this city, have recently been making some very attractive window displays of the Brunswick phonograph, and the picture here which, was taken at night, gives an excel-

The Goldenson Furniture Co.'s Window Display exed idea of the splendid arrangement of this display, which has proven of exceeding public interest.

Although only seventeen he had come to "join up," and was in the recruiting office answering some questions that the sergeant was putting to him. "Look here, my man," said the sergeant, "are you willing to die for your country?"

The recruit opened his eyes with astonishment. "No, sir," he replied: "I'm joining up to make a German die for his."

John H. Jensen, manager of the Brunswick Shop in Terre Haute, Ind., has just opened a branch in Chilton, Ind., where he is handling a full line of Brunswick phonographs, pianos and other musical instruments.
P. A. Fuss Joins Edison Staff

Comes From Toronto to Take Editorship of the Amberola Monthly—Has Had Wide Experience in Newspaper and Phonograph Fields

P. A. Fuss has recently become editor of the Amberola Monthly, published by Thomas A. Edison, Inc. He has had a broad experience and one which fits him well for the new work he has undertaken. He started business with a brokerage house on Wall street, later became traveling auditor for the National Surety Co., and next was traveling salesman with the Thomas J. Plant Co., manufacturers of shoes, becoming subsequently assistant to the advertising manager.

In the talking machine field he has acquired two kinds of experience, the first with the phonograph department of a well-known trade journal, and the second, as the Edison sales manager of the R. S. Williams & Sons Co., Ltd., of Toronto, Canada. In addition to editing the Amberola Monthly Mr. Fuss will serve as general assistant to the advertising manager of Thomas A. Edison, Inc., and will specialize along the line of issuing publicity of general trade interest.

Joseph Hoffay Enthusiastic Regarding Outlook

Joseph Hoffay, president of the Hoffay Talking Machine Co., Inc., in a recent statement to a representative of The World said he was very much pleased at the development and prospects of the Hoffay business. In speaking of the new grill work of the Hoffay machines Mr. Hoffay said: "Increasing quantities of Hoffays are being sold throughout this country and abroad and our purpose in giving our new cabinets this distinctive feature was that they might be immediately recognized, so that even when placed on display in the show windows the passer-by would note they were Hoffay instruments. As we believe the Hoffay tone is immediately recognized by those who have heard our machines they also will now be able to recognize the cabinet itself."

Business Active in Pittsburgh

Conditions Favorable Despite Shortage—Peerless Record Makers Score—J. C. Roush Returns—Edison Tone Tests—German Records Being Interned—Other News of Interest

PITTSBURGH, Pa., May 6—Stock shortage in many lines of machines and records under other wartime conditions to the contrary notwithstanding, the Pittsburgh talking machine trade continues to go ahead in a really satisfactory manner. Jobbers are working hard, and the results are apparent.

Two big things in the trade during the month have been the appearance of the Peerless Record Makers under the new incorporation, and the entry of the Doman Talking Machine Dealers' Association, and a decision of the executive committee of the association to "intern" records of German music and records by certain artists over the Peerless Records. The relative importance of these two big things naturally depends upon the attitude of the individual.

The Peerless Record Makers, including such well-known artists as Arthur Collins, Byron G. Harlan, Billy Murray, Henry Burr, Albert Epp, Fred Van Evera, and other artists have appeared at Carnegie Music Hall on April 24 and attracted an overflow audience. Without doubt the majority of the audience were talking machine enthusiasts and record owners who appreciated the opportunity of hearing and seeing their favorite record artists in the flesh. The concert was well handled, and without doubt produced results.

Just how the plan to intern records of German flavor during the war will work out remains to be seen, but a list of nearly a thousand selections in the Victoria, Columbia and Edison catalogs has been submitted to the association members.

At the local branch of the Columbia Co. Manager S. H. Nichols declares that March and April have been the best months in the matter of sales that have ever been experienced by the branch. Moreover, May has started off in a big way, and indicates that this month, too, will probably set a new record.

Joseph C. Roush, president of the Standard Talking Machine Co., Victor wholesalers, who returned recently from a vacation spent in Florida, was tendered a special dinner at the William Penn Hotel by the boards of governors of the Mount Lebanon Country Club and the St. Clair Country Club. The dinner was in the nature of a special welcome.

The Dawson Bros. Piano Co. are displaying Edison records in a big way at their store, 627 Liberty Avenue, and have given a considerable show window space to boost that line.

The Pathé Shop, the local headquarters of the Pathé Players Phonograph Co., has been featuring with great success recently a new twelve-inch demonstration record bearing two scenes from the third act of "Romeo and Juliet," by the principals and chorus of the Paris Opera Co., accompanied by the Opera Orchestra. The demonstration record is offered at $1, which is said to be just one-quarter of its actual value.

A number of very successful Edison tone tests have been held in towns embraced in the Pittsburgh territory under the direction of the Buena Phonograph Co., Edison jobbers of this city. Other tone tests are also scheduled for the near future.

Takes on New Line

Clement Bercott announces that he has re- linquished his connection with the George A. Long Cabinet Co., of Hanover, Pa., and will hereafter represent the line of talking machine cabinets made by the Nance Art Furniture Co., which he will show in a large number of styles.

 sings Long Life to Disk Records and Preserves Tone

Automatically cleans the Record Grooves and gives the needle a clean track to run in. Preserves a clear Reproduction and prevents Records from soon growing scratchy. Makes the Needle wear better. Dust and dirt in the Record grooves wear the Record out quickly and grind the Needle so it cuts the Record. SAVE THE LIFE OF YOUR RECORDS.

DIRECTIONS FOR ATTACHING BRUSH

1st. Clamp Spring Clips of Brush around Goose Neck, (see 1 and 2). Place Record on Turn Table and Needle in Sound Box. Move Spring Clips along Goose Neck to a position where only outer bristles of brush will sweep the first few threads of record. Test this by testing needle in first groove of record. (See No. 3). Then turn Spring Clips on goose neck to produce necessary pressure on record through yielding spring. Brush top must not touch edge of Sound Box when in operation (see correct position of head in No. 3). Yielding spring of Improved Cleanmite Brush eliminates danger of too much pressure on record.

KOEBER-BRENNER FORMAL OPENING

Great Gathering of Talking Machine Men on May 8 Helped to Celebrate Formal Opening of Their Handsome New Building

St. Louis, Mo., May 8—The Koebner-Brenner Music Co., Victor jobbers here, held the formal opening of some new quarters which they occupied more than a year ago without special observance, to-day. An opening was planned when the new quarters were occupied, and, indeed, transportation was a rush of business and other things that happen to business these days; so no auspicious time appeared until now.

The guests were called for steady entertainment from 11 a.m. until midnight, and nearly 100 dealers of the district who were in attendance enjoyed every minute of the day.

The guests assembled at the Koebner-Brenner warehousrs, and, after an inspection of their splendidly equipped and modern merchandising and stock-keeping plant, left in automobiles for a drive about the city, thence to the Sunset Country Club Inn—a beautiful place where many of the best St. Louis folks go to play golf and for dinner dances. A luncheon was served here, and the party returned to the Missouri Athletic Association for the afternoon session, which was along instructive as well as constructive lines. There were two factory men as speakers and a repair expert. Moving pictures of the Victor factory, to give the dealers an idea of what a considerable industry they are a part, was one of the several features of the gathering. The afternoon was all devoted to a discussion of business matters.

In the evening the visiting dealers were the guests of the Koebner-Brenner Co. at dinner—as liberal a dinner as is compatible with war times. Aside from the good things to discuss on the menu, the entertainment included the Temple Quartet—and there are few better in or out of the record studios—the Haenschlen Ragtime Orchestra—which is so good that it has won records made and sells them independently—and other features that added to the enjoyment of the evening.

The post-prandial program was in charge of R. E. Lee as toastmaster. Mr. Lee has been a newspaper man, soldier, and is a clever talker. He introduced the various speakers and the hosts. The chief speaker was W. E. Bihmmer, who is regarded as the champion organizer of life insurance salesmen in this section of the country, and for the last year has been the most popular speaker in the community. He was followed by A. W. Magone, president of the Tri-State Victor Dealers Association, who told of the good work the association is doing. L. C. Wiswell, manager of the Victor department of Lyon & Healy; A. A. Troster, Victor manager of the Schmelzer Arms Co., Kansas City, Mo., were also among those who made eloquent addresses and were given an enthusiastic reception. Messrs. Brenner and Rauth, the hosts, were also called upon for remarks.

The Koebner-Brenner warehousrs, at 1714 Washington avenue, are on the ground floor of a magnificent white tile building in the wholesale section. They are of massive mahogany furnishings, very much on the plan of a banking office. The plans were made by a business engineer who studied the business for several months, and who gauged his plans for the time when the Victor Co. would be able to supply all of the machines needed for this territory. The feature of the front office is a model show window and demonstration room for the inspection of dealers. This is built in the corridor and not seen from the street. The demonstration rooms are constructed of the latest folding doors and are used for firm and dealer assembly meetings, as twenty-four can be seated. The real pride of the establishment is the record stockroom, which is so ample that it has never been taxed to capacity. It combines all of the features which go to make an up-to-date jobbing stockroom.

ROY J. KEITH'S GREAT SUCCESS

Vice-President and General Manager of New York Talking Machine Co. Sold $200,000 Worth of Liberty Bonds in Recent Drive

Roy J. Keith, vice-president and general manager of the New York Talking Machine Co., Victor wholesalers, was one of the most energetic workers in behalf of the Third Liberty Loan. As a member of the talking machine committee working for this loan Mr. Keith left nothing undone to increase the figures for this division, and when the final totals were ready for presentation he had the honor of being able to report the receipt of more than $200,000.

This total included the subscriptions of the members of the New York Talking Machine Co., every one of whom subscribed to one or more bonds. The company itself also subscribed very liberally, and it is interesting to note that at the present time the New York Talking Machine Co. owns Liberty Bonds totaling more than its entire capitalization.

Arthur D. Geissler, president of the company, in addition to a handsome subscription in New York, also subscribed liberally at French Lick Springs, where he spent a fortnight during the loan drive. Incidentally, while at this famous resort, Mr. Geissler bought a golf ball, which was auctioned in behalf of the Red Cross. As he paid $400 for this golf ball it is safe to assume that he will keep it for tournament play.

The $200,000 reported by Mr. Keith also includes a subscription of $33,000 given to Mr. Keith by the Otto Heinenman Phonograph Supply Co., well-known motor manufacturers, and $90,000 of this total was raised at a concert given at the University Glee Club at the Hotel Astor. At this concert Reinald Werrenrath, the famous baritone and exclusive Victor artist, conducted the drive for the Liberty Loan.

Twenty local Victor dealers also subscribed to Mr. Keith's Liberty Loan total, and when it is considered that twenty-nine members of the company's staff are now in the service of Uncle Sam, it can safely be said that this company is "doing its bit" for democracy.

SEMI-PERMANENT NEEDLES

TO FILL AN EVER PERMANENT NEED IN THESE MOST WONDERFUL

NOT ONLY BECAUSE THEY Seldom NEED TO BE CHANGED—A PACKAGE OF FIVE NEEDLES PLAYING FAR MORE RECORDS THAN THE SAME NUMBER OF NEEDLES PROCURED FOR THE SAME COST VALUE—BUT ALSO BECAUSE OF A REAL IMPROVEMENT IN QUALITY OF REPRODUCTION AND BY COMPARISON WITH THE ORDINARY STEEL NEEDLE, WHICH IS TAPERED AND ENLARGES ITS DIAMETER AS IT Wears DOWN, WEARING EACH RECORD NEAR ITS CENTRE MORE THAN AT THE BEGINNING OF THE RECORD, "VALLORBES NEEDLES" REALLY PROLONG THE LIFE OF RECORDS

Vallorbes Jewel Company

LANCASTER, PA., U.S.A.
REGARDLESS of his product, if a manufacturer is to grow, to prosper, his product must stay sold. A phonograph is made up of many parts, and of these the motor is of major importance.

When the Stephenson Precision-Made Motor was introduced, many compliments were received; on the spring drum construction, the tapered bearing turntable shaft, the silent wind, the running qualities ... and many initial orders were received. The initial orders were trial orders ... the subsequent repeat orders were because of the inherent merit of the Stephenson Precision-Made Motor. Because manufacturers appreciate that this motor helps them to keep their product sold ... helps them to make satisfied customers ... helps them to prosper, to grow.

Stephenson, Inc., One West 34th Street, New York
L. W. McChesney Wins Promotion

Is Appointed Assistant General Manager of Thos. A. Edison, Inc.

Leonard W. McChesney, for many years connected with Thomas A. Edison, Inc., has been appointed assistant general manager of Thomas A. Edison, Inc., under C. H. Wilson. Mr. McChesney started with the Edison organization about fourteen years ago in the advertis-

Leonard W. McChesney

vertising department under his father, L. C. McChesney, and gradually progressed to the position of assistant advertising manager. In 1912 he resigned to become advertising manager of the General Film Co., but returned shortly after to the Edison Co. as sales manager of the motion picture division, succeeding H. O. Flink-

un. As general manager of this division. Until the motion picture business of the Edison Co. is entirely liquidated and closed out, Mr. McChesney will also retain the title of manager of motion picture division.

R. F. Bolton Off on Western Trip

Columbia Foreign Language Record Business Shows Great Increase—New Literature

R. F. Bolton, sales manager of the international record department of the Columbia Graphophone Co., left this week for a trip through the Middle West, which will include a visit to the Columbia branches and representa-

tives as far west as Kansas City and Minne-

apolis. Before leaving for the West Mr. Bol-

ton commented upon the fact that the Colum-

bia foreign language record business had shown a splendid increase this year, the sales totals for the first four months of 1918 being far ahead of last year. This record is particu-

larly gratifying in view of the many merchan-

dising problems incidental to the war.

This department has just issued a very attrac-

tive set of booth hangers, listing records in the various languages, each accompanied by a de-

scriptive cut. These records are carefully se-

lected from the general catalog, and as the lists are changed monthly, the dealers will have an opportunity of displaying practically the entire catalog in their booths.

The newspaper campaign in behalf of foreign language records which was recently inaugurated under Mr. Bolton’s direction is producing splen-

did results.

SOME IMPORTANT APPOINTMENTS

Ratified at Recent Meeting of Directors of Otto Heineman Photograph Supply Co.

At a meeting of the board of directors of the Otto Heineman Photograph Supply Co. held May 8 at the executive offices of the company, 25 West Forty-sixth street, New York, the following appointments were ratified:

A. L. Fritzsche was elected a director of the company. Mr. Fritzsche is general sales man-

ager of the General Fire Extinguisher Co., Cleveland, O., being a member of the executive committee of that company. This is one of the most prominent industrial concerns in the Middle West, and is credited with doing the largest fire extinguisher business in the country.

J. Schechter, a member of the law firm of Schechter & Lotsch, New York, identified for many years with the industry, was elected treas-

urer of the company, and Miss F. Aufrecht was appointed cashier.

Thos. E. Griffin was appointed manager of the new Springfield, Mass., factory, and Charles E. Kramer assistant manager. Both are well known in manufacturing circles, and will be in charge of the new record factory.

PRICE QUOTATION SHEETS

Prepared by the Gloria Phonograph Supply Co., New York, which placed on the market last month the Gloria steel needle, has just prepared a com-

plete set of price quotation sheets for their dealers, in order to provide its patrons with a standard set of prices that will apply to all or-

ders.

The company believes that this is the only way to successfully merchandise any prod-

uct, and this policy will be one of the important factors in the company’s sales and merchandis-

ing plans.

Since the introduction of the Gloria steel needle last month requests for the agency for this needle have been received from all parts of the country. The company is living up to its promise of making prompt deliveries of its products, and arrangements have been consummated whereby factory facilities will be mate-

rially augmented in order to adequately handle the increasing demand for Gloria steel needles.

Plans have been completed for an intensive sales campaign in behalf of this needle, and

Rudolf Gaertner, president of the company, ex-

pects to announce the details of this plan within the next few weeks. The company will en-

deavor to provide the dealers handling Gloria steel needles with an efficient system of co-

operation, and several practical ideas have been developed along these lines, to be soon released.

GOOD WORK FOR LIBERTY LOAN

Talking Machine Trade Subscribes $1,000,000 of $3,017,250 Reported by the Allied Music Trades

—J. N. Blackman’s Able Chairmanship

The local talking machine trade made a won-

derful showing in the recent Third Liberty Loan drive, when the committee in charge of the talking machine division of the Allied Music Trades, under the chairmanship of J. Newcomb Blackman, rolled up a total of $1,000,000 in sub-

scriptions, allowing the pinic to reach its full mat-

ter of courtesy, to tie them at that figure. The total subscriptions to the loan for the Allied Music Trades was $3,017,250.

Although the official figures for the talking machine men were given as a round million, that department of the trade is also to be credited with a substantial portion of the $631,700 sub-

scribed at the great rally at Carnegie Hall on April 30, at which musicians and artists asso-

ciated with talking machine companies supplied the greater part of the program. The story of the rally appears in another section of The World.

The showing made by the talking machine trade is particularly significant inasmuch as sub-

scriptions to the second Loan amounted to something under $290,000. In other words, the trade quadrupled its record, and in doing so made a bigger gain than any other branch of the industry.

When the totals of the subscriptions to the Third Loan were reported by the committee of the Allied Music Trades, the following signifi-

cant telegram was sent to William G. McAdoo, Secretary of the Treasury: “We pledged you $1,000,000 for Third Liberty Loan and actually raised $3,017,250, a gain of 276% over our quota, which we hope will be considered a highly essential response from a so-called non-

essential industry. We are always ready to answer the call.”

So successful was the work of Chairman Blackman and his associates in the Liberty Loan campaign that the piano men tried to have him take the chairmanship for the trade in the coming Red Cross drive, but for business reasons Mr. Blackman was compelled to decline.

LOS ANGELES "TALKER" MEN MEET

Large Attendance at Recent Meeting—Some Important Resolutions Passed Regarding Time Sales and Interest—Some Interesting Talks.

LOS ANGELES, CAL., May 4—The Retail Talking Machine Dealers' Association of Southern California had its regular meeting at Barker Brothers on the evening of April 30. In all sixteen of the twenty-three firms belonging to the association were represented, and many things of interest to the trade were discussed.

A resolution was passed limiting all contracts to fifteen months, with all contracts to draw 7 per cent. interest. While most of those present seemed to be in favor of not advertising terms, this matter was left to the discretion of the different dealers with the understanding that if they did the advertisement must contain a cut, the model and the price of the machine.

The following firms, Johnston Music Co., Starr Piano Co., Walter R. Gage Co., Broadway Department Store, Hamburger & Sons and the Musical Record Shop, have not joined the association as yet, but committees have been appointed to call on them, and it is expected they will all be in the fold by the next meeting.

Through the courtesy of Mr. Booth, of Barker Brothers, the association picture was taken in the Barker Brothers photographic department.

Only officers and department managers are eligible to membership in this body, but the association kindly elected as an honorary member the Talking Machine World's local correspondent, H. H. Fish.

Frank Amyx, vice-president and general manager of the Wiley B. Allen Co., was present and spoke at length on several subjects of interest.

Wm. H. Richardson, chairman of the publicity committee, gave an interesting talk on that subject, and among other things spoke of the "Memory Contest for School Children," advocated by C. M. Tremaine, of the National Bureau for the Advancement of Music, and its bearing on the trade.

It was decided to make the next meeting an open one and all employees in the local talking machine departments are invited. A banquet followed by an informal dance will be the feature.

Following are the names of the persons in the accompanying picture: Reading from left to right, seated, are Harold Jackson, manager talking machine department, Wiley B. Allen Co.; George H. Barnes, proprietor Barnes Music Co.; treasurer of association, E. S. Dibble, manager talking machine department, Fitzgerald Music Co.; secretary, P. H. Beck, manager talking machine department, George J. Birkel Music Co.; president, J. W. Booth, manager talking machine department, Barker Brothers; first vice-president, C. W. Colyar, proprietor Colyar's Furniture Co.; second vice-president, E. Holland, proprietor Vernon Music Co. Standing, left to right, J. B. Chamberland, president Hollywood Furniture Co.; Frank Salyer, manager talking machine department, Bartlett Music Co.; Nathaniel Shiresohn, proprietor Shiresohn Brothers; Howard Brown, manager talking machine department, Lyon-McKinney Smith Co.; H. H. Fish, representative The Talking Machine World; Wm. H. COLUMBIA RECORDS OF FOLK DANCES

Educational Department of Columbia Co. Announces a Special Set of Country Dances

Because of the introduction of physical training in schools throughout the country and the widespread interest in folk dancing, the Columbia Co.'s educational department has prepared a special set of English country dances, Morris dances, and sword dances, recorded under the personal supervision of Cecil J. Sharp, a recognized authority on this work. These records have been accepted for use in the New York City schools. Mr. Sharp is an honorary director of the English Folk Dance Society and of the Stratford-on-Avon School of Dance and Song. For three years he has been teaching these English dances in the leading educational centers of America, and his work has received the highest praise.

There is a growing demand for penmanship records that will give rhythm count and instruction helpful to the school children in their daily penmanship exercises. The Columbia Co. takes care of this demand by the issuance of the Kirby rhythmic penmanship records, which is a splendid adaptation of the correct rhythmic forms found in music, woven into rhythmic counting patterns, for use in instruction in handwriting. These records were made by J. Albert Kirby, penmanship teacher of the High School of Commerce in New York City, where this rhythmic system is in daily use.

PROFONENT EDISON STAR "ADOPTS" COMPANY OF INFANTRY

Herewith is shown a picture of Christine Miller, noted Edison artist, inspecting Company G of the 330th Infantry, at Camp Lee, Peters-
burg, Va. Miss Miller, who in private life is now Mrs. Clemson, has "adopted" this company because her former accompanist is a member of it, and the picture shows the company going through "inspection arms" for the benefit of its

J. F. WATTERS JOINS NATIONAL ARMY
Secretary of the Pathé Frères Phonograph Co., Brooklyn, Receives Several Handsome Gifts From His Co-workers on His Departure

J. F. Watters, secretary of the Pathé Frères Phonograph Co., Brooklyn, N. Y., is now a member of the National Army, and, after spending a few weeks in camp, will leave for “over there.” Before joining the National Army Mr. Watters was presented with several handsome gifts from his co-workers as a mark of their affection and esteem; these gifts including a gold wrist watch and a silver cigarette case striped and lined with gold.

Although Mr. Watters has been connected with the talking machine industry for only the past few years, he has already won the friendship and esteem of Pathé jobbers and dealers throughout the country. A tireless worker and possessed of a pleasing personality, Mr. Watters during his two years’ association with the Pathé Frères Co. has rendered the company’s clientele invaluable assistance and co-operation.

He joined the Pathé Frères forces as a member of the sales department, but his unusual ability and thorough knowledge of merchandising soon enabled him to win important promotions until he was finally appointed secretary of the company. Every member of the Pathé force is numbered among his personal friends, and they all wish him “God speed” as a member of Uncle Sam’s lighting forces.

RETURNS FROM CANADIAN TRIP

George W. Hopkins, general sales manager of the Columbia Co., returned to New York last week after a visit to the company’s branches in Toronto, Buffalo and Cleveland. Mr. Hopkins was gratified to find conditions in these sections very satisfactory, and Canadian business in particular is increasing by leaps and bounds.

While at Buffalo Mr. Hopkins addressed the members of the Greater Buffalo Club, who were in session at the Hotel Lafayette, on the subject of “Psychology of the Little Things of Business.” This address was enthusiastically received by the Buffalo business men, who appreciated the many effective points that Mr. Hopkins emphasized in his talk.

Twenty-five submarine chasers, built at the Firemen’s Loyalty Yard, have been equipped with Victrolas.

“MANAGING BUSINESS IN WARTIME”

Two Volumes Just Issued by A. W. Shaw Co. Designed to Help the Business Man In This Country to Meet His Present Problems

“Managing a Business in Wartime,” a most valuable work in two volumes, has just been issued by the A. W. Shaw Co., of Chicago and New York, and is designed to help the business man in this country to meet the problems he is encountering just now, aided largely by the experience of British business men during their several years of war.

In the very first chapter—Adjusting a Business to Wartime Conditions—T. J. Zimmerman, managing editor of the British System, tells exactly how a British business met the new conditions and sudden problems that the war brought.

Other chapters in the first volume are: What the British Business Man Learned from British Experience; Hints on Handling Wartime Business; How Working Hours Affect Output; Training the Boy Worker.

The second volume treats particularly of ways for American business to meet wartime conditions, and the list of chapter titles suggests the possibilities. For instance, The Probable Effect of the War Upon Advertising; Out in Financing; How to Sell to the Government; More Production with Fewer Men; Wartime Buying Problems; and many others.

Meeting the business problems that will confront us, when peace is declared, forgotten. Here are one or two of the subjects covered:

Where Will European Competition Find Us When the War Is Over?

"From Business to the Army—Preparing for the Trade Contest."

Some of the men who have made these books valuable for American business men by their contributions are Lord Leverhulme, Mr. H. W. Macara, Rt. Hon. John Hodge, M.P., Minister of Labor; Laurence R. Dicksee, of the University of London; Ralph E. Heilman, of Northwestern University; W. R. Basset, of New Franklin, Basset & Co.; Reginald Trantaschold, John Hays Hammond, Theodore E. Burton, Noble P. Hodgson, and other successful business men.

In short, these books show the American business man just what he must do to readjust his business to the demands of war, and during the necessary help to the character of the product he should handle, from the minor problems which may be more or less obvious to anticipating the necessary modifications that the Government might otherwise suggest, sooner or later.

SALES STAFFS MADE WELCOME

The general sales department of the Columbia Co. has inaugurated a policy of inviting members of the sales staffs in the different branches throughout the country to visit the executive offices, in order to permit the executives to become better acquainted with the men “on the firing line,” and so that the salesmen may acquire first-hand information regarding Columbia products. The salesmen visit the factory at Bridgeport and the recording laboratory and return to their home cities imbued with an adequate appreciation of Columbia efficiency and quality.

Among the salesmen who visited New York this week were H. L. Ireland and H. L. Fields, of Pittsburgh, accompanied by Mrs. Ireland and Mrs. Fields; Wm. Roy, Kansas City branch; Louis B. Sayer and George L. Schuster, of Indianapolis branch, and W. M. Korhammer, of the Baltimore branch. Mr. and Mrs. Ireland and Mr. and Mrs. Fields made the trip to New York from Pittsburgh, accompanied by W. H. Mills, assistant manager of the New York branch, and formerly, assistant manager of the Pittsburgh branch, who had returned to the “Smoky City” for a few or two in order to bring his automobile to New York.
OPPOSE ZONE POSTAL RATES

Merchants' Association Declares It Will Harm Publishers

The Merchants' Association recently sent the following telegram, protesting against the application of zone postal rates on second-class mail matter, to Senator John H. Bankhead, chairman of the Senate Committee on Post Offices and Post Roads:

"This association believes that the application of zone postal rates on second-class matter must inevitably greatly reduce the circulation of periodicals by making the cost of distant circulation prohibitory, thereby greatly reducing the revenues of publishers, making the business generally unprofitable, and forcing many publishers out of business. Such zone rates will be especially destructive to the great publishing interests of the Eastern States, inasmuch as the cost of circulation of their publications to distant points will exceed their revenues from such circulation and will, moreover, create conditions which will heavily discriminate in favor of centrally located publishers.

"The Government, because of enforced decrease in the circulation of periodicals, would fail to realize the increase in postal revenues expected from the application of zone rates on second-class matter, and, further, would be deprived of large revenues from the extra profits and income taxes by reason of the unprofitable condition of the publishing business arising from a prohibitory postal charge. The great decrease in the circulation of periodical literature which must result from a prohibitory postal charge will, to a considerable extent, deprive the American people of educational opportunities of great importance and benefit to them. For these reasons we urge that the proposed application of postal zone rates to second-class mail matter be not approved."

PHONOGRAPH HARDWARE CATALOG

Hammacher, Schlemmer & Co. Issue Booklet Bearing on Talking Machine Cabinets

Hammacher, Schlemmer & Co., Fourth avenue and Thirteenth street, New York, have just issued a catalog in which are illustrated and listed various items of hardware which are used on talking machine and phonograph cabinets. Various kinds of hinges are shown, including hinges of wrought brass with dapped butts, the Soos invisible hinges, which are used by a great many talking machine manufacturers, as well as the top supports and slides, stay joints and desk slides.

The book also contains illustrations of elbow catches, grip neck casters, Philadelphia stem casters, faultless casters and "Steel Gem" roller-bearing casters and the various parts which are installed with it. A complete line of furniture slides and leg tips as well as brass leg sockets and flush pulls are shown. Several pages are devoted to knobs, including brass knobs both wrought and cast, polished and dull finished, glass knobs and wooden knobs. A complete line of mortise locks are also included, as well as a display of key blanks. Other items are corrugated steel fasteners, used for joints and wood screws, paper covers, packing bolts and felt for washers, discs, linking, etc.

TO SELL PARQUETTE ASSETS

By order of the Supreme Court, Kings County, there will be sold at auction on Wednesday, May 22, the property and assets of the Parquette Mfg. Co., which has made a general assignment for the benefit of creditors. The assignee, Maurice L. Shain, will sell at public auction through Joseph Feldstein, auctioneer, at Building No. 1, Bush Terminal, Brooklyn, N. Y., the entire property and assets consisting of a complete plant for the recording and manufacturing of phonograph records, 10,000 Par-o-Ket records, and a large number of master and mother matrices.

THE BRONX EXPOSITION

To Open May 30 and to Remain Open Five Months Each Year

In order to assist the manufacturers of the United States in capturing their just share of the export business of the world, and to provide them with a market place where they may meet the foreign buyers who are coming to this city from all over the globe, the New York International Exposition of Science, Arts and Industries is now being constructed here. It will be opened to the public, beginning on May 30 and continuing until November 1. The exposition is to be permanent, along the lines of Shepherd's Bush, London, and the annual trade conference at Lyons, France. Each year it will be open during the period indicated.

The exposition grounds cover twenty-seven acres, and are situated at the East 177th street subway station, West Farms. This is one of the most accessible points in Greater New York, and is said to have the best transportation facilities ever possessed by an international exposition in this or any other country. The exhibit buildings now under construction include a Palace of American Achievements, Palace of Fine Arts, Temples of Liberal Arts and Varied Industries, and other housing features found at previous expositions of this character.

That Canada will have a representative exhibit now seems assured. The directors of the exposition have received notice that exhibits are being assembled by the Provinces of Quebec, Manitoba, Nova Scotia, New Brunswick, and Ontario. It is expected that for the second year the exposition Canada will have an entire building in which to house its products.

Charles F. Lilley, proprietor of the New York Phonograph Co., of Elmira, N. Y., recently celebrated his second anniversary in the business. He has been most successful since opening his store in Elmira, and has built up a large and profitable clientele.

EDISON THEATRE AT MUSIC SHOW

Splendid Program Arranged for the Edison Display to Be Made at the National Music Show in Grand Central Palace Early Next Month

Thomas A. Edison, Inc., have arranged their section of the music show exhibit at the Grand Central Palace as an Edison Theatre. This theatre is to be fully equipped with all the necessary accessories of a regular theatre, will seat about six hundred people and have a splendidly arranged stage.

Verdi E. E. Fuller, who is in charge of the Edison tone test work, is arranging a series of recitals for afternoon and evening to be given by such artists as Marie Tiffany, of the Metropolitan Opera Co.; Marie Moreisey, concert contralto; Vernon Dalhart, Frederick Wheeler, the Fleming Trio and others. Anybody who has never heard a tone test will find this a splendid opportunity to become acquainted with this feature of Edison advertising.

The exhibit will be a view de luxe of the celebrated Periodized models with some surprises in new styles, and will be in a space adjoining the Edison Theatre. There will also be shown in this space the famous Army and Navy model as well as some of the regular models.

The Edison dealers' convention, which will be held at the Waldorf-Astoria, takes place during the same week as the music show, and it is expected that the Edison Theatre will be headquarters for hundreds of Edison enthusiasts.

A. L. Lehman, of May, Stern & Co., Pittsburgh, Pa., was a visitor to New York recently calling at the Columbia executive offices and renewing his friendship with Manager Friedell, of the New York branch, who, prior to his arrival in New York, had been manager of the Pittsburgh branch. May, Stern & Co. are one of the largest Columbia dealers in that territory, and Mr. Lehman's satisfaction with Columbia product is reflected in the company's fast-growing sales totals.

The Greatest Mother in the World

Stretching forth her hands to all in need; to Jew or Gentile, black or white; knowing no favorite, yet favoring all.

Ready and eager to comfort at a time when comfort is most needed. Helping the little home that's crushed beneath an iron hand by showing mercy in a healthy, human way; rebuilding it, in fact, with stone on stone; replenishing empty bins and empty cupboards; bringing warmth to hearts and hearths too long neglected.

Seeing all things with a mother's sixth sense that's blind to jealousy and meanness; seeing men in their true light, as naughty children—snatching, biting, bitter—but with a hidden side that's quickest touched by mercy.

Reaching out her hands across the sea to No Man's Land; to cheer with warmer comforts thousands who must stand and wait in stenciled and crawling holes and water-soaked entrenchments where cold and wet bite deeper, so they write, than Boche steel or lead.

She's warming thousands, feeding thousands, healing thousands from her store; the Greatest Mother in the World—the RED CROSS.

Every Dollar of a Red Cross War Fund goes to War Relief

This page contributed to the Winning of the War by the

NEW YORK TALKING MACHINE COMPANY
119 West 40th Street, New York

CHICAGO TALKING MACHINE COMPANY
10 No. Michigan Ave., Chicago, Ill.
THE TALKING MACHINE WORLD

FROM OUR CHICAGO HEADQUARTERS

E. P. VAN HARLINGEN, Manager

CHICAGO, May 15.—Both the wholesale and retail trade of Chicago are jubilant over the showing that they made during the recent Liberty Loan campaign. While it is true that the allotment for the music trades of Chicago was handled principally by piano men, the talking machine men proved themselves a potent factor during the big drive by helping push their quota of $200,000 over the top. When the final returns of the big drive were officially announced it was shown that from the music trade alone there were 3,485 subscribers, and the amount subscribed was actually $740,150 or approximately 6 per cent. above the original allotment. All the manufacturers, distributors, jobbers and retail men rolled up their sleeves and took part in the fray, devoting every possible moment that they could to make the drive a success.

However, the wholesale trade had a very good month and are trying the best they can to take care of their orders, which kept coming in principally from the outlying districts. The supply, however, was way below the demand, and as a result distributors were very careful in apportioning their goods in order to keep peace in the family, so to speak. The record situation is somewhat improved over last month and shipments are coming through from the plants in better shape.

If the demand for records may be used as an indicator of the nation's pulse, it is an assured fact that the great wave of patriotism which has swept over the country is growing more intense. This is apparent because the demand for patriotic numbers has increased in greater proportion than any other time during the past.

With the retail trade there was a slight falling off in Chicago during the past month. This was expected as, according to the majority of the dealers, it is customary at this time of the year—moving season. The falling off, however, was principally for machines, but the record business made a good showing and the sale of patriotic and dance records had a tendency to balance the deficiency in sales of machines, and as a result kept the trade in a somewhat even status.

He Went to Rockford

H. Elthorn, who for the past five years has been traveling through the Indiana and Illinois territory for the wholesale Victor department of the Emery Phonograph Co., spent a few days last week in Chicago in the company's interests.

Move to Larger Quarters

The Emery Phonograph Co. within a few days will move the headquarters which it now occupies on the fifth floor of the Regal Building, 7 East Jackson boulevard, to its new location on the fourth floor of the same building. Manager W. F. Clement states that the new headquarters will occupy the space of approximately five thousand square feet and the offices are being arranged so as to provide for several large demonstration rooms. The shipping department will be on the same floor as well as the general offices and demonstration room, and arrangements have been made for a large space in the basement which will be devoted entirely to stockroom. Mr. Clement states that the new nine-inch Emery records have impressed the trade very favorably, and from present indications the new field for these records is unlimited in that the independent dealers are now able to supply their trade with large records, which heretofore they were unable to do. A large stock of these nine-inch records is carried by the Chicago headquarters and the wants of the Central Western territory are supplied from this point.

To Jefferson Barracks

H. W. Higgins, assistant to F. W. Clement, manager of the Chicago branch of the Emery Phonograph Co., received his official notice this week to report to Jefferson Barracks, St. Louis, Mo., on April 6. Mr. Higgins has been Mr. Clement's assistant for the past two years and will be a great loss to the Chicago branch.

Reduced Price on Certain Styles

The Columbia Graphophone Co. announced through a letter which was sent out to their dealers a few days ago that their small-size talking machine type "E" had been reduced from $85 to $75. Columbia has two types of this machine, the large and the small, and this reduction was made in order to differentiate as both were formerly quoted at the same figure.

W. C. Fujihi Visits

W. C. Fujihi, manager of the Chicago headquarters of the Columbia Graphophone Co., made a short visit to the Columbia headquarters in New York this week.

Singing Lullabies

W. H. Wade, manager of the Wade Talking Machine Co., is receiving congratulations from his many friends in the trade, due to the fact that a young lady by the name of Ruth Hall Wade is now residing at his home. About two weeks ago "along came Ruth" and since the arrival, Daddy Wade has been an exceptionally busy man memorizing various well-known lullabies.

A Busy Man

Frank P. Read, of the Automatic Container Co., is up to his neck in work these days in making preparations for the big show at New York, and formulating plans for the big sales campaign to be launched by his company within the next few weeks. He is establishing a large corps of competent traveling salesmen and fitting them out with sample displays. He is also fitting out a full line of the company's product for exhibition purposes at the New York show and will be in personal charge of the company's booth, number 116 on the mezzanine floor.

(Continued on page 85)

THE "WADE" FIBRE NEEDLE CUTTER

Still in the Lead and Running Well

Another milestone in the great talking machine industry is almost reached. The success of the coming year will largely depend upon the wisdom with which the experience of the past is applied. Ask the man who sells Wade Fibre Needle Cutters—he knows from experience that they are ready sellers.

BECAUSE
— they give "no or more" new points to each fibre needle.
— each replacement identical to the original point—time-saving.
— means increased sales of fibre needles; the habitual use of which lengthens the life of the records, results in more natural reproduction, increases the enjoyment and—last but not least, regular jobbers' discounts apply.

A. Fricke, of the Lakeside Supply Co., will accompany Mr. Read to the show and will assist him in taking care of the display. Both Mr. Read and Mr. Fricke will demonstrate for the benefit of the manufacturers attending just how the Automatic Container Co.’s filing devices can be used in all models of talking machines. A very beautiful Artkraft model containing the latest design of the automatic container filing device is being prepared for the show by the Lakeside Supply Co.

A. D. Geisler Visits

A. D. Geisler, president of both the Chicago Talking Machine Co. and the New York Talking Machine Co., was a visitor to Chicago the first part of the week, having come from French Lick Springs, where he was enjoying himself for about two weeks. After spending a few days in Chicago Mr. Geisler left for his headquarters in New York.

Six Best Sellers

The six best Edison sellers for the past month are: "U. S. Army Camp Songs"; "Bungalow in Quogue" and "Just a Voice to Call Me Dear"; "Leave It to Jane" and "Sirens' Song"; "Jack O’Lantern Fox Trot" and "Knit, Knit, Knit"; "That’s Why My Heart Is Calling You" and "Will You Remember"; "Naval Reserve March" and "Spirit of America.

Pathé announce for the past month the six best sellers as follows: Who Knows?" and "Mary of Argyle"; "Keep the Home Fires Burning" and "When the Great Red Dawn Is Shining"; "Vocal Gem Medley, No. 2"; "One Day in June" and "I’m Sorry I Made You Cry"; "Hungarian Rag" and "American Jubilee"; "Hearts and Flowers" and "Will You Remember?"

Six best Victor sellers for the months are: "Four American Folk Songs"; "Sweet Emalina, My Gal" and "While the Incense Is Burning"; "Each Stitch Is A Thought of You, Dear" and "A Little Bit of Sunshine"; "Everybody’s Crazy "Eont the Dog-Gone Blues" and "In the Land of Yamo Yamo"; "Roses of Picardy" and "Love’s Garden of Roses"; "The Last Long Mile" and "K-K-K-Katy."

The six best Columbia records for the month are: "Quartet From Rigolotto" and "Sexet From Lucia"; "I Hate to Lose You" and "For the Two of Us"; "Any Old Place the Gang Goes (I’ll Be There)" and "Pasha-a-Ballah"; "On the Missouri" and "Kathleen Mavourneen"; "A Baby’s Prayer at Twilight" and "Gate City"; "Klima Waltz" and "Hilo March"; "What Are You Going to Do to Help the Boys?" and "I’m Going to Follow the Boys"; "Cleopatra" and "K-K-K-Katy."

The six best Paramount sellers for the month are: "Pasadena Day March" and "Lights Out"; "Pocat and Peasant Overture, Part 1" and "Pocat and Peasant Overture, Part 2"; "Where the River Shannon Flows" and "When You and I Were Young, Maggie" and "I Wonder Where My Love Lies Dreaming" and "The Rosary"; "Baby’s Prayer at Twilight" and "One Day in June"; "Havanaola" and "Ragging the Scale"; Grummel records: "Humoresque" and "Ave Maria" (Helen Ware) (Art Tone record); "Mary of Argyle" and "Eileen Alanna"; "Hilo March," "Alma Oe" and "Us Like No a Like" (Hawaiian instrumental trio); "Good-bye Barney Boy" and "Yock-a-Hilo Town"; "Fox-Trot Medley" and "One-Step Medley"; "Hello, I’ve Been Looking for You" and "Liberty Bell.

Donates Victor to U. S. S. “Wilmette"

Mrs. Edwin Allen Mead, a prominent society woman of Wilmette, has donated a large Victor cabinet talking machine to the crew of the U. S. S. “Wilmette.” The “Wilmette” was formerly the old steamer “Eastland,” which capsized in the Chicago River, causing a loss of lives. This boat has been recently reconditioned and converted into a scout ship for the U. S. Navy and received its overhauling and complement of men and guns at the shipbuilding yards in South Chicago. Many of the boys of the crew are sons of well-known families of Wilmette, and for this reason Mrs. Mead made her donation. The talking machine was purchased from P. S. Ridgeway, manager of the Victor department of the Cable Company.

New Home for Hawaiia

The Ottawa Phonograph Co., whose plant at Ottawa, Ill., was destroyed by fire a few weeks ago, have purchased a splendidly equipped factory at Geneva, Ill., only an hour’s ride from the Chicago market. It is a three-story brick structure, thoroughly equipped for the exclusive manufacture of phonographs and is run entirely by electric power with individual motors for each machine. The plant is now in operation and several hundred cabinets are already in progress through the factory. Within the next few weeks they will be ready to make shipments to their dealers. At the general offices and wholesale warerooms in the Republic Building, Sales Manager Fred Moynahan expressed his satisfaction that, although six weeks elapsed between the burning of the plant and the resuming of operations in the new factory no cancellations of orders had been received, this showing conclusively the value placed on the Hawaiian agency by the dealers. It is the intention of the company to change the name of the Hawaiian Phonograph Co., and a meeting of stockholders has been called for June 3 in order to take the necessary steps to that end.

If All Phonographs Were Like The Brunswick

If ALL were endowed with The Brunswick Method of Reproduction, the opportunity for dealers would be similar and uninteresting.

Brunswick Dealers, however, have infinitely more to offer their customers.

And ideas that are exclusive.

No other instrument has, or can ever have, this new-day way of playing records.

Some may attempt, but our patents are broad.

Only Brunswick Dealers, in pointing out the advantages of The Brunswick Method of Reproduction, can offer The Ultona, the wonderful all-record player.

Only Brunswick Dealers can offer The Brunswick Tone Amplifier, the latest and greatest advancement of all in acoustic arrangements.

Other dealers cannot offer these wanted features.

And we are creating a demand for them among music lovers in our national advertisements.

People want to know about The Brunswick Method of Reproduction. They want to hear this instrument.

Only Brunswick Dealers can satisfy this demand and make the sales.

A peep in our new sales portfolio will make you read the whole interesting story.

A copy will be sent on request to super-dealers who are interested in handling the super-Brunswick in a super-way.

We already have a great many fine dealers, but there are several locations offering profitable opportunities.

Ask for The Brunswick Dealer Portfolio now — it tells a money-making story.

Why MANDEL SERVICE
is a guarantee of sales

Dealers have learned the advantage of handling the MANDEL LINE of superior Talking Machines because they are made in their entirety under one roof—a guarantee of uniformity throughout.

THE MANDEL LINE of Talking Machines is sold on a written guarantee for service backed up by one of the most efficient up-to-date factories in existence. A fitting assurance of its superiority.

In quality, workmanship and richness of tone MANDEL TALKING MACHINES measure up to the highest accepted standard, yet in price are within the reach of the most modest purse.

The Mandel Talking Machine is the Machine "Without a come-back." Its standardized make-up assures service even under the stress of severe usage.

Our co-operative plan to dealers is the biggest inducement ever offered by any reliable talking machine line. We not only help sell our line but help dealers buy it.

Send to-day for details of this unique plan—it is "opportunity pounding on your door"

Returns From Vacation

G. W. Davidson, of the Talking Machine Shop, who for the past six weeks had been visiting Philadelphia as well as the Victor plant in Camden, returned to headquarters in Chicago this week. Others of the Talking Machine staff now on vacations are Miss Pauline Tishler and Frank Hall.

Like Morenus Talking Machines

The Morenus Piano Co., of this city, report that business is developing very nicely, and that dealers are particularly well pleased with the special horn construction and acoustic properties of the talking machine. R. F. Morenus has been out on the road a large part of the last month demonstrating the Morenus machine for some of his old friends in the piano trade with the result that he has secured some excellent accounts who are already sending in largely repeat orders.

B. & H. Co. Increase Capacity

The B. & H. Fibre Mfg. Co., makers of the B. & H. fibre needles, have found the demand for their product increasing at such a heavy rate as to necessitate larger factories; consequently, they have taken an entire additional floor of the building at 35 West Kinzie street, in which their factory is located, and it is now being equipped for their purposes.

Inside of thirty days the company will place a new package of fibre needles on the market. The needles which will be known as the No. A needles are considerably shorter than the standard fibre needles and naturally produce a greater volume of tone. The price, however, will be the same as the regular package, namely, 40 cents per hundred needles.

Puritan Distributor Active

James B. Orth, the new distributor for Puritan phonographs in Chicago, is dispensing luxurious-looking cigars in glass cases in his richly furnished display rooms in the Republic Building. Also he is enthusiastic about the prospects for the new long horn wonder—as the Puritan is being advertised.

Mr. Orth says he never realized what students dealers are until they began to come to him in ever-increasing numbers to inspect this new long-horn principle and tell him what he didn’t know about physics and the principles of sound. Every one who sees it is so enthusiastic that sometimes the cabinet is threatened with destruction to get a real look at the horn, consequently Mr. Orth is having especially built a skeleton model showing this feature, and will have this on exhibition in a few days.

G. A. Laughead and E. W. Graham, both salesmen on Mr. Orth’s staff, are now calling on the trade in Missouri and southern Illinois, where a lively interest is reported.

Empire Phonograph Progress

John H. Steinmetz, president of the Empire Talking Machine Co., spent several days at Cleveland last month at the plant of the Empire Phonograph Co., of which he is secretary and treasurer. President McNamara and he made plans for the increasing of the output of the plant in order to take care of the large volume of business for the company’s product. “Our tone arms and reproducers will soon be the standard equipment on a number of well-known talking machines,” said Mr. Steinmetz. “Furthermore, we will be ready about the middle of this month with our new attachment for playing lateral cut records. The trade is showing much interest in this device and we are anticipating a large demand for it.”

Big April for Vitanola

Jeffrey B. Schif, sales manager of the Vitanola Co., of which he is president and treasurer, President McNamara and he made plans for the increasing of the output of the plant in order to take care of the large volume of business for the company’s product. “Our tone arms and reproducers will soon be the standard equipment on a number of well-known talking machines,” said Mr. Steinmetz. “Furthermore, we will be ready about the middle of this month with our new attachment for playing lateral cut records. The trade is showing much interest in this device and we are anticipating a large demand for it.”

which America stands, will go a long way at this time, when events transcend the powers of the ablest writer or orator, toward binding together in common ideals and sympathies the people throughout the country.

"Let us find some way for the industry to serve the country without risking injury to the spirit of the people who now, more than ever, need and depend upon music for economical mental relaxation and clean entertainment."

**Personal and Visitors**

**New District Sales Managers**

The Jones-Motrola, Inc., announce that W. Alton Carter has been appointed district sales manager for Illinois, Indiana, Michigan and Wisconsin with headquarters in Chicago, and that F. L. Sheppy has been appointed district manager for Missouri, Kansas, Nebraska and Iowa with headquarters in Kansas City.

**S. J. Turnes With Brunswick**

Sam J. Turnes, who was formerly connected with the Geo. P. Bent Co. in the capacity of advertising manager, is now associated with the phonograph division of the Brunswick-Balke-Collender Co., as advertising manager. After leaving the Geo. P. Bent Co., Mr. Turnes went over with the Burnett & Weinberger Co. as sales service manager and remained with them until he accepted his present position. Mr. Turnes succeeds H. E. Nelson, who is now stationed at the U. S. Government Aviation School for Mechanics at Portland, Me. To use his own words, "Sam," as he is popularly known throughout the trade, says that he just couldn't keep away from the old stamping ground and is glad to be back among his confraternity friends on the Row.

**Brunswick Activities**

The following is a partial list of new agencies that have been established by the talking machine department of the Brunswick-Balke-Collender Co., during the past month: Porch Bros., Altoona, Pa.; Wunderlich Piano Co., Kansas City; Kieselhorst Piano Co., St. Louis; the Knabe Warehouse, Inc., Baltimore, Md., and Washington, D. C.; J. Goldsmith & Sons Co., Memphis; E. Wittmann Piano Co., Memphis; and Hollenberg Music Co., Little Rock and Pine Bluff, Ark.

**SEEBURG EXHIBIT AT MUSIC SHOW**

Chicago Manufacturers Will Make Fine Display of Phonograph at National Music Show

CHICAGO, Ill., May 9—One of the most interesting exhibits at the National Music Show in New York from June 1 to 8 will be that of the J. P. Seeberg Piano Co., of this city. They will occupy Booth No. 14, and will be devoted to the Phonograph, the company's remarkable combination of electrically-driven player-piano and phonograph. Illustrations of the instrument will be found in the company's advertisement elsewhere in this paper. The Phonograph was announced to the trade last fall, but the company is now ready to go on the general market with it and have perfected their productive capacity to that end. In the meantime it has been tested in actual use, and a number of the instruments have been sold from the retail warehouses of this city, where it has proven to be a sight seller. In every instance the greatest degree of satisfaction has been expressed by purchasers. Furthermore, some of the best-known dealers in the country have placed sample orders and are extremely pleased with the instrument and its selling possibilities. Repeat orders are coming in rapidly.

The Phonograph is but a little larger than a large phonograph. The piano plays all standard eighty-eight-note player rolls and is especially adapted to the Q & S expression rolls with which it reproduces wonderfully the playing of the great piano artists. The phonograph is of the latest type and is equipped for playing all types of records. It is operated by a separate electric motor, independent of that operating the player-piano. The Phonograph is, it must be understood, not a coin-operated instrument. It is designed particularly for home use, but is also particularly adapted for clubs, hotel parlors and other places where it competently substitutes for both a good talking machine and a full player-piano. Those who have heard the instrument have been surprised at the volume and quality of tone of both the player and the phonograph. The Phonograph is a strictly unique instrument and will be inspected with keenest interest by the visitors to the show. It will also be shown permanently in New York at the company's new offices and salesrooms in the Bush Terminal Exposition Building, at 130 West Forty-second street.

**WHAT'S TIME TO A HOG?**

Does not this old story illustrate clearly the wrong viewpoint of the merchant who is habitually slow when meeting his obligations? The mountaineer's razor-backs were running loose and feeding on such fattening forage as grass and green apples. "Why don't you pen them up and fatten them quick with corn?" asked the summer boarder. "It takes so much time to get them ready for market so long as they run wild." "Hell!" snapped the mountaineer. "What's time to a hog?"—Kansas City Association Bulletin.

**THE TALKING MACHINE WORLD**

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 90)

**Claims Are All Right—But Only Proofs Count**

Any manufacturer may claim for his product all the qualities there are. That is his privilege. He may even think his claims are justified. You read the advertisement, so you know that makers, as a rule, are not over-modest in that regard. If you believe them all, they all make super-phonographs. In your experience, that theory doesn't hold.

**THE VITANOLA**

must be good, because it sells—and stays sold. Many propositions look good on paper—but when you apply the real test—selling—how many can stand up and sell the way the Vitanola does? AFTER THE FIRST VITANOLA IS SOLD IN YOUR TOWN more buyers will come in and ask for it. The consumer likes the Vitanola—because it gives a round dollar's worth of value for every dollar put into it. For this reason every owner is a Vitanola booster—and you know what consumer boosting means to your store. YOU GET A NICE PROFIT FROM EACH SALE. You get advertising of the best kind from each buyer—why shouldn't you handle the Vitanola in your town?

OPENING OF EELBEL BROS. STORE

Nearly 12,000 People Attend—All Entertained

With Delightful Program—Description of Building—Many Representatives From Prominent Music Houses Present

SOUTH BEND, Ind., April 29—Eelbel Bros., Inc., new store was a veritable bower of spring-time blossoms and greenery Saturday on the occasion of the formal opening. Nearly 12,000 people visited the store and were shown throughout the day and evening.

On the basement floor the sheet music is to be found, an endless array of all kinds of music. Three soundproof "tryout" rooms are given over to the player-pianos on this floor. On the first floor in the rear of the building is a beautiful green-tinted room, which is the recital hall. This room has a seating capacity of about sixty persons and was filled during the entire day. On the first floor are to be found twelve soundproof rooms for the trying out of Victrolas. An instant service record counter is on the first floor near the offices.

The front display window was tastefully arranged as a music room. Near the window was placed a wonderful floral creation, the compliments of the Chicago Talking Machine Co., Victor distributors. A beautiful basket of pink roses which stood at the entrance of the music room was the gift of the Whitney-Carrier Co., Toledo, Victor distributors.

On the second floor, which extends over the Max Adler store as well as the Eelbel Building, the rooms are given over to the exhibition of grand and Duo-Art pianos. The walls of the rooms are beautifully tinted and add much to the general attractiveness of the display rooms. Donahue's Orchestra played in these rooms during the evening. Beautiful roses were given as favors to the guests during the day and evening. Hundreds of pianos and victrolas were on display in the six rooms on the second floor, and on the third floor is to be found the stock and repair room. An automatic electric elevator in the rear building gives service to the four floors.

Representatives from several of the leading music houses were guests at the store for the opening day. They were W. W. Michaels, W. C. Griffith and G. P. Ellis, of the Chicago Talking Machine Co.; J. F. Dunham, of Camden; N. J.; Warren K. Kellogg, of Toledo, O.; Henry Gennett, of the Starr Piano Co., of Richmond, Ind., and David F. Cordingley, New York City.

FEATURE PARAMOUNT RECORDS

Active Campaign Inaugurated by the New York Recording Laboratories, Inc., Port Washington, Wis., in Behalf of These Records

An interesting feature of The World this month is a supplement devoted to Paramount records, made by the New York Recording Laboratories, Inc., Port Washington, Wis. The facts set forth therein give an excellent idea of the development of this organization both in the numbers represented as well as the artists connected with the recording department. This company have inaugurated an active sales campaign, and with a well-developed organization will bring the Paramount records to the attention of a large dealer and a purchasing clientele throughout the entire United States.

WINDOW THAT ATTRACTED MANY

During the recent drive for the Third Liberty Loan the Flatsbush Music Co., Brunswick dealers of Brooklyn, N. Y., trimmed their windows in a particularly attractive and patriotic manner, which drew quite heavy crowds. The Bruns-wick-Balke-Collender Co. were so pleased with the window that they had photographs taken of it and sent to all their dealers with a suggestion that they use similar window displays.

Different—But Practical

The MORENUS Phonograph is a Distinct Departure from a Tonal Viewpoint

The horn, which is entirely of wood, is built on the principle of the saxophone and enters the tone chamber at the bottom, not the top. The tone is big and full but mellow, and the reproduction of the artist’s voice or instrument is faithful to an unusual degree.

Among the other features is a unique tone moderator which actually graduates: an exceptionally high grade and acoustically correct tone arm and reproducer, and a cover support which makes handling the lid a delight.

The case designs are right and the cabinet work and finish unexcelled.

The MORENUS is in 3 STYLES

A. OAK, 48 inches high. Retail price, $110
B. MAHOGANY, 48 125
C. OAK and MAHOGANY, 50 inches high, 150

Very liberal discounts to the trade

A TRIBUTE TO THE COLUMBIA
Letter of Praise for the Columbia Grafonola
From Iowa Dealer Contained in Latest Issue of the "Columbia Record"—Other Items

There is published in the latest issue of the "Columbia Record," a house organ issued by the Columbia Graphophone Co., New York, an interesting letter from L. Ginsberg & Sons, Des Moines, la., relative to their satisfaction with the Columbia line, which they handle in their successful retail establishment in that city. This letter, which is a tribute to the sales possibilities of the Columbia product, reads as follows:

"After six months of pushing Columbia Grafonolas we wish to compliment you on the wonderfully dependable machines you people put out. Our troubles have been so small that we can call them practically nothing considering the number of Grafonolas we sell.

"We may here state that our business during the month of November, on Columbia Grafonolas exclusively, was over six times as much as the month of November, 1916, when we handled several different makes, and did not push any particular make.

"We also wish to take this opportunity of expressing our appreciation for the way the Schluder & Mueller Piano Co. have handled our business, as they have many times gone out of their way to give us service.

"Hoping that the Columbia Grafonolas will continue to progress in the future as they have in the last six months, we remain, yours truly, L. Ginsberg & Sons (Signed), L. D. Ginsberg."

Other interesting articles in this issue of the "Columbia Record" include a letter from the president of Townsend Harris Hall, College of the City of New York, referring to the fact that this society has become deeply interested in the artistic series of window displays produced by the Columbia dealer service department for the use of Columbia representatives. The president of the society requests the Columbia Co. to supply them with copies of this display material for use by the members of the society.

There are the usual number of articles featuring attractive window displays, with special mention of the signal success achieved by the Columbia international record department with its new display service.

10 PER CENT. WAR TAX IN CANADA

Musical Instrument Manufacturers Much Perplexed Over Proposed War Budget

OTTAWA, CAN., May 6.—The members of the piano and talking machine trade in the Dominion are naturally quite excited over the War Revenue Budget urged by the Hon. A. K. MacLean, acting Minister of Finance, and which, among other things, would levy a war excise tax equal to 10 per cent. upon automobiles, gramophones, phonographs, talking machines, cylinders and records therefor, mechanical piano and organ players and records therefor...when manufactured or imported after the 30th day of April, 1918, on the duty paid value when imported and on the price when manufactured and sold, provided that such war excise tax shall not be payable when the articles are manufactured for export.

Musical instrument manufacturers in the United States, who are paying only 3 per cent. war excise tax on certain of their products, are being regarded with every excuse by the manufacturers of this country who see little hope of having the proposed tax of 10 per cent. cut to any appreciable degree. An appeal, however, has been sent to George W. Pound, general counsel of the Music Industries Chamber of Commerce of America, in New York, who carried on the fight before Congress in the interests of the trade in that country, for advice and assistance in our own time of trouble.

To Jobbers and Dealers
Especially those selling Hill-and-Dale Records

You can greatly increase the demand for the best Records by selling these Reproducers and Attachments applying them to standard machines.

Superior Universal Reproducer

The Reproducer that pleases its owners—taking the correct angle for all records—and the machine that is always in demand for both records and records.

Diplomats for Bickell 2.10
" Elgin 2.10
" Victor 3.50
" Columbia 4.75
" Pathé 3.70
" Pathe Universal 4.75
" Pathe Universal 70c

*This refers to the latest line of the Columbia Universal.

*The Superior Universal Reproducer gives a depth of sound that is so varied, and of all other reproducers that I have ever heard, none can equal it. Besides this marvelous depth and warmth of tone, it has the open acceptance of a possessing musical quality. In all tests of records conducted and undertaken upon behalf of both Reproducers are brought to light, crystal-clear chambers. Your Reproducer places the listener at the right angle for either the Columbia and Victor or the Pathé and Edison Reproducers. It is one of the few which safely play the Edison Diamond Cut Reproducer, and will reproduce to the same image point by point into the record and up to it. Other makes start into distress, therefore there is always the tendency for them to slip from the concave side. All that I have said of the Superior is also true of the Scotford, and that wonderful Reproducer is one that, with its large diaphragm, plays the Pathé, Edison, Loric and other vertical-cut records with the utmost and best beautiful tone. I have heard the same Reproducer play the Scotchman, the Columbia, and the Edison, and the Scotchman is a wonderful reproducer. A phonograph with a wonderful tone and solace: your sound-houses have no equal.

Kalamazoo, December
Alfred L. Demerson, Vice-President of Phonographs

Attention!

Victor, Edison and Columbia Dealers and Distributors

Don't forget, when a customer questions you as to what attachment will equip his machine to make it universal, in playing all makes of records perfectly and without destruction, that

The Scotford and Superior Attachments are the only scientifically perfected outfits on the market, playing all makes of records, producing the greatest musical results, positively reducing surface sounds, and in many instances entirely eliminating disagreeable scratching and nasal effects. If you have not as yet had a real demonstration as to the highest type of music and entertainment from the various makes of records, you should visit our office, or ask for a personal demonstration.

If, after hearing our different attachments and reproducers with a few of the most beautiful records ever recorded, you do not believe we have produced some wonderful results which you have never before thought possible on a talking machine, we will then apologize for wasting your time.

You will increase your sales of records by handling these attachments. We guarantee to improve the tone of your machine. We sell attachments, tone arms and jewel points, Diamond and Sapphire.

Write for circulars and prices.

COMBINATION ATTACHMENT CO. 20 Jackson Boulevard, East, Chicago, Ill.
BUSINESS HAS BEEN SOMEWHAT SLOW IN LOS ANGELES

Los Angeles, Cal., May 6—The month of April did not prove to be a very good month for business in the talking machine line. In fact, it was the poorest so far this year. Of course, there were several good reasons for this, and the best excuse, probably, was the great Liberty Loan drive, which has just been brought to a successful finish.

The machine situation has cleared up to a considerable extent, and all of the local dealers have more machines in stock now than at any time since January 1. Records, however, are still hard to obtain and most stocks are sadly depleted with very little hope of any shipments in the near future. This shortage has been a sort of blessing after all, as it has made the merchants push the sale of many good records that were poor sellers before.

The demand for the popular war records keeps up, and it is impossible to get some of the numbers at present. The call for patriotic music is good—the most popular being the "Star Spangled Banner" with "Americas" second. The French national air seems to be the best liked of the foreign songs.

G. C. Beckwith, of Beckwith-O'Neal Co., Victor wholesalers at Minneapolis, Minn., paid a visit to Los Angeles after a month's sojourn with his family at Coronado, Cal.

R. C. Daynes, who was connected with the talking machine department of Barker Brothers for several years, has left there to go into the farm tractor business.

John Miller has left the Wiley B. Allen Co. to accept a position with Sherman, Clay & Co., local Victor wholesalers.

Howard Brown, manager of the talking machine department for Lyon-McKinley-Smith, is very much pleased with his last month's business, and says that, although he did not do as much as some months before, yet the cash business was larger and his average down payments on installment sales was 22½ per cent. This company handles the Brunswick line exclusively.

Harold Jackson, for many years connected with the Southern California Music Co., and for the last three years on the road for the Diamond Disc Distributing Co., now the Edison Phonograph, Ltd., has taken the management of the talking machine department for the Wiley B. Allen Co. Mr. Jackson is well known in southern California in the music business, and has handled the Edison line for years. The Wiley B. Allen Co. are also agents for the Victor.

E. Holland, proprietor of the Vernon Music Co., says business has been as good with him as ever. This is certainly a ray of sunshine to the other dealers who have complained of a considerable slow-up during April and are glad to hear of some one whose business did not let up. Mr. Holland's business is located quite a way from the business center of the city, but he has a fine trade and is always hustling for more.

W. G. Bailey, window trimmer for the Southern California Music Co., has had some very interesting displays for the talking machine department lately. One that attracted unusual notice was the "Spirit of 76." In this the figures were all working, the three dummies keeping time and even the flute player's fingers working to the tune of a lively piece. Mr. Bailey displays great ingenuity in his business signs and has no equal on the Coast in this work.

HEINEMAN "OKELH" RECORD NOW READY FOR THE TRADE

Otto Heineman, president of the Otto Heineman Phonograph Supply Co., New York, announced this week that the company is now ready to place on the market the Heineman record, which will be known as the "Okelh" record. This name is derived from the original Indian spelling of the term colloquially known as O.K., standing for "all right." This record has been in course of development the past year, and Mr. Heineman has been devoting a considerable part of his time to the perfection of this record, in order that it might be fully commensurate with the prestige and quality of the other Heineman products.

According to present plans the Heineman record will make its formal trade appearance at the National Music Show to be held at the Grand Central Palace from June 1 to June 8, in conjunction with the annual convention of the National Association of Piano Merchants. The Otto Heineman Co. has made arrangements for an extensive exhibit at this show, and the Heineman record will be one of the features of this exhibit, which will appear in Booths 40 and 41.

The Heineman record is a hill and dale cut record, to be played with either a sapphire point or a steel needle. The company is planning to manufacture only ten-inch records at this time, retailing at the uniform price of 75 cents. All of the records will be double-faced, and the library will include popular and standard selections. The first list, ready for distribution to the trade on June 1, will contain about fifty records, and the artists listed in this first supplement include many of the best-known recording artists now before the public.

It is planned to merchandise the Heineman record to the dealers through duly authorized jobbers, and the prominence of the Otto Heineman Co. in the talking machine industry is reflected in the fact that the company has already received numerous requests from all parts of the country for this valuable jobbing franchise. In fact, several appointments have already been made, and will be announced in the very near future.

The recording laboratories for the Heineman record are located in New York, and are under the supervision of Charles L. Hibbard, technical director, and Fred W. Hager, musical director. Both of these men are generally recognized as two of the best-posted members of the technical and musical divisions of talking machine recording, and Mr. Heineman is very pleased to announce their addition to his staff.

This record is manufactured in a large and up-to-date factory at Springfield, Mass., which is now a museum of the Heineman group of factories. This manufacturing is under the supervision of Thos. E. Griffin and Charles Kramer, both well known in their fields. Mr. Kramer has personally supervised the construction of several record manufacturing plants and is thoroughly familiar with every phase of this important work.

During the past few weeks visitors to the company's executive offices have had an opportunity of listening to the Heineman record, now christened the "Okelh," and they have all expressed their hearty approval of this record, stating that it possesses musical qualities which will undoubtedly win instant recognition from talking machine dealers and the music-loving public.

This announcement of the Heineman record marks another stride in the remarkable progress achieved by the Otto Heineman Phonograph Supply Co. during the past two years. From a modest beginning in a small office in New York this company has marched steadily forward, until to-day it is the recognized leader in talking machine motor production, and, in addition to its executive offices in the leading cities, owns and controls factories in Elyria, O., New-ark, N. J., Putnam, Conn., and Springfield, Mass.

The original product, the Heineman motor, is now the head of a family of products which includes Heineman motors, tone arms, sound boxes, etc.; Meisselbach motors, tone arms, sound boxes, etc.; Dean steel needles, etc., and finally the Heineman record.

Each one of these products is a leader in its field, and full credit for this wonderful progress in the short period of two years must be given to Otto Heineman, president of the company. Thoroughly familiar with every phase of the talking machine industry, and internationally prominent as an expert on the technical end of the business, Mr. Heineman has worked indefatigably to place his company in the front ranks of the talking machine field. That he has succeeded even beyond his expectations is indicated in the prestige and position that the company now occupies.

DOEHLER EMPLOYES BUY BONDS

The patriotism of the employees of the Brooklyn plant of the Doepler Die Casting Co. was splendidly manifested by their subscriptions to the extent of $50,000 to the Third Liberty Loan so successfully launched recently. These men, like millions of others throughout the country, helped in a most emphatic way to put this loan well "over the top."

COLUMBIA DEALERS: Eject-o-files are built to fit the style 75 and others. Slip them in as they are wanted. Why carry that big stock of 89's, etc., when the Eject-o-file does the trick? "The Eject-o-file is Efficient" and you are in business for dollars and cents.

VOCALION DEALERS: A receptacle for records that can be slipped into your style F-G-H-J-K. They are "built to fit." Wonderful convenience and a powerful selling argument. Ask the Salesman.

EDISON DEALERS: Eject-o-files are built to fit the style C-150 and 100. Many dealers are reaping the benefits. Why not you?

"BUILT TO FIT" any machine and a powerful asset for any dealer. Why offer Albums, Envelopes and other antiquated methods of filing to your customer? Eject-o-files are modern and efficient. Prices are phenomenally low.

The "sectional Eject-o-file," an auxiliary cabinet, compact, large capacity. Can be conveniently placed on table, stand, etc., or stands especially adaptable can be had. Beautiful and artistic, mahogany and oak finish, polished, waxed or dull. Each section a complete unit, can be added to, one upon the other, you know, sectional bookcase idea.

EJECT-O-FIELD SALES CO.
216 W. Saratoga Street
Baltimore, Md.

COLUMBIA DEALERS: Eject-o-files are built to fit the style 75 and others. Slip them in as they are wanted. Why carry that big stock of 89's, etc., when the Eject-o-file does the trick? "The Eject-o-file is Efficient" and you are in business for dollars and cents.

VOCALION DEALERS: A receptacle for records that can be slipped into your style F-G-H-J-K. They are "built to fit." Wonderful convenience and a powerful selling argument. Ask the Salesman.

EDISON DEALERS: Eject-o-files are built to fit the style C-150 and 100. Many dealers are reaping the benefits. Why not you?

KEEPPRINTING THE MOTOIR R OR

It seems to be the natural and usual thing that a talking machine owner never looks at the motor of his machine until it won't play properly. Then almost without hesitation he calls on the dealer from whom he purchased the instrument and requests that it be repaired at once. The dealer turns the matter over to his repairman and upon his arrival at the scene of the trouble he often finds a broken governor spring—the leather out of the brake—the motor screws loose so that the turntable hits the brake on. It is an accumulation of little things wrong that takes about five minutes' actual working time to remedy. The dealer has spent some valuable time—the repairman possibly has spent an hour or so riding to the house to remedy a little fault that the owner could have prevented if he had been given a few helpful words at the time he purchased his machine.

In this time of war when all things call for the conservation of resources, time in particular, why not make it a point to call the buyer's attention to the following important facts:

1. A machine must be oiled at stated times.

2. If used to any great extent make a point of going over the governor spring screws and tightening them up once every six months—also the motor board screws and nuts.

3. Make a point of taking out the winding key and oiling the threads on the winding shaft and also oiling the key where it rubs against the escutcheon

4. Put vacuine on the spiral cuts of the turnable spindle and governor spindle.

5. See that brake leather is properly held in place, and that turntable does not hit or rub against any parts of the motor board attachments.

These little hints, if given to and followed by the machine owner, will save him trouble and expense and will certainly conserve for other purposes, the time of the dealer and repairman.

Proper Pressure of the Needle Point

New York, May 1, 1918

Editor, Talking Machine World: Would you kindly advise me regarding the proper pressure of the talking machine needle on the record to secure the best results? I have a lot of varied opinions on the subject, but nothing authentic, and believe that the pressure of the needle has much to do with the reproducing and wearing qualities of the record.

S. B. B.

Answer. Too much weight or pressure at the needle point will certainly affect the wearing qualities of the record. The correct weight pressure at the needle point for disc records of the lateral cut type is six ounces, and for the Edison record four ounces.

When the Reproducer Goes Bad

Philadelphia, April 29, 1918

A. H. Dodin, care Talking Machine World:

Some of my customers have complained that after a year or more their machines have lost certain of their tone qualities. I have investigated and everything seems to be all right even to the adjustment of the reproducer. A friend of mine suggested that perhaps the diaphragm has lost its vibratory qualities. Could this be a possible explanation of the trouble, and how can it be remedied?

J. A. C.

Answer. If the diaphragm is made of any composition or material other than mica, it is possible that the trouble will be found in the diaphragm itself. In boxes where mica diaphragms are used it is always found that the...
MANY NEW JOBBERS APPOINTED
To Handle the Wall-Kane Steel Needles Reported by President Tauber—Good Reports From Talking Machine Trade in the East

In a chat this week with The World D. Tauber, president of the Progressive Phonographic Supply Co., New York, sole distributor for Wall-Kane steel needles, stated that the company's business during the past six weeks had far exceeded expectations. New jobbers have been appointed in all parts of the country, and these jobbers state that their dealers are well satisfied with the sales possibilities of the Wall-Kane needle.

This needle is being merchandised to the dealers with an absolute guarantee that it will play ten records perfectly, and the company's entire campaign has been based on this important sales argument. The Wall-Kane factory has been considerably enlarged since the first of the year, in order to handle the demand for this needle, and judging from present indications additional factory space will be imperative in the near future, as the dealers throughout the country report a constantly increasing call for the Wall-Kane needle.

Mr. Tauber has been visiting the trade in the East during the past six weeks and states that the dealers are enthusiastic in their praises of the Wall-Kane needle. He has encouraged the dealers to interest their customers in the scientific merits of this needle, and has prepared a simple test, which the dealers are using to excellent advantage, in order to illustrate the distinctive features of the Wall-Kane steel needle.

The more customers of the store a man shakes hands with, the more of them are going to get acquainted with him and come back. The politicians haven't made handshaking the first move in every campaign without having first discovered that it is the very best-known method of making folks feel friendly at first sight.

PATHE RECORD BY ADAMO DIDUR
One of the Features of the Diversified Supplement Issued by This Company for June

The new list of Pathé records for June features an interesting record by Adamo Didur, basso, of the Metropolitan Opera Co., who has achieved signal success in many important roles. This list also includes operatic vocal records by Claudia Muzio and Florencio Constantino, both of whom are well known in musical and operatic circles.

The popular records for the month include two songs by the Fairer Girls, co-stars with Al Jolson in his new show at the Winter Garden. There are, of course, the usual number of popular selections by the Peerless Quartet, the Sterling Trio and other well-known artists.

There are also represented on the June list the latest dance records, standard and sacred vocal numbers, and instrumental records, including two records made by the Garde Republi canine Band.

ISSUE SUPPLEMENTARY CATALOG

Wm. Volker & Co., Kansas City, Mo., Pathé distributors, have just issued a spring supplementary catalog, which contains several pages devoted exclusively to Pathé phonographs. This catalog is mailed to more than 30,000 "live" dealers throughout the company's territory, and is therefore a valuable link in the company's Pathé campaign. There are reproduced in the pages of the Pathé section several illustrations of the standard Pathéphone models, together with some of the salient features of the Pathé sales plan. There are three pages featuring Pathé art models, together with photographs of the Wm. Volker & Co.'s wholesale demonstration booths. This section is artistically compiled and cannot fail to impress the dealers favorably, and produce results for the Volker Pathé department.

NEW QUARTERS FOR SONA-TONE CO.
Company Discontinues Retail Branch to Concentrate on Wholesale Business—Many New Agencies Will Soon Be Announced

The executive offices of the Sona-Tone Phonograph Co., Inc., have been moved from 3421 Broadway to 3366 Broadway, New York, corner of 136th street. The company has discontinued its retail branch in order to concentrate upon the development of wholesale trade, and in its new quarters will have plenty of room for the expansion of its business.

In a chat this week with The World L. C. Seller, manager of the company, stated that the only trouble experienced so far has been the inability to secure sufficient merchandise to handle the requirements of the dealers, but this condition is now showing improvement, and shipments are being made to all parts of the country. Mr. Seller expects to announce in the near future a long list of agencies that have been established the past few months, and judging from all indications this phonograph is meeting with a ready sale.

GETS AGENCY FOR CHICAGO PRODUCT
Phonograph Clearing House to Represent Automatic Record Container Co. in the East

S. N. Rosenstein, president of the Phonograph Clearing House, New York, stated this week that his company had been appointed Eastern representative for the Automatic Record Container Co., Chicago. This device is meeting with great success in all parts of the country, and will be represented at the National Music Show to be held at the Grand Central Palace next month. Mr. Rosenstein states that he has been closing a very satisfactory business the past few months, and that the various lines he now represents in the East are meeting with a ready sale with leading manufacturers who speak highly of their merits.

CLEVELAND, OHIO
CRYSTAL EDGE MICA DIAPHRAGMS

Let us send you samples today of our diaphragms and you will readily understand why the best talking machines are equipped with Crystal Edge Mica diaphragms exclusively.

We use only the very finest selected mica, the best diaphragm material in the world.

PHONOGRAPH APPLIANCE CO., 109 West Broadway, NEW YORK

FEDERAL COMMISSION RECOMMENDS FIXED PRICE LAW

Federal Trade Commission Emphasizes the Need of Congressional Action to Deal With the Price-Cutting Evil in View of Recent Decisions—Powers of Commission Curtailed by Present Statutes

WASHINGTON, D. C., May 7—In a formal public statement published May 4, the Federal Trade Commission announced the policy which must govern the disposition of all cases involving resale price control and the right of refusal to sell. The commission declares itself bound by the recent decision of the United States Supreme Court in the Graphophone Case to forbid producers to indicate prices, to secure agreements from dealers as to prices, or to refuse to sell to or discriminate against price-cutters.

The most important feature of the statement is its final paragraph in which the commission frankly admits its inability under present law, as laid down by the courts, to deal adequately with the price-cutting evil and emphasizes the need of remedial standard price legislation by Congress "in the manner suggested by Mr. Justice Brandeis." It seems unnecessary, and would obviously be improper at this time, to comment further upon the significance and potentiality of this vital declaration by the governmental agency whose special duty it is to study and pass upon the ethics and public policy of commercial practices. A complete copy of the commission's statement is as follows:

"For a considerable time there has been a controversy throughout the country over the question of the right of manufacturers, wholesale agents, etc., to fix resale prices at which their articles could be sold, and the right to maintain such resale prices has been contended for by them, and the question whether such right exists has been brought before the Federal Trade Commission numerous times.

"Many hearings have been had, many complaints have been made, and much consideration has been given to the subject by that Commission. Many business concerns have been refusing to sell to customers who would not agree to maintain the resale price fixed by the seller.

"The Federal Trade Commission has just disposed of the first of these cases in which complaints have been issued charging violations of law through fixing the resale price of articles, and an order to cease and desist from this practice has just been issued by it in the case of Chester Kent & Co., Inc., of Boston, manufacturers of proprietary medicines.

"Attorneys for the company admitted that in the past the publicity complained of had been in use. The order, the first in cases of this character, forbids the company to:

"(a) Indicate to dealers the prices for which its proprietary or patent medicines shall be re-sold.

"(b) Securing agreements from dealers to adhere to such prices.

"(c) Refusing to sell to dealers who fail to adhere to such prices.

"(d) Refusing to sell to dealers who fail to adhere to such prices upon the same terms as dealers who do so adhere.

"(e) Furnishing any advantage to dealers who adhere to the resale prices, while refusing similar treatment to dealers who do not adhere to the prices.

"This order of the Commission follows the decision of the Supreme Court of the United States in the American Graphophone Co. case lately decided by it.

"Some of the most distinguished lawyers in the United States have appeared before the Commission to argue the causes. As well as many of the leading business concerns of the country, some of whom have insisted that the maintenance of resale prices was proper, and others who have contended that it was not. Almost all of the large department stores of the country have been heard in opposition to it.

"After full consideration the Federal Trade Commission has decided to issue complaints against all business concerns who refuse to sell unless the purchaser will agree to maintain a resale price fixed by the seller. The case just decided is the first formal finding by the Commission to that effect.

"When once an article has passed from the maker to a purchaser, he owns it, and the owner of such article may sell it at any price that he chooses, provided he does not himself sell at such price as to be below cost, and thus thereby enter into unfair competition with other retailers selling the same article.

"This decision is going to be open to considerable controversy in relation to the subject matter thereof, and the matter will probably have to be settled by an act of Congress in the manner suggested by Mr. Justice Brandeis in his concurrence in the Supreme Court of the United States, in the case of the American Graphophone Co. The Stephens Bill which is now in Congress is in relation to that matter, but in the estimation of many business men and others it is thought to be broader than it should be. It may be that resale prices can be so regulated by placing the power somewhere protecting against unfair prices as to make it work equitably, and be a fair method of competition in commerce, but that question will undoubtedly have to be settled by Congressional action."

C. L. STEPHENSON NOW SALES AGENT

The New Jersey Reproducer Co., Newark, N. J., manufacturer of the "Invisible" sound box, has announced the appointment of C. L. Stephenson as general sales agent. Mr. Stephenson has opened New York offices at 1185 Broadway, and is making plans for an aggressive campaign in behalf of the company's products.

C. L. Stephenson has been associated with the talking machine industry for the past 18 years, and was formerly president of the Wilson-Laird Phonograph Co. He is familiar with the most important details of sound box manufacture and merchandising, and is now making arrangements whereby the users of the "Invisible" products will receive 100 per cent. co-operation and service. Mr. Stephenson is planning to visit the trade in the very near future, in response to many inquiries that have been received from well-known manufacturers regarding the use of the "Invisible" sound box on their machines.

A PROGRESSIVE BELFAST MERCHANT

T. Edens Osborne, the enterprising talking machine merchant of Belfast, Ireland, with his usual keen-sightedness utilized for his publicity in the local papers the article which appeared in "The Talking Machine World" of March 15, referring to a "talking machine" invented by Mr. Miller, of Lurgan, in 1788. After giving the "meat" of this article Mr. Osborne closes one of his reading announcements as follows:

"One hundred and forty years later, October, 1898, the first type of 'His Master's Voice' gramophone was introduced in Belfast by T. Edens Osborne, of 31 Wellington place, who holds the most extensive stock of gramophones, phonographs and records in Ireland." This is educational publicity of the right kind.
DOEHLER DIE CASTINGS
for tone arms, sound boxes and talking machine attachments are STANDARD throughout the industry.

Of the many instruments produced to-day from the most prominent makes down, the greater number, by far, are equipped with Doeehler die-cast tone arm and sound box.

The enormous output of our three large plants permits of advantages to the users of die-castings, as regards prices and deliveries, not otherwise possible.

DOEHLER DIE-CASTING CO.
WESTERN PLANT BROOKLYN, N.Y. NEW JERSEY PLANT TOLEDO, OHIO.

ACTIVE ADVERTISING IN CINCINNATI

Believed That New Campaigns by Dealers Will Bring About Improvement in Conditions—New Machines on the Market—General News

CINCINNATI, O., May 8.—Talking machine merchants are again devoting space towards advertising machines and are giving attention towards pushing records. This let-up in publicity may explain a decline in the retail field of the past month. Jobbers find exceptionally good business in the smaller centers in close reach of rural sections, but not much doing in the big towns.

The John Church Co. last week put its talking machine on the market through the Church-Reinkamp Co., the first lot consisting of two sizes, the smaller one selling for $65. The features of the machine are a tone clarifying chamber, the entire throat of the machine being so shaped as to eliminate any harshness that otherwise might be heard.

W. E. Sumners, Washington C. H., Ohio, was a caller at the Phonograph Co. last week, being entertained by Manager Peterson, who reports a slight increase in shipping facilities.

Otto A. Greissing, recently with the Mclvile Clark Co., has taken charge of the selling department of the Crystola Co., this city. Mr. Greissing is entirely familiar with the machine field, having been connected with the Victor Co. and the Musical Instrument Sales Co. At one time he had charge of the latter's St. Louis branch. He comes here from New York City.

April business with the Cincinnati branch of the Columbia Co. was by far the largest April in the history of this branch. Manager Dawson states that record orders are coming in from the factory more promptly than at any time for several months.

The Cincinnati branch now has three traveling men covering the territory, and shipping requirements have so increased that the local branch finds it necessary to consider the matter of moving to new quarters. They have taken an option on a six-story building on West Fourth street, near Central avenue, and hope in a short time to complete negotiations for leasing the building which will be ample for their requirements. This is a six-story building with more than fifteen thousand square feet of floor space and will be occupied exclusively by the Columbia Co.

Carl Krauser, who recently made his first trip for the Columbia Co., is making a splendid record, and reports that business is showing more than usual activity in the mining sections of West Virginia, surrounding Huntington.

Mr. Spring, of Spring Brothers Co. department store, Eaton, O., was in Cincinnati a few days ago visiting the local branch of the Columbia Co. and while in the city arranged with the company for franchise to handle Columbia goods. Their initial order was considerably above a thousand dollars.

The Walnut Hills Grafonola Shop recently opened a beautiful Columbia store at 2097 Gilbert avenue, which is one of the best trading points in Cincinnati, as it serves a community of many thousand people. Miss Carrie Alt-hausen, who was for several years assistant manager of the Columbia Co.'s store in Louisville, Ky., is the owner and manager of this enterprise.

H. L. Moorey, one of the traveling auditors from the New York office of the Columbia Co., has been spending the past two or three weeks at the Cincinnati branch going over the accounts.

J. C. Dubriel, who has been spending some time with the Cincinnati branch, has gone to Cleveland as assistant manager of that branch.

C. L. Byars reports a very satisfactory Vocalion business in April at the local Aeolian store. A number of the larger instruments were sold. Mr. Byars says business is not easy to get these strenuous times, but the right kind of salesmanship can get sales over, and it is the hard sales that give the salesman real pleasure after all.

H. L. Lewis, formerly connected with the Edison Shop at Indianapolis, is now enlisted with the Vocalion forces. Mr. Byars has also had the good fortune of acquiring the services of Geo. Kleeman, who was connected for some time with the local Edison Co. These two men have finished their preliminary training and are now taking their regular turns in the trenches.

C. W. Neumieze, local representative of the Otto Heinenan Co., is about the happiest man in the talking machine field of the Middle West just now, for he stands to establish a new record in orders this year, thereby bearing out a prediction made earlier in 1918.

"People," he said, "are just mad for needles. This is just one of the big wants that are being supplied in liberal quantities just now. The manufacturers want supplies. Many are turning out goods to their limit, believing that the field will be unlimited for talking machines before the end of the year. This bears out an assertion that I have made, claiming that 1918 ought to be almost a record-breaker in the retail line. The histories of the allied belligerent countries is identical to what the United States is going through. There was a time when production almost disappeared, which was followed by a demand.

"There are several manufacturers in the Middle West, with good machines, who will be badly disappointed with their results when the books for the year are closed. They do not realize, apparently, that these are abnormal times and have not used methods which should be in use under such conditions. Yes, business is good in the Middle West."

WOMAN MANAGER MAKING GOOD

Miss N. Moody Introduces New Ideas in Retail Department of Philip Werlein, Ltd.

NEW ORLEANS, La., May 4.—Miss N. Moody, who recently took charge of the Victor retail department of Philip Werlein, Ltd., reports an unusual sale of Victrolas and records for this time of the year. Miss Moody bears the distinction of being the only retail Victor lady manager in a large Southern city, and is fast making a name for herself as being a very successful one. She has installed some very novel selling ideas that are bringing in a large amount of business.

THE PHONOGRAPH CLEARING HOUSE, Inc.
51 EAST 42d STREET, NEW YORK CITY
NUMEROUS TALKING MACHINE DISPLAYS AT MUSIC SHOW

Within two weeks after this issue of The Talking Machine World is in the hands of its readers, the National Music Show will be in full swing at the Grand Central Palace, New York City, the formal opening taking place on Saturday, June 1, and the show running until the following Saturday, June 8.

The plans for the exhibition are now practically completed, and the exhibit space still available is being contracted for rapidly. There will be approximately fifty exhibitors, representing almost every branch of the music industry, with the talking machine trade particularly well represented, and the exhibits will occupy two floors of the Grand Central Palace.

The show committee, consisting of H. L. Wilson, Columbia Graphophone Co.; William Maxwell, Thos. A. Edison, Inc., as well as J. A. LeCato, George W. Gitins and C. C. Conway, the latter three representing the piano and supply trades, have been working hard for several months in co-operation with Charles H. Green, manager of the show, to make the exhibition the largest and most impressive of its kind ever held, and it appears as though their efforts would prove successful.

During the week of the show a number of important trade conventions will be held in New York, several of them right in the Grand Central Palace Building. There will be the annual gathering of the Edison dealers at the Waldorf-Astoria, which it is expected will be attended by over a thousand dealers. There will also be held the annual conventions of the National Piano Manufacturers Association, the National Association of Piano Merchants, the National Piano Travelers Association, the National Music Roll Manufacturers Association, and the Music Industries Chamber of Commerce, bringing hundreds of dealers to the city, and incidentally to the show.

Tone—the vital thing

If you, as a manufacturer, can talk and prove tone superiority in your product, you have a selling argument to overshadow all the "talking points" of cabinets, and designs and accessory features.

And you can talk tone superiority. You can put out a product that will be a revelation in tone-purity, tone-quality, tone-volume. When you realize what vivid, lifelike, colorful tone can be produced and sustained by the talking machine equipped with

Parr Magnetic Reproducer fitted with the Vibratone Patented Diaphragm

These two dominating and proven inventions open up wonderful possibilities for manufacturers eager to put their product at the top-notch of class and character.

You want your product to be RIGHT!

If you want your product worthy of your name, you certainly want that product to be right in its most vital feature. And it will be right if it is equipped with the Parr Magnetic Reproducer—the reproducer for those who seek perfection.

The indestructible, non-crystallising, always resilient VIBRATONE PATENTED DIAPHRAGM

Possessing all the good points of nice diaphragms, it overcomes all major bad features. Guaranteed uniform in quality, free from bubbles, blisters and waves, the Vibratone Patented Diaphragm is non-porous, non-perforated.

It has a definite function and it performs it. It improves tone; in fact it creates new home possibilities for every reproducer of other types.

The Grand Central Palace itself is New York's largest exposition building, and the home of the automobile, flower, motor boat, electric, and other shows of international reputation and importance. The building is located at Forty-sixth street and Lexington avenue, and within easy reach of the various prominent hotels in the city.

Governor Charles S. Whitman, of New York.

The Grand Central Palace, New York, Where the National Music Show Will Be Held

will officiate at the opening of the show, and representatives of the United States Army and Navy will be in attendance. Many prominent men of America's leading industries, recognizing the national scope of the exposition and the work that the music industry is doing in the war, will be present during the week of the show. The exposition will be the most dignified and educational affair of its kind ever housed under one roof.

The increasing importance of the music industry undoubtedly will be felt when the public becomes acquainted with the rapid advances made during the past year in things musical. The various exhibits are bound to create an interest which will work for the benefit of the entire industry as a whole. The show will be a means of cementing co-operation on a broader scale than ever before, and manufacturers, dealers and others will profit through this co-operation.

In other words, the show will be a big store window for the industry, in which everything new and novel will be displayed for the public's approval. Those who believed that the music industry was a non-essential one will suddenly realize how important it really is, what it is doing to bring cheer to the boys in our army and navy, what gladness and sunshine has penetrated into saddened homes through the medium of music, and what can be expected of the music industry of the future.

To single out what each exhibitor is to show would prove quite a task, although each one is planning special features of distinct interest to both the trade and the public.

The Pathé Frères Phonograph Co. is to practically transplant its laboratory from Brooklyn.

NOW ANNOUNCE THE REGINAPHONE
Regina Co. Ready to Place Their Latest Talking Machine Product on the Market—New Line Is Produced in Seven Models

The Regina Co. with offices in the Marblebuilding, New York, and a factory in Rahway, N. J., who for the past twenty-five years have been manufacturers of musical instruments and who in more recent years have been actively associated with the talking machine industry, being the manufacturers of the Regina Hexaphone and other talking machine products, now announce the Reginaphone, a talking machine with many exclusive features.

This new line of machines is produced in seven models, five of them of full cabinet size and three table models. All the machines are equipped with a new patent tone arm and sound box, which plays all makes of records with equal facility. Of special note is the fact that the sound box always remains in the same position, the point of needle remaining in the direct center and the vertical and lateral cut changes are made by a quarter revolution of the sound box without changing the angle.

All the larger styles are equipped with a quadruple spring motor, which will play for over thirty minutes, and every model is equipped with a tone modifier. While the larger models are manufactured with an automatic stop there are also start and stop push buttons. They also contain a new style sound chamber which throws the sound upward instead of in the usual forward manner. The cabinets are in both mahogany and oak and are unusually attractive in appearance.

A. J. KENDRICK VISITS SOUTH
A. J. Kendrick, of the phonograph division of the Brunswick-Balke-Collender Co., was recently a visitor in New Orleans, giving his old friends there the pleasure of seeing him once more.

SONA-TONE
A Phonograph of Distinction with the Tone You Can't Forget

SONA-TONE Quality means a resonant, full, liquid tone that comes from an especially designed, all-wood sound chamber—and superior workmanship in material, finish and equipment.

SONA-TONE Reliability means simplicity of mechanical construction—ease of operation—and convenience and solidity of working parts.

SONA-TONE Serêe means the immediate ability of the purchaser to play all makes of records—without attachment of any sort—and to play a library of from 250 to 1000 assorted records without further expenditure.

We believe that a Sona-Tone eliminates—to a greater extent than any other phonograph—the surface noises of the record. We believe that it has the same quality of resonance as exists in the Stradivarius.

From our sales record—previously to advertising—we believe that a SONA-TONE is a superior phonograph for retail merchandising.

SONA-TONE PHONOGRAPH, Inc.
3366 Broadway, New York City

"The music is on the record—the tone is in the phonograph."
ALLENTOWN MUSIC TRADES HOLD GREAT LIBERTY LOAN RALLY

Greatest Demonstration of the Patriotism of the Liberty Loan Committee at the Carnegie Hall on April 16—Subscriptions of $200,000—Parr and Caruso Sing—French and American War Heroes Wildly Applauded—Credit to Committee

Carnegie Hall was filled to capacity, and a little more, and a tremendous crowd estimated to close at 15,000 battled with police reserves to enter the hall after the doors had been closed in order to participate in the Liberty Loan Rally of the Allied Music Trades on Tuesday evening, April 16. It was without question the greatest affair ever held under the auspices of the music industry, and it is hoped to be the most successful rally held by any industry, or organization, in connection with the Liberty Loan campaign.

It was a wildly enthusiastic crowd that answered the public call of the Allied Music Trades to help Uncle Sam by subscribing for bonds, and there was every reason for the audience to be enthusiastic, for sensation followed sensation. For nearly two hours the audience was almost constantly on its feet as a tribute to the national anthems of one of the allied countries, or in enthusiastic welcome of some unit, military or naval, marching down the center aisle.

The most blatant New Yorker might well have fought for the privilege of enjoying a musical treat such as only the industry itself could offer, and it might be said right here that, although men of all divisions of the trade worked hard to make the affair a success, it was the talking machine trade that contributed most to the entertainment by providing the musical features which were a big factor in its success.

Bringing in the Colors

It was just about 8:45 p.m. when the Columbus Band on the stage, under the able directorship of Chas. A. Price, opened the program with a medley of patriotic American music, bringing the audience to its feet at the end with "The Star Spangled Banner." Hardly had the strains of the national anthem ended when the doors opened and down the center aisle and on to the stage was carried Old Glory under escort of a full company each of sailors and soldiers. After a brief drill, to the accompaniment of much cheering, the fighting men took their places on the stage where they remained for the entire evening.

Geraldine Farrar Sings National Anthems

Geraldine Farrar, the famous opera artist, next created a wave of patriotic emotion in the audience by singing "The Star Spangled Banner" after kissing the emblem. As an encore she sang the "Marseillaise," with a sailor holding over her the Tri-Color of France. Next came a selection from "Madame Butterfly," and as a finale, "Annie Laurie," all sung to the accompaniment of the Victor Orchestra, under the direction of Joseph A. Pasternack.

Music's Contribution to Patriotism

Music Industry Ever Seen Place at Liberty Loan Rally—Subscriptions of $200,000—Parr and Caruso Sing—French and American War Heroes Wildly Applauded—Credit to Committee

Music's Contribution to Patriotism, James M. Noessl, who was scheduled for an address, chose for his subject "Music's Contribution to Patriotism," and in a most interesting way cited many historical instances which were of importance in matters of world importance. He told how music served to reflect courage, and cited as an example the fact, that as the names of a few survivors of Sarajevo only in a few of the war were flashed on the screen in a small town theatre in England, where the non-appearance of a name meant that some one in the audience had probably lost a loved one, the women arose in masse to sing "Rule Britannia." He offered as a prophecy that the time will come when the Hymn of France will be sung again in the city of Strassburg. "Let us hope," said he, "that its strains will go down the Unter Linden in Berlin." The Edith Flagg male quartet next appeared, and sang several of the most popular of the war songs of the day, including "Long, Long Trail," "Keep the Home Fires Burning," and finally, the Liberty and song "What Are You Going to Do to Help the Boys?" with Cesare Sodero as director. For a time the audience refused to let them leave the stage.

French "Blue Devils" Prove Sensation

Next came one of the big sensations of the evening, when the company of French "Blue Devils," the men who at the beginning of the war, nearly occupied a section of Aisace-Lorraine, and have not since yielded an inch of the ground thus gained, came swinging down the aisle and on to the stage with their neddles and muskets in hand. The men uniformed in dark blue, with tarnished bayonets rakishly perched on one side of their heads, were accorded an uproarious reception, and lined up across the stage, stood at attention while their commander read a message to the American people from General Foch, urging support of the Liberty Loan.

Boys From "Over There" Wildly Received

Although it seemed as though the limit of enthusiasm had been reached in the reception of the "Blue Devils," it was not a marker to the tumult that followed, that was caused by the sudden playing of the band, a dozen of Pershing's own men, three of them members of the old Sixty-ninth, Y. N. G., and now a part of the 16th U. S. Infantry, trooped up to the stage. The United States soldiers, all of whom had seen at least six months of actual fighting, and several of them wearing the Croix de Guerre, had arrived direct from the firing line only a few days before, and were introduced individually to the audience. Sergeant Eugene MacNeef, of the Sixty-ninth, explained modestly how he happened to win the French War Cross, but gave most of the credit to his pal, Corporal Milo Plant, of the Sixty-ninth. The unit to which the men belong made the excursion into the German trenches, but were caught in a barrage, and had to make their way back to their own lines as best they could. It was then learnt that eight men were killed in No Man's Land wounded or dead, and Sergeant MacNee and Corporal Plant volunteered to go after them. Seven were brought in success-

At the conclusion of his address Sergeant Empey asked for bids on a poster in oils rep-
taking a kick at the helmet, one of them Sergeant Empey's sister, who managed to knock
over a couple of music stands in the orchestra. Even the soldiers on the platform entered into
the spirit of the occasion and subscribed $6,500.

Rally a Huge Success
The rally was the biggest thing that has ever been attempted in the trade, and the fact that
it went over without a flaw, and that the details were carried out like clockwork, is a dis-
tinct tribute to those who conceived the idea and had the matter in charge. Anyone who has ever
had doubt regarding the possibilities of music in arousing enthusiasm to the highest pitch and in preserving the spirit of civilian and
soldiers, could not have left Carnegie Hall without being converted to the cause.

Much credit, too, is due to the members of the various committees in the trade and their assistants for their work in soliciting bond sub-
scriptions in the audience.

The committee in charge of the rally consisted of the following: C. H. Child, Victor
Talking Machine Co., Camden, N. J., chairman. Talking machines and phonographs: J. New-
comb Blackman, Blackman Talking Machine Co.; George W. Hopkins, Columbia Grapho-
phone Co.; George Babson, Photograp Corp. of Manhattan; Walter Miller and E. H. Jen-
nings, Thos. A. Edison, Inc.

Pianos: Julian T. Mayer, J. & C. Fischer; Frederick Steinway, Steinway & Sons; Mark
Campbell, Brambach Piano Co.; William V. Swords, Aeolian Co.; E. P. Hamilton, Frederick
Looser & Co., and George W. Gittins,东亚 Piano Co.

Music publishers: George H. Elias, Q R S Co.; Feldor Witmark, M. Witmark & Sons; J.

Musical instruments and supplies: George H. Hillbert, of Carl Fischer, and A. W. Johnson.
Liberty Loan representatives: M. K. Parker and George P. Learned.

Director of publicity: Henry C. Brown, the Victor Talking Machine Co.

CELINA, OHIO
EDISON FORCES PARTICIPATE IN LIBERTY LOAN PARADE

The employes of Thomas A. Edison, Inc., helped in a very material way to celebrate the success of West Orange in going "over the top" in the Third Liberty Loan drive. Robert A. Bachman, vice-president and general manager of the storage battery division, was grand marshal, and one of his principal aides was William Maxwell, vice-president and general of the musical phonograph division.

One of the features of the parade was the attractive floats designed and built by Edison employes, a few of which are shown in the illustrations herewith, demonstrating the patriotism of the entire Edison organization in a very practical and forceful manner. The floats attracted much favorable comment for their artistic appearance.

NEW "LIBERTY" RECORD ALBUM

Important Additions to the Line of the Boston Book Co., Bound in Khaki

The Boston Book Co., manufacturers of record albums, have just placed on the market a timely and appropriate record holder. The album is bound in khaki and is very patriotic in appearance. J. M. Alter, president of the company, is the originator of this new product which has been named the "Liberty Album." The binding itself attracts attention by the fact that it has a gold center imprint of Uncle Sam surrounded by ships, guns and other war material which will make the world safe for democracy, and is a fitting addition to the company's products at this time. Over fifteen thousand of the "Liberty Albums" were sold on the first day of their release, thus demonstrating that the trade feels the new product will have a favorable reception from the public.
SOSS

INVISIBLE HINGES

Preserve Beauty

In many beautifully designed, finely finished Talking Machines, Pianos, Music Cabinets, Piano Players and Benches, the elimination of the unattractive protruding Hinge is essential to preserve the beauty of the design.

Design and Construction

The fine cabinet work which is required in many instances to preserve the disguise of the instrument requires that the hinges be as inconspicuous as possible. SOSS hinges are invisible.

WOMEN WORKERS ADORN UDCELL FLOAT IN LOAN PARADE

On April 6 a Liberty Loan parade took place in Indianapolis which was unquestionably the biggest and most patriotic parade ever staged in that city. In this parade the Udcell Works, well known manufacturers of music roll and talking machine record cabinets, participated with one of their big 3½-ton trucks. This truck was loaded with some of the good looking women that are now so conspicuous around the Udcell factory. The sign displayed on the top of the truck was 12 feet long by 3 feet wide. The slogan on the sign brings out the excellent point that the Udcell Co. is helping to win the war by employing female labor, thereby releasing men for military service.

SONORA SALES SERVICE

Individual Sales Service for Dealers Introduced by Sonora Phonograph Sales Co., Inc.

The Sonora Phonograph Sales Co., Inc., has introduced a dealer's individual sales service, which is well calculated to produce excellent results for Sonora dealers. This sales service will be issued each month, and in its present form constitutes one of the most complete and valuable dealer helps that has ever been prepared. A brief summary of this new service will give some idea of its practicability, although this resume hardly does justice to the quality and attractiveness of the many helps included in the service.

According to this summary this service will include the following: 1. Answers to questions the dealer wishes to ask about his business. 2. Large window display frame with monthly card change. 3. Small window display frame with card change. 4. Appropriate window display material of a decorative nature. 5. Examples of good form letters. 6. Printed post cards to send to prospects. 7. Leaflets, catalogs and folders to send to prospects. 8. Suggestions on selling. 9. Methods of securing filing and using prospects' names. 10. Ideas as to effective office furniture, files, cabinets, etc. 11. Electrotype or matrices of several suitable advertisements monthly, and special advertisements made to the dealer's order. 12. A certain amount of stationery free—the rest at cost. 13. Special signs of various kinds. 14. Moving picture slides. 15. Latest advance news of what other dealers are doing throughout the country.

Frank J. Coupe, director of advertising and sales for the Sonora Phonograph Sales Co., is in charge of this very important work, and is being ably assisted by L. C. Lincoln, who is now associated with the Sonora advertising division under Mr. Coupe's direction. Mr. Lincoln is well known in the piano and talking machine fields, having previously been advertising manager of Otto Wissten, Inc., where he was very successful. Sonora dealers throughout the country are enthusiastic regarding the new service, and Mr. Coupe confidently believes that every Sonora representative throughout the country will soon be enrolled for this monthly service.

HEINEMAN MOTOR NO. 77 LIKED

Although on the Market But Short Time Has Met With Great Favor

The Otto Heineman Phonograph Supply Co., New York, has been achieving signal success with the Heineman new No. 77 motor, which, although it has been on the market a comparatively short while, has met with the hearty approval of dealers throughout the country. This motor embodies many new and exclusive features, some of which are shown in the accompanying illustration. The motor is designed for the special use of Heineman dealers and is a real publisher's motor.

CHANGES IN PORTLAND, ORE., TRADE

Several Managers and Salesmen Make New Connections in That City

PORTLAND, Ore., May 4—Changes were comparatively few in the various talking machine stores in Portland in April. Dealers are congratulating themselves on the fact that their experienced help has stayed as well as it has in the face of big opportunities opening on every side and the great labor shortage in the Pacific Northwest. There have, however, been changes in virtually every house in Portland.

H. Matney has been made manager of the talking machine department in the Meier & Frank Co. store, taking the place of Mr. M. E. Gibson, who has resigned. Mr. Matney has had a great deal of experience in the talking machine business, having been with the Willey B. Allen Co. in Portland and with Sherman, Clay & Co. in Spokane, Portland and Seattle. He has recently been at the Graves Music Store here.

Donald Smith, who has been with the Meier & Frank talking machine department, is at present in San Francisco visiting friends.

H. A. Rayner, the well-known and popular manager of the talking machine department of the Edlers Music House, has resigned and accepted a position with the Hopper-Kelly Co. of Tacoma, Wash.

N. Dunphy, for many years a phonograph salesman and recently connected with Bush & Lane Co. here, has resigned on account of ill health and has gone to Los Angeles to recuperate.

Miss Mabel Le Vanway, formerly with the Graves Music store, has been elected treasurer of the Oregon-Edlers Music House.

Portland had a visit late last month from F. B. Travers, manager of the Sonora Co., of San Francisco. Mr. Travers visited the Northwester cities and is well pleased with the showing made by the Sonora dealers. The Sonora is beginning to popular in Portland and the demonstration rooms at the Bush & Lane house, which have the exclusive sale of this machine, are well filled with interested prospects.

Mrs. Thomas Carrick Burke, chairman of the committee for the Pacific Northwest commission, is asking for Victrola records for the Commission's and Sailors' Club of Portland, Ore. A piano and Victrola have been donated by the G. F. Johnson Piano Co., but records are needed.

EDISON HAS SECOND GRANDSON

Thomas A. Edison has a second grandson who was born on April 22. He is John Edison Sloane, son of Mr. and Mrs. John E. Sloane, and was born in the Edison home at Llewellyn Park. When the child was two weeks old, Mrs. Edison, his grandmother, purchased a $100 Liberty Bond for him.

The Fordham Ttalking Shop of the Bronx was incorporated at Albany recently with a capital stock of $15,000.

Passing of the New Man Power Bill Causes Much Uneasiness in Talking Machine Trade—Expected That the Trade Will Survive Any Upheaval—Women Will Help Solve Labor Problem—The United States Import Embargo—New Editor for "The Voice"—What the Various New Record Lites Have to Offer—Supplying Machines and Records to the Fighting Men—Experimenting With Substitutes for Steel Needles—Records by the Late Lord Roberts—General Trade News of the Month

LONDON, ENGLAND, E. C., April 26.—During the last few months nothing so seriously untoward has happened, as things go these times, to mar the general belief of a steady future of wartime prosperity for the talking machine trade as the passing of the new man-power bill. In common with other trades, it will materially affect the gramophone industry in every way more than one. But only for a time, I think.

Let us examine the situation calmly, in the light of the nation’s need. In the latter sense, however much one may feel inclined to deplore the recent reverse to the British arms and its probable result, the potent fact remains that the Allies are as ever determined to brook no thought of defeat. There is some consolation in the fact, too, that history is only repeating itself—that, however we muddle through, we shall eventually get there all the same. The war has become more than ever a national one for us, and I believe the Government is at last alive to its importance. Officialdom no longer holds the enemy as cheaply as the last three and a half years’ policy would seem to suggest. The nation has now to get into harness and work and fight as never before. Let the necessity for that sink into all minds, and we shall the more easily resign ourselves to the drastic action centered in the new bill which provides for the wholesale cancelation of exemptions and the call up of all citizens between the ages of eighteen and fifty.

Now, as to its effect. That there will be a temporary dislocation and upheaval of commercial life there can be little doubt. Delegation has been brought to such a pitch that one is inclined to think trade will suffer more by withdrawal of men from the administrative side than by the calling up of subordinates and general routine workers.

Among the luxury trades to be “combed” is the musical instrument industry, most sections of which are specifically mentioned in the official schedule. Whether this comb is to operate at once or gradually has not been clearly defined, but this much is certain—a strict cancelation of exemptions held by the eighteen to forty men of grades one and two if not of grade three. Men of the first category coming within the new age extension limit will doubtless be called up almost immediately; those of category two, gradually, and of the third class not at all unless, of course, conditions develop which may render it necessary.

With the aid of women it is the forty to sixty men who have kept alive the output of records—only just. Indeed, during the height of the season output has fallen short of demand. We start then with a new demand for men that can be supplied from an already labor-pressed industry. Yet these men are necessary in the national interests, and they must go, however much one regrets the cause which has made it necessary. How to replace them—that is the question. On the one hand suitable female labor is growing more scarce each day; on the other hand, the gramophone trade is determined to somehow survive. That it will triumph I have not the slightest doubt. There may be vacant places at the factory benches or the pressing tables for a time. That cannot be avoided. Salvation must come through two sources, the women and time-expired or discharged soldiers. A further demand must be made in the columns of daily press and employment agencies for women, and if need be the rate of pay for each “accepted” record must be slightly increased. No effort must be spared to bring in as quickly as possible the largest number of women so that when the men have to go they may be semi if not wholly proficient to carry on the good work of providing the nation with a plentiful supply of music. To fill up the gaps I am of opinion that to a great extent reliance will need to be placed upon women laborers rather than soldiers since, if medically fit, few of the latter can withstand for long a close atmosphere, particularly the heat of a record-pressing room, after their open-air life. Still, there exists a very large reservoir of discharged men from whom to choose a suitable number, and for some time I believe record manufacturers have been taking advantage of this class of labor.

Given a due recognition of the immediate need for persistent effort, there should be no prolonged shortage of factory labor, and in this regard I am much more hopeful of the situation than of the likely effect of the new bill on the executive and administrative side of our industry. The loss of the men upon whom devolves

(Continued on page 108).
THE TALKING MACHINE WORLD

FROM OUR LONDON HEADQUARTERS—(Continued from page 107)

all the responsibility for the successful conduct and administration of large businesses is regarded in trade circles with something like consternation, though, forsooth, in no spirit of cavil.

Their chief concern is to reconcile the official call with their very natural anxiety for the carrying on of businesses which have been nurtured and built up over a period of years to a state of prosperity. It is rightly said these times that no man is indispensable. True enough though it may be, how is replacement to be effected when all the men of the same class have also to direct their services into State channels? That is the problem which time and circumstance alone can solve. Each firm, of course, make every effort to adjust itself to this situation, and must succeed to an extent, but the measure of their success is obviously dependent upon the chance needs of the military situation. An important man may be called up at any time, subject to a few days' notice. His removal would very likely throw out of gear the whole commercial machinery, other employees being interdependent upon his particular work. It is not altogether a pleasing prospect and one can only trust that in looking upon the extreme side of things the result may not be so disastrous as the aspect appears.

Among gramophone firms the present is a time of preparation. An ounce of quick decision now is better than a ton of effort a month hence. New is the old adage "preparation is the thief of time" more true than it is to-day. We must all buckle to the knowledge that if the Germans get through our businesses wouldn't be worth the damn.

In the foregoing I have touched upon but one aspect of the new-man-power bill, excluding to the last any reference to its likely effect upon record sales. Owing to the general social and commercial upheaval it will entail, talking machine men are of opinion that sales of luxury articles may be seriously affected, for a time at least. Consideration of the position convinces me that there will be no great falling off in the demand for mechanical music; it is too much of a necessity in the national life, these times, and as for soldiers and sailors—to them record music is absolutely essential. If, therefore, a shortage of sales is registered I firmly believe it will be more the result of an output failure rather than anything else. America is out to do her "big" bit; so is Great Britain. We are, in fact, doing it at terrible cost. In the face of that, who can say that anyone must overworry as to the preservation of the gramophone industry?

United States Import Restrictions

The Board of Trade are in receipt, through the Foreign Office, of telegraphic information from His Majesty’s representative at Washington to the effect that the War Trade Board have issued a list of commodities, licenses for the import of which into the United States will be granted only under the following conditions:

If the goods are shipped to the United States as return cargo from ports in Europe, and then only when (a) They are shipped from a convenient port, and (b) They are loaded without delay.

The list of restricted imports from all countries specifies musical instruments and parts thereof, while from Europe only phonographs, gramophones and parts thereof included.

It is understood that the United States authorities, in order to meet these conditions, will grant licenses freely for the import of United Kingdom goods.

Applicants for import licenses will be required to show that they have paid duties in the usual manner on the goods which have been complied with. In the case of shipments from Europe on and after April 15, therefore, it will practically be necessary for the applicant for a license to afford proof that shipping space for the goods has been engaged; and such is understood to be the intention of the regulations.

After April 15 United States Consuls will not certify Consular Invoices for goods included in the list unless they are furnished with the number of the import license granted, or other evidence that a license has been issued. Shipping agencies are advised not to accept for shipment consignments of listed articles without similar evidence.

New Editor for "The Voice"

In the current issue of "His Master’s Voice" house organ C. F. Higham announces his relinquishment of "The Voice," which he has so interestingly conducted since its inception. The editorship passes to Miss G. Ivy Sanders.

It is interesting to note, by the way, that Mr. Higham was recently admitted to the freedom of the city of London.

The Wireless Voice at Sea

At the Royal Institution lectures Prof. J. Joly recently described a radio-telephone in use by the United States. In certain lighthouses where there was no human being, a phonograph spoke into a receiver, which converted its sounds into ether waves, which in turn were picked up by the ships and again translated into sounds. Thus, on approaching Point Judas, the sailor hears the words "Point Judas" called out again and again. As he nears the dangerous point the wireless voice will notify in a considerably deeper tone: "Keep off; you are getting into danger."

Sound travels under water with such clarity, said Prof. Joly, that a watertight watch which had been lost in the sea and continued to go was recovered by a diver, who traced it by its tick from a considerable distance. "His Master’s Voice"—"The Mikado"

It will come as welcome news to the lovers of the gramophone that the Gramophone Co. has prepared a series of twelve-inch double-sided records bearing the entire opera of Gilbert and Sullivan’s great favorite. Many records of "The Mikado" have, of course, been issued from time to time, but this is the first complete set recorded under the direction of the popular D'Oyly Carte Opera Co. The music and song is produced in conformity with this company’s high standard of quality, the chief executants having been chosen from such eminent artists as Ernest Pike, John Harrison, Robert Radford, Edna Thornton, Violet Essex, etc. It is altogether an artistic achievement of which every-body concerned may be justly proud, while from a sales point of view it furnishes the dealer with an excellent opportunity for unlimited trade, having regard to the very wide appeal which this opera makes.

"Winners" for Popular Titles

Shorn of all embroidered language one can only describe the current issues of Winner records as representing the utmost possible value in quality of recording as in the class of fare provided. The current program presents a galaxy of good things, there being a well-chosen variety of vocal and instrumental numbers of the popular order by artists of considerable repute, as, for instance—The Two Bobbs, Stanley Kirkby, Band of H. M., First Life Guards, De Russe, the Carlton Vocal Trio, the Bijou and the Royal Court Orchestras, Corner House Rag-time Band, etc. A recent issue comprises a double bearing thereon two of the greatest favorites of the day—"When the Bells of Peace Are Ringing" and "Sergeant Daddy, V. C." (No. 3180), by Stanley Kirkby. It is altogether an excellent record, and one which live overseas dealers would do well to overlook.

Not Quite Up-to-Date

What must be regarded as a tribute to the value of continuous publicity is found in the publication of the Gramophone Co.’s title as the Gramophone Typewriter Co. The artist who drew the cartoon on the front cover of a recent issue of "The Passing Show" will evidently be surprised at the information that this well-known firm dropped out the word typewriter from its title almost a decade ago. He should take an interest in some of the more current "His Master’s Voice" advertisements.

Records by the Late Lord Roberts, V. C.

The great field marshal was not the only wideawake man in this country (though there were precious few) to warn us against the need to prepare for, Armanageddon, but his efforts and the weight of his reputation created an impression which cut deep into the minds of all thinking men. His advocacy of conscription was fortunately "canned" by the "His Master’s Voice"
company on a series of six records. These records find many buyers these days, though in this regard it is seldom one comes across a public reference to them. One would have thought to the contrary. Curious to relate, the first public announcement of these records I have seen for a long time reaches me from the Emerald Isle, of all places! It is in the form of an advertisement by Thos. Edens Osborne, the great Belfast factor, whose temerity would be surprising were it not that he evidently knows his public. That a demand is anticipated is distinctly pleasing, and I hope the results will prove even more so!

Gramophone Outfits for Jack and Tommy

There is no general conspiracy to provide our soldiers and sailors with free gramophones and records, but it is really surprising the several channels which exist for their distribution and collection from a generous public. One of the most popular organizations for this purpose is the Daily Express Cheery Fund, which under the guidance of one named "Orion" dispenses all sorts of games and amusements to the different services. Free "drawings" have been instituted for outfits consisting of a fine Colom- bia trench gramophone, six double records and a thousand needles. Any soldier or sailor acting for a group of comrades may participate by making application, countersigned by an O. C., to the Daily Express office, London. The "drawings" take place periodically, the outfits being equally divided between the two services. By this scheme about forty free gramophone outfits, each nearly £10 each, have been distributed in a few weeks. The demand is, of course, greater than the supply, which is depend- ent upon a generous public. Unless more funds are subscribed within the near future there will be a falling off in the number of outfits available for distribution. Here is a chance therefore to supplement Orion’s splendid efforts to provide the right kind of amusement for the rest camp behind the line—the line that keeps the enemy from deserting our Homeland. Who will help? Any reader wishing of so doing either in goods or in hard cash should communicate with Orion at the above address, and receive his grateful acknowledgment. Do it today!

The Shortage of Steel—Substitutes for Needles

Owing to the available supplies of steel for all purposes other than war work having been seriously curtailed, recourse has been had to sub- stituents for the ordinary steel gramophone needle. A measure of success has been achieved by two or three enterprising firms in the direction ofresharpening by a special process old or used needles, but this method does not seem to have altogether met what is to-day a difficult problem. The bamboo or fibre needle is coming into vogue at a greater rate than formerly, though a certain amount of prejudice remains to be overcome before this substitute can be regarded as likely to materially counterbalance the steel needle shortage, owing in part to its soft tone, and mainly to the initial expense of the repoint- ing equipment. Where volume is the great de- sideratum, as it is with a large circle of gramo- phonists, the fibre point makes little or no ap- peal, and, except of necessity, is scarcely likely to displace the steel needle.

There must be two focal points on the mar- ket, and a glass one, too, I believe. But what I have seen and heard of these types does not impress me with any favorable leaning towards them. The reproducers of qualities are back and strident, to say nothing of the abnormal damage they cause to the record sound walls. Experiments, I am told, with the ordinary bass horn, have given delightful results from the w.e.v.s point of tonal quality. But here again the work of their collection and shaping pre- cedes the general use of such, as it is not a commercial proposition by any means.

A more interesting prospect is furnished by the suggestion to utilize the spines from hedge- bogs. This suggestion is reported as a "dis- covery" by an army officer, who has tried the plan with great success. He gives it as his opin- ion that there is nothing to equal the purity and detail of tone derived from a hedgehog spine, and recommends all gramo phonists to try it. There is somewhat dangerous piece of advice, I think, through amusing to picture a band of music lovers indulging in the nobile sport of hedgehog hunting. I think, after all, ‘t were better not to forsake the steel needle!

A Special Sunday at Home Program

Quite a novel idea in music lists is announced by the British Zonophone Co. It comprises a program embodying sacred, classical and semi- religious music, on suitable Sunday ren- dition for the family circle. The idea has caught on immensely among the wholesale and retail trade, and many a live dealer reports the inaugu- tration of special period sales, coupled with local advertising and attractive window dressing. It is certainly an unique opportunity for a big local sales campaign.

A Gramophone Firm’s “Tank” Contribution

As mobile banks, the Tanks have been doing great things around the country. The story of an individual firm’s contribution makes interesting reading, as reflecting the determination of the people to see the war through to the bitter end. One week’s contribution from Brown Bros., Ltd., and their staff amounted to no less than £3,500, representing a further investment of £5,000 by the firm, and another £750 contributed by its members’ War Ser- vicing Association. If every firm did as well as this in the purchase of certificates and bonds when the Tank calls, there will be little need of worrying about the financial part of the war. Many other music trade concerns have also made substantial contributions.

The Adventures of Four “H. M. V.” Records

In a letter to the Gramophone Co., Ltd., a captain in the R. E.’s outlines an interesting story of the adventures of four records. He writes: "After doing their bit in the Cambrai show they had the misfortune to become booty for the Boche, who quite possibly made them serve their turn for him. However, he, too, had to abandon them, evidently in a hurry, as we found them lying out in the open in No Man’s Land, where they had lain for a month, exposed to rain and frost, not to speak of barrages, and so forth. We think that after such a dose of the horrors of war the records really play quite well, even on our old war-worn machine."

To say the least, it speaks well for the qual- ity of the “His Master’s Voice” record material, that it could withstand so well the elements of weather and warfare to the extent mentioned.

"Yes, Uncle," First on Columbia

Two orchestral records on a special issue of Columbia are the first to be announced of the popular musical play at the Prince’s Theatre. One is an orchestral selection giving the eight principal numbers. The record is in two parts, played by the London Revue Orchestra. The other "Yes, Uncle," record is by Jacobo’s Troca- derians, and produces an unusually sparkling performance of "Widows Are Wonderful" and "Think of Me," the play’s outstanding songs.

A Strong "Double"

In response to a very wide demand, there is announced this month a Columbia record of "Smoke Clouds," the delightful song first in- troduced by Miss Jennie Benson in "Topsy Turvy" and since the rage of the whole com- munity. It is sung by Basil Laverack and called "cillo obbligato. On the back it carries a fine record- ing of "Roses of Picardy."

The End of a Perfect Day

All that was left after a fire at the mess of a Provincial military camp was a copy of the song, "The End of a Perfect Day."

Soundboxes

If you are after a genuine offer of soundboxes, you’ll do well to communicate with us immediately. We have tens of thousands of perfect soundboxes, fitted with the best quality mics. Confidently recom- mended for cheaper machines, abso-lutely reliable and give excellent reproduction. Price to clear $50 per gross, F. O. B. London.

FROM OUR LONDON HEADQUARTERS—(Continued from page 108)
SITUATION WANTED—Young married man now employed as manager of a wholesale phonograph house wishes to make new connections with high grade record manufacturers. Thoroughly capable of assuming management of sales and advertising or handling sales promotion work. Can furnish unquestionable references. He would also consider position as Chicago representative for some outside manufacturer. Address "A. P. 30," care The Talking Machine World, 373 Fourth Ave., New York.

WANTED—Manager for phonograph department. A man of convincing ability and selling experience (with Edison phonographs) preferred. A good proposition will be offered to the party who can show results. Apply with full particulars and confidence, to Layton Bros., 550 St. Catherine St., W., Montreal, Canada.

WANTED—A manager for our phonograph department at our Ottawa warehouses. Apply with reference to C. W. Lindsay, Ltd., 512 St. Catherine St., W., Montreal, Canada.

WANTED—A thoroughly experienced man in selling and ordering records; one experienced in Victor and Columbia records preferred; capable to take charge of record department for a leading firm in large Western Coast city. Good permanent proposition to right party. Must be a business producer and know how to handle other record sales people and get results. References required. Address "Box 517," care The Talking Machine World, 373 Fourth Ave., New York.

WANTED—High class salesman in our wholesale department to cover Southern States principally. Excellent position for high class salesman. Must be energetic and enjoy a reputation. Address "Box 519," care S. A. Phonograph Co., 218 North Second St., Richmond, Va.

SALESMEN wanted to sell phonograph dealers nationally advertised very successful phonograph attachment. Will give exclusive rights in territories of six States each or less contribution to Boston, Philadelphia, Pittsburgh, Atlanta, Dallas, Denver, Los Angeles, Seattle, Minneapolis and San Francisco. Liberal commission. Desirable man of mature age, experience, present employer and expectations. May arrange as side line some territories. Address Jones-Metrola, Inc., 29 West Thirty-fifth St., New York.

LINES WANTED—Wholesale representative with high standing for reputable Building, Chicago, wants agency for medium grade talking machine and also for accessories and articles that go hand in hand with talking machine and piano trade. Address "A. P. 27," care The Talking Machine World, 209 South State St., Chicago, Ill.

EXPERIENCED SALESWOMAN of personality, driving automobile. Will solicit phonograph sales from farmers. Submit offers to "M. W.," care The Talking Machine World, 209 South State St., Chicago, Ill.

WANTED in Chicago, experienced packer and repair man on talking machines. Give experience and references. Address Channing L. Sentz, Marquette Building, Chicago, Ill.

POSITION WANTED—Would like position with talking machine manufacturer as laboratory experimental man or charge of construction from five years old with several years' experience in every phase of the art. I also have complete mechanical equipment for experimental work and several valuable inventions which I would gladly turn over along with my services to the right concern. Address "Box 519," care The Talking Machine World, 373 Fourth Ave., New York.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

This invention relates to automatic record-repeating means for phonographs and the like, the features and advantages of which will be apparent to those skilled in the art from the following description in connection with the drawings.

In the latter, Figure 1 is a plan view of a phonograph comprising one embodiment of the record-repeating means, said figure showing the parts in set position with the record playing; Fig. 2 is a similar view except that the parts are shown in tripped position with the needle and sound box lifted off the record and in the act of being carried back by the conveyer to be replaced on the record at its starting point; this figure further illustrates a change in the adjustment of the device to make it do this for a smaller record, e. g., a ten-inch record, whereas Fig. 1 shows the adjustment for a twelve-inch record. Fig. 3 is a plan view, on an enlarged scale, of the mechanism underlying the turntable; Fig. 4 is a vertical section partly in elevation on the line 4—4 in Fig. 3 looking in the direction of the arrows; Fig. 5 is a similar view on the line 5—5 in said Fig. 3; Fig. 6 is an underneath fragmentary view of the turntable on a larger scale to illustrate the movable dog carried thereby; Fig. 7 is a vertical section partly in elevation on the line 7—7 in Fig. 6 looking in the direction of the arrows; and Fig. 8 is an enlarged detail of Fig. 1, the switch member being shown adjusted as for a ten-inch record, Fig. 9 is an enlarged sectional view on the line 9—9 in Fig. 2, looking in the direction of the arrows, and Fig. 10 is a vertical section on line 10—10 in Fig. 3.

This invention relates to improvements in volume controlling apparatus for sound reproducing machines. An important object of the invention is to provide apparatus of the above mentioned character, which is attractive in appearance, highly efficient in operation, and convenient to operate.

Figure 1 is a side elevation of apparatus embodying the invention. Fig. 2 is a detail transverse section through the lower track for the panel curtain. Fig. 3 is an enlarged horizontal, sectional view through a portion of the panel curtain. Fig. 4 is a horizontal sectional view taken on line 4—4 of Fig. 1, and Fig. 5 is a transverse sectional view taken on line 5—5 of Fig. 4.

This invention has for its object to provide a device for sharpening needles, and which is particularly adapted for sharpening needles of metal or other material used in talking machines.

The invention has for its main object to provide a needle-sharpening attachment for sound-reproducing instruments constructed and arranged with relation to the sound box thereof, and the horn carrying such sound box so that when it is desired to sharpen a needle engaged with the sound box the latter may be swung on the pivot of the horn so that the needle enters the sharpening means and is held firmly in position with relation to the sharpening element, and may then be sharpened and returned to normal position for playing further talking machine records.

The invention has for its further object to provide a small, simple and efficient device of the character set forth which may be easily attached to the casing of a sound-reproducing instrument in position for ready operation to sharpen needle used in accordance with the invention.

Figure 1 is a perspective view of a needle-sharpening device constructed in accordance with the invention. Fig. 2 is a top plan view of the same. Fig. 3 is a vertical longitudinal section of the same on the line 3—3 of Fig. 2. Fig. 4 is a fragmentary detail section on the line 4—4 of Fig. 3. Fig. 5 is a fragmentary view in side elevation partly in section showing a portion of the casing of a sound-reproducing instrument equipped with a needle-sharpening device in accordance with the invention. Fig. 6 is a top plan view of the same.

This invention relates to improvements in phonograph attachments and particularly to devices for cleaning a record in advance of the needle so as to remove particles of dirt and dust therefrom.

Devices have been provided for the same purpose as this invention but by reason of the particular construction of this device and by reason of the specific way in which it is mounted upon the native parts of the talking machine, advantages are secured that are not attained by the previous devices. One disadvantage of such devices already produced is that they are attached only to the shell of the sound box and since they include spring elements, they present readily vibrated bodies which are in position to receive their vibrations from the diaphragm of the sound box through the shell of the sound box and when the phonograph is in operation there is a tendency for such devices to vibrate with a singing sound and interfere with the correct reproduction of the recorded sound. In the construction the device is mounted upon the stem of the needle post and moves therewith as the needle post is moved with the needle. The needle post, of course, has a positive movement with the needle and not a vibration such as is imparted to the diaphragm and thus the tendency of the metal portions of this device to vibrate is prevented.

One object of the invention is to provide a device of this character which is resilient in its nature so as to readily accommodate itself to varying conditions, due to the use of longer or shorter needles.

Another and primary object of the present invention is to provide a cleaning brush which may be mounted upon the stem of the needle post of a sound box and which will lie with its brush portion transversely of the line of movement of the record so that with the lateral movement of the needle as it engages the sides of the record groove, the brush will also move laterally and as a result of this movement will more thoroughly clean the record groove.

Another object is to provide a device of this character in which the cleaning element or brush can be removed when worn out and a new one placed therein, without the necessity for removing the device from the phonograph.

In the drawing: Figure 1 is an enlarged elevation of the invention applied to the needle clamp of a phonograph sound box; Fig. 2 is a front elevation; Fig. 3 is an enlarged vertical section on the line 3—3 of Fig. 2; Fig. 4 is an enlarged section on the line 3—3 of Fig. 1.

This invention has for its object to provide a universal talking machine tone arm for use with records of both the bottom cut and side cut types and particularly those familiarly known as the Victor, Edison and Pathé records.

A further object of the invention is to dispense with the necessity for detaching any parts of the tone arm when it is desired to play one or the other make of records, but to enable this to be done by simply moving parts into and out of operative position and which can be done easily and quickly by anyone without special skill or instruction.

A further object of the invention is to proportion and dispose the parts so that the stylus for each type of record will be held in place in the groove under the proper pressure, thereby preserving the desired tone volume and quality.

Figure 1 is a side elevation showing the invention arranged for playing an Edison record; Fig. 2 is a top plan view of the invention as shown in Fig. 1; Figs. 3 and 4 are sectional views on the lines 3—3 and 4—4 of Figs. 2 and 3, respectively; Fig. 5 shows the invention arranged to play a Victor record; Fig. 6 shows both sound boxes thrown back in position at rest, and Fig. 7 is a plan view of the invention as shown in Fig. 6.

(Continued on page 112)
LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS—(Continued from page 111)

TALKING MACHINE Sound Box.—Thomas F. Jones, Maywood, Ill. Patent No. 1,258,341.
This invention relates to sound boxes of talking machines, and its object is to provide a novel and improved mounting therefor whereby it is free to rotate about its own axis rather than swing bodily about an axis outside of itself, this arrangement resulting in advantages.

Figure 1 is a side elevation of a fragment of the tone arm of a talking machine and the sound box carried thereby; Fig. 2 is a plan view thereof; Fig. 3 is a section on the line 3—3 of Fig. 2; and Fig. 4 is a section on the line 4—4 of Fig. 2.

This invention has reference to sound reproducing machines, and its purpose is particularly to provide an apparatus that is readily applicable to and used in conjunction with pianos so that a phonograph mechanism may be used either independently of or in conjunction or harmony with a piano. A more especial purpose of the invention is to afford a novel drive or controlling mechanism that permits ready application of the device to a piano structure. Another object of the improvement resides in the novel construction and relationship of the horn to the record table, so as to create a maximum of sound volume and clearness in a minimum space and with due regard to the simplicity of the construction.

In the drawings: Figure 1 is a front elevation of a piano, with a portion of the case broken away, and showing the application of a preferred form of the invention; Fig. 2 is a horizontal sectional view on the line 2—2 of Fig. 1; Fig. 3 is a front elevation of the upper part of the piano case, with the record table in playing position; Fig. 4 is a horizontal sectional view showing the position of the record table when out of operation; Fig. 5 is a plan view of the keys and key levers; Fig. 6 is a central vertical sectional view of the record table; Fig. 7 is a plan view of the same partially broken away; Fig. 8 is a perspective view of the housing and horn for the record table; Fig. 9 is an enlarged detail view showing the hinge connection between the two parts of the record table; Fig. 10 is a sectional view taken through the hinge portion of the table and showing the latter in its folded and inoperative position, and Fig. 11 is a sectional view of the housing and horn for the record table.

The object of this invention is to provide an improved tone arm for talking machines. More particularly, it is one of the objects of the invention to provide a tone arm in which the passages for the sound waves are constructed almost entirely of wood. By using a wooden tone arm, the objectionable metallic, harsh or scratching sounds accompanying tone reproduction in talking machines may be almost entirely eliminated and only the tones sought to be reproduced are heard. This invention further provides a wooden tone arm of a certain novel interior construction whereby a clearer and more soft tone reproduction is obtained.

Figure 1 is a view, partly in section, of a tone arm and sound box embodying the invention; Fig. 2 is a plan view of the supporting bearing for the tone arm.

This invention relates to a type of talking machine employing a record carried on the face of a disc which is revolved by a suitable motor, and has for its object to produce a device whereby a sound box or reproducer may be employed for the purpose of reproducing sound from a disc having a sinusous record groove in which the reproducing stylus is moved laterally relatively to the face of the disc, and the same reproducer may be employed to reproduce sound from a disc having a vertically cut record groove in which the stylus is moved in the direction perpendicular to the plane of the disc.

A further object is to produce a device whereby by the position of the sound box may be reversed to give access to the needle holder without reversing or in any way altering the position of the tone arm or any part thereof.

A further object is to produce a device in which the sound vibrations set up by the diaphragm will be caused to travel into and through the tone arm without encountering obstructions and without making sharp turns.

In the drawings: Figure 1 is a plan view of the device operating in conjunction with a record disc having a sinusous or lateral cut groove; Fig. 2 is a side elevation of the same; Fig. 3 is a view similar to Fig. 1, but showing the device engaging a vertical cut record; Fig. 4 is a side elevation of the same; Fig. 5 is an enlarged detail sectional view of a reproducer in position to operate on a sinusous groove record; Fig. 6 is a sectional view on the line 6—6 of Fig. 5; Fig. 7 is a side elevation of the parts shown in Fig. 5; and Fig. 8 is an enlarged side elevation of the device in position to operate on a vertical cut record.

This invention relates to locks and more particularly to a device for securing the reproducer or speaker of a talking machine to the tone arm. The object of the invention is to produce a device whereby the reproducer may be securely locked to the tone arm, and cannot be removed by an unauthorized person.

In the drawings: Figure 1 is a rear elevation of a reproducer partly in section, the section being taken on the line 1—1 of Fig. 2; Fig. 2 is a section on the line 2—2 of Fig. 1; Fig. 3 is a plan view of the lock with the thimble in section; Fig. 4 is an elevation of the end of the tone arm; and Fig. 5 is an elevation of the key.

This present invention relates to improvements in sound boxes and comprises improvements whereby the sound box can be converted to play either lateral or vertical wave records.

In the latter Figure 1 is a face-view of a sound box illustrating one form or embodiment of this improvement shown as if playing a lateral-wave disc record. Fig. 2 is a partial edge view of the sound box in Fig. 1; Fig. 3 is similar to Fig. 2 except that it shows the device adjusted as if to play a vertical-wave disc record; Fig. 4 is an enlarged vertical section partly in elevation on the line 4—4 in Fig. 2 looking in the direction of the arrows; Fig. 5 is a modification of view being otherwise shown in Fig. 4; and Fig. 6 is a side view of one of the parts in Fig. 5.

This invention relates to hinged cover supports for talking machine cabinets and the like.

One object of the invention is to provide means for holding the cover open through the instrumentality of suitable mechanism controlled by the tension of a spring.

Another object resides in the provision of

Improvement in Foreign Trade

Department of Commerce Reports Substantial Recovery From Recent Decline

WASHINGTON, D. C., May 10.—March imports and exports show a partial recovery from the decline in recent months, according to a statement issued to-day by the Bureau of Foreign and Domestic Commerce.

Exports for March amounted to $531,000,000, an increase of $419,000,000 over February. For the nine months ended with March exports were valued at $4,394,000,000, a decrease from the $4,637,000,000 recorded for the nine months' period a year ago.

"The Victor talking machine's design, 'His Master's Voice,' has become a household word, and the quaint little fox terrier at attention before the horn is familiar to more Americans than any of the world's great masterpieces"—Collier's Weekly.
The Highest Class Talking Machine in the World

THE INSTRUMENT OF QUALITY
Sonora
CLEAR AS A BELL

Because of its magnificent tone which won highest score for quality at the Panama Pacific Exposition, Sonora is of especial interest to those who are accustomed to demand the very best and who can afford to, and who do pay cash for what they want.

There is a great advantage in selling a phonograph for cash instead of tying up your capital with long installment payments. Sonora keeps your bank balance strong, and you don’t have to worry how to make ends meet as your business grows, because you are not obliged to meet the unbusiness-like "easy payments" offered by your competitor.

Sonora, because of its many exclusive features sells easily and quickly on sheer merit. It is worth all that is asked for it. It delights the purchaser and makes money for the dealer. Sonora plays all makes of disc records perfectly without extra attachments. Write us regarding the Sonora agency in your territory.

TALKING MACHINE MAN IN FRANCE

E. W. Dahlberg, of Montgomery, Ala., writes in a Graphic Manner Regarding His Experiences as an American Soldier "Over There"

ALBERTA, Ga., June 5—E. N. Upshaw, secretary of the Elyes-Austell Co., Victor wholesalers of this city, recently received a letter from E. W. Dahlberg of the Dahlberg Talking Machine Co., of Montgomery, Ala., who left his business in the hands of his partners some time ago and enlisted in the United States Marine Corps. Mr. Dahlberg, who has been in France for some time, took occasion to remark upon the presence of "His Master's Voice" trademark in that country. In fact, it is about as well known in that country as it is in the United States. In this letter, which was delayed in transit, he says:

"It's near 'tap's' now, and someone just told me to-day was Easter. How unlike a year ago. But, you know, in a headquarters office in the American forces yesterday are the same as to-day. We have thousands of soldiers here. I wish I had the nerve to enter during 'session' and see them inside. The two largest down town have quite historic values. I haven't seen a church in Montpellier since I have been here. Ninety per cent. of the people seem to be Catholics.

"Your friend, Mr. Edmond Clement, is singing in this town. He has quite a wonderful voice. Reminds me quite a lot of our own John. Recently I have heard Manon, Cavalleria and Paghnac—all in French. Can you imagine 'Farglase' and 'West' translated into French? Gosh, when the nasal hit it, I hardly could recognize it. Baritone only fair, if Alma Gluck has a twin sister, she sang 'Nedda' deliciously.

"'His Master's Voice' appears in great big letters on the main street, in front of a fine, artistic place—having signs of much former luxury. I asked my companion if the people understood the meaning of 'His Master's Voice' (because it's always in English), and she answered it was a byword, even among the skidies, and about as well known as in America. They haven't had a cabinet machine in years, and not a new record in several months. Only have the 'Victor,' but we have the usual Victor feeling over prospects, etc.

"Say, this is a great town for you and Foster and Jack to visit while your wives stay home.

"You know New Orleans, New York? I never thought that any place could make them look like country villages, but this one does. There's more champagne, wine, booze (of all kinds) on one block downtown than in fifty blocks in New Orleans!

"I am several miles out (in the woods) and have a big time getting into town. Hold up trenched trains, there are so many, but for all that, I make it in due time. The town is as large or larger in peace time than New Orleans, and it's some hort.

"You should have heard me speak this lingoo. I can do it better than the natives, or rather I guess I do, because when I pronounce a word absolutely according to Hoyle and they don't get it, why, it's just over their heads (!). But, at that, we get by—mostly with the aid of our hands. The sign language, I find, is universal.

"The Big Ussel is taking care of us 'over here' better than back in God's country—I mean with reference to equipment, shelter, clothes, food, etc.—and we very genuinely appreciate you people's efforts and sacrifices in our behalf.

MUSIC FOR SUBWAY WORKERS

Lively Strains Keep Track Repair Crew Going at Lively Pace Throughout the Night

Both plain and fancy labor is getting so scarce that special inducements are being offered by the big corporations. In the hope of keeping a track repair crew interested in its work and entertained, a large talking machine is kept playing lively reels and jigs in the subway, just south of the Ninety-sixth station, where the men are working at night.

"We've had the talking machine playing for the men in all sorts of other departments, and they are doing good work. When they slacken up a bit the record is played faster and they get in the habit of keeping step with the music."

Just at that minute a particularly lively jig was being played, and the subway laborers had to step so lively they got their feet all tied up in the rails. Straightening them out caused a grievous loss of time and then the talking machine was slowed down to a dog trot.

NEW INCORPORATION

The Farron S. Betts Co., of Brooklyn, N. Y., was incorporated recently for the purpose of manufactoring albums and cabinets for talking machine records. The capitalization of the concern is $300,000, the incorporators being F. S. Betts, J. W. Murphy and J. S. Keith.

Value of Stick-to-It-iveness to Talking Machine Salesmen

Pretty nearly every good prospect for a talking machine buys one sooner or later. The reason so many of them do not buy from the dealer who first discovers they are prospects is not so much that that dealer's line is not satisfactory as that the dealer does not stick to the prospect long enough.

We want them to get into the habit of talking by buying. We present our proposition to him. He is non-committal and we accomplish nothing the first time. We see him again after a few days and he is not any too hot either. We become discouraged. Then the third time we see him he says he is not going to do anything at present.

We think that he has put off buying when all that has happened is that we have not got him interested in our proposition and he doesn't want to encourage us to keep coming. At all events, he does not prove responsive and we have other prospects demanding attention and we become interested in them and forget about this one until we discover something we know he has bought elsewhere.

The only trouble was that we did not stick to him, studying his case and trying to see the proposition from his point of view. We are seeking to discover just what he wanted and what we had that would fill the bill. It may be that the reason we did not get the order was that we did not keep it up, or rather that we did not get the prospect in the right frame of mind. We may have simply developed him to a point where he was satisfied, and then all ready to sign up for almost anything with a case and a sound box. Let's stick and study in every instance until the prospect absolutely refuses our proposition.

ALMA GLUCK AND THE RED CROSS

Noted Artist Asked Everyone Who Enjoys Her Victor Records to Subscribe $1 to the Recent Red Cross Drive—Results Are Excellent

Alma Gluck, noted singer and Victor record artist, hit upon an unique plan for aiding the American Red Cross. She asked every one of her fans—"You who ever heard my voice through the medium of Victor records should contribute at least $1 to the Red Cross for the day of Alma Gluck." The result of that organization. It is said that close to one million of Mme. Gluck's records are sold each year, which led her to hope for big returns.

In talking of her plan Mme. Gluck said:

"It occurred to me that all of those persons likely to be moved into generosity by the Red Cross in its humanitarian work in the midst of this terrible war, the people who love music, the men and women of tender heart that thrill with any sym-pathetic when they listen to simple songs, are those naturally most likely to respond here. I recalled the many notes of sweet and tender sentiment that had come to me from my own big musical family in this connection, and I made up my mind that, if it were possible, I should mobilize all of them—all to whom my voice is familiar and who might care some sweet way to repay me for any pleasure it gave them—into forming a sort of Alma Gluck army for the Red Cross. If thereafter the plan is ex- tended I shall stick to it, and I shall not hesitate to call on all my music lovers in turn, shall be most happy indeed."

The suggestion was certainly a happy one, for Gluck's plan was the plea sent out that money came pouring in from admirers of Alma Gluck in New York, from young girls who live way out in little towns in the West, who love to hear Alma Gluck sing "Little Grey Home in the West," and checks came in from the South, where her "Carry Me Back to Ole Virginny" has won its way into their hearts—in fact, Alma Gluck must have friends galore, for money in abundance came in to the Red Cross as a result of this appeal.

Besides collecting thousands of dollars through the "Love Me, I'm Alma" campaign, she also contributed $25,000 personally to the Red Cross, and auctioned $10,000 worth of tickets for the Josef Hoffmann recital at Carnegie Hall. On the opening of the day of the "Love Me, I'm Alma" campaign, she elected $15,000. She said that she would endeavor to send each one of those who contributed to the "Red Cross Love Fund" an autograph photograph as an acknowledgment of their kindness.

DOEBLER CO. EXPANSION

Additional Buildings May Soon Become a Necessity to Meet Business Needs

The department of the Doebler Die-Casting Co.'s Brooklyn plant devoted to the die-casting of photographe parts reports great activity. The present business expansion has already reached such proportions that additional building operations are already rumored. It is less than a year since the great modern concrete building used as the main building was added to their group of buildings.

The General Recording Co., of Manahawkin, was incorporated at Albany recently with capital of $20,000, for the purpose of manufacturing records. Those interested are: C. J. Jackson, F. W. Weeks, and H. Hemming, 1476 Broadway.
Why the Persistently Dissatisfied Man Is a Real Menace to a Sales Organization

Look out for the disturber in the sales organization, the fellow who is never satisfied, who declares that everything about the store is operated on the wrong basis, who maintains that he never gets a square deal and never loses an opportunity for waiting on his fellow employees. Such a man can do a surprising amount of injury in any organization, unless he is checked without delay.

There are times when a most competent salesman feels that he has considerable kick against the way he has been treated or is being treated by the house he is working for. If the manager is wise he will endeavor to find out if there is any basis for the complaint or dissatisfaction and seek to adjust it. If the salesman has a real grievance, and ponders over it, it interferes materially with his efficiency, and if he airs it, it starts the rest of the staff to wondering whether or not they are getting everything they should. Adjust any warranted grievance without delay. Either give the salesman what is coming to him, if it is right, or explain to him where he is in error, if such should be the case.

THE HANDLING OF RECORD STOCK

Goodwin's, Ltd., of Montreal, Give Some Pointers on a Very Important Subject That Are of Considerable Interest to the Trade at Large

Goodwin's, Ltd., of Montreal, give some pointers on a very important subject that are of considerable interest to the trade at large.

Montreal, Que., June 5.—A simple and satisfactory method of keeping their stock of Blue Amberol records is thus explained by Goodwin's, Ltd., of Montreal:

"Each compartment is twelve and one-half inches high, four inches deep and two and three-quarter inches wide. This permits the placing of five records in each compartment and each record projects about three-quarters of an inch, so that it can be easily taken out. The most important part of the system is that we do not carry any duplicate numbers in any compartment. Briefly, in one set of racks we carry a complete stock of every record (one of each only), as listed in the numerical catalog. In this way we can tell at a glance the missing records, and the entire stock can be taken in a very short time. Of course, we carry a reserve stock in addition to the above, and each morning a list of records sold the previous day is taken and if in the reserve stock, they are placed in the regular stock. If not in the reserve stock they are immediately ordered, and in this way our stock is always complete.

"The title and number of each record is kept on separate cards. When records are ordered, the number of records ordered is placed on each card and those sold during the day are crossed off each morning. When checking up the records sold, if we find a particular record is desired, the card is taken out and the record ordered. The card is kept until the record is received.

"The importance of our system is that we can tell in five minutes exactly the number of each record out of stock and which it is necessary to order; thus, as previously stated, keeping our stock as complete as possible with practically very little time and effort.

"It would hardly seem necessary for us to add that an orderly and systematically kept record stock helps a lot toward increasing record sales. Many Amberol dealers show this, but for the benefit of those who do not appreciate the fact we might say that the more systematic and complete a dealer keeps his record stock the fewer sales he will lose through being out of stock of certain records. A systematic stock-keeping method will help the dealer keep his stock complete and a complete stock will help him meet most any requirement of his record customers."

Now the C. B. Haynes Co., Inc.

Richmond, Va., June 1.—The firm of C. B. Haynes & Co., 300 East Broad street, this city, which has been conducting a wholesale and retail business in Edison products since 1906, have incorporated under the style of the C. B. Haynes Co., Inc., with $100,000 paid up capital, consisting of the following officials: C. B. Haynes, president; Geo. E. Garnett, vice-president; E. Bowman, secretary and treasurer. Mr. Bowman, a resident of this city, became connected with the firm in September, 1915, and has proved a very valuable asset. Geo. E. Garnett is a traveling representative, and has been connected with the company for the last ten years. C. B. Haynes, who is known as "Pop Haynes," is still at the helm. The firm's business has shown an increase every month this year of from 50 to 75 per cent. over last year—"even if in war times"—and expect it to continue all the year.

DEATH OF EVAN WILLIAMS

Singer Long Popular in the Talking Machine Trade and the Musical World Passes Away—Was Striking Figure in Concert and Oratorio

The announcement of the death of Evan Williams, the popular Victor artist, which occurred in Akron, O., after a short illness on May 24, has brought a sense of personal loss into every home where there is a talking machine, for there are few makers of records in the vocal field who enjoy a wider popularity than did this big-hearted and genial personality, who has passed from us.

Evan Williams was probably the most distinguished oratorio tenor and lyric singer of the old school on the concert stage. His concerts were always a delight because of his programming of many English and American ballads, which he sang with rare charm, and better still with an enunciation that was a delight. He made records exclusively for the Victor Co., and it may safely be stated that every one of his records is a splendid example of good singing and perfect record making. For some years his record of Bartlett's "A Dream" was considered to be one of the finest vocal records made. Every expression, every nuance, every feeling was revealed in this record so masterfully that it never failed to move its hearer as the singer would in person.

Another fine example of his oratorio singing in record form was "Sound the Alarm" from "Judith Maccabaean"; but it is unjust to differentiate, for all of Evan Williams' records, those in oratorio or ballad form, are perfect examples of fine singing, and they will remain the greatest monument to his memory—records that will ever be treasured and admired.

Mr. Williams had been termed a national figure in the musical world. For twenty-seven years he thought and sang and studied for better music throughout the nation. He was intensely American, and naturally very patriotic. He had been doing magnificent work at the camps entertaining the soldiers, and two of his sons are fighting for Uncle Sam at the front.

Evan Williams was born in Mineral Ridge, O., of Welsh parents, on September 7, 1862, and as a young man was employed in the coal mines near his home. His rise from poor circumstances to a high place in the musical profession was considered one of the most remarkable achievements in American musical history.

Mr. Williams made his first concert appearance with a Welsh choir in Galton, O., in 1891, and since that time he has distinguished himself in an appearance with noted soloists at the music festival in Worcester, Mass. He appeared in England in 1894, and sang at many important concerts in London, returning to this country in 1897. His fame grew rapidly and he was the soloist with leading choral societies both in England and the United States.

Mr. Williams' death occurred in the City Hospital in Akron, O., and was due to blood poisoning.

FRUDANT DEALERS PROSECUTED

Music Industries Better Business Bureau Proceeds Against Those Who Advertise Talking Machines in Misleading Manner

MILWAUKEE, Wis., June 4.—The very interesting report of the Music Industries Better Business Bureau for the month of April, issued recently, includes briefs of four cases against concerns advertising and selling talking machines on a misleading basis. The action of the bureau brought about several changes for the better in the advertising of a Chicago mail order concern. Another dealer in Milwaukee likewise changed his selling methods when approached by a representative of the bureau. Still another concern in Grand Rapids is being investigated at the present time, while a Milwaukee dealer was fined $100 and costs for making false statements in his advertising.

The Better Business Bureau asks for the cooperation of all members of the trade interested in an effort to stamp out misleading advertising and the operations of "gyp" dealers or those who sell from homes.

PUBLISHER AIDS RECORD SALES

Sam Fox Publishing Co. Issues Special Advertising Matter Featuring Various of the Company's Songs Appearing in Record Form

The Sam Fox Publishing Co., Cleveland, O., is making a special feature of elaborate folders and slips calling attention to the various numbers published by the company and recorded on Victor records by Victor artists. Special attention has been given to the recording of "The Prayer Perfect," by Alma Gluck, and of "I'm A-longin' For You," by Sophie Brashu. In addition to the folders produced in elaborate form, the Fox Co. has also issued hangers and posters for window and showroom display.

AN IDEA THAT SHOULD BE USED

Piano Dealer Adopts Clever Stunt That Should Appeal to Talking Machine Men

A progressive piano dealer has introduced an idea into his store that might be copied with profit by some talking machine dealers who have demonstrating booths on an upper floor. The piano dealer in question has an electric reproducing piano in a room on the second floor in connection with a lighting fixture so that when he is ready to take a prospect upstairs he switches on the light, the piano starts to play music, then the mystification and genuine pleasure of the visitor. It would be a very simple thing for a live talking machine dealer to work the same plan by connecting an electrically-operated machine either in a room in the rear of the store, or on an upper floor, with a lighting socket so that it could be controlled by the regular lighting switch and caused to start when the light was turned on.

NEW YORK, JUNE 15, 1918

THERE is much to disturb one's mental poise these days. The business man is face to face with problems of a most complex and serious nature. There are demands on his purse and on his time that are unprecedented, and it is not at all unnatural that he should be worried. And yet anxiety over business problems is the hardest thing with which a man's physical apparatus can be burdened. It corrodes, wears and wastes the body and the mind. The worrying habit is a mighty harmful one, because things that frighten us most in business rarely ever happen. And this applies just as fully to national affairs in these strenuous war days.

During the month which immediately followed the entrance of the United States into the war the calamity howlers were much in evidence with statements that business was going to smash, and that every industry would be extinct in due time, unless those devoted to the making of munitions.

We are now entering on the second year of the war, and none of these things has happened. The sensational newspaper no longer has an audience; we have oversubscribed to three liberty loans, invested millions in thrift stamps, are building a bridge of ships that will enable our men and supplies to cross the Atlantic, we have hundreds of thousands of men right at the front facing the enemy, and our factories everywhere are running at top speed to furnish needed supplies.

The money borrowed by our Government is winding its way back into the channels of trade, for the working man is getting a large share of it—a larger share than ever he got in history. His pay has been doubled and tripled, and he is enabled to make purchases of essential luxuries, such as talking machines and other musical instruments in keeping with his wish to have that which he has long desired.

The war has demonstrated that music is the great essential, the great consoler, the great up-lifter in the home of the workingman as well as in the home of the rich in these days of stress. It is to stimulate the optimism of our people as it heartens the youths of the country to don their martial habiliments to fight for right and justice.

There is no room for the pessimist to-day, for the country was never in such a sound condition financially, and never before was there such a wonderful illustration that the heart of the nation has been stirred as never before in history. Men and money are being supplied to meet the nation's requirements in a manner that typifies that the United States is in the war for keeps, and in the war to win.

Business, of course, will be what we make it. It would not be well to waste our energy and anticipate our strength worrying and arguing over each changing phase which the daily reports from the Western front depict. In fact it is not well to ride the bumpy of the war news from day to day. Of course to follow and feel all the glee's and glooms that reach us from the front is human and exciting, but it involves much useless wear and tear of the spirit. As James J. Collins recently remarked:

"It is good business, good patriotism and good conservatism to forget most of the headlines in the morning paper and concentrate strictly upon the long, hard grind between to-day and the final result. That will save your spirit, buck up your resolution, and enable you to do your utmost in winning the war. Moreover, it will enable you to get out of the war, as a business man and a patriot, the utmost benefit from future adjustments. Those adjustments make for wiser and more economical personal habits, as well as a business grounded in sound economy."

DECISIONS by the Supreme Court, as well as action taken by the Federal Trade Commission, indicate that if retail prices on patented and trade-marked articles are to be maintained at a fixed standard in the future, special legislation to that end will be required. As a matter of fact, it is reported from Washington that even now plans are being made for introducing a new, and amended, Stephens bill into Congress at an early date, the bill to be drafted along lines that will meet the situation as now developed.

In addition to giving the manufacturers of trade-marked goods the right to fix the retail selling price, or the resale price on their goods, it is stated that the revised bill will provide that any method of price fixing must have the approval of the Federal Trade Commission.

Noted jurists with open minds have agreed that the manufacturer or a trade-marked article is entitled to protection, for he is the special victim of the price cutter. A manufacturer advertised at a reduced price may, or may not, be worth anything to the advertiser agrees to claim. Trade-marked goods, however, have a fixed value in the public mind, due to advertising, and the trade-marked name used in cut rate advertising naturally proves of distinct advantage to the merchant following such methods.

No less a man than Justice Brandeis of the United States Supreme Court, in a dissenting opinion in a recent price fixing case, stated that as his view that price maintenance should be brought about through legislation, and intimated that the Federal Trade Commission should be given authority in the matter.

Under such auspices there should be no fear of a manufacture endeavoring to assert his price fixing prerogative in a manner unfair to the retailer, for not only the retailer but the ultimate consumer would have recourse to the Federal Trade Commission in such an event.

The main thing now, however, is for the talking machine trade, and particularly the retail element, to urge and support legislation looking towards price maintenance. The industry has been built on that basis. Standard prices have meant the success of every house in it, particularly the smaller dealers. Future progress will undoubtedly depend upon the fixed price element to a substantial degree. It is a cause worth fighting for.

SUMMER is with us and thousands of families throughout the country are planning for their annual sojourn in the country. The time is not too early for the dealer to decide on ways and means of getting some extra business out of the summer resorts. Every cottage and every vacationist realizes that the summer outing is incomplete without music. Whether for the parlor, or the piazza, for dancing, or other entertainment, the talking machine is always ready to cooperate, and its versatility is that such an orchestra, famous pianist, violinist, or singer, or one of the famous military bands can be provided on demand.

It matters little whether it is war time or not, the fact remains
that the talking machine is indispensable. It is truly an essential to the joy and comfort of those who need consolation, owing to the absence of loved ones, or affording joy and pleasure to those who feel that victory is in the air—that our boys will soon come marching home triumphant.

Where summer cottages are already supplied with talking machines there certainly is a big opportunity for selling records. No matter how you view it there is business to be had, but it must be gone after intelligently and persistently. These are days when it doesn’t pay a business man to rest on his laurels; he must be up and doing, bringing his products continually before a new constituency.

In this respect advertising is one of the necessary concomitants to success. The form of this publicity and how it is placed must depend upon the individual dealer, but there is no getting away from the fact that advertising is an insurance against failure. It is true that some succeed without advertising, but it cannot be denied that their successes would have been much larger and more pronounced had they advertised.

THE fact that booze and instalment collections don’t mix has been proven by his experience since Detroit went dry, according to Wallace Brown, a well-known talking machine dealer in that city. In other words, the workman who formerly spent several dollars investing in the regular Saturday night “edge,” increasing his expenditures as the price of alcoholic refreshment has advanced, now wends his weary way homeward with a full pay envelope and the extra money therein is more than sufficient to meet the payments on a talking machine or piano. Business men in other sections of the country where Prohibition has gone into force report the development of similar conditions. Regardless of personal opinion on the question of Prohibition, from the viewpoint of the man doing an instalment business with the average wage earner, the bone-dry movement is a good thing, even though he is called upon to make good on some of the taxes formerly paid by the liquor interests.

A RECENT ruling by Internal Revenue Commissioner Roper regarding the manner in which returns must be made on instalment transactions during this year, on which an income tax will be due in 1919, is of particular interest to talking machine retailers who do an instalment business.

The Commissioner has ruled that in making out the income tax return next year, on business done during 1918, the dealer who sells on instalments must enter upon his return a percentage of each instalment collection equivalent to the percentage which the gross profit bears to the gross contract price.

To use a purely arbitrary example, the tax will work out in this fashion: A talking machine costing $100 wholesale is sold on the instalment plan for $150, the payments running over a period of fifteen months. The gross profit on this sale is $50, which is 33 1/3% of the gross selling price of $150. If the talking machine dealer collects twelve payments during 1918 of $10 each, he must enter 33 1/3% of such collections, or $40 as income, when he makes out his income tax return for 1918. Should the customer suddenly default in his payments after paying twelve instalments, and the talking machine is consequently repossessed in 1919, the dealer must enter $80 on his return for 1919, payable in 1920, as a result of such repossession. This figure represents the entire amount of money collected on the instrument ($120) less the $40 entered in the 1918 report on which the tax will have already been paid.

Dealers should bear in mind that the percentage of profit for the tax returns should be figured on the gross selling price instead of on the cost. In the example quoted above the talking machine dealer really makes a gross profit of 50% ($50 profit on $100 cost), but the percentage to be returned on the income tax blank is only 33 1/3% ($50 on $150 selling price).

The ruling is in no sense complex, but talking machine dealers should keep a careful account of their collections during the year, so that they will have accurate figures on which to base their returns in 1919.

WHAT is to be accepted as a matter for congratulation by the business world generally is the evident tendency at present to place in positions of authority in the various war bodies at Washington business men of recognized standing and ability. In other words, it seems as though the day of the theorist is passing away, and that the practical business man—the man who, while realizing the demands of war, has at the same time a proper conception of means for meeting those demands at a minimum sacrifice on the part of business—is taking his place. It is true that since the outbreak of the war business men have been in the service of the Government, but in a majority of the cases they have been subordinated to Government departments, and their efforts made ineffectual by the yards of peace time red tape. It looks now as though modern efficiency is taking the place of hide-bound precedent in Governmental work, and it is a good sign for the country in general. It means that we will get-more action for the money we spend.

TO OUR SUBSCRIBERS
If your copy of The Talking Machine World does not reach you on publication date, or a few days thereafter, do not assume that it has gone astray. The existing railway congestion has had a serious effect on the handling of mail, particularly second class matter, and brought about unusual delays. Kindly wait a few days longer than usual before writing to us, as the paper will probably arrive safely.

IT’S almost impossible to tell today what you will want for Victor Records next week.

There’s always a few records constantly needed so why not use P. S. S.—Pearsall Short Service.

Uncle Sam feels that men buy W. S. S. to take care of the odd quarters for big bonds.

Everyone can buy W. S. S. And every dealer can use P. S. S.

So you have a combination—one to make good profits and the best way of investing them. “Shorts” is only a part of

B. R. FORSTER, President
Help continues to be big war problem of the retail merchant. The recent order of the Provost-General, declaring that men of draft age must "work or fight," and that employment as a salesman in a store does not come within the conception of useful employment, means that many additional men will have to give up positions in retail establishments and seek employment having a more direct application to war activities. There are obviously two principal sources from which the merchant must draw his help to fill the places of those who are barred by the new regulations.

One of these consists of men under or over the draft age—boys of from eighteen to twenty-one, and men over thirty-one. Apparently the latter class is the more desirable, from the standpoint of experience and judgment, though in most cases higher remuneration would be necessary.

The other class is composed of girls and women. They are already being used in great number in retail sales work, but principally in department stores, specialty stores in most cases preferring men except for selling women's garments, toilet accessories, etc. But they must be trained to handle all classes of retail sales.

Male help, as a general proposition, is extremely scarce. The inroads already made by the war have limited the available supply, even making use of those included in the draft, but enjoying deferred classification as a result of dependents, or for some other reason. With the latter eliminated as a result of the newest order, which will doubtless be obeyed by most draft registrants without hesitation or argument, the merchant must look around harder than ever for desirable employees.

In England and other countries where retail salesforces have been decimated as a result of the war, it is noteworthy that about the only men left on the floors of the shops are those too old to go to the front. It must be admitted that there is something incongruous in the sight of a young and sturdy man devoting his efforts to selling in a store while thousands of others are fighting and dying in the great war. By all means it can be explained away, for the contrast is inevitably felt by the customer. Perhaps the substitution of those who obviously are not fitted for military duties will have an excellent effect from the standpoint of showing the public that the merchants of the country are not using up manpower that can be profitably employed, from the standpoint of winning the war.

Salespeople are necessary; there is no gain saying that; but the immediate problem is to find those who can be utilized in the store organizations without hampering the work of producing war materials, and without taking those who could do more good for the country if they were in uniform.

Older men, say about forty-five, make excellent workers. There are many such who are available, and for whom the demand is less active than for any other class of men. The merchant may insist that these men are "failures," since one of this type, who has reached middle age without making a definite success and winning permanent and profitable employment, evidently lacks the quality which makes for business advancement. Yet this is not always equivalent to saying that they are not suited for work in stores. In many cases they fit into it splendidly, and not only make efficient clerks, but prove to have the knack of making friends. What they have lacked is initiative or something similar to it, but in a store the work of the salesman is usually "cut out for him," as the saying goes.

One advantage of employing older men is that they are more likely to remain on the job and be satisfied. The younger man, even though somewhat more aggressive and productive, is always looking around for a little better place. The store which employs him is thus unconsciously competing for his services with every other in the community, and he thinks nothing of quitting one and looking for another. This is part of the general situation and irresponsibility of young men just starting out in the business world.

The older man, on the other hand, has been nurtured in the sea of experience. He has learned that things are not always what they seem, and that a good position is not to be tossed away lightly. Thus he is in earnest and is determined to hold on to what he has. He obays willingly, he meets the trade courteously, and is satisfied with his situation. He is the sort of dependable, reliable salesman who can be counted on to be on time and to stay until the store closes.

A comparatively few warrooms are at present made up largely of men of this age and type, but one feels justified in saying that the most recent war development will bring many of these into positions and will make the place of younger men who are leaving for war work, either in industry or in the ranks of the fighters.

Many recruits will doubtless be obtained also from the ranks of women workers. In spite of the large number who have been impressed for industrial work, and who already have filled into positions vacated by men who have gone to war, there seems to be no trouble about getting others. College girls and other students who realize the importance of productive labor, and of releasing as many men as possible, are taking up work of all kinds, and of course many wives and other relatives of soldiers are doing what they can to support themselves by employment in and out of stores.

The main feature of employing girls and women is training. Few of them are inherently capable of taking a position in a warroom and handling it to advantage without preliminary coaching and instruction, and the store which has a large number of "new beginners" on its floor should make a point of seeing that they are properly supervised, in order that the sales service may not suffer.

Drawing on these two big sources of supply, the labor situation and the help question in the domain of retailing will be effectively dealt with.

THE BROOKS Automatic Repeating Phonograph
Plays Any Kind of Record—Any Desired Number of Times and Then Stops Automatically—The Phonograph Sensation of the Age

DEALERS:
You cannot duplicate the value we offer for twice the price. In size and appearance the "Brooks" compares favorably with instruments retailing for $300.00 and up.

In tone qualities it is unequalled by any talking machine on earth! In mechanical equipment and power that it possesses it is years in advance of its nearest competitor.

We have been building talking machines for three years—last year our sales doubled. Our "Brooks" has no competition. The machine creates interest and discussion—it is self-advertising. Send for particulars, terms, prices.

YOU OWE YOUR PATRONS A BETTER PHONOGRAPH

The Widdicomb is a Better Phonograph

A Product of 1918, THE WIDDICOMB is the very last word in the Art of Phonograph Construction

Art Table Type $125 to $250
Upright Cases $110 to $250

TONE—No phonograph on earth will reproduce any record of any make more faithfully than The Widdicomb without attachments.

MOTOR—No motor on earth winds and runs with so little noise or vibration as The Widdicomb motor.

Spring Breakage is unknown in The Widdicomb

CASES—All you can see in a phonograph is furniture. At the retail prices no line on earth shows such designs—such high grade woods—such construction or finish as The Widdicomb.

FEATURES—More convenient and commodious record containers—all wood horn—jewel points—improved cover support—tone control which can be set at any required volume or operated from a distance.

VALUE OF CO-OPERATIVE PUBLICITY
How the Yahr & Lange Drug Co. Advertised the Eight Dealers Handling the Sonora Line and Themselves in Milwaukee Recently

MILWAUKEE, Wis., June 3.—The Yahr & Lange Drug Co., of this city, distributors in this territory for the products of the Sonora Phonograph Sales Co., recently used in the local newspapers a striking half-page advertisement which won considerable comment in the local trade. This advertisement was the first one in a series of co-operative advertisements, and it served to definitely establish in the minds of the local trade the prestige and importance of the Sonora line.

The center of the space was used by the Yahr & Lange Drug Co., which presented a splendid selling talk relative to the tone qualities of the Sonora phonograph. Surrounding this advertisement were cards of eight Sonora dealers in this territory, each card presenting a distinctive message and calling attention to some special merit of the Sonora phonograph. Among the dealers represented in this co-operative advertising were Wm. H. & Sons, Thien-Pentler Sonora Shop, Aft. W. Fuchs, J. B. Bradford Piano Co., Theo. Mueller, Noll Piano Co., Edward Jensen and the Model Drug Co.

EMERSON CO.'S ANNUAL REPORT
President Emerson Tells of Company's Progress for Year—Substantial Profit Reports

The Emerson Phonograph Co., New York, has just issued its annual report for the year ending April 30, 1918. Considering general manufacturing conditions for the past year, this report is very satisfactory, as it shows a substantial net profit.

In submitting the report to the stockholders, Victor H. Emerson, president of the company, called attention to some of the important factors that entered in the company's manufacturing activities the past year. He commented upon the fact that the retail price of the 7-inch record was advanced from 25 cents to 35 cents, insuring a more satisfactory profit to the company, its jobbers and its dealers. He also stated that the new 65-cent record was meeting with pleasing success, and that plans are now being made for an aggressive campaign during the remainder of the year. Referring to the outlook for 1918, Mr. Emerson said: "The outlook for the coming year is difficult to forecast, as it depends very largely upon the duration of the war, the price of raw material, as well as fuel, labor and transportation conditions."

The Helbig Bros. Piano Co., Washington, D. C., has been incorporated with capital stock of $40,000 to manufacture and deal in pianos, organs, talking machines and records. The incorporators are Fred W. Helbig, Jr., Harold H. Helbig and Nettie M. Helbig.

TALKING MACHINE EXPORTS
The Figures for March Presented—Exports Show Machines and Records Both Increase

WASHINGTON, D. C., June 4.—In the summary of exports and imports of the commerce of the United States for the month of March, 1918 (the latest period for which it has been compiled), just issued, the following figures appear:

Talking machines to the number of 9,234, valued at $239,049, were exported in March, 1918, as compared with 7,417 talking machines, valued at $187,833, sent abroad in the same period of 1917. The total exports of records and supplies for March, 1918, were valued at $999,903, as compared with $1,636,632 in March, 1917. For the nine months' total 69,945 talking machines were exported, valued at $1,914,730 in March, 1918, and $1,309,227 in 1917, while records and supplies valued at $1,475,417 were sent abroad during 1918, as against $1,130,095 in 1917.

There isn't much hope for the man who gets so peeved that he isn't on speaking terms with his own conscience.

CONCERTS FOR FACTORY WORKERS
Phonograph Co. of Cleveland Adopts Interesting Method for Reaching the Employees of Various Industrial Plants in That City

CLEVELAND, O., June 2.—The Phonograph Co., Edison phonograph wholesaler and dealer in this city, has been conducting a series of factory concerts for the purpose of stimulating business. The concerts are given at the various factories during the noon hour, the first being held at the plant of the Ohio Varnish Co. In almost every case immediate sales of machines and records to employees were noted.

L. N. Bloom, general manager of the Phonograph Co., felt that although the workmen in the various plants, especially those with war contracts, were making more money than they ever made before in their lives, they were kept so busy that they did not have time to investigate the full possibilities of the phonograph as a factor in their homes, and took the opportunity to bring the machines and records to them to simplify the matter of selection. It was also proved that their judgment was right.

Ready-File Company
INDIANAPOLIS

Mr. Edison Dealer, Anywhere, U. S. A.

Dear Mr. Dealer:—

Lots of Edison dealers are making $6.00 more on every A100 and C150 sale than you are.

We want to tell you how to do it, but we don't know your name or address.

Drop us a card and find out how to get these extra profits.

Cordially yours,
READY FILE COMPANY.
Our Forecast for this Summer

ECONOMY is now essential as it never was before. But so, too, is amusement.

The Pathé Dealer is able to supply the amusement that is most economical and can be easily carried to Summer home, hotel, bungalow or camp.

These portable Pathé Phonographs

By far the finest both in appearance and performance at the price.

Hence the Pathé Dealer can safely count on a most profitable summer.

That’s our forecast.

This is our advice—if you’re not a Pathé Dealer, write us at once about the Pathé Proposition.

No Needles to Change
The Pathé Sapphire Ball takes the place of needles. It need not be changed.

Long Life to Records
The Pathé Sapphire Ball cannot possibly cut, grind, rip or mar the record’s surface.

The Pathé Controla
With the Pathé Controla you may increase or decrease the total volume of the Pathé Phonograph at will.

Plays all Records
Each Pathé Phonograph plays not only Pathé Records, but all other makes of records, and plays them perfectly.

26 E. Congress Street Detroit, Mich.
Supplying Successfully the Needs of the Buyers of Foreign Records

Harry A. Goldsmith, of the Badger Talking Machine Co., Milwaukee, Wis., Victor wholesaler, recently contributed the following interesting article on: "The Buyer of Foreign Records," through the "Voice of the Victor." The article, which is worthy the consideration of every talking machine dealer, reads as follows:

Grooping about in darkness seeking musical light the buyer of foreign records offers the average Victor dealer a source of income of considerable proportions. Nor should his business be sought after only for this reason, for the buyer of foreign records knows a goodly number of folks who are very anxious to own talking machines, and he can give you a wealth of prospects who are likely to be very profitable for many years to come.

When you, as a Victor dealer, were asked to interest yourself in educational work—to open an educational department—you looked askance at the proposition. You did not grasp, possibly, just what latent opportunities there were. It is needless to remind you of the tremendous success that has attended this particular feature of the Victor business.

To the live Victor dealer is offered like opportunities in starting a foreign record department. Many dealers, no doubt, have felt they would like to get some of the foreign business, but have been a bit hesitant, fearing the complexities which might arise.

A careful analysis of the subject clarified conditions materially. It is not so hard as it seems. You ask how to proceed? It is really easy if you will but take a little time to work out the details.

Tony Andrianopolis shifty enters your store, hat in hand, and asks if you have some Greek records. Of course you have none, and in the past simply told him so and turned away from him. He slunked out of your store. You soon forgot the incident. Now, had you invited Tony into your office, inquired from him about how many Greeks, for instance, lived in your city, and put it up to him squarely if he thought it would be profitable for you to carry Greek records, you might sit up surprised that you had wasted some wonderful opportunities.

Tony would likely have told you that there were probably a hundred or more Greeks in town, a score or more of whom owned talking machines, and they have been buying records in large quantities from some dealer in Milwaukee, Chicago or New York. He would add that because of the difficulty in getting records there you ought to carry a starter. Tony is going to be a little shy here. The moral obligation of stocking you up with merchandise is great, and before he gets through with that catalog he will have made a mental note of every Greek talking machine owner and just about what records each will buy.

Have faith in Tony. Order every single record he tells you to and give him one better. When sending in your order to your jobber tell him to include in this order such Greek records as might have been omitted which he knows are good sellers, and every wholesaler can give you this information at a moment's notice. When you get these Greek records in stock let Tony know. Tony will do the rest.

He will come into your store with one or two friends and ask for Greek records. Now don't make the mistake of just taking a pile of them and passing these out to him. Treat him as you would one of your regular customers. Better still, wait upon the group yourself. Watch the face of each listener light up as they hear some good old folk song. Maybe, after a half hour's visit they will buy only two records, but you can gamble anything you want that within another day or two the news will spread throughout the entire Greek community that you have some Greek records. You can make another mental wager, and win, that several Greeks will buy within a week after you have put in your stock of Greek records.

What is true of the Greeks of your city is equally true of other nationalities. With only slight modifications you can proceed in a like manner with each and every nationality represented in your community.

Just bear in mind one important factor, and that is, every foreigner is just as hungry for music as are your present regular patrons. The B. of F. R. will prove a more loyal and consistent customer of yours than you ever before had. He will be your booster through thick and thin, and more patient.

There are certain characteristics quite common to each group of B. of F. R. To illustrate, Italians respond quite the quickest to purchases of records from the general catalog, and early buy Red Seal records. The Poles will start out demanding loud records, progressing later to a better class of selections. The Greek, with a love of his old traditions, is a bit harder to get interested in the general list. Because they are neighbors, do not think the Swedish and Norwegian folks will buy the same records. If a Turkish customer happens in and you have nothing to offer him in his language he will be interested in instrumental records listed in the Assyrian and Greek catalogs, and vice versa.

The B. of F. R. will be greatly interested in accordance records if his home was in any European country. The same is true of harmonica records. Band numbers are extremely popular among your foreign friends. The old-fashioned waltzes, polkas and schottischies are always desired. It is needless to say that folk songs find a ready sale. Modern English songs rarely find favor when sung in a foreign tongue.

One might continue indefinitely pointing the way to develop foreign record sales, but, after all, the few suggestions given above and a willingness on the part of the Victor dealer to go half way with the B. of F. R. should quickly result in profitable business development.

CREATING INTEREST IN THE STORE

How the Mason Furniture Co., of Huntsville, Brought Crowds to Their House and Orders for Their Products—Enterprise That Pays

HUNTSVILLE, Ala., June 2.—One of the most progressive of the Columbia dealers in this section of the country is the Mason Furniture Co., of this city, who handles the Columbia line exclusively. The Mason Co. owes much of its success to its unique methods of publicity which attract unusual attention and get excellent results. In connection with the company's annual spring opening held recently, one of the evenings was devoted to the appearance of Mason's Columbia Minstrels. The event was widely advertised, and at the opening hour the store was thronged with people, many standing so popular and so much talked about that people came from quite a distance to see it, one party motorizing sixteen miles in order to witness the second showing.

Throughout the entire week the store was thronged with the interest of the interior, which has been tastefully decorated for the occasion, and music was furnished by the Grafonola. The Mason Columbia Minstrel has proved so popular that Mr. Mason has received numerous requests to stage this performance in several nearby towns, which he will do, under the auspices of the local schools, charging a small admission, of which he will go to the school in providing a school Grafonola outfit.

The accompanying photographs give an idea of the store, and the Grafonola department with its beautifully soundproofed rooms will be seen on the right side.

Mr. Mason carries the complete Columbia record catalog, and does an exceedingly large business, in both Grafonolas and records. This enterprising firm recently received one shipment of over sixty Grafonolas and has met with considerable success in the sale of the higher-priced instruments.

In closing let us state that Huntsville is given a population of 8,000 people, and there is nothing unusual in the surrounding territory to make it more prosperous than other of $1,000 made by your corporation to the Second Red Cross Fund. I trust that you will express to your board of directors the grateful appreciation of the Torr Fund committee for your generous gift, which is a material help in continuing the work of the Red Cross. Sincerely yours [Signed] Wm. C. Brightman.

Mr. Brightman also received recently a letter of acknowledgment from Vice-President Jones, of the National Park Bank, captain of the bank's Red Cross War fund team. Mr. Jones acknowledged a contribution of $1,000 from the Sonora Phonograph Sales Co., expressing his appreciation of the company's liberal donation, which it was given to the bank the first day of the drive.

NEW VICTOR PATRIOTIC RECORD

The Victor Talking Machine Co. have made a special announcement of a new patriotic ten-inch double-faced, Black Label, Victor record, "What Are You Going to Do to Help the Boys?" Chas. Hart and Shannon Four, and "Keep Your Head Down, Fritzie Boy," American Quartet. This record was put out in advance as a special, and will be listed in the regular July supplement.

The Victor Co. further state that there is positivity to end to the demand for the last two titles by "What Are You Going to Do to Help the Boys?" was one of the big hits of the Third Liberty Loan drive and is enormously popular.

SONORA CO.'S GIFT TO RED CROSS

Contribution of $1,000 Made to Second War Fund on First Day of Drive Appreciated by Officials of the American Red Cross

As announced in last month's World, May 22 was generally observed by local talking machine dealers as the day on which they donated 10 per cent of their sales to the Second War Fund of the American Red Cross. Quite a number of the local dealers joined in this plan, but the Sonora Phonograph Sales Co., when advised of the method of donation to the War Fund, decided that instead of contributing 10 per cent of its retail sales on May 22, it would do its share for the War Fund through its usual channels.

George E. Brighton, president of the company, who has for many years been active in behalf of a number of philanthropic and charitable events, and by Wm. E. Breed, chairman of the American Red Cross War Fund committee of New York, acknowledged the contribution of the Sonora Phonograph Sales Co. This letter reads as follows:

"I cannot let this opportunity go by without officially and personally acknowledging the contribution of Sonora Phonograph Sales Co. This company made a very liberal donation to our corporation to the Second Red Cross War Fund. I trust that you will express to your board of directors the grateful appreciation of the Torr Fund committee for your generous gift, which is a material help in continuing the work of the Red Cross. Sincerely yours [Signed] Wm. C. Brightman.

FOR NATIONAL TRADE-MARK

WASHINGTON, D. C., June 4—Senator Pomer- ence, of Ohio, has introduced a bill "to authorize the adoption, registration and protection of a national trade-mark to distinguish merchandise manufactured or sold from the States of America and used in commerce with foreign nations, or among the several States, or with Indian tribes, and to authorize the Secretary of Commerce to license the use of the same, and for other purposes." The bill has been referred to the Senate Committee on Patents. A somewhat similar bill was introduced in the house of Representatives in the present session of Congress, but up to the present time the committee to which it was referred has not reported it out.

NEW INDIANAPOLIS COLUMBIA CO. WHOLESALE QUARTERS

Located at 209-217 West Washington Street—Increased Business Makes Move Necessary—Geo. Stewart Appointed Fuel Administrator—Cheney INDIANAPOLIS, IND., May 31.—The wholesale department of the local branch of the Columbia Co. is moving into large quarters on the second floor of the Kirschbaum Building, 209-217 West Washington street. The retail store in North Pennsylvania street will be conducted as usual, but Ben Brown, manager, will have his office in the wholesale department.

Increased business made it necessary for the Columbia Co. to find suitable quarters for its wholesale department. Up to the present time the company has been handling its machines through a warehouse, but now it will have room enough in its new quarters to handle all incoming and outgoing shipments. Part of the first floor of the building will be used for the shipping department. Mr. Brown is determined to make his new department one of the best distribution places in the Columbia service.

George L. Scheu, representative of the Columbia Co. in Indiana, says that the country business is keeping ahead of the city business. H. P. Dahlen, owner of the Talking Machine Shop of Terre Haute, Ind., has sold out to the Robertson Music Co. of that city. The latter company will handle a complete line of Columbia machines and records.

C. P. Herdman, manager of the Columbia department of the Baldwin Piano Co. store, reports that business during May was good and the demand for small machines for summer purposes has been brisk.

At the last monthly meeting of the Columbia dealers, L. B. Sayer, Kentucky representative of the Columbia Co. and George L. Scheu, Indiana representative, told of their recent visit to the Columbia factory and explained the features of record making. The monthly meetings of the Columbia dealers have been well attended and the dealers appreciate the opportunity they get to come together.

Walter E. Kipp, president of the Kipp Photograph Co., has gone to the Edison factory and has been conducting an advertising campaign on it. H. E. Whitman, manager of the talking machine department, is enthusiastic over the Cheney and says he hopes to see it meet with satisfaction of the public, as he believes his store is offering something that is right.

Business in the Edison and Victor lines continues substantial, Mr. Whitman says. The new velvet Edison records are meeting with approval and Mr. Whitman expects to see them increase the sale of Edison machines.

F. A. Aylesworth, formerly manager of the talking machine department of the Julius Bauer store in Chicago, is now manager of the Vocation department of the local Adrian, succeeding Morris Rosser, who is in the army.

The Ueltana is still the feature of the Brunswick business, George F. Standke, manager of the Brunswick shop, reports. Mr. Standke says that many owners of other machines come into the shop and ask to buy the Ueltana, thinking it is an attachment which can be bought separately from the Brunswick. Mr. Standke continues to arrange clever electric window display featuring the Ueltana from the standpoint that it plays all records.

There is one new feature of the Brunswick Shop worthy of comment. It is a canary bird. This bird is a little singer than accompanies the playing of records so that many people who come into the store are under the impression the bird notes are in the record. The bird likes the Jazz band records and he sways his body to and fro while he warbles an accompaniment. Mr. Standke has had many offers to sell the bird, but there is nothing doing.

George Stewart, vice-president and wholesale manager for the Stewart Talking Machine Co., jobbers of the Victor line, has been named assistant fuel administrator for Marion county. Mr. Stewart served in this capacity for a time last winter.

Emerson Knight, advertising manager of the Stewart Co., is now in the U. S. marine corps at Paris Island.

General Sales Manager Collins of the Pathé Co. visited the Mooney-Moeller-Ward Co., Pathé distributors, recently. R. R. Goldsby, in charge of the local company’s Pathé department, says that the new process records of the Pathé Co. are meeting with approval and with the new tone arm are boosting the sale of Pathé machines.

W. E. Pearce, of the Brunswick talking machine department of the local branch of the Brunswick-Balke-Collender Co., says that the Brunswick business continues nicely. Mr. Pearce is after contracts in some of the larger cities of the State which he expects to close soon.

E. L. Roeding, of the Roeding music store, Delphi, Ind., which recently began handling the Brunswick, visited Mr. Pearce this week to place an additional order for machines.

COMPETITION IS AN INCENTIVE

In the fight for business no man or concern has a monopoly of all the best brains and methods. Let competition be an incentive to your energy and ambition. Give the other fellow a fair, square deal and beat him out on your merits.

No. 111. Cabinet (Opened) For Columbia $50.00 Machine 33 1/2 inches high. Top, 23 x 19 1/2 inches.
The Trade in Philadelphia and Locality

Philadelphia, Pa., June 8—The talking machine situation in Philadelphia at the beginning of June is practically the same as at the beginning of May. May was a very satisfactory month so far as the amount of business is concerned, and where this business was not satisfied was due entirely to the fact that the Victor dealers were compelled to turn much of it away for want of merchandise.

The condition in May was about the same as April in this respect. The percentage of shortage was about the same in the amount of goods received, and the month showed a loss over the May of a year ago—though not to any very great extent—due entirely to conditions stated.

With the Edison, with the Columbia, with the Pubé, and all other machines, this shortage was not an existing feature, and in consequence all of the companies named supplied their representatives here with the goods that were immediately needed. The transportation conditions by these companies have been overcome during the month and by means of the auto-truck transportation system now so adequately conducted between Philadelphia and New York and intermediate points goods have been rushed through by this means and with great promptness.

Big Columbia Business for May

Manager A. J. Heath, the local Columbia representative, reports that the business of the Columbia has been exceptionally good in May. During the past few months they have given a great deal of attention to the ordering and building up of their stock in Philadelphia, and they are, therefore, fortunate enough, at the present time, to give their dealers exceptionally good service on records from this on, and with the same degree of completeness as they did in May.

Mr. Heath says that records are coming through in exceptionally good shape, but they have experienced some difficulties in getting machines through due to existing embargoes. They brought over a number of shipments by express during the month, which helped them to keep their dealers supplied with merchandise.

Mr. Heath notes that business has been generally very good with the Columbia dealers throughout his territory. Among his recent victors were F. W. Zerker, of the Regal Umbrella Co., York, Pa., and H. Israel, of the Harold-French Co., Reading, Pa. F. K. Pennington, the assistant general sales manager of New York, spent several days in Philadelphia during the month. M. J. Rogers, one of the Columbia boys, was called to the colors in May. He was in charge of their shipping and stock departments, and was well known to all the dealers in Philadelphia.

Blake Doing Well With the Edison

Herbert Blake, the leading Philadelphia dealer in the Edison, reports that things were fine with them in May, and that he had a "dandy" month. He doubled the business of May a year ago, in spite of the fact that at that time they conducted a piano department, since discontinued.

Write for catalogue

H. A. WEYMANN & SON

Manufacturers

He says they have been having some difficulty in getting a complete supply of both machines and records from the factory, and to put it in his words: "We are selling like the devil, and nothing coming in in comparison." He says that he was over to the factory last week, and that he found them optimistic, but he added "we cannot sell optimism."

They received, however, quite a shipment of both machines and records last Friday, which will help them out materially.

News From Buellin Headquarters

Louis Buellin, of the Louis Buellin Co., reports business somewhat below that of last year, and added that Victor goods are coming over to about the same extent as during April. Miss A. M. Kiefer, who had been the bookkeeper at the Buellin establishment for the past eight years, was married on May 22. The employees of the store presented her with a complete Victor outfit, machine, records, etc., and the firm presented her with a very substantial check.

Robert Carpenter, for a number of years connected with the Buellin house, was called to the colors on the 11th of May.

M. M. Hart, of Chester, Pa., has just completed extensive improvements to the talking machine section of his business, and has added several new booths.

Louis Buellin and his family motored to Ocean City on Decoration Day, and Mr. Buellin did not return to this city until Monday. He will shortly open his cottage there for the summer.

Brunswick Activity

The Brunswick-Balke-Collender Co. report that their May business far exceeded their expectations, and went away ahead of anything for which they had hoped.

Last week the Brunswick-Balke people gave a big recital at Atlantic City, which resulted in the sale of a number of high-priced Brunswick machines. The recital was in charge of a representative from the factory. The Ultrona attachment has been creating a tremendous sensation in this city. The firm is about to open some big accounts here, and they have a number of dealers up the State who recently signed up, including an especially gratifying account at Bethlehem.
Make June an Educational Month

FEATURE the value of more knowledge and the advantage of using the Summer for improved mental equipment. You can sell "Education," for example, in The Oscar Saenger Course of Vocal Training, the Victor French Course, the Victor Wireless Course, not to forget the benefit of knowing more about the records of good Music.

Buehn Victor Service will co-operate with you to make this month a good one.

The Louis Buehn Company

Victor Distributors

PHILADELPHIA

Pathé Shop Exceeding Quota

The Pathé Shop notes that the sales force not only exceeded the quota that Mr. Eckhardt had set for May, but recorded the best month's sales that they have had since they went into the handling of the Pathé here. They also exceeded their best previous month in the retail end of their business. Strange as it may seem, the minimum they inaugurated in April carried their retail business for May over with flying colors regardless of the war saving stamps and the war chest campaigns.

Mr. Eckhardt closed several very satisfactory wholesale accounts in May, including the Bowby Co., of Schickshinny, Pa., and Fraid & Beam, of Lansdale, Pa. Mr. Eckhardt's representative said: "While we can naturally anticipate a falling off in our June business, nevertheless the fact that the majority of our dealers are anticipating fall requirements, they are beginning to place their orders now for large fall stocks, and this will enable us to roll a splendid business in the mouth of June."

The Pathé Shop gave an elaborate series of recitals from the 6th to the 11th of June inclusive, on the Orchestra Pathé, which created a great deal of talk; so much so, in fact, that they have been requested to grant the loan of this machine by one of the largest moving picture houses in this city.

Penn Phonograph Co. Prepared to Move

The Penn Phonograph Co. expect to move to their new home at 913 Arch street some time during the month. Mr. Barnhill says they will have "a spasmodic fitting." Just at the present time they are removing the material from their warehouse, and when the new building is equipped to receive their regular stock they will move it into place as rapidly as possible.

The entire establishment will be quartered in the new home by July 1. They will have about 8,000 more square feet of space in their new building, and it will be otherwise better adapted to their business.

Business with the Penn Co. in May showed a slight falling off, due to the inability to get goods, and it is becoming clearly evident that they will have to work with a curtailed stock of machines and records during the remaining summer months.

Doing Well With the Cheney Phonograph

G. Dunbar Shewell states that he has a fair stock of Cheney phonographs on hand. He has been doing a very satisfactory business with these machines. The entire building is being remodeled, and the talking machine end will be adequately cared for. A section of fine booths is being put in place on the first floor, and Mr. Shewell will have a fine office on the third floor front of the building.

H. A. Weymann & Son Report Progress

H. A. Weymann & Son have been most fortunate in being able to supply their dealers in May in a way that has been most satisfactory to them, although not to a full 100 per cent. The system they inaugurated some months ago of getting a big stock on hand has helped them out considerably, and they are in very excellent shape for the rest of the summer. While they have lost several of their best men from this department to enter the Government service, they have been able to replace them with some experienced salesmen and shippers.

Philadelphians at Edison Convention

There was a large representation from this city to the Edison Convention in New York. The first annual meeting of the local Edison dealers was held at the Bingham House on Tuesday evening of this week. There was to be an annual banquet, but due to the fact that it is also convention week in New York, the Philadelphia banquet has been postponed until the meeting in July. There was no election of officers at this annual meeting, as it has been arranged that the officers will be elected hereafter every January to serve for the year.

Miss Katherine Pathecon, for many years connected with the Estey Piano store, has left that firm and has assumed a position with the Edison section of N. Stetson & Co., where her wide experience will add much to the effectiveness of that department.

George D. Ornstein, the new Victor distributor at Eleventh and Chestnut streets, did a very good business in May, his second active month. Mr. Ornstein has taken his family to the shore for the summer, and he went down on Decoration Day to remain over the weekend. George A. Lyons looks after the business at the store in Mr. Ornstein's absence.

Recent Visitors to Quaker City

Among the out-of-town prominent dealers the past month who were in this city were Rudolph Wurtitzer, of Cincinnati; John W. Jenkins, of J. W. Jenkins' Sons Co., Kansas City, Mo., and O. K. Boone, of the Birmingham Talking Machine Co., Birmingham, Ala.

PHILADELPHIA DEALERS ORGANIZE

Victor Retailers Form New Association in That City at Meeting on May 27

PHILADELPHIA, Pa., June 3.—The launching of the Philadelphia Victor Dealers' Association was accomplished with great enthusiasm at a meeting on May 27 at the Adelphia Hotel, when over fifty dealers turned out and enjoyed a pleasant luncheon together. Everyone became better acquainted, and good fellowship seemed to be the spirit of the meeting, while problems of mutual interest were discussed.

The officers of the Philadelphia Association are J. Ralph Wilson, president; Berthold H. Todd, vice-president; Walter G. Linton, secretary, and George W. Haver, treasurer.

Firms in Camden, Wilmington, Norristown and other localities adjacent to Philadelphia have come into the association, thus greatly widening its influence.

These dealers have organized with a desire for a friendly acquaintanceship and a free and frank interchange of ideas for the advancement and development of their respective businesses (Continued on page 22)
so that the interests of each individual member will be promoted.

It is estimated that much good is going to be derived from the discussion of such subjects as "The Rendering of Better Service to the Public," "Store Management," "Proper Stocking and Purchasing of Goods," "Overhead Costs and Expenses," "Credits," "Advertising," and other economic questions. The better solution of such problems is bound to elevate the industry in the eyes of the public, and have a direct bearing upon the success of every member.

COURTLAND SHAW, JR., APPOINTED

Becomes Manager of the Dealer Service Department of the Columbia Co.

The general sales department of the Columbia Graphophone Co., New York, announced this week the appointment of Courtland Shaw, Jr., as manager of the dealer service department.

Mr. Shaw succeeds H. L. Tuers, who left for Ithaca recently to go in training at the aviation grounds in that city, preparatory to obtaining an 

CHENEY PHONOGRAPH SALES CO. ORGANIZED IN CLEVELAND

New Company With Capital of $50,000 to Take Over the Distribution of This Phonograph—German Records to Be Interned During War—Gollister & Sayle Novel Display—News of the Month

CLEVELAND, O., June 2—The Cheney Phonograph Sales Co., with a capital of $50,000, has been organized under the Ohio laws to take over the distributing business of the Cheney Sales Co., and will maintain offices at 4400 Euclid avenue, this city. The officers of the company are E. M. Buel, president; T. R. Buel, secretary-treasurer, and C. R. Madson, sales manager. He was formerly with the Columbia Graphophone Co. and is well known to the trade in Ohio, West Virginia and central and western Pennsylvania, the territory the newly organized firm will supply.

The Cheney talking machine has a rapidly increasing sale in this section of the country and the volume of business necessitates the formation of the company just launched.

The distributing agency will put out the product of the Cheney Talking Machine Co., of Chicago, and will have well-equipped offices in this city for looking after business.

The Cheney talking machine has found popular favor in Cleveland because of the construction of the cabinets, which are from the widely-known Grand Rapids, Mich., firm of Berkey & Gray.

Charles K. Bennett, president of the Talking Machine Dealers' Association of Northern Ohio, has furnished the members with a list of the German records to be interned during the war period. The list contains about 1,000 titles and includes all records which reproduce vocal or instrumental selections in the German language as well as selections of pre-Germans. This section will bar all the orchestral selections of Dr. Carl Muck, of Boston, and those of any other musical director who has been interned by the Federal Government.

The barred list has 535 Victor, 271 Columbia, and 53 Edison records. The association members are pledged not to sell any of the records listed and to withdraw them from sale.

In conformity with the association's action the Muehlhauser Brothers Piano Co., dealers in Sonora machines, displayed cartoonist Oppen's cartoon drawn for the National Security League, in their shop window. The cartoon represents a machine called the "American Citizenship Phonograph." Before it stands a German-American who offers a record bearing the words "Deutschland—Uber Alles." The cartoon is labeled, "You Cannot Play That Record on This Machine." These Oppen cartoons have made a big hit in Cleveland.

The Collister & Sayle Co., Victor retailers, have been attracting attention by a novel display of war weapons, including a gatling gun. The firm's show windows are always attractive and the novel features were shown during the city's campaign to raise a $6,000,000 "Victory Chest," which was oversubscribed $5,000,000.

During the drive Charles K. Bennett, manager of the Eclipse Musical Co., Victor distributors, was a member of the Cleveland Athletic Club's team of record-breaking money finders.

The May Co.'s piano department is making an advertising drive on Victorolas, featuring them in extensive displays in the local daily newspapers.

Cleveland police a few days ago had a chase after a lot of talking machine records. Crafty crooks robbed the music store of Charles H. Rudolph, 1001 St. Clair avenue, of $20 worth of property, mostly talking machine records. Two well-dressed men called at the store and asked to hear the strain of "Nancy Jane" played. The pair selected $150 worth of records and told a clerk to put them aside until the next morning. During the night the records were stolen.

Henry Dreher, of the B. Dreher's Sons Co., was one of the hardest workers for the "Victory Chest" fund Cleveland raised. He is quite a golfer, and after he had held up the players of the Willowick Club, the caddies "came across" with a substantial sum.

The Starr Piano Co. is making a drive on talking machines and using considerable space in the Cleveland daily newspapers.

Bings' furniture store, one of the biggest in Cleveland, is featuring Sonora talking machines. This enterprising firm is one of the many which is using phonographs to attract trade successfully.

WELCOME TO THE TALKER FIELD

A. H. Taylor, formerly traveling representative for the piano house of F. G. Smith, and well known in piano circles throughout the country, has purchased the Victor establishment formerly conducted by Mrs. Kaplan at Jamaica. L. L. Mr. Taylor has entirely renovated this store, installing new decorations and additional soundproof booths, with the idea of making the establishment one of the most attractive talking machine stores in Long Island.

Probably the best and most profitable kind of ability is amiability.
Here Are the Points

that make the Nightingale the highest quality machine offered to the American public. This wonderful combination of features is the result of several years’ successful manufacturing.

It is equipped with the Stephenson Precision-made Motor.

The Scotford Tone Arm and Reproducer are used.

Not only are the finest veneers used, but the solid parts of the cases are of genuine mahogany, black walnut and quarter sawed oak.

We make our own cases and in cabinet work and finish they are unsurpassed.

We guarantee it unconditionally against broken or defective parts for a period of two years.

The selection of a phonograph line is a serious matter—on your decision both profits and prestige hang. You must give perfect satisfaction to your customers and assure yourself of an adequate profit. On both these points the Nightingale scores big.

KANSAS CITY Continues to be a Lively Trade Center

Business During the Past Month of Large Volume Despite Red Cross and Other Drives—High-Class Machines in Demand—Sales Have Been Limited Only by Supplies—Other News

KANSAS City, Mo., June 8.—The talking machine trade in this vicinity for the past month has been more than usually good, taking into consideration the Red Cross drive and various other patriotic activities. Many of the talking machine men gave up an entire week’s time to the Red Cross. E. ener J. Pierce, manager of the Victrola department of the J. W. Jenkins’ Sons Music Co., and A. A. Troxler, who has charge of talking machines for the Schmeilert Arms Co., were both captains in General Jackard’s division in the campaign ‘during War Fund week; and devoted the entire week of May 20-27 to this work. The Kansas City quota of $600,000 was reached the third day of the campaign and the final figures carried the city over the top with a total of $1,260,000. Mr. Pierce was the life of his division, leading the cheering and demonstrations with the energy which characterizes his ball playing and recently his golf. Just at this point it may be well to mention that Mr. Pierce would suggest that any members of the trade who visit Kansas City during the summer months had better bring their golf sticks along. He promises them an interesting trip to the Meadow Lake Country Club links.

Troxler was in charge of a district which extended over a large section of territory and was consequently difficult of access. However, the results were very satisfactory, for although not so large in amount as some of the more prosperous districts, it registered practically 100 per cent. in the number of subscriptions, a point more worthy of commendation.

William C. Chestnut, sales manager of the Brunswick Shop, 923 Walnut, has been enjoying an unusually high class of trade, especially in the more expensive machines. The majority of the instruments sold range in price from $175 to $225, and a number of $350 models have been sold. The new Brunswick line, which carries the Utalona reproducer, has been very successful. There will be an exhibition of the special $1,500 model which was shown at the Music Show in Chicago last year at the Brunswick Shop in the near future. Mr. Chestnut said this week: “In order to protect ourselves from any difficulty in completing a deal with drafted men, we have adopted a ruling that no sales will be made on the installment plan to unmarried men who are in class A of the first draft.”

A. A. Troxler, manager of the Victrola department, Schmerler Arms Co., said in regard to business conditions: “It is not a question of how business has been but one of getting goods. If we could only secure more merchandise, trade would be phenomenal under the existing circumstances. It has been very good. We have interred all Central Power records or anything pacific in nature, such as ‘‘I Didn’t Raise My Boy to Be a Soldier,’’ for the duration of the war. All records having a semblance of half-hearted support to the Government have been suppressed.”

D. M. Guthrie, manager of the retail department of the Columbia Graphophone Co., says that business is going along very nicely with good prospects for an excellent summer season. The Columbia Co. recently sold a beautiful period design to Mrs. Wallace Robinson, wife of the proprietor of the Hotel Baltimore. The instrument, which sold for $1,750, was specially ordered by Mrs. Robinson as part of the furnishings of her beautiful Country Club home. Mrs. Robinson, who is a fine soprano and proficient in musical circles, has signed an exclusive contract to make Columbia records. Her first two numbers will be “Mighty Lak a Rose” and “When You and I Were Young, Maggie,” with orchestra accompaniment. The records will be catalogued in September. The deal was consummated by Mr. Guthrie.

M. M. Hikman, manager of the wholesale department of the Edison Co., is in the East, attending the convention at New York. Mrs. Nell Williams, manager of the Victrola department of the Jones Store Co., has been in charge of the department for just one year. During that time the Victrola business has grown remarkably, showing increases not only in the sales but in the class of trade. “Although we have suffered from shortage in goods, we have been able to make a fine showing with the machines and with our wide variety of records satisfying that phase of the demand. It has been a year in which it has been necessary to resort to original plans in salesmanship to overcome the influence of the war. With us, the old plan of selling Victrolas at just the price of the record is not going through any longer. People seem to have the cash and are willing to pay. We are now carrying a large stock of accessories such as record files and Motorolas to give complete service to our customers,” said Mrs. Williams.

O. D. Standke, who has charge of the Victrola department of the Geo. B. Peck Dry Goods Co., is visiting his home near Clinton, Mo., for a week or ten days.

E. S. Hall, of the Hall Music Co., considers the increase in price in all talking machines and records to be of material interest to the talking machine dealers at present.

Miss Hazel Godfrey has recently been added to the sales force of the Victrola department of the Jones Co.

Mr. C. L. Schwager has recently resigned his position as office manager of the wholesale department of the Columbia Co., and left March 26 for Atlanta, Ga. He has accepted a position as traveling auditor for the Columbia Co., and his first work will be in Atlanta. For four years Mr. Schwager had been with the Kansas City office.

O. A. Field, of the Field-Lippman Piano Store, St. Louis, was in Kansas City recently as a guest of A. A. Troxler.

The Columbia Co. is receiving a number of very large orders for the General Pershing records.

F. S. Allen, of the Musical Record Co., of Los Angeles, Cal., was in Kansas City recently on his way to the East.

F. S. Horning, Victor representative for the central West, has been in Kansas City en route to the Atlantic coast.

Why Not a Record Window That Has Some Human Interest Features? :: By Albert B. Parsons

It is often more difficult to fool the public in the matter of making a human interest window display than some of us might believe. The reason for this is that the displays of this kind of features is due to this very cause. There is nothing in the window that will excite attention, admiration or comment. The public simply will not be interested in such a commonplace. Further the public will not respond to the show that is a make believe. You can fool the children with fairy stories and kindled tales of fascinating lore, but the grown ups demand a more well-defined reason for showing the same interest in your window.

Now, there is at least more deal more truth in this than some dealers might even think possible. You may feel that your imitation, papier-mache figures and your make-believe scenes that give a faint idea of the impression you are trying to make have really been effective, but the truth of the matter is that your object more often has not been attained. The interest in your own windows cannot be had unless there is something of value to attract.

Say that you have a new or a special record that you want to advertise. If you care to arouse the interest in this, an interest that will make the sale of the record worth while, then you will have to give the public a reason for stopping at your window and of becoming interested. Your display signs and the little effort that you add with a number of reading signs, even though they depict something in connection with your record, will not bring the desired results. The dealer who has learned that simply has a talking machine therein and then hopes that the public will come in to buy a machine, can really count on little in this way. There is lacking the very interest that you have been hoping to arouse.

This is best given a personal test by trying it on yourself. You might be induced to stop and look at a competitor's window display, but this is simply because you want to see what he is showing. It is not from the fact that you have been induced to stop on account of the novelty of the display. Try it on another kind of display. Does the imitation window that lacks human interest appeal to you like that which has this? If you can put a person in your window and make him portray a given subject, and make the background a part of the setting, will you not arouse a larger share of interest in your display? If you even place a figure in there that can do more than remain a figure you have aroused an interest that will impel the public to stop and ponder. If you place an animal in the window that has a part to play in the role you will have aroused attention. The public does not want to be fooled, however, and you should make your display real. The imitation is a poor means of arousing and holding the public's attention.

To-day there are a number of popular sold-
dier records. There is a wide interest in all that pertains to the life of the soldier. Why not the display that has something of this kind in connection with the record? Why not the real war relics, the real rifles, uniforms, flags, Red Cross fixings? Why not the display that has a man dressed up to represent a soldier or a woman as a Red Cross nurse, and will make clear the idea of a real scene? Pick out any number that is now popular. Make it a part of the window display that has a human interest side.

Best get away from the commonplace and make the record a real picture. Place a phonograph in the window and fix up a camp scene. Place therein also some tents and a man or two. If you cannot get live men, why, take figures, but make the display a real one.

You will find an interest in this kind of dis-
play that you can never feel in the window that has only a make-believe show. Invite the publi-
come in and hear these records. Ask them to permit you to play them for the passer-
by. Come in and hear this record and all others. Show that you are fully alive to the needs of the hour and that you can arouse a feeling in the public that will find a ready response.

You will be surprised to see how eager the public is for a story of this kind. But the imitation will never arouse that same display of interest. The public has been given so much of this ordinary show that it has tired of the sameness. There is a longing for something that will be a real display. If you only have an ordinary record you can make it appeal by the nature of the window show that you make.

If you care to go to a little additional ex-
 pense or to make an extra effort to arouse the public in this way you can find ample time to keep the public interested in your display. If you can do so you should make a complete change at least once a week. But keep the public guessing as to the next window show that you make. Pick out the popular records and play them up. You will be surprised how much real profit there is in this idea when it has been given serious study. But it must be real. If it is only a stick, or a hatchet, or a gun, make these items real, and not an imitation. You cannot fool the public. No, there are too few of them now that will fall for your make-believe style.

It is astonishing how much all of us love a reality. It is a part of our human make-up to love the fact which is real. Can you not be benefited by this idea and the suggestion that can be made a part of your display? You want to sell machines and records, but the only way to do so with anything like a profit to yourself is to keep the interest of the public alive and the show window is the logical means when it is made to act as a medium for the telling of a human interest story.

NEW QUARTERS FOR PEARSSIL CO.

The Silas E. Pearssil Co., Victor distributors, has leased the entire fourth floor of the building at 10 East Thirty-ninth street, New York, a few doors east of Fifth avenue. According to its plans the company will move from its present location at 15 West Forty-sixth street about the 20th of June, and in its new quarters will concentrate exclusively upon the development of wholesale Victor business, discontinuing its retail business entirely.
Columbia Service “follows through.” It will help you sell those Portable Model Grafonolas you have. Write to the Dealer Service Department for information concerning advertising material and window display.

PROGRESS OF TRI-STATE VICTOR DEALERS’ ASSOCIATION

Exchange Bureau of Association Proving of Great Value—Many Conferences on Jobbers’ Prices—Membership Now Includes Leading Houses of St. Louis and Adjacent Cities

Sr. Louis, Mo., June 3—Victor dealers in this trade territory are showing much interest in the Tri-State Victor Dealers’ Association since the formal opening of the Koerber-Brenner Music Co. warerooms on May 8. At the dinner given in connection with the Koerber-Brenner meeting, President Magoon of the Tri-State Association was a speaker and he explained the objects and benefits of the association. As a result, a number of membership applications have been received by the membership committee. These will be submitted to the association at the next meeting, probably the third week in June.

The greatest direct benefit of association has been the Exchange Bureau. While not many machines have changed ownership through this bureau, which is under direction of John F. Ditzell, of the Panoun & Barr Co., the record transfer has been very heavy. Some dealers reported unusually heavy stocks of standard records and these were eagerly taken by other dealers, especially by those dealers who have learned the art of suggesting as substitutes for the new numbers, older records by the same singer or player.

Since the notices of the advanced prices by the Victor Co., local members of the Association have held several conferences to consider the dislocation of jobbers’ prices and the les-

Dealer Service Department of Columbia Co. Announced Unified Display Feature for Dealers

In response to requests from Columbia dealers throughout the country, the dealer service department of the Columbia Graphophone Co. has just announced that it is ready to supply Columbia representatives with an imitation record lithographed on sheet steel. These records can be utilized to excellent advantage, as the dealers have hitherto been hampered in exhibiting records in their display windows by the deteriora-

How Talking Machines Play a Prominent Part In the History of the World War :: By Wm. J. Fitzgerald

One of the real problems of every military organization in active service is that of preserving the morale of the troops at the highest point. Modern war conditions are particularly nerve-racking to the soldier, for he is called upon to spend weeks, or even months, inactive in the trenches, but alert and ready at all times to enter into a death grapple with the enemy. In short, the heroes that have gone with other wars are almost entirely lacking in this. There are few charges across the open, or the entrance of passing from one battlefield to another. It is a war of waiting, of methodical campaigning, the sort of campaigning that wears on the nerves.

Our allies, even before we entered the war, realized the necessity of talking machines at the front. The English Government and private organizations sent thousands of talking machines and records over to France for the use of troops in the field, and found them most effective in distracting the mind of the soldier from the grinds of war during his brief periods of rest. There is hardly a military organization in the United States to-day that is not provided with some sort of talking machine and a library of records.

The talking machine has established its place in the military life of the country, and has been accepted as an essential. Hundreds of talking machines are in the camps over there. Thousands are in the cantonments here. I really believe that individuals to-day are endeavoring to see that talking machines are placed aboard every vessel afloat. Music is getting to play an important part in this war. The music of the talking machine soothes the raw nerves of the boys who are just returned from the trenches, lessening the mental lassitude of the reaction that follows, with soothing melody, and helps in every way to make their lives more comfortable. Every one of the warring governments has made special efforts to supply music for its soldiers, but human nature needs to keep regular hours, and talking machines, which can be operated by any one at any time, can perform a service obtainable through no other agency. We know, for instance, that it is an established fact that the soldiers will not endure the waiting periods of modern warfare without the relaxation. Commanders of the army have found that the morale deteriorates when the men are given only the so-called necessities of life. Military men have found that the modern man requires something different. Therefore, to-day, we find in the cantonments of the country, even with the expeditionary forces abroad, that our troops are being well taken care of by the kind of music from the talking machine, and by the good literature which is so kindly allowed them even in the greatest hours of danger. I do not hesitate to predict that the music in industry will come sooner or later to be recognized as a war industry, and something absolutely necessary for our army and navy and even for our military camps at home. It has been taken as a matter of course, by everybody from the President down, that talking machines must be provided for the boys training and for the boys at the front. The talking machine has never been known to be a traitor; it means good music, and helps to provide comfort and inspiration which usually follows. All good music is patriotic, because in wartime comfort and inspiration are to be regarded as a national state in every home.

The foregoing article by Mr. Fitzgerald appeared in the Boston Sunday Advertiser and American of May 26 followed by a striking advertisement of the Eastern Talking Machine Co., depicting many of the leading Victor artists, with suitable text matter, emphasizing that the greatest artists of the world make records for the Victor exclusively. This was followed by the individual cards of some fifty-four dealers, in this connection it was pointed out to the reader that "It is your patriotic duty to-day to trade with the Victor dealer in your own city."

In complimenting Mr. Fitzgerald on the splendid work accomplished in this co-operative advertisement, he very modestly said: "I wish to emphasize that Thomas O'Brien, Classified Manager of the Boston American, and Arthur Burns, his able assistant, are certainly two men in the advertising field that deserve wonderful credit for their ability to stick and win out on any hard proposition that may arise, and believe me co-operative advertising is one of the hardest propositions known."

Sometimes a better outlook is secured by a critical inlook. Tried that lately?

The talking machine provides comfort, inspiration and joy for the boys at the front.

is the last word in the refining of high-grade oils, for every impurity is taken from it, leaving nothing but what is required to keep machines in perfect condition, being combined of four oils perfectly blended.

Will not Gum, Chill or become rancid; is free from acid. It is colorless and has no sickening smell, being absolutely odorless.

"The finest and most delicate pieces of mechanism do not prove efficient unless properly lubricated. Skill, Genius, Invention and Workmanship can't make up the proper Oil, Shop and consider the case when you have to buy an Oil for household use."

Hundreds of satisfied customers have written as they would never use anything else for TALKING MACHINES, GRAPHOPHONES, PHONOGRAPHES AND SEWING MACHINES.

NYOIL will lubricate the machinery and polish all woodwork and can be obtained of any "Up-to-date" Talking Machine Dealer in the world, and manufactured by Wm. F. Nye, who for 25 years has made 80% of all the Watch, Clock and Chronometer Oil that is used in America.

PITTSBURGH PATHEPHONE CO.

963 LIBERTY AVENUE, PITTSBURGH, PENNSYLVANIA
MAY REDRAFT THE STEPHENS BILL
Believe That a Remodeled Measure, or an Entirely New Bill, Providing for Maintenance of Retail Prices Under Auspices of Federal Trade Commission, Will Be Offered

It is now predicted that in view of the various recent decisions against the existing methods of providing for the maintenance of fixed retail prices, and particularly in view of the recent action of the Federal Trade Commission in the matter of price fixing, a new, or amended, Stephens bill will be introduced into Congress at an early date which will be drafted along lines to meet the situation as now developed.

It is believed that in its new form the Stephens bill will still be designed to give manufacturers of trade-marked goods the right to fix the retail selling price, or the resale price, on their goods, but will also provide that the price fixing must have the approval of the Federal Trade Commission. It is believed that legislative and judicial interests at present opposed to the fixing of retail prices by private concerns can be won over to the policy of price maintenance, provided such a policy shall be under Government supervision.

Even Justice Brandeis, of the United States Supreme Court, in a dissenting opinion in a recent price-fixing case, gave it as his view that price maintenance should be brought about through legislation, and intimated that the Federal Trade Commission should be given some authority in the matter.

With the Federal Trade Commission in charge, the retailer, or the final purchaser, will have some recourse in the event that he felt that the price fixed on a certain article was higher than was warranted by the cost of manufacture and distribution, in which event the Commission would probably order an adjustment.

There are four things a business man ought to know—himself, his business, how to use his means and knowledge, and the—other fellow.

WM. A. CONDON NOW SOLE AGENT
For the Gloria Steel Needle—Plans an Aggressive Sales Campaign—Demand Grows

The Gloria Phonograph Supply Co., New York, has announced the appointment of Wm. A. Condon as sole agent for the Gloria steel needle. He has already assumed his new duties, and is making plans to establish an aggressive campaign in behalf of these products.

Wm. A. Condon is well known to the talking machine jobbers and dealers throughout the country, as he has been identified with the talking machine industry for many years. As one of the founders of the Condon Auto-Stop Co. he had occasion to visit practically all of the important cities from coast to coast, and while on these trips met the leading jobbers and dealers in every trade center of importance.

He is now making plans whereby the Gloria steel needle, which was introduced to the trade a few months ago, will be merchandised efficiently and successfully. Arrangements are being completed for the adequate distribution of these needles, and Mr. Condon has perfected sales and publicity plans which will doubtless be of interest to the trade generally.

Since it was placed on the market a few months ago the Gloria steel needle has achieved pleasing success. Shipments have been made to jobbers and dealers in all parts of the country, and the company is working on a strictly uniform price basis, leaving nothing undone to fulfill its promises of prompt deliveries of its product.

GREAT ROSTER OF PATRIOTS
Another star was added this week to the service flag flying from the offices of the New York Talking Machine Co., Victor wholesalers. This star was occasioned by the fact that Henry Roth, one of the company's stock clerks, is now a member of the National Army and is in training at Camp Upton. The patriotism of this company's sales staff constitutes a remarkable record, for there is probably a greater proportion of the New York Talking Machine Co.'s force now in the service of Uncle Sam than any concern in the talking machine or allied music industries. Several of the members of the staff are now engaged in battle at the Western front, while others are getting ready to leave for France at a moment's notice.

NEW AUTOMATIC BRAKE
The Weber-Knapp Co. of Janesstown, N. Y., have made preliminary announcement of a new automatic brake which they have been developing for some time and which is already in the process of manufacturing. It is claimed that the device is very simple and a cordial reception of the new invention is expected.

TRIBUNE ATTACKS RECORD OFFER

The "Ad-Visor" Alleges That Certain Sections of Landay Bros. Retail Advertising Were Not Lived Up to in Actual Practice—Talking Machine Men, Inc., Congratulate Paper

The "Ad-Visor" column of the New York Tribune, in which the attention of the public is called to advertising statements in the New York papers by various concerns which are believed by the Tribune critic to be misleading, launched an attack recently on Landay Bros., local wholesalers and retailers of Victrolas and records, regarding a certain phrase in the Landay advertising.

The Landay advertising recently carried the line: "A genuine $5 Victrola with all the records you want for $5 down and easy monthly payments." The Tribune investigators claim that the Landay salesman informed them that $5 worth of records were allowed on the $5 down basis, and that records to a greater value would require a larger initial deposit. The investigators allege that they demanded $50 worth of records with the $5 machine and were informed that a $25 deposit would be required. "In other words," as the published report of the case reads, "they could have 'all the records they wanted' on a $5 deposit provided they did not want more than $5 worth of records." The Tribune people claim that they brought the matter to the attention of the Landay house, and that there was a temporary change in the advertising phraseology, but that the old offer again appeared.

At the meeting of the executive committee of the Talking Machine Men, Inc., held in this city on May 23, the following resolution was adopted:

"That the management of the New York Tribune be congratulated on the stand it has taken in the matter of the 'Landay advertising' as discussed and criticized in their issue of even date, and this committee does hereby concur and sustain the action taken in this matter and believes that it will be of great benefit to the talking machine trade of New York and vicinity, and it does furthermore instruct the secretary to send a copy of this resolution to the New York Tribune and trade papers showing the action taken at this meeting."

The Everton Phonograph Co., Chicago, Ill., has been incorporated with capital stock of $2,500. The incorporators are Thomas Wilkinson, Earl F. Hud and Raymond B. Cunifee.

Other than a state of mind, happiness is not in what we have; for a lot of us were happy before we had much.

PATRIOTIC PATHEPHONE WINDOW

Recently Carried by Brushaber in Detroit Has Won Much Favor and Praise

Detroit, Mich., June 3.—The accompanying illustration presents a patriotic Pathephone window display installed by Brushaber in their Grantot kind, as he was handicapped by unusual angles for a phonograph display, as, owing to Detroit's layout, almost every building has all manner of angles but right angles.

The results, however, were very satisfactory, and this display was commented upon very favorably by passersby and members of the local trade. In this display commercialism did not

EMERSON LOSES BIG JUDGMENT
Appellate Division Reverses Decision of Supreme Court, Which Awarded $46,485 to Victor Emerson as Against Henry Waterson—“Little Wonder” Records Basis of Suit

In a decision handed down by the Appellate Division on May 31 the judgment for $46,485.59, obtained by the Emerson Phonograph Co., as assignee for Victor H. Emerson, in the Supreme Court, was reversed. The case grew out of an arrangement made by Mr. Emerson with Henry Waterson, whereby the latter secured exclusive distributing rights for the small “Little Wonder” records made by the American Graphophone Co., by which company Emerson was employed. Mr. Emerson declared that he demanded that Waterson agree to pay to him one-half the profits he made from the sale of the records, and in fact paid $1,700 at various times.

Waterson claimed that he had to pay the American Graphophone Co. so much royalty that he did not make the profit he expected out of Little Wonders and he sued Emerson for the money advanced. Emerson, on the other hand, alleged that Waterson had made a profit of $200,000 out of Little Wonder records and wanted the court to give him a judgment of half that amount against Waterson. The lower court did give Emerson a verdict of $46,485.59 against Waterson, which is now set aside.

The opinion handed down states that the testimony as to the alleged verbal contract between Emerson and Waterson is not conclusive, but even if such a contract did exist, it would be null and void in law, because Emerson was at the time it was made a trusted employee of the American Graphophone Co., and was receiving pay to work in their interests, therefore he had no right to make such a contract.

HEAVY DAMAGE BY FIRE
The surplus stock of talking machines and records in the cellar of the store of the Worcester Phonograph Co., 11 Trumball Square, Worcester, Mass., was badly damaged by fire recently.

George W. Harris, piano dealer of Burlington, Vt., is planning to move to a new location at 200 Main street, where he will feature the Henry F. Miller piano, and the Edison phonograph.
Happenings in Dominion of Canada

CANADIAN MANUFACTURERS ASSESSED TEN PER CENT. TAX

Proposed Bill, Which Will Undoubtedly Become a Law, Provides for a War Tax of 10 Per Cent. on the Manufacturers' Price on Players, Talking Machines, Rolls and Records

Toronto, Ont., June 5—When the daily papers on May Day announced that certain musical instruments were included in the list of articles that the Government proposed to tax, uncertainty and fear was felt by the instrument trade circles. The first report made it appear that a 10 per cent. tax was to be imposed upon the retail selling prices of certain lines. This misapprehension was later corrected and it now appears quite clear that the proposed tax was to be on the manufacturers' selling price, although even at present writing there is necessarily indistinctness of detailed confirmation as to the proposed tax measures and the working out of the collection of them.

It is clear that the specific lines are player-pianos, player organs and music rolls, talking machines, rolls and records.

In Toronto a general trade meeting of piano and talking machine manufacturers and wholesalers was held on June 3, at which a deputation appointed to visit Ottawa and obtain, if possible, information that would remove some of the uncertainty as to the conduct of business in view of the proposed legislation. Revenue officers at various centers had notified dealers that they must keep a record of all sales made on May 1 and take an inventory of goods on hand to show that the warning was not necessary in the case of retailers.

The manufacturers, meetings being held the piano and phonographic branches of the business were held to receive reports and decide on the next step to be taken. As a result of the conference it was decided by the trade from the office of the secretary of the Canadian Piano & Organ Manufacturers' Association, reporting that the following points were tentatively established in connection with the excise tax. The regulations here announced are subject to official confirmation:

(1) Tax applies only through manufacturers and importers.

(2) Tax applies on all goods imported or shipped or delivered to dealers by manufacturers prior to April 30 (except in cases mentioned in "exceptions").

(3) Tax applies on all imports whether now in bond or not.

(4) Tax is payable on duty paid price for imported goods or on manufacturers' selling price for goods bought in Canada. The manufacturers' invoice price to dealers in each individual case to form basis of tax.

(5) Tax is not deductible against parts or unfinished materials.

(6) Exceptions. Where manufacturer or importer has released and accepted orders previous to May 1, he is legally bound to deliver at former prices and where he can show he is not required to pay the tax, will not have consideration to refund by applying to the Department of Inland Revenue.

(7) Payable from Canadian manufacturers. Tax collected by Government for phonographs, records and player rolls; May sales on June 1, 1918. For player-pianos and mechanical sets, payable on June 1, 1918.

None: Efforts are being made to secure extension of collection of records tax for two months, and players tax for six months. No decision yet rendered. In event of postponement of tax, a quarter tax will be required to be paid to the manufacturer to the department.

(8) Tax is payable when goods are passed through Customs. This does not change present regulations covering landings.

(9) While bill has not been passed, it is understood that when in effect it will be made operative as from May 1, 1918.

While up to the time of going to press the excise bill is still before the house, it is not expected there will be any serious objection, and that it will become law and effective as on May 1, 1918.

This special war tax of 10 per cent. on the manufacturers' selling price applies to player-pianos and rolls, mechanical organs, talking machines and records.

Various lines are, of course, expressed concerning the inclusion of musical instruments among those lines on which a tax might fittingly be placed, but your correspondent believes the general sentiment is one of cheerful readiness to co-operate with the Government in raising much needed revenue and a feeling that the Government has been so careful not to impose an assessment that would seriously restrict the industry.

It is felt that the piano trade has reason to feel elated that the contention of the piano manufacturers that a national need has been recognized by the Government. In regard to the 10 per cent. on player sales there is a little uncertainty as to how this will affect the financing of the sales as the tax may be required by the Government in a lump sum when the sales have been made. The optimist in the trade figure that this tax may do good to the industry in forcing better terms of payment.

As far as the talking machine trade is concerned it is not felt that the tax will interfere with business, as machines are recognized by manufacturers dating from May 1, manufacturers and wholesalers are uncertain as to what the necessary changes in prices will be and are protecting themselves by a clause on all invoices of goods going out since May 1.

Exception is taken, however, to the act and the following vigorous protest is registered by a prominent dealer in the East: "The writer, personally, feels that a big protest should have been made against this tax on talking machines by all manufacturers and dealers in phonographs. Talking machines are far more than a luxury. They are just as necessary for the uplift of humanity and civilization as schools and colleges, and the Government might with as much judgment assert a Common-sense, tax school books, newspapers, magazines, etc.

"Thought is a great motive power in this world, and music is a mighty factor in helping people to think aright. Some great writer has said: 'If you wish to grow better then you should look on a beautiful picture every day, read a beautiful poem, and listen to a beautiful musical composition.'"

"We feel sure that if the members of our Parliament realized the great blessing that talking machines give to the world, they would have placed such an excessive tax on these instruments."

OTO HEINEMAN PHONOGRAPH SUPPLY CO.'S NEW HOME

Now located in Toronto at 172 John Street—G. W. Hopkins' Visit Enjoyed—Many New Stores and New Agencies Announced—Recent Visitors to Toronto—Other News

Toronto, Ont., June 6—The local branch of the Otto Heineman Phonograph Supply Co., Inc., is now in the new quarters at 172 John Street.

Mr. G. J. Pott, has taken a lease of the entire ground floor in the new concrete, fireproof building at the foregoing address, and has removed to his new residence to house both the offices and warehouse. Substantial quarter-cut oak foyings have been put in, private offices for Mr. Pott and his assistant, Mr. Green, and an interdepartment phone service. From Mr. Pott's desk he will be able to overlook both the incoming and outgoing shipping departments. Soundproof rooms are also being installed.

The increased floor space will permit the carrying of a much larger stock of Heineman and Meisselbach motors, tone arms and all parts. With this advantage of careful storage arrangements under one roof and on one floor are quite obvious.

The Heineman branch had the recent pleasure of a visit of a Mr. A. F. Meisselbach of the firm's Chicago branch. Mr. Meisselbach visited the plant and found his "Ultron" reproducer with which three models of the line have been equipped.

J. L. De Vaney, who was the Musical Merchandise Sales Co.'s representative in Alberta and British Columbia, has enlisted in the Royal Flying Corps. He is succeeded by K. A. Ross, who has already a considerable connection in the West. The firm also announce the opening of a Brunswick Shop in Winnipeg under the management of H. E. Ettenberg, in connection with which it is proposed to put on an extensive advertising campaign. The Musical Merchandise Sales Co.'s Western headquarters have been located at 143 Portage avenue.

George W. Hopkins, national sales manager of the Columbia Graphophone Co., addressed the Ad Club at London on May 16. Mr. Hopkins addressed the Toronto Board of Trade recently when his speech made a hit.

W. S. Carr, of Niagara Falls, Ont., who is well known in the Niagara Peninsula, has taken on the Columbia line which he is featuring quite extensively.

Judging from the letters received from John Saline, while the latter was in New York recently, he was considerably enthused over the Columbia recorded models, displayed at the Columbia Co.'s Fifth avenue store. Mr. Saline (Continued on page 34)

Talking Machine Supplies and Repair Parts

SPRINGS, SOUND BOX PARTS, NEEDLES

THE RENE MANUFACTURING CO.
MONTVALE, NEW JERSEY
TRADE CONDITIONS IN THE DOMINION OF CANADA—(Continued from page 33)

visited the company's head office in New York and the factories at Bridgeport.

The Adams Furniture Co., after trying out various makes of machines and records, are now handling the Columbia line exclusively as wedding gifts.

In their contribution to a patriotic fund being raised in London, the Starr Co., of Canada, included a Starr phonograph trench outfit. This is one that regularly sells at $110. With other contributions it was put up at auction at the Tecumseh Hotel and realized $20, being purchased by Sir George Gibbons, who, with his usual generosity, donated it to the boys who are serving at the front.

O. C. Dorian, general manager of the Pathé Co., will soon leave for an extended trip which will take him right through to the Western Coast. He will call on some of the most important Pathé representatives in the West and will make a thorough study of conditions there.

W. K. Elliott, Brampton, Ont., has added the Brunswick line to his piano business.

At the recent motor show in the armories in Peterboro there was an exhibit of Pathé records and machines shown by E. V. Warne.

H. S. Berliner, vice-president of the Berliner Gramophone Co., Ltd., Montreal, was a recent visitor to Toronto.

G. W. Hopkins, general sales manager of the Columbia Graphophone Co., New York, spent a week-end in Toronto looking over the company's new factory and Canadian head office.

At the opening of the Commodore Jarvis branch of the Navy League of Canada held in Toronto's new Masonic Hall, the Sonora in charge of H. R. Braid, of I. Montagnes & Co., Canadian distributors of the Sonora, provided the musical entertainment in the luncheon parlors.

The first firm to pay the new excise tax of 10 per cent. at the port of Toronto was I. Montagnes & Co., who released a shipment of Sonora phonographs on May 2. The 10 per cent. is payable on the importer's price plus the regular tariff charge.

MONTREAL TRADE DISCUSSES PROFITABLE ADVERTISING

Does Display or Classified Advertising Bring Best Results—Talking Machines as Wedding Gifts—Artistic Sonora Display—New Brunswick Dealers—Death of John Ferns

MONTRÉAL, Que., June 5.—An increasing demand is being realized in the sale of phonographs as wedding gifts. In sounding out the local dealers it seems that this business is not gone after as aggressively as it might be by some firms, while others are hot foot on the trail of the would-be bride and bridegroom. The information is gained from the engagement columns of the daily newspapers and from private sources.

The Montreal Light, Heat & Power Co., Ltd., in their new and well-appointed showrooms in their new building, have a rest room for their lady patrons, et al. Musicals are given every afternoon. The company furnishes the music and is from the warerooms of Charles Cutross. One of their handsome show windows for demonstrating some of their electrical lines suitable for a den featured an Aeolian-Vocalion furnished by Charles Cutross. It showed up to splendid advantage in the cozy and well-furnished room.

Speaking with a representative phonograph dealer who believes very strongly in printer's ink the question was put to him as to whether he found display advertising or condensed classified advertising the most productive of results. He stated that on second-hand machines and exchanges the classified columns brought him excellent returns, but when it came to advertising and featuring a new machine he had to resort to display advertising and an illustration of the machine for direct results.

At Layton Bros. warerooms a window full of Grafonyolas attracted considerable attention and represented eighty-nine models of Styles 24 and 38. Summer sales were considerably stimulated by this effective window display. Sales Manager W. W. O'Hara was responsible for the unique window trim.

An annual event with Eugene Julien Co., Que., who do an extensive piano and phonograph business, is their exhibition which this year was preceded by a dinner tendered to the press and the directors of the firm by Eugene Julien. H. V. Roy, who has charge of the music department, had a full orchestra and his musical features were appreciated by large audiences.

The recent appearance here of Martellini received interest in the recordings of this famous Victor artist and the Berliner Gramophone Co., Ltd., and all "His Master's Voice" dealers shared alike in the spirited call for his records. Nearly all the phonograph dealers are advertising in their advertising copy the purchase of machines before the new additional 10 per cent. war tax is applied.

The Berliner Gramophone Co., Ltd., with their enthusiastic efforts for their dealers, had a splendid showing for May 1 (moving day in Montreal) when their motor trucks at the disposal of their customers moving their Victrolas and records absolutely free of charge to their homes.

R. W. Burgess, manager of the Montreal branch of the Pathé Co., has been obliged to take a few weeks' rest in a sanitarium at Three Rivers owing to a nervous breakdown.

The Musical Merchandise Sales Co. have been using large space in the dailies in the interest of their new Brunswick and the new Brunswick Shop in particular which was opened to the public the past week at 582 St. Catherine street West. New dealers in Montreal include J. A. Ether, 1901 St. Catherine street East, and J. L. Ether, 734 Notre Dame street, West.

George S. Pequegnat, who has been in charge of Wilder's Music Supply Co. (phonograph department) for some time, is severing his connection with that company on the first of June. His plans as yet are unsettled, although he has had a number of flattering offers.

The death occurred very suddenly the past month of John Ferns, who for some years had been handling "His Master's Voice" products in the north end of the city. The late Mr. Ferns was one of the 137 years' salesmen of the Berliner Gramophone Co.'s plant leaving there on account of ill health, and was one of the first men to press Victor records in Canada.

TRADE NEWS FROM WINNIPEG, MAN.

G. W. Johnston joins the Forces—Edison Tone Test Attracts—Robt. Shaw Discusses Record Situation—Big Order for Pathéphones

WINNIPEG, Man., June 1.—G. W. Johnston, who has been for the past seven years manager of the phonograph department of W. G. F. Seychelles & Co., Regina, Sask., and has recently joined the Seventy-seventh Battery, was tendered a banquet by the firm and staff, and presented by the firm with a shaving kit and by the staff with a wrist watch.

E. D. Morris, of the Morris Music Store, New Westminster, B. C., who suffered considerable loss by fire in March last, has opened up again with a full line of Victrolas, pianos and players, organs and sheet music.

The New Edison with Florence Fennell in a tone test recital drew large audiences to the Hotel Vancouver in Vancouver, B. C. Edison Hall (The Kent Piano Co., Ltd.) report some nice sales as a direct result of the recital. This artiste was also heard in recital in the Hotel Empress ballroom in Victoria, B. C.

The Canadian Phonograph & Sapphire Disc Co. report business good and collections ahead of the average. Mr. Poisson recently visited Montreal.

Robert Shaw says that the Columbia trade is increasing every month with no shortage of records, owing to the improved factory facilities. He says the supply of European records is well to the fore. Owing to the publicity methods of the dealer service department many dealers are coming in on the window scheme.

Habbon Bros. say Edison business has been normal and records are coming through the factory a little better. On the whole there is little or no complaint. The new Edison records are getting high praise.

The Hudson Bay Co., of Vancouver, B. C. have just placed an order for one carload of Pathéphones. The most gratifying feature in connection with it is that it is nearly 75 per cent. of the whole order was made up of machines from $125 up. The Hudson Bay Co.'s Calgary, Alta., house have also become agents for the Pathé line of phonographs.

The Musical Merchandise Sales Co., Brunswick distributors, have located their Western headquarters in Winnipeg at 143 Portage avenue.

ACTIVE CALL FOR TALKING MACHINES ON PACIFIC COAST

All Sections Reported Increase Despite Campaign for Red Cross and Other Funds—Northwest Especially Prosperous—What Leading Talking Machine Houses Say About the Outlook

SAN FRANCISCO, CAL., June 2.—Taken as a whole the month of May was a thoroughly satisfactory one for the San Francisco talking machine trade, both locally and wholesale, according to reports from various establishments; in fact, better than might have been expected in view of the strenuous campaign for Red Cross funds and other drives. Advices from the other Pacific Coast cities indicate that the active demand for talking machines and records was not confined to the Bay district. Local music houses report steady sales of new machines or selling down old stock on other sections of the Western territory report very good returns from all directions. The Northwest is especially prosperous on account of the rapid growth of its shipbuilding industry, which makes toward activity in practically all lines of business including talking machines; the interior of this State is in splendid condition from an agricultural standpoint, and dealers in southern California, Arizona and New Mexico seem to be getting their full quota of business also. The increased freight rates did not contest the joyous local sales with any little inclination to complain about war-time readjustments over which they have no control.

Clay & Co.

"Business was never better at this time of the year," is the way Andrew G. McCarthy, treasurer of Sherman, Clay & Co., sums up the month to the wholesale Victor department, which he gives his personal attention. The only difficulty, he says, is to get stock. Shipments have been coming through from the factory in fairly good rates, but in fairly large quantities, but more goods could be used to excellent advantage on the Pacific Coast. Mr. McCarthy returned from an Eastern trip early in the month, during which he visited their wholesale Victor branch in Los Angeles, Cal. The work was started some months ago, but it was only this month that tenants occupying part of the additional space vacated, so the plans for expansion could be brought to a close. Now the company's Southern California quarters compare very favorably with any store of its kind in the entire coast, as it is claimed. The same plan of arrangement has been carried out in the Southern city as was worked out for the new wholesale Victor establishment opened last year by the company on Mission street, San Francisco.

Trade in Southern Points

Jas. J. Black, of the Wilsey & Allen Co., is back at the San Francisco headquarters giving his attention to the talking machine department of the business, after spending some little time at the firm's branch store in Sacramento, Cal., where a talking machine department was being added. R. R. Draper has accepted a position with the company as manager of the new department. Mr. Draper's name and the fact he is sending in very good reports from the capital city. At the local store, business for May gave no ground for complaint. Frank Amry, general manager of the Wilsey & Allen Co., has gone East on a combined business and pleasure trip.

Conducting an Active Campaign

Mr. Helen Howard, who was recently placed in charge of the talking machine department of the Hauschild Music Co., in Oakland, Cal. a few weeks ago, has been conducting a very active campaign and getting splendid results. At her instigation the company is giving away a talking machine each week to some training camp, cantonment or other branch of the army or navy service, and is collecting records for the use of the soldiers and sailors stationed in this part of the country. A call for records is incorporated in the firm's advertising, and a box has been placed at the Liberty War Hut. In this way a great many are received, and Mrs. Howard says the men in the service are very appreciative. Machines have been placed on three submarine chasers built in this vicinity. Mrs. Howard has also formed an association with her Miss Fay O'irs, formerly music history teacher at the University High School in Oakland. Together they are specializing along educational lines and have succeeded in instilling considerable interest. A few days ago Mrs. Howard demonstrated a machine at the shipyards in Alameda, and she has arranged for a public demonstration at the Querick branch of the Public Libraries in Oakland.

The Hauschild Music Co. has recently added the Brunswick line of phonographs at its Oakland store.

Columbia Waterrooms Almost Cleaned Out

The local waterrooms of the Columbia Graphophone Co., under the supervision of F. A. Denis, are almost entirely cleaned out of stock, as a result of very active selling during the past month, and it now looks as if June business might be carried on at the same extent by lack of machines to sell. The shortage of stock applies particularly to machines, as records are coming through in better shape than was the case a few months ago, according to Mr. Denison, which is largely due to the fact that he is having most of the shipments come by express instead of depending upon freight service.

Music of the Department

The talking machine department of the Byron Mauzy music business in Stockton street has just been moved from one of the upper floors of the building to prominent space on the main floor. Several soundproof demonstration rooms have been installed and the new quarters are being nicely fitted up. Edw. Humphreys has charge of the department and reports business exceedingly good for this time of the year. Mr. Mauzy left for New York recently, accompanied by his wife and daughter. The White Music Co., which was organized several months ago by Arthur White, formerly manager of the talking machine department of the Emportum in this city, to engage in business in Berkeley, Cal., has been granted permission by the State Corporation Commissioner to issue fifty shares of its capital stock to Mr. White and H. H. Leathernby in consideration of money advanced to the corporation. A nicely fitted up talking machine department is one of the principal features of the new branch store opened by Byron Mauzy in Oakland.

A new music store was recently opened at 514 S. seventeenth street, Oakland, by Howard E. Brillhart, who is handling the Pathe line.

ORDERS TWO CARLOADS OF PATHES

Stern Talking Machine Corp. to Act as Pathé Dealer in San Francisco

SAN FRANCISCO, CAL., June 3.—Fred E. Stern, president of the Stern Talking Machine Corp. of this city, who returned recently from a two-weeks' trip to the East, closed arrangements on this trip whereby his company will act as Pathé dealers in this territory. Mr. Stern states that he has already placed an order with the Pathé Fréres Co. for two solid carloads of Pathéphones and for approximately 20,000 records for immediate shipment.

It is the intention of the company to carry a complete stock of Pathé records, having on hand every single number in the catalog at all times. The total stock of Pathé records will therefore be approximately 100,000 records. A permanent stock of Pathéphones of about 750 to 1,000 machines will also be on hand, so that the company can adequately handle the requirements of its clientele.

During the past month or so the Stern Talking Machine Co. received about 10,000 Pathé records and about 100 Pathéphones from the local Pathé jobber, and these machines and records met with a ready sale. In fact, the business was almost phenomenal, and Mr. Stern is naturally enthusiastic regarding the prospects for Pathé business in all of the company's stores.

In a chat with The World correspondent he said: "Having been able for the past two years to declare a cash dividend to our stockholders, amounting to about 20 per cent. at the close of each year, we feel that we ought to be able to do much better than that the coming year, as the result of our handling Pathé products, because we consider the Pathé line far superior to anything we have heretofore handled. If the Pathé Fréres Phonograph Co. will supply as with merchandise as fast as we order it, and I have every reason to believe that they will, I am sure that our business during the coming year will far exceed our expectations. "One other item which will materially increase our volume of business is the fact that the Pathé Fréres Co. is so prompt in getting out new record selections of the new popular numbers.

A Message to Phonograph Manufacturers

Are you making Just Another Talking Machine?

Is it your aim to manufacture a line of Phonographs for the future?

Do you realize that the Reproducer is the vital feature in a Phonograph?

The BLISS REPRODUCER meets all comparative tests both as to tone and volume.

The diaphragm of the BLISS REPRODUCER is constructed along scientific and mechanically correct lines, and is a laboratory product in every sense.

Edison Message No. 23

Music A Vital Force

"Theoretically, music is a gratuity, a luxury; practically, it has proven itself to be a necessity. The simple truth is that one of the vital forces of a nation is its music, and that in the accomplishment of a huge task wherein all its energizing processes are required, the value of music should be carefully regarded."

— Colonel E. M. Markham,
303d Engineers, National Army

Colonel Markham speaks from experience and with authority. During his many years in the army, he has served in China, the Philippines, Cuba, Mexico and no doubt by now he is serving in France. He says a man away from home requires the refining influence of good music and that it makes him a better man and a more efficient soldier.

If music is so indispensable to our soldiers, whose entire time seems to be actively employed, how much greater is the need for those who must remain behind to hope and pray and wait.

THOMAS A. EDISON, Inc.
Orange, New Jersey
Last Month's Business Exceeded Expectations—Death of C. H. Utley Regretted—Getting After Vacation Trade—Laxity of Credit Out of Date—Columbia's Biggest Month—Other News of Interest

BUFFALO, N. Y., June 9.—Even if millions of dollars of Buffalo's money were diverted in May to two worthy causes, the Third Liberty Loan and the Red Cross, the local demand for talking machines and records was extra heavy in the past month. May business at some of the wholesale and retail stores showed a gain in May, 1918, over the preceding period a year ago.

The A. F. Koenig Piano Co. has taken on the Pathé agency. President Koenig is enthusiastic over this line. His Pathé window display is enhanced by the use of a valuable oriental rug. In the Red Cross campaign in May local talking machine dealers figured prominently and contributed generously. Red Cross posters and banners were well displayed by these merchants.

The funeral of Benjamin D. Bing, of Bing & Nathan, Sonora dealers, was held here recently. Mr. Bing was sixty-one years old.

Members of the music trade industry learned with great regret of the death of Chas. H. Utley, the Edison dealer, and veteran piano merchant of this city, who passed away recently after an extended illness. The funeral from Trinity chapel, of which Mr. Utley was vestryman for twenty-five years, was largely attended. Mr. Utley was born in Buffalo, September 1, 1847, and is survived by a widow and one son, Lieutenant Chas. Bach Utley.

With local talking machine dealers follow the lead of some of the piano dealers, who are clearing house on account of a shortage of goods and slow transportation. In many cases the merchants in question are repossessing instruments on bad accounts and selling them over again to good prospects.

The advent of warm weather has various effects on the talking machine trade. When the temperature rises some dealers and salesmen sink into a state of coma, so far as stirring up active business is concerned. Others cultivate the summer resort and country trade, or strive for success among city prospects. The last-named campaigners have the foresight to realize that the going is easier now than it may be in face of "healess Mondays" and other wartime handicaps next winter.

C. Kurtzmann & Co. were represented at the conventions in New York by J. H. Hackenheimer, H. C. Rice and Roy S. Dunn.

The wise talking machine salesman these days is impressing on his prospective customer that music and patriotism are inseparable and that, in wartime, music is really essential.

L. L. Hatfield, of this city, formerly sales representative of the Edison Co. in Canada, has joined the Canadian Heavy Artillery.

War gardening is being practiced as an act of patriotism and recreation by Charles Hereth, New Edition dealer. Mr. Hereth has a farm at Ronausville, twelve miles from Buffalo. He is also an amateur florist. So far as business is concerned, he advocates the extension of short-term credit.

Harold J. Verbeck, of the Verbeck Musical Sales Co., Columbia and Delphion dealers, expects to go overseas shortly. He has been training in aviation at Lake Charles.

Bach Utley has received his commission as second lieutenant in aviation at Lake Charles.

The Kaeppl Piano Co. has taken on the Sonora line. Carl Kaeppl, of this firm, attended the New York trade conventions. This firm is displaying a service flag. Alvin Kaeppl having joined the navy.

Laxity of credit by talking machine jobbers and retailers is going out of date. Figuratively speaking, "Get the Money" is seared into the mind of every salesman. In the employers' estimation, the sales person who can "bring home the bacon" in the form of tangible payments for goods is the man who doesn't have to worry about his job.

Salesmen of the following firms are selling War Savings Stamps: J. N. Adam & Co., Victor dealers; Adam, Meldrum & Anderson Co., Pathéphone dealers; Bricker & Eau, Columbia dealers; William Hengeler Co., Victor dealers, and Wallbridge & Co., Victor dealers.

Ralph C. Hodson, president of J. N. Adam & Co., Victor dealers, is a member of an advisory committee to draft rules to govern talking machine and other mercantile establishments along lines on which factories are controlled.

In times like these railroad men are regarded as good talking machine prospectors. As substantial wage increases are headed their way, their purchasing power may be considerably increased within a few weeks.

"We have closed the biggest month in the history of this branch," said O. M. Kiess, local manager of the wholesale department of the Columbia Graphophone Co., in speaking of his May trade. "The largest previous month we ever had was December, 1916. We have gone ahead of that month by several thousand dollars. Our May, 1918, business was 81 per cent. over May, 1917, and 90 per cent. over the trade in April, 1918."

F. E. Pennington, assistant general sales manager of the Columbia Co., stopped off to inspect the company's new quarters which he said have the best facilities of any branch of the Columbia Co. in the United States. New Columbia dealers include Lewin Bros., Elliott Square, Buffalo, and the Crane Piano Co., Syracuse.

At the Buffalo branch of the Brunswick-Falke-Collender Co., a well-equipped balcony is being built for the exclusive demonstration and display of Brunswick phonographs.

W. R. Gardner, manager of J. N. Adam & Co.'s Victrola department, is pushing the sale of the record "God Be With Our Boys Tonight." This song was featured by John McCormack, who appeared at the Broadway Auditorium for the benefit of the Knights of Columbus War Camp Fund.

The Leonard Markels Butterfly Motor

The Leonard Markels Jewel Bearing Butterfly Motor

has revolutionized the motor industry. It is silent running and silent winding and represents the acme of perfection in motor construction.

This motor has achieved phenomenal success, and is being used exclusively by leading phonograph manufacturers in all parts of this country and Canada.

Columbia Graphophone Co.
NEW YORK

BALTON ON WESTERN CONDITIONS

Sales Manager of International Record Department, Columbia Co., Tells of Progress Throughout West Based on Recent Trip

R. F. Bolton, sales manager of the international record department of the Columbia Graphophone Co., New York, returned recently from a Western trip which included a visit to the company's branches in the leading Western cities as far as Kansas City and Minneapolis. This was Mr. Bolton's first Western trip in his new capacity, and he was accorded a hearty welcome everywhere.

In a chat with The World Mr. Bolton expressed his appreciation of the splendid sales efforts which the branch managers and their staffs are advancing in behalf of Columbia foreign language records. The demand for these records is steadily increasing, and judging from all indications 1918 will be a banner year for this important branch of Columbia activity.

The dealers throughout the West are utilizing, to excellent advantage the series of new hangers recently prepared by the Columbia Co.'s international record department. They are enthusiastic regarding the sales value of these hangers, and are also well pleased with the new advertising campaign inaugurated by this department a few months ago. In fact, many of the dealers are tying up their local advertising with this national newspaper campaign in order to secure maximum results from this publicity.

THE LIBERTY PHONOGRAPH CO.'S LINE

MINNEAPOLIS, MINN., June 4.—The Liberty Phonograph Co., of this city, has just placed on the market a line of phonographs which is meeting with considerable success. The company has established quite a number of dealers and, according to present plans, an active campaign will be advanced in behalf of these products. At the present time the company is concentrating on the production of two models retailing at $75 and $95, and these instruments embody numerous distinctive features, including a wooden tone arm, automatic stop, speed regulator, and other desirable features. The company is making it a point to fill the orders of its dealers promptly, and arrangements are being made to take care of an active fall trade.

Do not mistake activity for progress. If Paul Revere had ridden a rocking horse he would not have arrived.

THE UNIT CONSTRUCTION COMPANY
RAYBURN CLARK SMITH, President
Fifty-eighth Street and Grays Avenue, PHILADELPHIA, U. S. A.
Boston, Mass., June 9—Business is about what one might expect at this season of the year and with the conditions as they are recognized to be. The times are surely just opportune to test the mettle of a man, and those who hustle seem to be the ones that get the goods. There are times when business often comes to a man; and there are occasions such as the present when one waits a long time. If the proper attraction is not offered to induce trade. There are men in Boston who are doing a most creditable business because they go after it, they exert every honorable means to draw business to their establishments, and it is not to be wondered at that they are optimistic. Even these houses are working against great odds, for as is distinctly known in one or two cases they are hardly handicapped through lack of help, due to the draft and other things. There is on the other hand the men who complain that business is not what it should be; and while this is a statement of fact that admits of great truth these same men do not press out, branch forth as they should to invite a better feeling.

Good Showing of Bostonians at Conventions

There is something of a laugh going the rounds of the trade at the expense of some of the boys who got “cold feet” and didn’t care to take any chances the first of the month in going to New York for the music trade convention via the outside water line. On the day of the story of the U-boat escapes there was some expectation that the port of Boston would be closed, so this offered a fairly reasonable excuse for quite a number to cancel their passage on the Eastern steamship line to New York; but it happened that the “Belfast” sailed that night all right, and the alternate boat sailed the following night. Incidentally quite a number of talking machine men went over to New York for the conventions, and it is seldom that the trade has been so well represented from Boston this year. And nearly all of them went by train!

Impressive Educational Exhibits

At the Eastern Music Supervision conference held lately in Boston both the Victor and the Columbia Cos. had exhibitions which attracted the attention of all the men and women in attendance. The exhibits were at the Hotel Brunswick, which was the headquarters for the conference, and each of these talking machine companies occupied a large room of its own.

The Victor demonstration was in charge of Mrs. Frances E. Clark, manager of the educational department for the company; and Miss Gladys Barr, supervising instructor of the company’s educational department. In charge of the Columbia exhibit, which included several of the leading styles of machines, was Frederick Goodwin, and he had the assistance of Harry B. Goodwin, of the western Massachusetts department, who is located at Holyoke and Mrs. Grace Drysdale, representing the educational department for the company in eastern Massachusetts and Rhode Island.

Mccormack Records in Demand

John McCormack, the Irish tenor, was in town the other evening to sing at Mechanics’ Hall for the benefit of the Knights of Columbus War Camp Fund, and a feature of the concert was the selling at auction of some of the McCormack records which had been autographed. One of “The Star Spangled Banner” brought $120, and one of “God Be With Our Boys To-night” brought $200, while one of “Mother Macdonald” sold for $105. Naturally the day following the concert there was a renewed call for the McCormack records, but there were few of the popular ones that could be had, owing to their scarcity.

W. H. Merrick Joins Emerson Forces

Oscar W. Ray, New England manager of the Emerson Co., has just appointed a new salesman, Wilfred H. Merrick, who has been manager of the Cressey stores at Buffalo, N. Y., and the Metropolitan stores at Pittsfield and Fitchburg. He will take for his territory Maine, New Hampshire, Vermont and eastern Canada.

Announce Many New Agencies

Manager Ray has lately signed up the F. H. Thomas Co., which conducts a large establishment in the Back Bay and will handle the Emerson records; the Lippert Bros. at New Bedford; Archie Mac and at New Bedford, the Tuttie Co. at Rutland, Vt.; Adams Music Co. at Burlington, Vt. Manager Ray, who is over in New York, where he attended the music show, said business looked that the company’s new nine-inch record has been meeting with unparalleled success. H. T. Leeming, the new general manager for the Emerson Co., has been a visitor in town, making his headquarters with Manager Ray.

Aeolian-Vocalion Expansion

Manager Hibshman, of the Vocalion Co., was one of the many attendants from this city to the music trade convention in New York. Late- ly his staff have been successful in interesting a number of prominent persons in the Aeolian-Vocalion proposition and some large purchases have resulted.

Sonora Activity

Richard Nelson, manager for Southern New England of the Sonora Co., went over to New York the first part of the month, to be away for the week. A few days earlier Mr. Nelson was over at Hartford, conferring with Joseph H. Burke, who is associate manager of the Sonora Co. Mr. Burke subsequently went over to New York also. Business with Manager Nelson has been good for the month of May.

Signs Up Many Pathé Agents

Wholesale Manager R. O. Alsie, of the Pathé line, was another who went over to New York the first of the month. Mr. Alsie since taking hold of the Pathé line has met with marked success. Within the next few weeks he expects to take a trip through New England, visiting the concerns which he has signed up since associating himself with the Pathé.

Diton’s Immense Victor Business

The Victor department of the Oliver Ditson Co. has been able to show a splendid volume of business both in and out of season, and Manager Henry Winkelman was lately congratulated by the officers at the Ditson Co.’s annual meeting for the good showing his department had made during the preceding year. That’s the sort of recognition that makes a man feel good.

Some Recent Distinguished Visitors

H. L. Wilson, the vice-president and general manager of the Columbia, accompanied by Louis Sterling, the London manager of the company, spent a few days in Boston lately; and Mr. Sterling was most interesting in his recital of some of the German bombing atrocities perpetrated on London. While here Mr. Wilson and Mr. Sterling were entertained by Manager Fred E. Mann. Another local visitor from New York, too, was F. K. Pennington, assistant general sales manager of the Columbia.

Geo. Lincoln Parker Honored

Local Edison dealers were quite delighted at the honor that came to George Lincoln Parker, of the Colonial Building, in being invited to preside at the sessions of the Edison dealers. It was known in advance that Mr. Parker would make a good presiding officer because of his

Victor Dealers In New England Territory

can rest assured that EASTERN VICTOR SERVICE has their interest individually at heart, particularly with respect to the securing of Victor stock. Our aim is to help the Victor dealer make the most of the existing conditions.

EASTERN TALKING MACHINE CO.

177 Tremont Street

BOSTON, MASS.
many qualities which would serve him in good stead in such a position, one that invariably tests a man's tact and good judgment.

**Doing the Best to Please All**

Wholesale Manager William Fitzgerald of the Eastern Talking Machine Co., these days is called upon to exercise all the suavity of manner he can muster because of the letters and phones and wires which he receives complaining or demonstrat- ing at the poor service received by dealers. This is all due to the scarcity of goods, a fact which dealers do not seem to appreciate, for having placed a good sized order they think they should receive, if not the whole consignment, at least a large proportion of it, which is not always possible these days. So Manager Fitzgerald is doing the best he can and trying through amiability and diplomacy to minimize all alleged grievances, which, one may add, he is doing quite satisfactorily.

**Interesting Many in the Vitanola**

A very good May is reported by the New England Vitanola Talking Machine Co., which has local offices at 52 Chauncy street. Harry Bergson, the treasurer, has been able to interest a great many persons in the Vita-Nola proposition and to-day many furniture houses and periodical stores are carrying this line. All of New England is covered from this headquar- ters here and the two traveling men, James Birnslough and J. S. Whitney, are finding business good throughout the territory.

**Will Soon Join Uncle Sam's Forces**

Fred L. MacNeill, the affable young manager of the talking machine department in the R. H. White Co.'s department store, expects to be called into service soon as he is in the present draft call. He is hoping to be able to get in a week's vacation before starting in upon his duties for Uncle Sam. Mr. MacNeill has been able to show some good business lately, and a sale of Edison machines and records recently advertised in the daily papers brought many customers to the department.

**Attended Edison Convention**

Francis T. White, manager of the Victor and Edison departments of the C. C. Harvey Co., is over in New York for the Edison conven- tion. Ernest A. Cressey, vice-president of the Harvey Co., also went over, he being interested in both the Edison and the piano conventions.

**New Brunswick Dealers**

F. H. Walter, of the Brunswick-Balke-Collen- der Co., returned to-day from Pittsburg, whither he went to sign up Rice & Kelly, of that city, who are to carry the Brunswick line. The com- pany has installed handsome quarters for the display and demonstration of the Brunswick machines. Mr. Walter also has signed up the Bruck-Tarr Co., of Providence, R. L., and this concern, too, has made ready to handle the Brunswick machines under the most attractive conditions. Mr. Walter is leaving to-night for New York for the convention to remain away until the end of the week.

**Henning Enters the Navy**

Edward Henning, Victor retailer at Egleston square at the south side of the city, has entered the navy. Prior to his enlistment in the serv- ice he sold his stock of Victor goods to Harry Bashir, at 324 Blue Hill avenue, and the latter is now operating at this location as a Victor re- tailer.

**Reports a Good Business**

Walter Gillis, manager of the Victor depart- ment, lately handled by the Henry F. Miller Co., reports a very good business for May, and he has been called upon to furnish quite a num- ber of packages of records for families about to start on summer vacations. Mr. Gillis hears frequently from his son, Walter, Jr., who is with the 101st Engineers at the French front.

**Attended Edison Convention**

L. H. Ripley, F. S. Boyd, Gay R. Coner and T. E. Dean representing the traveling staff of the Pardee-Elkonberger Co., went over the first of the month to New York for the Edison con- vention. They had planned to go by the out- side line, but at the last moment changed their mind and took the train. Two days later Man- ager Silliman, of the Boston headquarters, went over to New York to attend the Edison con- ferences.

Ralph W. Longellow, manager of the Victor and Edison departments of Chickering & Sons, was numbered among the Boston men who at- tended the Edison convention. One of Mr. Longellow's recent appointments as a new at- tache of his force is William Sundell.

**Dealers Hear Evan Davies**

A dealers' meeting held a while ago at the quar- ters of the Columbus Co. in Federal street brought together a company of about 125 men.

**Oldest and Largest Manufacturers of Talking Machine Needles in the World—There are several reasons**

and women who listened with the greatest delight to Evan Davies, one of the Columbia artists, who entertained with songs and monologues. Manager Fred E. Mann presided at the entertainment and played Mr. Davies' accompaniments with rare artistic finish, for Mr. Mann is a musician of distinction. O. F. Benz, who is connected with the sales department, came over from New York, and gave an instructing talk on records, which furnished the dealers with a new insight into this department.

Some Other Columbia Happenings

M. H. Hanson, concert manager for Riccardo Stracciari, the Columbia baritone, who is one of the Chicago Opera Co. members, was in town a few days ago making the preliminary plans for a concert to be given in the fall by this artist. He was a Columbia caller.

The many friends of "Billy" Parks, of the Columbia, who went to Baltimore some time ago, received the joyful information a few days ago that he has become a proud father, the heir to the father's business ability and good nature being named William Scott Parks, Jr. There's still time to enjoy a smoke, Bill.

H. E. Gardiner, who has lately joined the sales department of the Columbia, is spending a week at the Boston offices of the company.

Thornton Burgess, the Columbia artist, came over to Boston a few days ago for the opening of the children's educational department at the Shepard Norwell Co.'s store. In his story telling he was accompanied by a Columbia machine. Mrs. Grace Drysdale, of the Columbia's educational department, was on hand to assist. Diplomatic J. A. Frye

James A. Frye, the business promoter for the Victor, passed through Boston a few days ago. Mr. Frye is spending much of his time throughout New England territory, and he has many intricate business problems to settle, which the trade says he is doing with rare judgment and satisfaction to all concerned.

Manufacturers—Jobbers—Dealers

PERFECTION FLEXI-TONE. reproducers attached to PERFECTION ball-bearing tone arms No. 3 and No. 4 play all liberal cut records, on all types of Edison machines. Made in nickel and 24 carat gold finish, extra fine quality.

Tone arms fitted to Edison machines only

These reproducers and arms are the very finest made mechanically. The PERFECTION FLEXI-TONE reproducers are the most perfect phonograph reproducers built, reproducing all lateral cut records, from highest pitched soprano to lowest pitched bass, as perfectly as the records were recorded in the recording room. Wonderful clarity of sound, as well as great volume. Extra fine quality of finish guaranteed. Manufacturers, jobbers and dealers will find in this line of reproducers just what they have been looking for, as they are assembled by skilled workmen especially adapted to this kind of work, producing a product built with watchlike precision.

All accessories in stock ready for immediate shipment. Write for prices, information, etc.

NEW ENGLAND TALKING MACHINE CO.
16-18 Beach Street
BOSTON, MASS.

SONORA IN NORTHERN NEW ENGLAND

Many Important New Agencies Announced by W. B. Glynn Distributing Co., Who Cover This Important Business Territory

The W. B. Glynn Distributing Co. for the Sonora phonograph in Northern New England have recently placed this well-known instrument with the following concerns in Maine: the Bussell & Weston Co., Augusta; Maine Music Co., Rockland; Larose-Marcoce Co., Lewiston; D. T. Pierce & Sons, Bath, and Jas. Fenderson & Son, Biddeford; the following houses in New Hampshire: the J. E. Lothrop Piano Co. Dover; F. F. Meader, Rochester; Carey Furniture Co., Ashland, and these concerns in Vermont: the Remington Furniture Co., Rutland; the Bailey Music Rooms, White River Junction. These are all representative concerns, who are splendidly fitted to display the Sonora to the best advantage.

COLUMBIA LINE WITH BAILEY CO.

St. Johnsbury, Vt., June 5—Aldege L. Bailey, president of the Bailey Music Co., leading piano dealers in northern Vermont and New Hampshire, have lately added the Columbia line to their store in this city. This line also has been added to the company's stores at Hardwick and White River Junction, Vt., and Lancaster, Berlin, Littleton and Colebrook. N. H. The Vermont stores are under the management of G. R. Magoon, while the New Hampshire stores are supplied through the Portland, Me., branch. The Columbia line has been taking very well with the patrons of the several establishments.

NEW UNIVERSAL TONE ARMS

Are Now Being Marketed by the New England Talking Machine Co.

Boston, Mass., June 1—The New England Talking Machine Co., 16-18 Beach Street, are now ready to market their new Universal tone arms, models 7 to 10, inclusive, together with the new Furn-ton amputers 6 and 7 that are attachable to all Universal tone arms. Many manufacturers, especially those interested in the reproduction qualities of the Furn- tone and its high popularity in the trade are a large feature of these tone arms and reproducers is on hand, which assures immediate delivery of orders. Descriptive advertising matter has also been prepared.

TAKE ON THE COLUMBIA LINE

Burlington, Vt., June 5—The McAuliffe-Pope Co. of this city, has taken on the exclusive line of Columbia products which gives the company a place in good representations in this city. Here is being the E. E. Clarkson Co., which is the principal department store of Burlington. Mr. McAuliffe recently went to Boston to inspect the latest in the Federal street department, and was delighted at the methodical, shipshape arrangement of everything, and with the ease and way business is dispatched, thanks to the careful system maintained by Manager Mann.

D. A. Ingalls, the Columbia's traveling associate for Vermont, has moved from Springfield to this city. Mr. Ingalls has been with the company two years, and he has placed the Columbia's excellents in the Green Mountain State for the Columbia line.

RUTLAND DEALER EXPANDS

Rutland, Vt., June 5—The Tuttle Co., of this city, has taken over the goods of the Columbia Co. and has opened a special shop next door to its printing and stationery establishment. Mr. and Mrs. M. O. Tyrrell, who have been the Tuttle agent for several years, have taken the new place, under the name of the United Talking Machine Co. For jobbing purposes the Tuttle Co. is carrying the Patfire line. The opening of the Columbia store was seized upon by the city, and the Boston headquarters was represented by F. Carr, who went up especially for the opening, while D. A. Ingalls, the company's leading representatives, was also on hand for the event. In the several weeks that the shop has been in operation the Columbia line has received its share of recognition.

INSTALL FULL VICTOR LINE

Worcester, Mass., June 3—The firm of Barnard, Sumner & Putnam Co., Main street, has lately installed a complete line of Victor Victorolas and records, having bought out the Victor stock held by the Worcester Phonograph Co. at 11 Trumbull street. This is one of Worcester's leading department stores, and judging by the way it has begun to interest the lovers of the Victor machines there is a big success ahead.

MUSIC FOR WORKERS

From a paper by Gordon Gray, a writer on sociological questions, we select the following paragraphs:

"Music is mixed in nearly all work mixed up; but, on the whole, harmony is the antithesis for monotony.

The way to drain off life's drudgery is to drink from the fountain of melody. Take all you want. Musical interludes have no harmful aftereffects.

"The world needs more lifting music and less alcohol. Turn on the phonograph and turn off the spirits. Give the workers more and better bars of music and fewer of the bavarian sort. Work accompanied by music is more productive.

"Obviously if music can take the sweat out of sweatshops, the principle that harmony makes burdens light and easy is susceptible of wide application."
On the matter of the Price of Records

No matter what happens in the phonograph record market, you know that Emerson Records cost the least. With the constant shifting of costs it behooves every dealer to hang tightly to the line which assures him a good profit with the smallest investment.

The good, new and popular size Emerson record at 65¢ now means more to you than ever before.

65¢

Emerson

is the name which more and more is coming to mean:—Big hits; Out first; Made right. It is the record of the people. The record which fills the need of the present day. It is the only record made with the universal cut. While other records are useful on one or more machines, Emerson records are right for any machine, without attachments.

Now is the time, if you have not already, to tie up to the Emerson product.

DETROIT TRADE STOCKING UP TO MEET FALL DEMANDS

Jobbers and Dealers Admit That Stock Situation Is Serious—Hope for Improvement—C. H. Grinnell's Views on the Subject—Brown Opens Branch Store—New Columbia Models—News in Detail

Detroit, Mich., June 5.—For the next three months dealers in Detroit are generally trying to increase most of their attention to stockpiling up with merchandise that is going to sell next fall. Dealers here are extremely optimistic about big fall trade and the only question with them is: "Will we be able to get goods that we need?"

The situation here is serious and that so many conditions have to do with making the future look rather gloomy for merchandise. There is the labor shortage which is by no means improving; then again, the Government having taken over so many of the needed materials has hampered the manufacturers' production and no one looks for the manufacturers to increase production under these conditions; as a matter of fact, production is certain to be curtailed and every jobber admits that, they know it to be a fact; then again, shipments are very slow—extremely slow —whether by freight or express.

Goods on the way for weeks and weeks have yet failed to put in an appearance, and there is no encouragement that this condition will improve. It's no longer a question of being able to sell talking machines and records but merely a question of getting the goods.

C. H. Grinnell, manager of the Victrola jobbing division of Grinnell Bros., says the situation is most serious and he is more than willing that his views be expressed in The Talking Machine World. "Some of the trade papers have said we had a big stock and we want to correct this impression," he declared to the writer. "We have a good stock of old record numbers and certain styles of Victolias, but they are not the kind that are in popular demand and that are selling and we don't know of any way that they can be pushed out. You can hardly expect a dealer to push records that he has tried to sell and cannot—and the same thing applies to some of the models. The kind of Victolias that we could sell large quantities of we simply can't get except in such small quantities that they don't stay in the warehouse long enough to be noticed. Unless something is done and done quick to relieve the tense situation—giving us merchandise that we can sell—I am sorry to say that the dealers will be up against it in the fall when business really starts to boom. Even right now the demand is very strong with Victor dealers both for machines and records and the trick is to get merchandise.

What Mr. Grinnell says is no different than what jobbers all over the country have to say. One leading dealer recently showed The World a correspondant a letter he had sent out to some thirty jobbers, and every answer was about as follows: "We would like to care of you if we had the merchandise."

Wallace Brown, the Brunswick dealer, now has a branch store on Chene street in the Polish northeast section of Detroit, with a Polish manager in charge. Business there is reported as being very good. Recently several professional dancers were engaged for two days to "step the light fantastic" in the street windows. It resulted in tremendous crowds in front of the store—sneers the crowds blocked the street car tracks. It was a good advertising stunt and considerably popularized the branch. Mr. Brown, who has the exclusive Wayne County agency for the Brunswick, is planning to extend his activities to all sections of the city, giving him representation in every part of town. Mr. Brown celebrated his thirtieth month as Brunswick dealer in May—and is quite enthusiastic about the outlook.

A number of dealers told the writer that most of their talking machine sales were among the working people who were earning big money in the munition factories. "They are the real buyers of talking machines these days," said one dealer. "The wealthy people are not buying and neither are the poor people."

There has been quite a big demand for small talking machines for boats and canoes priced not over $15 or $25.

F. S. Kratzet, manager of the Brunswick-Balke branch at 247 Jefferson avenue, is not only very optimistic about future business, but says that since the department was established sales have exceeded considerably his anticipations. Of course, in Detroit Mr. Kratzet has just the one dealer—Wallace Brown—but through the State he has put on some splendid accounts of late and is getting many inquiries from every corner of the State.

The Detroit yards of some of the concerns have had a number of interesting window displays of late of warferequipment for the soldiers. One display, showing a Detroit physician just back from the fighting lines, containing many human souvenirs, and they attracted a lot of attention.

Max Strasburg, of the Max Strasburg Shop, Violins and Violas, has been a dealer here for seven years and has a larger stock than ever, he could still stand a lot more, and especially of certain models which he is finding almost impossible to get. Mr. Strasburg is in the midst of his business closer than ever—both the selling and collecting end. In other words, he is really after quality instead of quantity business. He wants to avoid repossessions and troubles later in locating anybody of doubt.

Sam F. Lind, the local Columbia branch man agent, is showing a number of new models which the Columbia have added to their line. It is very happy these days, as this year will be a record one for the local branch. In the past three months Sam has received a number of offers from machines finding folks willing to spend unlimited money to get a Columbia agency, but he had to turn them down. "We are not trying to make money more accessible, but we have to protect those already established," he said.

While I have to turn down some wonderful offers, it pleases me to know that these people are at least selected the Columbia."

Dealers selling Pathé phonographs and records are getting unusually good service and shipments, in spite of war conditions. The talk of jobbers, Mr. Williams, Davis, Brooks & Hinchman Sons—are carrying enormous stocks in their warehouses, having anticipated some time ago that there would be a time when manufacturers would of necessity slow up on their production on account of labor conditions. They report an excellent business and most satisfactory prospects.

In the recent drive for contributions to the Detroit Patriotic Fund the talking machine stores co-operated most liberally. Not only did 100 per cent. of the Detroit stores subscribe, but many of them went so far as to issue to their employees the subscriptions of their employees who pledged themselves to pay on the monthly installment plan. Mrs. the Edison Shubert, who spent over the thousand-dollar mark. The employers of Grinnell Bros. went around $7,000, while the J. L. Hudson Co. employees, including those at the local store, went on a forty-two week plan. The Buhl Sons Co. and Geo. C. Wetherbee & Co., who feature the Vita-Nola talking machine, made by the Vitarola Talking Machine Co., of Chicago, report an increased demand for these products in this section of the country. The attractiveness of the styles and the satisfactory results have won for them a special clientele.

DISTINGUISHED VISITORS TO CITY

D. A. Creed, vice-president of the Chicago Talking Machine Co., Victor wholesalers, and G. E. Haist, sales manager of this company, were visitors to New York to attend the annual stockholders' meetings of the New York Talking Machine Co. and the Chicago Talking Machine Co. and also the regular directors' meetings of the two concerns. These visitors from the "Windy City" spoke optimistically of the business situation in the West, stating that the outlook is very satisfactory, with Victor dealers closing a business that is limited only by the available merchandise.

W. I. Smith, of Schreiber, has recently secured the agency for the Edison phonograph.
SHORTEST OF STOCK RETARDS BUSINESS IN CINCINNATI

CINCINNATI, O., June 4.—A rather serious shortage of records occurred during May, this showing quite a slump in the volume of business for the month. A like condition prevailed in the machine end, which has not improved to any extent with the change in the calendar month. All the dealers report the record situation to have improved with the entrance of June.

Between lighting for sufficient supplies and trying to keep enough help around the shops the man in the talking machine field is kept quite busy these days. There is a general tendency on the part of all to anticipate some kind of a bump these days and to overcome the annoyance without the commotion a change might have caused in the old days.

The Crystalola, Co., this city, is experimenting with something new in the talking machine line. The exact idea of the change, this being an attempt to get away from the conventional phonograph atmosphere, has not been made known as yet. It is intimated that the new machine will be much more musical. The company is figuring on getting out new advertising material, one being a folder of four color covers. D. W. Martin, Washington Court House, O., has become one of the dealers for the John Chertch Co.'s phonograph, spending part of last week in the city arranging for his supplies.

A 10 per cent. increase in the price of all things that go to make up a phonograph is predicted by C. W. Neumiezer, Cincinnati, representative of the Otto Heintze Phonograph Supply Co. He believes the boost will be along very shortly. In his opinion any person building phonographs now will double his money in the next six or eight months.

"A splendid business in May" is the report of C. L. Byars, of the local Vocalion forces. He reports a substantial increase for the month of May over the same month of last year. These results were especially gratifying in view of the fact that owing to the shortage of help the sales force was operating throughout the month considerably crippled by lack of salesmen.

"It is my impression," says Mr. Byars, "that one of the most serious problems facing the retail phonograph business during the coming months is the securing and holding of men of selling ability. There is a probability that women will have to be impressed into the outside selling in the phonograph business if the dealer intends to continue his aggressive policy of following up the prospective buyers on the outside. Just how well this is going to work—out of course can only be learned through experience. As a general rule, girls do not prove very satisfactory for outside selling work, but I am inclined to think that the phonograph dealer is going to have to start a regular training course for women, and gradually train them for this class of work."

The new wholesale headquarters of the local Columbia Graphophone Co. is now a reality. The company has moved to its new quarters and is located at 427-29 West Fourth street, three blocks west of present location. The retail department will continue to operate as formerly at the old address, 117-119 West Fourth street, where the local Dictaphone offices will also be located for the present.

The wholesale department will take up six floors and the basement of the new building and will have every facility for handling all orders with dispatch and accuracy.

During the moving period business was a little retarded and Manager Dawson stated to our representative that he desired to take this opportunity of thanking the trade for the consideration extended the company during that time and to extend the hospitality of the new headquarters to all Columbia dealers.

The increase in business during the past year has made the move imperative and the outlook is greater than at any time in the past. With the enlarged quarters and adequate facilities for handling the orders, etc., Columbia "Service" is assured.

F. K. Pennington, assistant general sales manager of the Columbia Graphophone Co., spent May day at the local Columbia store injecting "pep" and enthusiasm into everyone and his usual good humor penetrated the entire store. Mr. Pennington is quite a favorite among Columbia employees and his visit was greatly enjoyed by all.

Miss Stella Green, formerly connected with the local Columbia store, has again cast her lot with the company as assistant to Manager Arrington of the Dictaphone department and was cordially welcomed by all the old employees.

William C. Wornhoff, who for some time has conducted the Phonograph Shop at 7512 Madison street, Oak Park, Ill., has rented the store at 131 Marion street, Oak Park, and has occupied the premises with a big line of Edison phonographs and Colombia Grafonolas. Plans will also be handled in the new quarters.

How the Pathé Phonograph Was Effectively Used in the Recent Third Liberty Loan Campaign in Philadelphia—Scored Big Success

PHILADELPHIA, Pa., June 2.—The Pathé phonograph manufactured by the Pathé Frères Phonograph Co. was an active factor in the recent Third Liberty Loan campaign, being used to excellent advantage by the local Liberty Loan committee. The instrument was "on duty" in front of the Liberty Statue during the four weeks of the Liberty Loan drive, and was the center of attraction during this period.

The loan committee was so enthusiastic regarding the success of the Pathé phonograph at this particular location that when the Phila-

The Difference Between

**Phon d'Amour**

and other Phonographs is resultant from difference in construction; the patented features of Phon d'Amour being exclusive.

**The Amplifier in Phon d'Amour**

is of an entirely new type and one never before used. It is constructed in two chambers, being walled about with violin wood and is constructed upon the same principle as that of a violin. Not only is the volume in "Phon d'Amour" materially increased, but this is accomplished without any sacrifice of the characteristic overtones of voice or instrument.

A POPULAR MEMBER OF THE TRADE

Joseph F. Collins, Sales Manager of the Pathé Frères Phonograph Co., Has a Host of Friends Who Are Glad to Welcome Him

We take pleasure in presenting herewith Joseph F. Collins, sales manager of the Pathé Frères Phonograph Co., and one of the most popular members of the talking machine industry. Although a young man in point of years, Mr. Collins can well be considered one of the “veterans” of the industry, for he has been associated with the talking machine industry from practically its earliest days of development and possesses an invaluable knowledge of every phase of manufacturing and merchandising.

For the past four years Mr. Collins has been associated with the Pathé Frères Phonograph Co., and in the capacity of sales manager has been an important factor in the success achieved by Pathé products. He has visited the trade in all parts of the country, and his many years’ experience has enabled him to render practical assistance to Pathé jobbers and dealers in developing a market for these popular products.

For the past year Mr. Collins has been devoting a considerable portion of his time to calling upon Pathé jobbers and working in close touch with the members of their sales forces. He has co-operated with the jobbers in the development of their Pathé activities, and has spent quite some time with the various sales staffs while they were preparing their campaigns for developing Pathé business. He is a Pathé enthusiast, heart and soul, and this enthusiasm is reflected in the fact that Pathé jobbers everywhere are frequently requesting Mr. Collins to visit their cities in order that their travelers may also be inspired with his particular brand of enthusiasm.

LINE OF MOTORS RESTRICTED

The Otto Heineman Phonograph Supply Co., Inc., has just issued the following important notice: “Owing to conditions in the raw material market, due to the necessary Government work going on at present, coupled with the scarcity of experienced labor, it has been deemed advisable to restrict our line of motors to certain types. We will supply motors No. 33, No. 27, and No. 44—this variety will cover a complete line of phonographs from small ones to the very best. By confining our production efforts in this manner, we can assure our customers the very best of service and deliveries.”

The Meisselbach division of the Otto Heineman Phonograph Supply Co. has also issued a similar notice, the second paragraph of which reads as follows: “We will supply motors No. 10, No. 12, No. 16 and No. 19 without automatic stops—this variety will cover a complete line of phonographs from small ones to the very best.”

A worthy Hindu maxim says: “Work as they work who are ambitious. Respect life as they respect it who desire it. Be happy as they are happy who live for happiness alone.”

WIDDICOMB PHONOGRAPHS POPULAR

Manager Howard Extending Agencies for This Instrument Throughout the Country—To Exhibit at National Furniture Show June 25

GRAND RAPIDS, MICH. June 5—The phonograph division of the great Widdicomb Furniture Co. here is exceedingly busy, having received very large orders from its recently-appointed distributors as well as from representatives throughout the country.

Manager E. C. Howard is highly pleased with the reception so far given his efforts to produce a Widdicomb high-grade phonograph of exceptional merit both as to tone, construction and cabinet design. The beautiful showing of art cases has in itself won many friends to the line. The company now have in preparation several beautiful new higher-priced art models, samples of which they expect to be able to exhibit at the furniture show at Grand Rapids, which commences June 25.

The company now has its phonograph production facilities fully organized and has of late been able to make very prompt shipments to its trade.

ISSUE ATTRACTIVE SUPPLEMENT

The Emerson Phonograph Co. has issued an attractive supplement featuring its new 65-cent records. This supplement has an unusually artistic cover which cannot fail to attract the attention of music-lovers who receive it in the mail from Emerson dealers, or who notice it in the dealers’ showrooms. This supplement lists patriotic hits, popular song hits and selected dance records, as the company is issuing only this class of music in its 65-cent records.

These 65-cent Emerson records are meeting with pleasing success throughout the country, and the artists recording for this library include some of the most popular artists now making talking machine records.
MILWAUKEE NOTES IMPROVEMENT IN STOCK SITUATION

MILWAUKEE, Wis., June 18.—Although not much improvement can be noted in the promptness of deliveries of machines, the situation in this regard as reported by Milwaukee wholesalers and jobbers is much better than it has been in the past few weeks. The local trade has encountered unusual difficulties in obtaining adequate stocks of records and the manufacturers themselves have partly been responsible for this scarcity, the transportation facilities being used to their fullest extent, the difficulty of producing enough equipment to meet the demands of the trade, and the inability of factories to produce them in sufficient quantities to fill orders. It is said that the number of back orders unfilled at this time is far greater than at any time during the past ten years, and the manufacturers have been forced to charge considerable freight charges. An encouraging factor in the local retail situation at this time is the determination of Victor dealers to decline to take advantage of the opening given them to dispose of old stock. No Victor dealer in Milwaukee desires to see a price-cutting war and all are agreed that the only way in which they can continue to do business is to stand firm in their demands.

The Milwaukee Association of Music Industries, recognizing the value of the sessions to dealers in talking machines as well as pianos and other musical instruments, was officially represented at a recent meeting of the National Association of Piano Merchants in New York, June 4 to 7. The delegates were Paul F. Nettl, of Piano Co., chairman; E. Parker, manager of the Edward H. Knight Co., and David J. O'Keefe, of the Harmony Co., dealer, as alternate. A special meeting of the Milwaukee Association will be held shortly to hear the reports of the New York Convention.

One of the most profound shocks ever experienced by the Milwaukee talking machine trade was the announcement made on Memorial Day of the death of Mr. George H. Kidd, one of the best-known Victor and Edison dealers of Milwaukee and the Northwest, and a pioneer in the trade. Mr. Eichholz was stricken with paralysis in the upper part of his body and died before he had time to have his arm amputated.

M. & B. Records, which are said to have been Eichholz's last contact, will continue the business.

MEISSELBACH MOTOR CATALOG

Most Complete and Interesting Volume Giving Fullest Details of the Meisselbach Line

The Meisselbach division of the Otto Heineman Phonograph Supply Co., has just issued a handsome catalog featuring the motors, tone arms and sound boxes that comprise the Meisselbach line. This catalog is complete in every detail and is particularly worthy of praise for the clear-cut illustrations that are featured and the detailed specifications that accompany each illustration.

The Meisselbach motor has for many years been one of the most popular and successful motors in the talking machine industry, and has won recognition as a dependable motor that can be used by the manufacturers of high class machines with every confidence in its ability to render service and satisfaction. Among the Meisselbach motors that are presented in this new catalog are motors Nos. 9, 10, 11, 12, 15, 16, 17, 18 and 19. All of these motors are specially adapted for use in their respective fields, and in addition to featuring illustrations of the motors together with specifications, this catalog also shows the component parts of each motor with their designated numbers so that duplicate parts may be ordered with maximum convenience and ease.

There are also listed in this catalog some of the popular Meisselbach accessories, including speed regulators, turntables, turntable brakes, windin cranks, etc. Two pages are devoted to the Meisselbach Universal tone arms Nos. 97 and 95, which have achieved signal success, and another page shows the Meisselbach sound boxes, jewel needles and attachments.

The foreword of this catalog gives an interesting history of the Meisselbach motor and some of the fundamental qualities that characterize this product. Several paragraphs from this foreword read as follows:

"For thirty years A. F. Meisselbach & Bro. (taken over in May, 1917, by the Otto Heineman Phonograph Supply Co.) have been manufacturing high grade mechanical devices. In the production of mechanical devices, it is essential that the design, good materials, ability of the workmen are important, but in a large experience which have gone into the dimensions and tolerances of the parts of the product. It is because of these thirty years manufacturing a large number of items of highest class that in today's factory is able to turn out a phonograph motor of the highest excellence in every part, and to have a finished product that it is essential that the phonographs scientific and can be expected to meet the severe requirements of the highest class of export orders. A. F. Meisselbach & Bro. have for many years been the leader in the production of notable accessories largely because of the expert guidance of their capable and the experienced inventors, and mechanics that have been associated with them. The best optical and technical experts of the country and continuously worked with the inventors and designers of the Meisselbach products with the result that no item in any field has been put out which has not been subjected to the highest scientific and practical tests.

While the firm has produced items used in many branches of the industry, they have made a special study of the conditions and the requirements of the phonograph motor, and have in this line, made many advances, and have produced a motor that has with a few parts, they have produced a motor that has proved its worth by the satisfaction of many customers.

This reputation has actually been obtained, and is being in every way satisfied and improved upon by the general organization.

"No piece of mechanism produced, not even a watch, is called upon to meet so many exacting and practical requirements as a phonograph motor. It has to meet not only the demands of the laws of mechanics, but also those requirements of the laws of music. It must harmonize with the greatest mechanical devices and yet must be able to endure the handling of the most imperfect and rough person. For satisfactory musical reproduction the motor must turn the turntable with absolutely perfect rhythm. A shade of hesitation throws the music entirely off key, and the rendition is spoiled. Absolute perfection of speed regulation is therefore imperative. Silence in operation is another imperative condition. Any clicks or grating or vibrations in the mechanism will be promptly noticed by the customer, and you are only two of the many unslept specifications imposed upon the motor maker in the making of which this factory has successfully devoted their efforts."

"Meisselbach motors are superior in operation, super-steady in regulation, super-silence in construction. They wind daily and silently, are long playing, and in every way eliminate for the phonograph owner all mechanical worries. The smooth running of these motors is guaranteed, and all resultant harmonies and melodies correctly reproduced. The motor is the heart of the phonograph, and the firm's entire concern is devoted to the correct and smooth running of the phonograph motor."

The order of the Australian Controller of Customs, requiring a full statement in the invoice covering shipped to Australia of the value of those goods in the country of exportation at the date of the invoice is to be strictly enforced after June 30 on all shipments subject to ad valorem duties, according to a statement of the official representative of the Australian Department of Trade and Customs in this city.

JENKINS USING MOTOR TRUCKS

Kansas City Music House Solves Transportation Problems by Inaugurating Delivery by Motor Truck to Its Various Branches

Kansas City, Mo., June 1—The initial step toward utilizing the highways as a means of reducing the burden of railroad transportation of freight was taken by C. J. W. Jenkins' Sons Music Co., recently, when a G. M. C. truck made the trip to Tulsa, Okla., carrying a load of one of the Jenkins Delivery Trucks of merchandise. The trip was made in good time, over good roads, and no difficulties were encountered.

A. J. Cripe, manager of the Tulsa branch of the firm, found that in order to give better service and actually cover his rapidly growing field it would be necessary to have a truck for delivery and transfer work. With this in mind, W. H. Cannon was sent to Kansas City and given a two weeks' course in handling pianos. The company, which has a squad of seven G. M. C. trucks to take care of the heavy delivery and transfer work here, then provided a similar one for the Tulsa branch, loading it with two pianos and a full equipment for transfer work, such as derricks, block and tackle, grand boards, etc. On the sides of the truck were large signs bearing the insertion, "Our Own Truck Line, Kansas City to Tulsa."

Mr. Cannon started Monday morning, May 20, at six o'clock, and arrived in Tulsa Tuesday evening without any mishaps.

NEW COMMITTEES ARE APPOINTED

At Meeting of Executive Committee of Talking Machine Men, Inc.

A meeting of the executive committee of the Talking Machine Men, Inc., held last month the following committees were appointed by President Coughlin:

Outing committees: Messrs. Leins, Gahuche, Lazarus, Birns and Hunt.

Legal committee: Messrs. Mielke, Kurtz and Leins.

E. G. Brown, of Bayonne, N. J., was elected secretary.

Willingness to learn from others displays intelligence.
Columbia Grafonola

in Period designs

JUST as Columbia Records give you the best music of all ages, so Columbia Grafonolas bring you the most beautiful designs of all artistic periods. More than ever American women are giving careful attention to the harmonious furnishing of their homes. In response to a genuine need, the Columbia Grafonola has led the way in worthily adapting to the uses of good music the best designs of the world's master craftsmen.

THE originals of the twenty-three Period Grafonola designs now available are among the chief treasures of American and European art museums. All artistic periods are represented, from Gothic and Elizabethan to Adam and Chippendale. Thus you may be sure of obtaining a design that will fit in with the decorative treatment of your home.

These Period Grafonolas have a superb richness of tone—full, smooth, and pure, as the music floats out through the silken inter-spaces of lattice or grille. All are electrically equipped, the motor starting and stopping automatically. As musical instruments, no less than as artistic cabinets, they are worthy of a place in any home. Prices of Period Grafonolas range from $250 to $2100; Standard models from $18 to $250.

A handsome illustrated catalog of Period Grafonolas sent upon request.

RECORD TRADE ASSUMES LARGE DIMENSIONS IN ST. LOUIS

Demand for the Past Month Has Exceeded All Counting More Than Ever—Details of Mailing Division—Novel Check on Record Publicity

St. Louis, Mo., June 5.—The talking machine business went through the Red Cross drive in this city and the first "over the top," in splendid shape, but according to recent reports there followed a hill after that, lasting until the first of June, when business again began to pick up. But despite the let-up and the stock-in-trade of machines of particular sizes, a number of the houses report that May of this year will exceed all other May's.

The month has been remarkable for a record, however. None would have predicted such a thing two months ago when, with sizes then broken, it was brought home to the dealers that there were to be fewer machines manufactured than for many months previous. Dealers then imagined that their totals would shrink immediately, but they did not forecast the record demand. A number of dealers in the city are now selling more records monthly than the total of their machines and records three years ago, and some are selling more records than machines, in figure.

The record business is a curious proposition. The people have money and they are bound to spend it and they, apparently, want music. They could have bought anything from dead set on record at $2.50 the number they have seen advertised recently but which is out of stock. There are a few salesmanship with the proverbial demonstrator. F. H. Seidel read a paper at a Tri-state Victor Dealers' Association meeting in which he outlined, taking several current records as samples, how music records were like new ones, and told of incidents in which older records had proven the first choice when heard in contrast with the new ones. He suggested this because often it is impossible to obtain enough of the new records to meet the demand. A number of dealers recently have been bringing this fact before their help and the result has been astonishing in the selling of what was considered dead stock and selling records of which jobbers had a supply. Dealers who handle several makes of records are having these listed as to common numbers, so that they can meet the demands from the most ample stock and still satisfy the customer. Sometimes a customer insists in having the record asked for or none and goes elsewhere but the chances are that if he is a few days late in asking for a popular record, some one will get the chance to substitute for him, for the stocks of those records which strike the popular fancy are quickly exhausted, as the distribution is practically equal.

Salesmanship in machines now is counting more than it ever has before, because all local stocks are broken on certain sizes and finishes which are those chiefly in demand, and the task becomes that of turning the customer to something in stock, perhaps to another make, for the exclusive dealers are becoming fewer daily. Practically all of the larger dealers have a second line and some of them are buying on the market lots of machines that appear to be satisfactory, regardless of the name. Manager Staffbbeck, of the Hellrung & Grimm House Furnishing Co., Pathé jobbers, has organized a mailing division which he has placed at the disposal of his dealers. The plan is that the dealer supplies the names, the mailing division will prepare the monthly supplements, special releases and other record advertising, all with the dealer's imprint, and address and stamp them and deliver to the dealer by parcel post. All the dealer has to do is to break the wrappings and place them in the postoffice. The idea of sending them to the dealer in package is to give him the advantage of the local postmark and to assure him that the work is being well done. This mailing division has been established to meet the complaints of dealers that they have not the extra help needed to get out the monthly bulletins when they come. As help becomes harder to get, few small establishments have any elasticity in their working force, most forces being driven to keep up the regular work, consequently the bulletins lay in the corner until too old. The mailing division is scheduled to work at cost and it is believed that after the merchant has paid for the work and stamps, he will not neglect the mailing.

Manager Guttenberger, of the Vocalion department, at Aeolian Hall, says that the newly established Jobbing department is meeting with extraordinary success. The recent improvements in the Vocalion and the fact that there is a Vocalion record is making a big hit. He says that already a number of persons have come into the store to hear Vocalion records played on a Vocalion machine, saying that while they do not own a Vocalion, they have heard of this record and are anxious to hear it. The later comment never indicates a disappointment, but many go out of their way to praise the product.

Manager Irby W. Reid and wholesale manager Salmon of the Columbia Co. visited the Columbia factory last month to see what was doing and to get a better understanding of the trend of the trade from a higher up viewpoint. They returned well satisfied with the prospects and were kept busy for a number of days catching up with the business. The Columbia jobbing trade is especially pleasing and deliveries have been of a good average up to date.

Customers are the only trouble at the Mozart factory, according to President Fitzgerald. And the trouble with customers is that there are so many of them and they want so much. Trade has been exceedingly satisfactory and the factory has overcome the handicap of the fire, of some months ago, and is doing wonders toward meeting the demands.

Albert Vogel, for eight years a member of the talking machine staff of the Thibes Piano Co., joined the Marines and left June 4 for training camp.

General Manager Goldberg and Retail Manager Schlafe, of the Silverstone Music Co., attended the Edison convention in New York this month. President Silverstone is going in for golf, motoring and other pastimes that keep him outside much of the time in an effort to get his strength back. He is again feeling in very good health, but has been warned by his doctor not to get too anxious to get back at work.

Manager Ditzei, of the Famous & Barr Victoria department, tried a novel means of checking record advertising. He selected a record not on recent current lists, described it as to music and other features at considerable length, but he took especial pains not to mention the name of the record or give any wide clue to the name. The result was rather satisfactory. There were numerous telephone calls from persons wanting to know what the name of the record was, some informing him that he had spoiled the ad by forgetting to put in the name and other persons frankly came to the department and said their curiosity had been aroused and asked that the record be played for them.

The Kieselhorst Piano Co. is completing the housing arrangements for the two lines of records, Pathé and Columbia, recently added to the Victor as on sale there. The adding of these two lines is going to make the first floor rather crowded for the present, but as soon as men can be spared from more important work, additional record sale space will be provided.

The announcement made the middle of the month that Vocalion records were on sale at Aeolian Hall led to a very satisfactory demand from Vocalion owners. The verdict reported by purchasers was more than satisfactory—"It was extremely pleasing"—according to Manager Guttenberger.

Ben S. Philips, for a long time a salesman and later retail manager for the Columbia Co. here, is on the Vocalion staff at Aeolian Hall. The Vita-Nola talking machine made by the Vitanola Talking Machine Co., Chicago, which is featured locally by the Rice Stix Drygoods Co., the Witte Hardware Co., and the Phoenix Furniture Co., is in excellent demand.
Why—the B&H Fibre Needle?

Because it is:
   The needle that *cannot* injure the record.
   The needle that is absolutely *silent* on the record.

Because it is:
   The *logical* needle.
   The *practical* needle and
   The *commonsense* needle.

Furthermore it is:
   The needle that sells itself—that sells records
   and prompts the purchase of Talking Machines.

Finally, it is:
   The needle that satisfies the customer and

Featuring the Musical Possibilities of the Talking Machine

By William Braid White

[Note.—This is the sixteenth in a series of articles on the general subject of the musical possibilities of the talking machine. Each article in the series is to develop a new set of possibilities from all angles, thus opening up fields for sales expansion otherwise neglected wholly or in part.—Editor.]

GEORGE FREDERICK HANDEL

The periscial fuss-button might insist on writing it "Georg Friedrich Haendel," but a man who spent only one-third or less of his life in his native Saxony and more than forty years in continuous residence within the limits of the British Isles, who became a naturalized Englishman, spoke, thought and wrote English only, and who composed music in a style peculiarly and characteristically English upon themes which only Englishmen could at the time have relished, can hardly be called aught else than an Englishman. Such George Frederick Handel undoubtedly considered himself and such his whole marvellous career has proclaimed him ever since to be.

It has been said that no one man has ever had a more extraordinary influence upon the social life of his community. To this day British and the American social life has been animated by Handelian influences in ways unsuspected ways. The oratorio of "The Messiah" has formed the most important element in the art-feelings of uncounted thousands of English-speaking people for nearly four hundred years; and its drawing power is as great to-day as ever. The dead are buried to the accompaniment of the "March from Saul," the living sing the hymn-tunes of Handel, the great are welcome with the strains of "Hail to the Chief" and the musical daughters of uncounted proud parents have struggled through the lambent light of "Lascia chio pia tangia" and "Angels ever bright and fair."

"The Messiah"

Each Christmas time, in innumerable towns and cities of the United States and Great Britain, great choral societies and humble church choirs alike are to be found giving, wholly or in part, the immortal measures of "The Messiah." The music of Handel is literally the most Anglo-Saxon music that can be imagined and we are perhaps not without justification if we claim Handel for ourselves and declare to be ashamed of our pride in him.

Naturally, the recorded music of Handel available to the owners of talking machines is considerable in variety and particularly good in quality. Naturally, also, the interest which the dealer should have in becoming acquainted with Handel's music more than superficially, and in promoting its steady sale, ought rightly to be very large. Hence, some of the very interesting facts about an intensely interesting life and its musical product may rightly claim a place here.

Youth

George Frederick Handel was born at Halle in the year 1685, and was therefore contemporaneous with J. S. Bach, who first saw the light during the same year in the little town of Eisenach. The young George Frederich had for father a worthy but sadly prosaic surgeon, who, by living simultaneously became the trade of barber. It was not expected that the young boy should be destined for any calling save one of respectability and worth; but genius laughs at bonds. The lad soon found his own choice and it was music. Forbidden to learn, he discovered in the lumber room of his home, hidden away in an attic, an old broken down spinet. This he secretly taught himself to play. There is a well-known picture by the British artist Dicksee showing an attic room at midnight and at its door a troop of half-dressed, half-frightened people who have burst in carrying candles and a blunderbuss. The candle light falls on a slender child seated before a spinet, and the title is "The Child Handel." That was the beginning of one of the most remarkable careers the world has yet seen.

The worthy Doctor Handel did not without much reluctance, after much persuasion, agree to permit his son to follow the beggarly profession of music, as he sincerely thought it to be. But a fortunate accident, leading to the child's talent being brought to the attention of the Doctor's princely employer, settled young George's fate and from thenceforth he was devoted to the study and practice of the divine art. His early career was not very exciting and about all that need be said about it is that young Handel made himself the best organist and very nearly also the best harpsichordist of his age, while he likewise became no mean performer on the violin and could even sing quite respectably. He was organist at the university of his native town, when only fourteen years old, and when his father died about this time began to support himself wholly from his musical earnings. In the year 1705 he actually composed and brought out, though without much success, two operas in the then prevalent Italian style, thin and insipid enough in all conscience, but remarkably productions for a boy. But greater work was in store for him.

Italy

In those days the music Mecca was Italy. There the best singers, instrumentalists and composers were to be found, in generous quantity. Young Handel much wanted to get over the Alps but he was twenty-one before he could manage it. Once there, however, II Sassone (The Saxon) as he soon came to be called, swept all before him. His extraordinary talents astounded the Italian virtuosi and made for him a fame that reached from one end of Europe to the other. His early ventures in Italian opera were further extended during this stay and he for a time became quite Italianized. But this phase of his career was to be only incidental.

"Signor Handello"

In the year 1710 Handel, who had meanwhile become court-musician and composer to the King of Hanover, obtained leave to go to England, whither he had been invited on the strength of his now European reputation. He was to compose for his debut an Italian opera and it is a significant commentary on the artificiality and insipidity of public taste that it was thought proper to introduce him as Signor Handello, not as Mr. Handel. In fact, Handel was nicknamed both Mytheme Handel and Signor Handel later on during his British career, but these were rather affectionate pet-names. "Signor Handello," however, meant that a composer had no chance unless he was an Italian or supposed to be one. England has not always been free, in later days, from this affection. Good honest Dan Foley, one of the finest Irish singers that ever lived, thought it well to call himself Signor Foli, and then there was Signor Sullivan, otherwise Tim Sullivan, bless him!

Anyhow, the "Signor" came to London and found that the enterprising Aaron Hill, who had taken the new Haymarket Theatre and was putting on a season of the fashionable Italian opera, had already let it be known that the Signor would have a new original opera ready for the opening; which was all of fourteen days off! Handel set to work and got it out, and the result was Rinaldo; certainly the finest thing that had ever been done of its kind and one which abounds with still lovely music. Of course, a modern opera audience would find Rinaldo dreadfully tedious, simply because taste has changed and we no longer can sit through an interminable series of recitatives and set airs. Still, you will find recorded in each of the leading catalogs, the gem of the opera "Lascia ch'io pianga," sometimes Englished as "Mid night lurs, mid pleasures," sometimes called "Leave me to languish." Look for it under Rinaldo and you will find it in the Victor, the Columbia and the Edison catalogs.

This record, whether you take Schumann-Heink's, Julius Caesar's or Adelaide Fischer's interpretation, gives a perfect example of the ancient style of Italian operatic music. It consists of a recitative followed by an air. A recitative is a short declamatory passage in which some point vital to the story is brought

(Continued on page 54)
out. It is a simple melody intoned by the voice and set to words that explain the stage of the action reached. The voice sings with no accompaniment save that of an occasional chord brought in to give emphasis and support. This is followed by the air or song proper. In the case we are considering, the air "Mid lures, mild pleasures" is one of the loveliest melodies ever written by man. Its sweet stately beauties are as fascinating to-day as when they were written more than two hundred years ago. It makes a lovely record and all should know it.

Of the many oratorios that Handel composed during the next few years, not one survives, but the indefatigable recorders of music have preserved for us the well-known so-called "Handel's Largo" which is in reality an air from his opera "Ariodante." (Classical themes were favorites with opera-makers in those days.) This has been sung, played, orchestrated and banded till everybody knows it. Several good records of it in various forms are available.

**Tweddlethun and Tweddledee**

From merely being a composer, Handel became in due course a manager. Now, grand opera management has always been a sure road to bankruptcy except where wealthy guarantors or government subsidies have smoothed the way. So Handel, after his final settlement in England for keeps after 1718, found himself in due course stranded on the shore of the bankruptcy court. His troubles were largely due to the jealousies between his partisans and those of the rival managers who were brought out to ruin him. Troubles with prima donnas and high-priced tenors, the social quarrels with ladies of society that followed, and the consequent formation of a society clique determined to ruin him, led to the importation of Buononcini from Italy as a rival composer at a rival theatre. Thus London enjoyed a first-class operatic war and the town was agog with it. Dean Swift's witty, malicious tongue obtained undue credit for the clever jingle which hit off the tempest in a teapot so cleverly and besides gave two new words to the language. Everybody knows it:

"Some say, compared with Buononcini That Signor Handel is a ninny; Others aver that he to Handel, Is scarcely fit to hold a candle; Strange that such difference should be."-

The dean was not the author, but what of that.

**In the Domain of Oratorio**

The solid, honest, bluff character of stentor old George Frederick would not stand the petty stupidities of this sort of thing however, and in 1737 he found himself quite ruined in finances but in health. It was at this time that his naturally religious and quite thoroughly Anglo-Saxon nature found itself drawn towards the contemplation of sacred music as a form of composition which might give rise to words of real artistic worth and lead to the development of new and splendid musical material. The sacred oratorio is peculiarly a Handelian form of musical work and has remained almost purely English and American. The Anglicized Mendelssohn tried his hand at it, Pops Haydn too, and such men as Arthur Sullivan, Gaul and Gounod were proud to be associated with it. In effect, the oratorio is an opera-song without action or costume, its story based on some biblical episode, with words drawn from the scriptures and music of appropriate character. It involves, as developed by Handel, great choral numbers and solos for tenor, bass, soprano and contralto. Its subject, as was said, is always biblical.

Judah Macabees, Israel in Egypt, Saul, Judas, Joshua and a number of others followed in succession from Handel's pen. Beginning with his first experiment in setting the story of Esther, he continued, in face of many disappointments, to persevere in his chosen work, till he burst upon the world with the immortal, forever glorious "Messiah," composed in the extraordinarily short space of twenty-one days, and first sung, not in the London which had irritated and routed his genius, but in Dublin, where his friend, the Duke of Devonshire, was Lord Lieutenant, for the benefit of the prisoners for debt confined in the city's Marshalsea.

**Immortality**

Performed with a handful of singers and a small orchestra the success of this extraordinary work was so profound and overpowering that Handel's waxing fame was restored in an instant. Since that year, 1742, "The Messiah" has been performed almost annually on the largest scale. Since the great Handel festival of 1784 in London, the choirs have become larger and larger. Crystal Palace performances in London have massed five thousand voices of choral and five hundred instruments of orchestra, with a great organ to boot, before audiences numbering ten thousand and more. The Handel and Haydn Society in Boston, for a century last, has faithfully fulfilled its task of keeping green the memory of this marvelous work. Oratorio societies in New York, in Chicago, in Cincinnati and elsewhere have never ceased to carry on the good work; and to-day the man, woman or child within range of a musical center who has not heard "The Messiah" is somehow, one feels, defective.

**Push Them**

In the circumstances it is not absurd that every dealer does not push to the limit, especially during the winter months, the sale of Messiah and other Handel records? Between the Victrola, Columbia and Edison catalogs one can make up almost the entire Messiah. The immortal airs "He Shall Feed His Flock," "I Know That My Redeemer Liveth" and "The Trumpet Shall Sound," the distinctly inspired choruses "The Glory of the Lord" and above all "Hallelujah," have been splendidly recorded. Thus the most dweller in the wilderness may become acquainted with the wonders of Handel's genius. It is said of him that, in his later years, he used to tell, in his quaint English, about when he was composing the "Hallelujah," "I did tick the beam was opened and the angels and archangels ascending and descanting." Who can wonder?

**Westminster Abbey!**

Handel died in London at his house in Brook street, in the year 1759, at the age of seventy-four. For some years he had been blind, but he continued to direct performances of his oratorios till almost the end. He was given a public funeral, and buried in Britain's Pantheon, Westminster Abbey, near the bodies of Addison and Steele, of Johnson, Goldsmith and Garrick, among such a glory of illustrious dead as perhaps no other so small spot on earth can boast.

**In Handel's House**

My friends called me Handel-worshipper. One might have worse titles to consideration. Perchance the fault, which I cheerfully own, is really ineradicable; for my father was married in Handel's house in Brook street, where the grand old man lived for the last twenty years of his life. There in that fine old place still may be seen the very recess where his organ was placed, the very room in which he worked. Most of our family were born in that house. Is it any wonder we love his memory?

**AN ARTISTIC WINDOW DISPLAY**

The Emerson Phonograph Co. has prepared for the use of its dealers this month an artistic window display service which is the most ar-
Here Is the Greatest Phonograph Proposition In America Today

The newest discovery in tone reproduction, the long horn, entirely of wood and of saxophone design, with the sound chamber at the bottom, an exclusive, patented feature and a tremendous selling advantage of the

PURITAN

THE FINAL SUCCESS AMONG PHONOGRAPHS

More money is being made in the phonograph industry today than ever before in its history. But to get your full share, you have got to carry an instrument whose real advantages stand out among the many lines now being offered.

The Puritan offers you the biggest opportunity in the field today. Its long horn is the greatest and newest discovery in tone reproduction. It makes true and lifelike the music of the greatest vocalists and instrumentalists on earth. The sound chamber at the bottom is another advantage—based on the scientific fact that sound waves rise. That is why the real music lovers at the opera sit in the balcony.

The charming convex cabinet design is another exclusive Puritan feature. And you have in addition a line of superior Puritan Records made in our own recording laboratory. The Puritan plays any disc record made. Retail prices range from $85.00 to $350. Write, wire or phone for details of our attractive proposition.

United Phonographs Corporation, Sheboygan, Wis.
Let Columbia help you make your windows work. Plenty of fine display material ready now on the Portable Grafonolas. Write for information.

Columbia Graphophone Co.
NEW YORK

BANQUET OF BLACKMAN TALKING MACHINE CO. STAFF

Employees of Victor Wholesalers Enjoy Ninth Annual Get-Together Party at Murray's on June 1
—President Blackman Recites Record of Long Service—Some of the Guests

The ninth annual banquet of the employees of the Blackman Talking Machine Co., New York, Victor wholesalers, was held Saturday, June 1, at Murray's, and was attended by the officers, employees and several invited guests. It had been originally intended to make this annual event similar to the outings of previous years, as toastmaster, and in his opening address gave his employees and guests a brief résumé of the history of the Blackman talking machine. He pointed to the company's sixteenth year, and that when it inaugurated its profit-sharing plan nine years ago it was one of the very few concerns who recognized the value of such a plan. Since that time the idea of sharing profits with employees has become general throughout the country, and practically all of the leaders in the industrial world have adopted this plan.

When the company started business in 1902 the personnel of the force consisted of Mr. Blackman and one employee, Frank Roberts. Today the staff numbers thirty, and out of this staff of thirty, twenty-one members were entitled to share in the 1918 profits, including Mr. Roberts; a remarkable record that indicates the spirit of loyalty and co-operation which characterizes the activities of the Blackman force.

Delving into statistics Mr. Blackman pointed out that these twenty-one members of his staff had given the company 111 years of service. The veteran of the force, Frank Roberts, secretary of the company, has been with the Blackman Talking Machine Co. for sixteen years; John L. Spillane, assistant secretary, has been a Blackman stalwart for thirteen years; James F. Ashby, assistant treasurer, has been associated with the company for eleven years; H. C. Lansell, traveling representative, and Miss L. D. Peters, of the general sales force, have been members of the Blackman staff for nine years, and George Thau, head of the shipping department, has been a member of the Blackman force for seven years.

Mr. Blackman expressed his appreciation of the loyalty and service of his employees, and in turn assured them that each and every member of his staff could depend upon the heartiest cooperation and assistance from himself and every officer of the company. In the course of his address Mr. Blackman paid tribute to the five members of the company's staff who are now in the service of Uncle Sam, and also furnished those at the dinner with a comprehensive idea of the duty which every true American owes to his Government at this critical time. Mr. Blackman was one of the leading spirits in the remarkable success achieved by the Allied Music Trades division in the recent Liberty Loan, and has always been an active worker in behalf of all patriotic and charitable interests. His talk was enthusiastically received by everyone present, and left a deep impression on the minds of his employees and the other guests.

Two of the guests of honor at the dinner were Seaman Alexander J. Wilckens, who is now a member of the U. S. Naval Reserve Force, and Private A. D. Robbins, who is a member of the 63d Aero Squad. Both of these "boys" were formerly associated with the company's traveling staff, but are now "doing their bit" for Uncle Sam. Three other members of the Blackman forces are also fighting for democracy, including Lieutenant James H. Giles, 104th Field Artillery, who is now "on service in France"; Private C. N. Callanan, Aviation Training Camp, and Private Paul Wordsworth, Ordnance Department. Senators Wickens and Private Robins gave informal addresses which met with hearty applause.

On behalf of the officers and employees Fred P. Oliver, vice-president and general manager of the company, expressed to Mr. Blackman the sincere appreciation of every member of the staff for the spirit of affection and good will which Mr. Blackman has sponsored in his organization. Mr. Oliver bespoke the continued loyalty of the Blackman staff, with the hope that each year's dinner would mark the closing of a successful year for the company.

Besides sharing the profits, the officers of the company, together with a number of the employees, also received dividend checks as stockholders, including Frank Roberts, Fred P. Oliver, James F. Ashby, John L. Spillane, George Thau and H. C. Lansell. The other stockholders who received dividends were Mrs. J. Newcomb Blackman, Mrs. Fred P. Oliver, Mrs. A. A. Houghton and Mrs. Irene G. Blackman.

The other employees of the company who shared in the distribution of profits were A. J. Wilckens, A. D. Robbins, E. S. Palmer, John Hanley, John Mills, Frank Tillinghast, Charles R. Marquis, Miss L. D. Peters, James Toll, Mrs. A. Miller, Miss R. Danger, Miss M. V. Johnstone, Mrs. E. Reighton and Miss V. Hiroberg.

INCORPORATED

The Prima Talking Machine Co., Wilmington, Del., has been incorporated with capital stock of $96,000.

DEATH OF DANIEL G. WILLIAMS

Veteran of the Cabinet Industry Passes Away in Indianapolis—Was Seventy-Eight Years Old and Had Been in the Trade for Forty-Five Years

The host of friends in the trade of Daniel G. Williams, "Uncle Dan," veteran traveler for the Udell Works, Indianapolis, Ind., and one of the best-known and most popular men in the cabinet trade, will learn with regret of his death at his home in Indianapolis, on May 21.

A life of remarkable activity came to an end when Daniel G. Williams passed away. This wonderful man had been sick for about thirty days, inasmuch as he was stricken with pneumonia. It was impossible at this advanced age to get his strength back and get well.

"Uncle Dan" Williams had traveled continuously for the Udell Works since 1873 or for forty-five years. In fact, he was the first vice-president of the original concern known as the Udell Ladder & Woodenware Works. Before his connection with the Udell Works he was president of the firm of Todd, Carmichael & Williams, who were in the book business many years ago on Washington street. While traveling for this concern he became interested in some original step ladder patents and prevailed upon Calvin G. Udell, then of Chicago, to come to Indianapolis and start a factory. It was the year of 1873 when the Udell Ladder & Woodenware Works was launched with Mr. Williams as vice-president.

There are but few men who live to the ripe old age reached by "Uncle Dan," and the remarkable thing about it all is that up until his last sickness he traveled over a big territory, and his last trip when he was gone for six weeks was one of the most successful he ever had. He was of that genial, jovial disposition that makes friends on all sides, but at the same time when he was on the road he was up and coming all the time, and after the exchange of courtesies it was business first with him. It is not an exaggeration to say that Daniel Williams was the best-known and the oldest salesman in the talking machine, piano, woodenware, furniture and music field.

He was born on July 18, 1839, in Cornish, N. H., and would have been seventy-nine years old on the 18th of July of this year. He joined the First Baptist Church of Indianapolis in 1853 and was the oldest member, having belonged to that church for sixty-four years. Besides the widow, he is survived by five children of a former wife, who was Miss Anna Gahbert, of Columbus, Ind. The five children surviving are Frank Williams, of Shreveport, La.; Miss Cora Williams, of Denver, Colo.; Mrs. Grace Heiney, of Waverly, Kan.; Mrs. Mamie Koons, of Indianapolis, and Mrs. Charles Greenstreet, of St. Louis.

He was laid to rest in a beautiful lot in Crown Hill Cemetery Friday morning, May 24. "Uncle Dan" Williams was an inspirer to all who came in contact with him, and his acquaintance unquestionably had a wonderful influence upon the younger men he came in contact with. He was a very hard worker—in fact, some of his best friends thought he worked too hard, but that was the way he was built. We quote from a letter received a few days ago from one of his friends in the trade: "I have had the pleasure of knowing this gentleman for forty years or ever since I was a tiny young fellow. He was an inspiration not only to everyone in this concern, but to all the people he called on throughout the United States. In all my experience I have never known of a man who was so well thought of and highly respected as Uncle Dan. Everybody that he has come in contact with will miss him."

His was indeed a life that was worth while, and, although he is gone, the memory of him will always be fresh in the hearts of those who were privileged to know him.

**SENDING "SMOKES" TO THE BOYS**

Talking machine men are good sports, and are seen to it that the boys in the trenches are getting smokes. Contributors to the New York Sun Tobacco Fund contain the names of many talking machine men, and the employees of the Victor Talking Machine Co., of Camden, N. J., are well represented. The "Smokeless Monday Club," of which J. W. Jaggers is president, consisting of employees of the Victor Co., send a weekly gift to The Sun, all representing sacrifices made by the members in order to add to the comforts of the boys at the front. Their usual Monday donation runs about $30.

**THE IMPROVED CLEANRITE RECORD BRUSH**

For Victor Victrolas

NICKEL PLATED 35c.

GOLD PLATED 75c.

Insures Long Life to Disk Records and Preserves Tone

Automatically cleans the Record Grooves and gives the needle a clean track to run in. Preserves a clear reproduction and prevents records from soon getting scratchy. Makes the Needle wear better. Dust and dirt in the Record grooves wear the Record out quickly and grind the Needle so it cuts the Record. **SAVE THE LIFE OF YOUR RECORDS.**

DIRECTIONS FOR ATTACHING BRUSH

1st. Clamp Spring Clips of Brush around Goose Neck (see 1 and 2). Place Record on Turn Table and Needle in Sound Box, Move Spring Clips along Goose Neck to a position where only outer briesles of brush will sweep the first few threads of record. Test this by resting needle in free groove of record (see No. 5).

2nd. Turn Spring Clips on goose neck to produce necessary pressure on record through yielding spring. Brush top must not touch edge of Sound Box when in operation (see correct position of brush on No. 3). Yielding Spring of Improved Cleanrite Brush eliminates danger of too much pressure on record.

TWIN CITY TRADE COMPLAIN OF BIG MACHINE SHORTAGE

Conditions Are Such That Dealers Are Worried—Hope for Better Luck This Month—Enormous Crops in Northwest Insure Big Volume of Trade This Coming Fall—L. H. Lucke Goes East

Minneapolis and St. Paul, Minn., June 6—Any one having a stock of talking machines, whether it be of Victor, Edisons, Columbias, Pathés, Brunswicks or any other standard make, will be able to dispose of the entire stock in a day or two if he will only bring the lot to the Twin Cities. Jobbers declare that the factories do not begin to supply their needs and what the retail dealers say of the jobbers because of the latter’s failure to supply machines is hardly printable in a fastidious periodical such as The Talking Machine World.

Take it in the Victor trade. W. J. Dyer & Bro., in St. Paul, and Beckwith-O’Neill Co., Minneapolis, declare that they are able and will to double their business, but the old mother company won’t let them; that is to say, will not supply the wherewithal in the shape of instruments. Then call on the Minnesota Phonograph Co., jobbers in the Edison products, G. Sommers Co., jobbers of the Pathé products, and the Northwest offices of the Columbia, and the Brunswick-Balke-Collender Co., and you hear a repetition of an ancient song: “Can’t get goods.” It is known, almost to the point of a fact, that the Northwest can absorb thousands of machines more than are being allotted to it. Every dealer, whether selling in lots or by the instrument, says so, and one is fain to believe the universal story. The policy out this way is to prepare for a big fall trade. It is realized that the Government may curtail the factory output 30 or more per cent., that freight regulation may prevent the shipment of talking machines and that other grievous things may happen, but the Twin City people are going ahead regardless of all and are not bowing to trouble. The blows will be heavy enough, if they come, without anticipating them at this time.

Jay H. Wheeler, manager of the Pathé department of the G. Sommers Co., returned last week from New York and the East after placing a big order for the fall stock. He came home to find the new 100,000-record stacks in place and ready for the arrival of a carload or more of records. The spring business of the house, he states, was far in excess of the volume for the spring of 1917.

Laurence H. Lucke, president of the Minnesota Phonograph Co., left Saturday evening in the company of Milton Lowy, of the staff, and various Northwestern Edison dealers for the big Edison convention. His reports indicate that trade is not quite as active as it was, but the demand still exceeds the supply. Trial balances show that the gross business for the first four months of 1918 was 18 per cent. above the gross for the corresponding period of 1917.

Road men for all the houses are advising their principals to prepare for a heavy rural demand after the crops begin to move. It looks now as though the yield will be immense and in that event the Northwestern farmers, in spite of the calamity blowers, like the Non-Partisan League and other professional crops hangers, will be rolling in money. Some portions of North Dakota are entitled to some returns at that, after two successive bad years.

BUDGET OF OPEROLLO DOINGS

Messrs. Kaufman and Gast Make Strong Team in Patriotic Work as Well as in Booking Orders—Lyric Records Well Distributed

Detroit, Mich., June 7—Walter Kaufman, assistant sales manager, and Charles Gast, a couple of live wire boosters for the Operollo Phonograph Co., came back to this city just in time to expand their surplus energies in the Patriotic Fund drive. Walter and Charlie teamed together their last trip and by the extraordinary splendid results produced this combination has proven to be very successful. After Detroit had raised its proper quota for the Red Cross and other patriotic funds these “road wizards” again started out to stock up Operollo dealers throughout the South and Southwest.

Jacques Kohnner, of the Lyraphone Co., stopped in on his way West and was surely gratified to see the splendid manner in which Lyric records were being distributed. Arrangements were made to triple the stock carried so that better shipments could be made to the various dealers.

Arthur Siewiersky, sales manager, has lately completed plans for an aggressive sales and advertising campaign which will undoubtedly startle the trade. He is well pleased with the way Operollos are being distributed and looks forward for an exceedingly large increase in sales this fall.

It is expected to have the new Operollo models ready for market in a very short time, after certain minor improvements have been perfected.

GRAFONOLAS FOR HOSPITAL UNIT

Two of These Instruments and Records Selected for Albany Base Hospital

The Columbia Graphophone Co., New York, recently sold two Grafonolas and a library of Columbia records to Base Hospital Unit No. 33, known as the Albany Base Hospital. This unit is now awaiting transportation orders for France, and the nurses are mobilized at Ellis Island, with Miss Mattie Washburn, of Albany, chief nurse in charge.

Quite a number of nurses recently visited the Fifth Avenue Shop of the Columbia Co., where they spent some time viewing the beautiful Columbia period models, and listening to some of the latest Columbia records. The Columbia Grafonolas and the records are providing pleasing entertainment for the nurses during their training period at Ellis Island, and will doubtless be in constant demand when the base unit reaches “over there.”

GARBER WRITES OF HIS NEW DUTIES

Interesting Letter From W. L. Garber, Now Training at Gettysburg, Received by World

There was received this week at the office of The Talking Machine World an interesting letter from W. L. Garber, who is now a member of the Tank Corps in training at Gettysburg, Pa. Mr. Garber was formerly private secretary to Arthur D. Geisler, president of the New York Talking Machine Co., Victor wholesalers, and more recently was a member of the company’s traveling staff. He selected the Tank Corps because of the unusual opportunities that it affords for vigorous action at the front, and his letter reads as follows:

“I had a letter day before yesterday from Mr. Keith advising me he would see to it that I received each month’s issue of The Talking Machine World and ‘Voice of the Victor.’ This news made his letter doubly welcome. I arrived here on the night of May 23, and the next day two other ‘previous service’ men and myself out of our new detachment from Fort Slocum were selected as sergeants for the Casual Company—a detention or quarantine camp, through which all recruits are recorded, examined and finally transferred to their respective battalions, either the Light or Heavy Tank service. We keep an average of 1,200 men here and transfer one or two a week to most any company, or four of us drove over to Chambersburg and picked up five men who had been confined to camp and had slipped out.

“Most of all officers attached here have now been assigned to new battalions formed and the camp is now in operation to the non-coms, and it is some job keeping track of a thousand or more strange faces. Yesterday afternoon we (four of us) drove over to Chambersburg and picked up five men who had been confined to camp and had slipped out.

“I understand my old artillery regiment, in which is Morris Owens, another N. Y. Talking Machine Co. boy, has arrived ‘over there.’ As anxious as I am to get over, I would rather be here in the ‘Tanks,’ because when we do get over we’ll raise—

“We are camped on the field where Pickett made his famous charge, and have plenty of local atmosphere to make us work hard to get in the big fight. The spirit de corps here is marvelous, and the caliber of men above the average. Lots of good luck. Sincerely, W. L. Garber.”

RECENT WILSON-LAIRD PUBLICITY

The Wilson-Laird Phonograph Co., New York, factors and distributors of the Bliss reproducer, have just issued an effective four-page folder that gives eight reasons why the Bliss reproducer should be used. These reasons are presented in handy form, so that the folder may be utilized by manufacturers and dealers as an en-volage enclosure, and is directed particularly to Edison dealers. It is noteworthy for the absence of technical details and for the abundance of practical sales arguments.

The company has also issued a new price list that shows a reduction in the retail price of the gold-plated Bliss reproducer and also a reduction in the prices of dozen lots. This reduction in price was made possible because of the company’s fast-growing business and the fact that it has been able to place its factory on a basis of maximum efficiency. There will be no further changes made from the new price list for the balance of 1918, and the company has advised its trade that it hopes to maintain these prices without any advance during the period of the war.

Plans are now being made to handle a large fall and winter business, and the company is using its advertising as an active demand for the Bliss reproducer. This campaign has been particularly successful with Edison dealers, although many well-known manufacturers have expressed their intention of using this reproducer exclusively on their machines during the coming year.

PRIZE WINNER IN EMERSON PHONO. CO.’S WINDOW CONTEST

The Emerson Phonograph Co. announced this week the prize winners in the store and window displays that were presented for the consideration of the judges embodied many unusual and praiseworthy features.

The first prize, consisting of $75 worth of records, was awarded to the S. S. Kresge Co., 52 Congress street, Portland, Me. This window display is reproduced herewith, and is undoubtedly worthy of the honors bestowed upon it.

The second prize, consisting of $50 worth of records, was awarded to S. A. Wolpert, 30 South street, Philadelphia, Pa. The third prize of $25 worth of records was won by the Black S. Hansen Co., 611 Commercial street, Waterloo, la.

The following five Emerson dealers were awarded prizes of $10 worth of records each: Timothy Smith, 2257 Washington street, Boston, Mass.; Jordan & Marsh, Washington street, Boston, Mass.; the Record Exchange, 1918 S o n t h street, Philadelphia, Pa.; Feiler Furniture Co., 819 Central avenue, Cincinnati, O.; S. S. Kresge Co., Indianapolis, Ind.

All the displays presented were most excellent, and reflected credit on the participants. It certainly emphasized their originality in conceiving artistically arranged window displays.

OHIO
TRADE SITUATION IN ATLANTA

Business Held Up Well for May—New Columbia Dealers—Advance in Price of Machines Interests Trade—Record Sales Are Expanding.

Atlanta, Ga., June 6—Business in Atlanta during May was well up to the standard of previous months, and without exception dealers report that they are doing well. There have been some changes in connection with lines already established, as well as new stores to open.

The Atlanta Phonograph Co., the president of which is Mr. Riles, was the original Columbia man in Atlanta, way back in 1901 or 1902, but who became later the first Edison dealer in this city, has qualified recently as a Columbia dealer, and is reported as doing finely with that old and popular line.

Zaban Furniture Co., 119 Whitehall street, has also taken on the Columbia line, being new dealers in the talking machine field. They have begun an intensive advertising campaign, and are selling a large quantity of phonographs and records.

The feature of the month was the advance in the price of Victor goods, on May 10, and among those in closest touch with the situation it is considered not improbable that the Columbia and Edison lines will both advance in price within a few weeks.

Notable artists to visit Atlanta in May were Miss Anna Case, of the Edison, who passed through for points further South, stopping here about two days, and visiting the Edison stores Charles W. Harrison, who sings for nearly all the leading companies, and Miss Geraldine Farrar, the Victor artist, who rendered a delightful concert at the Auditorium Armory, entertaining a large audience of music-lovers and prominent citizens. Miss Farrar is a close friend of a number of the most prominent people in the city, and, owing to her frequent visits here with the Metropolitan Opera Co., has had the opportunity of cultivating these friendships from time to time.

The local distributors for the Columbia, Victor and Edison lines say that their business is far ahead of the same period in 1917.

The small towns throughout the South are heavy buyers of talking machines, most of them having from one to three talking machine stores fully supplied with all types of machines and a complete stock of records. It is estimated that the smaller towns and rural centers are taking from five to seven times as large a volume of goods as they were two years to thirty months ago.

Both the Ediphone and the Dictaphone continue to book an increasing volume of sales. The larger of these great time-savers is becoming almost universal.

Edison is announcing the new records by Miss Frieda Hempel. They are excellent re-creations and will find a ready sale among those who really like high grade music.

Some anxiety is felt as to the ability of dealers to get sufficient stock in future to operate on, as Government requirements are constantly growing, but no acute shortage is anticipated during the rest of this year at least.

A SUCCESSFUL CANADIAN HOUSE

G. W. Lindsay, Ltd., of Montreal, Are Winning a Big Following for the Pathé

Montreal, Can., June 3—G. W. Lindsay, Ltd., of this city, one of the most successful piano houses in Canada, has been achieving pleasing success with the Pathé line, and has developed an extensive clientele for Pathéphones and Pathé records. This concern is carrying the Pathé line in its branches in Quebec, Ottawa, Three Rivers, Brockville, Belleville, Kingston.

An Artistic Lindsay Window

Cornwall, and the manager of each branch is enthusiastic in the possibilities for future Pathé business.

The window display shown in the accompanying photographs was presented recently in the Montreal branch of G. W. Lindsay, Ltd., and was created by Leopold A. Poulin, one of the most successful members of the Lindsay sales staff. Mr. Poulin is in charge of the various window displays featured at the Montreal headquarters, and these displays have contributed materially to the success of the Pathé line in this city.

VICTROLA FIBER TRUNKS IN FAVOR

John G. Corley, president of the Corley Co., Victor distributors, of Richmond, Va., attended the conventions and music show during the past week in New York. Mr. Corley reported generally good business in his section of the country, and particularly commented on the great popularity of the Victor fiber trunk that they produce. He said that orders for the trunk are now being received from coast to coast, and that at least one of these trunks was in every compartment in the country. The demand for them is steadily expanding.

SONA-TONE PHONOGRAPHS, Inc.
3421 Broadway, New York City

"The music is on the record—the tone is in the phonograph."
FOUR NEW MODELS OF COLUMBIA GRAFONOLAS INTRODUCED

Arouse the Enthusiasm of Dealers and Visitors to the National Music Show, Where They Were Exhibited the Past Week—Their Individual Features Described

One of the most important features of the exhibit of the Columbia Graphophone Co. at the National Music Show last week was the first public presentation of four new models of Columbia Grafonolas which aroused the enthusiasm of dealers and others who visited the booths by reason of their distinctive features, everyone predicting that these new artistic Grafonolas would meet with phenomenal success. While the four models are reproduced herewith, the illustrations hardly do justice to the attractiveness and beauty of the cabinet designs.

Type "E-2" measures 42 1/2" in height, 19 1/8" in width, and 21 3/8" in depth, with a record capacity of seventy-five records. This cabinet is made in red mahogany, English brown mahogany, American walnut satin finish, golden oak, fumed oak and early English oak. This design is very pleasing to the eye, and will harmonize in a room with almost any design of furniture.

Type "G-2" has a height of 46 1/2" with casters; a width of 19 1/2" and a depth of 21". It has a record capacity for eighty-five records. This cabinet is made in red mahogany, English brown mahogany, American walnut satin finish, golden oak, fumed oak and early English oak. One of the distinctive features of this cabinet is a drawer in the bottom which may be used for either catalogs or for spare records.

Type "K-2" measures 46 5/16" in height with casters; 21 3/4" in width, 19 1/8" in depth. It is equipped with seven record albums, with a capacity of twelve 12" records for each album.

Type L-2

Grafonolas is the tone quality, which has won hearty praise from tone experts and well-known musicians. Tone quality was, of course, a prime consideration in the production of these new Grafonolas, but in addition to the tonal merits of these instruments, there are many distinctive mechanical features which will doubtless contribute materially to their success.

The most important feature of this mechanism is the new Columbia motor unit. This unit embodies a new motor plate, which is fitted with a hinge so that it can be disconnected from the cabinet quickly. This ingenious construction permits of changing motors immediately. A

H. MICKELEAS - 164 McKibben Street - Brooklyn, N. Y.
NEWS FROM SOUTHERN CALIFORNIA

Business in May of Excellent Volume—Dealers Carrying Fair Amount of Stock But Find It Difficult to Get Renewals—Exhibit of Wireless Course—Barnes' Co's New Quarters

Los Angeles, Cal., June 4.—Business during the month of May was very gratifying to all the talking machine dealers in Los Angeles, and showed them that the slump during April was only temporary. The trouble now is the lack of goods which seem harder to obtain all the time. As shipments are coming through much faster under the new management than in previous months it looks as though the shortage is at the factories, and, if so, there appears to be no remedy, at least not at the present.

Most of the Los Angeles dealers have pretty fair stocks on hand at present, but these will not last very long, and it now looks as though there will be a scarcity in most of the popular models of all the standard makes. From September each year business has always increased each month up to the holidays, and the wise man is the one who will look ahead and get his machine and records now and call it a Christmas present.

The Red Cross have interested themselves in supplying the soldiers with machines and records and are handling most of the old records and machines left by persons for the different camps.

The new draft regulations are liable to hit a pretty hard blow to the dealers by taking from them some of their best record and machine salesmen, as many in the trade are eligible for first call. The ladies, acting in this capacity, are liable to be at a premium if many more of our boys are called to the colors.

The Southern California Music Co., 332 South Broadway, Victor and Edison dealers, had a very interesting exhibit last week demonstrating the wireless course gotten out by the Victor Co. An aerial was strung from the second to the third floor and a wireless operator was placed on a platform in front of the large middle window where he could be plainly seen from across the street. The sounder was placed on the ledge outside the window and the sparkling, of course, attracted a great deal of attention. The operators were obtained from the Y. M. C. A., which has included the wireless in its course.

The Barnes Music Co., for many years located at 131 South Broadway, have moved to the old location of the Bartlett Music Co., 231 South Broadway, opposite the City Hall. Mr. Barnes has remodeled his store and now has an up-to-date and attractive store. The Barnes music store is exclusive Columbia dealers.

The Birkel Music Co. report business as good during May and on the increase. Mr. Beck, manager of the talking machine department, says he is pretty well supplied with machines except Victrola XIV, which are hard to get.

T. A. CLARKE WITH CHAMBERLAIN CO.

Theodore A. Clarke, for the past eight years associated with the Victor line in New Haven, Conn., has taken up new duties as manager of the Aeolian-Vocalions department at the Chamberlain Co.—Connecticut's most progressive and finest furniture house.

The Chamberlain Co. have a complete line of Aeolian-Vocalions and records and report Vocalion business in New Haven good at the present time.

SMITH OPENS NEW STORE

Albert E. Smith recently opened a store at 215 State street, Madison, Wis., where he will carry a full line of pianos, Victor talking machines, records and sheet music.

INCORPORATED IN GRAND RAPIDS

The Michigan Phonograph Co., of Grand Rapids, Mich., has been incorporated with a capitalization of $1,000.
CHECKING DRILL JIGS AND GAUGES

All parts are jig drilled, and to avoid any deviation in alignment of holes, these jigs and tools are checked regularly to ascertain any wear that may have occurred in use.

This inspection on tools, to some, may seem unnecessary, but if one thinking on any of these jigs should show perceptible wear, and be continued, each part machined thereafter would be off center and the interchangeability of parts would be impaired. We, of course, are advocates of piece part interchangeability.

This feature of interchangeability is one of the dominant factors in the successful operation of some of the largest manufacturers of high grade equipment in the country today; among many are the Cadillac Motor Car Co., and others too numerous to mention.

TURNTABLE AND GOVERNOR SHAFT INSPECTION

The cut illustrates the inspection of turntable shafts and governor shafts.

A specially designed fibre worn-wheel and governor shaft are used in Heineeman Motors. This fibre wheel must be perfect in shape and cut.

This inspection is extra critical on these parts. Special fixtures and tools of intricate design are used in this operation to insure perfect running of these parts in Heineeman Motors.

PROCESS INSPECTION

After machines are checked and set up with master piece as previously described, and production proceeds, the process inspector shown in this picture takes up his work, checking the parts under the glass and with micrometer and scale at intervals as these parts come from the machine. This inspection at the machine gives a check on the state of the cutting tools.

These cutting tools are made in duplicates, each set being run a stated length of time. Experience has shown that tools will work to full accuracy for a determined period after which should be replaced with re-sharpened tools.

In case of mishap causing a deflection of the cutting tool before the allotted lapse of time, this tool is removed and a new one, which has been properly sharpened and inspected, placed.

GOVERNOR BALANCING

Even though all parts of the governor, consisting of worm shaft, governor disc, sleeve and springs, have passed through the various process and other inspections, it is essential that the assembled governor be inspected for the proper alignment of the springs and correct balance.

Each spring in a set on every governor is of the same tension and each ball identical in weight, giving accurate balance to the governor when in motion, and unvarying reproduction through steady running motors. Special fixtures and trained operators are used in this work, as illustrated above.

MACHINE INSPECTION

All parts are designed to fit standard holes, thus we have the rare idea with jigs by which existings are drilled and tapped.

The inspection of jigs and tools would be of no value if the machines making parts to fit these existings were not true. Hence this inspection of machines for alignment.

The illustration shows the inspection of master parts which are controls of other parts as these existings are used. These parts are placed in this machine for further operations and result of the machine work will be uniform parts.

Of course only one part is shown, though all parts and machines are similarly checked by an experienced and thoroughly trained inspector before machines are started on the production run.

EXTRA INSPECTION

The governor shaft or worm is one of the most essential parts of a high speed motor.

The greatest care is taken in inspecting and testing this part.

The illustration shows an inspection by a trained expert, with glass scale, micrometer and specially designed fixtures such as indicated.

Governor shafts are put through numerous similar inspections while passing through different manufacturing operations.

DEPARTMENTAL INSPECTION

The parts as taken from the machines are inspected as shown above, before next operation.

This prevents any additional operations being performed on any part that may be defective in the preceding operation.

An inspection after each operation has proven to be the logical system of inspection.

Special test fixtures and gauges have been devised and arranged for each of these inspection operations.

MOTOR SPRINGS

Owing to the difficulty experienced in the past, of securing the proper springs, it was found necessary to manufacture under our own expert supervision by experienced spring maker, all springs used in the Heineeman Motor.

Our springs must pass through many rigorous tests for temper, pulling power, and breaking strain before being wound in spring barrels. Even to the last turn of the winding machine which coils the spring in the barrel, the spring has been under the eye of an expert spring inspector, as shown in the illustration.

Additional tests are given the spring after being coiled in the barrel before it is assembled in the motor.

The lubrication of mains springs has been brought to a state of perfection by this organization and a lubricating compound prepared to our own formula which gives positive result and lasting satisfaction.
Nothing like this timely merchandise. That means Military Trunk Grafonola Outfits and Vacation Grafonolas. Are you pushing them?

Columbia Graphophone Co.

“INSPECTIONS AND TESTS”
Details of a Most Informative Booklet Issued by Otto Heineman Phonograph Supply Co.

"Inspections and Tests" is the title of a valuable booklet just issued by the Otto Heineman Phonograph Supply Co. This booklet, which is profitably illustrated, gives manufacturers and dealers some idea of the care that is taken in the manufacturing of the "Motor of Quality." This company has originated and improved many different methods for carrying out the most exact manner possible the full definition of the words "inspections and tests." From the raw material, throughout every operation in the manufacture, inspections and tests are interposed so that any deviations from the standard that may occur can be corrected immediately. Hundreds of these inspections take place during the processes of manufacturing the various parts.

In the booklet just issued by the company there are listed a few of the most important of these inspections, and in addition there are presented illustrations of some of the most popular Heineman products. There are reproduced herewith on the facing page eight of the illustrations shown in this booklet, together with a brief resume of each inspection or test. These illustrations will give some idea of the efficiency of the Heineman factories, which has resulted in the international success of the Heineman motor of quality.

Why Break Records? Just File Them!
That is if you have the wonderful Record filing system which is a feature of

The Marvelous MAGNOLA

Edison A100 Disc, Equipped With Cabinet Edison A100 Disc machine as shown in the accompanying illustration. This cabinet was produced as a result of numerous demands from Edison dealers for a good filing device for this instrument. It is made, of course, to harmonize with the machine and is finished in the same wood or finish. It is made with the care which characterizes all of the Salter products, and is equipped with the famous Salter felt-lined shelves, holding thirty-two records in individual compartments. The compartments are all numbered and an index card is also furnished. The Salter Co. also furnish a felt-lined filing rack for installation in the interior of the Edison C130 phonograph. The rack fits perfectly and is instantly installed. The company manufactures an extensive line of cabinets for other machines and also a fine line of record cabinets for surplus, record use.

R. E. RAE WITH COLUMBIA CO.
Robert E. Rae, formerly sales manager of the Jones-Motrola, New York, is now a member of the general sales department of the Columbia Graphophone Co., with headquarters at the executive offices in the Woolworth Building, New York. Mr. Rae, prior to joining the Jones-Motrola, was associated with the Western Electric Co., and is well qualified for his new post.

LONDON PLANT DESTROYED BY FIRE
Columbia Co. Factory in England a Total Loss
—L. S. Sterling on His Way to London

Louis S. Sterling, managing director of the Columbia Graphophone Co., Ltd., London, Eng., who has been spending the past six weeks in New York, received a cablegram last week advising him that the London plant of the Columbia Co. had been totally destroyed by fire. The original matrices, which were stored in a fireproof building some distance from the factory, were saved, but the loss is estimated at from $500,000 to $750,000.

The cablegram stated that every building in the London plant was a total wreck, and in view of the restrictions placed by the Government on the construction of new buildings, Mr. Sterling has not yet made any definite plans for the future. He left for London on Monday, June 3, and will immediately assume charge of all reconstruction activities. The disastrous fire started in a building on a adjoining street, and quickly spread to the buildings occupied by the Columbia Co.

SONA-TONE SHOWROOMS IN N. Y.
The Sona-Tone Phonograph, Inc., manufacturer of the Sona-Tone phonograph, has opened its showrooms at 3421 Broadway, New York, corner of 120th street, where a complete line of these instruments are on display for the convenience of visiting dealers. The executive offices are now located at this address, and L. C. Seltzer, general manager of the company, is leaving nothing undone to co-operate with the Sona-Tone clientele. The company’s Brooklyn store is closing a very satisfactory business.

The BEST TALKING MACHINE NEEDLE
On the Market—Packed in Counter Salesman's Box

The Fred. Gretsch Mfg. Co., 60 Broadway, Manufacturers of Musical Instruments, has for the first time in its long history packed a needle in the regular counter salesman’s box. The needles will be available at various prices in box quantities of 50, 100, 250 or 500 doz. and are guaranteed to fill the need, to replace the conventional “Tall T” and “Tall B” needles.

The Fred. Gretsch Mfg. Co., 60 Broadway, Manufacturers of Musical Instruments

50 Needles $1.05, 100 Needles $1.95, per doz.
500 Needles $4.95. This is the best needle that can be purchased. Your profit is $1.10 on each box bought.
Baltimore trade showing plenty of real activity

Dealers are awakened to real opportunities despite many disturbing factors—Maryland as a whole reports large volume of business—important changes and developments of the month

Baltimore, June 7—Optimism for the future and good business for the past month is the keynote of the Baltimore situation among the talking machine men. Business showed up very well during the past month, many of the dealers reporting increases, while others considered their business good. Shipments of both records and machines were received during the month. The demand for both machines and records continues to be in excess of the supply.

Retailers everywhere are showing good results. Those dealers who were panic stricken a few months ago because of the war have awakened to the present opportunities and are showing plenty of real activity. This is evident from various quarters. Their show windows are more attractive and up to the minute with the appeal to buyers. Newspaper advertising is also showing up very well.

Baltimore has looked after many visitors from the Southern territory during the past month and all of the jobbers entertained their customers. Many of the callers visited all of the establishments in the hunt for goods.

The Brunswick-Balke-Collender Co. added a new account to their list during the month, Knabe Ware rooms, Inc., both in Baltimore and Washington putting in a line of machines. Other new accounts are expected to be announced very shortly.

W. S. Parks, manager of the Columbia Graphophone Co., here, is doubtfully overhyped this month, the great month’s business done during May being one reason and the other being the arrival on Sunday of William Scott Parks, Jr., Mrs. Parks as well as the heir are both reported doing nicely.

S. C. Cook, assistant manager for Columbia, made a trip through North Carolina and part of Virginia and found the dealers in an optimistic frame of mind. The tobacco crop promises to be a record one and this means that the farmers through the section will have plenty of money, which, dealers say, forecasts good business.

During the month the Columbia Co. gave a reception to Evan Davies, of the Columbia vocal staff, and there were present more than fifty dealers of the city and nearby territory. More than sixty persons attended the affair, and it is hoped to hold gatherings of this kind monthly. These gatherings are for the purpose of bringing the dealers and the workers of the company closer together. Mr. Davies impersonated Harry Lauder and many old-time Southern characters.

Miss Katherine Carey, of the local Columbia office, accompanied Mr. Davies as well as other persons on the piano.

Miss E. M. Griffith, in charge of the wholesale department for Cohen & Hughes, Victor distributors, reports good business, but not quite up to a year ago, because of lack of goods. The firm has just added another two-ton motor truck to its equipment, which will be used exclusively in handling the Washington business so as to get to customers in that territory and in the South, shipments for the Southern territory being made in some instances better from Washington. Among the visitors to the distributors during the month were Mr. Levy, of Ferguson, Lillienfeld & Lightfoot Corp., Norfolk; Mr. Ripple, of Martinsburg; Mr. Clemens, of Clemens Bros., Chattanooga, Tenn.; Joseph Isaac, of Goldsborough, N. C.

Hipolito Lazaro, the famous tenor of the Columbia, took a prominent part in the Second War Fund drive of the Red Cross. He appeared a number of times at the Liberty Hui, near Union Station and helped to bring money from the pockets of the interested ones to help “Greatest Mother on Earth” to support the nation’s Army of Defense.

George C. Maust, manager of the Grafonola department of Lansburg & Bro., Washington, spent several days at Columbia headquarters during the month. He is reorganizing the Grafonola department, which he recently assumed charge. Among the other visitors to Columbia headquarters were Mr. Whipple of O. J. DeMall & Co., Washington, D. C.; B. H. Sommers, of Ellicott City, Md.; Mr. Friedman, of the Virginia Mercantile Co.; J. J. Carey, of the Columbia Co., Norfolk, Va., and Mr. Phillips, Washington, W. C.

Mr. Foster has been placed in charge of the music department of Hecht Bros. & Co.

Word comes from the Columbia dealers in Richmond, Norfolk and Washington that all of them are making a liberal display of the Period Grafonolas. April and May, according to J. J. Carey, of the Columbia Co., Norfolk, was the largest in the history of the company.

A. B. Koteen, formerly secretary and manager of the Virginia Mercantile Co., Norfolk, Va., has withdrawn from the company and is now manager of the Grafonola department of the Phillips, Levy Furniture Co., of that city.

P. W. Peck, who travels through North Carolina for the Baltimore office of the Columbia Co., delights in figures and says that the per capita sale of Columbia products in Edgecomb County is $1 per every inhabitant of the county. He has also figured that the first three months of this year show 124 per cent, increase in Columbia products for North Carolina over the same period of 1917.

W. C. Roberts, manager of E. F. Droop & Sons Co., Victor distributors, reports good business during May, which showed an increase over the same month of 1917. The increase was 25 per cent. Retail business with the firm is showing fine increases, and Mr. Roberts is hoping he will be able to get goods to meet his ever-increasing demand. For several months past Mr. Roberts says the monthly shipments of records from the Victor factory are sold before they arrive, and he is having a hard time keeping his dealers satisfied. E. H. and C. A. Droop, of the firm, were present at the convention in New York during the week.

George White, of the Southern Furniture Co., Richmond, Va., states that the Grafonola business for this year constitutes a very substantial part of their present business, and because of this fact arrangements are now being made to greatly enlarge the department.

H. S. Jones, of Clark & Jones Piano Co., with headquarters in Birmingham, Ala., and with a chain of stores in the South, visited all of the dealers.

Jesse Rosenberg, of the National Piano Co., Pathe distributors, says he has been getting a liberal shipment of machines and records during the month and that business is fine.

W. T. Davis, of the Victor Co., was in Baltimore a good deal of time during the month looking over the trade.

The Vita-Nola talking machine, made by the Vitanola Talking Machine Co., of Chicago, is handled in this city by the Baltimore Bargain House, Robt. Lipnick, 654 West Baltimore street; the Peabody Piano Co., the Hub Piano Co., 1520 North Liberty street, and A. W. Sterle Bros., 127 North Carolina street. These concerns report a steadily growing demand for this product.

A visitor from Newport

A visitor this week at the executive offices of the Pathé Frères Phonograph Co., Brooklyn, N. Y., was Mrs. I. Richklaetz, who conducts two successful Pathé shops in Newport, R. I. She is a firm believer in the musical qualities and sales possibilities of Pathéphones and Pathé discs. In a chat with The World, she stated that her Pathé sales were steadily increasing and that, according to her present plans, she would open a third store in the very near future, handling the Pathé line exclusively.
Edison Dealers Hold Their Fourth Annual Convention

George Lincoln Parker Presides Over Annual Gathering of Edison Dealers Held Last Week at Waldorf-Astoria
—Mr. Edison's Great Message—Mr. Maxwell's Playlet Well Received—New Edison Velvet Surface Record

On Thursday and Friday, June 6 and 7, the fourth annual convention of Edison dealers took place at the Waldorf-Astoria, New York, with Geo. Lincoln Parker, of Boston, as chairman. The program for Thursday morning started with an address of welcome from Thos. A. Edison, Inc., delivered by T. J. Leonard, general sales manager of the phonograph division. Following this Geo. L. Parker delivered his convention address. Wm. Maxwell, vice-president, and manager of the phonograph division, spoke next and his subject was "Yesterday, To-Day and To-Morrow." During his talk he intimated that there would be an increase in price on the Edison instruments about September 1, but that

E. C. Boykin followed and answered questions 1 to 8, inclusive, which were of great interest to the dealers. Following this there was an open discussion in which matters of general interest were brought up and debated. The next speaker was T. J. Leonard, who answered questions 9 to 14, after which an open discussion again ensued. A speech was then delivered by Robt. J. Bolan, of East Orange, N. J., whose subject was "Too Much Money." A. P. Darns, assistant to Mr. Leonard, then answered question 15. Col. F. B. T. Hollenberg, of Little Rock, Ark., and Gust. Hollnquist, of Erie, Pa., in turn discussed on the subject of "Won't Pay Interest." Phillip Haberman, vice-president of the Commercial Investors' Trust, New York City, then treated in a very clear way on the matter of "Borrowing Money." W. D. Wilson, trained for this war as a pugilist trains for a championship prize fight. He expected to deliver the knockout punch in the fall of 1914. Her boasted far-sightedness proved to be gravely at fault. To-day, after nearly four years of warfare, Germany is still trying vainly to land a knockout. Like a desperate pugilist, who feels his strength ebbing rapidly and knows he can last but a few more rounds, the Hun is staggering everything on the chance of landing a lucky punch. General Foch, like a clever boxer, now parries and gives ground, but the time will come when he will strike, and there will be behind his blow the greatest moral and military force that has ever been invoked on the field of battle—the gallant veterans of France, the dauntless British, the daring Italians, and hundreds of thousands of our own brave boys, who will write during this war the proudest page in this nation's history.

We are in this war and we must see it through to a conclusion that justifies the sacrifices we have made. I do not say that Germany must be crushed. It may be that her deluded people will strike the scales from their eyes and overthrow the powers that have plunged the world into war. But however the result is accomplished, there is but one result with which we can be satisfied. Germany must be cured forever of the desire to wage war.

I have spoken about the war, because it is the most important thing in the world to-day. We must not put our own selfish interests above the interests of the nation. We must give and

On Friday morning the Edison convention was again resumed and started off with a message from Thos. A. Edison delivered by Wm. Maxwell, which read as follows:

Thos. A. Edison's Message
To my friends, the Merchants of the United States and Canada who handle Edison Phonographs and Records:

These are strenuous days, with the fate of civilization hanging in the balance. However, the world is safer to-day than it was in July last year, when you gentlemen were assembled in this same room. Germany prepared and

The delegation from Cleveland.

Delegation From the Boston Zone

of Fall River, Mass., spoke next and took as his theme "Want a Discount." V. E. B. Fuller, general supervisor of the Edison Co., closed the speakers' session with a brief talk about the National Music Show, which he urged the dealers to attend while they were in New York and incidentally to visit the Edison exhibits there.

The morning session closed with a one-act comedy entitled "The Dotted Line," written by Wm. Maxwell and produced by E. C. Boykin. It was a very cleverly written sketch in

Richmond's Delegation (C. B. Haynes to Left)

we must do to the full limit of our respective abilities, in order that the war may be won in the shortest possible time. On the other hand, we should oppose in all proper ways the hysterical and immature ideas that from time to time are advanced by men, who, either through inexperience in business or indifference to the business prosperity of the country, propose measures of incalculable harm and of relatively small advantage.

No legitimate industry is non-essential except as it interferes with the conduct of the war, and then only to the extent to which it interferes. No statistician can prepare figures that can be accepted safely as a guide to the curtailment that should occur in the manufacture of the so-called non-essentials. What we need to do is to speed up.

(Continued on page 68)
trade, and we must prepare ourselves for the intense competition for foreign markets that will occur after the war.

We hear a good deal of talk about luxuries. Luxury is a relative term. What is luxury for one man is almost a necessity to another. No matter what is said or done, the increased earning power of the American people is going to result in the increased purchase of luxuries and the urge to possess luxuries will do more to speed up production than all the prize contests, bonus plans and proclamations that can be devised. The laziest and most non-productive man in the world is the man whose wants are the simplest. The fellow who has a family that wants luxuries and is endeavoring to gratify them is the man who is usually working the hardest and procuring the most.

Some of you may have been told that music is a non-essential. My views on that subject are probably well known to you. The time is not far distant when music will be recognized as a greater essential than books. Don't let anybody make you believe that music is a non-essential. Merchants who sell good musical instruments are performing a useful service to the nation.

Many Interesting Talks

The next dealer on the program was M. L. Eshelman, of St. Joseph, Mo., who spoke on "Conditions Too Uncertain." J. Craig Young, of Newton, N. J., came next and dwelt on "Paying for Bonds," and he was followed by A. Petrone, of Newark, N. J., and C. J. Lionhart, of Norman, N. B., both of whom spoke on "Living Costs So Much." W. W. O'Hara, of Montreal, Canada, and A. P. McCoy, of Waterbury, Conn., made interesting talks on the subject of "Don't Want to Pay Luxuries."

J. W. Scott, the Amherst supervisor, followed with a discussion on "The Diamond Amherst," and in his talk he was assisted by "Knock-Out Kid," whom he introduced in part as follows: "Ladies and gentlemen, before making a few remarks about the Diamond Amherst, I want to introduce the world's champion lightweight. He has never been defeated. He is known from the Atlantic to the Pacific and from the Va. to the Pac. E. Tradeweight, mechanical supervisor of the Edison company, explained the method for "Keeping Instruments Professional." M. A. Alfred, of Hartford, Conn., and W. E. Jones, ofage Charles, Va., both spoke on "Will Wait for More Records." R. Montalvo, Jr., of New Brunswick, N. J., treated at the very last minute "Ready Yet." Lesley L. King, of Columbus, Ohio, discussed the solution to "Want to Talk It Over With My Husband," and D. H. Marchant, of Wadsworth, Ohio, held the other side of this subject and took as his theme "Want To Talk It Over With My Wife."

Tone Tests Discussed

V. E. B. Fuller, general supervisor of the Edison company, followed this series of short talks with a discussion on "Tone Tests" and "Lectures on Music." W. McPhillips, of London, Canada, then talked on the matter of "Record Service." An open forum was then declared and discussions followed bearing on numerous topics of interest. Mr. Maxwell closed the session with a little speech entitled "Until We Meet Again."

The New Edison Velvet Surface Record

The outstanding feature of the Edison dealers' convention was the announcement of the new velvet surface record. This latest re-creation of the Edison laboratories is considered a great step forward in the manufacture of disc records, in that it practically eliminates the surface noise hitherto found on records. It was also stated that this record is of a nature which simplifies production. A novel method of announcing this new velvet surface record to the conventionites was used. It was introduced by a most beautiful and charming young lady, who made her début in the early part of the convention and offered to auction off the first velvet surface record. The offer was promptly accepted and after considerable bidding W. O. Pardee, of the Pardee-Ellenberger Co., of New Haven, Conn., finally bid in on the very liberal figure of $350. The "Velvet Surface Girl," as she became familiarly known by all the conventionites, spent the balance of the two days during which the convention lasted selling autographed velvet surface records, the proceeds of the sales going to supply Army and Navy Models of the New Edison and Edison re-creations for use on the transports plying between the United States and France. Needless to say, a great many autographed records were purchased and the transport fund rose to considerable proportions.

Knock-Out Kid

Hudson Bay to the Rio Grande as the Knock-Out Kid. Ladies and gentlemen, I take great pleasure in introducing Amherst 50, the Knock-Out Kid, who has never lost a decision. Gust Hohnquist, of Erie, Pa., came next and treated on "The Chief Guide." E. Tradeweight, mechanical supervisor of the Edison company, explained the method for "Keeping Instruments Professional." M. A. Alfred, of Hartford, Conn., and W. E. Jones, ofage Charles, Va., both spoke on "Will Wait for More Records." R. Montalvo, Jr., of New Brunswick, N. J., treated at the very last minute "Ready Yet." Lesley L. King, of Columbus, Ohio, discussed the solution to "Want to Talk It Over With My Husband," and D. H. Marchant, of Wadsworth, Ohio, held the other side of this subject and took as his theme "Want To Talk It Over With My Wife."

The Velvet Surface Girl

On Friday evening, June 7, the Edison jobbers and dealers, many of whom brought their wives, sat down to a most excellent repast in the banquet hall of the Waldorf-Astoria, as the guests of the officials of Thos. A. Edison, Inc. There were in all nearly eighty hundred guests, the greater part of whom were old-time friends with each other.

The banquet hall had been decorated most tastily along patriotic lines for the occasion and the entire assemblage rose to sing the "Star Spangled Banner" as the prelude to partaking of a most excellent dinner, about which the attractive menu card contained the following words: "Mr. Oscar Tschirky has sought to demonstrate by our dinner this evening that the strictest observance of the Food Administration's regulations imposes no hardship on the epicure"—and it didn't. During the meal an all-star vaudeville was presented on the stage at one end of the ballroom, courtesy of Joseph M. Schenck and under the direction of J. H. Lahr.

The "Dinner Hour," as it was called, contained several acts from "Kirk's First Circus," and needless to stay proved very entertaining. At one point during the show program an intermission was made for the rendering of a "Gag Song" which contained many clever quips about various celebrities in the Edison trade. The verses ran as follows:

GAG SONG

Now listen, friends, just for a bit, just keep your seats and don't hit on.

And lend an ear to what I have to say.

Now, with your attention, I'll thank you not to mention any incorrect remarks that come your way.

Of course you all have heard of that little bird That comes and teeters all the way.

Well, he met at the door, and I hope no one gets sure, For what he said was all in fun—so never fear.

He said, "Now Walter Kipp is known as quite a clip, He's the Bourbon Kid and then his little post. He loves the merry chatter of the clip—but can he do it When he's playing 'Home, Sweet Home' upon his flute."

There's our old friend, H. E. Blaza. He can hardly keep pace.

You know, he comes from Eiderburg, Pa.,

Sb, what's that I hear? Wake up, papa, dear,

For you'll have to walk to the floor till break of day.

Hello, L. J., how's friend Bougette? Now don't get in a set,

Just so calmly there and keep a level head,

There's nothing to get riled about. All your friends will sure run out.

If you start to euss and shout to raise the dead.
As always Mr. Holmquist's Velvet Barbers in E. Erie is the place to get a shave.

Mr. Erickson's on hails from Estrelman!—With every necessary thing there is in the way. Why, sir, there is even a microscope there. To-day, sir, I examined the microscope and succeeded in shaming the lonesome, hearthless man, to-day. Mr. Erickson's is a good place to hear the latest news. There's a new cut here, and nobody can leave the place without knowing it.

Billie Maxwell here, a tip. The favorite has got the pip, but I heard it from a stableboy who knew. Here's your chance to make a kill that will make the bookies ill.

Play all your cash and then go look your clothes.

As sure as I'm a sinner, it was at the bookies' dinner that they carried out Tom Leonard by his feet, says Tom, "I can't recall what happened there at all." No golf, no fishing, no tennis, no sporting of any kind. In an old Rhode Island town lives a man of great renown; they call him Daddy Wilmot with affection. They must have the place up tight, he's he's down here tonight. At least he started off in this direction.

If in Chicago you should be and you went around to Mr. Goodwin at his office, home or club, and you asked "Say, where's the bath?" They'd simply say, "You'll catch Him playing topsy in the A. A. Swimming tub."

From "Our Lady of the Snows" he came down to see the show. That isn't what he told the folks at home. With gold Dietz Williams piddles and he does on ancient goblets, while the little flies do foot-tread on his dome.

When the dinner was nearly over, William Maxwell jumped up on the rostrum and in his characteristically vigorous style announced that there were a few left of the new Velvet Surface Receptions, autographed by Mr. Edison, that would be sold at five dollars each, the proceeds going to the Transport Fund. These were quickly grabbed up by the crowd until just one remained and this Mr. Maxwell would not part with except by auction to the highest bidder. The first offer was for $50 and from that figure the bidding steadily climbed until it reached the high mark of $400. By this time Mr. Maxwell had warmed up to his role as auctioneer in great style and it was quite evident that the last of the Velvet Surface Receptions was going to go (Continued on page 70)
THE NEW VEEOCO MOTOR

THE ELECTRIC WAY THE IDEAL WAY

All experimenting has been done in advance at the Veeeco factory. Any mistakes have been rectified before, and not after, the Motors have been put on the market.

The Improved Veeeco Electric Motor is designed primarily and exclusively for talking machines. Runs on either A. C. or D. C., 100-125 volts without adjustment. Supplied to run on any voltage from 6 to 250. Mounted on 12 or 1 1/2 inch square mahogany boards ready to install.

Combined with the VITALOID Turntable it makes a complete motor unit for high-class machines.

NEW YORK

STEPHENS TO PRESENT NEW BILL

Father of Present Stephens Bill States to The World That He Plans to Present a New Measure to Congress Embodying New Ideas in the Matter of Controlling Resale Prices Under Supervision of Federal Trade Commission

WASHINGTON, D.C., June 6—Since the recent decisions in the United States Supreme Court and the District Court against price fixing under certain conditions, and against systems to that end which were formerly in vogue, and in view of the attitude taken by the Federal Trade Commission in the matter of retail price maintenance, there has been considerable speculation as to what attempts will be made to legalize retail price fixing on trade-marked articles, and especially what will be the fate of the Stephens bill. No less a person than Justice Brandeis of the United States Supreme Court has stated that there is an opportunity for establishing price maintenance through legislation and under Governmental supervision, and it has been hinted that an amended Stephens bill, or perhaps an entirely new measure along the suggested line, will be offered in Congress.

Congressman Dan V. Stephens, of Nebraska, father of the present Stephens bill, is of the opinion that it is possible to legalize the fixing of retail prices by producers, if the Federal Trade Commission is given some jurisdiction, and plans a new bill embodying that idea. In an interview with The Talking Machine World to-day Congressman Stephens set forth his ideas as follows:

"In my opinion legislation will be possible, after the pressure of this war legislation is past, along the lines that I have heretofore indicated in a statement given to the press, namely, that in my judgment it will be possible to legalize the fixing of resale prices by producers, providing a complainant who feels that a price is unfair can have recourse by filing his protest against the price fixed with the Federal Trade Commission for review, the Federal Trade Commission being empowered to go into the question of the fairness of the price fixed and coming to a final decision. That the penalty that would follow an adverse decision of the Trade Commission would be the withdrawal of the right to fix the resale price. Each case would be decided upon its own merits. The advantage of this legislation appears to me to lie in the fact that the rights of the people would be absolutely preserved when anyone felt justified in making a complaint. The probabilities are that there would be practically no complaints made as there would be ample and vigorous competition between all brands. In the second instance the producer would be no worse off under such legislation than he is now, as under the court's decision he is unable to control his resale price at all. Under the proposed legislation he would be able to control the resale price, providing his price was fair. If it wasn't fair he would be no better off under the new legislation than he is now.

"It appears to me that legislation along this line is feasible and will meet the approval of many members of Congress who have heretofore had doubts of the wisdom of the legislation that has been proposed in the Stephens bill. As soon as the war work clears away sufficiently to justify it my intention is to present a bill to Congress embodying this idea."

NEW SCHUBERT RECORDS

Dealers Will Receive New Numbers Each Month—First Records Bring Praise

The Bell Talking Machine Co., of 44 West Thirty-seventh street, New York, is now producing a number of new Schubert records, which are being heartily received by representative dealers throughout the country. The announcement of the records, which came a few months ago in The World, brought many inquiries, and the company has been making every effort to get matters into such shape that the dealers should receive a steady supply. From now on this supply will be available, and a considerable number of new records will be produced each month. The first records include a number of standard and most popular selections of the day, and many enthusiastic letters regarding the success which the dealers are having with them have been recently received at the office of the company.

NEW DEPARTMENT IN ST. PAUL

Howard Farwell & Co. Install New Series of Demonstrating Booths in Their Store

ST. PAUL, Minn., June 3—The new talking machine department of Howard Farwell & Co., piano and music dealers of 25-27 East Sixth street this city, are now considered among the most attractive in the Northwest. The elaborate sound-proof booths are grouped on the main floor, and occupy about half the space there. The booths are built of lattice and plaster, and have a very permanent appearance. Both the Victor and Columbia lines are handled.

J.P. SEEBURG PIANO CO.
CHICAGO.
The wholesale trade of Chicago is working harder than ever before in an effort to take care of the vast amount of business on hand. There is, seemingly, no let-up in the steady stream of orders coming in, especially from the country districts. Wholesale dealers in general agree that the major factor governing their activities depends entirely upon the amount of goods being turned out by the manufacturers. The manufacturers in turn are working overtime in trying to take care of the demands made upon them. Nevertheless, in spite of the overtime their output is way below normal owing to a scarcity of skilled labor. Some of the larger manufacturers in trying to meet the situation have instructed their traveling representatives not to spend so much time in booking orders, but to scout around and be constantly on the lookout for labor. Experienced woodfinishers, coarse rubbers and trimmers are needed.

This is the situation that the wholesale trade of Chicago is facing. It is practically true of the entire country. For this reason the wholesale dealers of this section are using the utmost care in taking orders and are delivering only to those who are able to buy on short time and pay the most cash with their orders. As one jobber so aptly stated, there exists in the trade to-day an ideal condition, one that every jobber and manufacturer in the country should take advantage of, and that is, pick your trade, cut out the weeds and in a short while the “Gyp” dealer will be a part of history only.

The record situation remains in about the same condition that it has been for the past few months, that is, the demand is greater than the supply. A few large shipments of records brought a slight relief to the situation the latter part of the month, but this stock quickly disappeared in filling back orders.

The retail trade is not so active locally as compared with country business. The demand for machines in Chicago is not very strong, as a whole and, if we may be permitted to use the expression, the record situation is a “goat get-ter.” The buying public continues to make strong demand for popular patriotic selection, especially war songs and dance music with a touch of the military, but these are not forthcoming in adequate quantities and as a result a great deal of business that could be carried on by the retailer is lost, for a time at least, so many of them declare.

New Empire Art Model

The Empire Talking Machine Co. has just announced the completion of their new period design art model talking machine which will be offered to the trade in the near future. This machine is of Queen Anne design and is one of the most beautiful ever offered to the trade. The workmanship is of the same fine quality so characteristic of all Empire instruments. The artistic beauty of the machine is enhanced by an elaborately designed grill covering the opening of the tone chamber and a delicate festoon is arranged around the borders of the paneling.

W. B. Fulghum Visits

Walter B. Fulghum, formerly manager of the order department of the Victor Co. and who now operates the Victrola Shop at Richmond, Indiana, spent Sunday of this week in Chicago. After a brief visit here he left for the East. He is to visit Philadelphia and New York and renew acquaintance with his old friends at the Victor factory and others in the trade. In addition to the Victor store Mr. Fulghum owns and operates four prosperous furnas near Richmond. He reports that he has increased his business 200 per cent and that the country trade is very good.

C. T. M. Co. Men With Colors

W. C. Griffith, assistant sales manager and junior member of the Chicago Talking Machine Co., is now one of Uncle Sam's boys, having entered the army service on May 27 with other selectees. He has been assigned to the Fourth Co., First Provisional Regiment, which is stationed at Camp Wheeler, Macon, Ga. Mr. Griffith tried to enlist with the regulars four times but was declined on account of defective vision. Mr. Griffith was one of the most popular men in the Chicago trade and began his career with the Chicago Talking Machine Co. about four years ago, and in January, 1917, was made junior member in the company by President Geissler. His work brought him rapid promotion. He started as a door salesman with the company and was then given a traveling representative's position, which was followed very quickly by his promotion to assistant sales manager.

Another popular man of the Chicago Talking Machine Co. who recently entered the service was Richard G. Johnson, who had charge of the shipping department. He started with the company about six years ago and was very well liked for his happy and genial disposition. Mr. Johnson enlisted in the regular army on May 21 and is now attached to the Fourth Recruiting Co. at Fort Macclintoch, Laredo, Texas.

Private Emmett A. Creed, brother of D. A. Creed, vice-president of the Chicago Talking Machine Co. is now with the regular army and is stationed with Co. 1, Thirteenth Infantry, at Camp Fremont, Cal.

Wins Promotion

James A. Coudert, former assistant to J. H. Steinmetz, president of the Empire Talking Machine Co., has won his chevrons as sergeant and has been appointed as instructor of calisthenics, gas defense and pistol practice. Sergeant Coudert is connected with Co. 5, Quartermaster's Division, Camp Johnston, Fla., and gives instructions to two classes each day.

Praises Paramount Records

The Michigan Phonograp Co., of Grand Rapids, Mich., were recently appointed jobbers for the Paramount records. In a letter to the manufacturers the New York Recording Laboratories, of Port Washington, Wis., Geo. M. Cook, the president of the company, speaks very enthusiastically regarding the records, and in conclusion says: “The future of the 'Paramount' is assured, as it fills a long-felt want in the talking-machine industry. Paramount recordings are clear and distinct, surface noise is reduced to a minimum, and the catalog is well balanced, both musically and commercially.”

Returns From Eastern Visit

D. A. Creed, vice-president of the Chicago Talking Machine Co. and G. P. Ellis, sales manager, returned the first part of the month from a visit to New York, where they had been attending a directors' meeting both of the New York and Chicago Talking Machine Companies.

Fibre Needle Popularity

F. D. Hall, president of the B. & H. Fibre Mfg. Co., is heartily satisfied with the current demand for both the B. & H. fibre needles and for the B. & H. pointer, which met with such favorable reception from the trade since it was

 Paramount six best sellers for the month are: "Alaoh Land" and "O Sole Mio"; "Three Wonderful Letters from Home" and "A Little Bit of Sunshine"; "Good Morning Mr. Zip, Zip, Zip" and "Aw Sammy"; "Can’t You Hear Me Callin’, Caroline?" and "I Cannot Sing the Old Songs"; "Wait Till the Cows Come Home" and "Wears a Red Army"; "Liberty Stable Blues" and "The Downtown Strutters’ Ball".

Miss Stein in Charge

Miss Eta Stein is now in charge of the recital hall at Lyon & Healy, having succeeded Bob Taylor, who was recently called to the colors. Miss Stein was formerly connected with the record department of Lyon & Healy.

Enthusiastic Over Conditions

W. E. Cotter, wholesale and retail manager of the phonograph division of Thos. E. Wilson & Co., returned on Wednesday of this week from a very successful ten-day trip through Dallas, Houston, Ft. Worth, Kansas City and St. Louis. Mr. Cotter is very enthusiastic regarding conditions throughout the district which he visited, and states that prospects are increasing more and more. While in Houston he visited the Rick Furniture Co., who were holding a ten-day sale, and on the first day they sold eighty-five phonographs.

Considering the conditions brought about by the war," stated Mr. Cotter, "business is very good. The harvesting crop throughout

(Continued on page 77)
Old vs. New

Which Type of Phonograph For Your Customers?

The Story of The New Brunswick

The choice is now distinct. Your offering is one or the other — old type or new. Of the old, there are many. So far the one instrument that has attained the coveted new standards is The Brunswick.

And this is due to The Brunswick Method of Reproduction.

Until all phonographs abandon the one-record idea, until all discard metal in tone amplification, until all forsake old crudities, the new Brunswick will have few rivals. It stands magnificently alone — the supreme phonograph achievement of recent years.

Only The Brunswick

Until the coming of The Brunswick, each phonograph had its own chief attractions. None had them all.

And mostly, the fame depended on the make of records with which the instrument was co-named. Some folks said all phonographs were alike — all good. And that the records depended upon luck for their tone.

But The Brunswick has gained its nationwide fame by combining all the better features and discarding the troublesome. And so it is called “All Phonographs in One.”

The new Brunswick Method of Reproduction sets higher standards. Never before have records been played so faithfully.

“Phenomenal”—The Verdict

The new Brunswick came out in April. Now thousands know them. All over the country. And these thousands agree that there is no phonograph like The Brunswick.

They praise The Ultona, and The Brunswick Tone Amplifier, two features of The Brunswick Method of Reproduction.

The Ultona is adapted, at the turn of a hand, to any type of record. It is practically automatic. Each type of record is reproduced according to its exact requirements — the proper diaphragm, the exact needle, the precise weight.

The Ultona is a distinctly new creation, not an attachment or a make-shift. Every record is played at its best, whatever make.

The Brunswick Tone Amplifier is equally far in advance. Old acoustic problems have been solved. This brings the utmost in fine tone.

Only Brunswick Dealers have all the advantages and opportunities that come with the new Brunswicks. From every Brunswick Dealer we are receiving substantial and increasing orders, and generous expressions of increased success due to this bettered instrument.

In a number of cities there are openings for Brunswick Dealers, and in such places we offer complete co-operation. Maybe such an opportunity exists for you. Upon your inquiring, we shall be glad to explain our proposition.

The Ultona — a distinctive feature of the New Brunswick Method of Reproduction. Here the Ultona is in position for playing a Pathé Record. The Ultona is adapted, very simply, to play all records, whatever make, and play them at their best. Only The Brunswick has this wonderful feature.
Texas, especially around Dallas, was a bumper. In some parts of this section the corn is shoulder high. Wheat was fine all the way through Oklahoma, Kansas, Missouri and Illinois. This is the finest crop we have had in years, and if the present satisfactory condition continues it augurs well for our trade.

Business Is Flourishing

"Judging from the orders we are receiving from talking machine manufacturers for die cast parts, the trade is maintaining a healthy condition at present and counting on a substantial demand this fall," says L. D. Allen, manager of the die casting department of Burnhart Bros. & Spindler, this city. Mr. Allen also remarked that many manufacturers located in the Central States were finding it advisable to establish supply connections nearer home so as to avoid delays caused by embargo. Chicago labor for normal pursuits is more plentiful than in the East, where so many factories have been placed on munitions and war supplies exclusively.

Good Business in Pennsy.

A. R. Mitchell, of Williamsport, Pa., was a visitor to the Chicago trade this week. Mr. Mitchell, who is the Pennsylvania wholesale representative for the Empire Talking Machine Co., spoke very enthusiastically concerning the business conditions throughout his territory. "There seems to be no end to the business in sight for the talking machine men in our part of the country," stated Mr. Mitchell, due to the big wages of the munitions workers as well as large crop prospects.

Booze Versus Music

Hundreds of Detroiters are now buying music instead of booze, according to an article which appeared in a Detroit newspaper quoting Wallace Brown, the well-known Brunswick dealer of that city, as saying that during the brief time prohibition has been in force in Michigan many citizens who once used their dollars each week for drink are now buying machines and records instead. The people who purchase on the weekly payment plan are less often in arrears now since Detroit went dry. Mr. Brown stated further that he is selling more machines this year than last and traces the increase in his business directly to the abolition of intoxicating liquors. His portrait accompanied the article.

New Phonograph Office

The Chicago offices and wareerooms of the Manophone Co. have moved from their former quarters in the North American Building to Room 604 in the same building where they have more space and better opportunity for display. Manager A. C. Einstein has been on a trip through the South and Southwest.

New Factory Facilities for Wilson & Co.

W. E. Cottle, manager of the phonograph department of Thomas E. Wilson & Co., states that they have made arrangements by which they will have a large plant in Wisconsin devoted to the manufacture of Wilson machines. They will have a complete new line of seven machines and will be in a position to care for their trade as they have not been hitherto.

New Phonograph Co.

The Everson Phonograph Co., of Chicago, has been incorporated with a capital stock of $2,500. The incorporators are Thomas Wilkin-son, E. F. Hard and Raymond R. Canfield.

Opens Repair Shop

Oscar J. Kloe, well known in the talking ma-chine and piano trades of Chicago, has opened a talking machine repair shop in the Athenaeum Building, 59 East Van Buren street, and is already doing an excellent business. Mr. Kloe is making a specialty of dealers' work and has the facilities and expert assistance to take care of it promptly.

Vitamolka Bury

The Vitamolka Co. have been having an unusually fine business the past month, they report, and the demand from their distributors has been greater than they have been able to cope with. The Standard Phonograph & Ac-cessory Co., of Dallas, Texas, Vitamolka distribu-tors for the Lone Star State, have been running practically without stock, awaiting carbide shipments which are on the way.

New Incorporation

The Stetson Phonograph Manufacturing Co. has been incorporated with a capital stock of $3,000 by A. V. Carney, Francis V. Healey and B. B. Collins.

R. R. Souders for Service Abroad

Robert R. Souders, at one time with the Columbia Co. in Berlin, Germany, later manager of their branch at Dallas, Tex., for ten years and recently featuring the Sonora record for the Minneapolis Drug Co., passed through Chicago a few days ago en route for overseas duty for the Y. M. C. A. Mr. Souders is an active church man and is well fitted in every way for the work he is undertaking. He leaves behind him his family consisting of Mrs. Soud-ers and four children in Minneapolis where he owns a beautiful home.

C. J. Woodard Marries

C. J. Woodard, the Chicago representative for the New York Recording Laboratories, Port Washington, Wis., manufacturers of Paramount records, will be married on June 12 to Miss Elizabeth Roach, a charming young Milwaukee woman at the Jesu Church in that city. After a honeymoon spent in Michigan the couple will take up their residence in Chicago. Mr. Woodard is a man long connected with the talking machine and piano trades and since he took the Chicago representation for the Paramount people has not only widened his acquaintance in the trade, but has established some excellent ac-counts. He has a host of friends in Chicago and elsewhere who extend him their very best wishes.

Mandel Progress

M. B. Silverman, sales manager of the Man-del Mfg. Co., returned this week from a business trip East made especially for the purpose of

(Continued on page 79)
We Offer An Unusual Proposition To Dealers

It doesn't matter what make of phonograph you are now handling, you owe it to yourself to investigate what we have to offer you.

We have developed a great talking machine co-operative plan—one that enables the aggressive dealer to make big money on quality talking machines.

We are staking our money and our reputation on this proposition to establish successful talking machine dealers in every community.

In this advertisement we illustrate Model No. 3—our big seller. It is stately in design, wonderful in tone, and is sold under our guaranteed service. It sells for $125.00, and unquestionably represents greater value than was ever offered at this price.

This machine is one of the big factors in our co-operative selling plan.

Two additional models—Model No. 6 at $90.00, and Model No. 5 at $65.00, give the MANDEL dealer three popular priced machines, all of which embody high quality coupled with big value to the consumer.

What we offer you, Mr. Dealer, is liberal terms, liberal discounts, big profits, and our guarantee of absolute satisfaction to every ultimate purchaser of a MANDEL Phonograph.

Act quickly. Write for our complete proposition. We are closing up territory at record speed.

Model 3  
$125.00
perfecting their selling organization in that section. Mr. Silverman, formerly of the Hiawatha Phonograph Co., has been appointed manager for the new offices in New Jersey.

The company has recently developed a most liberal co-operative plan for the dealers which has met with the decided approval of those to whom it has been presented and are operating under it. "It enables the dealers to extend their talking machine business in a most satisfactory manner," said Mr. Silverman, "and our trade is showing its appreciation of our liberal policy. Details are naturally of a confidential nature, but we would be glad to take the matter up in detail with those who are interested." In view of the comparative shortage of machines, owing to war conditions, the company had decided to concentrate on the manufacture of three models only, and selected those selling at retail at $40, $60 and $125, as these had proven to be those for which the demand was the greatest.

Now Hiawatha Phonograph Co.

At a meeting of the stockholders of the Ottawa Phonograph Co. on Monday of this week it was formally voted to change the name of the company to the Hiawatha Phonograph Co. The new name incorporates the name of the company's product and avoiding reference to the former location of the plant. The new factory at Geneva is now in full operation and shipments are going forward in a most satisfactory manner.

The company is to be congratulated on the very speedy recovery from the fire which destroyed the Ottawa plant only a few weeks ago and the loyalty of their dealers, none of whom canceled their orders, but expressed evidence of their appreciation of the merits of the Hiawatha line. The new plant is splendidly equipped for the production of quality goods, and the Hiawatha phonographs are coming through in more perfect condition than ever. The general offices and warehouse wereans of the company are, as from the inception of the business, on the tenth floor of the Republic Building, Chicago.

Brunswick News Items

"Business with us has really never been better," said H. B. Bibb, sales manager of the phonograph division of the Brunswick-Balke-Col- lender Co., "and our entire attention at this time is being given to the matter of increased production. Both our Chicago and Dubuque factories are working overtime and we are scouring the country for experienced woodfinishers, coarse rubbers and trimmers. This class of labor is scarce, but we have been able to hold our old employees and secure a number of new ones. We have found it necessary to discontinue work of our small contracts and are not accepting the larger ones except in a few cases where representation is particularly desired."

W. T. Houston, formerly assistant manager of the Brunswick Shop, Chicago, has now been appointed manager of the Brunswick Shop at Toledo, O.

Morris Summerfield, who has been in charge of the record stockroom at Brunswick headquarters here, left this week for the Great Lakes naval training station.

The Field-Lippman Piano stores at Dallas, Texas, and Flat River, Mo., have taken on the Brunswick line.

Emerson Activities

F. W. Clement, manager of the Chicago branch of the Emerson Phonograph Co., reports a very big demand for their new nine-inch records. This record is proving to be a very attractive seller with the trade, due to its keeping up with the popular music of the day. "Our shipping department is kept busy all the time in supplying the entire Central West from this office. We have established quite a number of big accounts during the last month and are carrying on an extensive advertising campaign throughout the local newspapers of Chicago as well as the papers in the States adjacent to Illinois. The demand for seven-inch records has grown and we are keeping up to date with these records as well as with the new ones. We have put on two new traveling representatives for Michigan and Indiana. Harry Zimmerman is covering the former State for us and H. T. Steiner is our new man for Indiana."

Uncle Sam Kicks the Kaiser

The Aeolian Vocalion is attracting passersby to its window by means of a little automatic contrivance which sets upon the record impersonating by means of two miniature dolls Uncle Sam kicking the Kaiser. This is placed by an attractive sign bearing editorial comment from the New York Sun relative to this little contrivance. It is identical with the one that attracted so much attention throughout the trade several summers ago wherein Uncle Sam was boosting Villa, but in this instance Uncle Sam is being kept busy using his foot on Wilhelm.

More Stars on Service Flag

The large service flag in the retail Vocalion wareerooms on Michigan avenue which bore 803 stars has had three more added to it this week, A. C. Mason and Fay Fulton, both of the sales force, having entered the service. H. W. Fredricks, cashier, has also been called to the colors. Messrs. Fredricks and Mason went into the army, but Mr. Fulton joined the navy.

Over the Top

Edison Men to Convention

Among those making up the large party of Edison dealers who left on the evening of June 4 for the Edison dealers' convention at New York were E. A. Vaughn, of Princeton, Ill.; Zor Hagley, of South Bend, Ind.; Frank Hoover, of Sterling, Ill.; H. E. Wigle, of Towle & Hypes, Clinton, Ill. The party which was in charge of A. D. Wayne, retail manager of the Phonograph Shop, Chicago, departed off for a day's visit to Niagara Falls before going on to New York, where they arrived Thursday morning. C. E. Goodwin, general manager of the Phonograph Co., had intended to be among those going down, but business matters necessitated his leaving for New York on last Friday.

New Diaphragm Perfected by Scottford

L. K. Scottford, the inventor of the Superior reproducer, Scotch tone arm, and other phonograph specialties, has perfected a new dia-

A Tonal Wonder

The Moreenus Phonograph has won widespread recognition because of its unusual tonal quality. The novel all-wood horn which enters at the bottom (not the top) of the scientifically constructed tone chamber has proven itself astonishingly efficient in securing a most pleasing tone and a remarkably faithful reproduction of the record.

The Equipment is high grade in every respect, plays both types of records, has cover support setting top at any desired angle, original tone moderator, etc.

The Moreenus cases are superb productions in every respect.

The MOREONUS is in 3 STYLES

very large increase in business for the month of May over that of the corresponding month of last year. "In comparison with May of this year and May of last year," stated Mr. Fibrin, "we have more than doubled our business. The month of June is starting out very good and from present indications will undoubtedly overlap June of last year. Shipments of records are coming through in fine order, but machine shipments are not coming through the way we would like to have them."

C. F. Baer, assistant manager of the Columbia Phonograph, has been a very busy man these days holding two jobs. One is his regular position with the Columbia Co. and the other is as a juror in the Civil Courts.

Visitors and Personal

James C. Meagher, of the Forbes-Meagher Music Co., Madison, Wis., spent a few days in Chicago the early part of the month.

H. L. O'Brian of the retail sales force of the Aeolian Vocalion has been called to New York owing to the death of his father. Mr. O'Brian, Sr., it is said, was one of the most prominent dental surgeons in the city of New York.

Mr. Henschen, manager of the phonograph department of Scruggs, Vandervoort & Barney, St. Louis, was a Chicago visitor this week. He reported business with his house as good and came to Chicago to see what the prospects were of securing goods.

Earl C. May's New Post

Earl C. May, who for the past year has held important positions, including that of advertising manager, with Bunte Bros., of Chicago, has resigned this important post, and on June 17 will assume charge of the advertising and sales for the Cheney Talking Machine Co., whose products are steadily gaining in popularity throughout the country. Mr. May's headquar-
ters will be at 725 Marshall Field Annex.

INTRODUCING THE NIGHTINGALE

Details of the Progress of the Nightingale Mfg. Co., Who Make the Nightingale Phonograph, Under the Presidency of H. B. Wolper

CHICAGO, ILL., June 1—The Nightingale Mfg. Co., whose well-appointed factory is at 428 North Armour street, is a concern that has grown rapidly since the inception of the business seven years ago. Harry B. Wolper, the president, is a thoroughly practical man and has en-
tire active charge of the business, the other officers and stockholders being prominent men associated in other lines of trade. From the beginning Mr. Wolper worked along extremely conservative lines until they knew that they had passed through the experimental stage and had a machine which they could successfully offer to the trade at large. The machine proved a success at first and successive increases in out-
put have been necessary. Only four months ago they added an entire additional floor in the large building in which their factory is located. Un-
like many of the newer manufacturers, the company makes all its own cases and takes a great deal of pride in their perfection. There is no skimping anywhere. Not only are the finest veneers used in the panels, but all the solid parts of the case are made of genuine mahogany, oak or walnut as the case may be. The company have sought to use the very best possible equipment in their machines and are proud of the fact that the Nightingale is equipped with the Stephenson precision-made motor, a fact which Mr. Wolper says has enabled him to eliminate motor complications entirely. They are using the Scofield tone arm and reproducer and the best possible equipment throughout. The choice of the name, Nightingale, for the talking machine was a happy one and the at-
tractive trade-mark is becoming increasingly well known in the trade. An artistic announce-
ment from this company appears on page 23, this issue.

TAX ON SALESMEN IN ARGENTINA

The matter of replacing the various separate provincial taxes on commercial travelers in Argentina by a single tax for the entire coun-
try has again come up for discussion, according to Commercial Attaché Robert S. Barrett in Buenos Aires. The proposal is indorsed by the leading newspapers of Buenos Aires, which point out that the overcentralization of Argentina's business, making Buenos Aires the center of commerce, is largely due to the old system which has tended to keep commercial travelers out of the interior of the country. It is thought that a law requiring these "commercial mis-
sionaries" to pay one tax to the Federal Gov-
ernment which would permit them to take their samples anywhere in the country would do a great deal toward developing the business of the entire country more evenly.
The Orotund and Superior attachments are the only scientifically perfected outfits on the market, playing all makes of records, producing the greatest musical results, positively reducing surface sounds, and in many instances entirely eliminating disagreeable scratching and nasal effects. If you have not as yet had a real demonstration as to the highest type of music and entertainment from the various makes of records, you should visit our office, or ask for a personal demonstration.

It, after hearing our different attachments and reproducers with a few of the most beautiful records ever recorded, you do not believe we have produced some wonderful results which you have never before thought possible on a talking machine, we will then apologize for wasting your time.

You will increase your sales of records by having these attachments.

We guarantee to improve the tone of your machine. We sell attachments, tone arms and jewel points, Diamond and Sapphire.

Write for circulars and prices.

MISS ESSEN IN UNIQUE POSITION

Is the Only Woman Demonstrator in the Wholesale End of the Talking Machine Trade—Now With James B. Orth & Co., of Chicago

CHICAGO, III., June 6—No, Helene Essen is not a movie actress, but a much rarer specimen of femininity. She is said to be the only traveling woman demonstrator of phonographs in the wholesale end of the talking machine business.

Helene Essen

When the Edison Diamond Disc phonograph was first introduced to musical Chicagoans, Miss Essen occupied the platform in the concert hall of the Edison Shop, and gave "Talks With Records," showing the merits of the instrument, and gave facts and anecdotes concerning the artists and composers. Later, she helped to introduce the Sonora, and now she is connected with James B. Orth & Co., of 422 Re-

Attention!

Victor, Edison and Columbia Dealers and Distributors

Don't forget, when a customer question you as to what attachment will equip his machine to make it universal, in playing all makes of records most perfectly and without destruction, that

The public Building, this city, where she is demonstrating to dealers the merits of the new Puritan phonograph.

In discussion the Puritan she said: "If you love a jazz band or the beautiful organ tones of a saxophone alone, you will quickly understand the point the Puritan scores in the 'Saxophone Construction' of its tone chambers. It is just this long horn construction that makes the music, whether it is Gulli-Curlo's singing, or Sousa's Band playing brass instruments, as mel-

There might be a few more points to you, you will find yourself an enthusiast before you know it.

Miss Essen is tackling a regular man's size job, but says that is always what she wanted, and now feels she can take it without cheating some poor man out of a job, because he is needed "over there."

TO MAKE BUYING PLEASANT

S. E. Lambert Tells of the Good Work of the Columbia Co. in Printers' Ink

Under the heading of "Campaign to Make Buying a Pleasant Transaction," S. E. Lambert presented in last week's "Printers' Ink" a very interesting article in which he called attention to the campaign that is being inaugurated by the Columbia Graphophone Co. to make it easy to shop for talking machines.

Included in this article were reproductions of some of the recent advertisements used by this company in its national advertising, and the text of the article emphasized their distinctive features, pointing out that the advertisements that have been appearing the last few months are designed to make it easy to people to buy a Grafonola. The article further reads:

"George W. Hopkins, general sales manager of the company, and for another reason why it is advisable to employ such copy at present. Thousands of workmen are now earning more money than they ever dreamed of making before.

For the first time in their lives a musical instrument is possible and naturally many of them will wish to gratify their desire to own one. However, these men are not accustomed to going into elegant stores, such as phonographs are sold in. They are apt to be a bit shy about visiting such places. The advertising overcomes their hesitancy and makes it much easier for them to take the step.

"The make-it-easy-to-shop appeal is not monopolizing the campaign. Another object of the effort is to give a comparison and distinction to the product. An interesting phase of this end of the advertising is the publicity that is brought to bear on the company's Fifth Avenue shop in New York. This shop is regarded as one of the handsomest specialty stores in America. Something over $80,000 was put into its furnishings. Each demonstration parlor in it is furnished to correspond with the line of reproducing designs of the cabi-

The Scotford Tonearm and Superior Universal Reproducer

The Ideal Combination

Plays All Makes of Records as they should be played

Price of Sample Prepaid

Nickel, $2.25, Gold, $6.50

Distinctive Features

The Reproducer pins on in axis (as illustrated above), taking the correct angle for all makes of records, but the needle retains same center in both positions. Slight noise is less than with other reproduced—surface scratchings being reduced to a minimum through perfect perfection of design and placing the needle in the center of the groove at the correct angle.

The split construction of the frame and face ring of the Reproducer, together with the method of placing the stylus bar, and perfect insulation, effects a sensitive and free vibration—and prevents a pinched tone resulting at any time from natural contraction or expansion of the metal parts.

The reproduction is the mellowness, natural quality of tone—absolutely quitting away from the nasal sharpness and metallic effect so noticeable in most reproducers. The sound development upon the same principle as light waves—they travel in a straight line until they meet some obstruction, from which they are deflected at right angles. The right angle lathe at the back of the Scotford Tonearm causes less breaking up and confusion of the sound waves than occurs in the curved arm.

The connection between the Reproducer and Tonearm is perfectly insulated with a hard rubber bushing. The connection of the Tonearm is correct to accommodate the volume obtained from the latest reproducer.

The right-size turn for changing needles is higher than the old style turn-back, and when in position for the Hill-and-Dale records there is no interference with the operation of the cabineet.
CONDEMNS HOARDING OF MONEY

Rotary Club Editorial Urges Normal Spending for Luxuries, Especially in View of the Fact That War Has Brought Profit to Many

In the page conducted in the New York Tribune by the local Rotary Club each week, there appeared recently a most convincing editorial on the fallacy of hoarding and saving to an unusual degree during these war times. It is all well enough, the editorial declared, to save for a rainy day, as the average individual is taught in childhood. The editorial continues, however, to say:

"But there is a difference between saving for a rainy day and hoarding up money for a peaceful one.

"The war has profited many. Men whose manual labor brought them little more than the proverbial crust of bread in years gone by, today, by that same labor, are able to afford a talking machine, a suburban lot, or even a flivver. Men whose particular business has been an atrophied branch on the tree of commerce have had an influx of orders which have simply swamped them.

"To save this country from a financial panic and subsequent business depression which would prove fatal under the existing conditions, it is necessary to put that money in circulation. It must not be hoarded!

"It is legitimate to make unexpected money. It is legitimate to save some of it to guard against future discomfort. But it is deliberately illegitimate to corner currency or merchandise at this critical period.

"Get busy and circulate your money. This is no time to have a 'one way pocket.' If your profits warrant it, be as profligate as your nerve permits. Paint your house. The painter needs the money and will sing your praises.

"Buy a talking machine and send your old one to one of the camps. Ride in taxis. Even though you suspect the chauffeur of being a thug he may have a wife and eight very hungry children to support.

"Buy generously of things not needed on the other side—the shopkeeper's rent is the same, if not increased. Spruce up your wardrobe.

AIDS RED CROSS IN NEW HAVEN

Loomis Temple of Music Arranges a Most Effective Window Display While Manager Leichter Assists in Collecting Funds

New Haven, Conn., June 3.—One of the most effective window displays in this city in the interests of the Red Cross drive, which ended recently, was that arranged by the Loomis Temple of Music at 387 Chapel street. The display was simple but effective.

"Perhaps the designer, the buttonhole maker and the tailor are too old to enlist or learn a new trade. Circulate your money. Help people to smile. Don't compel them to weep. And if you can, forget about that rainy day. Because if there ever comes a day rainier than this one, God help us all. It is the world's Rainy Day! Keep moving yourself. And keep your money moving. That's what is going to make the Kaiser move from Berlin to Bondage!"

The Friedberg Talking Machine Co., Brooklyn, N. Y., has been incorporated with capital stock of $10,000 by T. W. Guttenberg, H. Schnapp, and N. Friedberg.

Red Cross Window at the Loomis Temple of Music instruments, sheet music, etc., handled by the company.

R. A. IZOR BECOMES SALES MANAGER

Well-Known Talking Machine Man Appointed Sales Manager of the Brunswick Shop in Indianapolis—Has Had Wide Experience

Indianapolis, Ind., June 8.—R. A. Izor, who has been identified with the phonograph business in Indianapolis for a number of years, has recently been appointed sales manager of the Brunswick Shop. George F. Standke, manager of the shop, is pleased with the acquisition of Mr. Izor to his sales force.

ENLARGE VICTOR DEPARTMENT

Terre Haute, Ind., June 8.—Four new and attractive soundproof demonstration rooms have just been completed for the enlargement of the Victrola department of the Hera store. The rearrangement of the department also provides for more attractive display packages and more convenient record stock files. The new department was formally opened on Wednesday, Thursday and Friday, June 5, 6 and 7, with special musical programs which pleased the large audiences in attendance.
National War Savings Day
June 28th

That’s the day we sign up.

That’s the day we tell Uncle Sam just how hard we want to win this war. That’s the day our government has officially set for us to purchase War Savings Stamps.

On June 28th every man, woman and child in the United States will be called upon to pledge his or her full quota of War Savings Stamp purchases for 1918.

You will be expected to pledge the full amount that you can afford—no more—but by the same token, no less.

In every state, county, city, town and village the War Savings Committees are preparing for this big patriotic rally of June 28th. Unless you have already bought War Savings Stamps to the $1,000 limit, get busy with paper and pencil and figure out the utmost you can do.

Remember this. You take no chances when you go the limit on War Savings Stamps. They are the best and safest investment in the world.

They pay you 4% interest compounded quarterly. They can’t go below par. You can get back every dollar you put into War Savings Stamps any time you need it. You can turn them in at the Post Office any time for their full value plus interest.

Uncle Sam is asking hundreds of thousands of men to give their lives to their country. He is asking you only to lend your country.

What are you lending?

National War Savings Committee, Washington
THE TALKING MACHINE WORLD

ANNUAL MEETING OF PORTLAND, ORE., ASSOCIATION

Many Subjects of Interest to Talking Machine Trade Considered at Meeting of Portland Men—E. B. Hyatt Unanimously Elected President—Other Officers—Shortage of Records Discussed

PORTLAND, Ore., June 4.—Early closing of the talking machine houses in Portland on Saturday evenings during the summer months was decided upon at the regular monthly meeting of the Portland Talking Machine Dealers’ Association which was held at the Imperial Hotel Wednesday evening, May 29, at which twenty-seven dealers were present and at which the Victor, Columbia, Edison, Brunswick and Sonora machines were represented.

As to early closing it was decided that in June all talking machine dealers would close their stores at 7 p.m. and during July, August and September at 6 p.m.

Paul R. Norris, manager of the Wiley B. Allen Co. talking machine department, called the attention of the dealers to the fact that it could only be suggested to dealers not belonging to the association to observe this rule, and that they would have to decide for themselves relative to early closing, although he maintained that the propriety of a suggestion could not be denied. Taylor C. White and C. A. Alphonse were appointed a committee to get signatures of those agreeing to the early closing plan irrespective of what non-members of the association might do.

Interest on deferred payments was one of the principal topics of the session. With the exception of the furniture stores and department stores—all of which handle talking machines—all dealers in talking machines have adopted the interest plan. H. E. Burr, who has charge of the talking machine department of Gadsby’s Furniture Store, thought it very probable that the firm would adopt the plan of the talking machine houses. W. Matney of the Meier & Frank Co., thought the management of that big department store would also fall in line. James Loder, manager of the phonograph department of the Bush & Lane Co., suggested that the furniture and department stores might co-operate if they were asked to do so and were invited to join the association.

E. B. Hyatt was unanimously elected president of the association at the annual election, which was one of the features of the meeting. Taylor C. White was elected vice-president and C. A. Alphonse secretary, and W. L. LeVanway, who has been acting secretary for two months, has joined the signal corps and will leave Portland in a few weeks. He will be much missed by the association, as he has been one of its most valued members.

On announcement of his enlistment, the entire membership rose silently and stood at salute in tribute to the young patriot.

Shorthand of records came in for interesting discussion and revealed a rather serious condition in the trade. It was brought out that word from the factories of the Columbia, Victor and Edison people was that the labor shortage was acute and that many women are filling places formerly held by men. L. D. Hunter, manager of the Columbia branch in Portland, said that in the London factory of his firm there are only two or three men left and they are old men unfit for war. He pointed out that it is impossible to supply goods in England, despite England’s reduced purchasing power, so said it could be seen readily how hard it must be to meet an ever-increasing demand in this country. Dealers on the Coast are inclined to look for a serious shortage in the fall, especially as the Government will use more cars for wheat and troop movements.

The question of sending out records on approval was again brought up and it developed among the dealers that almost all had discontinued the practice, save in the cases of well-known customers who really wanted to buy after hearing the records at home. It was brought out that the custom had been abused, but E. B. Hyatt showed a card which he pastes on all records taken out on approval which he thinks has solved the difficulty. This card reads:

EXTRA SPECIAL

When records are taken on approval and none retained, a minimum charge of 50 cents will be made to cover cost of bookkeeping and clerical expenses.

Mr. Hyatt said this relieved them from a great deal of trouble from people who would get records for use at parties and return them the next day without purchasing any.

C. Guy Wakefield, of the Wakefield Piano C.; H. E. Burr, of Gadsby’s Furniture Co., and W. A. Matney, of the Meier & Frank Co., were elected members of the association.

TELLS OF BUSINESS GROWTH

Chas. Staffelbach, Who Visited New York Last Week, Reports Big Pathé Business Being Done by the Hellrung & Grimm Co., St. Louis

Chas. Staffelbach, manager of the Pathé division of the Hellrung & Grimm House Furnishing Co. of St. Louis, Mo., Pathé jumbos, was a visitor to New York this week, spending some time at the executive offices of the Pathé Frères Phonograph Co., and also visiting the Pathé booth at the music show. In a chat with The World Mr. Staffelbach commented upon the fact that his company is closing a remarkable Pathé business, the sales of Pathéphones and Pathé records so far this year showing a substantial increase over the entire year of 1917. He states that Pathé products are gaining rapidly in popularity throughout his territory, and that his house is planning to institute an aggressive Pathé campaign in behalf of this line, which will include active and intensive cooperation with the Pathé dealers. He placed a good-sized order while in New York, and judging from all indications his optimism will be reflected in a banner Pathé business this coming fall.

WM. A. CONDON, Sole Agent
CONVENTION OF JOBBERS' ASSOCIATION IS POSTPONED

Membership Votes Almost Unanimously to Call Off Annual Gathering Scheduled for July at Atlantic City, Owing to War Conditions—Follow Recommendation of Executives

It has been officially announced that the annual convention of the National Association of Talking Machine Jobbers, scheduled to be held at Atlantic City, July 1 and 2, has been postponed indefinitely, as a result of the practically unanimous vote of the membership of the organization. It was felt by the officers that in view of war conditions, and the general situation existing in the trade, no real benefit could be gained by holding a general convention, although it is probable that a meeting of the executive committee will be held in the near future.

The abandonment of the convention brings up the question of taking care of the annual election of officers at the expiration of the present term, but some move will likely be made to re-elect the present board.

Secretary J. C. Roush, secretary of the association, sent out a general letter to the members under date of May 31, the letter reading in part as follows:

"At the executive committee meeting of our association held in Philadelphia, April 22 and 23, the advisability of holding our convention this July was thoroughly discussed and it was the consensus of opinion of your committee that this year's convention be called off for patriotic and other reasons. Final action was to be postponed, however, until May 20 to await further developments.

"Nothing having arisen, however, to justify a reversal of this opinion, I have been instructed by President Blackman to notify you that your executive committee recommends that no convention or meeting be held this year, unless conditions change enough to make said meeting necessary, at which time you will be asked to vote on the advisability of holding a meeting in the fall. Every member is aware of the constant changing war and other situations affecting our business, and it is believed that we will show a more patriotic spirit by not meeting as usual in Atlantic City this year."

In voting against the holding of the convention as scheduled, the members of the organization agreed thoroughly with the officers on the fact that their interests could best be served by postponing the proposed convention indefinitely. Should the situation warrant it, a general convention of the body may be held some time in the fall.

BECOMES GENERAL SALES MANAGER

John A. Cromelin, of International Fame in the Talking Machine Trade, Assumes This Important Post With the Otto Heineman Phonograph Supply Co., New York

Otto Heineman, president of the Otto Heineman Phonograph Supply Co., New York, announced this week the appointment of John A. Cromelin as general sales manager of the company. Mr. Cromelin will assume his new duties next week, and make his headquarters at the executive offices of the company, 25 West Forty-fifth Street.

John A. Cromelin is one of the best known members of the talking machine trade, having been associated with the industry for many years. Until recently he was vice-president and general manager of the Columbia Graphophone Co., and for a number of years held the important post of general manager of the Columbia Co.'s European interests with headquarters at London. He possesses a thorough knowledge of every phase of talking machine manufacturing and merchandising, and is generally recognized as one of the ablest executives in this field. Mr. Cromelin has for some time been a keen admirer of the plans and policies of the Otto Heineman Phonograph Supply Co., and the rapid strides that this company has made the past two years will doubtless enable Mr. Cromelin to develop the sales of Heineman, Meisselbach and Dean products to excellent advantage.

Mr. Cromelin will, of course, devote a considerable portion of his time to the new Heineman "OkeH" record, which was placed on the market last month. This record is achieving signal success, and Mr. Cromelin's intimate familiarity with record production and merchandising will undoubtedly contribute to the international success of the "OkeH" record.

“MOBILIZED in the SERVICE of OUR COUNTRY”

Vallorbes Economical Semi-Permanent Needles perform more than double duty—their use not only conserves steel for vitally essential war weapons and materials, but serve their users in equally as serviceable and effective manner.

If you are inclined to these needles simply because of patriotic motives or perhaps on account of the shortage of steel needles, you have a surprise awaiting you, for, unlike most enforced economies, they really do you a favor—either as a dealer or user. In the first instance, they attach to the sale of a single package, the highly required and desired profit, and, in the second case, their reproducing qualities are really wonderful—no needles yet have quite equalled them. This is especially true of the soft and medium tone grades. Finally, they also do the records they play a real favor, for it is quite obvious that with their parallel shape of needle points that do not enlarge their diameter as a result of wear, they cannot exert unequal wearing influences on walls of record grooves, as do the old style changeable steel needles, all of which are tapered in shape and dimension, and which from the start of playing a record to the finish is undergoing a change in dimension from which arises the necessity of discarding the needle once used.

Vallorbes Semi-Permanent Needles are made of a special alloy metal, which results in combining to an appreciable degree the hardness of carbon and the toughness of chrome. Moreover, being made of one piece throughout, there are no separate points to work loose and a better sympathetic relationship arises with stylus bar of sound box than would be the case with a separate needle point inserted into a different kind of metal holder. Furthermore, this one-piece construction also permits of three separate and distinct tone grades, i.e., soft, medium and loud.

Neat, handy and attractive cards are especially made to accommodate these needles. Each card of five needles is placed in a separate transparent moisture-proof envelope and readily retail for 15 cents for the card of five needles and play far more records than 15 cents’ worth of old-style changeable steel needles.

They are packed for shipment in cartons containing 100 packages of a tone grade, and, as orders invariably follow samples, better save time and order a carton of each tone grade at once, otherwise,

Send 30 Cents in Stamps for a Sample Card of Each Tone Grade

GETTING AFTER THE VACATIONIST

Talking Machine Retailers Now Have Opportunity for Realizing on Stocks of Smaller Machines for Use of Campers, Etc.

From practically every section of the country comes the report that the heaviest demand is for the higher, or rather medium-priced machines, those selling from $75 up to $165 or so, and that therefore the most serious machine shortage is found in the styles retailing at those prices. At the same time, both wholesalers and retailers have on hand for the most part substantial supplies of the smaller types of machines, those without tops, retailing for $35 or

Wiley B. Allen Co. Vacation Window

less, and for which the normal demand is not at all heavy at this time.

Quite a number of retailers have already realized that this year, as has been the case in other years, the small machines in substantial numbers can be sold to campers and vacationists generally, who do not care to subject their high-priced machines to the rough handling and exposure incident to the summer vacation. It would seem that this year particularly an especially strong drive should be made to place the small machine, and thus make up in some measure for the loss of business, due to the shortage of the more elaborate models.

There has already been received at The World office numerous photographs of special window displays designed to attract the attention of vacationists, and the accompanying view of the show window of the Wiley B. Allen Co., Portland, Ore., offers a fair example of elaborate window treatment.

The campaign should not stop at the window, however, but machines for vacation use should be advertised strongly and matter sent out through the regular mailing list and advertisements in the resort sections of the local newspapers. Publicity in summer resort booklets and advertising sections of newspapers hits the vacationist just as the time he is making his plans for the summer and therefore at a time when he is most interested.

TO HELP IN THE WAR

Must Back the Government With All Our Strength—How Best to Do It

President Wilson, in his statement calling upon every man, woman and child to pledge themselves on or before June 28 to save constantly and to buy regularly the securities of the Government, says: "May there be none unenlisted on that day!"

As the President points out, "This war is one of nations—not of armies—and all of our 100,000,000 people must be economically and industrially adjusted to war conditions if this nation is to play its full part in the conflict."

Our nation, not our army and navy only, is at war. And that means that all of us not actually fighting must do our part.

That part consists in giving the army and the navy all the support of which we are capable. To do that each one of us must first of all be a producer to our maximum ability and a consumer of necessities only, for every bit of man power and every particle of material is necessary for the use of the army and navy and for the making of the things essential to our citizens.

As a maximum producer and as a consumer of necessities only, each one of us will be an accumulator of savings. And these savings can be invested in War Savings Stamps with benefit both to the Government and ourselves.

CHANCE TO MAKE FIFTY DOLLARS

One of the surprises at the National Music Show held in New York last week was the offer of a prize of $50 in Thrift Stamps by The Music Trade Review, New York, for the best article treating on "The Value and Importance of Music in War Time." The judges to pass upon the merits of the essays submitted are Lieutenant John Philip Sousa, C. M. Tremblay and the Editor of The Review. The contest closes on June 20.

LAW TO END TRADE BRIBERY

WASHINGTON, D. C., June 6—The Federal Trade Commission last month sent to both branches of Congress a communication urging the enactment in the public interest as an aid to the preservation of fair and free competition, a sufficient law striking at the unjustifiable and vicious practices of commercial bribery; and that such law be so comprehensive as to strike at each person participating in any such transactions.

The Federal Trade Commission found commercial bribery to be general throughout many branches of industry, and scores of complaints have been issued by it on that account. Fourteen States at present have laws prohibiting such practices.

3 West 29th St. New York City
NEW YORK TIMES ON "MISTREATMENT OF 'BIG BUSINESS'"

Prominent Metropolitan Newspaper Treats Most Illuminatingly in Its Editorial Columns of Recent Supreme Court Decision in the Shoe Machinery Combination Litigation

Under the caption, "Mistreatment of Big Business," the New York Times in a recent editorial made some illuminating comments on the decision of the Supreme Court in the shoe machinery combination litigation which will be read with interest by business men in every line of trade in view of recent developments in this and other industries. It is a comprehensive handling of a question which is of vital moment to business men who desire to build up a business along honourable lines of expansion that will be of benefit to the nation and to humanity and still enjoy protection for their rights. The editorial read:

"For seven years the Shoe Trust has been bitterly pursued upon what the Supreme Court calls the 'innuendo' of the Government that it restrained interstate trade. By four to three the court decides that the Government was wrong in its aspersion as matter of law. As the court was so evenly divided, the defendant trust can hardly be blamed for a course which had never been condemned by authority and which was approved by business practice. The acquittal of the trust is condemnation of its persecutors because they have so persistently refused to take their law from the courts. One Attorney General has even gone so far as to complain that he alone cannot enforce the law against restraint of trade. He formally expressed his regret that 'a number of Federal judges have been and still are apparently reluctant to enforce the Sherman act.' Now the highest court asserts that the Department of Justice prosecutes by innuendo on a mistaken view of the law.

"If the case stood alone, it would be an undesirable state of affairs, but it is only one of many cases. Only a short time ago Government representatives sat around the same table with many distinguished defendants, at the suit of the Government on complaints which the Government could not proceed with. Public interest would not allow that seven suits against the biggest of the trusts should be pressed to a conclusion, although the trusts were eager for finality regarding their legal status. Such a condition of affairs indicates nothing less than a reign of terror which should be ended. Is it extreme to take the position that the Attorney General and the trusts alike should take their law from the courts?

"Another suggestion—the trust cases are mostly prosecuted and decided on the law rather than the facts. There have been not a few cases where trusts were attacked on the ground that they restrained trade under the law, although they promoted trade in fact. In the Shoe case there is no question that the manufacture of shoes is not included in the trust's business and a fact about the machinery trade. The interest of the public is that the law should be enforced, and restraint of the machinery trade is not to be condemned, if proved. But the public interest is rather in shoes than in machinery, and the effect of the trust's plan is affirmed by the court to be helpful to the small shoemakers, who were able to operate with leased machinery which they could not buy. To prosecute big business which helps the little man in business cannot be justified. If there were complaint from the public that the making of shoes was obstructed, or made costly, or that other shoemakers were stopped in their trade by the trust, the Department of Justice might have an excuse for its persistence. But the public is not in court, except through the Attorney General. This is a question that the victims of the lease system were not in court.

"All unobserved, there has grown up a practice to make the country's business not be convicted of anything. Within a few days a plea of guilty has been accepted by the Attorney General in what might be called his personal court. He arraigned the trust before him, and the trust accepted his view of the law rather than contend in such an unequal contest. It is natural enough, and yet those trusts which resist such practice are more to be distrusted. The Department of Justice is empowered to prosecute the guilty, but it is an innovation that the Attorney General should arrange the terms of which business men may engage in interstate commerce without the assistance of the courts. If such trade licenses are to be issued, it should be by authority of law by a judicial official who has been given the authority which the Attorney General seems to usurp. Between the abdication of the Interstate Commerce Commission and the quasi-usurpation of the Department of Justice, the men of large affairs who wish to obey the law are put in an undeserved quandary. The railways and the trusts have deserved discipline and have been scourged until they have repented. Is it not also time that the Government should recognize that conditions have altered, and that the law has teeth enough of its own, without a false set condemned by the courts and common sense?"

**BRUNSWICK NEWS IN NEW YORK**

**Occupying Larger Quarters—New Dealers Appointed—Many Visitors During Month**

The Brunswick-Balke-Collender Co. have moved the New York branch of their phonograph department to the second floor in the same building facing at 29 West Thirty-second street. This change has provided larger and more attractive quarters for the proper display of their exceptional line of talking machines.

The space formerly occupied by the department is now being used by the Railroad Administration of the Government for an immense midtown ticket office for all roads.

Two models of the Brunswick phonograph were sent to the music show held at the Grand Central Palace, New York, during the past week and were to be seen at the attractive display of the Brilliance Steeple Needle Co., where they were used in demonstrating these needles.

P. L. Deutsch, assistant secretary of the company, came East from his headquarters in Chicago to attend the music show, also F. H. Walters, of the Boston branch sales staff. Mr. Walters reported excellent business in his territory.

During the many Brunswick dealers in town for the occasion were O. A. Field, of Field-Lippman Co., St. Louis, and John Duncan, manager of the Brunswick department in the Gambles-Desmond Co. store in New Haven, Conn. Mr. Duncan placed his fall order while in town.

Among the list of new Brunswick dealers for the month is James Quinn, of Brooklyn. Mr. Quinn is a well-known dealer and the prestige of the Brunswick line in that borough is greatly enhanced by his taking over the line.

S. Irsin, 410 Grand street, New York, has also installed the Brunswick line in his new store on Second avenue.
ANNUAL OUTING OF THE TALKING MACHINE MEN, INC.

Annual Red Letter Event Takes Place on Wednesday, August 7—Bear Mountain Will Be the Rendevous and Every Talking Machine Man Should Keep the Date in Mind

Mark the date on your calendar now with a big red circle, Wednesday, August 7, the date of the annual outing of the Talking Machine Men, Inc.

According to information already obtainable regarding the plans for the affair it will be a genuine trade event, and the member of the local trade who is unfortunate enough to miss it will be cheating himself out of some real enjoyment.

The outing will be held at the Bear Mountain Inn, the popular up-the-Hudson resort, and arrangements have been made for the party to sail up the river on the Albany Day Line, leaving the foot of West Forty-second street at 9 a.m.

In order to prevent the trip from becoming monotonous in any sense J. J. Davin, of the New York Talking Machine Co., has arranged for the original Dixie Land Jazz Band from Reisenweber's to accompany the party and fill the air with sweet melodies on frequent occasions during the sail and at the park. The band has donated its services for the occasion, in appreciation of efforts put forth by Mr. Davin in its behalf. There will also be other surprises in the way of entertainment during the day.

At Bear Mountain there will be a baseball game between Columbia and Victor interests in the association as the chief event. There will also be races of various sorts and other amusements in sufficient variety to suit all tastes.

An elaborate dinner will be served at the Bear Mountain Inn at 1 o'clock. Those in charge of the arrangements urge that jobbers and dealers not only attend themselves, but arrange to let as many of their employes off for the day, in order to make the affair successful in every way. It is felt that with employes called upon to do much extra work through shortage of help, a little recreation is really due them.

The committee in charge of the outing consists of Sol. Lazarus, E. Leins, J. E. Hunt, J. T. Coughlin, Saul Birns and J. J. Davin. Information regarding the outing, as well as tickets, may be obtained from A. Galuchi, treasurer of the Talking Machine Men, Inc., 724 Bergen avenue, Jersey City, N. J.

SOME HINTS ON CLEAN BUSINESS

Misdirected Effort and Pop Back of the Wrong Product Often Gets Surprising Results—The Proper Idea Is to Put Energy Behind the Right Kind of Business and Right Product

J. E. Gerlick, a well-known figure in the Western music trade, contributes some words of value to every talking machine salesman who believes in doing business on an energetic, straightforward basis, in the following remarks:

The truth will win if we make serious efforts to disseminate it. Enthusiasm and energy carry with them a convincing power.

Unfortunately this convincing power results from enthusiasm and energy put forth in the wrong cause, just as truly as when expended in the interests of right.

Visit a minute! Perhaps "unfortunately" is not the right term to use in relation to the unfortunate fact just stated. Maybe it's fortunate that this is so. Perhaps it is calculated to make the fellow with a bag full of truth work and energize and ensnare harder to sell his commodity than the fellow who is spending his young life in a frenzied effort to peddle a bunch of wrong.

It doesn't put cast iron deer on your front lawn or gold-plated lightning rods on your house if you make a blamed good rat trap and then sit down and think about it. The chances are that you won't have the lawn for the cast iron deer or a house that could sport a gold-plated lightning rod. You'll just keep on washing your own dishes in the sink in the wilderness, and the fellow with the cheap trap and lots of sand and advertising ability and sales push will be working towards a monopoly on deer and dears and lightning rods.

Of course, he would go a good deal farther if he had both your rat trap and his own pet and persistence. But that's an additional narrating, as R. K. would enumerate.

Take it in the talking machine trade. There are two classes of intrinsically good talking machines, those which sell (in a large way) and those which don't. Just think this over and after you have thought a while ponder somewhat and then contemplate.

On the other hand, Mohammed had a rotten sort of religion, but he managed to get a lot of disciples, didn't he?

There has never been a suspicion on the fact of the white-robed ones that the Devil and his lieutenants were easy competition. It's difficult to get the same punch in a clean advertisement as in one of the bunko-steering type.

Business is a game. It would never be a game if everyone played in accordance with the rules.

If the clean athletes all exercised their powers every minute of the time, the boys with the silletto would never get a look in in this or any other industry.

MAKING DRIVE ON SUMMER TRADE

The Shepard Co., of Providence, R. I., are making a special drive these days after summer trade, and in this connection are boosting the Victrola VI-A.

Beware of Imitations

Package of 50 WALL-KANE needles. Loud, Extra Loud and Medium, greater value than 300 ordinary steel needles, retails for $10c, costs the dealer 6½c.

Jabbing territories open

Progressive Phonographic Supply Co.
145 West 45th Street, New York

Automatic Carrying Cases for Salesmen and Retailers are Ideal for Trade. Every dealer and jobber should equip his salesmen with them to increase their efficiency and multiply record sales.

The Automatic Insert File will re-supply any standard Talking Machine with durable up-to-date files—as dealers' sales floor or in cutting-room or at home. Every dealer and jobber should equip himself with it. Special for Edison 100A and 15C machines.

Music One of the Greatest Weapons America Has for Winning the War, Says A. W. Mason

A. W. Mason, retail manager of the Gately-Haire Co., Victor wholesalers, in the capital city of New York State, is not letting the public in Albany forget that music is proving a decidedly important factor in the war. In a recent interview published in the Knickerbocker Press Mr. Mason declared that music was one of the greatest weapons America has for winning the war, and said:

"In music, as in our lives, there are many kinds of food, and there is a field which is far greater and almost limitless in its scope. That is the holder and concert songs of a great number of composers of the older classical schools and of the present day such as Debussy, Chadwick and many others.

"If one would take time to study the programs of the concert artists they would find this kind of music represented in a far greater degree and used much more frequently than they realized. It appeals to all classes. It is music-skillfully instructive and the increased demand for this music shows conclusively that the public is rapidly acquiring a taste for such instructive material.

"Some of the greatest things musically have been done for the music loving public within the last few years, through the talking machine. My experience has taught me that the public is ever willing, receptive and ambitious to grasp the better class of music, although I will add that many still prefer the so-called popular music, but this is to be expected, notwithstanding the aim of the minority toward expecting better things.

"A short time ago Caruso made the statement that he did not understand why two records from a noted opera which he had made for one of the large talking machine manufactories a few years previous, were among the poorest selling records in his repertoire. Artistically he considered them of great credit to himself, and he spoke with much disappointment at the lack of appreciation of these and other numbers of the same character.

"I do not claim to be original in this, but some years ago I realized that the music loving public was constantly looking for the 'gems.' I started to gather these 'Pearls of Great Price' at that time, and believe at present that I have the greatest collection of the 'prizes' of any individual in the Victor talking machine business. I study the catalog to-day as a boy at school studies his grammar. Thus each day new ones are unfolded to me.

"Another department of which the public has but little knowledge is the educational. Few realize that at present there are 5,200 talking machines in the schools of the country, and many thousands of records. These records are by no means confined to marches and dances, but in many instances are used in the English literature classes, in the study of music forms and compositions. Even the little folks are taken care of in this department, as all the widely known fairy tales are reproduced.

"It is indeed gratifying to the retail salesman to see the constant demand for this class of records.

"We have recently installed an extensive Red Seal department in our store and here every day we meet the music lovers of our city.

"Never, in the history of the nation, has the value of music been so clearly demonstrated as at the present time.

"Simply because we are at war, and simply because the average individual has become reconciled to the fact that we must sing while we fight, we now have a condition that has never presented itself before.

"We have community singing, army singing at camp meetings, and many other forms of vocal work, all of which tend to promote the music atmosphere and aid the spirit of the nation. Food, shelter, clothing and music are the four essentials of life, but too little attention is paid to the real merit and the great value of music.

"A disgruntled nation lacks the spirit essential to success. We must have a happy, willing, aggressive nation. Every man's son of us must be there and there with the happy punch. We, as Americans, have the punch, but let it be the happy, willing punch, backed with a song, and we have accomplished more than weeks and weeks of dry military routine can accomplish, toward making our boys feel that we are there to win.

"Sending our boys to the front without music is akin to sending them without our well wishes. We will win, and the quicker we realize, both combatants and noncombatants, that their spirit is their success, the quicker the great conflict will be over. Just let our boys, our red-blooded boys, feel that they can whistle and sing, and swear, when and where they please while in the conflict, and just so quick will we see the merit of our American blood; the initiative produced from such liberties. Discipline is essential, to be sure, but freedom of mental activities is also essential. Let them sing. Encourage it. It makes them fight like hell in fact.

"They have their own little pet parodies that we little realize in civil life and every one of them has a kick to it that might make us hiss.

COLUMBIA DEALERS: Eject-o-files are built to fit the style 75 and others. Slip them in as they are wanted. Why carry that big stock of 85's, etc., when the Eject-o-file does the trick? "The Eject-o-file is Efficient" and you are in business for dollars and cents.

VOCALION DEALERS: A receptacle for records that can be slipped into your style F-G-H-J-K. They are "built to fit." Wonderful convenience and a powerful selling argument. Ask the salesman.

EDISON DEALERS: Eject-o-files are built to fit the style C-150 and 100. Many dealers are reaping the benefits. Why not you?

"BUILT TO FIT" any machine and a powerful asset for any dealer. Why offer Albums, Envelopes and other antiquated methods of filing to your customer? Eject-o-files are modern and efficient. Prices are phenomenally low.

The "sectional Eject-o-file," an auxiliary cabinet, compact, large capacity. Can be conveniently placed on table, stand, etc., or stand especially adaptable can be had. Beautiful and artistic, mahogany and oak finish, polished, waxed or dull. Each section a complete unit, can be added to, one upon the other, you know, sectional bookcase idea.

EJECT-O-FILE SALES CO

216 W. Saratoga Street

Baltimore, Md.

Style 70—Retail $10.00

7 IN 1

Seven strong points in our feature is a powerful selling argument.
1. Controlled entirely by gravity. Will not get out of order.
2. Non-abrasive individual record compartments.
3. Records cannot warp, scratch or mar and are kept clean.
4. 10" and 12" records can be filed in any compartment indiscriminately.
5. In beautiful oak and mahogany finish. Polished, waxed and dull finish.
6. Automatic out signal shows "when and where" a record is missing.
7. Filing and finding a pleasure. Get the desired record when it is desired.

EXPECTS STEPHENS BILL TO PASS
Secretary of American Fair Trade League Believes That It Will Become a Law With Very Few Changes—Many Misleading Statements

Concerning the question of Federal legislation to provide for the maintenance of resale prices by the producers of trade-marked articles, Edmond A. Whittier, secretary of the American Fair Trade League, declares that there have been many inaccurate and misleading statements made by individuals and published in newspapers and magazines regarding the standard price situation.

"The situation has been so delicate that I have felt it unwise to let any statement concerning the situation or the league's attitude go out," stated Mr. Whittier to The World. "I think I am justified, however, in saying that I have no doubt of the eventual passage of the Stephens bill without modification or change except the wholly inconsequential one which will reserve to the Federal Trade Commission, upon complaint or on its own initiative, the right to investigate the economic effect of any specific contract and to prevent its use or require such modification as the commission may decide the public interest requires. All rumors or suggestions of the probable passage of a different form of bill have nothing to justify them in fact."

You can at least be in the second line of defense—be a war saver.

DISCUSS CURTAILMENT QUESTION
Following Receipt of Letter From Director of Curtailment, Local Talking Machine Manufacturers Meet and Discuss Situation

Upon receipt of a letter from P. B. Noyes, director of curtailment, a few days ago, regarding the question of curtailing in some measure the production of talking machines and records, a number of local talking machine manufacturers held a meeting at the Columbia Shop on Wednesday afternoon, and went over the situation thoroughly in an effort to arrive at some definite basis upon which to approach the director of curtailment should any reduction in output become necessary.

Despite reports to the contrary, it was stated that no curtailment order directed against the talking machine industry had been issued from Washington to date, nor has any announcement been made that such an order will be issued at any definite date, or at all.

The talking machine manufacturers plan to hold another meeting of the committee appointed to act in the interests of the trade on Wednesday of next week when the question of possible curtailment will be further threshed out and an effort made to secure an audience with Dr. Noyes and go over the situation with him in person.

Curtis Bros., of Portland, Ore., have secured the Brunswick agency.

AVIATORS SEND PLEA FOR RECORDS
Flyers at West Point, Miss., Have a Talking Machine, But Lack Records

The aviators who are in training at West Point, Miss., have written the New York Evening Journal stating that they have a talking machine which they bought from their own social salaries, but they are shy on discs, particularly patriotic songs, and that cheering jazz music stuff which set so many Broadway feet to tripping last winter. One of these aviators suggested that perhaps through publicity these much-needed records may come their way, so the suggestion is passed along.

CLOSE BIG DEAL IN SOUTH AMERICA
Byron R. Forster, president of the Brilliantone Steel Needle Co., New York, in a chat with The World this week predicted an increasing shortage in needles and a general rise in prices in the needle market in the not too distant future. Mr. Forster also reports that they have very recently closed one of the largest deals in the history of the firm with a large South American firm.

Also
Record Envelopes, Needles, etc.

I HAVE consummated arrangements with the Nanes Art Furniture Co., whereby I am handling record cabinets made by this company. I shall present to the trade new improved designs to match the various types of talking machines that should invite consideration. Correspondence solicited.

CLEMENT BEECROFT

Fixtures for Display Purposes

Series of Five Attractive Fixtures for Columbia Dealers Just Prepared by the Dealer Service Department of This Company

The dealer service department of the Columbia Graphophone Co., New York, has just advised Columbia distributors throughout the country that there is now ready for the use of Columbia dealers a series of five attractive fixtures for the display of the various Columbia hangers and catalogs in the dealers' warerooms.

This department experimented with various models, and after receiving sets of these fixtures from many manufacturers finally adopted the designs that are shown herewith as best suited for the requirements of Columbia representatives. These fixtures are being sold to the dealers at cost price, giving them not only the benefit of the additional business that this method of publicity cannot fail to produce, but also providing them with store equipment carefully worked out and delivered to them at a price considerably lower than that for which they could be secured from the manufacturers through ordinary channels.

This series includes three metal fixtures for the display of the "Columbia Midmonth Special" hangers; two large monthly hanger display fixtures, and a Columbia catalog rack. These large hanger display fixtures comprise a wall, window and a counter fixture, all calculated to attract the attention of passers-by and visitors to the warerooms. The monthly hanger display fixtures include wall and window fixtures of artistic design, and the catalog rack provides plenty of room for the adequate display of all the catalogs incidental to Columbia products.

Visitors to the City

Several of the salesmen connected with the Columbia out-of-town branches were visitors at the executive offices recently, including S. W. Lukas and J. P. J. Kelly of the Pittsburgh branch, and Lyman Bryan of the Baltimore branch.

Transfer Entire Victor Stock

GRAND RAPIDS, MICH., June 9.—M. Marin has transferred his entire Victor stock and good will to the Lyric Music Co., who will carry on this business in the Boston Store, this city.
PERSING RECORD READY SOON
Matrix Made by General Pershing for the Columbia Graphophone Co.—Original Brings Big Price at Auction—Will Be One of a Series of Records to Be Made by Famous Americans

As announced some time ago in The World, the Columbia Graphophone Co. has made arrangements with General Pershing to soon release a record made by General Pershing, commander of the American Expeditionary Forces in France. A golden matrix of this record was auctioned at the Metropolitan Opera House during the recent Red Cross drive, and was purchased by George M. Cohan, the actor, for $2,700. Mr. Cohan re-donated the matrix to the Red Cross committee, who in turn present it to Presidenat Wilson to be filed in the archives at Washington.

In connection with this Pershing record the following article appeared this week in one of the local newspapers:

"One of the most valuable historic records of the present war is a phonograph record. It is a matrix of General Pershing's voice amid the din of battle—a wax cylinder contained in an ordinary leather sack now in the mail compartment of a conveyed vessel which was headed yesterday for an Atlantic port on the American continent.

"Duplicates of this priceless vocal record have been hidden away in France and England to insure them against loss from submarine attack. It is an exhortation to the American people and will be produced at patriotic meetings, rallies, school, club and social gatherings and in homes throughout the length and breadth of the land.

"Unlike the text of Lincoln's Gettysburg ad-dress and similar priceless national historic papers, this record will not be merely a Pershing relic to look reverently upon, but a new Liberty Bell, to be rung when desired—an ever-living voice, transmitting through the sense of sound the message of its author.

"Immediately upon the arrival of the matrix it will be rushed to Bridgeport, Conn., home of phonograph record and music making, where everything is in readiness to strike off copies of the record. Then, with all the speed that the mails afford, the message will start on its nation-wide circle of inspiration—to every city, village and hamlet, to cottages and scattered, isolated camps.

"The germ of the idea out of which this move-ment grew had its inception in the brain of Guy Golterman, a prominent attorney of St. Louis.

WAR PLANS FOR CREDIT MEN
Association Will Discuss How Best to Aid the Government

Plans outlining how the business men of America may give the most efficient support to the Government in time of war will be discussed at the war convention of the National Association of Credit Men to be held in Chicago June 18, 19, 20 and 21. There will be 1,800 delegates present, representing the 26,000 members of the association. Among those who will address the convention are John Burke, treasurer of the United States; and Paul Warburg, vice-president of the Federal Reserve Board.

J. H. Tregor, secretary of the association, said very likely that one of the principal topics of discussion at the convention would be the great burden placed upon business men by war taxes. Another topic will be the matter of preparation for after-war business problems. Prizes will be awarded for the best papers on trade acceptances. It is estimated that $50,000,000,000 is carried annually by the credit men, with $4,000,000,000 always on the books.

BUILDING UP LARGE TRADE
Forbes & Wallace, of Springfield, Mass., are featuring the Victorola and Victor records to good advantage these days and building up a very large volume of business.

MEIKLEJOHN CO. IN LINE

The Meiklejohn Co., the well-known piano dealers of Providence, Pawtucket and Woon-socket, R. I., have recently opened a talking machine department on the second floor of their handsome building in the first named city. The business is under the management of Allen T. Waite, and Edison and Star phonographs and records are being handled. The new depart-ment is admirably arranged, and under the cap-able management of Mr. Waite should score a great success.

VICTROLA FOR TORPEDO STATION
The Y. M. C. A. hut at the Naval Torpedo Station at Newport, R. I., is now proud of a magnificent new Victrola which has been do-nated by a prominent New York woman. The sailor boys are quite tickled with this gift.

$50,000 RAISED TO SUPPLY MUSIC
For the Sailors of the American Navy—To Buy Talking Machines and Other Musical Instru-ments—Noted Artists Assist at Concert

About $50,000 was raised to buy talking ma-chines and other musical instruments for the sailors of the American Navy at a remarkable concert given at the Metropolitan Opera House on the evening of June 30, which was partici-pated in by every artistic officer of international fame. Not only the entire staff of the Metro-politan police, but others such as Lucien Muratore, John McCormack and Harold Bauer, pianist, contributed their services. The money will be distributed by the Women's Naval Service.

REMOVE TO LARGER QUARTERS
The Columbia Stores Co., Spokane, Wash., have removed from W48 Sprague avenue to N161 Post street, a splendidly equipped three-story building. This company has stores also in Denver and Salt Lake City.

The Ellis Melodious Reproducer

(illustration is exact size)

Retails for Nickel $10.00—Heavy Gold Plated $12.50

That the Ellis "melodious" REPRODUCER "Talks for itself most convincingly" is the evidence of all users. It makes a special appeal to lovers of the better class of music, although at the same time it brings out detail of individual instruments of Jazz Band and "rauc-time."

"Phonograph Cranks," enthusiasts, some having had six years' continuous usage of the Ellis Melodious Reproducer to back up their judgment, tell the many wonderful stories that visiting friends say "I thought that voice human and you surprised me by telling me it was machinery playing."

The following is a testimonial from Mr. J. F. Poche, a "musical critic and well known to the Piano Trade and Talking Machine Industry." He writes over his signature:

"Mr. Ellis: It affects me great pleasure indeed to add my testimony to the great number of the wonderful reproducers, as the only one in the country. For it is so superior to say that compar-i son is unnecessary. The following incident is conclusive proof of above statement.

"The early part of December took me to the President's Residence to see Mr. Laffitte, who has his operative Studio in said building.

"As I was waiting for the elevator I heard a perfectly tuned and genuine 'melodious' reproducer, and I was so much impressed with the voice I inquired of the elevator man who is the speaker. 'This is not a lady singing,' said the elevator man, 'it is in Victoria.' I replied, 'It is impossible, I familiar with all of the different chairs and notes of talking machines, never having been exposed to reproducers of superior quality, I am therefore not able to reproduce a voice in that manner. To my great surprise I was shown into Mr. Ellis' Studio, where I was entertained by Mr. Ellis with his marvelous Melodious Reproducer with selections from Caruso, Mabel magnet, Bellini, Gluck, home and others. I must in conclusion state unequivocally that your Reproducers in the place one giving the Piano, thereby deceiving the most exacting ex-perts.

"Signed,"

"Very truly yours,"

J. F. POCHIE.

There is a gentleman who wrote "would be willing to walk from Chicago to Milwauke to get an Ellis Melodious Reproducer were there no other way to obtain one."

A dealer in a far-off country wrote, "Mr. Ellis, my customers wonder why your wonderful reproducer isn't known all over the world . . . please send draft to pay for forty more."

MR. DEALER: I am now able to take good care of a few more dealers who wish to give their patrons the "finest of music" with "all the harmonies" which are "hidden" in the wonderful Victor and Columbia Records.

The Ellis Melodious Reproducer is intended for exclusive trade—your customer will appreciate your knowledge for introducing the Ellis Melodious Reproducer."

SEXTON'S NEW DELIVERY TRUCK
Washington Dealer Perfects His Victor Service by Installing Automobile Service

WASHINGTON, D. C., June 8—K. C. Sexton, 629 Pennsylvania avenue, S. E., Victor dealer, recently added to his delivery equipment a handsome Ford delivery truck, which is one of the most attractive trucks used by any number of the local talking machine trade. This truck is being used to excellent advantage, and Mr. Sexton states that it is enabling him to render his patrons maximum service and efficiency in delivering Victrolas and Victor records.

The truck, which is shown hereunto, was manufactured by the Hoover Wagon Co., York, Pa., and represents the last word in the development of the small motor truck. The famous Victor trade-mark is reproduced on the side panels, and the general appearance of the truck has won many favorable comments.

ORGANIZE COMPANY IN COLORADO
LOVELAND, Colo., June 6.—A company is being reorganized in this city by C. J. Jackson, to be known as the Jackson Phonograph Co., for the purpose of manufacturing talking machines. The capital will be $250,000, and the majority of the preferred stock will be taken up by local people. Those interested outside of Mr. Jackson are J. M. Cunningham, George Walker, E. McNeal and Thomas McKee. It is planned to build a factory in Loveland as soon as capital is secured to commence manufacturing this machine, which is the invention of Mr. Jackson. An acoustic feature of the instrument is a wooden tone arm and tone chamber.

FILE PETITION IN BANKRUPTCY
The Cathedral Chime Co., Inc., chimes and phonographs, at 106 Read street, has filed a petition in bankruptcy, with liabilities of $35,900, of which $35,600 are unsecured claims, and assets of $9,462, consisting of stock, $6,130; machinery and tools, $2,250; debts due on open account, $421, and cash in bank, $30. Judge Mayer has appointed Maurice Meyer receiver at $2,000 bond.

PROSPERITY IN THE SOUTH
C. B. Haynes, of the C. B. Haynes Co., Inc., the veteran phonograph jobber of Richmond, Va., who was in the city recently attending the Edison convention, expressed himself enthusiastically regarding business conditions in the South. In the course of a chat with The World he stated that the purchasing power of the people had materially increased within recent years, and that there was a good demand for phonographs of the more expensive types, with the popular demand running from $150 to $200.

The Denver Drygoods Co., which handles the Edison in Denver, has started a vigorous billboard advertising campaign in which the Edison is strongly featured.

The Victor department of the Anthony Furniture Co., of Providence, R. L, reports a very excellent volume of business which is only limited by the scarcity of stock.

J. R. Leach, of Arleta, Ore., has secured the agency for the Brunswick phonograph.

NEW WAR REVENUE MACHINE COMING
Trade Would Do Well to Watch Progress of Proposed New Measure and Be Prepared to Protect Their Interests if Threatened

Members of the talking machine trade, and particularly the organizations within the trade, would do well to watch closely the actions of Congress in connection with the proposed new War Revenue bill, which it is planned to rush through with little delay. President Wilson has already signified his determination to have a tax bill, the burden of which shall rest chiefly upon incomes and war profits, with a good share placed on luxuries. Although no particular products are classed as luxuries in the first announcement, it will not be improbable that some Congressman may insist at the outset in putting musical instruments in that class, despite all that has been done to prove to the contrary.

It is declared that the Government has secured the services of financial experts in drafting the proposed new law, and it is declared that the evidence now in possession of the Government is of the sort to permit the officials to draft what they believe will be the best measure to meet the situation. Incidentally, the President has taken the stand that lobbying on the proposed measure should be prohibited. It is stated in Washington that, should the Ways and Means Committee follow the recommendations of the Treasury Department in drafting the bill, there will be little opportunity for protest from individuals, but should the House Committee draw a bill along its own lines, it will simply invite protests in the sending of multitudes of attorneys and witnesses to Washington to petition to the Senate Committee for relief, as was the case with the last bill.

Members of the trade will do well to keep informed regarding the progress of the bill and the conditions under which it is drafted, in order to be prepared to put forward their claims for relief in the event that such action is desirable. The trade is perfectly willing to carry its full share of the burdens of war, but it may be that the proposed bill might intentionally, or unintentionally, contain something that would place an excess burden on the industry.

REMARKABLE VICTOR POSTERS

Lyon & Healy Have Now Ready for Dealers Twenty-four-Sheet Poster Nine Feet High, Twenty Feet Long, in Four Colors, Which Should Command Public Attention—Also Issuing an Exclusive Victrola Calendar

CHICAGO, ILL., June 12—Lyon & Healy have ready for dealers another of the remarkable Victor posters for which they have achieved such a reputation. It is a twenty-four sheet poster, nine feet high by twenty feet long, lithographed in four colors on high quality sunproof poster paper. It is extremely timely, the legend being "Get your home a Victrola. Music is a necessity." The illustration shows a charming little maiden and a Victor record emerging from an envelope on which is the legend, "Here comes the record fairy." Ample space is left for the name of the dealer. The supply of the posters is limited and dealers are urged to place their orders now. The exclusive use of this poster will be given to one dealer in each town. They are furnished the trade practically at cost.

Lyon & Healy have also just published for the benefit of the dealers a very beautiful exclusive Victrola calendar. The essential feature is a reproduction in colors from a painting by Arthur J. Wells of a happy home group of mother and children around a Victrola, and it is one of the most artistic productions of the kind that have reached this office in many a day. There is no other printing on the calendar except a flap at the top on which the name of the dealer is printed. The company is taking orders now for delivery November 1.

OUR ENORMOUS EXPORT TRADE

From a position of third place among the nations of the world as an exporter of manufactures, which it occupied previous to the war, the United States has suddenly become the leader, having outstripped Great Britain and Germany, according to a compilation by the National City Bank. In 1917 our exports were over $4,000,000,000.

SECOY CO. INCORPORATED

The Secoy Co., of Piqua, O., recently incorporated with a capital stock of $10,000, and will manufacture automatic stops for talking machines. The company formerly operated a plant at Sidney, O.

A SUMMER ADVERTISING NOVELTY

At the request of Columbia dealers to provide them with a summertime advertising novelty, the dealer service department of the Columbia Graphophone Co. has worked out a plan whereby Columbia dealers can secure at a comparatively little cost a supply of unusually attractive fans bearing effective and specific selling suggestions.

The department has suggested to the dealers that the distribution of these fans inside of the store covers only a small part of its possibilities. Its biggest opportunity to produce sales comes in the many ways that will readily occur to the live dealer. A fan may be included with every package leaving the store. It may be sent to the mailing list, and be used also in adding to the mailing list by its distribution at opportune affairs. Picnics, athletic meets and parties provide many opportunities for effective distribution. This also applies to garden parties, hotel dances, indoor affairs, etc.

The face of the fan conveys forcibly the general selling idea of using Grafonolas during the summer. This general message is made specific on the reverse side, where the popular-priced models are featured, together with a suit-
Exhibitors of Talking Machines and Supplies at National Music Show, New York

At the National Music Show which was held at the Grand Central Palace, New York, during the week of June 1 to 8 inclusive, and which was formally opened with appropriate ceremonies by Governor Charles S. Whitman, of New York, the talking machine trade vied with the other branches of the music industry in the prominence of its various displays. In fact, a large part of the (informal) entertainment provided in connection with the various exhibits was offered by the various talking machine concerns, who brought prominent artists to the show to sing to tone tests and in demonstrating recitals in their special booths or theatres.

Thos. A. Edison, Inc., for instance, gave two fine test recitals each afternoon and evening in the Edison Theatre at the east end of the mezzanine floor, where 300 people could be accommodated at one time. The prominent artists appearing at the tone tests seldom failed to attract a capacity audience.

Then the Columbia Graphophone Co. with a large space on the main floor entertained the crowd at intervals with the songs by prominent artists on the Columbia list, while the Pathé Frères Phonograph Co. made one of the hits of the show with its complete record pressing plant at which records were actually made before the eyes of the visitors and then distributed to the holders of lucky numbers.

The manner in which the piano trade has taken cognizance of the value of the talking machine was evidenced not alone by the displays of machines made by the different piano houses, but by at least three types of player-pianos in which were incorporated talking machines, making combination instruments.

The list of talking machine exhibitors at the show and what they had on display was as follows:

**Automatic Record Container Co.**
The Automatic Record Container Co., Chicago, manufacturers of the clever automatic filing cabinet for talking machine records, had a comprehensive display in charge of Frank P. Read. The automatic record container was shown installed in several types of cabinets, and also in a handsome wicker case machine, the products of the Lakeside Supply Co., Chicago, and which in itself represented the exhibit of the latter company. The Automatic Record Container Co. also showed and demonstrated the Paramount records for which they have the Western jobbing agency. The display greatly interested the visitors.

**The Autopiano Co.**
The Autopiano Co., New York, player-piano manufacturers, showed a new type of Pianista, a player-piano in which was incorporated a talking machine with a horn running to the spool box in the center of the instrument. It aroused the attention of visitors.

**Brillaintone Steel Needle Co.**
The Brillaintone Steel Needle Co. had a large exhibit at the music show held at the Grand Palace, New York, from June 1 to 8. Besides Booths 101-102 on the mezzanine floor they also had a table at one of the important entrances where their needles were on display. Their booth was attractively furnished and their shield trade-mark, which has become so well known in the trade, was much in evidence. Steel needles, probably 10,000 times larger than actual size, were also featured in the display and attracted much attention. Not only were samples of the Brillaintone needle freely distributed but attractive souvenirs were issued as well in the form of leather-covered memorandum books. Byron R. Forster and H. W. Acton were personally in attendance at the booth and welcomed many of their out-of-town friends.

Two of the most attractive styles of Brunswick phonographs were installed in the exhibit. These machines not only added to the general effect of the exhibit but served to demonstrate the reproducing qualities of the Brillaintone steel needles. These machines also furnished many impromptu concerts during the day and evening.

**Cheney Talking Machine Co.**
The Cheney Talking Machine Co. exhibited a new line of consoles ranging in price from $225 to $1,100. A feature of the exhibit was a Japanese model known as a Fuji design, which was created by one of the most noted Japanese artists in the world. A complete line of the regular Cheney models was also displayed and a new machine in a Berkeley & Gay cabinet, for the retail price of $60, created much attention on the part of the dealers and other manufacturers. The booth was in charge of Burton Colver.

**Cortina Academy of Languages**
The Cortina Academy of Languages had a very interesting exhibit at the music show at the Grand Central Palace, New York. Their various language courses were demonstrated to all callers at their booth on the mezzanine floor.

**Columbia Graphophone Co.**
The Columbia Graphophone Co. presented a remarkably handsome display occupying four booths on the center aisle. This display was divided into several sections, each one of which attracted the attention of visitors to the show. This exhibit was noteworthy for the many new products which made their initial bow to the trade, and which are described in detail in another section of this issue of The World. Several popular Columbia art models were also featured to excellent advantage in one of the booths.

**Columbia Art Model Room**
European nationalities. Group figures, which form a part of the new Columbia international record window display, were also used with this map, and the exhibit as a whole combined

**Columbia International Record Room**
Practicality and attractiveness. The display was conceived by Anton Heindi, manager of the Columbia international record department.
Ten Reasons Why Our Production of the New Edison Diamond Amberola and Blue Amberol Records is Constantly Over-Sold

1. — No continual expense for needles, no needles to lose, to be out of just when needed, to become scattered around the house, to prick the fingers, with perhaps serious consequences (especially in the case of children), to be put in their mouths by children, or to wear out expensive records when carelessly used. Instead, a permanent GENUINE DIAMOND stylus.

2. — Records almost unwearable and unbreakable, that retail in the United States at 60c, 75c and $1.00—less than the price of talking machine records of the same individual selections, or selections of the same class.

3. — Marvelously sensitive Edison reproducer, the result of more than two thousand separate and complete experiments by the greatest inventor of the age.

4. — Simplest and most dependable mechanism ever put into a phonograph.

5. — Completely enclosed instrument that retails, in the United States, as low as $35.

6. — Highest class talent in the musical world.

7. — Extensive library of records especially suited to the less-than-one-hundred-dollar trade.

8. — Musical superiority proven before phonograph experts by comparative tests with talking machines costing from two to five times as much.

9. — Manufactured under the personal supervision of Thomas A. Edison.

10. — Constant enthusiasm of dealers and sustained interest of owners because of complete satisfaction and extraordinary value for amount invested.

ORANGE, N. J.
EXHIBITORS OF TALKING MACHINES AND SUPPLIES AT MUSIC SHOW—(Continued from page 99)

and the exhibit was in charge of R. F. Bolton, sales manager of the department.

During the course of the week a number of Columbia artists appeared at the booth and gave informal concerts; these artists, including the Farber Sisters, Arthur Fields, Lewis James, Evana Davies and others. Under the auspices of the International Record department there were also presented the Serbian Tambouriza Sextet and the Russian Balahika Orchestra, who gave several concerts during the week. The Sextet’s offerings were decidedly unique, and their records will also be presented in the general Columbia lists, in addition to the regular "E" series of international records.

One corner of the Columbia booth was devoted to the educational department, which conducted a "Children’s Hour." This very interesting display was in charge of W. A. Willson, business manager of the department, and W. H. Gould, sales manager.

The complete Columbia display was in charge of R. W. Knox, advertising manager of the Columbia Co., assisted by H. E. Speare, manager of the Columbia Fifth Avenue Shop, Lambert Fried, manager of the New York branch, and in hand daily, with members of his staff to welcome the dealers. Visitors from the executive offices included H. L. Willson, general manager; George W. Hopkins, general sales manager, and Frank K. Pennington, assistant general sales manager of the company.

Eclipse Talking Machine Co.

The Eclipse Talking Machine Co., of Patterson, N. J., had an exhibit of their Eclipse electric self-starting phonograph. The Eclipse is a novel inasmuch as it can be operated by dry batteries or by direct or alternating current. Among the exclusive features of the Eclipse is the Sibley sound box, and the push button that repeats the record at any time during the rending, a point which is advertised as especially helpful to singers. The booth was in charge of James T. Sibley, president of the company and inventor of the instrument; Albert R. Winans, vice-president of the company; Thomas E. Platt, treasurer, and Walter O. Bacon, secretary.

Thos. A. Edison, Inc.

One of the chief centers of interest during the entire period of the show was the Edison Theatre, occupying a large section at the Western end of the mezzanine floor, and with a seating capacity of 300. Throughout the week special recitals were given twice each afternoon and evening, at which prominent artists appeared and played in conjunction with their recreations on the new Edison. Among the artists were Miss Marie Morrissey, contralto; Vernon Dalhart, tenor; Harold Lyman, flutist; berola phonograph, and the Edison army and navy disc phonograph, which has proven so popular with the fighting forces. Yerol E. II,

Edison Concert Hall at Music Show

Fuller, general supervisor of Thos. A. Edison, Inc., with a staff of assistants was in charge of this magnificent display.

Emerson Phonograph Co.

The Emerson Phonograph Co. showed a complete line of Emerson products, including the new 65-cent records and the popular Emerson 7-inch records. Artistic displays of these records together with effective window-hangers and showcards gave visitors to the show an adequate idea of the splendid publicity and co-operative helps that are being issued by this company for the benefit of Emerson dealers. Arthur H. Cashman, manager of sales, was in charge of this exhibit, assisted by J. L. Carroll, assistant sales manager, and several members of the sales staff.

Otto Heineman Phonograph Supply Co., Inc.

One of the most attractive exhibits at the show was that of the Otto Heineman Phonograph Co., recording for the Heineman record library appeared at the booth and gave informal concerts; among these artists being Joseph Phillips Miss Inez Barbour, Miss Rosa Torregrosa, comic opera prima donna, Chas. Hart, John Myers, Lewis James and Byron G. Hulahan.

The Heineman exhibit was in charge of W. C. Strong, who was ably assisted by M. E. Schechter, A. A. Foute, and other members of the staff. Otto Heineman, president of the company, W. G. Pilgrim, assistant general manager, A. Heineman, assistant general manager C. J. Fott, Toronto manager, and G. R. Knuckle, chief engineer of the Elvira factory, were also hand on hand to receive visitors.

Innovation Electric Co., Inc.

The Innovation Electric Co., Inc., New York, displayed the "Innovation" electric motor, a self-winding machine that was driving any phonograph without change in construction or interfering with the regular crank wind. The booth which attracted attention was in charge of W. W. Rosenfeld, president of the above company, and F. N. Davidson, sales manager of the company.

Lakeside Supply Co.

The Lakeside Supply Co., of Chicago, exhibited several of their new tone arms and sound boxes which were very original in design and of which larger planes were used in vertical cut records without any shifting of the position of the sound box. The Lakeside Co. also had on display one of its luxuriant Artcraft talking-machines with several novel features. The new Lakeside rotometer, which is a great "shortcut" in the testing and marking of motors, was also on exhibit. Mr. Fricke came on from Chicago to this exhibit.

National Lead Co.

The booth of the National Lead Co., in charge of W. D. Brown, contained an exhibit of die castings of talking machine and player-piano parts. Of particular interest to the player or talking machine man were several tone boxes, tone arms, elkows, player valves and transmission frames as well as parts for other machines.

Operaphone Mfg. Co.

The Operaphone Mfg. Co., Long Island City, N. Y., displayed and demonstrated a complete selection of the new Operaphone talking-tube and cylinder records, under the direction of R. A. Carter, of the company. The new records mark a distinct improvement over the former Operaphone products, and interested the visitors.

Pathé Frères Phonograph Co.

The Pathé Frères Phonograph Co. occupied three large booths at the show, this exhibit being one of the most interesting displays from a trade and general viewpoint. The feature of this exhibit was the presentation of a record press in actual operation, and this press turned out hundreds of records which were distributed to the visitors free of charge on the basis of the drawing of winning numbers. The exhibit was crowded every afternoon and evening, and the New York public evidenced the keenest interest in the complicated equipment which is incident to the pressing of records.

In another section of this display there were featured several new Pathé art models which will be ready for formal announcement in the very near future. These designs include several models after the antique periods, and their distinctive beauty was evident to every visitor to the booth.

Part of Edison Exhibit Showing Period Models

Marie Tiffany of the Metropolitan Opera Co.; the Fleming Trumbull models. The concerts never failed to attract a large audience. In the exhibition space outside the theatre were shown several of the leading period models of the new Edison, as well as the new Edison Am-

EXHIBITORS OF TALKING MACHINES AND SUPPLIES AT MUSIC SHOW—(Continued from page 101)

In addition to the large display of Phonographs the consoles of two of the very famous Seeburg-Smith unified organs were shown. One of the consoles was of a $15,000 organ and the other was of a $5,500 organ, and both gave an excellent idea of the musical possibilities in the great unified organs built by this company.

J. P. Seeburg, president of the company, came on from Chicago for the purpose of acquainting the manufacturers and dealers in New York with the great sales possibilities of the new type instrument, the Phonogram, through retail piano and talking machine establishments. Chase Seltzer came on from Pittsburgh to co-operate with Mr. Seeburg at the National Music Show.

STARR PIANO CO.

The Starr Piano Co., Richmond, Ind., devoted their space at the show to an elaborate display of a half dozen of the more popular models of the Starr phonograph which has come strongly to the fore during the past year. In connection with the phonographs there were displayed and demonstrated the new Gennett records, also made by the Starr Co. The exhibit, which attracted much attention during the week, was under the supervision of Wm. C. Klumpp.

STEPHENSON, INC., ENTERTAIN

Stephenson, Inc., manufacturers of the “Stephenson Precision Made” talking machine motor, had a special display of their motors during the past week at their New York offices at 1 West Thirty-fourth street, where Frank T. Nutte, vice-president and general manager, was in charge. Mr. Nutte is well known to both talking machine manufacturers and to piano dealers, having been for many years interested in the trade as a piano manufacturer, and during the convention week he was enabled to meet many of his friends. A very novel invitation to visit the Stephenson offices was sent out by the company to the trade in the form of a little magazine edited by Frank T. Nutte, very friendly in tone and carrying information in regard to entertainment to be found by the visitors while in New York.

VISITORS TO HOFFAY SHOWROOMS

The Hoffay Talking Machine Co., 3 West Twenty-ninth street, had a number of visitors at their showrooms during the past week. These included both manufacturers and dealers, the manufacturers being chiefly interested in the Hoffay “Resurrection,” the patented sound box which the company produces. According to Joseph Hoffay, president of the above company, he was successful in forming connections with a number of live piano dealers who in the future intend to feature the Hoffay products.

“Does It Play All Records?”

STEADILY IMPROVING CONDITIONS PREVAIL IN PORTLAND

Dealers Make Excellent Reports Regarding Business Prospects—Labor Conditions Are More Settled in Various Lines—Stock Shortage Is the Only Serious Worry Prevailing in the Trade

PORTLAND, Ore., June 4.—That labor conditions are growing more stable in Portland is apparent from a visit to the various talking machine houses in the city where there have been almost no important changes in the sales staffs in the last month. Dealers attribute this largely to the tone of the business, which is such as to make the salesmen want to stay with their positions. The approach of summer, however, has found a start of the vacation period and this has somewhat disrupted some of the staffs.

May business in the talking machine field was more than satisfactory and dealers all have excellent comparative reports showing a big increase in sales and a remarkably better condition in collections than at this time last year. Collections are reported to be even better now than they were a month ago and this end of the business is declared to have been never healthier. Sales were not quite as large in May as in the earlier months of the spring, when Portland experienced a real boom in the talking machine field, but they were large enough to cause satisfaction to the dealers.

Dealers are in declaring that shortage of stocks is the one and only cause for falling off in sales in machines, many customers' refusing to await deliveries which cannot be made on the spot and finally not buying at all.

Taylor C. White, manager of the Victrola department of Sherman, Clay & Co., says that his firm could not ask for any better business than that of the past month. Three electric Victrolas were sold in one day by F. D. Addis, of the department, and this was only a sample of the business being done by the firm. The visit of Galli-Curci to Portland did much to stimulate the sale of her records.

The Victrola department of the G. F. Johnson Piano Co. reports even better business in May than in April. R. F. Callahan, manager of the department, says they cannot get enough Victor machines and he attributes the growing business of his department as much to the popularity of the line as to the methods which he has put forth to get business.

Paul B. Norris, manager of the talking machine department of the Wiley B. Allen Co., handling a large line of Victrolas and Edisonas, said: "We didn't get business in big bunches in May as we did in April, but compared with last year at this time business is away up." Mr. Norris' business has been so good that he has just bought a new automobile truck to deliver machines. The show windows of the Wiley B. Allen Co. have recently presented some unusual and attractive scenes arranged by Mr. Norris and his assistants. The excellent location of the store on a corner of two principal streets makes these windows well known and admired by Portlnders.

L. D. Heater, manager of the Portland branch of the Columbia Graphophone Co., says that the freight congestion is very much lessened and that his firm is now receiving shipments in from thirty to forty days after they leave the factory. Part of a carload of Columbias is now on the way from Seattle and several carloads are due any day from the factory. One unusual demand which Mr. Heater notes is for military trunks for holding Grafonolas. These come from soldiers at Camp Lewis, Wash., and Vancouver Barracks, Wash. Mr. Heater says the soldier trade is a big one. He recently sold 235 Columbias to Camp Lewis in one order. Soldiers at Vancouver are also buying a great number of Columbia records at the local Columbia store.

The Wakefield Music House reports excellent sales of Brunswick machines. C. Guy Wakefield, manager, says that many handsome styles have recently been received and that these have added materially to sales.

When $9,000 worth of Sonora machines arrived at the Bush & Lane house recently the firm congratulated itself on the fact that at last it had a complete line of Sonoras—all lines and finishes—on hand. Under the excellent management of James Loder, manager of the talking machine department, many sales have been made of all machines handled.

L. E. Gilham, manager of the Stradivara Talking Machine Co., says that business is very good and that the out-of-town trade has been very brisk. New record rooms have been added. The Johnson Phonograph Co., of Astoria, Ore., has sold out its entire business, carrying the Columbia and Victor lines, to the Owl Drug Store, of Astoria, of which John L. Ray, formerly of Lewiston, Idaho, is proprietor.

J. H. Dundore, general manager of the Portland branch of Sherman, Clay & Co., has gone to Washington, D. C., on governmental business. Mr. Dundore is connected with the food conservation movement.

Absolute confidence in the Edison phonograph was displayed by F. B. Hyatt, of the Hyatt Talking Machine Co., where he presented Madame Florence Ferrell, who sings for the Edison Co., in a most successful concert before a large and fashionable audience last month at the White Temple here.

"I was greatly surprised," says C. R. Cordner, manager of the phonograph department of Elder & Gilberthouse, "to find how little effect the recent Liberty Loan and Red Cross drives had on the talking machine business. For a week it was rather dull, but the interval between the two drives was so lively and we have been so busy that it has more than offset the lack of business throughout the drives.

A new method for finishing checked talking machine and piano cases has been invented by Joe Baker, of the Harold S. Gilbert Piano Co. It is of such value that since its inception Mr. Baker's time has been fully occupied in finishing checked machines for the various talking machine houses of Portland.

The Victrola department at the Lipman, Wolfe & Co. store is well supplied with both machines and records. While some popular records have been entirely sold out, Miss Florence Isaac, in charge of the record department, shows her good salesmanship by persuading customers to listen to other records and always with good results.

**HIPOLITO LAZARO SINGS AT COLUMBIA DEALERS’ MEETING**

Large Attendance at Fifth Monthly Gathering of Columbia Metropolitan Dealers, Held Recently at the Waldorf-Astoria—Midmonth Records Introduced by Lambert Friedl

The fifth monthly meeting of the Columbia dealers in metropolitan territory was held late last month in the Myrtle Room of the Waldorf-Astoria Hotel, and this meeting was the most successful that has yet been held in this important series of gatherings. Lambert Friedl, manager of the local wholesale branch of the Columbia Co., under whose auspices these meetings are held, presided at this gathering, and, as usual, his informal address and general comments contributed materially to the enjoyment of the meeting.

These meetings are called monthly in order to permit Columbia dealers to listen to the mid-month records, and Mr. Friedl has been providing programs that have won the hearty appreciation of the Columbia representatives.

More than 300 Columbia dealers and their friends were present at this meeting, and Mr. Friedl took advantage of the opportunity to thank the dealers for their loyalty and cooperation the past year to the assistance received from the Columbia dealers, and beseech their continued co-operation during the coming year.

During the course of the afternoon Mr. Friedl reviewed the entire Columbia record made by General Pershing would be placed on sale very shortly, and incidentally introduced a record made by Ambassador James W. Gerard, for the Nation's Forum. This record, which is remarkably clear and distinct, carries an important message to the American people.

The most important feature of the meeting was the introduction of Hipolito Lazaro, the famous Spanish tenor, who is a member of the Metropolitan Opera Co., and an exclusive Columbia artist. Mr. Lazaro has won international renown, and is generally recognized as one of the foremost tenors of the present generation.

Responding to the hearty reception which he received from the Columbia dealers, Mr. Lazaro sang selections from "Rigoletto," "L'Africana" and "La Favorita."

The closing address of the meeting was made by W. J. Johns, president of the George Batten Co., New York, one of the country's foremost advertising agencies, which is in complete charge of Columbia publicity. Mr. Johns emphasized the fact that the main idea back of recent Columbia advertising is to link up every item of this publicity with the other so that the dealers will receive maximum benefit from this advertising. To visualize this thought he used enlarged sketches of recent Columbia advertisements, and pointed out to the dealers how the color pages used by the Columbia Co. in all of the leading national magazines are also the basis of the monthly supplements, the monthly hangers, window displays, and, in fact, every form of publicity used during that particular month.

**HOME FURNISHERS MEET**

The semi-annual convention of the National Home Furnishers' Association, Inc., will be held at the Auditorium Hotel, Chicago, on Thursday, July 11, at 10:30 a.m. An important program of discussion has been arranged for the dealers who attend.

**TIMELY COLUMBIA LITERATURE**

Attractive Folder on Patriotic and Wartime Records Just Issued Is Up to Date

"Columbia Patriotic and Wartime Records" is the title of a timely and attractive folder just issued by the Columbia Graphophone Co. for use by its dealers during the Fourth of July period. This folder is designed in the national red, white and blue colors, and the front cover is especially worthy of note, as it depicts five thumb nail sketches in colors incidental to the music of "Yankee Doodle." "Oh, Say, Can You," "Tramp, Tramp," "There'll Be A Hot Time" and "Over There." In fact, this cover, because of its distinctive beauty, could well be adopted for use on expensive posters and window hangers.

Under the heading of "Patriotic and Wartime Records" there are listed in this folder practically every type of record that the Columbia dealer can feature to his customers for Independence Day. In addition to the standard patriotic records that are always prime favorites in the home of every music-lover, there are listed popular hits of the day, which form an important part of the present monthly supplements issued by the Columbia Co. Medleys of patriotic airs and the leading semi-patriotic, vocal and instrumental selections of the day make this list an excellent one for Columbia dealers.

Leo E. D. Schatney, formerly manager of the Providence store of the Aeolian-Vocalion Co., has been awarded a commission as second lieutenant in the National Army.

THE ELLIS-MELODIOUS REPRODUCER

Receives High Praise From Prominent People Who Have Used It—Fits Any Machine

The Ellis-Melodious reproducer has been recently introduced to the trade by J. H. Ellis, P. O. Box 882, Milwaukee. This new repro-

der, invented more than five years ago, has, since that time been put through all kinds of tests through which it has emerged victorious and with a long line of recommendations and tributes regarding the artistic quality of its reproduction. Many very complimentary let-
ters have been received from lawyers, doctors, musicians, newspaper critics and others who have tried it out and are still using the Ellis-Melodious reproducer. It is made to fit prac-
tically any make of machine, and is furnished nickel-plated, heavy gold-plated and finest gold-
painted.

DOEHLER TOLEDO PLANT EXPANDS

The Toledo plant of the Doeherl Die-Casting Co., which is housed in a model factory building completed a little over a year ago, has in this short space outgrown its quarters. In order to provide for this expansion this company has found it necessary to take over the adjoining plant of the Ohio Electric Co., doubling the present capacity of the plant.

While the greater part of the plant's activities are devoted to Government war work, the needs of the regular trade are getting close attention.

WALTER L. ESHELMAN HONORED

St. Joseph, Mo., June 6—Walter L. Esheiman, an Edison dealer, was recently elected presi-
dent of the Rotary Club, of this city. This honor was conferred upon him in recognition of his high standing in the community and his untiring efforts in the advancement of music in St. Joseph and vicinity.

Louis S. Sterling, managing director of the Columbia Graphophone Co., Ltd., London, Eng., sailed for London Monday, after spending two months in this country visiting the executive offices. Mr. Sterling is not quite ready to an-
ounce his plans for the rebuilding of the Col-
lumbia plant in London, which was totally de-
stroyed by fire recently.

R. S. SOUDERS IN Y. M. C. A. WORK

Robert S. Souders, who has long been promi-
nent in the talking machine industry, through his early connection with the Columbia Co., and who has helped to introduce the Sonora in Northwestern territory since his association with the Minneapolis Drug Co., was in New York last week on his way to Europe, where he will be associated with Y. M. C. A. work for the United States soldiers abroad. Mr. Souders will act as field or tact secretary, and it goes without saying that, owing to his experi-
ence as a talking machine man, he will look after the needs of our boys abroad and pro-
vide them with the best of entertainment. Mr. Souders is not unacquainted in Europe, having served the Columbia Co. in an important ca-
pacity in Germany and other European points.

Don't tell all you know. Conservation is better than conversation.

Tone—the vital thing

If you, as a manufacturer, can talk and prove tone superiority in your product, you have a selling argument to over-
shadow all the "talking points" of cabinets, and designs and accessory features.

And you can talk tone superiority. You can put out a product that will be a revelation in tone-purity, tone-quality, tone-volume. When you realize what vital, lifelike, colorful tone can be produced and sustained by the talking machine equipped with

Parr Magnetic Reproducer

fitted with the

Vibratone Patented Diaphragm

These two dominating and proven inventions open up wonderful possibilities for manufacturers eager to put their product at the top-notch of class and character.

You want your product to be RIGHT!

If you want your product worthy of your name, you certainly want that product to be right in its most vital feature. And it will be right if it is equipped with the Parr Magnetic Reproducer—the reproducer for those who seek perfection.

The indestructible, non-crystallizing, always resilient

VIBRATONE PATENTED DIAPHRAGM

Pioneering all the good points of micro diaphragms, it overcomes all micro's bad features. Guaranteed uniform in quality, free from bubbles, blisters and waves, the Vibratone Patented Diaphragm is non-
porous, and is not hygroscopic.

It has a definite function and it performs it. It improves tone; in fact it creates new tone possibilities for every reproducer of other types.

PARR MANUFACTURING CORPORATION

1 UNION SQUARE At Fourteenth St.

NEW YORK
SALESMEN WANTED—If you cover the phonograph trade in any section of the United States and are interested in a live proposition, either as a side line or as a full-time proposition, we have an interesting offer. In answering state territory now covered. Address "Box 522," care The Talking Machine World, 373 Fourth Ave., New York.

Dealers We give record service to any dealer on all makes of disc records.

Illinois Record Service Commercial Building, Chicago, Illinois

Returns from Western Trip

Frank K. Pennington, assistant general sales manager of the Columbia Graphophone Co., returned Monday from a Westerly trip, which included a visit to Columbia branches in Cincinnati, St. Louis, and Buffalo. Mr. Pennington states that conditions in this territory are splendid, every Columbia branch manager reporting sales totals far in advance of last year. The Buffalo branch closed in May the largest business in its history, and Mr. Pennington was advised this week by Fred E. Mann, manager of the Boston branch that the month of May was the largest in Buffalo for more than a year. Another encouraging report was also received this week from W. C. Fuhr, manager of the Chicago branch, who states that the sales totals for May showed an increase of 100 per cent. over last year. In fact, in all sections of the country the business situation is most satisfactory.

London, England, E. C. June 3.—A good deal of unnecessary alarm has been engendered in trade circles by the repeated savings of a certain section of the press about the plans of the Government for the alleged suppression of luxury trades, among which most of the scribblers alluded to are pleased to include all musical instruments. Arising from the official decision to levy a tax on so-called luxuries the subject is one which may or may not apply to the musical instrument trade. Until the committee appointed to enquire into this matter has issued its report clearly defining the class of goods that may reasonably be considered pure luxuries in contradistinction to actual necessities, any discussion along definite lines is not only futile but is likely to create an impression which, perhaps unwittingly, would lead to official conclusions unfavorable to the best interests of the trade. There can be no doubt that the feeling in official circles regarding the defining of luxury goods mainly applies at present to such commerce as expensive articles of feminine attire. The only shadow of justification for inclusion under this category of musical instruments is the fact that pianos are taxed as luxuries by the French Government, the amount being 10 cents. Beyond this no official ruling has yet been indicated, and the supposition that gramophones and records, for instance, are a luxury is entirely premature. The claim might not have stood the test of too close an investigation in pre-war days, but in war time there is a decided argument against it.

Evidence of the necessity for an unlimited supply of mechanical music is felt on all hands, anywhere and at all appropriate times. More especially is this so with regard to military and naval establishments, where music is officially encouraged. To hospital patients music is medicine. Without its recovery would be prolonged considerably. That is recognized by the medical profession as an actual fact. At the rest camps, too, the gramophone occupies an honored position. The daily demand is for more, and yet more, and the pity is that the call from our gallant lads cannot be wholly satisfied. The situation at home is much the same; music being an absolute necessity for many weary monitor workers whose main re- laxation is after the overlong daily strenuous labor. These facts challenge completely those scribblers whose pens might be used to bet- ter advantage than in writing ignorantly of the relative value of mechanical music, and in their vain efforts to connection a good case is furnished for imme- diate counter-action on the part of the recently established Gramophone Association. Steps should be taken hereafter for the formation of a propaganda section. Its value would prove inestimable during the period of crisis through which the talking machine trade is now passing.

Another aspect of the present situation here, and which I have previously mentioned in these columns, refers to the threatened Government action that luxury or non-essential trades must furnish a larger quota of men for the forces and for work of urgent national importance. This has been interpreted by many as in the nature of a serious proposal to suppress the musi- cal instrument trade altogether. Serious though the position may be, it is quite unthinkable that the Government has any such in- tention. A vital factor in the prosecution of the war from a financial viewpoint is the mainte- nance of general commerce and the upkeep of money values abroad by the encouragement of export trade. In these circumstances, to sug- gest that the Government is out to destroy or seriously impair our industry, is, to say the least, scarcely founded upon a good perspec- tive. That the shifting of men from the fac- tories will temporarily dislocate output is quite possible. But the transfer of such labor will most certainly be sufficiently gradual to enable manufacturers to find and, it is hoped, train suitable substitutes. In this regard, the chief difficulty is to find the right class of labor. It must be borne in mind that the country is pretty well drained, the prior claims of the services and munitions factories having left but a resi- due from which to choose. The mainstay will, therefore, have to be drawn from the various classes of labor supply provided by discharged soldiers is not being neglected. No great success has so far attended the manufacturers' efforts to secure these classes of discharged men owing to their inability or unwillingness after an open-air life to stand the humid atmosphere, for instance, of the record-pressing departments. But such as are available for this and other perhaps more suitable work in talking machine factories should be impressed into the service of this in-

(Continued on page 185)
FROM OUR LONDON HEADQUARTERS—(Continued from page 107)

dustry with the least possible delay. Time is
the essence of all things, and it is not more so than
in this matter. We may rest assured, therefore, that
every effort will be made to suitably replace
those men in the factories and offices who in the
national interests are required for work rightly
considered of greater importance.

The call-up of men of the new age classes
has already commenced, and notices have been issued to those up to the
age of forty-five. This does not necessarily
mean that men of these groups occupying ex-
ecutive and administrative positions in the com-
mercial world, if medically passed, will be
drafted to military or naval units right away.
A great deal, of course, depends upon their
medical classification and the needs of the serv-
ices. But in any case official consideration
will be shown, and possibly time allowed for the
firms concerned to find substitutes, as in the
case of factory employees. Given a sufficiently
reasonable period of time, business should not be
so seriously dislocated as many at first were
inclined to think, but for all that the prospect is
not regarded with indifference, as it will be
exceedingly difficult to replace the class of men
in question.

With all, the possibility of gramophones and
records being placed under the category of a
luxury must not be overlooked. By many it is
regarded as certain. If the tax is levied on the
sales price of records, I am able to say the rate will be in the neighborhood of 17
per cent, of the retail purchase price. The
duty is recoverable from the seller and it is to
denoted, and collected, by stamps.

Details of New French Tax

According to reports from France the new
French Finance Law promulgated on March 22, and one section of which applies particularly to
articles classed as de luxe, places a tax of 10
per cent, on the retail selling price on all the
various articles listed, including all pianos other
than upright (cottage) pianos. Among the
articles subject to the tax when their retail price
exceeds a certain sum are included: musical
instruments, other than the pianos (phonographs,
gramophones and mechanical pianos) and all
their accessories, when the selling price is over
150 francs, and upright pianos and harmoniums,
when the retail selling price is more than 1,200
francs.

The Toll of War—Eric Dunlop

It is with something akin to a sense of per-
sonal loss that we record the death of Eric Arthur Dunlop, only son of Arthur S.
Dunlop, the editor of The Sound Wave. As
may be surmised it is yet another case among
the many young lives sacrificed to the gulf of
war. Mr. Dunlop was but twenty-three years of age. A few years ago he emigrated to the
Golden West where he was making splendid headway when this Armageddon suddenly de-
solated upon an unprepared world. With the
spirit of his race he joined up as soon as was
possible, and after a period of training both in
Canada and England was drafted abroad as a
not unimportant unit of the Canadian Can-
terooms.

It all happened at the time of the great re-
treat, a terrible head wound which, though borne with patience and cheerful fortitude right
to the last, ended fatally on April 20 at the
King George Hospital, London. The funeral
took place with full military honors at St. An-
drew's, Hornchurch. In the general condolence
and sympathy extended by the trade to Mr.
and Mrs. Arthur S. Dunlop, the writer begs
sincerely to participate.

Increased Prices of "His Master's Voice" Models

The gramophone trade is not unaffected by the
generally increased cost of commodities and ma-
terials, and it is not therefore surprising that
new prices are from time to time necessitated.
In this regard the Gramophone Co., Ltd., re-
cently advised the trade of an adjustment in the
price of their various models, the new rates to
go into effect May 15. Dealers were warned
that after this date any sale below the new
prices would be construed as a breach of the
price-maintenance agreement.

Vallorbes Jewel Needle for British Market

A British sales depot for the Vallorbes Jewel
Co. 50-record address has been established here
by the Murdoch Trading Co. On the face of it,
this new needle may be regarded as a veritable
godsend, for the supplies of steel for needles
does not extend to quantities likely to. The
scarcity still exists, and as I have reported in
these columns at different times we are re-
duced to meeting the shortage by collections of
used needles and placing them on the market
again after resharping. This is, of course,
not general, the percentage of repointed needles
being small in comparison with the sales of new
needles. Nevertheless, any efficient sub-
stitute, such as that now under mention, is wel-
come. The claim, however, that the Vallorbes
needle is good for fifty records should be ac-
ccepted, not as a generalization, but at least as
its Bksted effect on the wear of the records. On the other
hand, if the claim is justified by results, it must be
accepted as meaning that fifty is the safety
margin beyond which it would be undesirable
in the interest of the record to go. This is an
academic question. The number of records
played by one needle depends on the operator.
We have heard of metal needles being used
twenty or more times, and still considered good.
It should be used only once, but there are peo-
ple who fail to detect any difference in quality
after several times to the contrary, and therefore
in them it all right. Anyway the Vallorbes is
very welcome, and we have no doubt will find a
ready market.

The Clarion Record Exchange Plan

I am advised that the Clarion Record Co. is
preparing to exchange unsalable, worn, or other-
wise tire-d out records (cylinder wax only) for
new ones, on the basis of three to one. Each
returned record must be complete in its own
cylinder box with lid complete. Broken records

The Sense of Winner Records

Whoever is responsible for the Winner reper-
toire knows a thing or two. That is evidenced by the presentation each month of just those
titles which seem to be most in demand. Obvi-
ously, it is not merely coincidence, for the
lists, as we know, to have been prepared often
many weeks in advance of publication. It is
just the outcome of knowing one’s public—the
exercise of a discrimination which is at times
almost second-sight. The latest Winner pro-
gram to hand bespeaks this sense in a wonder-
ful degree. It contains a real galaxy of up-
to-date selling titles by such talent as for in-
stance the Two Bobos, the Elliotts, Stanley
Kirby, the Carlton Vocal Trio, De Busse (or-
gan accordion solos), the Band of H. M. First
Life Guards, Royal Court Orchestra, the Cor-
ner House Ragtime Band, and other artists
eminent good. A special issue is "On the Good Ship Yacki-
Hick-Doo-La," by the one and only Billy Mer-
son, the popular character comedian. With the
aid of a sort of buccaneering crew, Billy boldly
sails siege to the fair damsels, and we may be
sure he doesn’t get the worst of his temerity.
"When First We Met," on the reverse of this
disc, is a capital sentimental ditty in which Billy
Merson is at his best. Overseas traders could
not do better than carry a goodly stock of these
quick-selling records.

Gramophones and Records Wanted at the Front

These days when we hear so much regarding
the non-essentiality of the talking machine
trade, it is a severe commentary upon ignorant
scribes who never lose a chance to run down
the trade in that sense, that the Y. M. C. A.
are appealing for a large number of gramo-
phones and records on the ground that be-
ing urgently necessary at the Front, to make
good the losses incurred during the recent great
retreat, 130 fully equipped Y. M. C. A.
buts were destroyed. Who knows?

An All-British Gramophone at Last!

The story of an enterprising trader’s fight in
behalf of an industry that was previously mon-
opolized by enemy manufacturers was recently
told to the Sherorditch Military Tribunal by
Francis Nottingham, of the Rex Gramophone
Co. Since war broke out his machines had been
made from parts mainly imported from Switzer-
land.

TRADE-MARK

.Complete fifteen months, £1,000 paid as import duty. Mr. Nottingham explained how, after three years' continuous effort, he at last succeeded in getting a British firm to make motors and other parts. All British Rex Gramophone is now being supplied to the trade, and before long it is anticipated that the main output may honestly be described and guaranteed as British throughout. This accomplishment necessitated the placing of orders for thousands of different parts. Notwithstanding the almost hopelessness of the prospect during this period, Mr. Nottingham has won out. His persistency of effort has reached the success it deserves, and what I have seen of the British Rex Gramophone leads me to conclude that complete success is in store.

Incidentally it might be mentioned that Mr. Nottingham established his claim for exemption, the Tribunal agreeing that he was doing much better work than he could do in the army! Organize Important Association

It will be good news to many that a serious attempt is in being to grapple with the many problems which beset the trade. With this object a meeting of musical instrument manufacturers and others was held last month, the result being the formation of a society under the somewhat long-winded title of The Association of Gramophones and Musical Instrument Manufacturers and Wholesale Dealers. Of the important firms represented, the following may be mentioned: Barnett Samuel & Sons, Ltd., Barnes & Mullins, Beare & Sons, Besson & Co., Ltd., J. E. Hough, Ltd., J. G. Mardock & Co., Ltd., the Gramophone Supply Co., Ltd., Columbia Graphophone Co., Ltd., British Polyphone Co., Ltd., etc.

The general objects are: To promote, protect and secure the varied interests of manufacturers of and wholesale dealers in gramophones and musical instruments and their accessories. The specific objects will cover a variety of matters of vital trade interest, as for instance post-war conditions, etc., prospects, tariffs, import and export difficulties, supplies of raw material, transit facilities, wages, to supply information about foreign trade, etc. Membership is open to any firm or person engaged in the musical instrument trade as a manufacturer or wholesale dealer. The minimum annual subscription has been fixed at the sum of three guineas, prepaid. The present endeavor, it will be observed, excludes retail dealers from membership. Previous trade associations, long since defunct, were confined solely to the retail section. We now branch out in an entirely opposite direction, in which we hope success may be achieved. At no time perhaps was an association more necessary than to-day, when a strong lead is required for the direction generally of the whole trade. We should have welcomed an open invitation for membership of the retail trade, for undoubtedly the inclusion of the leading retailers would tend to strengthen the work of the association and carry influence in official quarters. However, while the position is one of great interest, we refrain from further comment at this stage, as undue criticism at this stage would perhaps not be of great advantage until the association is fairly "on its feet," as to say.

"Popular" Records to the Fore

Some of the many difficulties which beset British record manufacturers during war time were referred to in the course of an interview with the manager of the Sound Recording Co., Ltd., makers of the "Popular" series of records. One of the chief sources of concern is the constant upward tendency in the price of all materials, the effect being to render quotations for parcels of records almost impossible. The cost of paper bags has increased from few shillings per thousand to anything up to 35/-; insurance and freightage rates generally are to-day a serious item, not to mention the extra import dues levied on goods into the United States, and a hundred-and-one other wartime expenses too numerous to mention. The price of records must go up proportionately, and another general rise is likely within the near future. Notwithstanding, a big export trade is still maintained.

Up-to-date issues of "Popular" records are a regular feature, and many are always ready upon being able to obtain the latest London hits, vocal and instrumental. Details of the company's offer will be found elsewhere in this section.

What They Say of Zonophones

What they say of Zonophones is "Play that again!" The sentiment reflects nothing but universal appreciation of Zonophone quality. Glance at supplement No. 2 for 1918 and the reason is immediately obvious. Its fare is particularly rich in talent and the variety of selections must be available to all dealers. There are no less than twenty double-sided discs! G. O. 29 carries Harry Land's stirring appeal for £1,000,000 to complete the fund he is raising on behalf of maimed Scottish soldiers and sailors, and on the reverse side he sings that patriotic song, "Shoulder to Shoulder." The great violinist, Miss Mary Law, gives a fine example of her technique, the selections being accompanied with string quartet and piano. Victor Overture, Part 1 and II, the Bing Boys on Broadway, Victoryland selections, all by that splendid instrumental organization, the Black Diamond Band—represents typical examples of good recording. Other artists contributing to the list may be mentioned, Sydney Cottham, Herbert Payne, Foster Richardson, Peter Dawson, Florrie Forde, George Formby, Jukon Okoni (ukulele with piano), Elsie and Dorothy Southgate (violin and Mustel organ), Royal Croorna Orchestra, etc., a list that of a truth represents the essence of all good things musically.

Gertie Millar for Columbia

Another great musical comedy "star," in the person of dainty Gertie Millar, joins the ranks of those recording only for Columbia, the medium through which her talents are conveyed being the charming musical comedy "Flora," which graces the stage at the Prince of Wales Theatre, London.

"The Lilac Domino" on "His Master's Voice"

This attractive musical play is the rage of London just now, and judging by the favorable attitude of the public, it is likely to run an unusual period. It teems with music of an exquisite and light character—the mind-staying kind that attains the height of popularity by being hummed here, there, and everywhere. A series of six double records has been issued by "His Master's Voice" Co. consisting of instrumental and vocal numbers, played and sung by eminent artists.

Pathe Freres Appoint New Recorder

Congratulations to G. C. Hallett upon his recent appointment as Messor. Pathe's superintendent of recording. Of wide experience in...
all branches of the talking machine trade, Mr. Hallett is, we should surmise, eminently fitted for the job. His talents are exceptional and up-to-date. A fish from Waterford, where he late held the onerous position of manager of the Clarion Record Co., Ltd.

The Lilac Domino for Columbia
In "The Lilac Domino," L. Sack's magnif-
cent production at the Empire Theatre, London, has a feast of music the like of which has not been enjoyed in light opera for many years. At the Empire it proved itself to the highest degree, and the season has been a success for the production with original artists, the present being a series of six fine double records.

Trading Substitutes at the Victo Co.
Much interest has been aroused in British trade circles by the announcement in The Voice that the Victor Talking Machine Co. has replaced 2,000 of its cabinet factory male workers by women workers! The same scheme is operating in most of the gramophone factories here.

French Report
French Parliamentary papers contain the text of a report on the French Luxury Tax addressed by M. de Villeneuve, president of the Commission to the Minister of Finance. In view of the introduction of a similar impost in this country the President's explanation of the principles which guided his colleagues and himself in preparing the schedules of articles to be taxed is of interest, and the salient passages of the report are reproduced below. The actual schedules have already appeared in The Daily Telegraph and other periodicals.

It would have been vain (says the report) to attempt a rigorously exact definition of objects called luxury objects. We judge that the quality of luxury tax depends on three factors: the nature of the article, its price, and its destination. In the first category are included articles which are essentially de luxe, such as diamonds, pearls, jewelry in gold or platinum. In the second, objects which in a general way are in every-day use, such as clothing, but which are at the same time of a sumptuous character, when they fetch high prices. Finally, certain articles which are de luxe by nature, such as motor-cars, lose this character when they are employed in the exercise of a profession; for example, the furs of a chauffeur or the carriage of a doctor. The law, indeed, is intended to hit only the display of wealth and not the instruments of labor; it taxes luxury but does not wish to paralyze effort.

The first difficulty that the commission had to grapple with in drawing up the schedules consisted in making a classification as complete as possible; with designation sufficiently clear as to avoid all difficulties in application. In this the commission was not able to do better than to follow the customs of the trade; it is the traders who will, in the application of the law, the principal collectors of the tax; it was necessary, therefore, to make our schedules consistent to their traditions and their customs.

Since the tax is to be collected at once, the figures given represent current prices. The result has been that in a large number of cases we have allowed exceptional figures, clearly higher than those ruling for purchases before the war. It will evidently be necessary to proceed with a revision of these basic prices when the market resumes its normal state.

A very important question, and one which may have a serious reaction on the yield of the tax, is the question of the ruling of the Schedule B, which stipulates that the tax is due, not by reason of the sale price, but only by reason of the excess of this price over the basic price appearing in the schedule. This solution appears to satisfy the demands of equity and to accord with the conception of luxury which we have indicated above. Up to a certain price the purchase of a piece of furniture, of an article of clothing, corresponds to a real need: luxury and consequently the tax, only ought to begin above that price.

FAREWELL DINNER TO H. L. TUERS NOW IN THE SERVICE

H. L. Tuers, former manager of the dealer service department of the Columbia Graphophone Co., New York, left Saturday for Ithaca, N. Y., where he will take a course in training preparatory to becoming an officer in the Aviation Branch of the Signal Corps. Mr. Tuers was the guest of honor at a farewell dinner, given last Wednesday by his former associates, who presented him with an aviator's coat and helmet. This dinner, which was informal, served to emphasize the affection and esteem in which Mr. Tuers is held by every member of the Columbia organization.

Mr. Tuers is succeeded as manager of the

ing. One thing is certain: All customers are at-

A collection of records

FORMER ASSOCIATES OF H. L. TUERS ENTERTAIN HIM AT DINNER

tracted by a face that does not frown. It is well to keep this in mind.

This invention relates to a phonograph, and particularly to means for automatically causing the phonograph to cease all mechanical action after the stylus or needle has completed its course of travel relatively to the sound producing surface of the record.

A further object is to provide a record having means adapted to co-operate with features embodied in the phonograph structure for causing the rotation of the record to cease after the sound producing surface of the record has been traversed by the stylus or needle.

A further object is to provide a device which may be either incorporated into the record at the time of manufacture of the record, or which may be attached to the record at a subsequent time adapted to co-operate with features of the phonograph machine for causing the operation of the machine to cease at a predetermined time.

Figure 1 is a top plan view of a phonograph machine having a record in position thereon, provided with this invention, certain mechanism of the machine being illustrated diagrammatically. Fig. 2 is an enlarged vertical detail sectional view taken upon the plane of line II—II of Fig. 1. Fig. 3 is a fragmentary sectional view taken upon the plane of line III—III of Figs. 1 and 2. Fig. 4 is a similar view taken upon the plane of line IV—IV of Fig. 2. Fig. 5 is a perspective view of one of the parts included in this invention. Figs. 6, 7 and 8 illustrate modifications. Fig. 9 is a perspective view illustrating a further modification; and Fig. 10 is an enlarged sectional view illustrating still a further modification.

This invention relates to talking machine mechanisms. One of the objects of the invention is to provide improved means whereby the tone arm may be connected with machines having different types of amplifiers.

Figure 1 is a vertical sectional view of a talking machine in which the amplifier is inclosed in a mechanism for operating the bell-crank lever. Fig. 6 is a detail showing the means for connecting the bell crank and the lever for operating the same. Fig. 7 is a diagrammatic view of a motor operating circuit, shown in full lines, and a test lamp circuit, the latter being shown in dotted lines, as contemplated in this invention.

This invention relates to phonographs or talking machines. The principal object of the invention is to provide an improved mounting for the horn or sound conveyor which forms a part of the phonograph or talking machine. In the preferred form of the invention, the phonograph reproducer is caused to move across the record by mechanical feeding means, and another object of the invention is to provide improved means for rendering the mechanical feeding means inoperative and for disengaging the reproducer stylus from the record surface.

Figure 1 represents a view partly in elevation and partly in section showing the preferred embodiment of the invention. Figs. 2 and 3 represent views in perspective of parts of the device shown in Fig. 1; and Fig. 4 represents a view partly in section and partly in elevation of a detail of construction.

The present invention relates to certain improvements in means for reproducing sound, and more particularly in such as employ a rotating disk record.

The object of the invention is to provide an improved mounting for the tone arm whereby the necessary movements thereof are facilitated, and assembling of the various parts is simplified.

Figure 1 is a plan view of the top of a machine employing the invention, Fig. 2 is a sec-

(Continued on page 112)
LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS—(Continued from page 111)

The purpose of this invention is to provide an improved construction of a phonograph adapted to be combined with a piano and contained within the casing thereof.

Figure 1 is a perspective view of a piano embodying this invention. Fig. 2 is a front elevation of the phonograph mechanism contained in the piano case, showing certain parts of the piano case and mechanism for the purpose of indicating the relative location of the phonograph in the case. Fig. 3 is a vertical section at the line 3—3 on Fig. 2.

One object of this invention is to provide improved sound transmitting apparatus for talking machines which renders it unnecessary to employ a horn or cabinet construction such as has been the custom to employ prior to this invention.

Another object is to so construct the improved sound transmitting apparatus that it can be used in various positions and places, such for example as on an ordinary table or board and can be moved bodily independently of the record support.

Figure 1 is a side elevation of the invention shown in operative engagement with but mounted independently of a motor driven record. Fig. 2 is a view of similar nature to Fig. 1 but showing the invention out of engagement with the record. Fig. 3 is an enlarged section on the line 3—3 of Fig. 1 showing the upper portion of the horn in outside view. Fig. 4 is an enlarged sectional plan taken on the line 4—4 of Fig. 1. Fig. 5 is an enlarged fragmentary section taken on the line 5—5 of Fig. 4 showing a portion of the tone arm in outside view.

The object of this invention is to provide means for automatically locating the position of the tone arm and the diamond point or needle with respect to the starting point of the groove or path in the record, the device having particular application to the Edison phonograph where the tone arm is raised and lowered to separate the diamond point from the record or position it thereon preparatory to the operation of the machine.

Figure 1 is a plan view of the top of an Edison phonograph with the invention applied thereto. Fig. 2 is a plan view of the horn arm, with the invention connected thereon. Fig. 3 is a detail sectional view, taken on the line 3—3 of Fig. 4, showing a portion of the device mounted on the wall of the cabinet. Fig. 4 is an elevation of the horn arm and a section of the cabinet, showing the relative arrangement of the path-finding device thereon.

TOVE AX FOR PHONOGRAPH.—Robert H. Cone, Jr., St. Louis, Mo. Patent No. 1,264,017.

This invention relates to phonographs of the disk type, and its object is to enable both records having vertical undulations and those having transverse undulations to be played by the same instrument.

The invention consists in an arrangement of sound box and tone arm, and a joint connection between the sound box and the tone arm for enabling the sound box to be set in either of two positions at right angles to each other. The invention provides a joint connection between the sound box and tone arm permitting the sound box to be turned up off of the record and the invention. The invention also consists in a joint connection for holding securely the sound box in either of two positions of adjustment, and which permits changing from one position to the other by merely twisting the sound box with the hand.

Figure 1 is a side elevation of a tone arm and sound box embodimenting the invention, showing the sound box in position for playing records having vertical undulations. Fig. 2 is a longitudinal section of the same in a vertical plane through the axis of the tone arm; Fig. 3 is a cross-section of the tone arm on the line 3—3 in Fig. 2; and Fig. 4 is a cross-section of the elbow portion of the tone arm, on the line 4—4 in Fig. 2.

This invention relates to improvements in sound reproducing machines, an object of the invention being to provide improved means for modifying or retaining the sound waves during the operation of the device so as to bring out the desired expression, and to control the volume of sound by manually operated means without interfering with the ordinary functions of the device.

Heretofore, various attempts have been made to control the volume of sound, but it is understood that such devices have been defective, largely, because of the fact that the controlling device or damper is located too far away from the diaphragm so that the sound waves are shown backwardly, causing a confusion of sound and therefore interfering rather than aiding in the proper reproduction.

With these improvements the damper is located as close to the diaphragm as possible so that the control of the sound waves is had before any appreciable volume of air is in motion toward the outlet.

Figure 1 is a top plan view illustrating a preferred form of the invention. Fig. 2 is a view in longitudinal section, partly in elevation showing the improved damper located in a coupling connecting the sound box with the sound tube. Fig. 3 is a view in longitudinal section taken at right angles to Fig. 2. Fig. 4 is a view similar to Fig. 3 illustrating a modification in which the damper is in the sound tube and the coupling is dispensed with. Fig. 5 is a view in longitudinal section illustrating a modification in which the damper is located entirely in the sound box. Fig. 6 is a view in section on the line 6—6 of Fig. 5; and Fig. 7 is an enlarged view in section illustrating the butterfly valve or damper shown in Fig. 2.

SOUND AMPLIFIER FOR PHONOGRAPH.—Herman Thimig, Denver, Col., assignor to the Colorado Phonograph Co., same place. Patent No. 1,263,625.

This invention relates to improvements in means which, when used in conjunction with the horn of a phonograph, will amplify the sound of the instrument, obviate the harsh, metallic sound so apparent in such instruments, and eliminate all unnatural conditions in the reproduction of the voice or sound.

In the drawings, Figure 1 is an elevation view of the invention, partially sectional; Fig. 2 is a longitudinal sectional view taken on the line 2—2 of Fig. 1; and Fig. 3 is an enlarged sectional view taken on the line 3—3, Fig. 2.

This invention relates more particularly to means for modifying the sounds produced by a talking machine, and its principal object is to provide an improved expression device adapted for convenient manual operation to effect individual interpretations of musical or spoken compositions.

In the drawings, Figure 1 is a side elevation of a talking machine embodying the improvements; Fig. 2 is a broken sectional view taken vertically through the apex of the amplifier illustrating improvements of the invention in side elevation; Fig. 3 is an enlarged broken sectional view taken on a vertical plane through the mouth of the amplifier and the valve therein, successively to the view shown in Fig. 2; and Fig. 4 is a broken sectional plan view taken on a horizontal plane coinciding with the bottom of the deck of the talking machine.

Galli-Curci scored a great success in Los Angeles at her recent appearance there.
